DICTIONARY
OF
MUSIC AND MUSICIANS
VOL. V
SONG—Z

SONG. In relation to the study of music, a song may be defined as a short metrical composition, whose meaning is conveyed by the combined force of words and melody. The song, therefore, belongs equally to poetry and music.

The history of song in this article is treated in regard to country and not to period; it is confined to European¹ nations which have developed special characteristics of style, and is concerned rather with such characteristics than with the achievements of individual masters, whose work is discussed under their own names. It may safely be asserted that certain successions of sounds or intervals, varying with different nationalities, have in all ages possessed some particular significance and conveyed some message of meaning from man to man. So that the song of each nation has qualities and idioms of its own as distinct and definite as those of its language.

Vocal music is probably the oldest branch of the art; but from the fact that dance-songs preponderate in the music of nations whose musical culture remains in a primitive stage it is reasonable to conclude that vocal music may have been at first a mere accessory of the dance. (See DANCE-RHYTHM.) Choral singing at religious and other festivals was also a practice of very remote antiquity. Recitations by bards, commemorative of the exploits of heroes, were a further and distinct development of vocal music. Hence the work done by the minstrels, TROUBADOURS and TROUVÈRES, MINNESINGER and MEISTERSINGER (*q.v.*), will call for notice in their different countries.

FRANCE

France may legitimately occupy the first place in this scheme, as the European country which possesses one of the oldest songs in a written notation. This is a *Complainte* on the death of Charlemagne, 813. It may be found in a MS. in *fonds-latin* dated 1154, in the Bibliothèque Nationale in Paris,² and has been attri-

buted to S. Columbanus. The music has been reduced to modern notation by both Cousse-

¹ Originally this article contained a short section on song in the United States of America, now withdrawn since the subject could not be treated on historical lines parallel with those adopted for the song of European nations. The following books, however, offer material for the study of the several folk-songs implanted in America. See also the article NEGRO MUSIC.

H. E. Krehbiel, *Afro-American Folk-Songs*. A study in racial and national music. Pp. 176. New York, 1914.
 Eleanor Hague, *Spanish-American Folk-Songs*. Collected by E. Hague. Pp. 113. Lancaster, Pa., and New York, 1917. (*Memoirs of the American Folk-Lore Society*, vol. 10.)

Frances Denamore, *Teton Sioux Music*. Pp. xxviii, 561. Washington, 1918. (Smithsonian Institution. Bureau of American Ethnology. Bulletin 61.)

Olive Dame Campbell and C. J. Sharp, *English Folk-Songs from the Southern Appalachians*. Pp. 341. New York and London, 1917. *Songs from the Hills of Vermont*. . . . Texts collected and edited by Edith B. Sturgis. Times collected and piano accompaniments arranged, with historical notes, by Robert Hughes. Pp. 57. New York, 1919.

Twenty Kentucky Mountain Songs. The words collected by Lorraine Wyman, the melodies collected and the pianoforte accompaniment by Howard Brockway. Pp. 115. Boston, 1920. (Cf. *Lonesome Tunes: Folk-Songs from the Kentucky Mountains*, by the same collectors. Vol. 1, pp. 102. New York, 1916.)

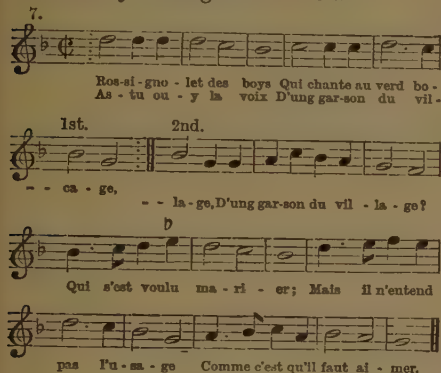

Several types of Oriental song are described under their own headings in the Dictionary.

² Another song in the same MS. on the battle of Fontenoy, 841, is said to be by one Angelbert, a Frankish warrior, who was present. Fétis, *Histoire générale de la musique*, iv. 473 et seq.

³ Fétis, *Histoire générale de la musique* iv. 474.

'When Israel came out of Egypt.' Again the origin is obscure, but already in the 9th century it was held to be very old. Like 'O filii et filiae' it differs in many ways from Gregorian music, but several old French songs could be given where the melody is almost note for note that of the *Tonus Peregrinus*. For instance, the 'Chant des livrées,' a very old song still sung at country weddings; or the beautiful 16th-century 'Rossignolet des bois.'¹

7.

Ros-si-gno - let des boys Qui chante au verd bo -
As - tu ou - y la voix D'un gar-son du vil -

1st. 2nd.

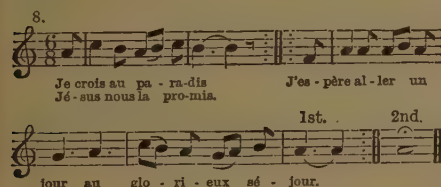

- - ca - ge, - - la - ge, D'un gar-son du vil - la - ge?

Qui s'est voulu ma - ri - er; Mais il n'entend

pas l'a - ma - ge Comme c'est qu'il faut ai - mer.

Modal melodies have existed for hundreds of years, and still exist all over France, but the commonest scales for the French folk-songs are the modern major and minor scales.² Among the most beautiful modal tunes are those found in Brittany, such as 'Le Clerc du Trémélo,' which is in the ecclesiastical Dorian or first mode; a singularly pathetic religious song sung in a time of famine, 'Disons le chapelet' in the Phrygian or third mode; and the well-known 'Ma douce Annette,' or the beautiful 'Le Paradis' (given below) in the Aeolian or ninth mode.³

8.

Je crois au pa - ra - dis J'é - s - père al - ler un
Jé - sus nous la pro-mis.

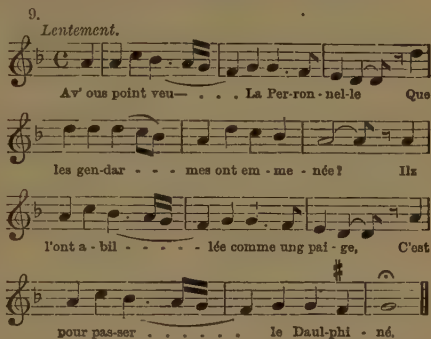

1st. 2nd.

jour au glo - ri - eux sé - jour.

The narrative form of song is very popular in France, and the generic term for this class

of song is the *Complainte*. The old Celtic epics and the later collection of epics made by Charlemagne, the *chansons de geste*, the early *romances*, the *légendes* of the Passion and of the Christian saints, and the old pathetic *ballades* of the peasants would all come under that name. The wonderful *légende* called the 'Ballade de Jésus Christ' is still sung in Picardy.⁴ The simplicity of the language and the modal melody point to its being of popular origin. The 'Chanson de la Perronelle,' which has lived in the mouths of the people for centuries,⁵ resembles the oldest *complaintes* in its poetic form, consisting of couplets of two lines without a refrain.⁶

9. Lentement.

A'v'ous point veu - - - La Per-ron-nel-le Que
les gen-dar - - mes ont em - me - née? Ils
l'ont a - bil - - - lée comme ung pa - ge, C'est
pour pas-ser - - - le Daul-phi - nd.

Tiersot calls attention to the strange fact, that although these *chansons narratives* were known to exist, they were far less often included in the collections made from the 13th to the 17th centuries than the *chansons satiriques*, *chansons d'amour*, *pastourelles*, etc. Of recent years their extreme beauty has claimed more attention, and many modern collections of them have been published.

Some strong impulse was evidently given to the human mind in Europe towards the close of the 11th century, and the songs of the Troubadours, like the numerous schools of philosophy which illuminated the 12th century, were fruits of an awakened ardour for intellectual pursuits. With the TROUBADOURS (*q.v.*) a new type of music was introduced, which may be described as songs written with conscious art. The Troubadours and Trouvères belonged respectively to the south and north of France, and wrote in the Langue d'Oc and Langue d'Oïl. At first the Troubadours and Trouvères sang their own verses, but the functions of the poet and singer soon became distinct. Hence a class of professional musicians arose, who sang the songs of their own lords and other composers. These wandering singers from Provence and Picardy, known as *Jongleurs*

¹ Tiersot, 'Mélodies,' p. 73.

² *Ibid.*, *Histoire*, p. 322.

³ The above are included in M. Bourgault-Ducoudray's 'Trente mélodies populaires de la Basse-Bretagne'; and here it would be convenient to state briefly M. Bourgault-Ducoudray's theory. He denies that these modal songs have their origin in the Church. His argument is that the modes found in these and other popular melodies, not only of France, but of Ireland, Scotland, Greece, etc., are actually the survival of music common to the early Indo-European race. He maintains that the Greeks alone cultivated music as an art; that the Church, taking its scales from Greece and afterwards carrying them to other countries, brought to Brittany, for instance, a kind of music which was already familiar to the Bretons in their popular songs; that the so-called modes may be as old and as common to many nationalities as many of the familiar words common to the different languages of the Indo-European family. On the strength of this, Ducoudray's nomenclature of the modes is the Greek and not the ecclesiastical, and this has been adopted by other Continental writers (see *MOSES*). Throughout this article, however, the Church names and Gregorian numbers of the modes are retained, except in the section relating to song in Greece.

⁴ This legend is widely spread in France. It is found in connexion with several saints in the *Legenda Aurea* of Jacobus de Voragine. See Champfleury and Weckerlin's 'Chansons populaires des provinces de France.'

⁵ The earliest record of the words and music of this song is to be found in a MS. in the Bibliothèque Nationale called 'Chansons du 18ème siècle,' published by Gaston Paris and Gevaert.

⁶ Tiersot, *Histoire*, p. 12.

or *Chanteors* in the south, and *Ménétriers* or minstrels in the north,¹ went from court to court, country to country, and joining the Crusaders they returned from the Holy Land filled with enthusiasm and singing songs of love and war. The war-songs or *chansons de geste* were musically uninteresting; they were merely long chanted tales where the melody only occurs in the short refrain. But the love-songs were poems of exquisite grace, perfect rhythm and highly expressive. Their very names reveal their origin, such as the *pastourelle*, *alba* and *serena*, *tensons* and *sirvente*.² To the Troubadours likewise may be ascribed the *canzo* and *canzone*, the *soula* (soulagement), a merry song, and the *lai*,³ which is of a melancholy character; and to the Trouvères more especially the *romance*.⁴ The Troubadours and Trouvères were not less fertile in the invention of dance songs, combining solo and chorus. Such were the famous *carol* or *rondet de carol*, the *espringerie* (or jumping dance), and the *ballata*.

The earliest of the Troubadours on record was Guillaume, Duke of Guienne, who joined the first Crusade in 1096. And among the illustrious Troubadours and Trouvères of the 12th and 13th centuries, whose names survive and many of whose melodies have come down to us, there were: Richard Cœur de Lion, Bertran de Born, Pierre Rogier, Bernart de Ventadour, the Châtelain de Coucy, Guirant de Borneil, Blondel de Nesle, Gracé Brulé, Hugues de Lusignan, Thibaut de Champagne (King of Navarre), Jehan Erars, Giraut de Calenson, Perrin d'Angecourt, Adam de la Bassée, Adenet le Roi and Adam de la Hale. The prime of the Troubadours was past when in the year 1320 the Troubadour Academy of Toulouse was founded for the cultivation and preservation of their art.⁵

The Troubadours and Trouvères owe great debts to the Church and to the folk-song. Their music was a compound of the folk-song for its melody and form; and of the Gregorian chant for its declamation and ornament. But inasmuch as the art of literature was then

highly developed, and music was still in its infancy, it was impossible to combine the elaborate and highly finished forms of poetry with the music then existing, and a new kind of song, more artistic and more developed, was the result. The Troubadours were eager to invent new, ingenious and graceful phrases, metres and rhythms,⁶ and their work was of real value in handing down the rhyming stanza as the most perfect vehicle for lyrical expression. Also, by the preference the Troubadours gave to the modern major scale they helped to establish it in European music before the close of the 13th century. In this, and in the simple repetitions of their musical phrases, they followed the popular instinct. And though the Troubadour melodies are more developed and finished than those of the *chansons populaires*, it is in many cases impossible to state with certainty which are folk-songs and which are the work of trained musicians. For instance, a pastoral song, 'La reine d'Avril,' belonging to the 12th century, is said to be of popular origin; it is melodious and rhythmical, it has a refrain, and the first little phrase is four times repeated. 'L'autrier par la matinée,' by Thibaut, King of Navarre (1201-54), opens with a phrase exactly similar, which is also

¹ The *Ménétrier* seems to have attained a higher standard of culture and taste than the *Jongleur*, who soon added other modes of popular diversion (such as juggling and acrobatic feats) to his musical accomplishments. It must, however, be remembered that the lower classes in France were untouched by the Troubadour movement, which covered the time from the 11th to the 14th centuries. They had nothing more in common with the *lais*, *sirventes*, etc., than they had with the old *chansons de geste*. The *Jongleurs* were the sole connecting link between the people and the courts.

² In the *pastourelle* the poet feigned to meet and woo a shepherdess; the *alba* and *serena* were subdues and serenades. The *tensons* were metrical dialogues of lively repartee on some disputed point of gallantry, and the *sirvente* was an address of a devoted lover to his mistress. To this latter form of composition, which was also much employed in satire, a special celebrity belongs, because its metre—the *terza rima*—was adopted by Dante and Petrarca.

³ See F. Wolf, *Über die Lais*.

⁴ The *romance* is the lyrical outcome of the narrative *complaintes* and *chansons de geste* in Northern France. 'Belle Yolans' of the 12th century is an example. See Tiersot, *Histoire*, p. 414.

⁵ There were schools in other parts of France where the Gay Science was taught, and whither the Troubadours repaired in Lent (when not allowed to appear in public) to learn new songs and melodies. The minstrels also had rights granted to them to form corporations or guilds in several towns. The earliest charter dates 1338, signed by Robert de Caveran, and lasted until the 18th century.

⁶ See P. Aubry, *La Rhythmique musicale des Troubadours*, etc., Paris, 1907.

repeated.¹ There is the same charm of sincerity and pretty sentiment about an older song, the Châtelain de Coucy's (1192) 'Quant le rossignol',² though the form is less concise. It is composed in phrases of seven bars each, like many other mediæval songs.³ Both are good illustrations of Troubadour songs.⁴

Very few *sirventes*, but many *pastourelles*, have been preserved from the 12th century. This period was specially rich in sacred and secular dramatic representations; and, as before stated, proses and canticles in plainchant melody are found side by side with light, rhythmical popular tunes. It is thus in 'Daniel Ludus' by one Hilaire, played in 1250. The 'Jeu de S. Nicolas' and 'Le Juif' were of the same type, at once sacred and comic. The character of the mysteries remained faithful to tradition; these were only a continuation of the liturgical dramas of the 11th century.⁵ But by the end of the 13th century the Trouvères had broken loose from the Church, and resorted to little village histories or love-stories for their material. 'Aucassin et Nicolette,' the well-known *chant-fable*, belongs to this time. Musically more important was Adam de la HALE's celebrated *pastorale* 'Le jeu de Robin et de Marion,' which was played at the court of Charles of Anjou at Naples in 1285. Tiersot has now shown that A. de la Hale probably wrote the play, and then strung together a number of popular tunes (many of them of far older date) to suit his words.⁶ Thus this *pastoral* comedy forms probably the oldest collection of French folk-tunes in existence. Adam de la Hale, together with Guillaume de MACHAUT, should more properly be classed among the *Chansonniers*, or the early musicians, who in the 13th century paved the way for the contrapuntal school, which for two centuries was to be the predominating influence in European music. To Adam de la Hale and G. de Machaut French music owes much; not only can the form of the future *vaudeville* be detected in the *pastorale* 'Robin et Marion,' but its chansons are strictly similar in structure and character to chansons of modern date. In the old and new alike we find a strongly marked rhythm, easy intervals, and a paucity of notes, repetition of one short melodic phrase, the major mode, the favourite 6-8 time, and an extreme simplicity of general plan.⁷ Though hundreds of years have passed since 'Robin

et Marion' was written, the song 'Robin m'aime' (Ex. 11) is still sung in Hennegau.⁸

11.

It should be noted that in the songs of this early period the melody is never protracted and drawn out to the detriment of the words, but closely follows the quick succession of syllables without visible effort. And these old melodies often have the Iambic rhythm, for instance⁹:

12.

ADAM DE LA HALE.

Contemporary with, or a little junior to Machaut, was Jehannot Lescurel, who wrote *romances* which are still extant in MS. One of these, 'A vous douce débonnaire,' which has been translated into modern notation by Fétis,¹⁰ exhibits a more developed melody and a more modern tendency than other productions of the same date.

If it be true that during the 14th and 15th centuries the Church exercised an exclusive dominion over music, she was nevertheless a friend to secular songs. By taking popular tunes for the themes of their masses and motets, such as 'L'homme armé,' 'Tant je me déduis,' 'Se la face ay pale' (used by Dufay); or 'Baisez-moi' (by Roselli), 'Malheur me bat' (by Josquin des Prés), etc.,¹¹ the musicians of the Church preserved many a melody which would otherwise have perished. 'L'homme armé' is undoubtedly the most famous song of the Middle Ages, and it owes its notoriety not so much to its beauty as to the fact that contrapuntal composers, from Dufay, at the end of the 14th century, to CARISSIMI (*q.v.*) in the 17th, used it more than any other folk-song. (See L'HOMME ARMÉ, Vol. III. p. 151.) From want of such adoption by the Church, some of the airs have been lost to which the curious old Noël's, printed in black letter at the end of

¹ Ambros, *Geschichte der Musik*, II. 227, and Tiersot, *Hist.* p. 371.

² Ambros, *ibid.* II. 223. Burney and Perne put these into modern notation, and, where they differ, Burney's are the lower notes.

³ Another of Thibaut's songs, 'Je me quidoie partir d'amour,' given by Ambros, II. 228, has an alternating rhythm of two and three bars, but it preserves a perfect symmetry of form.

⁴ Further examples of Troubadour songs will be found in Wolf's *Über die Laits*, Kieseewetter's *Schicksale und Beschaffenheit des weltlichen Gesanges*; J. Stafford Smith's 'Musica antiqua,' and in the histories of music by Ambros, Fétis, Burney and others. Also for modernised versions see Weckerlin's 'Échoes du temps passé,' vol. I.

⁵ See Lavoix, *La Musique française*, p. 41.

⁶ Tiersot's interesting and conclusive arguments are given in different places in his *Histoire de la chanson populaire*. See especially p. 422 et seq., and the article HALE, Adam de la, Vol. II. p. 495.

⁷ Tiersot, *Histoire*, p. 373.

⁸ This example is taken from M. Lussy and E. David's *Histoire de la notation musicale*, p. 108.

⁹ Ambros, *Ges. der Musik*, II. 235.

¹¹ Ambros, *Ges. der Musik*, III. 15 et seq.

the 15th century, were sung, though the names of the airs (such as 'Faulce trahison,' etc.) remain as superscriptions. (See NOËL.¹)

In that great age of serious polyphonic music a high place was held by the French school, or, to speak more correctly, by the Gallo-Belgian school, for during the 14th and 15th centuries no distinction, as regards music, can be drawn between northern France and Flanders.²

The direct use made of secular music for ecclesiastical purposes is remarkably illustrated by the works of Clément Marot. He was a translator of a portion of the Psalms; and the first thirty of them, which he dedicated to his king, François I., were set or 'parodied' to the favourite dance-airs of the court.³ Popularity was thus at once secured for the Psalms, which members of the court could sing to their favourite *courantes*, *sarabandes* and *bourrées*. After Marot's death Béza continued his work at Calvin's instance.⁴ Much doubt existed for a long while as to whom belonged the credit of having set the Psalms to music. Some ascribed it wholly to Marot, others to Goudimel; but M. Douen has now made it clear that these men, together with Jambe de Fer, Franc, Claudin and others, adapted the Psalms to old secular songs.⁵ In the 'Psauteur flamand primitif' (1540) all the psalms are for one voice, and with only two exceptions they can all be traced back to their sources in popular French and Flemish songs.⁶ (See PSALTER.)

While secular music was thus made to minister to the Church, it had a separate though less conspicuous sphere of its own. This is attested by the *vaux-de-vire* (or drinking-songs),⁷ *voix-de-ville* (better known by their

modern name of *vaudevilles*) and *airs de cour*, collected and published in the 16th century. Much grace, indeed, and gaiety were evinced in the poetry and music of the songs and romances of this period, and it would be wrong to disparage such writers as Guillaume le Heurteur, Noël Faignient, Pierre Vermont, and François I., whose song, 'O triste départir,' with music by A. Muret, is full of feeling. But more important work was undoubtedly being done by their polyphonic contemporaries.⁸

The effects of the great change which came over vocal music at the end of the 16th century were perhaps more marked in France and in the Netherlands than elsewhere. When once the monodic system had gained universal recognition polyphonic music began to decline, even where it had flourished most. Henceforward original melodies of their own invention were expected of musicians, and the old practice of choosing themes for their compositions in folk-songs or popular dance-songs died out, though its disappearance was gradual.⁹ Songs for one voice, such as the 'Airs de cour' of the early 17th century, accompanied by lute or harpsichord, began to find favour and to drive airs for several voices from the ground they had occupied for more than 150 years. And that most characteristic type of French song, the *romance*, was soon to begin, or rather resume, a reign of popularity which is not yet ended.

Scudo¹⁰ defines the *romance* as a song divided into several 'couplets,' the air always simple, naïve and tender, the words to treat of sentiment and love. Unlike the *chanson* it is never political or satirical. It was one of the very earliest fruits of French grace, sensibility and gallantry; and though its attributes may have varied from time to time, it remained unchanged in its essence from the era of the Troubadours until the 19th century. There was, it is true, a period after the disappearance of the Troubadours, when the *romance* was threatened with extinction by its formidable rival the polyphonic *chanson*, but the 17th century saw it again in possession of all its

¹ A list of collections of Noël is given by Tiersot, *Hist. p. 242*.
² The importance of the French chanson as a factor in the transformation of the whole of European music in the second half of the 15th century can scarcely be overrated. Its extraordinary vogue is attested not only by the numerous publications of French music-printers, but by publications issued in foreign countries such as those of Venice, Louvain, Antwerp, Nuremberg. Moreover, as early as the second half of the 15th century, the chanson becomes an important element in instrumental music, through its transcriptions for the keyboard instruments, and later on for the lute. An important general bibliography forms the sequel of three articles by A. Jeanroy, J. Tiersot and E. Muret, in the *Grande Encyclopédie*.

M. L. P.

³ Weckerlin says in his 'Échos du temps passé,' III. 186, that when any dance-air became popular, rhymers immediately 'parodied' it, i.e. put words to it, so that it could be sung. The term 'parody' thus had no sense of burlesque, but it simply meant adaptation. The Ballardiers issued a quantity of these songs. 'L'Abellie,' a well-known example, is really a minuet.

⁴ Calvin, who detested the arts, recommended music, nevertheless, from the purely utilitarian point of view, 'la parole chantée qui porte beaucoup plus fort.'

⁵ See Clément Marot et le psauteur huguenot, I. 606. One of the most noted is the magnificent Huguenot Battle Hymn, 'Que Dieu se montre seulement' (Psalm 68), sometimes called 'La Marseillaise huguenote.' It is a secular tune of Alsatian origin, and it appeared first in the first edition of the Strasbourg Psalter.

⁶ For *cantiques*, moreover, as well as masses and psalms, secular airs were openly utilised. And according to Douen (pp. 688 and 708) the Roman Catholics have never ceased to adapt secular airs to ecclesiastical uses from the 16th century down to the present time. He supports this statement by reference to 'La pieuse alouette avec son tire-lire; chansons spirituelles, le plupart sur les airs mondains, par Ant. de la Cauchie, 1619'; 'Imitations de Jésus-Christ en cantiques sur des airs d'opéra et de vaudevilles, par Abbé Pelgrin, 1727' (Paris); and 'Concerte spirituels,' a collection published at Avignon in 1835, of masses, hymns, Requiem, prayers, etc., on operatic melodies by Gluck, Piccini, Mozart, Cimarosa, Rossini, Méhul and others.

⁷ Baselin and Jean le Houx, who lived in the little valleys (*vaux*) around Vire in Normandy, in the second half of the 15th century, wrote many favourite drinking-songs, and hence drinking-song came to be called *vaux-de-vire*. Some writers have confused this term with the *voix-de-ville*, which applied to chansons sung in the streets, and later to any songs with gay airs and light words. Jehan

Chardavoine's famous collection of monodic songs of the 16th century is described as containing *vaux-de-ville* and *voix-de-ville*, chansons de ville, pièces littéraires avec leur musique originale, telle que 'Mignonne, allons voir à la rose,' by Ronsard, etc. See Tiersot, *Histoire*, pp. 228 and 433 for other similar collections.

⁸ A celebrated collection, with a dedication to Charles IX., by Ronsard, was published in 1572, under the title of 'Mélange de chansons,' and it contained songs for four, six and sometimes eight voices by all the best-known Gallo-Belgian composers, such as Josquin, Mouton, Claudin, etc. These songs, like others of the same date, have strong melodies, and are full of canonic devices. Pierre Ronsard's sonnets were set to music by Philippe de Monte, in five, six and seven parts, and his songs in four parts, by Bertrand and Reynard. Mention should also be made of Crespel, Ralf, and Clement Jannequin, whose descriptive songs (such as the *Oris de Paris*) formed a new feature in music, also Gomberi and Certon. But with the true polyphonic song this article is not concerned.

⁹ When public opinion first ceased to approve this practice composers did not at once abandon it, but they no longer produced vocal pieces which were avowedly parodies or adaptations; it now became their habit to attach their names to all their melodies, whether they were original or borrowed. As a typical case 'Charmante Gabrielle' may be quoted: neither the words of which were by Henri IV. nor the music by his maître de chapelle, Du Courroy. The air is really an old Noël of unknown authorship, and probably some court poet, Desportes, perhaps, wrote the words. See also J. B. Weckerlin, 'Chansons populaires du pays de France,' II. 217.

¹⁰ Scudo, *Critique et littérature musicales*, vol. II.

old supremacy. Louis XIII. wrote several; and his music-master, Pierre Guédron, was perhaps the foremost composer of romances of that time. One of the best examples of his work, 'Aux plaisirs, aux délices, bergères,'¹ contains modulations which are remarkable for that date. Guédron's son-in-law, Boesset, was the author of a very famous romance, 'Cachez beaux yeux.' And the names of Beaulieu, Deschamps, Colasse, Bernier, Lefèvre, Lambert and Pierre Ballard may be recorded as composers of this age. The last (whose 'Belle, vous m'avez blessé,' was a favourite) was a member of the famous Ballard family of music-printers and also composers. As printers they preserved a large quantity of *brunettes* (see BRUNETTE), *musettes*² and other dance-songs and drinking-songs. Several *brunettes* were included in the great collection of the old French popular songs which A. Philidor copied out with his own hand and dedicated to Louis XIV. Many were undoubtedly written on old Noël airs, especially those in parts.³ After the 17th century they became scarcely distinguishable from romances.

For excellent and typical specimens of the romances of the 18th century we may quote J. J. Rousseau's 'Le Rosier' and 'Au fond d'une sombre vallée,' both of which are found in his collection entitled 'Les Consolations des misères de la vie.' The musicians of this period seem to have been inspired by the grace and delicacy of contemporary poetry to create tender and simple melodies. Insipid as these songs must seem to us now, they are thoroughly representative of the age which produced them. It was the time of that singular phase of thought and feeling which will be for ever associated with the name of J. J. Rousseau; a time of yearnings to return to some imagined state of native innocence, to an ideal pastoral life in some visionary and often artificial Arcadia. All this was faithfully reflected in the works of its poets and musicians. Monsigny instinctively returned to the style of the folk-song, even to the *pastourelle* and *complainte*. His frequent use of the minor seventh of the scale gives a touch of mediævalism to his songs⁴:

13.

¹ Published in Weckerlin's 'Échos du temps passé,' vol. III. p. 10. It is taken from a very rare collection entitled 'Airs de cour de différents auteurs, 5 livres, publiés de 1615 à 1628. Paris, chez Pierre Ballard.' (Guédron's melody is in the first book.)

² Here we may mention the drone-bass which occurs so frequently in musettes and other dance-songs. Numerous examples may be found in Weckerlin's 'Échos du temps passé.'

³ In Weckerlin's second vol. of his 'Échos du temps passé' he states that this collection especially characterises the 17th and 18th centuries, and 'though written earlier the songs were only published when their popularity was great enough to justify it.' Weckerlin gives a valuable list of the collections drawn upon for this volume with full descriptions and dates. The favourite 'Menuet d'Exaudet' (Exaudet was a famous dancing-master), with words by Favart, is included among the *chansons à danser*. All these dance-songs, except the minuet, are in common or 2-4 time, and in regular periods.

⁴ Tiersot, *Histoire*, p. 525.

Grétry, on the other hand, who was a far more advanced musician, consciously set himself the task of reproducing the old melodic form of the folk-song. He confesses to have written the romance of Richard Cœur de Lion, 'Une fièvre brûlante,' *dans le vieux style*.⁵ And certainly when the little art-songs or romances of this period are closely examined, they show externally but little difference from the folk-songs, though in their essence they are wide apart, being artificial rather than natural and spontaneous. As examples it will suffice to mention a few favourites such as: Monsigny's 'O ma tendre musette' (words by La Harpe); 'Il pleut, bergère,' by Simon; 'Les petits oiseaux,' by Rigel; 'L'amour fait passer le temps,' by Solié; 'Le point de jour,' by Dalayrac; 'Annette et Lubin,' by Favart and 'Que j'aime à voir les hirondelles,' by Devienne.

Although romances were so much in vogue and reached so high a degree of popularity there were songs of other kinds written by the composers of the 18th century of equal importance. Amongst these, political songs are prominent, and in no country have they been more so than in France. The Mazarinade of the 17th century was a vast collection of more than 4000 satirical effusions against Mazarin, adopted to popular airs. Early in the 18th century was heard the famous song, 'Malbrouk s'en va-t-en guerre,'⁶ and later on, in the first throes of the Revolution, the Royalists were singing 'Pauvre Jacques' (words by the Marquise de Travenet), and the air resounded with 'Ça ira,' from the throats of the insurgent rabble of Paris. 'O Richard, ô mon roi' and 'Oh peut-on être mieux' have become historical by their use at the same terrible period. As might have been expected of so profound a movement, the Revolution gave birth to many remarkable songs. To the stormy years at the close of the 18th and the opening of the 19th centuries are due the finest *chants* or patriotic songs of France. Supreme among these stands the MARSEILLAISE (*q.v.*), which has won immortality for its author and composer, Rouget de Lisle. Next in fame come three songs of Méhul's, the 'Chant du départ' (words by Chénier), the 'Chant de retour,' and the 'Chant de victoire.' And by the side of these may be set the fine 'Réveil du peuple' by Gaveaux, and the 'Père de l'univers' by Gossec. Contemporary with these songs, but on a lower level of political importance and musical value, were 'Cadet Rousselle,' the 'Chanson de Dagobert,' 'Fanfan la tulipe,'⁷ 'Te souviens-tu,' the 'Récit du caporal,' and many others it would be tedious to enumerate. Of a different kind was the official national anthem of the Restoration—the beautiful

⁵ Grétry, *Essais sur la musique*, I. 368.

⁶ For the tunes see J. B. Weckerlin's 'Chansons populaires du pays de France.'

⁷ An old song of irregular metre by Souffrière de St. Marc, set to an old tune, and extremely popular between 1792 and 1802.

old song 'Vive Henri IV,'¹ which was much in vogue in 1814 after the Allies entered Paris.

After the accession of Napoleon and the accompanying revival of monarchical traditions, the demand for *romances* was more eager than ever, and there was no lack of composers ready to supply it.² The most successful were Plantade, Garat, Pradher and Lambert. Another popular contemporary, possessing more musical erudition, was Dalvimare, whose 'Chant héroïque du Cid' is a fine song. Choron was founder of a school whence issued Duprez, Scudo and others, who were both singers and song composers. The names of several women should also be included among *romance* writers: Mme. Gail, Queen Hortense, Mme. Duchambge and Loïsa Puget. The first named was the best musician. About Queen Hortense there was more of the amateur composer, and she would trust to Drouet, Carbonnel, or Plantade to put her airs into musical shape. Her best songs were 'Partant pour la Syrie' and 'Reposez-vous, bon chevalier.' Mme. Duchambge owed her reputation to the skill with which Nourrit sang her songs, and Loïsa Puget was a favourite in schools and convents. Of others who wrote about the same time and in the same manner, it will suffice to mention A. de Beauplan, Panseron, Jadin, Bruguère, Mengal, Dolive, Berton, Lis and Pollet. As a general reflection on these songs, it may be said that their most common fault is the endeavour to express inflated sentiment with inadequate means. A discrepancy is constantly felt between the commonplace simplicity of the accompaniments and modulations, and the intense sentimentality or turgid pomposity of the words. The disparity could only be concealed by highly dramatic or expressive singing.

Out of the revolutionary era of 1830 there came in France a splendid outburst of lyric poetry. This was the era of Victor Hugo, Lamartine, Delavigne, Alfred de Musset and Béranger. And it was natural that the song should be responsive to the poetic movement of the time. In 1828 Monpou's setting of Béranger's 'Si j'étais petit oiseau' attracted the notice of the poets of the Romantic School. Many of de Musset's and Victor Hugo's ballades and romances were also composed by him. But Monpou (*q.v.*) was not a highly trained musician; though striking and original, his music was faulty. He was a slave to the influence of the Romantic School, and his songs well illustrate the extreme exaggeration to which it was prone. Similar qualities were likewise displayed by an incomparably greater musician, Hector BERLIOZ (*q.v.*). In him there was a

depth of poetic insight and a subtle sense of beauty to which Monpou could make no pretension. Another musician allied to the Romantic School was Félicien David, who, without being a song-writer, indirectly influenced later composers' songs by introducing the element of orientalism into French music. This, with its strange Eastern rhythms and tonalities, has attracted many subsequent composers.

The 19th-century opera-composers, such as A. Thomas, Gounod, Saint-Saëns, Delibes, Bizet, Reyer, Joncières and Massenet, wrote some truly lyric songs. Gounod had a distinct lyric talent, and strongly influenced his generation. Among his best may be named 'Le Vallon,' 'Le Soir,' 'The fountain and the river,' 'Ring out, wild bells,' 'Le Printemps,' 'Medjé,' and the collection of twenty songs entitled 'Biondina,' which are full of the Southern spirit. Massenet possessed much the same sensuous vein of melody, but the form of his songs is more concise, and his accompaniments more brilliant. In the songs of Saint-Saëns, Lalo, Bizet and A. Chabrier there is individuality; but they, as well as Widor, Joncières, Guiraud, Dubois, Paladilhe, Pierné, Boisdéffre, Lefebvre, Augusta Holmès, Thomé, Chaminade and other lesser composers are greatly indebted to Gounod, and generally speaking may be said to belong to the old school. Delibes and Godard should also be included, but their music has a distinct character of its own. Amongst his other works, Léo Delibes wrote many graceful, refined and typically French songs, full of colour; whilst Benjamin Godard chiefly distinguished himself in this lyric form by the peculiar charm and melancholy sentiment of his songs.³

A totally different school of song from that above described now exists in France. At the present day the old rules of form, cadence and harmony are discarded; a studied simplification of melody, restless modulation, vague tonalities and a preference for prose rhythms⁴ prevail and indicate a radical change of method. The causes, direct and indirect, are varied. M. Bruneau attributes the new seriousness of French composers to the results of the disastrous war of 1870, and the misery and gloom which overshadowed France. Wagner's influence again penetrated through opera to song, realising the importance of the sound of words as well as their meaning, and equalising the importance of the instrumental part and the voice parts. Another incitement to change is based on the revival of the folk-song now used by modern song-writers, not only as a medium of national or local colour but as a source of

³ Godard has been aptly described as a musician of the autumn or of the twilight (see *French Music in the 19th Century*, by Arthur Harvey).

⁴ A. Bruneau, in *La Musique française*, at p. 233, speaks of his efforts to combine prose with music, and adds that Saint-Saëns and he himself agree in thinking that in time prose will supplant poetry in drama and song.

¹ Henri IV., 1553-1610. The melody is certainly older than his date, as it first appears as the *tremble* of a Noël in a collection published in 1581.

² Specimens of these little songs are to be found in Weckerlin's 'Chansons populaires du pays de France.'

inspiration.¹ Musicians, no less than painters, have their *plein-air* school. The love of nature and its elements, of the earth and of the growths of the soil has asserted its empire in the kingdom of art.² But while the influence of the folk-song conduced to simplicity, another influence stamped French song with a new impress. César Franck (a Belgian by birth but a naturalised Frenchman), a profound scholar, an idealist by character and aims alike, raised the level of contemporary art to a greater seriousness, and gave it a more complete emancipation. The special quality assimilated by the younger school of French song-writers is the element of mysticism. In César Franck's song, 'La Procession,' a noble simplicity and fervid mysticism are displayed, which exemplifies what has been said above. In adopting Franck's mysticism, it is stated that some of his followers have forfeited their race qualities of clearness of design and straightforwardness of expression. But their gains are manifest if we study the songs of Gabriel Fauré, Vincent d'Indy and Alfred Bruneau, and compare them with the romances and songs of the older school. In this generation song-writing was raised to a far higher plane. Gabriel FAURÉ (*q.v.*) was a song-writer *par excellence*. After these comes DEBUSSY (*q.v.*), with his conspicuous originality and aloofness of thought, the passing impressions of his dreams and ideals, and the atmosphere of the poem he sets.

To the above names may be added as typical of recent developments in French song: G. Charpentier, Reynaldo Hahn, E. Chausson, L. Wurmser, C. Blanc, E. Moret, P. de Bréville, H. Duparc, H. de Gorsse, E. Trémisot, L. Moreau, P. Vidal, G. Marty, S. Rousseau, Hillemacher frères, G. Ropartz, A. Chapuis, A. Gédalge, De Castillon, G. Hüe, M. Ravel.

It is necessary to add that modern French poets have had a great influence on these composers, and there exists a close sympathy between them. Obscurity of form, eccentricity, a feverish egoism which tends to over-subjectiveness, a subtlety which to an exaggerated degree substitutes suggestion for expression may be defects; but an aptitude for intensity in the presentment of emotional themes, and an acute perception of the artistic values of personal emotion, a keen appreciation of evasive effects, of the fugitive and illusive beauty of sounds, implied or felt rather than heard—these are amongst the gifts they have utilised to the full.

¹ M. Tiersot truly remarks that 'the element of the folk-song vivifies and refreshes art, for it comes direct from the deepest source of inspiration in a nation.' But it is not only the spirit of the peasant's lyric and dramatic songs that modern composers have assimilated; they also make use of the old forms, such as the *chansons à danser*, *ballades* and *legendes*. These are frequently found in Bruneau's and his contemporaries' works; and Charpentier, in his opera 'Louise,' has used the old *cri de Paris* as Clément Jannequin did centuries ago. Many composers also have thought it worth their while to collect and arrange the folk-songs; see for instance Vincent d'Indy's 'Chansons populaires recueillies dans le Vivarais,' and Bourgaud-Ducoudray's beautiful volume of 'Trente mélodies populaires de la Basse-Bretagne.'

² Bruneau's 'Liens de France,' and 'Chansons à danser' form a striking example of the above qualities.

SPAIN AND THE BASQUE COUNTRY

In Spain song has a long and varied history. Art-song developed early, in the works of the Spanish lutenists, or *vihuelistas* (v. VIHUELA); and the first book of tablature, 'El Maestro' of Luis MILAN (1535), contains a number of songs and settings of ballads, which are not necessarily folk-songs, and have accompaniments written in a real instrumental style.

² The writer is also indebted to Mr. Walter Ford for permission to quote from his Lectures on French Song, 1905.

³ Most of the collections contain valuable information about the songs given.

1. L. MILAN. (1535.)

Y por siem pre

vos a ma-ré

Vihuela.
(effect: 8ve lower.)

It is curious, however, that the later lute-songs tend more and more to become transcriptions of madrigals or madrigalesque compositions founded on folk-songs. The Italian chamber-cantata with figured bass did not find many imitators in Spain. To judge from existing MSS., Spanish singers of the 17th century preferred genuine Italian works (especially Alessandro Scarlatti) to native imitations. There are a few MS. songs by Hidalgo and other 17th-century composers, to figured bass, and the surviving works of MARIN (*q.v.*) for bass or guitar (on which, in Spain, the continuo was often rendered) show a considerable and original talent. In the 18th century the art-song appeared chiefly as a part of the TONADILLA (*q.v.*); in the 19th it degenerated into drawing-room ballads mainly intended for exportation, and it was only in the 20th century that the Spanish art-song, in the hands of Falla, Granados, Pahissa, Turina, Vives and others, regained the position it had held 400 years earlier in the time of Luis Milan.

Poverty in art-songs is, however, amply rewarded by the wealth and variety of Spanish folk-songs. There is an initial difficulty in determining whether many of them are more properly songs or dances, for song is now (and apparently has always been) an accompaniment to dancing. But the basic form is the VILLANCICO (*q.v.*), which goes back to the time of the Muslim occupation of Southern Spain, and seems to be connected with two forms of vulgar Arabic verse (*muwashshah* and *zajal*), which had their origin in the Spanish Peninsula. It is found in the early songs of all the different regions of Spain (except the Basque Provinces). These may be divided as follows: (1) Galicia; (2) Catalonia and the Balearic Isles; (3) Castille, including Estremadura, León, Asturias, the 'Montaña' of Santander and also Aragon and Navarre; (4) Andalucía and Murcia; (5) the 'Levante' (S.E. coastal provinces); and (6) the Basque Provinces.

(1) GALICIA.—To the N.W. corner of Spain belong the earliest Peninsular songs which have

been preserved: the so-called 'Siete Canciones de Amor' of MARTIN CODAX (*q.v.*), which are in parallelistic verse-form and free musical rhythm, *e.g.*:

2. MARTIN CODAX. (18th cent.)

On-das do . . mar de Vi-go,

se vis-tes . . meu a-mi-go,

e. ay De-us, se ve-rra . . ce-do.

and the 'Cantigas' of ALFONSO X. (*q.v.*), which are in Villancico-form and based on rhythmic principles analogous to those of the songs of the Troubadours, *e.g.*:

3. ALFONSO X. (13th cent.)

A-le-gri-a. a-le-gri-a. [Fin.]

Fa-ça-mos iá to-da-vi-a. [D.C. al fin.]

Muigrand'a-le-gri-a fa-cer de-ve-mos; ca Deus quis mo-rrer.

These are of mixed origin; some have been referred to French types.¹ Others have been compared (somewhat unconvincingly, perhaps) with modern songs and dances heard in Andalucía.² The melodies of Martin Codax, however, are admitted to be genuinely Galician in feeling. Their tonality, melodic formulae and cadences are like those of the *Alalás* (*v. infra*), still sung by country people in remote parts of Galicia; the example quoted shows this clearly in the opening phrase. There is no real difference between the ancient Galician melodies in free rhythm and similar melodies which appear later in rhythms of 6-8 or 3-4. The essential feature is the melodic line, together with certain set turns of phrase, typical cadences and a tonality which is strongly diatonic. These qualities are largely due to the influence of the native instrument, which is not the guitar, but the bagpipes (*gaita gallega*), a diatonic instrument, with a compass extending from the b below the middle c¹ up to d³ and including b¹ flat as well as natural. Another traditional instrument is the hurdy-gurdy (*zanfonia*), also diatonic, tuned in G and producing this scale (with F[♯] as well as F[♮]) for two octaves. The modes found in Galician popular song include Dorian, Phrygian, Mixolydian and Aeolian

¹ Collet and Villalba, *Bulletin Hispanique*. Bordeaux, 1911. P. 270 ff.

² Ribera, *La Música de las cantigas*. Madrid, 1923.

(D, E, G and A modes) in their authentic and plagal forms. Among twenty or more *Alalás* in the collection of the Archæological Society of Pontevedra, 5 are Hypodorian, 5 Mixolydian, 4 Hypophrygian, 4 Lydian, 1 Phrygian and 1 Hypomixolydian. Another characteristic of Galician tunes is the resemblance of some of them to Gregorian melodies, not only in the mode, but also in melodic formula and cadence. The difference is rhythmical, not melodic.

The *Alalá* is a short melody sung to 4 8-syllable lines of verse. It is always repeated in the course of the stanza, and the singer is apparently allowed to add as many grace notes and flourishes as he pleases. Related to the *Alalá* are many types of popular song: cradle-songs, ploughing-songs, songs for 'braking' the flax, *arrieros* (the songs of muleteers) and *canteros*, formerly sung in quarries, before the introduction of modern machinery, for the 'Altogether . . . Up!' (*In arriando . . . alto!*) The ancient songs of pilgrims to the shrine of St. James of Compostela also bear a certain likeness to the modern *alalás*.

Instrumental forms include the *ALBORADA* (q.v.); while dance music is represented by the *Muineira*, a form in 6-8 time, which has given rise (from the rhythm of the words which can be fitted to it) to an anapæstic measure known as the 'rhythm of the Galician bagpipes' (*ritmo de gaita gallega*). Various sword-dances are known; there is one to be seen on the day of Corpus Christi at Redondela, a town famous in folk-song for the beauty of its women and the fatness of its priests. The dialect of this region, and the language of its folk-songs, has more affinity with Portuguese than with Castilian Spanish.¹

(2) CATALONIA (including Valencia and the Balearic Isles). On the E. coast of Spain it is still possible to hear music actually performed in a traditional manner, which dates at latest from the 14th cent. This is the *Song of the Sibyl*, heard every year at Christmas in the cathedral at Palma de Mallorca (also reported from Manacor and Marratxi, Mallorca, and from the Catalan-speaking district of Alghero, in Sardinia), and the *Virgin's Complaint* sung in the MYSTERY OF ELOHE (q.v.).

4. SIBYL. Mallorca.

Lo . . . jorn del ju . . . etc.

di . . . ci,

The 14th cent. MS. known as the 'Llibre Vermell' (Montserrat) contains a number of songs (sometimes in 2 or 3 parts) sung by pilgrims to the shrine. One of these, *Polorum*

Regina, is a fine 6-4 tune which was heard and recorded 200 years later in the neighbourhood of Salamanca by SALINAS (q.v.).

5. MONTSERRAT. (14th cent.)

Po-lo-rum Re-gi-na om-ni-um

nos - - tra, Stel-la ma-tu-

- ti-na de-le-see-le-ra.

An-te partum Vir-go De-o gra-vi-da.

In Catalonia, Valencia and the Balearic Isles the language is not Castilian Spanish, but *Catalan* (related to Provençal), and the songs have often a French rather than a Spanish character. The subjects, too, are sometimes identical, as for instance 'La bona viuda' and the French 'Jean Renaud,' though the tunes vary.²

6.

Ma-re mi-sa, ma-re, sen-to gran ru-i-do

Ne son las can-bre-ras, que sal-ten y riu-en.

Yo no dor-mo no, no es-tich a dormida.

Many Catalan songs possess a *tornada* or refrain (equivalent to the *vuelta* or *estribillo* of a *villancico*), which may occur at the beginning, middle, or end of the song. It may be heard in 'La Dama d'Aragó,' one of the best and most popular songs in Catalonia.

7. CATALONIA.

AA-ra-gó n'hi ha u-na da-ma qu'és bo-ni-ca com un

sol; te la ca-be-lle-ra ros-sa, li arri-

[Tornada.]

-ba fins als ta-lons. Ai, a-mo-ro-sa Ag-na Ma-

-ri-sa, ro-ba-do-ra del'a-mor, ai a-mo-rós.

Numbers of old ballads exist (e.g. the legend of Count Arnold, 'El Comte Arnau') together with epic, lyric and dance songs; while the religious or legendary songs are especially numerous, and the melodies often beautiful. Both melodies and words seem to have reached

² The many varying versions of this famous song, known in Italy as 'Comte Angiolino' and in Brittany and Scandinavia as 'Sire nan,' and 'Sire Olaf,' are familiar to all students of folk-lore. A. Branchet and Gaston Paris have published articles on this song in the *Revue critique d'histoire et de littérature*. It is remarkable how many Catalan songs have their counterparts among Scandinavian songs, especially as regards the words. A. H. W.

their present forms at the end of the 17th cent. or the beginning of the 18th.

The national dance of Catalonia is the *Sardana*, which has seen a great revival in recent years. It is danced in a large ring to the accompaniment of the *fluvíol* (or *flaviol*) a small flute played with one hand, while the other beats a drum.

(3) CASTILLE. The songs of central Spain, including Old and New Castille, Extremadura (S.W.), León (N.W.), the Asturias and the Montaña of Santander (N.) have often been dismissed as less interesting than those of other regions, just as English folk-songs were neglected in favour of those from the Celtic parts of the British Isles. Recent research, however, tends to show that Castilian songs have great variety and individuality, though they have not that curious property of Andalusian song, of forcing its way into other provinces and contaminating the melodies found there with 'Andalusisms.'

Castilian folk-songs were first noted by Francisco SALINAS (*q.v.*), professor of music at Salamanca at the end of the 16th century, though the melodies he printed in his 'De musica libri septem' (1577) were used to illustrate a discussion of rhythm and prosody. They did not escape the notice of Dr. Burney,¹ who quoted several of them in his 'General History of Music.' Subsequent authors have sometimes been less accurate in their transcriptions, making arbitrary alterations in the rhythm as well as to the words.² Considered merely as tunes, the *villancicos* of this period are generally more interesting than the ballads (*romances*); but the latter, besides their literary and historical interest, are of great importance in the history of Spanish music. They are remarkable for their rhythms, *e.g.* the constant and characteristic hesitation between 3-4 and 6-8, the 3rd mode (Phrygian) cadence, the basis of most popular music heard to-day in Andalusia, and their influence on the history of variation. The first singers of *romances* were the *juglares*,³ men and women who made their living by public performance of poetry, music and dancing, as well as by jugglery and acrobatic feats, sometimes in public squares and sometimes in the houses of the great nobles. The 'jugglers' were always travelling from place to place, and came to Spain from all parts of Europe including England and Scotland, for the English 'jugglers' of the 14th cent. were famous for their playing on the harp. While the Galicians were singing parallelistic love-songs like those of Martin Codax (see above), and the Catalans and Provençaux were displaying their carefully turned rhymes, the Castilians preferred the recital of heroic deeds and fragments of epic

chansons de gestes (see French section above), which were eagerly listened to by the official chroniclers and afterwards included in their histories as a true account of what had taken place. These wandering musicians were the inventors of Castilian poetry. They were the first singers of the old ballads, which are now known to be the remains of long *chansons de gestes*, detached episodes which struck the imagination of audiences and were more easily remembered than entire epics. They were sung to tunes resembling a litany or psalmody, simple melodic or rhythmic formulae which would be repeated again and again. The type of *tonada* to which ballads were originally sung is illustrated by the tune of 'Conde Claros' which, from its popularity or simplicity, or the fact that so many ballads could be sung to it, became a favourite subject for variation with the Spanish *vihuelistas* (lutenists) in the 16th century; indeed, variation-form arose, in Spain, through the necessity for relieving the monotony of the lute accompaniment during the recitation of a long *romance*. The *vihuelista* ENRIQUEZ (*q.v.*) wrote no less than 120 variations on this tune. An example of those by MUDARRA (*q.v.*) is the following:

8. SALINAS. (1577.)

Con - de (Claros con a - mo - res

MUDARRA. (1546.)

Vihuela.

no po - dí - a re - po - sar.

The *romances*, however, were by no means always sung to the same tune, as Salinas shows. The most curious fragment of early Castilian folk-song preserved by Salinas is a dance-tune which, besides Spanish words, has words which are recognisably Arabic, and was still sung to them when Salinas wrote in 1577.

9. SALINAS. (1577.)

Qal - bi bi qal - bi qalb 'a - ra - bi,
Rey don A. lon - so, rey mi se - ñor.

It was evidently a well-known tune, for there are references to it in Spanish and Portuguese literature from the 14th century to the 17th.

¹ Hist. III. 306 ff.

² See, however, *The Music of Spanish History*, Oxford, 1926, Examples 34-42; and *Z.M.W.*, 1921, iv. II, 85 ff.

³ R. Menéndez Pidal, *Poetic juglaresca y juglares*, Madrid, 1924; H. Angles, *Report Mus. Hist. Congress*, Basel, 1924, 55-66.

The 'Cancionero Musical' (MS., Royal Palace, Madrid) and the 16th-century Spanish lute-books have preserved many other tunes of old ballads and *villancicos*. Descendants of ballads belonging to the Carolingian and Arthurian cycles (with their tunes), have been collected in modern times in Castille and Asturias.

10. LEDESMA. (1907.)

A 16th-century folk-song was used as a canto fermo by MORALES, for one of his masses,

11. MORALES. (c. 1540)

while another Spanish tune, 'Nunca fué pena mayor' was employed in the same way by Pierre de la Rue. A song made on the occasion of the expulsion of the Jews (1492) was used as a canto fermo by ANCHIETA (*q.v.*); but the mass based on it has not been preserved. The tune is printed by Burney.

The different types of Castilian folk-songs which have been collected in modern times will be found in the works of Calleja, Ledsma, Olmeda and Torner, mentioned at the end of this article. The melodies in 5-8 time from the neighbourhood of Burgos are especially noteworthy, as it is in Castille (and probably not, as is usually stated, in the Basque provinces) that a genuine 5-beat melody has been developed.

Aragon and Navarre are memorable for the characteristic JOTA (*q.v.*). A good account of the music of this region (which has little connexion with Castille) is given by Laparra, 'La Musique et les danses populaires en Espagne,' *Encl. de la musique*, 1920.

(4) ANDALUCIA.—Folk-songs from Andalucía were used in madrigalesque compositions by Juan VASQUEZ (*q.v.*), of Seville, who published two sets of partbooks, in 1551 and 1560. The folk-song is treated on the same principle as the 'first singing part' in the 'Psalms, Sonnets and Songs' of Byrd (1588).

These melodies, however, have nothing specifically Andaluz about them, and it was not until the end of the 18th century that *Polos* and other characteristic forms began to be

written down, and sung in the *TONADILLAS*, performed at Madrid. There is a *polo* in the comic opera 'El Criado fingido' (1804) of

12. VASQUEZ. (1560.)

Manuel GARCIA (*q.v.*); and the famous song of the same composer, 'El Contrabandista' is also a *polo*. Mitjana¹ points out that though the *polo* from 'El Criado fingido' is not really popular in the sense of being traditional, yet it was treated as a folk-song by Bizet, and used in the prelude to the fourth act of 'Carmen.' The same authority points out undoubted Spanish popular effects in Rossini's 'Barbiere.' Since the end of the 18th century Andaluz types of melody and rhythm have made their way into all the Spanish provinces, mainly through the *zarzuelas* (comic operas) into which they were introduced. So much has this been the case that the only type of music which people of other nations can immediately recognise as 'Spanish' is the type which belongs to Andalucía.

Much has been written on the Moorish origin of this kind of music (*v. CANTE HONDO*). It is probable, however, that the Moorish influence is to be found in the manner of performance, rather than in the music itself; it is a primitive way of singing (permitting 'hockets' and other mediæval devices) which has been exaggerated by gipsy singers. A performance of Andaluz song begins with a long prelude on the guitar. This is an improvisation, but follows certain rules which are well-defined although unwritten, while the rhythmic figure varies according to the nature of the song to follow. A good player on the guitar will give his prelude a sense of form recalling that of Domenico Scarlatti; and it is interesting, in this connexion, to find (from numerous instances in Scarlatti's sonatas) how often he had in mind turns of rhythm and phrase and effects of harmony which could only have been suggested by hearing a good guitar-player from Andalucía.

The different forms of Andaluz song can hardly be defined, though they can be recognised by one who is accustomed to them, partly from the guitar prelude, partly from the melody itself and partly from the form of verse. Thus the *Soleá* (plur. *Soleares*) has a verse of three 8-syllable lines, the *Seguidilla*, seven lines, the

¹ *Encl. de la musique*: 'Espagne.' Paris: Delagrave, p. 2256.

Sigüiriya gitana (Gipsy Seguidilla) also known as the *Playera*, three 6-syllable lines and one of eleven syllables, with a break (and a characteristic musical effect) in the middle of the long line. Most forms, however, have four lines of eight syllables; and these include forms such as *Granadinas*, *Rondeñas*, *Malagueñas*, *Murcianas*, descended directly or indirectly from the FANDANGO (q.v.). The *Fandanguillo* seems (to a foreigner) like a mixture of Andaluz and northern tunes. *Saetas* and *Carceleras* are sung unaccompanied, the former during the halt of a procession; the latter (derived from the *Saeta*) is literally the song of a prisoner in gaol. Other forms such as *Peteneras* and the 18th-century *Tiranas*, take their names from celebrated singers. The most ancient form still existing is (according to Falla) the *Sigüiriya gitana*, mentioned above; and it is the gipsy singers, and singers influenced by gipsy ways of singing (v. CANTE HONDO) who have given Andaluz song its most characteristic qualities. Others also may be mentioned: the long wail (*Ay* / or *Leli, leli!*) with which the voice-part sometimes begins, the cross-rhythms of guitar, castanets and hand-clapping; and the interjections of the audience, *Olé, Olé!* (said, on somewhat doubtful authority, to be derived from an invocation to Allah). These three qualities are found also in music heard in Morocco and other Muslim countries. The actual modes of Muslim music, however, are of rarer occurrence in Spanish music than is usually believed. The characteristic cadence of Southern Spanish song is the Phrygian (third mode) cadence A-G \sharp -F \sharp -E; while among Muslim peoples this mode (though sometimes used) is generally replaced by another, with the cadence A-G \sharp -F \sharp -E, which gives it an entirely different effect. This cadence, however, is not unknown in Spanish folk-song (see above, Ex. 10). The effects of the *Flamenco* style on Southern Spanish song, and the intensification of its 'oriental' qualities have been defined under CANTE HONDO (q.v.). What is sometimes called the 'Spanish idiom' in music depends on the use of certain effects borrowed from the folk-music of Andalucía. It is noteworthy that this is folk-music still in process of formation. While the words are anonymous or unacknowledged (Spanish poets holding it an honour that their lines should be sung as if they were traditional), the melodies were and are the composition of the singers themselves, or at any rate the modification of something they have heard yesterday or may hear to-morrow.

(5) THE 'LEVANTE.'—The S.E. coastal districts of Spain, including a great part of the old province of Valencia, have forms of popular music which are little known outside the Peninsula. The scale systems they exhibit have been used as a basis for cultivated symphonic music by Oscar ESPLÁ (q.v.). Examples

of folk-songs from this district are given by Pedrell (see below).

(6) THE BASQUE PROVINCES.—Doubts have recently been cast on the originality of many Basque melodies; and the exclusiveness with which the Basques have kept themselves a distinct and separate race has made it difficult to trace their music to a primeval source. It has a curious suggestion of 19th-century music, which may be due to the constant use of the leading note and the rapid changes of key. Basque melodies are not founded on any particular scale. The rhythm is irregular and a dance exists in 5-8 time, the *Zortziko*, e.g.

13.

It has been conjectured, however, that such tunes now in 5-8 were originally in 6-8, the change having taken place during the 19th century.¹ In any case, the sense of rhythm is not very strongly developed in Basque singers. The placidity of the Basque temperament is reflected in folk-song; almost all are andante, while those which move a little faster are usually of instrumental origin. However, many fine tunes exist in the Basque provinces. The modes chiefly used are Dorian and Mixolydian, though the modern major and minor are most usual. The melodies are diatonic, and they are syllabic; there is nothing like the endlessly decorated ploughing songs (*Aradas*) of Castille or the S.E. The words have no refrain, like the *villancicos* of Castille; indeed, the use of a refrain is said to be unknown in Basque popular literature. There is also an absence of epic and legendary words. Gasqué concluded that the majority of Basque melodies were imported by sailors from Brittany, Wales, or the Isle of Man, but not from the neighbouring parts of Spain. One tune bears a striking resemblance to 'There was a Jolly Miller,' which is said to have been introduced by Wellington's troops, since it appeared in San Sebastian not long after. On the whole the Basque songs are much closer to the types found normally in Europe, in France, England, or Germany, than they are to those of Castille or Andalucía.

The Basques have a fine communal dance, the *Aurreku*, usually in four figures, of which the third is a *Zortziko* in 5-8.² The Basque *Fandango* has no relation to that of Andalucía, and is more related to the JOTA. The melody, however, is that of the fandango in Gluck's ballet 'Don Juan,' which was afterwards used by Mozart in 'Figaro.'

¹ See the review *Euskalerrian Aile*, San Sebastian, 1915-16, where the theory is upheld by Gasqué and disputed by other writers.

² See Gasqué, F., *L'Aurreku, danse basque*, Paris, S.I.M., Sept.-Oct. 1912, with photographs and musical illustrations.

PORTUGAL

The folk-music of Portugal bears a certain affinity to that of Spain, especially in dance-songs. But there are certain clearly-marked differences. The Portuguese is more pensive and tranquil than the quicker, dramatic Spaniard; and as all national music is more or less a reflection of racial characteristics, there is a repose and subdued melancholy, and

an absence of exaggeration in Portuguese music, qualities seldom found in the more vivacious and stirring music of Spain. From the same cause, and perhaps because the Moorish ascendancy was of briefer duration in Portugal than in Spain, there is less ornament in what music remains to us of an undoubtedly oriental character. The poetry of the two countries has also much in common. Many of the Portuguese ballads are of Spanish origin, and even at the present day the Spanish and Portuguese ballad forms are almost identical.

In the lyrics of both races the rhyme follows the assonance principle, and is a more important element than the metre. Moreover, Gil Vicente and other poets of Portugal used the Castilian language as much as their own, especially for poetry intended to be sung.

Portugal shares with her neighbour in collections of early music, for the songs of Martin Codax and Alfonso X. (in Galician-Portuguese dialect) belong as much to Portugal as to SPAIN (*q.v.*). Unfortunately a mass of valuable manuscript and printed music which existed in the splendid library founded by King D. João IV. (1604-56), perished in the Lisbon earthquake in 1755. Much was also destroyed during the demolition of the monasteries and convents which followed the revolution of 1834.

The earliest and most important musical records preserved in Portugal belong to the Troubadour period. D. Diniz, sixth King of Portugal (1261-1325), who founded a university with a chair for music at Coimbra, was a grandson of Alfonso X., and well versed in the art of the Troubadours.¹ The *Jogral* (*jongleur*) also played an important part in Troubadour life in Portugal; and the last was Gil Vicente (c. 1465-1536 ?), at once poet, actor, musician and composer. His works, which give interesting information about the various customs and forms of song of his time,² are written partly in Portuguese and partly in Castilian. Interpersed in his pieces are *vilhancetes*, *cançonetas*, *cantigas*, *romances*, *canções pastoris*, *cantigas de berço*, *cantigas marítimas*, etc.; and in his *enselladas* songs with Latin and French words also occur, such as the *chanson*, 'Ay de la noble ville de Paris.'

The *vilhancetes* or *vilhancicos*, *autos* and *loas* were similar to the Spanish in character; semi-sacred, popular, and yet a form which learned musicians adopted and elaborated, such as Fr. Francisco de Santiago, Gabriel Diaz, and many contrapuntists from Duarte Lobo's celebrated school, as, for instance, Felipe de Magalhães.

¹ For the various *Cancioneiros* (song-books) of his time, and that of his bastard son, D. Pedro, Count of Barcellos, see A. F. G. Bell, *Portuguese Literature*, Oxford, 1922.

² It is said that Erasmus learnt Portuguese simply to be able to read Gil Vicente's works. See A. F. G. Bell, *Lyrical of Gil Vicente* (with translations), Oxford, Blackwell 1921; and the *Oxford Book of Portuguese Verse*, 1925.

The earliest *vilhancicos* we hear of were those by Juan del ENZINA (*q.v.*) and Gil Vicente¹ in the late 15th century, and the last by the Abbot Luiz Calisto da Costa e Faria in 1723.²

The old Pagan festivals and the mediæval Christian festivals blended in Portugal as elsewhere, and heritages from those times are the *Maiais* and *Janeiras* songs. These festival songs are still sung on certain days of the year; the principal ones are 'O São João,' sung on St. John the Baptist's Day (Midsummer); 'As Janeiras,' sung at the New Year; and 'Os Reis,' sung at the Epiphany.³

Various forms of songs are given in the works of the poets of the Renaissance, Ribeiro, Gil Vicente, Sà de Miranda and Camoêns, and these were clearly intended to be sung, as the accompanying instruments and the manner of singing them are frequently recorded.⁴ Many are identical with the Troubadour forms, for example the *serranilha* and *solão*, which answer to the *pastoralla* and *soula*. We read also of the *endeixas* or funeral songs; the *celeumas* sung in chorus by sailors or workmen⁵; the *descantes* which are always 8-syllabled and have *estribilhos* (refrains) and the *sonetos*. And among the dance-songs the *xacara* (a gipsy song) and the *chula* which is similar to it, the *capitua* or *mourisca* and the *judenga*. The two latter naturally disappeared with the expulsion of the Moors and Jews.⁶

It is difficult to trace the music of the above-mentioned songs. Still no one can deny the antiquity of many of the *cantigas* and *canções* still sung among the peasants in the country districts of Portugal; and here, unlike Spain, the dance-songs are not more prevalent than other kinds. In some the oriental element is still evident; there is a careless ease, tinged with melancholy, about them, which is the secret of their charm. They are generally sung by one voice without any accompaniment; and to the ears of foreigners have the sound of recitatives, as the rhythm is often wholly obscured by the singer.⁷ The following

little song, which the women sing whilst reaping, always inventing new verses, is a fair example:

And on the plains the shepherds and labourers may be heard any evening chanting in a minor key, with a pointless, halting measure and vague rhythm *cantigas* which are purely Moorish in character.⁸ In the province of Minho it is quite common to hear one peasant in his harsh, guttural Eastern voice challenge another to sing one or more verses against him. The curious custom for the men and women to sing in fourths and fifths still exists in the southern province of Alemtejo. This example, wholly Moorish in character, was heard on a popular feast-day in the little town of S. Thiago do Cacem in 1897:⁹

Although the words *cantiga* and *canção* are used indiscriminately for all kinds of songs, the so-called *Cantigas das ruas* are a special form, and chiefly sung in the towns by blind beggars. Many of the tunes are very old, but the words are constantly changed.¹⁰ The *fado* is the most purely national type of dance-song which exists in Portugal, and it has always maintained its integrity.¹¹ It is seldom heard outside towns, and properly belongs to the lowest classes of the population, though during the last century it acquired popularity among the higher classes.¹² The guitar (which is much less used than in Spain) is always employed for the *fados*, and has a strongly rhythmical and uniform accompaniment:

⁸ It is curious that in the mountainous parts of Portugal no Arab music is heard. The voices also are sweeter.

⁹ Sent by D. Augusto Machado (Director of the Lisbon Conservatoire) to A. Hammerich. *Studien über isländische Musik, Sammelbände*, I.M.G. 1899, p. 341.

¹⁰ Numerous examples are given in Das Neves' and other collections.

¹¹ Platon von Waxel derives this dance-form from the *xacara* of the Portuguese gipsies, and the word from *fatisse* or verse-maker. See also M. Roeder's Essay *Dal Tacuino*, p. 145.

¹² A celebrated modern singer of *fados* was José Dias (1824-69), who improvised with wonderful skill. He was a great favourite at the Court, and in the salons at home and abroad. Pinto de Carvalho and Alberto Pimentel have written on the *Fados*.

¹ Gil Vicente was among the first to write *autos*, 'religious pieces resembling in their nature the miracle-plays common all over Europe at the time. . . . Most of these are Christmas pieces, and the dramatists often took advantage of the story of the shepherds to introduce the elements of what may be called pastoral comedy.' *History of Portugal*, by Morse Stephens.

² Vasconcellos, ii. 191.

³ 'As Janeiras' and 'Os Reis' are especially sung on the respective eves of the New Year and of the Epiphany. The minstrels go from door to door in the evening, singing the praises of the inmates of the house, and accompanying their songs with metal triangles, bells, etc. They are generally rewarded by the master of the house with money, sausages or dried figs. But if they get nothing they sing:

'Esta casa cheira a bren

Aqui mora algum Judeu.'

(This house smells of tar; some Jew lives here); or else:

'Esta casa cheira a unto

Aqui mora algum defunto.'

(This house smells of ointment; there is a dead body in it.)

⁴ Gil Vicente speaks of 'the pleasing way the *sonetos* were sung with guitar accompaniment.' See Th. Braga's *Historia da litteratura portugueza*, vol. viii. p. 298.

⁵ See Camoêns, *Lusadas*, ii. 15.

⁶ See *Portugiesische Musik*, Mendel's *Mus. Con. Lex.* p. 499 et seq.

(Platon von Waxel).

⁷ Nos. 8, 7 and 11 of J. A. Ribas's collection give some idea of this kind of song, but they are spoilt by their accompaniment.

There are many varieties of *fados* and *fadinhos* in the different towns, but they are all binary in form and have the same rhythm.

Except during the period when the Netherlanders exercised their influence upon the ecclesiastical music of Portugal (that is, during the 16th and 17th centuries) this country can claim no great composers nor school of its own. For when not avowedly borrowing various forms from other countries, Portugal fell unconsciously under their influence. The *trovas* (Troubadour songs) were merely adopted Provençal forms, the *vilhancicos*, *autos* and *loas* were borrowed from Spain and France; the polyphonic 17th century *tonos* were in reality Italian madrigals written to Spanish words, with *estribillos* added to them. And late in the 18th century all attempts to form a national opera failed, owing to the invasion of the Italian opera, which has exercised complete hold over Portuguese music for the last two centuries.

It is only in two small and unimportant forms of vocal music, the *fado* and the *modinha*, that Portugal can claim to have created and established a distinct genre of her own. Of the *fados* we have already spoken. The *modinha*, which is the only kind of art-song that Portugal has as yet produced, is, moreover, the direct offspring of the Italian opera. Though written by trained musicians and sung by educated people, neither as regards form nor character can the *modinhas* be assigned high rank as artistic music. Still they have retained their popularity from early in the 18th century down to the present day, and are written as a matter of course by every Portuguese composer.

These *modinhas*, or Portuguese romances, are of a literary as well as a musical form.¹ The first mention of them occurred in the so-called 'Jewish operas,'² which rapidly became popular. In the burgher classes *modinhas* remained simple sentimental melodies; but at the court and among the more educated classes they developed into highly elaborate brilliant arias, and celebrated composers and poets did not disdain to use this form. In Das Neves' *Cancioneiro de musicas populares* there are twelve songs (*modinhas*) from Gonzaga's *Marília de Dirceu*, which, according to good evidence,³ were set to music by Marcos Antonio, better known as Portogallo. In 1793 F. D. Milcent published a monthly *Jornal de modinhas* at

Lisbon, from which the following example is taken, to show the brilliant type of *modinha*:

4.

Moda a Solo del S. Ant. da S. Leite M. de Capela no Porte.

Adagio.

Tem - po que bre - ve pas -
sas - ti que bre - ve pas -
sar - da, etc.

Since the 16th century, when Portugal colonised Brazil, there has been continual intercourse between these countries; and during the first quarter of the 19th century, whilst the Portuguese court was domiciled in Brazil, the *modinhas* were as fashionable there as in Portugal. But they differed in character; the *modinhas brasileiras* were always very primitive in form, devoid of workmanship, somewhat vulgar, but expressive and gay. In short, a mixture between the French *romance* of the 18th century and *couplets* from the vaudevilles. And this description applies to the type of Portuguese *modinhas* of the present day, which are written for one or two voices, strophic in form, with easy guitar or pianoforte accompaniments.

A complete list of greater and lesser composers who have tried their hand at this form of song is too long to give, but the following are amongst the most celebrated. In the 18th century Portogallo and also Cordeiro da Silva and João de Sousa Carvalho; a little later, Rego, Bomtempo, Soares, Pereira da Costa, Coelho, Cabral, and João de Mesquita. In Coimbra,⁴ José Manricio; in Oporto, Silva Leite, Nunes, Pires, João Leal and Edolo⁵; and nearer our own time, Domingos Schiopetta, the two monks J. M. da Silva and José Marquis de Santa Rita, Frondoni (an Italian, long resident in Lisbon), R. Varella and Vasconcellos de Sà. But the most popular *modinhas*, such as 'A Serandinha,' 'O Salvia,' 'As Peneiras,' 'Mariquinhas meu Amor,'⁶ and 'Tem minha amada'⁷ are anonymous. An exception is Vasconcellos de Sà's canção, 'Margarida vae à fonte,' which is the favourite *modinha* of the moment.⁸

There are many patriotic and political songs in every collection. The pianist Innocencio wrote a whole series; Portogallo's 'Hymno da

¹ The derivation of the word is doubtful. Some say it came from *note* or *moda*, and that it had its origin in Brazil. We certainly read in a folio dated 1729 (*Annals of the Bih. of Rio de Janeiro*, ii. 129) that on a wedding-feast of the Viceroy 'um alegre divertimento musico de canções e modas da terra, de que ha abundancia n'este pais.' Also many travellers of that time describe with admiration the *modinhas brasileiras*. For further information see Th. Braga's *Historia da litteratura portugueza* (*Filinto Elycio e os descendentes da irradia*), vol. xi. p. 603 et seq.

² Thus named from Antonio José da Silva, born in 1705, a baptized Jew from Brazil, who wrote Portuguese comedies with these interspersed.

³ Braga, *Historia da litteratura portugueza*, vol. xv. p. 604, note.

⁴ The *modinhas* vary somewhat in the different districts.

⁵ Between 1820 and 1840 José Edolo, a violinist at the opera, was the favourite contributor to the *Jornal de modinhas*.

⁶ These last two are included in Ribas's Collection.

⁷ In Berggren's Collection.

⁸ The difference between the *cancões* and *modinhas* is slight, and the names are constantly interchanged.

Patria' was the customary national anthem until King Pedro IV,¹ composed his 'Hymno da Carta' in 1826; and Frondoni was the author of the popular hymn of the revolution of Maria da Fonte in 1848.

Of late, serious attention has been directed to the national poetry and music of Portugal. One of the first to do so was the poet Almeida Garrett in his *Romanceiro*. He was followed by Vasconcellos and Th. Braga, who in his numerous volumes on the history of Portuguese literature often touches on the musical form.² Leading musicians, such as B. Moreira de Sá, A. Machado (Director of the Conservatoire), and J. Vianna da Motta and others have shown their practical interest in the subject.

ITALY

Italy was more slowly caught by the poetic flame which the Provençal troubadours had kindled, than other southern countries. For not until the middle of the 13th century, when Raymond Berenger, Count of Provence, visited the Emperor Frederick II. at Milan, bringing Troubadours and Jongleurs in his train, do we hear of them in this country. A similar patronage was extended to them by Raymond's son-in-law, Charles of Anjou, king of Naples and

Sicily. Through which of these two gates the Provençal language entered Italy has ever been a disputed point. But taught by these singers, whom the common people called *uomini di corti*,³ Italy soon produced her own *trovatori* and *giocolini*. At first they deemed their native dialect unsuitable to poetry, and used the Provençal language. But it is certain that already, by the time of Dante, the *volgar poesia*, which sprang from it, had reached a stage when it was capable of receiving rules and of being taught in the schools founded for the purpose. After Dante, no Italian could longer doubt the capacities of his own tongue for all forms of poetry. It must not be forgotten that the *terza rima*, used by the Provençal troubadours for the *sirvente*, was adopted by Dante for the 'Divina Commedia' and by Petrarch in his 'Trionfi.' But soon the verse of the troubadours began to pale before the splendours of the great poet; and towards the middle of the 14th century the *trovatori* declined in numbers and popularity, and after 1450 were heard of no more.⁴

Notwithstanding the subordination of lyric song to other branches of poetry and music in Italy, her long and careful study of *la melica poesia*—poetry wedded to music—has not been surpassed elsewhere. Dante's sonnets and Petrarch's 'Trionfi' were among the earliest poems set to music. Dante's own contemporary and friend Casella⁵ (b. 1300), who set his sonnet 'Amor che nella mente' to music, is believed to have also composed the music for a *ballata* by Lemmo da Pistoja, still extant in the Vatican.⁶ The *ballate* and *intuonate* were perhaps the oldest forms of songs written in the vernacular; both were love-songs sung to a dance.⁷ After them the *maggiolate* or May-day songs had their popularity. These also were love-songs, sung in the spring-time by bands of young men. The hunting-songs or *cacci*⁸ equally deserve mention. The most celebrated were written by Soldaniere and Sacchetti, and the words are far better than their music by Nicolaus da Perugia, Laurentius and Ghirardellus. Some are realistic, imitating the sounds of the hunt⁹; others are canonic in form, and others again interesting from the historic side, as they bring in the street-cries of the time.¹⁰

³ So called because these singers appeared as retainers from princely courts. Also *ciarlantani*, because the exploits of Charlemagne were a constant theme of their songs.

⁴ For further information about the *Trovatori* see H. von der Hagen's work on the *Minnesinger*, vol. iv.

⁵ See the fourth Canto of the *Purgatorio* and the second Canto in the *Convito*, where Casella's name occurs several times.

⁶ Burey tells us that the Vatican MS. No. 3214 is a poem on the margin of which is written: 'Lemmo da Pistoja, e Casella diede il suono.'

⁷ Artesaga gives the words of a *ballata* of the 13th century by Frederick II., and of another by Dante. See *Le rivoluzioni del teatro musicale italiano*, I, pp. 187, 190.

⁸ They may have been written specially for hunting, but Gaspari, in his history of Italian Literature, proves that any quick movement at that time would be called a *caccia*.

⁹ In this they resemble the *Fixortole*.

¹⁰ They are counterparts of the *Cris da Paris*, which Jannequin brought into his motet 'Voulez ouyr les cris de Paris,' the 'Cries of London,' and 'Court Cries' used by Richard Deering. See J. Wolf's article *Florenz in der Musikgeschichte des 14ten Jahrhunderts*, *Sammeldände*, I.M.G., 1901-02, iii.

¹ Dom Pedro IV., the first constitutional king of Portugal, was a pupil of Sigismund Neukomm, and wrote several choral and operatic works.

² Braga also collected the folk-songs of the Azores.

When later the *canti carnascialeschi* came into vogue they at first were Carnival songs, but under the skilful hand of Lorenzo di Medici a kind of consecutive drama grew out of them.¹

During the 14th century there existed a class of dilettante musicians called *cantori a liuto*, whose business it was to set other poets' verses to music and sing them. They differed from the *trovatori*, who were poets, and who sang their own verses to their own music or to that of others, and equally from the *Cantori a libro*, who were the learned professional musicians.² Casella (see above) and Minuccio d' Arezzo, mentioned by Boccaccio,³ would belong to the *cantori a liuto*. It was the habit of these musicians to improvise,⁴ for until the 16th century musical notation remained so difficult that only learned musicians were able to avail themselves of it. This is the reason why the melodies of the strophic songs, which contemporary writers⁵ show to have been so popular and universal during the 14th and 15th centuries, have not survived.

The compositions of the Netherlands school of music, with their severe contrapuntal style, found their way into Italy in the 15th century, and in time began to exercise a strong influence there. But the prevailing type of Italian secular songs continued to be of a very light order during this and the following century. Petrucci, who issued in 1502 the motets and masses of the Netherland composers, had nothing better to offer of native productions than *frottole* and *villanelle*, tuneful but light partsongs. In form the *villanelle* adhered to the contrapuntal style, though in spirit they were essentially popular. Gradually the term *frottola* disappeared; the more serious *frottole* passed into the madrigal, while the gayer, merrier type was merged in the *villanelle*.⁶ But although the *frottole* were despised by contrapuntists they showed a sense of form in repeating the first part again, and attention was paid to the words by having different music for each verse, whereas the *villanelle* were strophical—that is, the same melody was repeated for each stanza.⁷ Other songs, light in character, were the rustic songs, *canzone*

villanesche, or *villotte*, which peasants and soldiers used as drinking-songs. More refined and yet more trifling were the *villotte alla Napoletana*.⁸ The so-called *fa-la-la* was a composition of a somewhat later date and more merit. Those which Gastoldi wrote (about 1590) were good, and so too his *balletti*. (See MADRIGAL.)

The vocal music to which our attention has been thus far directed, consisted either of songs in parts, or unisonous chorus with little or no accompaniment. Sometimes the principal or upper voice had a sort of *cantilena*, but solo singing was yet unknown. An early recorded instance of solo singing with independent instrumental accompaniment is the oft-quoted one of Sileno, who in 1539 sang in an Intermezzo⁹ the upper part of a madrigal by Corтеccia, accompanying himself on the violone, while the lower parts which represented the satyrs were taken by wind instruments. But the piece itself shows it was far from being a song for one voice with accompaniment; the under parts are as much independent voices as the upper one. (See Ex. 1.)

Fragment of a Madrigal. Sonato da Sileno con violone, sonando tutte le parti, e cantando il soprano.

1.
1st Tenor. CORTECCIA, 1539.

O begl'an-ni de l'o-ro O se-col

di-vo al-lor non rastro' fal-ce al-

lor non e-ra vis-co ne lac-cio . . . etc.

¹ Many of these were written by special invitation by Heinrich Isak (b. 1445). Naumann's *Hist. of Mus.* i. 438.

² The important part played in Italian music by such a one as Francesco Landini (1325-90) is well described by Fétis, v. 310 et seq.

³ Decam. Giorn. X. No. 7. See Ambros, *Ges. der Mus.* ii. 497.

⁴ The improvisatore has been for centuries a well-known figure in Italian life.

⁵ We read in Sacchetti's novels that Dante's *ballate* were everywhere known and sung, and how Dante overheard a blacksmith singing his song and scolded him for having altered it. And Trucchi quotes, in proof of Dante having made the music for his own poems, an anonymous writer of the 13th century, who says Dante was 'dilettosissimo nel canto e in ogni suono' (*Poesie italiane inedite*, ii. 140). See also Ambros, *Ges. der Mus.* ii. 489, for further account of the songs in the Decameron.

⁶ A *frottola*, printed in Junt's Roman collection of 1526, evidently means, as long, a *villanella*, for it is still sung in Venice with the same words and melody, 'Le son tre fantinelle, tutt tre da mardar.' Originally, however, it was a part-song with the tune in the tenor. Ambros, iii. 495.

⁷ See Fuorrotola, also Ambros, iv. 150 et seq.; Florenz in der Musikgeschichte d. 15ten Jahrhunderts, J. Wolf; *Sammelbände*, I.M.G., 1901-02, iii.; Die Frottole im 15ten Jahrhundert, B. Schwarz, *Vierteiljahrsschrift f. Musikwissenschaft*, 1886.

⁸ These were gallant addresses from singing-masters to their feminine pupils. They were as popular in northern Italy as in Naples. For examples, see in Kiesewetter's *Schicksale und Beschaffenheit des weltlichen Gesanges*, app. Nos. 12, and 13 by Cambio (1647) and Donati (1655). Several collections of these songs still exist in the various libraries, and a specially important one at Naples.

⁹ The Intermezzi were usually madrigals interspersed in the earlier Italian plays.

During the last decades of the 16th century a sweeping change came over music in Italy. The spirit of the Renaissance, which had affected the other arts of poetry, painting and sculpture many years earlier, gradually asserted an influence over music. Each individual now desired to think and speak for himself, and was no longer content to be merged in the mass. Thus ecclesiastical music was gradually driven from the field by secular music, and choral or collective song by pure solo-song, which was the medium best fitted for the expression of the thoughts, emotions and actions of individuals. Poetry, which had hitherto been smothered in the web of contrapuntal music (where many voices were simultaneously singing different words) once again asserted herself, and claimed attention to her meaning and form.¹ Further, the art of singing, which by the close of the 16th century had reached a highly advanced stage² demanded the prominence of the solo-singer. In short, a different kind of music was now required, and the monodie style supplied the want. Historians have clearly shown that the latent germs must have been present wherever folk-music existed.³ The predilection for a marked rhythm, the disuse of the old church scales, the feeling for the dominant, the use of the leading-note⁴—all these elements were instinctively present in folk-music before being formulated and taught in schools.

According to the historian G. B. Doni,⁵ V. Galilei was the first composer who wrote actual melodies for one voice.⁶ He further tells us that Galilei set to music the passage of the *Inferno* which narrates the tragic fate of Count Ugolino, and that he performed it himself 'very pleasingly,' with viola accompaniment. But be that as it may, an epoch in musical history was undoubtedly marked by Giulio CACCINI (*q.v.*) when he published in 1601, under the title of 'Le nuove musiche,' a collection of *madrigali*, *canzoni* and *arie* for one voice. These compositions have a figured bass, and some are embellished with *floriture*. In the preface⁷ to his collection, Caccini gives minute directions as to the proper mode of singing his pieces, and his airs are well supplied with marks of expression, as the following example will show⁸ (see ORNAMENTS, Vocal, and THOROUGH-BASS):

¹ Ambros, iv. 178 et seq.

² This advanced technique in solo singing was the outcome of generations of cultivation in the Church, whose polyphonic music by no means excluded the use of the solo voice. See Henderson, *Early History of Singing*, chap. v. and vi.

³ See Parry's *Art of Music*.

⁴ Zarlino writes in 1558 that the peasants who sing without any art all proceed by the interval of the semitone in forming their closes.

⁵ *Op. om.* Florence, 1763, tom. ii.

⁶ This statement may be doubted, as we hear of Caccini, Vladana, Peri and Cavallieri all exhibiting the same double talent as Corbetta and Galilei at the same period, i.e. in the last decades of the 16th century.

⁷ Translated into German in Klesewetter's *Schicksale und Beschaffenheit*, etc.

⁸ For other examples see the beautiful aria 'Fero selvaggio,' reprinted in Gevaert's 'Les Gloires de l'Italie,' and 'Amarilli mia bella' in Parisotti's 'Arie antiche.'

Jacopo Peri succeeded Caccini with a work entitled 'Le varie musiche del Sig. J. Peri a una, due, tre voci per cantare nel clavicembalo o chitarrone' (Florence, 1609). They are simpler than those by Caccini, and less declamatory.⁹ Caccini had numerous followers in the path he had opened, and thus the 'expressive monodia,' i.e. the attempt to render certain thoughts and feelings in music, and to adapt music to the meaning of the words, was virtually established.

⁹ See 'Bellissima Regina' in Parisotti's 'Piccolo album.'

But these early pioneers of solo-song were amateurs, and it remained for trained musicians to carry on their work systematically. With MONTEVERDI (1562–1654) a turning-point in music was reached. To him we owe the development of the recitative which led to the beginning of the OPERA (*q.v.*)—the most important moment in the whole history of music. We also owe to him a debt in the history of song for having established the so-called ternary form which was soon to become stereotyped for the ARIA (*q.v.*) and song. This consisted of an air in three parts; the last part being a mere repetition of the first, while the middle part contained a passage of contrast. This form was already familiar in the folk-songs of the Middle Ages; Monteverdi's application of it is well seen in the 'Lamento' from 'Ariadne' (1610).¹ Monteverdi's successors, Cesti and Cavalli, both showed aptitude for pleasant melodious solo-music of this form, although Cavalli sometimes wrote arias with only two contrasting portions.

Other composers of the transition period which witnessed the growth of the opera and cantata were Radesca da Foggia, who published five books of 'Monodie' in 1616; A. Brunelli, who published in the same year and in 1618 two books of 'Scherzi, Arie, Canzonette, and Madrigali';² G. F. Capello, whose most remarkable work was a set of 'Madrigali a voce sola'; G. Fornacci, celebrated for his 'Amorosi respiri musicali,' which appeared in 1617; Sigismondo d'India, Pietro della Valle, Luigi Rossi³ and finally Salvator Rosa.⁴ A great quantity of these vocal compositions are treated in the strophic form, and the words of all are love-poems of a stilted, artificial character.⁵

If Cortecchia's madrigal be compared with the following example from Capello, it will be seen how great an advance had been made in solo-singing in less than a century. And a striking resemblance may be observed between Capello and his successor STRADELLA (*q.v.*).

Madrigale a voce sola.

G. F. CAPELLO.

Pal - li - det - to mio so - le a tuoi

¹ This was afterwards arranged as a madrigal in five parts. See Parry, *Music of the Seventeenth Century* (Oxford History of Music), p. 47. Parry further clearly shows how this simple form later dominated one branch of music completely, and indeed 'became the base of one period of Italian art.'

² Brunelli's collection included several pieces by other composers of the Florentine group.

³ For the numerous existing collections of Rossi's 'Monodie' see Rossi.

⁴ Salvator Rosa certainly was Carissimi's contemporary, but the example Burney gives shows that he wrote much like the aforementioned composers.

⁵ Ambros, iv. 330.

dol - ci pal - lo - ri per - de l'al - ba ver -

During the 17th century the influence of Carissimi was great. He had a strong sense for modern tonality and for secular rhythm, and hence his style grew different from that of the older school. The cantata, which was to become the chief form of chamber-music, reached a high stage of maturity under CARISSIMI, LEGRENZI, CALDARA, STRADELLA and finally A. SCARLATTI. Legrenzi's 'Cantate e canzonette a voce sola' (published 1676) show his position in the development of the art of his time. (See CANTATA.) With A. Scarlatti's name the *da capo* form of the *aria* is associated, and for the many other debts the classical *aria* owes him, both in the opera and the cantata, see SCARLATTI.

No sooner were the 'expressive monodia' and the recitative started than the opera became firmly established. And in the same way the madrigal and the cantata,⁶ which were both important, at least as regards vocal chamber-music during the 16th and 17th centuries, were doomed to insignificance by the use of this great and overshadowing rival. For an account of the origin and marvellous popularity of the OPERA, the reader must turn to that article. It need only be said here that all other kinds of secular vocal music had and still have to yield precedence in Italy to the opera and its off-shoots, the *scena*, *caravina* and *aria*.

If we closely examine the vocal works of the great composers of the 17th and 18th centuries, we see how little the *arie*, *ariette*, *canzonette*, etc., published separately in collections⁷ differ either in form or spirit from the arias extracted from their cantatas and operas. In the latter class some of the most beautiful examples of pure lyrics may be found, like Salvator Rosa's 'Star vicino'; Cesti's 'Intorno all' idol mio'; Stradella's 'Ragion sempre addita'; Leo's 'Ahi, che le pena mia'; A. Scarlatti's 'Voi fuggiste,'

⁶ Cantatas, which are really vocal sonatas, became by degrees a mixture of the formal aria and recitative. There was practically no difference in structure and style between the arias from these 'slices out of the opera' and the opera itself. Parry, *Music of the Seventeenth Century* (Oxford History of Music).

⁷ See such collections as—'Arie antiche,' 'Piccolo album di musica antica,' Parisotti; 'Echi d'Italia,' Viardot; 'Gloires de l'Italie,' Gevaert; 'Tesori antichi,' M. Roeder; 'Gemme d'antichità,' published by Ashdown; 'Alt-italienische Canzonetten und Arien,' Lindner.

'Le violetto,' and 'Cara tomba'; and Caldara's 'Come raggio di sol.' Many of the operas and cantatas from which such lovely airs are taken are dead and forgotten, or their names only remain in history as the shells which contained such treasures.

Turning to another branch of the subject, namely the folk-song, it is clear that in Italy it never held the same place as among other nations. That Italian composers ranked the folk-songs of other countries higher is proved by their choosing French or Gallo-Belgian folk-songs for their masses and motets in preference to their own.¹ In Petrucci's 'Canti cento cinquanta,' published in 1503, the best songs belong to France, Germany and the Netherlands; and the partsongs called *Canzoni alla francese*² were among the most popular songs in Italy in the early 16th century. Traces no doubt exist of *canti popolari* of the 15th, 16th and 17th centuries, but very few have come down to us in their complete or native form. It was in the gay, busy town of Venice that the folk-song first became recognised and found free development. It was there that Petrucci printed the many *frottole*, *ballate*, *barcajuoli*, etc., which contained folk-songs like 'Le son tre fantinelli' (mentioned above), or the popular 'La Bernardina' used by Josquin des Prés, or 'Lirum bilirum' and 'Quando andarete al monte' used respectively by Rossini di Mantua and J. B. Zesso. It was here, too, that G. Scottò printed the Venetian master A. Willaert's collection which has preserved to us the celebrated 'Canzon-di Ruzante.'³ But though many of the songs used for the polyphonic works bear Italian titles, there is nothing to prove their Italian origin. Only in a few instances have the words been preserved in their integrity, and the melodies have no distinguishing characteristics. They are somewhat dull and formless.⁴ Much more akin to the typical *canti popolari* in liveliness and simplicity of style were the hymn-tunes, known as 'Laudi spirituali.' These, in the Middle Ages, were introduced in the oratorios in order to popularise such performances; and the connexion between these *Laudi* with popular dance-songs is obvious. (See LAUDI SPIRITUALI.)

But although we find within recent years that the study of the folk-lore of Italy has received serious attention, materials for a satisfactory treatment of the *canti popolari* are in-

complete. Much has been written about the words of traditional songs, and innumerable collections of popular poetry have been published,⁵ but no attempt has been made towards a scientific and systematic work on the melodies, tracing their origin and development and various forms. In the many volumes of the *Archivio per lo studio delle tradizioni popolari*, edited by Giuseppe Pitre and S. Salomone-Marino, and in G. Pitre's excellent work, *Bibliografia delle tradizioni popolari d'Italia* (Clausen, Turin, 1894), mention is made of the various collections of *canti popolari*; and in the former volumes there are occasional short articles which refer to the tunes, and give a few musical examples. During the latter half of the 19th century Ricordi and other publishers issued large quantities of modern *canti popolari* in volumes entitled 'Canzonette veneziane,' 'Stornelli toscani,' 'Canti lombardi,' 'Napolitani,' 'Siciliani,' etc., purporting to be local songs belonging to the several provinces of Italy, not all authenticated.⁶ The melodies of the 'Canti lombardi,' at least are genuine; also the 'Canti siciliani,' edited by Frontini, and the 'Canti abruzzesi,' collected by P. Tosti and G. Finamore. The last named, in an interesting article⁷ on the harvest-songs of this district, draws attention to the solemn, religious character of the melodies, in contrast to the words, which are merry love-songs. This peculiarity Finamore attributes to the great antiquity of the melodies,⁸ which have remained unchanged for centuries, though the words have altered. The following *Canti della meititura* (harvest) are amongst the commonest; the tonality of both is curious, the first being pure Lydian and the second of more or less Phrygian character.⁹

⁵ See, for instance, G. Pitre's *Studi di poesia popolare* (Palermo, 1872); Rubieri's *Storia della poesia popolare italiana* (Florence, 1877); A. D'Ancona's *La poesia popolare italiana* (Leghorn, 1878). See also Carducci's *Canzoni e ballate, strambotti e madrigali nel sec. XIII e XIV* (Pisa, 1871); and an interesting but unfinished work entitled *Canzoni antiche del popolo italiano, riprodotte secondo le vecchie stampe a cura di Mario Menghini*, Rome.

⁶ Speaking of Tuscan songs, Miss Busk shows how in these days of cheap printing and half-educated editing 'the literary songs (i.e. art-songs) have got mixed up with the folk-songs.' As instances, she quotes 'Stella confidente,' 'Non mi amara,' 'Ritorna! che t'amo' which were sung in London drawing-rooms as much as on the wayides and in the slums of Italy. Such songs also as Tosti's 'Vorrei morire' are constantly heard in the streets. *The Folk-songs of Italy*, p. 261 et seq.

⁷ *Melodie popolari abruzzesi; i canti della meititura*, G. Finamore; see vol. 13 of the *Archivio per lo studio delle tradizioni popolari*, 1894.

⁸ Chaque acte de la vie de l'agriculture était accompagné de sacrifices, et on exécutait les travaux en réchant des hymnes sacrés.' De Coulanges, *La Cité antique*, p. 184.

⁹ From the Vasto district, noted by L. Anelli. It should be accompanied by the cornemuse.

¹ 'L'Homme armé' is a well-known example. It must not be forgotten, though, that Italy was for many centuries the meeting-place for musicians from all countries—hence the cosmopolitan character of the themes chosen for the great contrapuntal works.

² *Canzoni francesi* a due voci, buone da cantare e suonare,' published by Gardano, Venice, 1599. The words are love-songs, and the music chiefly by Sermisy, Peletier, Heurtel and Gardano himself. Gardano had published in the previous year 'Venticinque canzoni francesi,' consisting chiefly of four-part songs by Jannequin.

³ This collection is called 'Canzon Villanesche alla Napolitana di Messer Adriano; a quattro voci con la canzone di Ruzante. Libro I. Venezia, Girolamo Scottò, 1648.'

⁴ For an example see 'La Bernardina' in Kiesewetter's *Schicksale*, etc. App. p. 13.

Aria della notte.¹

5.

Largo assai.

Some of the songs from the Abruzzi collected by Tosti are of extreme beauty in form, melody and words. Many of the Sicilian and Neapolitan songs begin with a long-drawn high note; they are sung very fast and strongly accented.

The wealth of *canti popolari* is prodigious, and although (as mentioned above) they vary greatly in the different districts, their general characteristics are the same. The harmonic and formal structure is simple. The accompaniment, which is usually intended for the guitar, consists merely of the tonic and dominant chords, and rarely modulates into anything except the nearest related keys.² Few modal *canti popolari* are extant, although the flattened supertonic which is characteristic of the Sicilian and Neapolitan folk-songs recalls the Phrygian mode.³ The time is more frequently triple than duple, and this especially applies to the dance-songs. The largest proportion of folk-songs consists of eight-lined verses of eleven syllables, and are variously called *strambotti*, *rispetti*,⁴ *dispetti*, *siciliani*, or *ottavi*. The three-lined verses are called *ritornelli*, *stornelli*, *flori* or *fiorette*. But it should be added that the terms *canti*, *canzoni*, *canzonette*, *stornelli* are very loosely and indiscriminately employed.⁵ But speaking generally, *stornelli* are lively songs of love, *canzoni* and *canzonette* narrative songs, and *canto* is a generic term applicable to almost any form. Modern composers generally use the word *melodia* for a lyric song (*Lied*).

A strong claim to the title of *canti popolari* may be advanced in favour of the popular melodies taken from operas. Ambros tells us that during the 17th and 18th centuries, favourite 'couplets' from operas, which at first had nothing in common with the folk-song beyond being melodious and simple, acquired

by degrees a place similar to that held by the *Volkslied* in Germany.⁶ And the immense popularity of operatic tunes in Italy during the last century cannot surprise us when we remember the theatre is a ubiquitous institution there, and that the quick ear of the Italian instantly catches melodies with a distinct rhythm and an easy progression of intervals.⁷ Having regard, therefore, to the wide diffusion of the opera and its influence on all classes during nearly three centuries, it is reasonable to conclude that it may have checked the normal development of independent songs, and perhaps helped to obliterate the traces of old traditional tunes. It will be seen later that the exactly contrary process took place in some countries, where in order to make their operas popular, composers introduced favourite folk-songs or dances, or indeed whole operas were based on national melodies.

The so-called *canti nazionali* belong to a period beginning about the year 1821. They have all been inspired by the political movement of the 19th century for the regeneration of Italy. Their tone is naturally warlike, but the melodies are ultra-simple and rather weak. The most celebrated of them are: 'Addio, mia bella';⁸ 'O dolce piacer, goder libertà'; 'Daghela avanti un passo'; 'Inno di Mameli'; 'Fratelli d' Italia'; 'La bandiera tricolore'; 'Inno di Garibaldi,' and 'All' armi' by Pieri. The years in which Italy has been most deeply stirred by struggles for independence were 1821, 1848 and 1859, and all the songs whose names have just been cited can be traced to one or other of those revolutionary periods.

For many important forms of both vocal and instrumental music we are primarily and especially indebted to the Italians, but as regards the art-song proper we owe them little. From the latter part of the 17th to the early part of the 19th century, the *canzoni* and *canzonette da camera* exhibited neither merit nor improvement. Several collections were published at intervals, yet apparently they attracted little attention. Many were of a religious tendency; not hymns but *canzoni spirituali e morali*, as they were called. Even when the *canzoni madrigaleschi* were reduced to two voices (as, for instance, those by Benedetto Marcello, published at Bologna in 1717) they continued to be essentially polyphonic, one voice imitating the other.

¹ From the Guardiagrele district, noted by M. Bruni. Finamore adds that they are sung in turn by one voice at a time, accompanied by the *chitarra battente*, a sort of *colascione*. The verses are of interminable length.

² A weak and very modern colouring is imparted to the harmony of the published folk-songs by an excessive use of the chord of the seventh.

³ It has been remarked that the flat supertonic may be found in the *canzonette* from the comic operas by Vinci and Leo; and that an air from A. Scarlatti's cantata 'Andate o miei sospiri,' marked *alla Siciliana*, has the same characteristic, showing that Scarlatti realised it as essential to the native quality of the melody. (See E. J. Dent's *A. Scarlatti, His Life and Works*, 1905.)

⁴ *Rispetti* are always sung, and as eight lines is the normal number, the popular mode of speaking either of inventing or singing them is, *dar l'ottava*. R. Busk, *The Folk-songs of Italy*, p. 20. ⁵ *Canzone* is the Sicilian equivalent of *rispetto*, and *chiri* of *stornello*. The children's songs in Italy are very numerous, and are usually called *Ninne-Nanne* or *Nane* in Venice. Busk, *op. cit.* p. 47.

⁶ Orloff recounts how an aria from an opera by P. Cafaro (b. 1706), 'Belle luci,' was for half a century the best-known and most widely sung song all over Italy; the melody was even painted on china and embroidered on robes (*Essai sur l'histoire de la musique en Italie*, I, 293). See also the account of the popularity of Piccini's opera 'La Cecchina' in the *Oxford History of Music*, vol. v., *The Viennese Period*, p. 97, W. H. Hadow.

⁷ The chorus of an opera is frequently chosen from amongst the workmen and labourers of the place where it is performed; and thus even difficult choruses may be heard in the streets and suburbs of towns which possess a theatre.

⁸ This is an adaptation of Italian words to 'Partant pour la Syrie,' and was probably made during the war of 1820, in which France assisted Italy to liberate herself from the yoke of Austria.

⁹ A ballet-song written by P. Giorza in 1858.

During the 18th century the lyric poet Metastasio exercised a certain effect on vocal music, and many of his *ariette* were set by contemporary musicians; but his influence was not lasting. A little later, a few inferior composers, such as Asioli, Barni, Federici, Blangini and Romagnesi¹ (all born in the second half of the 18th century) turned their attention to song-writing, and published quantities of *ariette*, *canzonette*, *rondà*, *notturni* and *romanze*, but they were too weak to stand the test of time, and such popularity as they may once have known has been brief and fleeting. In fact, few Italian composers of merit ever deemed it worth while to bestow pains on this kind of work; to write an opera was their natural ambition, and on this they concentrated their powers. 'With all the best talent devoted to the service of the Church or the theatre there was little room left for the more solitary and self-contained expression of lyric feeling.'² Nor was there any demand for lyric songs. Just as the 'couplets' and favourite tunes from the operas supplied the people with many *canti popolari*, the *aria* and *cavatina* provided the vocal pieces which the educated classes preferred. If we look through the work of Paisiello, Cimarosa, Mercadante, Bellini, Donizetti, Verdi and other celebrated composers of opera, very numerous examples of the above-mentioned miscellaneous kinds of songs may be found, but none evince any serious thought. They were obviously thrown off in leisure moments, and now they are never heard of. An exception, however, must be made in favour of Rossini, some of whose songs have fine melodies and interesting accompaniments.³ Among song-writers who lived nearer our own time Gordigiani, Mariani and Giordani are undoubtedly the best for simple melodious songs.⁴ They wrote in the true Italian style, with the utmost fluency and sentimentality.

With few exceptions Italian songs are marked in a greater or less degree by the same qualities. The voice-part is ever paramount in them, and all else is made to yield to it. The beautiful quality and the wide compass of Italian voices,⁵ and the facility with which they execute difficult vocal phrases, tempt the composer to write brilliant and effective passages where a simple melody would be far more appropriate to the words. The words may indeed give the form to the song, and the music may substantially agree with them, but we miss that delicate

subtle understanding between the poet and the musician, where the music often interprets the words, or a single word gives importance to a note or passage. Again, the accompaniment holds a very subordinate place. Its sole use is to support the voice; rarely has it any artistic value of its own,⁶ and seldom, if ever, does it assist in expressing the poetic intention of the work.

It would be wrong, however, to apply these criticisms without reserve to all modern Italian composers. P. Tosti, for instance, possessed a genuine lyric talent, and some of his melodies are charming. Clever accompaniments also are met with in the compositions of Marco Sala, Faccio, Bozzano, Coronaro and Smareglia. The last two have paid especial attention to the words of their songs. A cycle of songs, entitled 'La Simona,' by Benedetto Junck, would have a high rank assigned to them in any country; and the same can be said of Sgambati's beautiful songs, with their highly developed accompaniments. E. de Leva's, Enrico Bossi's, P. Tirindelli's and Rotoli's songs have merit; and Leone Sinigaglia, writes with grace and originality, and the increased scientific interest in the folk-song characteristic in all countries of the early years of the 20th century is producing its effect in the work of such composers as PIZZETTI, RESPIGHI and CASTELNUOVO-TEDESCO.

¹ These last two composers were better known in Paris than in their own country.

² W. H. Hadley, *Oxford Hist. of Music*, v. 325.

³ See for example 'La regata veneziana,' No. 2, where the rhythmic figure in the left-hand represents the regular movement of the oars, whilst the right hand has continuous *legato* passages in double notes.

⁴ Rossini once aptly summed up the Italian ideal of a song; 'Il diletto dev' essere la base e lo scopo di quest' arte—Melodia semplice—Ritmo chiaro.'

⁵ It is curious to note how limited is the compass of voice for which modern Italian composers write songs intended for circulation in foreign countries, while the songs they write for the home-market often exceed the compass of two octaves.

⁶ A point to be taken into consideration as greatly impoverishing and limiting the accompaniments is that, on account of the climate and the outdoor life the Italians lead, the guitar and mandoline are as much used as the pianoforte.

⁷ The writer also owes her thanks to Signor Domenico Comparetti for information on the folk-songs of Italy.

SWITZERLAND

Although this country is bound together by a strong national feeling, it contains great diversities of idiom. More than half the population speak German; the rest either French or Italian, and a small fraction Romansch or Ladin. Hence there is little specifically national music, as it generally resembles that of the country to which it lies nearest. For instance, the folk-songs on the southern side are essentially Italian in character, while the French-Swiss and German-Swiss folk-songs are included in the collections of France and Germany. A purely indigenous feature in Swiss music is the cow-call, or *Kuhreihen*, which has been already treated. (See RANZ DES VACHES.) The old watchman-songs should also be mentioned. These date back for centuries, but are probably of German origin; as in the canton of Tessin, where Italian is the common language spoken, the night watch-call is still sung in Old German. Nearly all the true Alpine songs can be played on the Alphorn, to which in fact they owe their birth. The Swiss peasants have always possessed a remarkable harmonic aptitude. The herdsmen can skilfully improvise songs in many parts, and vary them with *Jodels* as ritornels or refrains. In many of the dance-songs the rhythm, too, is highly developed, necessitating constant changes of time-signature. Otherwise the melodies, like the poetry, are of the simplest character in form and metre.

Looking back on the past history of music in Switzerland, we find that the composers of any note in this country have generally identified themselves with other nationalities. Thus in the 16th century the great contrapuntist Ludwig Senfl's¹ name appears among German composers; in the 18th, J. J. Rousseau is claimed by France, just as Nägeli, Raff and Schnyder von Wartensee, nearer our own time, are by Germany. But Switzerland has never been without her own musicians, who have striven in all ages to keep up the national feeling, although their names are now scarcely remembered.

The Reformation exerted a great influence in French Switzerland. The Psalms of G. Franc, the two Bourgeois and Davantes are still heard around Geneva. Some of the *corautes* of the Fribourgeois have beautiful

refrains, recalling the ecclesiastical sequences; and in many of the old songs used in the peasants' *Festspiele* are traces of Goudimel's fine hymns adapted to secular words. These festival-plays, in which the peasants represent some national legend or historic event by word, dance and song, are held in different districts, and form a powerful factor in the musical life of Switzerland. They have incited such Swiss musicians as Baud-Bovy, G. Doret and F. Niggli to take down the songs sung on these occasions by the peasants and to write simple popular melodies in the same spirit. Whilst the Church cultivated the taste for hymns and Chorals,² the frequent wars gave rise to innumerable songs of satire, strife and politics. Some of the earliest French collections of these songs were printed by P. de Vingle at Neuchâtel in the 16th century.³ He also printed many books of carols (Noëls Nouveaultx, 1533), usually with very irreverent words set to favourite sacred and secular tunes.

In the 17th and 18th centuries music-schools were formed in the various towns of Zürich, Basle, Berne and Coire, and their libraries have preserved numerous collections of songs by Dillhern, Simler, Krüger, Briegel, Musculi, the Molitors, Dietbold, Menzingen, and especially L. Steiner (b. 1688)—the first Swiss composer to cultivate a love for his country's music. J. Schmidli, who set Lavater's 'Chansons suisses' to music, and Egli, who published several 'Chansons suisses avec mélodies,' followed in his steps. After Egli's death in 1810, his pupil Walder carried on his work, together with Ott, Albertin, Bachofen (a special favourite) Greuter, Felix Huber, Kuhn and Zwinger, some of whom were national poets as well as musicians and collectors. J. G. Nägeli (as much a German as a Swiss song-composer) did much to promote musical education in the country of his birth. He was joined in this movement by Kunlin, Wachter, Krausskopf, the brothers Fröhlich, and Ferdinand Huber. As song-writers Karl Attenhofer, F. Grast and Ignaz Heim should be especially mentioned, the latter being perhaps the most popular. Zwyssig composed the 'Cantique suisse' (the national hymn) and Baumgartner the fine *chant* 'O ma Patrie.' The names of Methfessel, C. and F. Munziger, G. Weber, A. Meyer and F. Hegar (who is principally famous for his choral songs) may complete the list of that period.

During the latter part of the 19th century a new impetus was given to Swiss music by a group of young and enthusiastic musicians, who felt the necessity of preserving the tradi-

¹ Towards the end of the 15th century L. Moser of Basle contributed largely to the popularisation of the church songs. His book, *Ein vast nothdürfftige Materi*, etc. contains a large number of German songs adapted to familiar church melodies. See Becker, *Hist. de la musique suisse*.

² The collection of 1809 contains the celebrated *complainte* on the heretics burnt at Berne: 'Die war History von den vier Ketzer Prediger ordens zu Bern in den Eydenossenschaft verbrannt.'

³ Senfl contributed largely to the various collections of the 16th century; and in one of these called *Bicinia Gallica*, dated 1545, there occurs the oldest known version of a *ranz des vaches*.

tional treasures of their country and developing them with all the resources of modern art. They endeavoured to prove the essential unity of feeling in the nation. Though composed of such various races, the same patriotism, love of liberty and independence have animated this little republic in all times of its history. The leaders of this movement are Hans HUBER and E. JAKUES-DALCROZE (q.v.). The latter's numerous volumes of 'Chansons romandes,' 'Chansons populaires et enfantines,' 'Chansons des Alpes,' 'Chansons patriotiques,' etc. contain graceful little pictures of national life, in which Jaques-Dalcroze cleverly introduces the types of melody, harmony, and rhythm characteristic of the various cantons.¹

In the year 1900 the 'Union of Swiss Musicians' was formed, which holds yearly festivals for the performance of new works of all kinds by these composers. Especial interest is attached to those of the younger generation, all of whom have included song as an important branch of their art. The principal names are as follows: E. Jaques-Dalcroze, V. Andrae, Otto Barblan, E. Bloch, E. Combe, A. Dénéreaz, G. Doret, F. Klose, H. Kling, E. Reymond, Fritz Niggli, J. Ehrhart, R. Ganz, F. Karmin, J. Lauber, W. Pahnke, P. Maurice, W. Rehberg, G. Pantillon, L. Kempter, etc.

ROUMANIA

Roumania is a Romance country, and embraces both Moldavia and Wallachia. The

¹ E. Jaques-Dalcroze, *Die Musik in der Schweiz*.

character of its national music is, therefore, very mixed. Among the educated classes a preference is shown for French and Italian music, and thus the Latin origin is betrayed. The real folk-music has also much in common with its Slavonic neighbours, and the gipsy element is strongly represented by the *Laoutari*.² Without these gipsy lutenists, no christening, wedding,³ or funeral is held to be complete among the peasants, though at funerals in Roumania, as in Russia, it is the village women who are the professional 'wailers.' Their song of wailing is a monotonous recitative chanted on a few notes, interspersed by a succession of sharp little cries, whilst the words enumerate all the qualities of the deceased.

The most beautiful of the Roumanian folk-songs are enshrined in their *doinas*.⁴ This is a generic term, as it includes songs of various origins. In times past, both pastoral and war-songs were alike called *doinas*, but at the present time they resemble the French *complaintes*, as indeed their name—*doina*=lament—indicates. They are usually in the minor key; the melody is full of turns, trills and other embellishments, yet throughout they are of a melancholy cast.

Though the folk-songs may be less original and striking than the national dances, they are extremely melodious and full of sentiment. The poetry is rhymed and often in five-lined stanzas. The metre is irregular, and refrains frequently occur either at the end of the line or the stanza, as the following well-known folk-song (*cantec popular*) shows:

Pentru tine Jano.

² Both Verdi and Liszt have testified their approval of the *Laoutari* in enthusiastic language. See J. Schorr, *Musik in Roumänien*, in *Die Musik*, 1903, No. 22.

³ A Roumanian proverb says: 'Mariage sans *Laoutari* c'est-à-dire chose impossible.'

⁴ The name *doina*, according to Hădeț, is of Dacian origin, and may also be found in Sanscrit, as *d'haina*.

The oldest and most celebrated dance is the *hora*, a slow choral dance written in rondo form usually in this rhythm :

Another dance, equally written in rondo form, but usually in a major key, is the *sarba* (or *sirba*). Though the prevailing tendency of this country's national music is melancholy, some of the dance-tunes are, nevertheless, gay and light. The occurrence of the augmented second between unusual intervals is frequent, and doubtless due to gipsy influence. Melodies of more recent date consist usually of the first phrase in the major and the second and concluding phrases in the relative minor, as in so many Slavonic tunes. The melody is also often played by the chief singer on the *cobza*, a sort of flute.

The renaissance of music in this country did not begin until the middle of the 19th century, and its principal promoters were Professor Wachmann (who especially called attention to the national music), Flechtenmacher and Caudella. The latter was the creator of the Roumanian national opera, and together with Ventura, Scheletti and Cavadi, composed numerous and favourite songs. These closely resemble the typical French and Italian *romances*, and have little in common with the German or Russian art-song. Mention should also be made of Eduard Hübsch, the composer of the national hymn. Musicescu and Kiriac have reproduced in their compositions the old Roumanian church and folk-songs. Margaritescu, Stephănescu, Spirescu, Ciran, Ercole and Dumitrescu have written numerous songs and ballads, besides other works; and among a younger generation, Enescu, better known in western Europe as ENESCO (*q.v.*), and Lcarlătescu, who have won for themselves European reputations in more than one branch of music, perhaps stand the highest.

The cultivation of the national poetry and songs is due to the poet Vasili Alexandri,¹ to Asaki, Carmen Sylva, H. Vacaresco, Wachmann, Adamescu, Kogolniceanu and others. There are Conservatoires at Bucarest and Jassy, where young musicians can obtain a scientific training in their own country.

There is also a considerable Roumanian colony of Balkan origin in Hungary, who first established themselves here in 1230. They lead a more or less wandering life among the mountains, pasturing flocks. Their language, of a Latin stem, is much intermixed with Albanian, Slavonic and Hungarian words, but

¹ Vasili Alexandri was the first to collect the folk-ballads. His collection was published in 1852. See Otto Wagner's article *Das rumänische Volkslied, Sammelbände*, I.M.G. No. 1, 1902, where the treatment of the literary side of the folk-song is far superior to the musical.

their folk-songs and dances are quite distinct, and essentially their own. Among the dances we find the true Roumanian *hora*, *sirba*, *tarina* and *ardeleana*; and their innumerable songs and ballads are of Balkan rather than Hungarian origin. The oldest are theological or mystical in subject, but in the historical ones the heroes fight against the Turks. Among the *kolindas*, the religious kind are the commonest, treating of the life of our Lord, of the Virgin and saints, and the melodies are in plain-song.²

MODERN GREECE

It is difficult if not impossible to avoid the mention of oriental songs, when treating those of Greece, because in the islands and on the mainland the songs are intermingled. Bourgault-Ducoudray says that in Greece the oriental chromatic scale is often found :

1.

And again in Smyrna and other parts of Asia Minor the Aeolian scale³ is in constant use. The melodies sung along the coast and in the Ionian islands are very Italian in character, and are easily distinguished from the genuine Greek melodies by being in the European minor scale. But inland, and away from the coast of Asia Minor, the pure Greek songs predominate.⁴

Until within a recent period there existed a number of minstrels or bards who combined the profession of musicians with that of chroniclers, and whose function it was to hand down by word of mouth, and thus keep alive, the great traditions of their country's history. These

² These Roumanians belong to the Greek Church. See G. Moldaratu's article *Die Rumänen, in Die österreichisch-ungarische Monarchie*, vol. vi.

³ The Greek names of the modes are here retained in preference to the ecclesiastical, and those readers not conversant with the interchange of nomenclature are referred to the article on MODES, ECCLIASTICAL.

⁴ M. Bourgault-Ducoudray says in the preface to his 'Trente mélodies populaires de Grèce et d'Orient' (using the Greek names) that the Greek Hypodorian, which only differs from the European A minor scale by the absence of the leading-note, is of frequent occurrence among the popular melodies of Greece. The Greek Dorian, Phrygian, Elypihyrion and Mixolydian modes are also fairly often met with; and the Hypolydian with the fourth lowered (which may easily be confused with the western major scale of F) is at the present time the commonest of all.

men were held in high esteem in their time; but, as in other countries, education and the introduction of printing have brought about their rapid disappearance. Yet we are told that only a few years ago an old and blind minstrel, by name Barba Sterios,¹ sat, surrounded by a crowd, on the roadside by the gate of Kalamaria in Thessalonica. He played and sang in a melancholy and monotonous tone to his λύρα,² without raising his voice to a high pitch, and in pathetic parts drew deep emotion from his audience. In epic recitations of this kind the lyre is only used as an accompaniment in succession to the chanted words, and not with them. For instance, the old man to whom reference has just been made would start by touching a prelude on his lyre, and then begin intoning a couple of verses, after which the instrument came in again, and so on to the end, alternately playing and singing.³

The τραγούδια τοῦ χοροῦ, or choral songs, are ballads in the original sense of the word, for they are sung as an accompaniment to a complicated set of steps and mimic evolutions. At weddings, Christmas, on May-Day and similar festivals, men and women may be seen dancing together in a ring, hand in hand, outside their country inns. The leader of the dance, as he sweeps on, waves a handkerchief and sings a verse, accompanying it with appropriate gestures, while the rest of the dancers sing alternate verses in chorus. There are also other dance-songs, which are sung antiphonally by distinct sets of voices. This music is of a light and gay kind, consisting of short phrases which often end on the high octave:

with little or no variety in melody or rhythm. The words of the many Greek cradle-songs are of great beauty, but the melodies are monotonous and limited in compass.⁴ Greater interest is imparted to the lyric folk-songs belonging to the eastern parts of Greece and the adjacent islands (where the melodies are naturally of an oriental character), by the irregular rhythms and constant change of time, such as alternate 2-4 and 3-4 time.

The Greeks have a gift for improvising or reciting in verse, and the preponderance of open vowels and the facility of rhyming in the Romic language⁵ render their task easy. Also

¹ Barba = uncle, is used as a term of endearment, like *dyadya* = uncle in Russian.

² A rough sort of stringed instrument, recalling the classic *λύρα* with five sheep-guts; the bow consisting of a stick bent at one end and a bunch of horse-hair strung along it.

³ G. F. Abbott's *Songs of Modern Greece*.

⁴ The lullabies are called *Βαυκαληματα*, *Νυνισματα*, *Ναυρισματα* from *ναναιρίζω*, to lull to sleep.

⁵ The words of the folk-songs are all in modern Greek, *i.e.* Romic, though they vary in dialect. The vernacular language is never taught, but many of the best modern poets have adopted it, and the effort made at the time of the War of Independence for the restoration of the classical language has had but a poor success. The Romic language is more easily translated into Italian than any other tongue. Hence the reason that song-collectors such as Bourgault-Ducoudray, Büchner and others, make use of it.

they are keenly sensitive to emotions roused by striking events and incidents, both of past and present history. Many of their songs have reference to the customary periods of absence from home, when the villagers, who follow the professions of merchants or pedlars, descend from their hills to ply their trades in foreign lands.⁶ Thus a youth who quits his home for the first time is accompanied a certain distance on the road by his family and friends. Before taking final leave of her son the mother laments his departure in a song either improvised or traditional, and in response the youth bewails the hard fate which drives him from his home.⁷ There is proof that among the mass of folk-poetry still extant much of it dates back to old classical times. For example, the famous swallow-songs, when boys go about the streets greeting in song the reappearance of the swallows, embody a very ancient custom.⁸ Serenades and aubades are most in vogue in the large towns, and each province has its own special songs; but there are some ancient songs of great celebrity, such as 'The Fall of Constantinople,' which are the common heritage of all the provinces.

*The Fall of Constantinople.*⁹

3.

In the Greek folk-songs, as among other nations, the last words or lines are often repeated, or the words are broken up into meaningless syllables, recurring three or four times before the word is completed. Or it may be that the words are interrupted by interjections or refrains. It should be noted also that the accents of the words and music do not always agree, which clearly proves that different words were set to already extant melodies. It is difficult to represent these Eastern songs in our present notation, but the following example, of which a few bars are given, is a love-story from the Island of Samos,¹⁰ and shows many of the above-mentioned features, including the peculiar tonality, limited compass, changing time and deep melancholy inherent to them. Stringed instruments are used to accompany

⁶ Like the *Viachs* in the Valley of Zagari who go to Spain.

⁷ See Garnett's *Greek Folk-Poetry*, and Passow's song 'The Exile.'

⁸ For the words of the Swallow and May-time songs see Kind and Passow. Many have been translated into English by Miss Lucy Garnett in *Greek Folk-Poetry and Greek Folk-Songs*.

⁹ This song was taken down by Büchner from an old woman of eighty, who again had heard it from her infancy, sung by old people.

¹⁰ Büchner, 'Griechische Volksweisen,' p. 406.

these songs, and nowadays principally guitars and mandolines.

4.
Andante. Σὰν εἰ - - vai vā-sán - εἰ - vai vā-
- - γω βά-sa-va sán εἰ-vai vā - γω βά -
- - σα - va καὶ πῖ - - κρεῖ γὰ γὰ sé-va. Σύ.
- - ρε - του - λί, σὺ-ρε του-λί . . . μου σὺ κα-λό.
etc.

The literary revival which followed the War of Independence, and the abundance of poetry written in the present day, have, however, produced no effect on the music of the country. The Greek song-writers worthy of mention are lamentably few; the generality of their published songs are with few exceptions either trivial or sentimental. Among the Greek composers who have won European fame, Spiro SAMARA (*q.v.*) may be noted as the best. At an early period of his career he achieved success in Paris by his graceful little songs. Other song-composers are: Zacharopoulos, Sidere, Beloudion, Lampalet, Karrërë, Rodios and Leonardos.

The few and best exceptions to the general average of songs are those in which either the composer has taken the folk-song as his model, or the actual folk-songs themselves, such as are to be found in L. A. Bourgalet-Ducoudray's 'Trente mélodies populaires de Grèce et d'Orient'; and more recently in the collection of M. Pakhtikos, Director of the School of Music in Constantinople, who personally noted them down in remote districts of Thrace, Macedonia, Crete, the Aegean Islands, etc.

RUSSIA

No country is richer in national music than Russia, and nowhere has it been more carefully preserved from neglect or oblivion. For many years the folk-songs and dances of the most remote districts were collected by order of the Imperial Government: musicians and savants of the highest rank¹ joined in folk-song research and assisted in the task of compilation. Moreover, the modern school of Russian music, which holds so important a place in art, owes, in part, its strength and magnetic attraction to the ingrain colour derived from race temperament. Though it was only in the 19th century that Russian music achieved European renown, it has always been loved and cultivated in its own country. Hence from birth onwards the peculiar harmonies and rhythms of his native land have so possessed the ear of every Russian musician that consciously or unconsciously he has re-echoed them in his works.

The oldest form of national poetry would seem to be the *builini*, of which there is evidence that they existed 1000 years ago. They are national epics akin to the historical romances; of great length and in unrhymed metre.² The music, which is a kind of monotonous chant, accompanies one line, or at most two lines of the song, repeating to the end.

As it befell in the capital Kieff.³

1.

The *horovodi* or choral songs belong solely to the Slav races. They celebrate the change of seasons and the successive festivals of the ecclesiastical or agricultural calendar, while some are especially appropriate to various peasant occupations.⁴ These *horovodi* are sung in a curious manner: the first voice sings a melody, the other voices in succession sing variants of the same melody, and as the voices fall in with one another a kind of counterpoint is established, whilst each voice retains its independence.

2.
1st Voice.
2nd Voice. etc.

¹ Such as Balakirev, Rimsky-Korsakov, Serov, Melgounov.

² One of the most interesting small collections of *builini* was made by R. James, an English clergyman, who spent the winter of 1619 in the far north of Russia. His MSS. are now in the Bodleian Library.

³ Rimsky-Korsakov, 'Chants nationaux russes,' No. 1. (Communicated by Moussorgsky.)

⁴ The singers of the christening, wedding, funeral, or even coronation songs are always elderly women, and no ceremony is considered properly conducted without them. They are to some extent 'improvisatrici'—reflecting in their song, past and present, individual and general conditions. See preface to Dioutsh, Litvounov and Istomin's 'Songs of the Russian People.'

MELGOUNOV (*q.v.*) contended that from the earliest time it was essentially polyphonic in structure, and he refuted the general idea that folk-songs were sung in unison.¹ In taking down the songs from the peasants he carefully recorded each voice separately, and attributed great importance to the preservation of the popular counterpoint. His examples show that the secondary parts (*podgoloski*) constitute really a free imitation of the main melody:

3.
1st Voice.

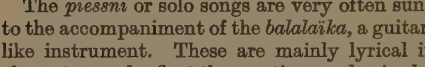

2nd Voice.

3rd Voice.

4th Voice.

etc.

The *piessni* or solo songs are very often sung to the accompaniment of the *balalaika*, a guitar-like instrument. These are mainly lyrical in character, and reflect the emotions and episodes of peasant life. Some of the love-songs are beautiful, and the wailing songs—*zaplachki*—most pathetic. The melancholy and monotonous cradle-songs have a strange charm of their own; and the so-called 'laudatory' songs (glorifying some individual indiscriminately, before or after death), which are the peculiar property of the Slav, rank high in importance among the songs of the peasants.²

The rhythm of Russian folk-songs is often characterised by extreme irregularity. The tunes usually begin on the first beat of the bar, but the phrases are of unequal length; they are frequently in 7-4 or 5-4 time, or 2-4 and 3-4 time alternating; but it must be remembered on the authority of Sokalski and others that the division of the melodies into bars is arbitrary.³ The original tunes, handed down by oral tradition, owed their rhythm to no symmetrical repetition of accents, but to the cadences suggested by the flow of the verse itself. Again it frequently happens that the accent of the verse varies, which renders it difficult to arrange under the regular metrical accentuation of the time system. The accent moves from one syllable or one word to another, for instance, *gory* or *gor'y* (hills)—as if to avoid monotony; and the inequality of the number of syllables in each half verse, each of which has one main accent, appears to be one of the characteristics of Russian folk-songs.⁴ Naturally the dance-songs have more regular accents and rhythms, especially those of gipsy origin, when the dancers mark the time with their feet.

¹ See preface to J. Melgounov's 'Russian Songs.'

² The numerous other kinds of songs which the above classifications do not include cannot here be dealt with. They will be found under their different headings in any standard collection. See also Ralston's *Songs of the Russian People*, pp. 34, 39 *et seq.*

³ Sokalski's *Russian Folk-Songs*.

Peasants do not like singing solos; they prefer to sing in *artels* or companies, in which each member is a performer and composer, owing to the above-mentioned structure of the songs.

Glinka and many other theorists have made the peculiar tonality and harmonisation of Russian songs their life-long study. Melgounov says that they are based on the so-called natural (untempered) scale, which is impossible to represent in our present notation; and that the foundation of the major and minor scales is contained in this simple formula: $1\frac{1}{2}111\frac{1}{2}$. That is, if the relative minor of the scale of C is taken descending from dominant to its octave the result is:

$$e_1 \bar{d}_1 c_1 b_1 a_1 g_1 f_1 e.$$

This when reversed will be found to be identical with the ecclesiastical Phrygian mode.⁴ Certainly there is an indisputable connexion between the musical theory of the ancient Greeks and the oldest and actually existing Slavonic melodies founded on these scales, more especially those of the western part of Russia. To modern ears the tonality, therefore, is of an uncertain character, and many melodies start in the major and bear distinctly the stamp of the major key until towards the end, where they modulate into the minor key in which they conclude. Further they more often begin and end on the supertonic, or indeed on any degree of the scale rather than the tonic. Another peculiarity we find in the folk and art-songs alike are the florid passages on one syllable. This and many other features in Russian song could be traced to Asiatic influence, for in Russia the eastern and western temperaments meet and intermingle.⁵

Early in the 19th century national representation was lacking in the music of Russian born composers. It awaited emancipation from the foreign influences under which it had so long lain. It was GLINKA who first began to effect its liberation, and the importance of his work cannot be exaggerated. Though his national opera, 'A Life for the Tsar' (except for a few bars in the opening chorus) incorporates no single folk-song, Glinka so identified himself with the feeling and spirit of the national music that his melodies became at once familiar to his countrymen. Glinka has truly been named the father of the Russian art-song. Previous to him, other song-composers, such as Alabiev, Varlamov, Kozlovsky, Verstov-

⁴ See preface to Linelev's 'Peasant Songs of Great Russia.'

⁵ Tchaikovsky's remarks on the character of the folk-songs are worth quoting. In writing to Tolstol to acknowledge some songs he had sent him, Tchaikovsky says, 'I must frankly say the songs have not been skilfully treated, and thereby all their original beauty has been lost. The chief fault is, that they have been forced into a regular, formal rhythm. The *butiri* have nothing in common with the dances. Besides this, the greater part of these songs is written in the cheerful D major scale, and this does not agree in the least with the tonality of the true Russian Volkslied, which is always of an uncertain tonality, so that one can really only compare them with the old church modes.'

⁶ C. Cui remarks that the 'Tartar influence is so strong that there is hardly one Russian folk-song not affected by it,' but that is an overstatement.

sky¹ and Lvov, wrote songs of the simple, popular type, imitating so faithfully the external qualities of the real folk-song, that some, such as Alabiev's 'Nightingale' and Varlamov's 'Red Sarafan,' have been accepted as national melodies. Lvov was the composer of the Russian national hymn,² the tune of which, though fine and suitable to the words, is not Russian in character.³ Again, others like Gurilev, Vassilev and Dübüque arranged a number of national airs, and some gipsy tunes, to modern words in rhyme and four-line stanzas, with a simple pianoforte accompaniment. Glinka's songs stand on a higher level, though they vary in merit; some of the earlier ones betray the Italian influence, and have elementary accompaniments; some are in dance-rhythm pervaded by a local colouring; others are pure lyrics and very expressive, but his finest effort is the powerful ballad 'The Midnight Review.' DARGOMIJSKY was nearly Glinka's contemporary, and shared the same enthusiasm for his country's music. His songs show more dramatic power; many consist of short declamatory phrases akin to recitative, and all evince a high regard for the meaning and metre of the words. Dargomijsky has, moreover, caught the intense but languorous spirit of the East. His ballads take high rank, especially one called 'Knight Errant.'⁴ RUBINSTEIN is a strange paradox.⁵ More cosmopolitan and western in feeling than any other Russian composer, it is his eastern songs which are the best. Many of his songs belong to the German *Lied*, the accompaniments being clearly based on Schumann as a model, as for instance, 'Nun die Schatten dunkeln' (Geibel), and 'Nacht' (Eichendorff). But his settings of Mirza Schaffy's words are by far the most beautiful and original of all his songs, and all are essentially vocal.

The five composers, BORODIN, BALAKIREV, CUI, MOUSSORGSKY and RIMSKY-KORSAKOV, formulated certain principles of their art, one of which directly concerns song, 'that vocal music should be in perfect accordance with the meaning of the text.' And though each composer with his individual tendencies reached this end by his own route, they were unanimous on this point, as may be seen on closer examination of their songs. TCHAIKOVSKY stands alone. He was more cosmopolitan than the afore-mentioned composers, and more individual than

national in his music. The emotional value and the beautiful melodies of his songs compensate for the inadequacy of ill-chosen words and for the defects of a certain diffuseness of treatment.⁶ But notwithstanding these artistic demerits, as an expression of passion, tragic or triumphant, his songs make a direct appeal and elicit a direct response. To this quality may be attributed his wide popularity in non-Slavonic countries.

Sacred and spiritual songs are greatly sung in Russia, and in connexion with them the names of Lvov, Bortniansky, Bachmetiev and Dmitriev are well known.

In conclusion it remains to give the names of some later song-writers whose work is discussed under their own names: ARENSKY, ARTIBOUCHEV, S. and F. BLUMENFELD, DAVIDOV, GLAZOUNOV, GRECHANINOV, KOPYLOV, LIADOV, LIAPOUNOV, RACHMANINOV, REBKOV, SRIABIN, SOKOLOV, STOCHBATCHEV, WIHTOL.

YUGO-SLAVIA AND OTHER SLAVONIC NATIONS

Much that has been said about the national music of Russia would apply also to other branches of the Slavonic people.⁶ There are,

¹ Verstovsky, who was hailed for a time as the true Messiah of Russian music, owed his fleeting popularity to his operas more than to his songs.

² Composed to order in 1833, the words by Zhukovsky.

³ It has been said that Lvov was not the true composer of this hymn, but merely took the melody of the trio of a *Gescheindmarsch*, composed by F. Bogdanovitch Haas, bandmaster of the St. Petersburg regiment of the Guards, and published in a March Collection in 1822. The notes are identical, the only change being made in the time.

⁴ C. Cui says of this ballad: 'It is impossible to put into adequate words all the laconic strength, the picturesque qualities and vivid realism conveyed by this song. It breathes the spirit of the past and appeals to the mind as vividly as a picture.'

⁵ The paradox, however, is explained by Rubinstein's Semitic race and his career as a virtuoso.

⁶ Since the war of 1914-18 the political distribution of the Slav peoples is as follows: Great Russia, White Russia, Ukraine and Transcaucasian Federation are included in the Union of Soviet Socialist Republics; the Czechs (Bohemians), Moravians, Slovaks, Silesians and Ruthenians (of sub-Carpathian Russia) constitute a republic; the Serbs, Croats, Slovenes and Dalmatians form the

nevertheless, important variations in the traits they appear to have in common, and certain characteristics peculiar to each nation which claim notice. The remarks will, however, refer chiefly to the folk-music, as in many of the countries music remains still in its primitive state, or can hardly be said to have developed beyond the stage of national airs; no musical schools have been formed, and the composers would merely be classed under the generic term Slavonic.¹ But of the beauty and enormous wealth of the folk-songs in these countries proof has been afforded by the many and valuable collections which already exist and yearly increase.

Indigenous to the Ukraine² is a kind of epic song of irregular rhythm recited to a slow chant. These *doumas* were originally improvised by the *Bandurists*, but these wandering minstrels are now nearly extinct, and their function has devolved upon the village women, who invent both the poetry and melodies of the songs which they sing. Among the peculiarities of these interesting songs, one is that if the song ends on the dominant or lower octave, the last note of the closing verse is sung very softly, and then without a break the new verse begins loud and accented, the only division between the two being such a shake as described by the German phrase *Bocktriller*. This feature is common also to Cossack songs,³ and to the songs of that Wendic branch of the Slavonic race which is found in a part of Saxony.

1.

Wendic Folk-song.

The Wendic songs, except when dance-tunes, are generally sung *tremolando* and very slowly. And the exclamation 'Ha' or 'Hale,' with which they almost invariably begin, may be compared with the 'Hoj' or 'Ha' of the Ruthenians and the 'Ach' of Great Russia. One of the most popular Ruthenian songs is 'The Cossack Ride,' better known under the name of 'Pretty Minka.'⁴ The superior charm of the songs of Little Russia is due, for the most part, to a prevailing cast of melancholy.

kingdom of Yugo-Slavia; Poland and Lithuania are independent republics; Bulgaria remains as before, but with curtailed territory; the Banat, Bessarabia, Bukovina, Crisana, Maramuresh and Transylvania are incorporated in the kingdom of Roumania.

¹ As for Instance Borodin, a Georgian composer, who is mentioned under Russia.

² 'Le dialecte de l'Oukraine en est tout différent du russe. Ce n'est pas un patois, c'est un dialecte constitué, qui possède une brillante littérature. C'est surtout la noblesse de Kiev, de la Volhynie, Podolie qui a eue l'influence polonoise; le *musik* de l'Oukraine est resté en dehors de son action par la nature de sa vie, et surtout par la différence de religion, car il pratique toujours le rite grec.' Dr. A. Bonnamy, *Notes pour la Russie d'Europe*, p. 430 et seq.

³ The Don Cossacks are Great Russians, and the Zaporogues Cossacks are Little Russians. Dr. A. Bonnamy, *Notes pour la Russie d'Europe*, p. 417.

⁴ The music and original words are given in Prach's collection, and the German version in Fink's *Hausschatz*, No. 167.

Inhabited by a people who vie with the Poles in susceptibility to poetic sentiment, Little Russia is naturally rich in songs. The greater part are in the minor, or based on the Church scales, of a slow tempo, and frequently with a halt or drag in the rhythm produced by shortening the first syllable and prolonging the

second, thus:

Croatian peasants, men or women, never use songs already composed; they improvise the words as well as the melodies themselves. Hence only those songs which sprang from the people are sung by them.⁵ This does not apply to the ritual songs which have been handed down by oral tradition for centuries, and in which the Croatians are very rich. The following song is sung at Midsummer as the men and women leap and dance round the fires lighted on the hill-tops and call to the heathen goddess 'Lado.'⁶

La-do! La-do! Bog pomana tom stanu ljeva f' La-do!

The chief dance-song of the Croatians and Serbs is the *kolo*, of which there are many kinds. To the *oro kolo* the peasants sing religious songs; to the *junačko kolo* heroic ballads; to the *zensko kolo* love-songs; and to the *salgivo kolo* humorous songs. There is a marked difference between the town and village songs. The latter exhibit the truest Croatian feeling; the town songs are more cosmopolitan, and are much influenced by the wandering *Tanburists*, who, like the Hungarian gypsies, sing and play the *tanbura* (the national instrument) in taverns.

Since the Illyrian movement of 1835, a national school of music has arisen in Croatia, and been fostered by educated musicians of the country. Previous to this, a Conservatoire of music had been founded at Agram, but it was not until 1846, when Vatroslav Lisinski's popular opera 'Ljubovi zlova' was given, that Croatian art-music gained notice.⁷ Lisinski, Ferdo Livadić, Ferdo Rusan, Ivan Zajc and his pupil G. Eisenhuth, the historian V. Klaić, and Vilko Novak have contributed to the lyric music of Croatia.⁸ F. Z. Kuhač's large collec-

⁵ F. Kuhač in a letter to W. Barclay Squire from Agram in 1893.

⁶ From F. Z. Kuhač's article in the *Österreichisch-ungarische Monarchie*, vol. vii, p. 110 et seq.

⁷ *Musik in Croatia*, by Ferdo Miller, p. 174 et seq. in *Öst.-ung. Mon.* Although Haydn was a Croatian by birth and freely used his native folk-songs in his instrumental works, he is rightly classed among German composers. But the remarkable resemblance between his greatest German song, 'Gott erhalte,' the Austrian national hymn, and a folk-song from the Bistritz district of Croatia cannot be passed over in silence. It has given rise to much discussion; see for instance, H. Reimann and F. Kuhač in the *Allgemeine deutsche Musikzeitung*, 1898 (Nos. 40-42); also Hugo Conrat's article in *Die Musik*, Jan. 1, 1905; and *Joseph Haydn*, by Dr. Kuhač. The tune is as follows:

Stal se jesem.

O. Fielscher, whilst admitting the resemblance of Haydn's melody to the folk-song, prefers to trace its origin back to the Church,

tion of South Slavonic folk-songs is of great value. The composer of the Croatian national anthem, 'Liepa naša domovina,' was an officer named Josip Runjanin.

All the Serb songs are of remarkable beauty and expressiveness, and although they resemble the Russian songs as regards their scale and tonality and the same elastic metre prevails, yet the melodies are more rhapsodical. And among these south-eastern nations the affinity with the music of the Arabs and other nations of Western Asia is more often indicated. The Serbian drinking-songs are noticeable; grave, solemn and devotional, they are quite unlike those of any other country; but as among the Serbs the hymns and secular songs are so frequently intermingled, this may be accounted for. Most of the Serbian and many of the Bulgarian songs end on the supertonic, as in the Serbian national hymn:

3.

The Bulgarian songs show Turkish influence; they are also quite irregular in metre, and far more fragmentary than the Serbian:

4. *Lento.*

The Bulgarians have a great love for the folklore of their country, and the volumes of the *Sbornik*, which the State publishes yearly, contain legends, ballads and songs with music.

POLAND

The songs of the Poles are mainly presented to us in the form of hymns, or in the form of their national dance - rhythms. One of the earliest and most celebrated examples of the former, dating from the 10th century, is St. Adalbert's hymn to the Virgin ('Boga Rodziça'), which is engraved in plain-chant on his tomb in the cathedral of Gnesen.¹ Here and at Dombrova on the Warka, it is still sung every Sunday. The hymn is, however, well known throughout Poland, as it is used on all solemn occasions, for triumphphant or sad ceremonials and on the battlefield²:

1.

Another familiar hymn is the 'Hajnal,' which is heard every morning from the towers of Cracow to awaken the sleeping town. In the old sacred song-books called *Kancyonaly* or *Cancionales*³ preserved in cathedrals, convents, and in the libraries of the great nobles, many old secular folk-songs are to be found incorporated in masses and motets⁴; likewise many *kolendas* which are peculiar to the Polish people. These *kolendas* (noëls) are old folk-songs, some dating from the 13th century, and are still sung in every house and street at Christmas time, and it is in one of these *kolendas* that we meet with the rhythm of the polonaise:

¹ St. Adalbert was born in 936. A member of the Polish hierarchy, St. Adalbert was by birth, however, a Bohemian, and, at one time, Bishop of Prague.

² For the hymn translated into modern notation by F. Lessel) see Sawinski, *Les Musiciens polonais*, p. 64.

³ The Bohemian Brothers first printed the *Cancionales* at Prague and at Cracow, in 1558.

⁴ This is not the place to speak of the interesting polyphonic school of music which flourished in Poland during the late 15th and 16th centuries, and of the work done by the so-called College of Roratists at Cracow. This school was represented by such composers as Felzyń, Leopolda, Szamotulski, Szadek, etc., all of whom were clearly under Flemish influence.

W Złobie leży.

2.

1. W złobie leży Ktoz po bieży Ko-len-do wac ma le mu.

2. Je-su so-wi Chrys-tu so-wi Dzis nam na-rod-zo rem-u.

Ras-tusz ko-wie pray-by-waj-cie, Je mu welzie cznie

The Poles have ever loved their simple, dignified hymns, and are so familiar with them that they may be truly called their national music.¹

Unlike the Russian and other Slavonic races the Poles are singularly exempt from Asiatic influences. At an early date they accepted the Roman Catholic faith; and while adhering to the Slav language, they adopted the characters of the Latin alphabet. The Poles are excitable and more finely susceptible to romance than the Russians, and their music is full of fire and passion. Their songs are somewhat waiting in melodic invention, though this deficiency is hidden by the wonderful skill with which they are varied and embellished; and they are marked by a poetic melancholy which makes them attractive. In colouring they are instrumental rather than vocal, as revealed in their difficult intervals:

3.

Ej ej ala-xy dow-ka ej ej wodle

It is rather to their characteristic and striking rhythms, free, varied and elastic and yet contained in dance forms, such as the *polonez*, *krakowiak*, and especially the *mazur* or *mazurek*, that they owe their rare beauty and brilliance. The *mazurek* (see MAZURKA) is usually a melancholy yet quick and strongly accented dance-song in 3-4 time; the *tempo* is irregular and closely follows the words. These may treat of peasant occupations—hay-making, harvest, vintage, or of love, sorrow, parting, or meeting. Some of the oldest *mazurs*, *polonezes* (see POLONAISE), and more especially the hymns, take their name from a battle or historic event recounted in the text. The *krakowiak* (see CRACOVIANNE) is described by C. Miaskowski in a book of poems published in 1632, proving that this lively dance-song in duple time has long been popular in the country. And to the same date and genre belong the *gregorianki*—songs which the market-women of Cracow sing on the festival of their patron-saint.

In scientific and ecclesiastical composers

Poland excelled for many centuries, but in the 17th century these gave place to Italian musicians, who reigned supreme at court. The first efforts to counteract the Italian influence were made by KAMINSKY, J. STEFANI and J. ELSNER in the second half of the 18th century. These founders of Polish national opera, by incorporating a large number of their country's songs into their works, won immense popularity. Elsner also wrote many volumes of songs, besides two treatises on the rhythm and prosody of the Polish language and its suitability for singing.

Rather earlier in the same century the charming poems of François Karpinski were set to music—either to original or adapted tunes, and, sung by rich and poor alike, belonged in their turn to the national song-group, such for instance, as 'Yuz miesionę zeszell' ('Déjà la lune se lève'), which is still heard. In 1816 the poet Niemcewicz published his great work, *Spiewy historyczne z muzyka i rycinami* (Historical Songs with Music), and invited the best-known musicians (men and women) of the day to compose or arrange melodies for it. This work, which included some of the oldest hymns (amongst them the celebrated 'Boga Rodzica'), war-songs and legends, stimulated the patriotism of the Polish nation, and is cherished by every class.

In most of the songs belonging to the early part of the last century the national characteristics are to be found; and especially is this the case with those of Ig. F. Dobrzynski, E. Jenicke, W. Kazynski, Ig. Komorowski, M. Madeyski, J. Nowakowski, A. Sowinski, C. J. Wielhorski, K. Wysogki and A. Zarzycki. But while these composers are hardly known beyond their native country, CHOPIN and MONIUSZKO attained a world-wide reputation. Though neither were wholly Poles by birth, they closely identified themselves with the Polish national spirit. Both drew from the beautiful Lithuanian² folk-music, and especially from the *dainos*,³ which, monotonous as they are, yet possess a peculiar charm.⁴ Moniuszko borrowed many traditional tunes from other Slavonic provinces, but all his songs are deservedly loved and sung throughout Poland, Galicia and Lithuania. Chopin's seventeen songs, op. 74, were written at different periods of his life, and vary widely in character. The words of most are by his friend S. Witwicki, others are by A. Mickiewicz, Zaleski and Krasiński. Some of the songs may be traced to traditional sources, so far as the melody goes,⁵ but Chopin's exquisitely refined harmony raises them to a high artistic

² The Lithuanians are said to be of Sanscrit origin, and their language differs widely from that of other Slavonic nations.

³ A term for secular songs in contradistinction to *ge'sme*, sacred songs.

⁴ L. D. Rhesa collected a large quantity of old Lithuanian songs, and published them at Berlin in 1826, with remarks on their metre and rhythm.

⁵ Karasowski states that many songs sung by the people in Poland are attributed to Chopin, and chief among them one called

'The third of May,' *Fr. Chopin*, p. 162.

¹ Two hymns to the Virgin and a Resurrection hymn are especially celebrated, and these were printed by the Abbé Mioduszewski in his collections of sacred songs at Cracow in 1839. For further information on these historic hymns, see E. Oloft, *Polnische Liedergeschichte*, 1744.

value. Three of the most beautiful are the 'Lithuanian Song' (written in 1831), the tender and sad 'Melodya' (1847), and the strange 'Dwojaki koniec' (Two corpses), with the simple Choral-like air. But those in the mazurka form, such as 'Zyczenie' ('Maiden's Desire'), 1829; 'Moja Pieszczotka' ('My Joys'), and 'Pierścień' ('The Ring'), 1844, are more widely known and sung.

Ig. PADEREWSKI resembles Chopin in one respect; he is national without being a slave to it, and yet on hearing his songs one feels that no one but a Pole could have written them. In some an undercurrent of sadness prevails, veiled by a proud reserve, as for instance in op. 7. Others are brilliant and effective, and the accompaniments always developed and interesting. Other modern song-writers of Poland are SZYMANOWSKI, SZOPSKI, FITELBERG and RÓŻYCKI (*q.v.*).

CZECHOSLOVAKIA (BOHEMIA)

When Christianity was first introduced into Bohemia, the influence of the Church was strenuously exerted to suppress the songs of the people; but the effort was made in vain, and the nation continued to sing its popular songs. The *Koledy* (Christmas songs), which are still in use, are generally acknowledged to be of pagan origin. As in other countries, the early Christian Church allowed the congregation to join in the Kyrie Eleison, and the oldest Bohemian hymn is merely a translation and development of this 'Křeš.' Tradition ascribes it to St. Adalbert¹; it was really a prayer for peace and mercy, and was sung both in churches and on the battlefield as the national song. Another celebrated hymn, which holds the same place, was dedicated in the 13th century to St. Wencelas, the patron saint of Bohemia.² These national hymns and the so-called

Rorate,³ are a compound of liturgical melodies and secular folk-songs. They are peculiar to Bohemia, and were allowed to be sung in the vernacular,⁴ and thus belonged to the people not less than the Church. Then later, during the Hussite movement, a like popular spirit reasserted itself in the Church. The Hussites and the Bohemian Brothers chose many secular melodies for their hymns, and thus again the hymns passed into genuine folk-songs.⁵ One of the earliest and most famous of examples belonging to the first half of the 15th century is the Hussite Battle-Song, of which the first line runs thus:

As samples of the secular music of the 15th and 16th centuries the folk-songs preserved in the *Cancionales* are of great value. The Hussite songs are for the most part of a grave and stern character; while those of the Bohemian or Moravian Brothers have a more tender and sensuous cast. It should be observed that the Bohemians have long been called Czechs, and that name has been adopted for the national language and music. But in their origin the Czechs were only one of the many Slavonic tribes which constitute the nationality of Bohemia and Moravia. There are some differences between the Bohemian and Moravian songs. In the former there is a predominance of songs in the major scale, while those which seem to be in the minor scale more properly belong to the ecclesiastical modes. In Moravia the balance is equal; the tunes are of a bold decisive character, with a strongly marked rhythm. In this country also the songs of each district are distinct,⁶ and hence flows a greater wealth and variety of song. In Bohemia, on the other hand, which is homogeneous, all parts being alike, a fuller unity exists in the songs. They are more tuneful and tender, their rhythm is simpler and the form is more regular and developed owing to the influence which German music has exercised in Bohemia.⁶ Common to both and characteristic of all Bohemian songs is a vein of natural, unaffected humour, and a close connexion between the verbal and musical accents. The tunes rarely begin on the weak beat of the bar, just as in the speaking language the accent is always on

¹ The *Rorate* are joyful Advent hymns, and some have been preserved in a beautiful *Cancionale* of the 14th century at Prague.

² To John Hus (Huss) only one sacred song can with authority be attributed. 'Stála maska žalostiva,' which contains three strophes of equal length, and a melisma of three notes to a syllable, and is nearly diatonic.

³ The Slovaks and Slavonic Czechs are the principal inhabitants of Moravia.

⁴ It is interesting to note the difference between the two Slavonic countries. The song may belong to both of them, but with distinct variants, though more perhaps in the words than in the music. The love of nature is a strongly marked characteristic in the Bohemian folk-songs. For instance most of their songs refer to a flower, or a tree, or a bird, or a stream, or a lake, whether it be employed in a literal or metaphorical sense.

¹ It is given in facsimile in Hostinský's article on Bohemian Music in *Die öst.-ung. Monarchie*.

² This hymn was composed by Arnest, Archbishop of Prague, and is given in Hostinský's article referred to above.

the first syllable. The form is sometimes in three-bar phrases, which in the longer songs develops into four bars in the middle, returning again to the three-bar phrase for the close:

The harmony is always simple, and except in the gipsy songs, the western scales universally prevail. Bohemians have an innate passion for dancing, which imparts marked and exhilarating rhythms to their dance songs. They are generally sung in chorus, and the influence of their national instrument, the 'Dudy,' or bagpipe, is often apparent.

Their many and varied dances (such as the *beseda*, *dudák*, *furiant*, *hulan*, *kozak*, *polka*, *sedlák*, *trinočka*, etc.) take their names from the occasions on which they have been danced, or even more frequently from the songs with which they are accompanied. There is a close association between the folk-songs and the folk-dances of Bohemia. The greater part of the songs met with in modern collections are of no older date than the 18th century, but there are several exceptions, such as the Hussite Battle-Song, or the tune of 'Proč Kalino,' which was constantly sung in the 15th and 16th centuries, and 'Sedlák z Prahy,' which was composed in 1609.

In the 17th century there was a widespread cultivation of music in Bohemia; both part-singing and instrumental music were salient features of domestic life. Wenzel Karl Holan (Rovensky) published a large song-book called 'Kaple Kralovská zpěvní.' The harmony is bold and varied, and the accompaniments for lute and violin, organ or wind-instruments, are skilfully composed.

In the 18th century foreign influences were more marked. German, French and Italian musicians crowded the principal towns of Bohemia, while the native musicians, such as BENDA, DUSSEK, REICHA, GYROWETZ (*q.v.*), etc., on the other hand, sought a living abroad, where their compositions were more likely to attract notice and interest. Meanwhile, the true national music of the country was being kept alive chiefly by the village schoolmasters, who acted as organists, choir and bandmasters. Each parish had its own choir, chorus and band; and every child was taught the study of music with as much precision as reading, writing and arithmetic. Naturally, therefore, village music attained to a high level under such conditions.¹

Early in the 19th century attempts were

made by certain Czech composers to restore the lost prestige of their country's music and language. One of the first composers of real Bohemian songs was Ryba, who was followed by Kanka, Doležalek and Křiž. But a more important factor in music was the national opera. The first opera was written by F. Škroup and the poet Chmelensky. Škroup's name is, however, best preserved by his song 'Kde domov můj?'² ('There, where my home is'), now adopted as the national hymn of the Czechs. Between 1823 and 1830 Chmelensky and F. Škroup, together with TOMASCHEK and Th. Křoň published many songs. Among other song-writers there may be cited the names of Zvonař, Procházka, Malat, Shukerský, Vojáček and Smetana's precursor, KŘÍŽKOVSKÝ (*q.v.*). The general characteristics of their songs may be described as a flowing and clear *cantilena*, recalling to mind the traits of Italian song. Their harmony and rhythm are very simple; and their sentiment and humour have the grace of spontaneity.

F. SMETANA reproduced in his own works the true Bohemian spirit, and mostly so in his national operas and symphonic poems. In the latter he has used occasional folk-songs, and one called 'Tabor' is really a splendid polyphonic fantasia on the Hussite battle-song (see SMETANA). Nor are the national songs forgotten in DVOŘÁK's music. In the overture called 'Husitska' he introduces the St. Wenceslas and the Hussite hymns. Dvořák, W. Blodek, Rozkošný, Šebor and Karel Bendl have tried to carry the merry humorous spirit of the Bohemian peasant into their music.

The extraordinary development of Bohemian music during the later half of the 19th century is mainly owing to the enthusiasm of modern Czech composers for their country's melodious folk-songs and merry dances. The reason for this enthusiasm was partly political. The patriotic songs kept alive the aspirations of a misgoverned people. Music played its part in the renaissance of the 19th century. Smetana gave the art the earnestness of a national cult; Dvořák's music is penetrated by fervent racial sentiment. These two composers created a school of Czech music and left disciples to carry on their work. The neighbourhood of Slovakia with its grand scenery and characteristic customs exercised an influence upon Czech artists and musicians comparable with that of Scotland upon our romanticists. Of the many musicians who experienced the lure of Slovakia Vítězslav NOVÁK (*q.v.*) is the best known outside Czechoslovakia.

With the establishment of the republic in 1918, a fresh stimulus was given to social and

¹ Křiž's popular ballad 'Bretislava Jitka' is to be found in most collections. For other well-known songs, such as Křoň's 'Husitská,' Škroup's 'Kde domov můj,' Rosenkrantz's 'Chaloupka,' Dietrich's 'Moravo,' see Fr. Zahorský's 'Českých národních písní.'

² This is the blind fiddler's song which Škroup wrote for J. Týl's musical play *Fidlovačka*, in 1831.

¹ See Burney's *Present State of Music in Germany*, II. 12, 14, 41.

artistic life. Modern tendencies and new impulses made themselves felt in the country. The folk-songs are sung as much as ever. The schools and the Sokols (gymnastic clubs) will not let them be forgotten. Every year brings a crop of new collections and arrangements. But they are no longer regarded as essential creative material. The folk-song school is dying out, and while the veneration of Smetana as seer and patriot has lost nothing of its old fervour, he is no longer, musically, the ideal model of the younger generation of composers. JANÁČEK (*q.v.*) is the chief representative of the folk idea in music, but in technique and conception he stands at the opposite pole to Smetana. He is, however, an enthusiastic connoisseur and collector, and to him we are indebted for the list of collections here given.

HUNGARY

The songs of Hungary comprise both those of the Slovaks and the Magyars, but the music of the Slovaks, who now form a part of the Czechoslovak Republic, is of Slavonic origin and has been noticed under Czechoslovakia. The music of the Magyars,¹ which is generally accepted as the national music, is of Oriental

origin. It should be observed that the Hungarian language has nothing in common with the Indo-Germanic. Together with the Finnish and Turkish (and possibly Basque) languages, it stands isolated in Europe, and belongs to the Turanian or Ural-Altaic family.

Gipsy music also plays an important part in Hungary (see *MAGYAR MUSIC*). Although the same melodic intervals and rhythmic peculiarities occur in Tsigane music all over the world, it was in Hungary, where an affinity of scale existed, that gipsy music reached its highest point. Among the Magyar gipsies—*i.e.* those gipsies who live among the Magyars and can speak their language—the songs may have gipsy words, but the actual tune and rhythm are Magyar. Moreover, the gipsies rarely sing and nearly always play the songs of other nations, imparting their own fire, impetuosity and embellishments to the music of their adoption.² It is often difficult, when the gipsies play the *csárdás*, *verbunkos*, *hallgatós*, or *palatos* and other dances, to recognise the original folk-song on which they are based.

As in other countries, so in Magyar-land, the introduction of Christianity was followed by a burst of hymn-poetry. But so strong was the national feeling that the hymns were sung even in the churches in the vernacular instead of Latin; also it seems that the ecclesiastical tonal system never took the same hold of the sacred music as it did elsewhere. A few of these venerable hymns are still sung. Such, for instance, is one sung to the Virgin, by Andreas Vásárheli (printed at Nuremberg, 1484) and another to King Stephen, the patron saint of Hungary. Again, the influence of the Reformation was deeply felt both in music and poetry; and there arose among the Protestants a literature of hymn-music, such as had already been stirred among the Hungarian Roman Catholics. In 1560 the Roman Catholic Church forbade, under severe penalties, the use in church of any popular Magyar songs, but the old collections of both churches offer proof that the tunes of the secular songs were always freely used, set either to Latin or Hungarian sacred words.

Further evidence of the cultivation of music in the 16th century is supplied by the Hoffgraff collection³ and by the songs of Sebastian Tinódi, both published by G. Matray in 1859. Tinódi, commonly called Sebastian the Lutenist, died about 1559, and was the last survivor of Hungary's wandering minstrels. His 'Cronica,' dedicated to King Ferdinand, contains songs of battles lost and won, of the joys and sorrows of the Magyar people and the vicissitudes of their

¹ The true gipsy songs are never sung by the 'professional' gipsy in public. Those songs are reserved exclusively for themselves in their tented wanderings, and there they are never played but always sung. See Archduke Joseph's article in vol. vi. (*Ungarn*) of *Die österreich.-ungarische Monarchie*, 1902.

² The collection contains nineteen songs, chiefly Biblical narrative songs, by K. Bajnai, M. Szártyai, M. Tarjai, A. Farkas and others.

³ The origin of their language can hardly be traced with certainty. Hungarian philologists are divided; the 'Orientalists' assert its affinity with the Turco-Tartaric languages, while the 'Finnists' contend that it belongs to the Ugric branch of the Finnish group. That some likeness exists between the Magyar and Finnish language and song has long been recognised.

destiny. Such songs being truly national in their spirit soon passed into folk-songs, and are sung at this day.¹ It should also be noticed that dramatic representations interspersed with songs were introduced by these wandering minstrels, harpists and lutenists, and secured a great popularity.

Neither in the 17th nor 18th century did the development of music keep pace with that of poetry, except in sacred lyrics. The difference between the melodies of the Roman Catholic churches on the one hand and of the Protestants on the other is curious and worthy of note. The Roman Catholic melodies were of a florid and ornamented character, with passing notes and chromatic intervals, which may have been due to the instrumental music used in their churches. But the Protestants adhered to severely simple melodies in the style of Goudimel, for a time at least. As the hymns became folk-songs, the strong national rhythm prevailed, and changed their character. Thus:

1.

(a) GOUDIMEL. *Psalm xvi.*

(b) FOLK-SONG.

The most remarkable feature, both of the poetry and the music of the Hungarians, is the rhythm. At an early date their lyric poetry shaped itself into sharp and bold strophical sections, and their melodies underwent a corresponding division into distinct phrases and periods. Great diversity of accents, and the unequal length of the lines, impart richness and variety to the musical rhythm. In the music of some nations there is a rhythmical and metrical sameness, but in Hungarian it is far more varied. The prevailing metrical feet are the choriambus: | ~ ~ ~ | and the antispastus: | ~ ~ ~ |. Most tetrapodies are like this: | ~ ~ ~ ~ |. Most tetrapodies are like this: | ~ ~ ~ ~ |, but constantly three or even five and seven-bar rhythms are met with. The correct accentuation and phrasing of Hungarian music is closely interwoven with the language. Every first syllable has an emphasis of its own, whether short, as in Ex. 2, or long, as in Ex. 3, and

2.

Lento.

3.

Far & high the cranes give cry & spread their wings.

¹ For Tinódi's life see Áron Szilády's *Régi Magyar Költők Tára*, a recent work on old Magyar poets.

hence the reason why no song begins with the up-beat.² The constant recurrence of syncopation and the augmented intervals have already been alluded to under *MAGYAR MUSIC*. The scales in which the songs fall are very varied; numerous instances of the Dorian and Phrygian modes occur, nor are the augmented seconds in the minor scale so prevalent as is generally believed. The following example begins with the peculiar 'call' found in many Hungarian songs³:

4.

Long pause.

All Hungarian music has a strongly individual character. Its abrupt transition from deep melancholy to wild merriment, its variations of tempo, its richly applied caesuras, constant \cap on different beats of the bar, its unexpected modulations, and its many peculiarities, both melodic and rhythmic, give to it the charm of distinctive originality. A few bars of this beautiful folk-song⁴ will suffice to indicate the characteristics here named.

5.

Stato.

The time of Hungarian national airs, whether songs or dances, is mostly 2-4. Triple and compound time are rare, excepting 5-4 or 5-8, or 7-4 and 7-8, of which many examples may be found in any collection. The Hungarians are rich in their historic ballads relating to national events. For instance, during the Rakoczy period the celebrated and sturdy Kurutzen songs, or old Crusaders' songs, were revived and widely sung⁵ (see *RAKOCZY MARCH*). The ballads from the Szekler district are very old; they are mostly sad and simple, as may be seen in the example on next page.⁶

Many districts have kept strictly to their own special songs; and have jealously excluded any outside influence or innovation. Such are the above-named Szekler ballads, the oldest and the most beautiful of the national Hungarian songs; or the Pusztén songs, in which

² F. Korbay, *Nationality in Music*. The English words given in Ex. 3 are those of Korbay's setting.

³ Given by Béla Bartók. An examination of any good collection of these folk-songs would prove the truth of the above remarks.

⁴ Called 'Autumn' in J. Kappey's 'Songs of Eastern Europe.'

⁵ Julius Káldy published in 1892 about thirty 'Liedweisen aus der Thüköl- und Rakoczi-Zeit,' under the title of 'Kurutzenlieder.'

⁶ This was taken down from the lips of the peasants by Béla Bartók.

the true Magyar peasant life is reflected, and the Betyar songs. The different classes of

songs fall into clearly distinct sets, such as love and wedding songs, drinking, soldiers', peasants', funeral and satirical songs, all of which Jokai has described in an interesting manner.¹

The first national opera ('Béla's Flight') was written in 1823 by Ruzsicska, and though a slight work it contained some songs which immediately became popular. Heinisch and Bartay followed, but the first unmistakably successful opera was Franz Erkel's 'Maria Bathori,' given in 1840, with words by the famous Benjamin Egressy; and Erkel may with justice be designated as the creator of the Hungarian national opera. Erkel was also a prolific composer of songs, some of which were embodied in his operas; and he was the author of the Hungarian national hymn. Other successful writers of opera were F. and K. Doppler, Reyer, K. Huber, Szerdahelyi, A. Erkel, G. Császár, and most of these composers freely used their country's folk-songs. Moreover, there is a specifically Hungarian form of drama called the folk-play (*Volkschauspiel*), the matter for which is taken from the domestic life of the people, and its music consists entirely of folk-songs and folk-dances. E. Szigligetti was the originator of this form, and J. Szerdahelyi, Ig. Bognár, Jul. Káldy, Jul. Erkel, A. Nikolits and others contributed to establish it. These folk-plays have at least served to rescue many beautiful melodies from oblivion.

Among the song-writers of the 19th century who adhered to the national school, the best-known names are Michael Mosonyi² and his pupils, the two Erkels and E. Mihálovich. The Magyar songs of this last-mentioned composer are more especially beautiful and poetical. Béla M. Vágvolgyi is also worthy of notice on account of the originality and popularity of his songs entitled 'Szerelmi dalok'; and not less worthy of notice is his valuable collection of national airs under the title of 'Népdalgyöngyök.' Other names may be cited, such as E. Székely, Cornel, L. Zimay, K. Huber, Abrányi senior (his ballads are essentially Hungarian), E. Bartay, E. Moór, S. Bartalus and V. Langer, whose song-cycle 'Ögyek's songs' is especially noteworthy. Benjamin Egressy likewise main-

tained a great popularity among the peasants and burghers during the first half of the 19th century. His songs may be found in every national collection, together with those of E. Szentirmay, Limbay, Simonffy, Erkel, Horváth, Füredi, Janko, Bolla, Zagonyi, etc.

F. Korbay's songs, either original or arranged, are well known in England. In the two volumes entitled 'Hungarian Songs,' and the volume of 'Twelve Magyar Songs,' Korbay has taken some of the most beautiful songs of his country.³

The greatest song-writer of Hungarian birth is Franz LISZT (*q.v.*); although considering the fact that the larger number of his songs have German texts they would be more accurately classed as belonging to the German school. Moreover, the national elements—the Magyar rhythms and melodies, and the gipsy ornaments which abound in his instrumental music—are, with two exceptions—'Farewell' and the 'Three Gipsies'—absent from his vocal music.⁴

Among Hungarian song-writers of the present day, Emil Abrányi, Pista Dankó, Béla Bartók and Ernő Lanyi stand on a high level. Many, such as Erdélyi, Bartalus, Káldy, Bognár, Bartók, Kodály and others, have devoted their time to exploring, collecting, arranging and publishing the old and modern folk-music of their country, greatly assisted by the Kisfaludy Society, which was formed for the express purpose. The Raaber collection, which is still appearing, must also be named.

FINLAND

Finland (Finnish *Suomi*) is 'the land of a thousand lakes,' vast stretches of moors, deep silent woods and long dark winters. These elements and scenery are reflected in the gloomy, mystical, fantastic yet monotonous poetry and music of the in-dwellers. No country is more poetic than Finland, as the *Kalevala* proves. This glorious national epic of nearly 23,000 verses has been transmitted from generation to generation from long past ages. The Finns also possess a very large quantity of lyric songs and ballads; and to Elias Lönnrot (*d.* 1884) the credit is due for having given the nation these two treasures in a collected form: the national epics which form the *Kalevala* and the collection of lyrics which are entitled the *Kanteletar*.

The Finnish language, a branch of the Finnish-Ugric stem, is peculiarly melodious and full of open vowels. The verse metre is simple, and consists mostly of trochees, four times repeated—the last foot being lengthened in order to mark the close of the line:

hūwā | kēllō | kāuwās | kūllūū

This is the usual explanation of the five-beat rhythm in the music, which is the commonest in the old Finnish songs or *runos*,¹

1.

Kāwy kasky tai-wa has-ta, Kāwy kasky tai-wa has-ta,
Kaiken luonden Hal-di al-da, Kaiken luonden Haldi al-da.²

2. RUNO.

Jos mun tut-tu-ni tulisi ja-tu il - si,
Ar-ma - ha-ni as-te - lei-si, as - te - lei-si

and it is clear that in aiming to make these melodies agree with their poetry the irregular and unsymmetrical 5- or 7-time did not appear to the Finns either forced or unnatural.

As in all other national music, the musical instruments are closely connected with the melodies of the country. In Finland the oldest and most popular instrument is the *kantele*, a kind of lyre or harp with five copper strings tuned *g, a, b \flat , c, d*, on which five notes a large mass of the old *runo* melodies are formed (see above example). These melancholy and monotonous *runolaulua*, characterised by con-

stant repetition, are usually accompanied by the *kantele*. Mention is made in the *Kalevala* of this instrument being used to accompany the songs; also of the 'sighing verses' which in the *runo* songs are a refrain of actual realistic sobbing sighs. Dance tunes also adhere to the *kantele* intervals, and at the same time to the song-rhythms, as:

3.

Some writers,³ however, deny that this instrument had so great an influence on the old Finnish tunes, and contend that, as vocal music is older than instrumental, it is more probable that the melodies were based on the pentatonic scale. A further proof of this theory is that the Finnish-Ugric race is of Asiatic origin.

The *Kanteletar* is a large collection of lyrics and ballads. These songs reflect the restrained melancholy of the national character; they are full of deep feeling and tenderness, and absolutely natural and spontaneous. A few of these lyric songs are to be found in 5-time, though this time is chiefly confined to the old sacred folk-songs, and more especially to the ancient *runo* melodies. In common with other folk-songs of Western Europe, some of the Finnish melodies have their basis in the ecclesiastical modes; but there are traces of an older and as yet unfathomed and unexplained tonal influence which gives a peculiar interest to the music of this country. Those which come from the southern part of Finland, where nature is less severe, possess a certain idyllic cheerfulness, and many which are sung along the coast are undoubtedly of Scandinavian origin. These melodies range over a wider compass, the rhythm is more varied, and they are usually in common or triple time and more often than not in our modern tonality⁴:

4.

Tuuti las-ta Tuonelahän, Alla nurmen nukkuma - han
Tuonen lasten lau-la-tel-la manan nei-to-je-n pi-del-lä.

The herdsman's songs (*Paimen loiottamus*), as in Scandinavia, are numerous. They are closely akin to the notes of the herdsman's pipe, and of no definite form in tune or words.

Between the 12th and 14th centuries Sweden took possession of and christianised Finland, but it was only in towns and at court that the Swedish language was used. Finland has always been an apple of discord between Sweden and Russia, and the perpetual wars

¹ *Runo* or *runolaulus* means 'air' or 'ballad,' and has nothing to do with the Anglo-Saxon *runes* or runic writing-stones.

² Ilmarinen Krohn, in an article entitled *De la mesure à cinq temps dans la musique populaire finnoise*, *Sammelbände of the Int. Mus. Ges. ii. 1. 1900*, considers that the above example (which is a type of the *Kalevala* melodies) is wrongly noted, and suggests two alternative metrical schemes.

³ See Engel, *Introduction to the Study of National Music*, p. 59 et seq.

⁴ For some of the most beautiful, see G. Hägg's collection, 'Sorelmatat Soimut Suomesta.'

hindered this country's artistic development. Finally, from 1809 onwards, when it was conquered by Russia, strenuous efforts towards its complete Russification never ceased. Russia never succeeded, however, in taking away from Finland her own peculiar character and culture.

The modern history of music in Finland begins early in the 19th century, when F. Pacius and B. Crusell, both Germans by birth, settled there. By using Finnish folk-songs in their works, and taking the words of Finnish poets, such as Runeberg, Qvanten, Topelius, etc., for their national songs and hymns, they awoke the spirit of patriotism in Finland, and hence have been justly called the fathers of Finnish music. PACIUS (*q.v.*), who died at a great age in 1891, wrote many fresh and effective songs, but his name will live for having given Finland her national hymns: 'Our Country' ('Vårt Land') and 'Finland's Song' ('Suomen laulu'), which every Finn knows and sings from his childhood. (See Ex. 5.)

His son-in-law, Karl Kollan, wrote also patriotic songs in the peculiar march-like rhythm which is popular in Finland. Crusell was a prolific and favourite composer, but his melodies are commonplace. K. Greve, L. Bergström, M. Wegelius, Ph. von Schantz, G. Wasenius, F. Ehrstrom, K. Flodin, S. Linsén, H. Borenhius, R. Faltin and a younger generation which includes O. Merikanto,

5.

F. PACIUS.

Hear, the glorious song is ring - ing Thro' the
ancient halls of Wal - no: It is Suomi's
song! It is Suo-mi's song! etc.

O. Katilainen, P. Hannikainen and S. Palmgren all belong, more or less, to the same school of song-writers. Whilst introducing many of the old Finnish folk-songs into their works and choosing the words of Finnish poets for their songs, the music practically belongs to the German Mendelssohn-Spohr period, and cannot in any sense be called racial.

The true national period of Finnish music begins with R. KAJANUS. Imbued with the classic-romantic traditions, yet heart and soul a Finn, Kajanus drew his inspirations from the *Kalevala*, and did much to originate and stimulate interest in his country's music. But the actual representative of Finnish music is JEAN SIBELIUS (*q.v.*) His songs, whilst original, dramatic and powerful, are the true counterpart of the Finnish folk-song. Essentially

modern in feeling, yet Sibelius uses frequently the old, simple scale, limited harmony and the curious uneven rhythm of the folk-songs. One of his most beautiful songs, with a modal melody, is 'Men min Fogel märks dock icke'; 'Svarta Rosar' ('Black Roses') is effective; and 'Atinares Sång,' perhaps the best known, is a fine war-song in march-rhythm. If Sibelius be the lyric and dramatic representative of Finnish music, A. JÄNEFELT (*q.v.*) may be called the epic. He has written many songs, but it is the peculiarly national ballad-like feeling in his orchestral works which arrests attention. Mention must also be made of Ilmari Krohn and E. Melartin (*b. 1875*), whose songs are of distinct merit.

SCANDINAVIA

To this group belong Sweden, Norway, Denmark, parts of Finland, Iceland and the adjacent islands. There is a great affinity between the Scandinavian languages. At the present time Danish is the language of the educated class in Norway, although it has a harder pronunciation.² And in an article written early in the last century, entitled *Alte Volksmelodien des Nordens*,³ it was pointed out that the Swedish songs only differed from the Danish in dialect and not in language. Danish is also as much spoken as Norwegian in the Faroë Islands,⁴ where also many Icelandic and Danish songs are heard.

The poetry of Scandinavia is peculiarly rich in ballads, legends and tales of ancient and mediæval warriors on sea or land—the heroic-epic element being abundant, while the lyric element plays little part except in the refrains

¹ *Suomalaisen Kirjallisuuden Seura*. Dr. Ilmari Krohn says that this publication, which is still in progress, will, when completed, be the fullest and most systematic collection.

to the ballads. The Scandinavians have always been a music-loving nation, but not until comparatively recent times have systematic collections of their folk-music been made.¹ Collectors have found great difficulty in taking down the music of the *Kämpvisor*,² owing to the free declamatory way in which they were sung. The formal melody occurs only in the refrains, or *Omkvæde*, of the *Kämpvisor*. The *Omkvæd*³ (Danish *Omkvæd*), which is undoubtedly of very ancient origin, forms an important part of northern songs.⁴ It may be a line at the end of each verse, used to strengthen the meaning of the poem, or a line interpolated in the middle of the verse corresponding with its contents; or it may contain satirical or contemptuous remarks sung by a chorus; or it may only concern the reciter, applauding and encouraging him.⁵ Musically the *Omkvæd* was the most important part of the song and remained always intact and unvaried, whereas the actual song was often improvised or changed according to the solo-singer's desire. In the Faroë Islands, for instance, the old ballads are still sung to the mediæval dances, and collectors often find variants in the songs themselves, whilst the refrains are identical in every part of the islands. The *Omkvæd* naturally influences both the form and harmony of the songs. It necessitates the extension or repetition of a musical phrase, and sometimes a change of time and accent, which imparts a great freedom of form to the Scandinavian songs. Again, if the song be in the minor, the *Omkvæd* would be in the major, or *vice versa*; also if the song be sung as a solo, or in unison, the *Omkvæd* is most frequently sung in parts.

1. Och Jungfrun.

Och, jungfrun hon skule sig åt ot-te sän-gen gå;
Oh! the maiden she hurries to even-song;

OMKVÄD.

Tiden görs mig lång. SA gick hon den vägen åt
Time is long. So she went the way by

högä berget låg; Men jag vet att sor-gen är tung.
the high hill; But I wot that sorrow is heavy.

¹ T. Norblad, in his *History of Swedish Music*, speaks of certain isolated collections, such as 'Petri Plac Cantiones,' dated 1682, which contains folk-songs written in parts to sacred words. He calls attention especially to the melodious 'School and Spring Songs.'

² That is, the heroic epic folk-poetry or ballads of the Middle Ages. The wandering players called *Leikarar* (or in modern Danish *Leger*) were the professional preservers or 'spreaders' of Scandinavian music at that period, and are mentioned in the old chronicles as honoured guests of the northern kings and nobles.

³ *Omk* (German *um*)—round, about; *kvæd*—song, singing, 'quoth.'

⁴ Jamieson, in his *Popular Ballads and Songs*, Edinburgh, 1806, remarks: 'In our ancient songs equally remarkable and incomprehensible *Omkvæde* occur.'

⁵ Geijer contends in his *Svenska Folk-visor*, p. 226, that the *Omkvæde* had no other significance than that the extemporiser of the song or the listener should use them to gain time—the one to produce his own thoughts and the other to remember what he had just heard.

These refrains are universal in Scandinavian songs, and occur as often in other forms as in the *Kämpvisor*.

It is a well-known fact (and has been briefly alluded to in several sections of this article) that some of the most famous folk-songs of different countries are founded on the same subject, whether it be a legendary or historical event, or an incident of ordinary life. The accessories of course vary and impart a local colouring to each version of the song, but the central theme is in all the same. In like manner the same tunes are the property of different countries.⁶ Their identity may not, perhaps, be detected at first, beneath the disguises in which it is enveloped by national varieties of scale and rhythm and harmony; but it is certain that closer examination would establish many relationships hitherto unsuspected. An especially strong affinity exists between the English, Scottish, Welsh, German and Scandinavian folk-poetry. This interesting subject, which is well worth separate study, can only be dwelt on shortly, and a few examples given. Geijer in his 'Svenska Folk-visor' quotes three lines of a Norwegian folk-song, also heard in Wermland and Småland—

Månan skinar (the moon shines),
Dödmän rider (dead men ride),
Är du inte räddar än, Bolla?
(Are you not afraid thereof, Bolla?)

which correspond to the German Lenore ballad⁷

Der Mond scheint so helle,
Die Totten reiten schnelle,
Feins Liebchen! graut Dir nicht?

Geijer also gives the Swedish version of the legend of the Swimmer,⁸ the classical story of Hero and Leander, which has a local habitation in Holland, Germany ('Ach Elslein'), Russia, etc. 'The Jolly Beggar' of Scotland is identical with the 'Bettlerlied' still sung in many parts of Germany and Sweden.⁹ The 'Edward' ballad as given in Percy's *Reliques* is the well-known Swedish 'Sven i Rosengård,' the Danish 'Svend i Rosengård,' and the Finnish 'Weli-surmaaja.'¹⁰

Hvar har du va-rit så lång-ge, Du Sven i ro-sen-
Where have ye been so long, Swain in the rose-

-gård? Jag har va-rit i stall-ét, Kär-mo-der
-garden? I have been in the stable. Dear mother

Welisurmaäja.

The tunes of the three last-named countries appear to have a common origin, but the tune of the 'Edward' ballad cannot with certainty be traced. Still, as Engel points out, many of our old English tunes bear a strong resemblance to the Scandinavian, both in character and construction; and the remarkable affinity, especially between the Welsh and Danish songs, has been noticed by Dr. Crotch and others.¹

But although the Scandinavian nations may have many songs in common, it is evident, on comparing as a whole the collections of the different countries, that there is a great difference in their general character.² The Swedish folk-songs are the most beautiful and poetical, and though tinged with melancholy they are not gloomy and tragic like the Norwegian, nor monotonous and regular like the Danish. The latter, however, possess a peculiarly idyllic and pastoral beauty of their own; they recall the upland meadows, fertile plains and wooded valleys of the country. The 4- or 8-bar rhythm is usually clearly defined, independently of the refrain³:

¹ Engel says, "One of the most popular of the Welsh tunes, "Ar hyd y nôd," is also current in Denmark, especially among the peasantry in Jutland. It may be worth noticing that Jutland is generally believed to have been inhabited in ancient times by the same Celtic race which we find in Wales. But whether the tune originated in Denmark or in Wales is a question which will probably never be solved." (*Introduction to the Study of National Music*, p. 360). In the introduction to his *Ballad Book*, Allingham calls attention to the similarity between many Scotch ballads, such as the 'Douglas Tragedy,' 'Mary Colvin,' 'Clerk Saunders,' and others, and those contained in the Swedish Folk-song collection by Afzelius and Arvidsson. See also Motherwell's *Minstrelsy, Ancient and Modern*, Glasgow, 1827.

² Berggreen, the great Danish collector of folk-songs, draws attention to the close connexion between the word-accent and the melodic outline of the three nations' songs.

³ This is from the old song-cycle, 'King Dietrich Bern,' and is one of the few early northern songs preserved in writing. As here given it was noted down in 1675 by J. Lorenz, an organist at Copenhagen.

5.

The northern melodies usually begin with the up-beat, and by preference with the step of the fourth (as 'Och Jungfrun'). They are very frequently in common or 2-4 time and adhere to the simplest modulations. The phrases are not repeated on different steps of the scale as in so many other countries, and this gives the melodies great variety. The 'Vermelandsvisa,' one of the most beautiful folk-songs in the world, exemplifies the above qualities; it begins thus:

6.

Vermelandsvisa.

It may be safely asserted that nine out of every twelve Scandinavian songs are in the minor, or partly so, for many begin in the minor, and end in the major or *vice versa*. Some of the older melodies recall the Church scales, and especially the Mixolydian and Phrygian modes, but these occur most frequently among the Norwegian and Danish songs.⁴ The epic songs which have been collected in Telemarken (in the S.W. of Norway) are evidently of great antiquity, as for instance, the following relating

7.

Slow.

⁴ There are many examples of modal tunes in Kristensen's 'Gydske Folkeviser.'

to Sigurd's fight with the dragon, with its curious rhythm and melancholy original melody.¹ Important sections of the people's songs are those of the foresters and wood-cutters and the herdsmen. The words of these songs are often mere exclamations and contain no formal verses. The herdsman or girl calls the cattle home from the mountain-side, either with the cowhorn or *Lur*, or by singing a melody with the echo formed on that instrument. Another class of songs are those of the sailors and fishermen. Many old ballads relating the brave deeds of the sea-fighting heroes are to be found in the Swedish and Norwegian collections, and many typically nautical songs in the more modern.²

The national dances have greatly influenced the melodies, though the *Syvspring*, *Slängdansar*, *Halling* and many others are not usually accompanied by singing.³ The famous ring or chain-dances, and children's game-songs and certain festival-songs (such as the old May-Day and Epiphany songs) are relics from mediæval times. In the province of Dalecarlia the 3-4 time dance-songs are especially cultivated; one called 'Necken's Polska'⁴ is widely known. The Norwegian *Springer* is its equivalent. Both dances are sung, whilst the drone fifths in the bass show the old national instrument used. The *Hardangerfele* (*fele*=fiddle) belonging to the Norwegian highlands is the most perfect of their instruments, but it is only used for marches and dances. The peasant marks the time by double tapping of the toe and heel uninterruptedly, playing all the while brilliantly. The richest districts in national songs are Telemarken in the S.W. of Norway, the centre of Jutland⁵ and the southern part of the Farø Islands. These islands were ever in close connexion with Iceland, and many songs show their Icelandic origin. Doubtless the Icelandic sagas incited many Scandinavian songs, and the poetry and language of this island have much in common with the rest of Scandinavia; but the music is of such a totally different character that a few words must be devoted to its most salient points.

Iceland has ever been a land of history. With true love and devotion its inhabitants have preserved their old tales, traditions and customs. Their language, which the Nor-

wegians brought with them when they settled there at the close of the 9th century, remains unchanged, as also their strangely mediæval music.

The chief source for studying Icelandic music is the Arnarnagnáan MS. in the University Library at Copenhagen. And if we compare this collection with those of a far later, or even quite recent date, we find the same forms now as then. There has been no development of music in Iceland; it has been stationary. Iceland, indeed, adopted the form prevailing in the Middle Ages, and has clung to it up to the beginning of the 20th century. The music of her secular songs⁶ is of an ecclesiastical character; instrumental music hardly exists; the old scales or modes are retained,⁷ for the wave of modern tonality which swept over Europe in the 17th century never reached Iceland. An even stronger evidence of mediævalism than the modal tonality is afforded by the peculiar form of part-singing in Iceland, called *Tvisöngur*, which closely resembles Hucbald's *Organum*. Examples are to be found in the Arnarnagnáan MS. of the 15th century; and although earlier traces of it are extant in other countries, Iceland alone has retained it for her secular music down to the present day. This is proved by the following example taken from the 'Icelandic Student's Söngbók,' of 1894⁸:

8.

NATIONAL SONG—*Island*.*Lento.*

Given by PASTOR THORSTEINSSON.

Island! far-sæl-dá frón, og hagsæl-dá hrímhvíta móðir!

Tenor (Melody).

Hvar er þín foru-al-dar frægð frels-ið og mann-döð-in best?

Until the last generation the *Tvisöngur* held its own all over Iceland; but now in the 20th century it only exists in certain isolated localities. The increasing development of communication with other countries, coupled with the knowledge of musical notation, the spread of choral societies and the publication of numerous collections of songs and hymns, have all combined to induce the Icelanders to adopt at last the more sophisticated methods of music. 'The *Tvisöngur* is, therefore, fast dying out,

⁶ See especially Olafur Davidson's 'Íslenskar Skemtanir.'

⁷ The Icelanders have an especial love for the Lydian mode with its tritone.

⁸ The parallel fifths do not sound so harsh if the melody is taken by loud full voices, and the second (upper) part by a few singers, very subdued, and the whole song sung very slowly and emphatically.

¹ Thus given by Lindemann. In Telemarken the refrain is often called *Stev*, but the *Stev* consists really of improvised verses of love or satire, sung on certain festive occasions and gatherings, to traditional tunes. See Landstad and Dr. von Ravn in Mendel's *Lexikon*.

² See L. A. Smith's *Music of the Waters*, p. 218.

³ This does not apply to the Farø Islands, where musical instruments are practically unknown. Here the inhabitants are passionately fond of dancing, and, as mentioned above, accompany their dances with singing the old epic and ballads.

⁴ Lindgren in his *Ur Svenska Musikens Häfder*, p. 137, tells us that the Polska is not of national origin, but was introduced from Poland in the 17th century in the Lute-books under the name of *Pologneuse* (polonaise).

⁵ This district was called the 'knitting-district,' because until quite recently the peasants used to meet during the winter evenings in different houses knitting woollen goods, and relating or singing tales, songs, ballads and legends. Their wealth of songs was so great that in many places the same song was not allowed to be sung more than once a year.

and with it the last remains of an interesting episode in musical history.¹

The so-called Scandinavian school of music is of very recent birth; for until the close of the 18th century it was greatly under foreign influence. Thus, during the 16th century, the court-music of Denmark was chiefly in the hands of Flemish musicians, whilst in the 17th, Dowland and many other Englishmen, besides French, German, Polish and Italian composers, visited and settled in Copenhagen and Stockholm. The latter part of the 17th and the first part of the 18th were monopolised by the ballet, and French melodies (especially in Sweden) predominated over all others. A fresh impetus was given to northern music by the operas and *Singspiele* of German composers, such as B. Keiser, J. A. P. Schulz and Kunzen. And in the imitations of these by Weyse, Kuhlau and Hartmann,² Scandinavian folk-songs were first introduced on the stage. The compositions in which the vernacular was first used were the sacred and secular cantatas, oratorios and hymns, both by Danish and German composers, such as Iversen, A. Scheibe and J. E. Hartmann in Denmark, and in Sweden, J. Roman, Per Frigel and J. B. Struve. But the chief impulse towards a national school of music was given by the literature of the country. Towards the end of the 18th century the didactic school of poetry began to give way to a more natural lyrical style; and by the beginning of the 19th (influenced by the romanticism of Germany) a strong intellectual national movement arose in Northern poetry. It was greatly promoted in Denmark by the poet Oehlenschläger, in Norway and Sweden by the patriotic 'Norwegian Society,' and by the founding of the so-called 'Götiska förbundet' (Gothic union). About this time the first collections of national songs appeared. Poets and musicians became interested in the old epics and ballads, with their beautiful melodies and their wealth of new materials both in ideas and form, and hastened to avail themselves of the treasure. Thus within the last hundred years or so a new school of music has arisen, containing in its ranks the distinguished names of LINDBLAD, GADE, KJERULF, GRIEG, SJÖGREN, SINDING, etc.

DENMARK.—In Denmark, the homely, humorous, or idyllic *Singspiele* especially took root, and it would be legitimate to say that the *Kunstlied* originated in the theatre-songs. Some of these melodies by the elder Hartmann, Schulz, Kunzen and Zinck—singing of social pleasures, friendship and wine, or those of a more romantic and sentimental type—are still popular in Denmark, in the Faroë Islands

and far into the north of Norway. It is worthy of notice that the three founders of the Danish school of music, C. E. F. Weyse, F. Kuhlau and J. Hartmann, were Germans by birth, and that a strong tinge of the German element has prevailed through the works of Danish musicians to the present day. J. Hartmann, the founder of the Hartmann family of composers, is the author of one of Denmark's most national songs, 'King Christian stood by the mast.' Weyse is considered the creator of the Danish romance. Full of romantic feeling, and possessing a fluent gift of melody, the songs from his *Singspiele*, his child-like, pious 'Morning and Evening Songs,' and more especially his 'Nine Danish Songs' to words by the national lyrists Oehlenschläger, Ewald, Grundtvig, Heiberg and Winther, are justly popular. Later in life Weyse (d. 1842) devoted himself to collecting and harmonising two volumes of 'Gamle Kæmpeviser-Melodier' (Old Hero-songs). His contemporary, F. Kuhlau, also loved the simple, noble melodies of the *Kæmpeviser*, which he had noted down in his youth. These he used later with success in the romance form, and it is difficult to distinguish them from the genuine folk-songs of this kind. Still Kuhlau never cared for Danish poetry and always preferred to use German words. Contemporary native musicians were less celebrated, and Sørensen, Claus Schall and Niels Schiørring are names now scarcely remembered. But the improvement in literature due to the poets Oehlenschläger, Heiberg, Hertz, Hans C. Andersen and the publications at Copenhagen of the numerous collections of Scandinavian folk-songs, naturally influenced and stimulated the musical feeling and inventive powers of the song-writers. The consequent development of Danish song we owe to J. P. E. Hartmann, Niels Gade and P. Heise. The songs of the latter vary very much in merit, but his fine song-cycles, 'Gudrun's Sorg' and 'Dyvekes Sange' (words by Drachmann), have never received their due appreciation. J. P. E. Hartmann's songs are gloomy and northern in colouring, and in form less perfect than Heise's and Gade's. Among the best are the six to Winther's poem 'Hjortens Flugt,' and the nine entitled 'Salomon and Sulamith,' op. 52. At first Gade, who was steeped in the atmosphere of Schumann and Mendelssohn, wrote only German songs. But by degrees—influenced, doubtless, by his old master, Berggreen (the great folk-song collector)—he became more national in feeling, and joined the ranks of the northern romanticists, writing music to Oehlenschläger's and Heiberg's romances. His influence has been great over all subsequent Scandinavian composers. Gade's lyrics are always expressed in the simplest language, and suffer from a certain poverty of rhythm. He shares with other Danes the preference for the

¹ *Studien über isländische Musik*, by A. Hammerich (*Sammelbände* of the I.M.G. I. iii. 1900), to whom the writer is indebted for the above information.

² Kuhlau's romantic 'Der Erlenhügel' (1828), and later J. P. Hartmann's 'Liden Kirsten' (1846), (the latter consisting almost wholly of folk-songs) are still popular in Denmark.

monotonous, swaying 6-8 time, and he rarely modulates beyond the nearest keys. A group of composers who have treated the song in the same simple and popular way are: H. Rung, Barnekow, A. Winding, J. O. Hornemann, S. Salomon; and Gade's pupils, K. Attrup and L. Schytte. More individual and more developed in the accompaniment are those by Emil C. Hartmann, C. F. Hornemann, A. Hamerik, O. Malling, A. Enna and notably R. Hansen and P. E. Langemüller, whose 'Sulamith' cycle is interesting, and as well known abroad as in Denmark. A new note in Danish music was touched by Carl Nielsen (*b.* 1865). He wrote only a few, but remarkable songs, evincing in his rhythm and modulation a strong originality.

NORWAY.—Although Norway was for a time joined to Sweden and in the past shared the destinies of Denmark, whose language it still retains, it ever remained the most independent branch of the Scandinavian kingdom. The people are intelligent and well educated, and intensely jealous of their national rights. Foreign music and literature never had the same influence in Norway as in Sweden and Denmark, and the *Singspiel* and the opera were never popular. The modern period in poetry and music began with the awakening of national life which received its first impulses in 1772 from the 'Norwegian Society'; from the national poets, Wergeland, (called the Schiller of Norway) Welhaven, Münch, Moë and Jensen; from the folk-tale collector Faye, the hymn-writer Landstad and most of all from the folk-song collectors Bagge and L. M. Lindemann. The latter did valuable work in familiarising the national melodies of his country. He published them as psalms, hymns, songs and dances, and his work was carried on by C. Elling. The first real song-writer of Norway was Halfdan KJERULF (*q.v.*), whose lyrics long suffered from unaccountable neglect. His two books of 'Sänger och Visor' contain songs of real beauty, as for instance, 'Lokkende Toner,' 'Kärlekspredikan,' 'Saknaden,' 'Eremiten,' 'Mit Hjerter og min Lyre' ('My Heart and Lute'), and 'Natten pas Fjorden.' The voice-part and accompaniments are well written and interesting,¹ and there is no straining for effect or originality. Among the song-writers born between the years 1837 and 1847 we find the same inclination to represent the national spirit in their art. But neither Winter-Hjelm, J. Selmer, C. Cappelen, nor even J. S. Svendsen, who wrote two books of highly expressive songs, touched the true note. This was reserved for R. NORDRAAK and Eduard GRIEG (*q.v.*).

An intimate friend of Grieg, a celebrated

pianist, Agathe BACKER-GRÖNDAHL (*q.v.*), has written simple and expressive songs, which are very popular in Norway. Other song-writers, born in the second half of the last century, are: J. Holter, Ole Olsen, C. Sinding, Per Winge and his cousin Per Lasson, C. Elling, J. Halvorsen, Andersen, Alnaes and Sigurd Lie.

SWEDEN.—In the 16th century musical art in Sweden reached a high level. Gustav Vasa was a connoisseur in music, and encouraged composers of the Netherland and Italian Schools to his court. The Thirty Years' War brought Sweden into contact with other European nations, and many Germans flocked thither. Under Charles XII., French music reigned supreme and long held its sway over all native composers. The Düben family (Germans by origin), who settled in Sweden early in the 17th century, and have been called the 'founders of Swedish music,' hardly deserve this name, for though they did much to further and develop music in Sweden they were entirely under foreign influence. Gustav Düben (*d.* 1690) wrote songs of the type of Heinrich Albert in Germany, whilst his brother Anders Düben, who inclined more to French music, wrote only little arias for the court of the French chanson kind. In the 18th century the music of German and Italian composers, such as Fux, Graun and Handel, Scarlatti and Lotti, predominated, but simultaneously the Swedish composers J. H. Roman, Agrell and Zellbell were pursuing the right road towards founding a national school by using the vernacular in their vocal works. The opera, which has always played an important part in Stockholm, remained chiefly French under Dalayrac and Monsigny, though German dramatic influence was exerted by Gluck, Naumann, Haefner, etc. The only dramatic composer of Swedish descent was the popular K. Stenborg, who used his native folk-songs in his operas, and led the way through Dupuy and Randel to Hallström, the real creator of the national opera.

The song of the Gustavian period (*i.e.* the close of the 18th century) answers exactly to that of J. A. Hiller, Schulz, Reichardt and Zelter of Germany, and bore the same homely, popular character, without, however, being in any sense national. The forerunner of the true Swedish song was Olof Åhlström, who published at the beginning of the 19th century a collection of eighteen volumes called 'Skaldestycken Satte i Musik,' containing songs by himself, by Haefner, Stenborg, Palm and others. Many songs in this collection, as well as those by Dupuy, Nordblom, Crusell,² etc., still show the same tendency towards the Berlin School, but the words of Swedish poets

¹ A band of patriotic Norwegians living in Copenhagen, who combined to found a native university in Christiania in 1811, and to recover their native independence in 1814.

² To a certain degree Kjerulf resembles the German song-writer Robert Franz. Both pay the same strict regard to the words and accent, and in both the accompaniments are often treated phonetically. (See for example Kjerulf's op. 23, No. 2.)

³ Crusell would really be considered a Finnish composer, but the interests and destinies of Finland and Sweden have been closely interwoven. This indeed applies to most of the literature and music of the Scandinavian countries, and it is often hard to define to which country the several poets and composers belong.

were used, and attention was thus called at last to Swedish composers. A yet greater service Åhlström did was to edit the songs of that strange original genius C. M. Bellmann, under the title of 'Fredmans Epistlar och Sanger' (1790-95). These are in reality splendidly humorous pictures of Stockholm life skilfully adapted to favourite foreign (chiefly French) and native airs; very few tunes are original, but they remain household words in Sweden to the present day.

Literature and music kept pace during the early 19th century, and both drank from the same national source. It is difficult to say whether poetry or music owes most to the so-called Gothic revival, of which Geijer, Afzelius, Tegner, Arvidsson and Atterbom were the leaders. The first impetus towards the new lyric was given by Afzelius and Geijer in their publication of old Swedish folk-songs in 1814-1816.¹ The melodies in these volumes were revised and harmonised by Haefner and Groenland. A little later Erik Drake published another series, in which Afzelius joined. Arvidsson (a Dane by birth) devoted himself to the same subject, and published, between 1833 and 1837, three volumes of old war, hunting and love songs; Bergström, Hoijer, R. Dybeck and K. Södling following suit.

The earliest composers who breathed the romantic national atmosphere and sang the characteristic melodies of Sweden were Geijer, A. Lindblad, J. A. Josephson, Wennerberg, Berwald, Hallström, Rubenson, L. Norman and A. Södermann. The classic time of the Romanze belongs to the three first named. Geijer's songs are impregnated with the true folk-song spirit, and are powerful and expressive, but Lindblad's won wider fame. These also bear the national stamp; they are pure, natural, unaffected and withal really poetic and graceful compositions. Among the most interesting are those to Atterbom's words, especially 'Trohet'.² And others worthy of mention are 'Saknad,' 'O kom, nij droj,' 'Am Aaren See,' 'Strykningsvisa,' and the nine Heine songs which have more developed and original accompaniments. Lindblad's songs owe their fame and popularity in a great measure to having been sung by Jenny Lind. Josephson surpasses the others in the real lyric; and the melancholy tenderness which pervades his songs is a racial characteristic. Wennerberg's collection of duets, 'Glutarne' (Scenes of student-life in Upsala), were once famous, but though his thoughts show independence, his musical treatment is somewhat amateurish. Norman was a truly idyllic composer, and amongst his songs the beautiful 'Skogs Sanger' and 'Månestrålar' should be better known. With the great ballad composer, A. SÖDERMANN, Swedish romanti-

cism reached its highest point. Among his solo-ballads and songs, such as 'Tannhäuser,' 'Kvarnruinen,' and the 'Black Knight,' we find a great development in the accompaniment. Södermann filled the old forms with new dramatic life, and is therefore considered the great reformer of Swedish song. Less well-known names are those of J. A. Hägg, A. Körling (whose songs 'Weisse Rosen' and 'Abendstimmung,' of the Mendelssohn type, are favourites), A. Myrberg, V. Svedbom, F. Arlberg (also a fine singer), Henneberg, Kjelerander, Byström, Nordquist, A. Bergenson, etc. Emil SJÖGREN holds an important place. Grieg's influence may be traced in his harmonies and Schumann's in his rhythms, but withal he is an independent and interesting composer.

Towards the end of the 19th century a change came over Swedish music. The genius of Berlioz, Liszt and Wagner dominated the talents of the living representatives of Swedish romanticism. Of the later school of song-writers, Vilhelm STENHAMMAR (b. 1871) stands pre-eminent. His father, P. W. Stenhammar, was a prolific composer of ultra-simple religious, old-fashioned songs. V. Stenhammar is equally successful in any form of song he touches, whether it be the ballad, such as his fine setting of 'Florez and Blanchiflor,' or a little folk-song like 'Irmelin Rose,' or the true lyric, such as the splendid song 'Fylgia.' In W. Peterson-Berger's Swedish songs, 'Svensk Lyrik' and the cycle entitled 'Ut Fridolin's Lustgård,' the tender, melancholy national tone is reflected; whereas in his German songs, such as the 'Gesänge nach Nietzsche,' he is more directly under Wagner's spell. Hugo Alfvén, Tor Aulin and E. Åkerberg belong also, with others, to this group.

THE NETHERLANDS

Under this comprehensive term are included the countries which extend from the North Sea to the Somme in France, comprising Holland, Flanders, Belgium, the Walloon country and the chief part of the old province of Artois. The population is partly Teutonic, represented by the Flemings; partly of Romance origin, represented by the Walloons. Two languages are spoken—Dutch and French, for Flemish is nearly akin to Dutch and the Romance dialect spoken by the Walloons is closely allied to French, which is the official language of Belgium. Still, until the 19th century when Holland and Belgium were formed into independent kingdoms, the Netherlands was practically one country. In dealing with the folk-songs, however, a distinction must be made, as each division of the country possessed its own songs. Yet even so the subject is confusing, for while the official designation of 'Netherlands' is retained by what we now call Holland, the 'Spanish Netherlands,' which in the 16th and early 17th centuries played so important a part in history and gave birth to the finest songs, comprised rather the districts of Flanders and Belgium. Again, the songs of the North of France and Flanders and the Low German and Dutch songs, have so much in common that to write the history of one is to write the history of the other.¹

The *Trouvères* of the 11th and 12th centuries, with their *langue d'oïl*, belonged equally to Northern France and to Belgium, and as they

¹ See Coussemaker's *Chants des Flamands de France*; and Böhm's 'Altdeutsche Liederbuch.'

have already been mentioned under the section FRANCE it is unnecessary to refer to them again here. Further, the Old French and Flemish schools of music were practically identical, and the Gallo-Belgian School, whose most successful period lies between 1360 and 1460, was considered by other nations as French, and the composers indiscriminately called *Galli* (see ante, p. 6). But with the Netherland School proper we are treading on different ground. This school penetrated into every cultured country in Western Europe, formed schools of its own, identified itself with other nationalities and was held in universal esteem until, in the latter part of the 16th century, the Italians became the leading musical nation in Europe. This great school, however, was essentially polyphonic, and with it and its chief representatives (such as Okeghem, Obrecht, Josquin des Prés, Gombert, Orlandus Lassus and others) this article is only indirectly concerned. These prefatory remarks will explain to some extent the complex character of the history of song in the Netherlands.

Among the earliest traces of the *langue d'oïl* is the 'Cantique de S^{te} Eulalie' (without music), preserved in the Valenciennes Library, and belonging to the 9th or early 10th century.² This language of the *Trouvères* was spoken in Northern France and Belgium for some centuries and during the 11th, 12th and 13th numerous songs were composed which, with their melodies, still exist. With regard to the Flemish songs, Fétis says it is more difficult³ to decide with certainty whether they are as old as they are reputed to be. Of these, one famous song, to judge by the character of the poetry, reaches back to the Norman traditions of the 10th century.⁴ It is known by the name of 'Heer Halewijn,' and Willems, who published the song in 1836 with the original text, says it is still heard in Brabant and Flanders.⁵ The many versions of the melody make it impossible to date it with accuracy, but the following (in the Hypomixolydian mode) is considered the oldest and purest:

1. Heer Halewijn.

² Fétis, *Histoire gén. de la mus.* iv. 485.

³ *Ibid.* v. 55 et seq.

⁴ Oscar Felscher, in *Ein Kapitel vergleichender Musikwissenschaft* (Sammelbände I.M.G., I. I. 1899), shows the resemblance between the Halewijn melody and a Brittany ballad, 'Die drei Monniken' (see Villemarqué, p. 185), and the melody of a hymn, 'Sidus solare,' from a Neapolitan MS. of the 11th and 12th centuries, and discusses which is the older.

⁵ F. van Duxse corroborates this by saying that Pol de Mont (poet and folk-loreist) heard the 'Halewijnlied' in 1896 in the environs of Leuven. (See *Het oude Nederlandsche Lied*, I. 13.) In this standard work Duxse practically includes all the songs found in the Netherlands, with the words and tune of each and their variants. The valuable preface explains the verse metre, rhythm, scales and general form, and is indispensable to the student.

Although it is true that the aim of the representative Netherlands School (1425-1625) was polyphonic, it is a mistake to suppose that the work of these learned contrapuntists was the only form of music prevailing in the country at this time. National songs existed contemporaneously with it; and the tunes these great masters used as themes for their masses, motets and polyphonic chansons were practically their own folk-songs. That such historic French and Flemish tunes as 'L'Homme armé,' 'Cents mille écus,' 'Forseulement,' 'Je me demande,' 'Myn Hert,'¹ 'Het daghet,'² were not merely worthy of local recognition is proved by their constant use throughout Europe. The Netherlands masters, however, rarely gave the whole melody even to the leading part, and seldom more than one *couplet* of the words, and hence the fragmentary character of the songs they bequeathed to us. But gradually the spirit of the folk-song began to influence their highest forms of composition, and they realised that in their *chansons*, *villanelles* and *canzonettes*, written in four, five, six, seven, or eight parts, 'mechanical invention must be subservient to idea, and euphony and expression should equally be the objects of the composer.'³ Amongst the works of Dufay, Binchois, Faugues, Busnois, and in Petrucci's 'Canti cento cinquanta,' there are songs which, in regularity of form and simplicity of character, rival the folk-songs. Nor are examples wanting in the minor works of Okeghem, Pierre de la Rue, Josquin des Prés, Gombert, Willaert,⁴ Goudimel, Clemens non Papa, Jannequin,⁵ Arcadelt and Orlandus Lassus, of secular melodies conceived in a strain of freshness, naïveté, humour and brightness, or marked by a power of lyric expression belonging to a much later time.

The picture of an age and its culture is always vividly reflected in its folk-songs; it was therefore the natural result of the intensity of the impulse given to religious life by the 'mystics' that so great a number of sacred songs was created during the 14th century.⁶ The ground had already been prepared by the celebrated ascetics Greert Groote and Johann Ruysbroek, and the numerous sacred *Minne-songs*⁷ were the especial outcome of the mystic movement. About the middle of the 15th century the early *Rederykers*⁸ (who correspond with the German *Meistersinger*)

substituted for the harshly realistic secular songs of the day their own carefully prepared sacred songs.⁹ For these they either altered the words of the secular songs to give them a sacred meaning, or they adapted totally new religious words, retaining the secular tune unchanged.¹⁰ And this practice prevailed in the Netherlands throughout the 16th and 17th centuries. In 1561 Tylman Susato published his 'Souterliedekens,' consisting of portions of the Psalms according to the rhymed Flemish version, set unaltered to the popular song-tunes of the day. This publication was succeeded by Fruytier's 'Ecclesiasticus' (1565) and the various Catholic song-books, such as 'Theodotus,' 'Het Paradijs' (Antwerp, 1621), which similarly contained a mass of secular melodies. Whilst the Church scales were still in use the greater part of the earlier melodies were in the Dorian mode, though the Phrygian and Lydian were also represented.¹¹

Very different in character from the sacred songs of the mystics, of the *rederykers*, of the Catholics, or those which the Reformation produced, were the songs of liberty and patriotism sung a generation later during the Spanish oppression. Amongst other collections the famous song-book of the Gueux¹² ('Geusen-Liedenboeckkens,' 1588) and Adrianus Valerius' 'Gedenck-Clanck' (1621-26)¹³ (see VALERIUS), contain the classics of Dutch musical literature, and are historically of inestimable value. They give us the ballads of 'Egmont and Horn,' the 'Storm of Leyden'; the splendid political songs of satire on the Spanish generals, such as the 'Spotlied op de Bossu,' 'Spotlied op de Alva,' or the patriotic songs such as 'Ein Liedje op den Briel,' or 'De Geuzen bij Antwerpen,' and 'Wilhelmus van Nassouwe'—the Dutch national anthem. (See WILHELMUS VAN NASSOUWE.) These grand old Netherlands songs breathe a spirit of protest against tyranny and of warlike determination tempered with resignation under disaster, which sets them on a distinct plane of their own. In many of the collections only the name of the tune (*stem*) is mentioned to which the song was sung. Such is the case with those in the 'Geusen Liederenboeckkens,' but Valerius has given the actual melodies as well. Many tunes are derived from

¹ Used by Pierre de la Rue in a 4-part chanson. See Ambros, III, 241.

² Used by Clemens non Papa in a 3-part chanson. See Duyse, I, 124.

³ Naumann's *Hist. of Mus.* I, 368.

⁴ In Willaert we clearly see the modern spirit, not only in what he did for harmony but also for his recognition of the value of the solo-voice. In 1536 he arranged some of Verdelot's madrigals for solo-song with accompaniment of lute.

⁵ Woodbridge gives a lovely little song, 'Ce moys de Mal,' by Jannequin, showing the transition between the two styles, where the harmony is in plain chords, but 'the polyphonic element is still present in the melodious flow and independent interest of the separate parts.' *Oxford Hist. of Music*, II, 277.

⁶ See W. Bäumer, *Niederländische geistliche Lieder*, Vierteljahrsschrift, 1888.

⁷ All these songs deal with Christ as the Bridegroom for Whom the loving soul yearns.

⁸ For information on the guilds of poets and musicians in the Netherlands, see Motley's *Rise of the Dutch Republic*, I, 75 et seq.

⁹ For examples from the later *rederyker*, M. van Castelyn's songs (*Diersche Liedekens*), see Duyse, II, 1530 et seq. One of Castelyn's songs, 'Ghepeys, Ghepeys, vol van euvlen,' is included in most collections.

¹⁰ In this manner many secular songs have been preserved intact, instead of only in a fragmentary or mutilated form, such as we have seen the polyphonic writers reduced them to.

¹¹ Bäumer has given examples of these interchangeable sacred and secular songs from two old MSS. collections: one is in the K. K. Fideikommissbibliothek in Vienna, and the other in the Staatsbibliothek in Berlin. The tunes are nearly all to be found in Böhme's 'Alte deutsches Liederbuch,' and frequently occur again in Dutch collections. See also 'Geistliche und weltliche Compertionen des XV. Jahrhunderts,' bearbeitet von Guido Adler und Oswald Koller.

¹² Or 'Gentlemen beggars.' For the origin of the word see Motley's *Rise of the Dutch Republic*, I, 432 et seq.

¹³ Dr. A. Loman has harmonised a selection from the 'Geusen-Liedenboeckkens' and the 'Gedenck-Clanck.' Both, with his interesting prefaces and notes, were published by the Maatschappij tot bevordering der Toonkunst for 1871 and 1872. (See VEREENIGING.)

begin on the up-beat, and as the musical rhythm follows the words very closely¹ frequent changes of time are necessitated, although the actual rhythmical figures present little variety.

The songs are by no means always in regular periods; constantly the first part consists of eight and the second part of five or six bars, or of five and seven bars each as in the 'Spotted.' (See Example 5.) Sometimes only one bar is

5. *Spotted op de Bossu.*²

Ma-xi-mi-lia-nus de Bos-su ben ick een Graef Ge-hee -
 - - ten, ick heb ge-weest sijn ad - mi-rael, de Geu-sen te
 doo - den prin - ci-pael, dit had ick mij ver-me-ten.

added, as if to give emphasis to the last words. Melodic *melismas* are of frequent occurrence, even in strophical songs, and are probably due to the influence of the Church. And yet, paradoxical as it may seem, the songs never lose their classical character of regularity of form.

Belgium being a bilingual country the folk-songs are divided into two classes, Flemish and Walloon.³ The Flemish are more numerous and widespread; indeed they extend north into Holland, where they intermingle with the Dutch. The Walloon songs are more local, though they include all those sung in French or in the Walloon dialect.⁴ Just as the Flemish people show affinity with the German, the Walloons resemble the French. The grace and liveliness of the French chanson, the love the French have for satirical words and strongly marked dance-rhythms,⁵ are qualities exhibited by the Walloons. In the district round Liège a particular genre of satirical song exists, called *la pasqueye*, and amongst the numerous Belgian dance-songs, the 'Cràmignons' of the same district should be especially noticed. Example 6 is a favourite.

The traditional ballads of the old French provinces, Lorraine, Picardy, Auvergne and Provence, survive in the Ardennes. In the Walloon songs the refrains follow much the same lines as other countries; rhyme is by no means universal and is often replaced by mere

assonance; the dialogue form is very common, and consists of innumerable strophes.⁶ Modal

melodies are frequently found amongst the Noëls and other religious songs. The profound sincerity and naïveté of the Noëls must appeal to all, and if a vein of realistic familiarity, attractive to the peasantry, is repellent to the more cultivated taste, none will deny that they possess a touching charm of their own, difficult to convey in words.

It is inevitable that songs handed down century after century should undergo changes, but this is less so in the Netherlands than in most other countries. Conscious of their value, Flemish and Dutch musicians have at all times been assiduous in forming collections of their songs and thus preserving them in their original condition.⁸ This has not been the case with the French and Walloon-speaking inhabitants of the country. They have depended on oral tradition, and hence their songs have suffered considerable deterioration in the course of time. Indifference to the folk-song steadily gained ground among this people, and their preference for debased tunes from the *vaudeville* and *opéra-comique* was fostered by inferior composers, who wrote in accordance with the prevailing taste. Fortunately this evil is now being counteracted by earnest musicians,⁹ who are devoting themselves to the task of rescuing the folk-songs from neglect and issuing exhaustive collections from the various districts. The wealth of songs and their beauty have fully justified their labours.

¹ The (Flemish) lace-makers for instance have their own especial songs with apparently meaningless words, but which represent to them a given number or kind of stitch. Each worker takes up one of these endless verses in turn. See Lootens and Fey's 'Chante pop. flamanda.'

² Terry and Chaumont's collection, from which the above is taken, includes over 200.

³ The efforts of the members of the Maatschappij tot bevordering der Toonkunst and their interesting publications have greatly contributed to this end. H. Rogge, J. P. Land, A. D. Loman, J. Röntgen, F. van Duyse, D. F. Scheuleer, and Enschedé also deserve special recognition in this connexion.

⁴ Among these the names of L. Terry and Chaumont, Lootens and Fey, L. Jours, E. Closson, O. Colson (the director of the Liège review *Wallonia*, which contains much information about the Walloon folk-songs) and the curé J. Bols hold an honoured place.

¹ Following the verse-metre closely is peculiarly characteristic of Dutch folk-songs.

² This song does not appear in the first editions of the Gueux song-book, but the melody is given in Luther's hymn-book of 1624 to words by Speratus, 'Es ist das Heil'; afterwards it was used by the Bohemian Brothers, and by the Lutherans in Antwerp in 1673. Winterfeldt says in his *Keang. Kirchengesang*, l. 41, that in its original form it was undoubtedly a secular folk-song.

³ Chansons pop. des provinces belges (preface), Ernest Closson.

⁴ This dialect was dying out, but within the last twenty years efforts have been made by the Liège poet Nicolas Defrecheux and by folk-loreists to preserve it.

⁵ 3-4 and 6-8 time are very common among the Walloon songs.

After the 16th century the glory of the Flemish school¹ waned. As representative songs of the 18th century we may mention those by the Flemish composer G. de Fesch, who came over to England about 1730 and published there a volume entitled 'Canzonette ed arie a voce sola.' They are sentimental like the French songs of the period, regular in form, with fairly agreeable harmony. Of greater interest are the songs interspersed in the short allegorical, mythological and pastoral plays then much in vogue. Van der Straeten² gives as a characteristic example a pretty little 'Bergère flamande,' from Lambrecht's 'Vlaemsche Vrede-Vreucht'; but whether it was original or an adopted folk-song is an open question. 'Le Voegge de Chofontaine,' an opéra-bouffe by the Liège composer G. Noël Hamal, contained the favourite couplets and dances in the district in which it was written.³ By degrees, however, these unimportant local operas died out,⁴ and composers sought their laurels in Paris. Both Belgium and France lay claim to Gossec and Grétry as national composers; and similarly Grisar, César Franck and many others, who, although Belgians by birth, are practically regarded as French composers, having identified themselves with the French school.

BELGIUM.—The year 1834 witnessed the constitution of Belgium as a separate kingdom, and the formation of a Belgian nationality. Up to that date there are no songs worthy of mention, with the possible exception of LA BRABANÇONNE, the national song of Belgium, composed by Van Campenhout in 1830. The generality of composers had hitherto continued to use indiscriminately French and Flemish words for their songs, until towards the end of the 19th century a group of musicians arose who avowedly are endeavouring to give Flemish art once more a national character. This has been designated the *mouvement flamigant*, and the foremost personalities belonging to it were P. BENOTT, whose songs set to Flemish words are full of life and colour, and Edgar TINEL. The latter is an interesting composer with a strong individuality, but his songs are few. Many other excellent musicians, who have all written ballads and songs, joined this movement, such as Lenaerts, Wambach and Jan Blockx, the most brilliant of them all. Mention must also be made of Blockx's pupil, Vleeshower, and of Van den Eeden, who succeeded Huberti as director of the Mons Conservatoire. Less exclusively Flemish song-writers are Eyken and Tilman, who chiefly confined themselves to sacred songs; Miry, C. Meerens

and A. Goovaerts, who wrote for the most part nursery or school songs; and Van Gheluwe, J. Radoux, A. Samuel, J. Meertens, G. Huberti and E. Mathieu, who are the best-known names. Meertens and Huberti have written songs both graceful and melodious, and of a simple character; whilst those of Jan Blockx, G. Lekeu and Paul Gilson, if somewhat eclectic, manifest originality, novelty and boldness of invention. The curious phase of thought and the peculiar qualities shown in the literature of Belgium by the writings of Maeterlinck, Rodenbach and Verhaeren, cannot fail to leave their mark also on the music of the period.

HOLLAND.—After the numerous song-books which appeared in Holland between 1600 and 1700, Dutch composers devoted themselves principally to instrumental music. Even on the title-pages of vocal pieces we find *om te singen of te spelen*; and Sweelinck's skilful organ and clavier variations on the songs were greater favourites than the songs themselves. As lutenists, organists, carillonneurs or theoreticians, Dutch musicians held a high place in Europe⁵; and although among the works of various members of musical families (and music in Holland was an essentially hereditary gift) we find incidental mention of songs or song-collections, it is evident that this form of art was on the wane. Hooft's anonymous publication, 'Emblemata amatoria,' is the last collection of any value in the 17th century, though Jacques Vredeman (a member of the Vredeman family of lutenists) is known to have written some *canzoni* and *villanelle* to words in the Frisian dialect.

To the 18th century belong De Koninck and Snep, who were the authors of some 'Nederlandsche Lieder en met een en twee Stemmen,' with figured bass, but these are of no musical value. The same may be said of the vocal works of the following composers who lived in the early part of the 19th century: A. Ten Cate, J. G. Wilms, G. Hutschenruijter, G. W. Smits, J. Boers and D. H. Dijkhuizen. Their names still appear in all popular collections of school and patriotic songs, together with those by composers of a later date and higher rank, such as J. Viotta, J. Antheunis, Van Eyken, Richard Hol, S. de Lange (the elder), Prudens van Duyse and J. van Riemsdijk. The songs of the last-named composers are best described under the German term *volkstümlich*, though some of them have shown more interesting and original work, as, for example, Riemsdijk in his 'Tranenkruidje' and 'Sant Jans Gheleide,' from the *Loverkens*.⁶

The most typical Dutch composers of the last century, the words of whose songs are in

¹ Technically, the term Flemish has no longer the same significance as it had earlier; that is to say, it is now more identified with Belgian than with Dutch art.

² *La Musique aux Pays-Bas*, E. van der Straeten, iii. 22.

³ The opera was revived in Paris, edited by L. Terry.

⁴ In 1810 Van der Ginste wrote an opera with Flemish words; and later Miry, Van den Acker and Meertens attempted Flemish vaudevilles, achieving, however, only local success.

⁵ D. F. Scheufler gives an interesting picture of musical life in Holland, *Amsterdam in de 17de eeuw, Het Muziek leven*, The Hague, 1904.

⁶ Hoffmann von Fallersleben's *Loverkens* were favourite words with Dutch composers.

the vernacular, were undoubtedly Richard HOL, J. VERHULST and W. F. G. Nicolai. The first named is better known for his patriotic songs and choruses. Nicolai, who was a prolific writer and a great favourite, wrote melodious and expressive songs, somewhat resembling Mendelssohn. Verhulst was one of the most gifted Dutch musicians, a friend of Schumann and also well known abroad. He set a number of the Flemish poet Heijze's words to music, amongst others a volume of children's songs, 'Kinderleeven, 29 Liederen voor een Stem,' which are of great charm. Another very favourite writer of children's songs in Holland is Catarina van RENNES.

Modern Dutch song-writers approach more closely to the German school than to the French; and, although at this moment a strong national feeling is asserting itself amidst some of the Dutch composers, the general tendency towards Germany cannot be denied. Space forbids more than the mere enumeration of the following names, many of whom have written songs possessing high qualities: J. BRANDTS-BUYS, J. WAGENAAR, Hendrika van Tussenbroek, J. Smulders, S. de Lange, DIEPENBROCK, Gottfried Mann, Julius RÖNTGEN, B. ZWEERS, K. Kuiler, A. Spoel, J. H. Loots, H. Viotta, van Brucken-Fock and Cornelia van Oosterzee.

ENGLAND²

English song has as long and as honourable a genealogy as that of any country in Europe. Moreover the recent research into ENGLISH FOLK-SONG (*q.v.*) has brought to light the popular sources of its melody and discovered a wealth of song of which for many generations sophisticated musicians had been lamentably ignorant. If John Dunstable who lived early in the 15th century cannot claim to have invented polyphony, at least he was one of the first to bring scientific and artistic order into the chaos of harmony and raise vocal music to the rank of a structural art. But about the year 1240³—two centuries before the time of Dunstable—the song 'SUMER IS ICOMEN IN' (*q.v.*) was written by John of Fornsete, a monk of Reading Abbey. Whether this beautiful canon is the sole survivor of many such compositions, or was a solitary inspiration, is hidden from us, but it certainly implied a long previous course of study and practice.

As France gave birth to the troubadours and Germany to the Minnesinger, so did England in a remote age produce her own bards and afterwards her scalds and minstrels, her gleemen and harpers, all of whom were held in high repute by their countrymen. And there is a record of a company or brotherhood, called 'Le Pui,' formed by some merchants in London, at the end of the 13th century, for the encouragement of musical and poetical compositions. With this purpose they assembled

² See the articles on IRISH, SCOTTISH and WELSH MUSIC, with bibliographies for accounts of the characteristics of song in these countries.

³ Or 1236, according to Dr. Willibald Nagel's *Geschichte der Musik in England*, i. 78, et seq., where an interesting discussion of that song will be found. (See SUMER IS ICOMEN IN.)

periodically, and competitions were held, though the reluctance of the brotherhood to admit any but members to those meetings prevented their influence being widespread. The name denotes a French origin, which is easily possible considering the close intercourse between France and England after the Norman Conquest and during the time of the Crusades.¹ Of the abundance of popular tunes in the 14th century evidence is supplied by the number of hymns written to them. For instance, 'Sweetest of all, sing,' 'Good-day, my leman dear,' and many others were secular stage-songs, to which the Bishop of Ossory, who lived about 1350, wrote Latin hymns. While the minstrels flourished, notation was difficult and uncertain, and they naturally trusted to memory or improvisation for the tunes to which their tales should be sung. (See MINSTREL.) But with the end of the 15th century the minstrels disappeared, their extinction accelerated by the invention of printing. When the pedlar had begun to traverse the country with his penny books and his songs on broadsheets the minstrel's day was past.² To the time of the minstrels belongs, however, the famous 'Battle of Agincourt' song,³ with the date 1415.

To the reigns of Henry VI. and Edward IV. belong also many carols, and amongst them the

¹ See H. I. Riley's *Liber Custumarum*, p. 559. The languages of Latin, French and English were for a time intermingled, but by the middle of the 14th century French had become a foreign language, Latin was reserved for ecclesiastics and scholars, and every Englishman, high or low, spoke his own tongue. *Ges. d. Musik in England*, Dr. W. Nagel, II. 3 et seq.

² For further information about the minstrels see *Old English Popular Mus.*, Chappell, I. 1 et seq.; and *Ges. d. Musik in England*, Nagel, I. 96 et seq.

³ *Old English Popular Music*, I. 25. Chappell further says that when Henry V. entered the city of London in triumph after the battle of Agincourt... boys with pleasing voices were placed in artificial turrets singing verses in his praise. But Henry ordered this part of the pageantry to cease, and commanded that for the

celebrated 'Nowell, Nowell' and the 'Boar's Head' Carol, sung even now every Christmas at Queen's College, Oxford.⁴ Some of these carols may have been composed by John Dunstable or his contemporaries. Although in England there is little left of this earliest English school of composers⁵ on the Continent recent discoveries have been important. 'O rosa bella,' a three-part love-song, by Dunstable, was found at Rome, and afterwards in a different version at Dijon,⁶ and it is evidently counterpoint on a popular song. A number of other MSS. of English composers' works of this period exist at Modena and Trent, and the latter library contains another secular song 'Puisque m'amour' by Dunstable.⁷ (See DUNSTABLE.)

In the period between 1485 and 1547,⁸ which covers the reigns of Henry VII. and Henry VIII., social and political ballads multiplied fast; and among the best-known productions of these reigns are the following: 'Pastyme with good companye,' composed by Henry VIII. himself; 'The three ravens,' 'John Dory,' 'The hunt is up,'⁹ 'We be three poor Mariners,' 'Robin, lend me thy bow,' 'My little pretty one,' 'Sellenger's Round,' 'Westron Wynde,'¹⁰ etc. It should be noticed here that many variations in the copies or old tunes indicate uncertainty in oral traditions. Formerly the general opinion was that the old secular music of European countries was based upon the same scale or mode as the modern major scale, i.e. the Ionian mode. But it is now generally acknowledged that the ecclesiastical modes were fully used in England in the composition of all kinds of secular music until early in the 17th century, and many of the popular songs were written throughout this period in the Dorian, Mixolydian and other modes.¹¹ Thus, amongst

future no ditties should be made and sung by minstrels or others in praise of the recent victories 'for that he would woulle have the praise and thanks altogether given to God.' Nevertheless among many others, a minstrel piece soon appeared on the *Seyge of Harlet* (Harlequin), and the *Battle of Agincourt*, evidently, says Warton, adapted to the harp, and of which he has printed some portions (*History of English Poetry*, II. 257). The above song, which was printed in the 18th century by Percy, Burney and J. Stafford Smith, from a MS. in the Pepysian collection in the Library of Magdalene College, Cambridge, has been shown by J. A. Fuller Maitland to be an incomplete transcript from one in Trinity College, Cambridge, in which the melody stands as above. (See 'English Carols of the 16th Century'.)

¹² The words to this carol were printed by Wynkyn de Worde in 1521, but the music appears to be of an earlier date.

¹³ See, however, Woodbridge's discussion, *MSS. Oxf. Hist. Mus.*, II. 127.

¹⁴ See Ambros, *Geschichte der Musik*, Musik Bellage, p. 22, where the Roman version is reprinted.

¹⁵ These were discovered in 1892 by W. Barclay Squire, and copies are now in the British Museum.

¹⁶ Here the chapter on 'The English School' in Prof. H. Woodbridge's second vol. of the *Oxford Hist. of Mus.* may be studied with advantage.

¹⁷ Any song intended to arouse in the morning, even a love-song; was formerly called a *hunt's up* (Shakespeare so employs it in *Romeo and Juliet*, Act III. Scene 5). There are many different versions of the tune.

¹⁸ This song is famous for being the only secular song which our church composers employed; it was the subject of three Masses by Taverner, Tye and Shepherde in the 16th century. See Chappell, *op. cit.* I. 38, for the melody.

¹⁹ At the time the previous editions of Chappell's work were published this fact had not been freely ascertained, and a certain number of the tunes had had sharps and flats added to them, which transformed an ecclesiastical mode into a major or minor key. In the 1893 edition, these signs have been removed. Moreover, in this edition it is stated that there are 44 Dorian, 19 Mixolydian and 12 Aeolian tunes out of 118. The other 43 are mostly in the major. The Phrygian and Lydian modes occur less often, however, in English music than in that of other countries. See Woodbridge's preface to Chappell's *Old Eng. Pop. Music*.

the early songs, 'The King's Ballad,' 'Westron Wynde,' and others agree in some of their many versions with the Dorian mode. And, as will be later shown, modal influences exist to the present day in our simplest folk-songs. But in the 16th century the easy Ionian mode was the favourite of strolling singers and ballad-mongers; and in spite of prohibition and censure by the Church and the disdain with which skilled musicians treated what they contemptuously termed *il modo lascivo*, this popular scale triumphantly survived and has formed the basis of our modern system of scales and keys.

Of secular songs antecedent to the middle of the 16th century few have come down to us in writing. The aurally transmitted folk-song cannot be dated with any accuracy. The principal relics are the songs in the *Fayrfax MS.*¹ This manuscript, which once belonged to and was probably written down by Dr. Robert *Fayrfax* (*q.v.*), consists of forty-nine songs by the best musicians of that time.² They are all written in 2, 3 and 4 parts in the contrapuntal style; some in the mixed measure—four-time in the one part and three-time in another—which was common at the end of the 15th century. During the latter half of the 16th century musicians of the first rank seldom composed airs of the short rhythmical kind appropriate to ballads, and poets rarely wrote in this metre, for ballad-writing had become a separate employment. It should also be noted that English church composers rarely took popular or folk-songs for the subjects of their masses³ and motets as was the custom in foreign countries, though they were freely used as themes for variations or *canti fermi* for polyphonic works by instrumental composers.

In Queen Elizabeth's reign music was generally cultivated and song was universal: 'tinkers sang catches; milkmaids sang ballads; carters whistled; each trade, even the beggars, had their special songs.'⁴ The best-known songs of this period from 1558–1603 were 'The Carman's Whistle,' 'All in a Garden Green,' 'Dulcina,' 'The British Grenadiers,' 'Death and the Lady,'⁵ 'Near Woodstock Town,' 'Light o' Love,' 'Children in the Wood,'⁶ 'The Bailiff's Daughter of Islington,' 'Willow Song,'⁷ 'Greensleeves,' 'The Friar of Orders Gray,' 'O Death, rock me asleep,'⁸ and 'Frog

Galliard.' This last song by John Dowland is almost the only instance to be found in the Elizabethan period of a favourite folk-tune known to have come from the hand of a celebrated composer. Dowland originally wrote it to the words, 'Now, O now, I needs must part,' and it appeared in his *First Book of Aires* (see *ENGLISH SCHOOL OF LUTENIST SONG-WRITERS*, Vol. II.) in the double form of a song to the lute and a four-part song. William Byrd's adoption of the 'Carman's Whistle' in the *Fitzwilliam Virginal Book* is well known; it is a dance-tune, and so also is 'Greensleeves,' and many others. In fact, nearly all the dance-tunes contained in these and somewhat later collections of lute and virginal music are the most valuable sources we possess for accurate and trustworthy versions of the music of the folk-songs (see *VIRGINAL MUSIC*). They are trustworthy because they were written down at the time by skilled musicians and therefore escaped the risks of transmission by ear alone. The names or words of many ballads are handed down to posterity in the works of Shakespeare⁹ and other Elizabethan dramatists.¹⁰

A few words may be introduced here on the form of popular English ballads, or folk-songs.¹¹ In dance, or march, or ballad music which has grown from the recitation of words to a chant, or to a short rhythmical tune, the musical design is found to reside chiefly in the rhythm. The ordinary rhythm of ballads was the even fashion of four-bar phrases, as, for instance, in 'The hunt is up':

2. *The Hunt is up.*

1st Phrase. 1 2 3 4

The hunt is up, the hunt is up, and it is well nigh day;

2nd Phrase. 1 2 3 4

And Harry our King is gone hunting to bring his dear to bay.

The three-bar phrase rhythm is generally met with in the jig and hornpipe tunes of England, such as 'Bartholomew Fair,' but it sometimes occurs in songs of other kinds. Of the rhythm in 'My little pretty one' (Ex. 3), which has three phrases of two bars each, and a fourth of three bars, there are several other examples; and, indeed, there are abundant varieties of irregular rhythm. But it may be held as a general conclusion that the musical rhythm follows the rhythm and metre of the words and varies with

¹ The following are some of the ballads Shakespeare refers to: 'The hunt is up,' 'Heartsease,' 'Willow, Willow,' 'It was a lover and his lass,' 'Greensleeves,' 'Under the greenwood tree,' 'Bonny Sweet Robin,' etc.

¹⁰ Ben Jonson's poem, 'Drink to me only,' is for ever associated with the equally beautiful 18th-century tune ascribed to Col. Mollath, about 1760.

¹¹ The word 'ballad' was applied in a loose sense to every kind of song. The ballad of this period and, indeed, up to the 18th century usually means 'pieces of narrative verse in stanza,' the music of the first stanza being repeated for every successive one. It was also used in England for that which in other countries is designated a 'folk-song,' and this term has of recent years been also accepted in England for any form of song which essentially belongs to the people.

¹ Mention must also be made of three MSS. in the British Museum. Add. MSS. 8605 contains some ballads. This MS. was discovered by Ritson, and a few pieces were printed in J. S. Smith's 'Musica antiqua.' Add. MSS. 31,922 is a volume containing no less than thirty-three songs by King Henry VIII. (amongst them 'Green grow the holly,' which is a fine song), the rest by Cornyshe, Farding, John Fluyd, Pygot, and others. Royal MSS. appendix 58 contains tenor-parts of twenty secular songs, perhaps written before 1600. This collection contains many dance-tunes, such as 'My Lady Carew's Domphe,' also printed in 'Musica antiqua,' with several of the older songs. *Davey, History of English Music*, p. 94 *et seq.*

² The 'Westron Wynde' masses of Tye, Shepherd and Taverner are noteworthy instances of the practice adopted from the Netherlands. See *Oxf. Hist. Mus.* ii. 325. ⁴ Chappell, i. 59.

⁵ A series of ballads from 'The Dance of Death.'

⁶ 'Chevy Chase' was sung to this tune.

⁷ 'A poor soul sat sighing.'

⁸ This was the first ballad known to have an independent accompaniment; it was for the lute. Chappell, i. 111.

them. Compound time is very common in English ballads, especially during and after the

3. *My Little Pretty One.*

My ly-tell pre-ty one, my pretie to-ni one,
She is a joy-ile one, and gentle as can be;
With a becke she comes aun, with a wincke she will be gon,
No doubt she is alone of all that ev-er I see.

reign of Charles II., and may be accounted for by the influence of the French dance-music, which Charles II. brought into England. In modulations they exhibit but little variety. The most frequent arrangement is the half-close on the dominant, and the leading note preceding the tonic at the end of the melody, as in 'The hunt is up.' In another arrangement the half-close is on the sub-dominant and the penultimate note is on the supertonic. In minor-key ballads the relative major-key often takes the place which is held by the dominant in major-key ballads. Another peculiarity of many old ballads are 'burdens.' Sometimes the burden was sung by the bass or basses underneath the melody to support it, as in 'Sumer is icumen in'; or it took the shape of 'ditties,' the end of old ballads, introduced to eke out the words of the story to the length of the musical phrase, as in the 'Willow Song.' In this case the burden was sung continuously by the same voice, but in other instances it was taken up by the chorus at the end of a solo song, or solo and chorus combined, as for instance in the burden of 'Sir Eglamore.' The burdens often consist

4. *Sir Eglamore.*¹

Sir Eg-la-more, that va-liant knight, Fa la
lanky down dilly. And as he rode o'er hill and dale, All
arm'd upon his shirt of mail, Fa la
la fa la la, Fa la lanky down dilly.

of meaningless syllables, as in 'It was a lover and his lass,' or the last example quoted.² The same feature is characteristic of the SHANTY (*q.v.*).

With the end of the 16th century comes in England the first great period of the art-song ushered in by the publication of John Dowland's 'First Booke of Songs or Ayres of foure parts with tablature for the Lute' (1597). The historical importance of this publication is that while the songs may be sung in parts in accordance with prevalent fashion, Dowland has evidently conceived them for his own solo performance to his instrumental accompaniment. From this date to 1612 some thirty sets of songs to the lute were published, four by DOWLAND, the acknowledged master of the school, five each by Thomas CAMPIAN and Robert JONES (*q.v.*); others by MORLEY, ROSSETER, FORD, CORKINE and PILKINGTON (see ENGLISH SCHOOL OF LUTENIST SONG-WRITERS). Nearly all the above-mentioned composers were among the contributors to the collection published by Sir W. Leighton in 1614. This collection was entitled 'Teares or Lamentacions of a sorrowfull soule,' but its contents were mostly songs in four parts.³

The popularity of masques at court offered opportunities to composers for the introduction of lyric songs and dance-tunes. Some scientific musicians may have disdained this kind of work, which only required simple little ditties akin to the folk-songs. Nevertheless Campian, Johnson, and later on Henry LAWES, won great favour in this branch. Lawes published several books of Ayres and Dialogues for one, two and three voices, with the assistance of his brother, William Lawes, whose fame chiefly rests on his music to Herrick's words 'Gather ye rosebuds.' The high reputation won by Henry Lawes in his own day, the enthusiastic praise of the poets, Milton and Herrick, whose verses he set and the disparagement of his work by musical historians of a later age, together call for a word of comment. Milton accorded him the undeserved credit of being the first English musician to set words 'with just note and accent,' and Burney⁴ criticised his most famous song, 'Sweet Echo,' one of the five which have survived of his music to Milton's 'Comus,' for its defects in the very matter for which the poet praised him. The changed attitude towards rhythm which was invading music in the 17th century accounts both for the success and failure of Lawes. The BAR (*q.v.*) was gaining in influence, and regular barring of music according to accentual principles was becoming the fashion.

Dowland could write such a phrase as the following without the least hint of undue accent

² For the above remarks on form, see Miss O. Prescott's article entitled *Form or Design in Vocal Music* (*Musical World*, 1881).

³ Want of space precludes mention in detail of Playford's, Ravenscroft's, D'Urvey's, Leighton's and the various interesting collections of others, and the reader is referred to the articles under their several names in this Dictionary.

⁴ *History*, iii. 382.

on 'the' and 'of'; the bar line was for him still a matter of convenience dictating no accent.

To quicken up the thoughts of my desert.

Lawes on the other hand had to guard the first beat of the bar, generally to accept and sometimes to disguise, but always to respect its implied accent. In the passage from 'Sweet Echo' which Burney criticises so trenchantly he deals with this bar line accent in several ways and certainly with more success than Burney allows him.

And in the vi - o - let embroider'd vale,

Where the love-lorn Night-in-gale nightly to

thee her sad . . song mourn-eth well,

Canst thou not tell me of a gen-tle pair that

lik - est thy Nar-cis - sus are

In bars 1 and 3 of the above he begins the vocal phrase after the accent; in bar 2 he diminishes its prominence by the length which he has given to the first syllable of the word 'violet'; in bar 4 he uses the bar accents to enforce the play on the words 'Nightingale nightly.' Lawes here and elsewhere tackled a problem which his predecessors had not had to face, and in doing so he did a certain amount of pioneer work in the technique of the new style which dance-rhythms and the Italian recitative were combining to impose on musical interpretation. He had not the musical genius for supreme success, but he prepared the way for PURCELL (*q.v.*), whose declamation of the English language ultimately combined elasticity

of musical rhythm with the regular bar structures of duple, triple and quadruple times.

It was a custom with poets in the 16th and 17th centuries to write new words to favourite old tunes, and this practice has made it almost impossible to assign precise dates to many songs and ballads. Thus in Sir Philip Sidney's poems the heading 'to the air of' etc. — often a French or Italian tune — constantly recurs; and many of the folk-tunes were sung to three or four sets of words bearing different dates and having little or no relation to each other. Among songs to be found in the principal collections of the first half of the 17th century was the tune of 'Cheerily and Merrily,' afterwards sung to George Herbert's 'Sweet day,' and better known by its later name. 'Stingo, or oil of barley,' 'The country lass,' and 'Cold and raw' were all sung to the same tune, and many another example might be adduced.

During the Commonwealth secular music flourished in England, and, notwithstanding the abolition by the Puritans of cathedral choirs and theatre music, domestic music was much cultivated. A few of the favourite ballads of that time, both Puritan and Loyalist, were, 'Hey then, up we go,' 'Love lies bleeding,' 'I live not where I love,' 'When love was young,' 'When the king enjoys his own again,'¹ and 'I would I were in my own country.' At the end of the Commonwealth the secularisation of music was complete, and with the Restoration of the Stuarts in 1660 a lighter and more melodious kind of music was introduced. In his exile Charles II. had grown fond of French dance music. Ballads, too, came into popular favour again, as the king was partial to lively tunes with strongly marked rhythms. Of the abundant songs of that period, amongst the most celebrated were: 'Here's a health unto his Majesty,' 'Come, lasses and lads,' 'Troy Town,' 'Barbara Allen,' 'Under the greenwood tree,' 'Dulce Domum,' 'LILLIBURLEO' (*q.v.*), and 'May Fair,' now better known as 'Golden Slumbers.'²

As already mentioned, educated musicians of England were about this time very much under the influence of the Italian and French schools. The style of Pelham Humfrey, whom Charles II. sent to France to study under Lully, was entirely founded on that of his teacher. His song, 'I pass all my hours in a shady old grove,'³ has hardly yet ceased to be sung, and it is a good example of his work, which shows a continually varying adaptation of music to changing sentiment of words, and the most

¹ Ritsaen calls this the most famous and popular air ever heard in this country. See Chappell, I. 214.

² During the 17th century many of our ballad-tunes had found their way into the Netherlands and were there printed with Dutch words (only preserving the English titles) in most of the miscellaneous collections of songs. For instance 'The hunt is up' and 'Fortune my foe' appear severally in the Leyden Lute-Book and the 'Nederlandsche Gedenck-Clanck,' 1626. Chappell, *Old English Popular Music*, I. xv. 76, 84. (See *The Netherlands* section of this article.)

³ The words are attributed to Charles II.

fastidious observance of their emphasis and quantity.¹ Many songs of his may be found in the various collections of the time.² A fellow-student in the Chapel Royal, to whom Humphrey taught much, was John Blow. In 1700 Blow published a volume of his own songs under the title of 'Amphion Anglicus,' and his setting of Waller's 'Self-Banished' is evidence that he could sometimes compose with tenderness and grace. Then Matthew Locke, the famous masque-composer who wrote 'The delights of the bottle,' a most popular song in its day, is worthy of notice, and he had the honour paid to him of an elegy by Purcell at his death in 1677.

Had Henry Purcell never written anything but songs, he would still have established his claim to be the greatest of English musicians. After his death, his songs were collected under the title of 'Orpheus Britannicus'; and 'Full fathom five,' 'Come unto these yellow sands,' 'From rosy bowers,' 'I attempt from love's sickness to fly,' amongst others, have been sung down to our own times. He was a contributor also to Playford's publication 'Choice Ayres and Dialogues,' but his finest songs will be found in the operas and plays for which he composed the incidental music. The qualities of his style and particularly his masterly use of the ground bass as a principle of design in song-writing have received some analysis above. (See PURCELL.) Between 1683 and 1690 Purcell devoted himself to the study of the great Italian masters, and their teachings are manifest in his music. He did not indeed lose any of his individuality, but the melody of his songs became henceforth smoother and more flowing, and the accompaniments more varied. A common fault of the music of Purcell's time was a too servile adherence to the meaning of the text, and the changing sense of the words was too often blindly followed to the sacrifice of musical construction.³ Purcell avoided these faults; with his fine instinct for melody and harmony and his thorough scientific education, no extravagances of any school could lay a strong or permanent hold upon his genius.

From 1700-1800 England's previous repute as a land of music sank to a low ebb. Purcell had no successor as a great creative and original musician.⁴ There were, however, a number of tunes produced in the 18th century which are still familiar to us. John Eccles and Richard Leveridge published large selections of songs; and to the latter we owe the famous songs, 'Black-eyed Susan' and 'The Roast

Beef of Old England.' A beautiful song called 'Felton's Gavotte,' or 'Farewell, Manchester,' said to have been played by the troops of Charles Stuart in quitting Manchester in December 1745, was originally part of a concerto composed by the Rev. W. Felton. Other popular songs of this period were 'Old King Cole,' 'Down among the dead men,' 'Cease your funning,' 'The Vicar of Bray,' and 'Pretty Polly Oliver.' A marked stimulus was given to song-culture in George II.'s reign by the ballad-operas, of which the 'Beggars Opera' (1727) was the first; and it was these operas which brought about the first reaction of the popular taste against Italian music (see BALLAD OPERA). They were spoken dramas with songs interspersed, the songs being set to old ballad tunes, or imitations of them. Thenceforth most of the popular songs were composed by educated musicians, but the great and enduring popularity of some would entitle them to be classed as national songs. In regard to musical structure they are generally strophical, with an easy accompaniment, a marked rhythm and a pleasing melody very simply harmonised.

Very popular in his day was Henry Carey, to whom our splendid national anthem was for a time attributed (see GOD SAVE THE KING). William Boyce also claims recognition for the spirited 'Come, cheer up, my lads' ('Heart of Oak'), which he wrote to Garrick's words in 1759. A greater composer was Thomas Arne, who has been pronounced to be our most national song-writer. 'Rule, Britannia' was written by Arne in 1740 as a finale for the masque of 'Alfred'; and as the song passed from mouth to mouth it soon grew pre-eminent among national airs. It was said by Wagner that the first eight notes of 'Rule, Britannia' express the whole character of the British people. In that same year Arne produced his beautiful songs in *As You Like It*, which he followed with songs in other plays of Shakespeare. In later years Arne's style deteriorated. An imitator of Handel without his genius, Arne overloaded his airs with florid passages, as may be seen in the songs of his opera, 'Artaxerxes.' The obligations of the English people to opera-writers, and of the latter to them, have been reciprocal. While some of the best national airs were due to the opera-writers, they in turn won applause by the free introduction of current popular songs into their operas.⁵

Passing on to another generation, we meet with William Jackson of Exeter, who was thirty years younger than Arne. About Jackson's songs there clings a sense of tameness and in-

¹ Hullah's *Transition Period of Musical History*, p. 203.

² J. Stafford Smith prints five songs in 'Mus. Ant.' ii. 170 et seq., and also one of John Blow's.

³ In fact Lawes's meritorious efforts in this direction were soon exaggerated and overdone by his followers.

⁴ Handel's contribution to English song, apart from his arias in oratorio and cantata, was slight. Reference is made under Germany in this article to his songs published with English words, p. 68.

⁵ Most indeed of the best songs of a period extending from Purcell's time down to the early part of the 19th century were once embedded in dramatic pieces; but these pieces have faded into oblivion, while the songs have survived through successive generations. As dramatic forms of song, these compositions lie outside the scope of this article, but as national and popular songs, they come within it. A list of forty operas entirely set to current popular airs is given under ENGLISH OPERA.

insipidity, but in his day no collection was held to be complete without his 'Time has not thinned my flowing hair,' or 'When first this humble roof I knew.' Among his contemporaries, but a little junior to him, were Thomas Carter, Samuel Arnold, Samuel Webbe and Charles Dibdin, who was a patriotic ballad-writer rather than a musician. The pathos of 'Tom Bowling' has rescued it from neglect, but only by sailors are his other songs remembered now. To Dibdin's generation also belonged John Percy, the composer of 'Wapping Old Stairs,' and James Hook, best known for 'The Lass of Richmond Hill,' and 'Twas within a mile of Edinboro' Town,' a pseudo-Scotch song, like Carter's 'O, Nanny, wilt thou gang with me?' Two better musicians than the foregoing appeared a little later, namely, William Shield and Stephen Storace, both of whom were distinguished by a gift of melody. But their songs are seldom heard now, excepting perhaps 'The death of Tom Moody' by Shield, and Storace's 'With lonely suit.' A well-known song of that period was 'The Bay of Biscay' by John Davy of Exeter.

The special merit of English songs of the late 18th century is their melody, which seems to have then been a common gift; but the strongest feeling of the nation was patriotism, and the compositions that survive are almost all short songs expressive of patriotic sentiment, or connected with it by their nautical subjects.¹ John Braham, Charles Horn, and Henry Bishop were all born in the 18th century, but so near its close that their works must be ascribed to the 19th century. Braham himself was a celebrated singer, and his sea-song 'The Death of Nelson'² merits the fame which it has won. To Horn we owe 'Cherry Ripe,' and 'The deep, deep sea.' Sir Henry Bishop stood foremost among all his contemporaries and immediate predecessors, alike in science, taste and facility, and possibly also in invention. His accompaniments are varied and skilful, and though his melodies contain rapid divisions requiring vocal skill, they are graceful and effective. With such care also did he study correctness of accent that in his songs the metre of the poetry is seldom disturbed by the rhythm of the music. 'Bid me discourse,' 'Should he upbraid,' and 'Home, Sweet Home' are well-established favourites, which need no eulogy. As other illustrations of the songs of the first part of the 19th century may be mentioned, 'I'd be a butterfly,' by Haynes Bayly; 'She wore a wreath of roses,' by Knight; 'The blue bell of Scotland,' by Mrs. Jordan, and others by Rooke, Rodwell, Thomas Cooke, Lee and Lover. But speaking generally of these songs and of many others like them, their sole and

only merit consisted in the voice-part being pleasant and melodious, and the accompaniments very easy.

It can be easily understood that although this type of song was popular it had nothing in common with the genuine folk-song. There is indeed an impression that by the end of the 18th century traditional song had died out in England,³ but this is by no means the case. The many valuable books of traditional songs collected and published during the 19th and present centuries afford proof that the popularity of song has never been lost in England. Each part of England preserves its special songs as much as its own customs for certain days and seasons. And collectors of songs can bear witness that the habit of inventing songs is not yet extinct among the country people. This circumstance may account for the existence of many quite distinct airs for a set of favourite words.⁴ Recent collections also show that the modal influence (already spoken of in this article) is still evident in many of the English folk-songs. Many of the more recently collected folk-songs are mere variants of older versions, and it is often very difficult to trace them back to their original form. The districts where music is largely cultivated among the poorer classes are not those where the old tunes are most carefully preserved and handed down. The reason of this is that the popular song of the day is ever the enemy of folk-music; and, although the neighbourhood of a town may afford opportunities of musical instruction and cultivation, it likewise offers facilities for acquiring familiarity with this commoner and less desirable class of song. As a general rule the English folk-songs are diatonic in melody and regular in form, and lack any striking characteristics as regards either rhythm or harmony. They hold, however, a high place among the folk-songs of other nations, and they owe it to symmetry of form, simplicity and directness of melody and the absence of sentimentality.⁵

It would be difficult at this date to write a just appreciation of English songs of the 19th century. Although there have been many composers of real merit, the standard of the general public taste was low, and the demand for high or serious work was limited. A numerous section of song-writers clung to the ever-popular ballad-form, and, as they considered the voice-part to be their paramount consideration, they attempted nothing more than the simplest harmonies and accompaniments and disregarded alike the accent and meaning of the poem for the sake of repeating the same commonplace

³ Chappell's 'Old English Popular Music' ends with the close of the 18th century.

⁴ See preface to 'English County Songs,' by Lucy Broadwood and J. A. Fuller Maitland.

⁵ Sir Hubert Parry said in his inaugural address to the Folk-song Society: 'The folk-songs are characteristic of our race; of the quiet reliance of our country folk, courageous and content to meet what chance shall bring with a brave heart. All the things that mark the folk-music of the race also betoken the qualities of the race, and as a faithful reflection of ourselves we needs must cherish it.'

¹ Davy's *History of English Music*, p. 425 et seq.

² On the curious similarity of musical idea between this and Mchul's 'Chant du départ' (amounting almost to identity), see Davy, *op. cit.* p. 477.

tune again and again. Yet within these narrow limits there are songs of various degrees of merit; some composers have raised their songs by force of natural gifts and instinctive taste to a high level.

For a considerable period it seemed as if England knew not how to speak her own language in music. It is an open question whether the effects produced by the Italian opera in Handel's time, and succeeded later by the strong influence of Mendelssohn, were baneful or beneficial to English music. But it is certain that during the first two-thirds of the 19th century very few genuine English songs—that is, purely English in idiom and turn of expression, as well as in thought and feeling—could be met with. Of these few exceptions we may name J. L. Hatton's 'To Anthea' and 'Simon the Cellarer,' J. Hullah's 'Three Fishers,' F. Clay's 'The Sands of Dee,' A. S. Sullivan's 'Orpheus' and his other songs from Shakespeare and Tennyson. In excellence of workmanship many of the above songs cannot compete with those of a perfectly distinct class of writers, among whom W. Sterndale Bennett stands pre-eminent. Of the refinement, delicacy and perfect symmetry of his songs, such as 'May Dew' and 'Dawn, gentle flower' there could be no question; and had he not shared in common with Mendelssohn a tiresome mannerism of frequent repetition of the same phrase, his songs would have been more fully recognised and appreciated. To much the same period belong the songs of E. J. Loder, whose graceful 'Booklet' is one of the best of English songs, W. Davison, G. A. Macfarren, Henry Hugo Pierson and Edward Bache. The last died very young, but not before he had given promise of high merit in the clearness of his ideas. Pierson's songs displayed strength and originality and broke through the established traditions of form. The true English ring of Arthur Sullivan's songs has already been noticed, but there was some other undefined quality which contributed to secure his great successes. It was not his brilliant humour, for that quality hardly appears in his songs. Possibly the charm lay in some veiled touch of emotion. He wrote various kinds of songs: some descended to the sentimental type known as the 'drawing-room ballad,' while others rose to a far higher level, such as his Shakespeare songs and the setting of Tennyson's 'The Window, or the Loves of the Wrens.'¹ In this last beautiful little cycle there are a tenderness and grace combined with fine workmanship which are enduring qualities.

During the last third of the 19th century song in England along with other forms of music showed signs of revival. The group of com-

posers to whom this was due includes the names of Parry, Stanford, Mackenzie, Goring Thomas, Cowen and a little later Elgar. Parry indeed took up the subtle problems of the declamation of the English language where Purcell had left them, and his 12 books of 'English lyrics' (two published posthumously) will stand beside 'Orpheus Britannicus.' Stanford, profiting by his heritage of Irish melody and a peculiar deftness of handling in which he surpassed all his contemporaries, was the most instinctive song-writer of his generation. To name the successful song-writers who have followed these leaders in revival would be merely to recount most of the names of living English composers who are included in this Dictionary. It is worth while, however, to note the names of several women who have done distinctive work in this direction; particularly Maude Valerie White, Liza Lehmann and Ethel Smyth.

With the end of the 19th century came that revival of the English folk-song which has already been mentioned (see FOLK-SONG SOCIETY; SHARP, Cecil J.; and ENGLISH FOLK-SONG), and the best of the younger composers have profited by it to recover the traditional idiom of native song in their own compositions.

¹ These words were written by Tennyson expressly for Sullivan at Sir George Grove's request. The latter had proposed in Oct. 1866 to Tennyson, to write a 'Liederkreis' for Millais to illustrate, and Sullivan to set to music. *Life and Letters of Sir George Grove*, by C. L. Graves, p. 133.

GERMANY

The history of German song has been so thoroughly explored by German writers that its course may be followed from very remote ages, when song was scarcely distinguishable from speech, and *singen* and *sagen* were convertible terms.¹ But until the time of the Minnesinger the song had not acquired form either in metre or melody, and this therefore must be our starting-point.

The Minnesinger were the German counterparts of the Troubadours, but they were of rather later date, and the tone of their compositions was somewhat different. While the Troubadours sang generally of love and gallantry, the Minnesinger constantly introduced into their songs praises of the varied beauties of nature. The Minnesinger always sang and accompanied their own compositions and took no remuneration for the entertainment they gave. They were more numerous in Southern than in Northern Germany; Austria was especially prolific in them. (See MINNESINGER.)

The most representative names in the first period, 1150-1190, were Dietmar von Aiste, Meinloh von Sevelingen, Der von Kurenbero and Spervogel. The second and best period, which was the stage of maturity, was covered by the last years of the 12th century and at least half of the 13th century. To this period belonged Heinrich von Veldecke, Friedrich von Hausen, Heinrich von Morungen, Reinmar der Alte (the master of Walther von der Vogelwiede), Hartmann von der Aue (the author of the celebrated poem 'Der arme Heinrich') and Walther von der Vogelwiede himself, whose fine lyrics won for him a place among national poets. Early in the 13th century the Sängerkreis, or Minstrel-contest, was held on the Wartburg by the Landgrave Hermann of Thuringia, and among the champions who took part in it were Heinrich von Ofterdingen, Tannhäuser and Wolfram von Eschenbach. Wolfram's Minnelieder had some success, but higher renown was gained for him by his Wächterlieder and his 'Parsifal.' The third period was a time for decline and of transition to the Meistersinger. The art of the Minnesinger then descended to trivial and unpoetic themes, and a growing carelessness as to the forms of poetry plainly revealed its deterioration. Nithart von Reuenthal (whose poems were chiefly descriptive of peasant life), Ulrich von Lichtenstein, Reinmar von Zweter, der Marner and Konrad von Würzburg were the principal Minnesinger of this period.

Medieval MSS. contain a great number of the poems of the Minnesinger and the large Jena

and Colmar MSS. the melodies also. These remains attest the special pains bestowed on the poetic words, the finish of their verses as regards metre and rhythm and in short the superiority of their poetry to their music. But this perfection was only reached by degrees. Beginning with alliterative words they advanced to regular rhymes, and then rules of composition were laid down prescribing the number of lines of which different kinds of song should consist. The structure of the verses was closely followed by the Minnesinger melodies, and as there was necessarily a pause wherever the rhyme fell, a certain form was thus imparted to them. Their mode of notation was similar to that then used in the Church and their melodies were founded on the ecclesiastical modes. These compositions were of three principal kinds: the *Lied* (song), the *Leich* (lay) and the *Spruch* (proverb). The *Lied* was usually divided into three parts; the first and second were called *Stollen* (props) and were of the same metre. These constituted the *Aufgesang*. The third or concluding section, the length of which was not prescribed, was called the *Abgesang*. This, after beginning with a contrasting metre and melody, usually (but not invariably) repeated the *Stollen*. A good example is the 'Rügelied' from the Jena MS., arranged by R. von Kralik thus²:

Rügelied.

HERMANS VON DAMEN.

1. *Aufgesang.*

(*Stollen*) Hält' ich all der Wel-ten Hul-den, So wär'
(*Stollen*) Gott verzeh' ihm sel-ne Schul-den, der mir

Abgesang.

ich ein so-llg Mann. Ich weiss gar
nur auf Missgunst sann.

viel der Schwachen za-gen, die den Bie-der-n
im-mer nei-den und das Bö'ste von ihm sa-gen.

The *Leich*, according to its character, was formed either from the Church sequences or from the old dance tunes (*Reigen*). If the latter was the case the *Leich* was composed of differently constructed strophes and each of these had a different melody. If taken from the *sequentia* it exhibited the same monotony and absence of rhythm as the ecclesiastical melodies of that time³:

² 'Poesie und Musik der Minnesinger,' R. v. Kralik, (*Die Musik*, Apr. 1, 1904).

³ From the Jena MSS. Fr. Heinrich von der Hagen gives this example in its original notation (iv. 843, No. xlix.). His work on the Minnesinger is the best authority to consult. In the fourth volume a very instructive essay on the music of the Minnesinger will be found, together with many examples of their melodies, some of which are transcribed in facsimile, whilst others are given in modern notation. See also the new editions of the Colmar MSS. by Paul Runge and Hugo Riemann (1896); and of the Jena MSS. by G. Holz, E. Bernoulli and Fr. Saran (1902).

¹ Fragments exist of the Hildebrandlied of the 8th century (see list of MSS. and printed collections at end of this section), of which the well-known Volckelied of the 13th century 'Ich will zu Land ausreiten' is an offshoot (Böhme, 'Altddeutsches Liederbuch,' p. 3). Also of the Ludwigslied which was sung in honour of Ludwig III. when he gained the victory over the Normans in 882 at Sancourt. These are the earliest songs in the German language.

The *Spruch* was composed of one entire strophe, or, if other strophes were added they could be all sung to the same tune. Walther von der Vogelwiede's solitary surviving song (which is in the Colmar MSS., folio 734) is a *Spruch*¹; it is clearly meant to be sung and differs from the ordinary didactic *Sprüche*. It must be remembered that in speaking of the 'tone' of a song, the Minnesinger referred exclusively to the metrical structure of the strophe, and the word did not therefore indicate the use of any special melody or mode.

The 'fahrenden Säger' (wandering minstrels), also called merely *die Fahrenden* or *Gaukler*, formed a link between nobles and people. Belonging clearly to the 'Jongleur' class, discouraged by the priests and patronised by courts, they were at once acrobats, ballad-mongers and performers on various instruments. Their ranks comprised unfrocked monks, disbanded crusaders, soldiers, serving-men. Essentially musical, they made known the people's songs at courts, and transmitted the songs of Church and Minnesinger to the people. The music was a fusion of secular and ecclesiastical elements, their language a mixture of German and Latin.² But they especially loved the Volkslied, and it is to them that we owe the preservation of these priceless songs which found their way into the numerous collections published in the first half of the 16th century.³

In the 14th century feudalism had passed its prime. With the extinction of the art-loving Hohenstaufen dynasty, the taste for poetry and music declined at court and with it the patronage extended to the Minnesinger. Power was slipping from the grasp of princes, prelates and nobles into the hands of burghers and artisans. Out of these middle classes came the Meistersinger,⁴ who supplanted the more patrician Minnesinger. The name of Heinrich von Meissen (1260-1318), commonly called Frauenlob, forms the connecting-link, for by some he is considered the last of the Minnesinger

and by others the founder of the Meistersinger. In 1311 he came to Mainz and instituted a guild or company of singers, who bound themselves to observe certain rules. Though somewhat stiff and pedantic, Frauenlob's poems evince intelligence and thought⁵; and the example set by him was widely imitated. Guilds of singers soon sprang up in other large towns in Germany; and it became the habit of the burghers, especially in the long winter evenings, to meet together and read or sing narrative or other poems, either borrowed from the Minnesinger and adapted to the rules of their own guild, or original compositions. By the end of the 14th century there were regular schools of music at Colmar, Frankfurt, Mainz, Prague and Strassburg, and a little later they were found also in Nuremberg, Augsburg, Breslau, Regensburg and Ulm. In short, during the 15th and 16th centuries, there was scarcely a town of any magnitude or importance throughout Germany which had not its own Meistersinger. The 17th century was a period of decline, both in numbers and repute. The last of these schools of music lingered at Ulm until 1839 and then ceased to exist; and the last survivor of the Meistersinger is said to have died in 1876.

Famous among Meistersingers were Hans Rosenblüt, Till Eulenspiegel, Muscatblüt, Heinrich von Müglin, Puschman, Fischart and Seb. Brandt; but the greatest of all by far was Hans Sachs, the cobbler of Nuremberg, who lived from 1494-1576. His extant works are 6048 in number, and fill 34 folio volumes. 4275 of them are Meisterlieder or *Bar*, as they were called.⁶ To Sachs's pupil, Adam Puschman, we are indebted for accounts of the Meistersengesang.⁷ The works of the Meistersinger had generally a sacred subject, and their tone was religious. Hymns were their lyrics and narrative poems founded on Scripture were their epics. Sometimes, however, they wrote didactic or epigrammatic poems. But their productions were all alike wanting in grace and sensibility; and by a too rigid observance of their own minute and complicated rules of composition or *Tablatur* (as they were termed) they constantly displayed a ridiculous pedantry. The Meistersinger clearly adopted (especially in lyric-song) the forms of the Minnesinger, such as the two *Stollen* and the *Auf-* and *Abgesang*, but without the instrumental preludes, interludes or postludes.⁸ Churches were their ordinary place

¹ R. von Kralik gives this song in his above-mentioned work. It is too long to quote, and the words are certainly of later date.

² Schneider, *Das musikalische Lied*, i. 193.

³ The 'fahrenden Säger' were also counted as Meistersinger, but belonged to a different circle. In the 16th century, the greatest was Michael Behaim (or Behaim), who was a favourite in the courts of the princes on the Rhine and Danube and at Copenhagen. Reimann in his collection gives an example of his songs, and the Dresden MSS. of the 16th century contain some mystical hymns to the Virgin by Behaim. (R. v. Lillencron, *Deutsches Leben im Volkslied um 1530*.)

⁴ The origin of the term Meistersinger is uncertain. Ambros says that it was applied to every Minnesinger who was not a noble, and thus became the distinguishing appellation of the burgher minstrel. Reimann, however, maintains that the title 'Meister' indicated excellence in any art or trade; and that having been at first conferred only on the best singers, it was afterwards extended to all members of the guild.

⁵ A complete collection of Frauenlob's poems were published in 1843 by Ettmüller, Quedlinburg.

⁶ The celebrated Choral 'Warum betrübst du dich, mein Herz,' was long believed to be the work of Hans Sachs; but it has been conclusively shown by Böhmé ('Alteutsches Liederbuch,' p. 748) that the words were written by G. A. Oemler, and then set to the old secular tune, 'Dein gaudt mein Freud.'

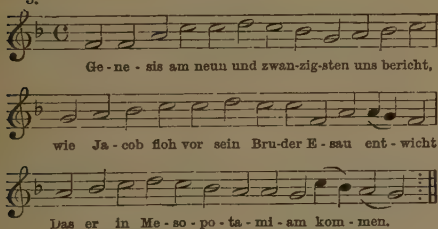

⁷ They bear the titles of *Gründlicher Bericht des deutschen Meistersengesangs* (Gürtitz, 1871); and *Gründlicher Bericht der deutschen Reimen oder Rhythmen* (Frankfurt a. O., 1696). Both are partially reprinted in the *Sammlung für alteutsche Literatur*, edited by F. H. v. der Hagen, J. G. Büsching, and others. Breslau, 1812. See also *Das Singbuch des A. Puschman nebst den Original-melodien des M. Behaim und H. Sachs*, by G. Münzer (Leipzig, 1906).

⁸ Von den Meistersingern und ihrer Musik. Curt Mey, 1903.

of practice. At Nuremberg, for instance, their singing-school was held in St. Katherine's church and their public contests took place there. The proceedings began with the *Freisingen*, in which any one, whether a member of the school or not, might sing whatever he chose, but no judgments were passed on these preliminary performances. Then followed the contest, in which Meistersinger alone might compete. They were limited to Scriptural subjects, and their relative merits were adjudged by four *Merker* or markers who sat hidden by a curtain at a table near the altar. It was the duty of one of the four to heed that the song faithfully adhered to Holy Writ; of another to pay special attention to its prosody; of a third to its rhyme, and of the fourth to its melody. Should the singer fail in any of the rules of the *Tablatur*, the *Merker* declared him *versungen* and *verthan*, and the competitor who had the fewest faults obtained the prize, a chain with coins. One of the coins, bearing the image of King David, had been the gift of Hans Sachs, and hence the whole *Gesänge* were called the 'David' and the prizeman the 'Davidwinner.' Every Davidwinner might have his apprentices, but no charge was made for teaching. The term 'Meister' (strictly speaking) applied only to those who invented a new metre or melody; the rest were simply 'Sänger.'

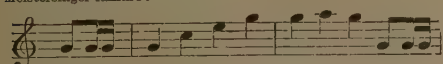

The Meistersinger possessed a store of melodies for their own use; and these melodies were labelled with distinctive but apparently meaningless names, such as the blue-tone,¹ the red-tone, the ape-tune, the rosemary-tune, the yellow-lily-tune, etc. A Meistersinger might set his poems to any of these melodies. The four principal were called the *gekroneten Töne*, and their respective authors were Müglin, Frauenlob, Murner and Regenbogen. So far were the Meistersinger carried by their grotesque pedantry that in setting the words of the twenty-ninth chapter of Genesis to Müglin's *lange Ton*,² the very name of the book and the number of the chapter were also included. Thus:

3.

Ge-ne-sis am neun und zwanzigsten uns bericht,
wie Ja-cob floh vor sein Bru-der E-sau ent-wicht
Das er in Me-so-po-ta-mi-am kom-men.

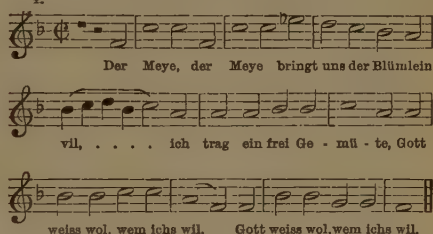

¹ With the Meistersinger the word *Ton* referred to the music only, and not to the poetry, as with the Minnesinger.
² Wagner has made us familiar with Müglin's *lange Ton*, in his Meistersinger fanfare:

and it is evident that Wagner studied and fully understood the Meistersinger melodies and adopted many genuine ones.

To all external appearance the melodies of the Meistersinger (like those of the Minnesinger) had a strong affinity with church music and kept to the ecclesiastical modes. But on closer scrutiny many melodies may be found which would sound just like our major and minor scales, were it not for their modal cadences and the many liturgical fragments introduced. Still their songs are for the most part poor and simple and too devoid of rhythm ever to be really popular, and very few of them found sufficient favour to become *Volkslieder* in the 15th and 16th centuries.³ On the other hand, the Meistersinger themselves sometimes appropriated *Volkslieder*. Thus Hans Sachs has reproduced the beautiful old Mailed (May-song) in his *Fastnachtsspiel*, 'Der Neydhart mit dem Feyhel,' written Feb. 7, 1562.⁴ He calls it a *Reigen* or roundelay, and its original date was evidently anterior to the 14th century. In its 16th-century form it is as follows:

4.

Der Meye, der Meye bringt uns der Blümelein
vil, . . . ich trag ein frei Ge-mül-te, Gott
weiss wol, wenn ichs wil, Gott weiss wol, wenn ichs wil.

In fine, the Meistersinger cannot be said to have reached a high level of excellence either in poetry or in music, but they undoubtedly exercised an important influence on the formation of the song by the attention they paid to rhyme and by their numerous inventions of new metrical arrangements. And they rendered a still greater service to music when they carried it into every German home and made it a grace and pastime of domestic life.

While more regular and formal varieties of the song were thus being studied and practised, it had never ceased to issue in its own spontaneous form of *Volkslied* from the untutored hearts of a music-loving people. From that source it came in native vigour, unforced and untrammelled. And far more was done for melody and harmony by the obscure authors of the *Volkslieder* than was ever done by Minnesinger or Meistersinger. Ambros⁵ claims that the importance of the part played by the *Volkslied* in the history of the music of Western Europe was second only to that of the Gregorian modes. Further, the moral struggle against the anti-humanism of the mediæval Church found victorious expression in the assertive

³ According to Böhme, in the preface to his 'Ald. Liederbuch,' p. xxiii, the writers of the *Volkslied* never signed their names, whilst the Meistersinger generally introduced his own name, and very often the date of his composition, into the last rhyme of the poem. A Meistersinger's song can thus be distinguished from a true *Volkslied*.
⁴ See Böhme's 'Ald. Liederbuch,' p. 366.
⁵ Ambros, *Gesch. der Mus.*, II. 276.

humanism of the folk-song—anathematised by spiritual authority. A partial reconciliation of the contending forces followed when the great polyphonic masters adopted Volkslied melodies as theme or foundation of their greatest sacred and secular works. Later, a yet closer union was effected in the CHORAL (*q.v.*) of the reformation period. Whoever were the authors of the Volkslieder, it was not their habit to write them down; the songs lived on the lips and in the hearts of the people. But happily, even in remote times, there were collectors who made it their business to transcribe these popular songs; and of collections thus made none are more important than the 'Limburger Chronik' and the 'Locheimer Liederbuch.' The former work consists of Volkslieder which would seem to have been in vogue from 1347–80¹; while songs of a little later date are found in the other collection.² This book contains forty-four songs, some of great melodic beauty and showing considerably developed rhythm and structure as well as a delicate sense of poetic feeling. The *Lehrcompendium* of H. de Zeelandia also contains some very fine Volkslieder of the 14th and 15th centuries.³ Finally, among the many Minnesinger and Meistersinger and other MS. collections named after the various towns (such as the Nuremberg, Prague, Dresden MSS.), numbers of genuine Volkslieder are to be found.⁴

The subjects of the earliest Volkslieder were historical⁵; they were indeed epic poems of many stanzas set to a short melody. But by the time that the Volkslied had attained to its meridian splendour, about the beginning of the 16th century, almost every sentiment of the human heart and every occupation of life had its own songs. Students, soldiers, huntsmen, pedlars, apprentices and other classes had their own distinctive songs. The best are undoubtedly the love-songs—those, in fact, where feeling is the strongest. Amongst them the songs of parting (Abschiedslieder) are the most numerous and beautiful, especially the Wächterlieder⁶ or Tagelieder, in which the watchman announces the dawn.⁷ As a rule, the music of the Volkslied was better than the words. So loose was the structure of the verse that syllables without any sense were inserted to fill up the length of the musical phrase, as:

'Dort oben auf dem Berge
Dölpel, dölpel, dölpel
Da steht ein hohes Haus.'

¹ In the 'Limburger Chronik' we are told of a leper monk living by the Rhine, c. 1370. Despite his leprosy, the beauty of his compositions drew men to his cell from all quarters.

² Ambros, *Gesch. der Mus.* iii. 376.

³ From the Prague MS. Ambros (ii. 277) gives one, 'Herr Conrad ging,' both in its original and in modern notation.

⁴ For the history of the Meistersinger see J. C. Wagnersell's *Buch von der Meistersinger holdseligen Kunst*, 1897.

⁵ For the best authority consult R. von Lillencron's *Die historischen Volkslieder*, etc.

⁶ A Wächterlied still sung, 'Der Wächter auf dem Thürlein saß,' is given in Erk's 'Deutsche Liederhort,' No. 135.

⁷ These Abschiedslieder are full of the sounds of nature—described with poetic charm. They were the special property of the Minnesinger (Wolfram von Eschenbach's were the most famous), but equally loved by the people.

or a sentence was broken off in the middle, or meaningless *unds* and *abers* were lavishly interspersed. But notwithstanding these laxities of composition there was a close connexion between the words and the melody.

The Volkslied was always strophical in form, and therein differed from the *Sequences* and *Proses* of the Church and the *Leichen* of the Minnesinger. Another marked feature was its rhyme. When the final rhyme had been substituted for mere alliteration and assonance, a definite form was imparted to the verse, and its outline was rendered clearer by the melody of the Volkslied which emphasised the final rhyme, and by covering two lines of the poetry with one phrase of the melody constructed a symmetrical arrangement.

5. *Meine Liebe Frau Mutter.*

It will be noted in the above example that the half-close is on the dominant harmony and the full-close on the tonic, and this principle, which was originally a peculiar attribute of the Volkslied, was gradually introduced into all other kinds of music, to become one of the most important factors of form. (See FORM.) Many of the Volkslieder were composed in different ecclesiastical modes, but by degrees the Ionian mode, in which alone the dominant principle can have full weight, obtained pre-eminence. The form of the Volkslied is generally very concise as in the above example, and this perhaps is the secret of its great charm. But looser forms are sometimes met with, and were probably

6. *Abschied.*

due to the influence of the Church. To the same influence may be ascribed the melodic *melismata* or vocal flourishes which occur even in strophical songs. These melodic *melismata* also allow the voice great scope in the so-called *Kehrlein* or refrain. Another noticeable peculiarity of rhythm in the Volkslied is the variety of ways in which the metre is treated. In many cases the time changes with every bar, and the above example illustrates a different representation of the metre in every line of the stanza.¹ Few of the Volkslieder begin on the first beat of the bar; and therefore the usual metre is Iambic, thus:

and a preference has always been shown by the Germans for equal or common time; it is a quieter and more formal time than the triple, which is essentially dance-rhythm.² Other common, though not invariable attributes of the Volkslied were a diatonic intervallic progression, the reiteration of one note, a limited compass, the key or mode steadily adhered to, and unlike the songs of many other countries, the melody of the Volkslied always maintained a complete independence of the accompanying instrument. In character the old Volkslieder are marked by a certain earnestness and dignified self-restraint. They are cheerful and even gay, but without impetuosity or excitability. There is no attempt at word-painting; the same tune must serve for the numerous verses. Hence the necessity for concise melodies.

The Volkslied would seem to have fixed, as it were, instinctively our modern major tonal system; and, moreover, songs even of the 15th century are extant, which correspond to our minor keys. The following example clearly belongs to the old system, but the beginning and close and the intervals on which the principal rhymes fall, make it evident that the key of A minor was intended.³

7. Ach Elslein.

¹ See Böhme, p. 335, No. 257. The melody and words of this song are taken from the *Gassenhauerlein*, 1836, No. 1. There are many variations of this fine melody; and in collections subsequent to 1640 it is often to be found set to the morning hymn 'Ich dank Dir, lieber Herr,' and with this setting it appears in all choral books down to the present day.

² Böhme, however, maintains that until the 14th century no trace of any time except *Tempus perfectum* (which means triple time) can be found. 'Ald. Liederbuch,' Preface, p. 54.

³ Another good example is 'Es warb ein schöner Jüngling' (Georg Forster, *Ein Auszug aller alten und neuer Deutscher Lieder*, etc., 1539-56, I. 49). This and 'Ach Elslein, liebes Elslein,' are some of the numerous versions of the legend of the Swimmer. 'Ach Elslein' is found in all the old collections of the 16th century. For instance, in Joh. Ott, 1534, No. 37; Schmeltzel, Quodlibet x. 1544; Rhau, Bicinia, II, 1545, No. 19, etc.

In Hans Judenkünig's (1523) and Hans Neusiedler's (1536) Lute-books this melody is always in A minor with the G# marked. In the song-books the sharp was never marked, but undoubtedly always used.

Consideration has thus far been given to the very important contributions of the Volkslied to the determination of permanent form in music; but its influence on contemporary music also requires notice.

It has already been shown that the composers of other countries in the 14th, 15th and 16th centuries, took secular tunes as themes for their masses, motets and other sacred works. The German composers did the same to a certain extent, but they more commonly employed the secular tunes in their secular polyphonic works. Nevertheless, as regards church music the Volkslied occupied a higher place in Germany than elsewhere; for it is not too much to say that more than half the melodies of the choral-books were originally folk-songs, and these melodies were among the simplest and most beautiful ever created. (See CHORAL.) Heinrich von Lauffenberg (or Loufenberg) in the 15th century systematically set his sacred words to secular tunes,⁴ especially using the favourite *Tage* and *Wächterlieder*; but the reformation made the practice very much more common. The reformers wished the congregation to join as much as possible in the singing of hymns, and with that object they naturally preferred words in the vernacular and melodies which were familiar with the people.⁵ A well-known example of the combination of sacred words and secular melody is the song 'Isbruck, ich muss dich lassen,' set by Heinrich Isaak in four parts in 1475,⁶ with the melody in the upper part—a rare arrangement at that time. After the reformation this tune was adapted by Dr. Hesse to the sacred words 'O Welt, ich muss dich lassen'; and in 1633 Paul Gerhardt wrote to it the evening hymn 'Nun ruhen alle Wälder,' in which form it still remains a favourite in all Lutheran churches.⁷ After many transformations the old love-song 'Mein Gmüt ist mir verwirrt' now lives in one of the most beautiful and solemn Chorals of both the Lutheran and Catholic churches, namely 'O Haupt voll Blut und Wunden,' which Bach has introduced so often in his Passion music. Again 'Könt ich von Herten singen' (one of the most famous of the many *Wächterlieder* and *Tageweisen* melodies

⁴ Ambros, III. 375.

⁵ Naumann (*Hist. of Mus.* p. 454 et seq.) points out that Luther being both a practical and theoretical musician saw clearly how powerful a factor the Volkslied had become in tonal practice, and in using it he insisted on the importance of the appropriateness of the melody to the sacred words, and on correctness of accent.

⁶ Georg Forster, I. No. 36. The words are supposed to be by the Emperor Maximilian I., in whose court Isaak was living.

⁷ See ISAAC, Also Böhme, 'Ald. Liederbuch,' p. 332, where the song is given in its original form with a *melisma*. Böhme also gives an interesting remark on the admiration Bach and Mozart evinced for this song.

⁸ This song is to be found in Hans Leo Hassler's *Lustgarten neuer deutscher Gesänge*, etc., Nuremberg, 1601. The melody was also used for a death-song 'Herzlich thut mich verlangen,' and later it was set to the universally sung 'Befehl du deine Wege' (Handel employed it in 1709, previous to Bach).

the Church borrowed) was adapted to the Choral 'Hilf Gott, das mir gelinge'; 'Ich hört ein Frewlein klagen', to 'Hilf Gott, wem soll ich klagen'; 'O lieber Hans, versorg dein Gans' to 'O lieber Gott, das dein Gebot'; and 'Venus du und dein Kind' to 'Auf meinen lieben Gott.' Many dance-songs, especially the so-called *Ringel* and *Reigentänze*, were likewise set to sacred words.¹

It is clear that the Choral gained rather than lost by the adoption of secular melodies; they emancipated it from stiffness and formality; they gave it heart and living warmth. So far removed from irreverence were the secular melodies, and so appropriate to the sacred text, that the music is generally more expressive of the words in the Choral than in the Volkslied. But perhaps the true explanation of this is, that in the case of the Choral the words were either written expressly for a chosen melody, or the melody was selected for its appropriateness to particular words.² The melody of that just mentioned, 'O Haupt voll Blut und Wunden,' is obviously secular, but what melody could better express a deep and poignant religious sorrow? In the Catholic Church the use of the Volkslied was chiefly confined to the hymns to the Blessed Virgin (*Marienlieder*) and to the saints, and to the Christmas Carols, especially the sacred cradle-songs, such as the lovely 'Josef, lieber Josef mein.' But upon the whole, the Catholic hymns are all conceived in the 'traditional fixed cadence of the Gregorian song.'

The progress of polyphonic music in Germany had been checked by the discontinuance of the Mass after the reformation, but a new impetus was given to it by the contrapuntal treatment of the Volkslied by great composers. As examples of such treatment may be mentioned 'Allein dein G'stalt,' 'Ach herzig's Herz,' by H. Finck; 'Mir ist ein rot Goldfingerlein,' by L. Senfl; 'Der Gutzgauch auf dem Zaune sass,' by L. Lemlin. This brings us to the Kunstlied, which in its primary sense signified only the contrapuntal treatment of the song by learned musicians.³ With the polyphonic Kunstlied we have here no concern, beyond what just suffices to point out the changes through which it successively passed, and the important part the Volkslied held in it. The composers who used the Volkslied thus were masters of every form of counterpoint; sometimes they worked one melody with another, as Arnold von Bruck, who combined the song 'Es taget vor dem Walde' with 'Kein Adler in der Welt'⁴; or if they did not treat the

melody as a canon, as Eckel treated 'Ach Jungfrau, ihr seid wolgemuth,'⁵ they broke it up into fragments for imitation. They were careful always to choose familiar and favourite tunes, so that they might stand out and be easily recognised amidst the web of other parts surrounding them. When composing their own melodies, they always adhered to the ecclesiastical modes, using the new system only when they adopted a Volkslied.⁶ The contrapuntal treatment had, however, one great disadvantage—it constantly necessitated the severance of the melody into fragments, and thus the clear, concise form of the song, which the Volkslied had done so much to establish, was in danger of disappearing. But happily at this juncture (about 1600) Hans Leo Hassler came to its rescue. Having studied in Italy, he breathed into his songs the light secular spirit of the Italian *villanella* and *fa-la-la*, and gave more prominence to the melody than to the other voice-parts. His dance-songs also, with their short rhythmical phrases, did much to restore the concise form. Similar characteristics are noticeable in Melchior Franck's, Regnart's and other contemporary collections of songs.⁷

In the beginning of the 17th century solo songs were first heard in Germany. There, as everywhere else, the introduction of the monodic system was due to the influence of Italy. The revolution begun by that country would seem to have first affected the church music rather than the secular music of Germany. Innovations of Italian origin are plainly discernible in the sacred works of Praetorius and Heinrich Schütz; but neither of these composers improved the secular monodic song. German poetry had now fallen to a debased condition. It produced nothing better than songs of a vapid and artificial sentiment addressed to a conventional Phyllis or Amaryllis. And the language it employed was a nondescript mixture of French, Latin and stilted German. Since Luther's death the simple vernacular had ceased to be in repute. But on August 24, 1617, a meeting of German patriots was held, who set themselves to restore

¹ *Ibid.* p. 72.

² Georg Forster's collections contain a large quantity of songs thus treated. See *Forster*.

³ See, for example, 'Tricinia nova Lieblicher amoroischer Gesänge mit schönen poetischen Texten gezieret und etlicher Massen nach Italienischer Art mit Fleiss componirt durch Melchior Francken,' Nuremberg, 1611; and 'Kurzweilige teutsche Lieder zu dreien Stimmen nach Art der neapolitanen oder welschen Villanellen durch Jacobus Regnart in Druck verfertigt,' Nuremberg, 1578.

The so-called *Gesellschaftslieder* of the 16th and 17th centuries belong to this category of song. They arose when song was cultivated among the burgher and middle classes to a high extent, and ceased with the efforts of the Silesian poets in 1617. At first they resembled the Volkslied in form and spirit, but later they approached more closely to the Kunstlied. Most contemporary musicians took part in this popular development of music, and collected and arranged the favourite songs of the time in parts, either retaining or altering the words. The editors and publishers encouraged the introduction of Italian melodies with translated or imitated words. Between 1540 and 1624, the following musicians (amongst many others) issued collections of such songs: Georg Forster, Orlandus Lassus, Ivo de Vento, Jacob Regnart, Joh. Eccard, C. Demantius, H. L. Haeeler, M. Praetorius, M. Franck, E. Widmann, H. Schein and several Italians. For further information see Hoffmann von Fallersleben, *Die deutschen Gesellschaftslieder*, etc., and R. v. Lilliencren, *Deutsches Leben im Volkslied*, etc.

¹ See Böhme, 'Alt. Liederbuch,' p. 368 *et seq.* Böhme gives a list at p. 810 of secular melodies with sacred words.

² The sacred Volkslieder (*geistliche Volkslieder*) differ from the Choral in that the former were printed on broadsheets and sung by the people of every class, whereas the Choral were written for and sung by the cultivated only.

³ The very much wider signification which the term *Kunstlied* afterwards acquired has been referred to at the outset of this article.

⁴ Reissmann, *Gesch. d. deutschen Liedes*, p. 69.

their native tongue to honour, and with that view to study the introduction of method and rule into its grammar and poetry. Other patriotic groups were soon formed with a like purpose, and by the year 1680 these associations numbered 890 members. Their labours quickly bore good fruit. The success of a group of Königsberg poets was specially remarkable, and was doubtless due in a great measure to the skill with which one of the best of them—Heinrich Albert—set his own and his associates' songs to music. His compositions consequently won great popularity, and he has been named 'the father of the volkstümliches Lied.' Schein and Hammerschmidt had preceded Albert in the right path, but their taste and talent had been frustrated by the worthlessness of the words they set to music. The poetry on which Albert worked was not by any means of a high order, although it had sufficient merit to demand a certain measure of attention. And from his uncle, Heinrich Schütz, Albert had learnt the new Italian methods of singing with correct expression and brilliant execution, introducing vocal embellishments.¹ Several of his songs are for one voice with clavicembalo accompaniment, but their harmony is poor. The movement begun by Albert was carried on by J. R. and J. G. Ahle and Adam and Joh. Krieger. Johann's songs are good, and exhibit a marked improvement in grace and rhythm. The first bars of his song, 'Komm, wir wollen wandeln,' have all the clearness of the best Volkslieder:

8.

Komm, wir wol - len uns spa - zie - ren

woll die Zeit so gün - stig ist etc.

Meanwhile the Kunstlied or polyphonic song had ceased to advance. Other branches, especially instrumental and dramatic music, had absorbed composers, songs began to be called 'odes' and 'arias,' and French and Italian influence was strongly felt, both in music and literature. Writing in 1698, Keiser tells us that cantatas had driven away the

old German songs, and that their place was being taken by songs consisting of mixed recitatives and arias.²

Among the writers of the 18th century who almost invariably called their songs 'odes' and 'arias' were Graun, Agricola, Sperontes, Telemann, Quantz, Doles, Kimberger, C. P. E. Bach, Marpurg, Nichelmann, J. G. Krebs, Neefe and many others. Also large quantities of collections of 'Arien und Oden' were published at this time, either separately or in numbers, of which the most famous was Sperontes' 'Singende Muse an der Pleisse' (Leipzig, 1742-45).³ J. P. Kimberger has been called (perhaps not with perfect accuracy) the inventor of the 'durchkomponirtes Lied,' that is, a song with different music for every stanza. C. P. E. Bach used the same form, and his best-known vocal work is his setting of Gellert's 'Geistliche Oden'⁴ (1758); but he was a musician of a higher and more genial type than the afore-mentioned. Still, this group of composers rendered some services to the song. They set a good example of attention to the words, both as regards metre and expression⁵; they varied the accompaniments by arpeggios and open chords and displayed a thorough command of the different forms they employed. But notwithstanding these merits their songs (with few exceptions) must be pronounced to be dry, inanimate and either deficient in melody, or the melody is overburdened with florid passages and tasteless ornaments and rarely, if ever, spontaneous.⁶

It might strike the reader as strange if the great names of J. S. Bach and Handel were passed by in silence; but neither Bach nor Handel ever devoted real study to the song. Such influence as they exercised upon it was indirect. Bach, it is true, wrote a few secular songs, and a little love-song, 'Bist Du bei mir,' is simple and sincere.⁷ His two comic cantatas also contain several of great spirit and show his use of the Volkslied.⁸ And amongst his 'Geistliche Arien' we have the beautiful 'Gieb dich zufrieden' and 'Schlummert ein, ihr matten Augen.' But these are isolated instances, and it was through his choral works that he most powerfully affected the song.

² See the preface to his cantata collection. See also Lindner, *Gesch. d. deutschen Liedes*, p. 53.

³ Schneider, *Das mus. Lied*, II, 206 and B. Seyffert, *Das mus. volkstümliche Lied*. Although this collection was popular, it was of a very mixed nature, containing solemn odes, vulgar drinking-songs, parodies, or arrangements of French instrumental pieces, and Italian arias.

⁴ In his life of C. P. E. Bach, C. Bitter says: 'Mit diesem schönen, edlen Werke ist G. Bach der Begründer und Schöpfer des deutschen Liedes in seiner jetzigen Bedeutung geworden,' I, 143.

⁵ Generally speaking, expression and tempo marks were sparingly used until the end of the 18th century. But it is curious to see how the composers of this period indicated the tempo by such words as *fröhlich*, *munter*, *ängstlich*, *traurig*, showing, thereby, their wish to express, above all, the mood or character of the song.

⁶ Full information and abundant examples of these songs will be found in Lindner's and Schneider's histories of the song.

⁷ Another in praise of tobacco, of a different character, is in the same book.

⁸ P. Spitta, *J. S. Bach*, II, 561 et seq. The English folk-song, 'When Adam was first created' (see Kildson's *Traditional Tunes*, p. 153), was used by Bach in one of these cantatas.

¹ In the preface to the fourth part of his *Arien* Albert says he has borrowed some melodies from other composers, 'Aus Liebe und Wohlgefallen zu denselben Weisen.' He rarely names the composers, but merely calls the songs 'Aria gallica,' 'Aria polonica,' as in etc. He only used one Italian air, which is the more curious, as in the preface to the sixth part of his *Arien* he says, 'Was für herrliche und geistreiche Compositionen aus Italien... sehe ich oftmals mit höchster Verwunderung an.' See L. H. Fischer, *Fremde Melodien in H. Albert's Arien*, *Vierteljahrschrift*, 1886.

Handel's name is frequently assigned to songs in 18th-century English song-books, or single sheets, or in collections, but it is difficult to say which are original and which are adaptations of Italian songs or minuets set to English words. 'Stand round, my brave boys,'¹ 'From scourging rebellion,'² 'The unhappy lovers,'³ and 'Twas when the seas were roaring,'⁴ were some of the best-known examples. The Händel-Gesellschaft has published a whole volume of 'German, Italian and English Songs and Airs,' but Handel's real influence upon the song was through his operas and oratorios, and there it was immense.⁵ Equally indirect, as will be seen presently, were the effects produced on it by the genius of Gluck, Haydn and even of Mozart.

At the period we have now reached, namely, the end of the 18th century, a group of poets, called the 'Göttinger Dichterbund,' or 'Hainbund,' were actively engaged in providing simple lyrics for the people.⁶ Simultaneously in music, a new and popular form of the Kunstlied appeared which was the 'volkstümliches Lied.' This term defies exact translation; but, speaking broadly, it means a simple and popular form of the art-song. The decline of the Volkslied during the 17th century has been sometimes attributed to the distracted state of Germany; and certainly the gloomy atmosphere of the Thirty Years' War and the desolation of the Palatinate, cannot have been favourable to it. But no political or social troubles could affect its existence so deeply as an invasion upon its own ground by the Kunstlied. So long as the Kunstlied dwelt apart among learned musicians the Volkslied had little to fear. But when once it had become simple and melodious enough to be caught by the people the Volkslied was supplanted. In churches and schools, at theatres and concerts the public grew habituated to the Kunstlied, and where civilisation existed the old Volkslieder faded from memory.⁷ The 'volkstümliches Lied' is, in short, a combination of the Volkslied and the Kunstlied, and its area of capacity is a very wide one. It may rise to a high level of poetic beauty, and may descend to low depths of stupidity or triviality without ceasing to be 'volkstümlich.' Songs there were, undoubtedly, before the time of J. A. Hiller, to which this epithet could be properly applied, but he was the first to secure for them

a thorough recognition.⁸ He belonged to the second half of the 18th century, and was really an operatic composer. It was indeed the songs in his Singspiele which took so strong a hold of the public, and a favourite tune of his, 'Die Jagd,' will serve as a specimen of his work:

Die Jagd. J. A. HILLER.

9. *Commodetto.*

Als ich auf meine
Da kam aus dem Ge-

Biel - che ein Stückchen garn be - goss Das
sträu - che ein Mädchen a - thein - los.

sprach, ach habter - bar - men, steht meinem Va - ter bei! Dort

schlag ein Fall dem Armen das linke Bein ent-zwei!

Another, 'Ohne Lieb und ohne Weib,' taken from his Singspiel 'Der Teufel ist los,' and still sung in Germany with much zest, was one of the first Kunstlieder to be received into the ranks of the Volkslieder. J. André, the author of the 'Rheinweinlied,' and J. A. P. Schulz, were contemporaries of Hiller, and did much for the volkstümliches Lied. Schulz was careful above others of his time to select poetic words for his music, and so long as he kept to the simpler forms, he was always successful; many of his songs are still the delight of German children. Composers were now provided with a store of fresh and natural poems of a popular type by the poets of the Göttingen school, to whom later the names of Körner, Brentano, Arnim and Uhland⁹ may be added; and the love of poetry and song steadily increased in the German nation.

Starting from Hiller and Schulz, the volkstümliches Lied pursued two different roads. Its composers in the Hiller school, such as F. Kauer, Wenzel Müller and Himmel were

⁸ It would have seemed more methodical to trace the rise and decline of particular kinds of songs in separate and clearly defined sections of time, but this is altogether impossible, because their respective periods are interlaced with one another. Thus the volkstümliches Lied had come into existence while the Ode and the Aria were at their zenith; and again composers were using the aria form even after the introduction of the lyric song.

⁹ Körner's patriotic poems and the publication of 'Des Knaben Wunderhorn' acted as powerful incentives to song.

⁵ See Schneider, *Das mus. Lied*, II. p. 180.

⁶ This group consisted of the poets Bole, Hüty, Overbeck, Bürger, Claudius, Voss and the Stolbergs. They revered Klopstock and opposed the French tendency.

⁷ It is, however, well to remember that this new departure of German song which we have been describing may—paradoxical as it sounds—be traced to the zeal displayed by Herder, Goethe and others in collecting and arousing the enthusiasm for the folk-poetry of Germany and other kindred nations. It was the same desire to return to simple, natural forms, though it led in poetry as in music in different directions.

shallow and imperfectly cultivated musicians, whose sentimental melodies had for a time a certain superficial and undeserved repute, such as Himmel's 'An Alexis send' ich dich,' or 'Vater, ich rufe dich.' The dramatic composers Winter and Weigl may be reckoned among this school, in so far as they were song-writers; and its tendencies reappeared nearer our own day in Reissiger and Abt. On the other hand, Schulz's followers were real musicians; and if they became too stiff and formal it was the outcome of a strict regard to form and symmetry and of a praiseworthy contempt for false sentiment. Whenever they chose the volkstümliches Lied they proved their mastery of it; but most of them could write at will in more than one style, and their names must therefore be mentioned in more than one class of song. The first and best of Schulz's school was Mendelssohn's favourite J. F. Reichardt, but his most valuable services to the song were given on other ground, as will appear later. Next to him came Kunzen, A. Weber and Nägeli. Zelter, Klein, L. Berger and F. Schneider are entitled by their songs for male chorus to be counted among the followers of Schulz. The operatic songs of C. Kreutzer and H. Marschner, and the simple melodious songs by C. Krebs, F. Kücken, Silcher, Gersbach and Gustav Reichardt have proved themselves to be truly volkstümlich by their firm hold on the hearts of the people.

In the many collections of so-called Volkslieder, beginning with the South German 'Blumenlese' (1782) and the North German 'Mildeheimisches Liederbuch' (1799), down to those which are continually issuing from the musical press of to-day, there will be found numerous volkstümliche Lieder converted into Volkslieder. Some of these are by celebrated authors whose fame was won in other fields,¹ and some

¹ The *Blumenlese*, edited by H. P. Bossler, contains Beethoven's earliest song, 'Schilderung eines Mädchens,' composed when he was eleven. A very good and typical example of the volkstümliches Lied may here be added. It is taken from his sketch-book of 1815 and 1816 (cited by Nottebohm in the *Mus. Wochenblatt*, Nov. 1878).

Die Zufriedenheit.

BEETHOVEN.

Was frag' ich viel nach Geld und Gut, wenn ich zufriede- den

bin? Liebt Gott mir nur ge - sun - des Blut, so

bin ich fro - her Sinn, und sing aus dankbar-

em Gemüth, mein Morgen- und mein Abendlied.

The words of the song are by J. Müller. It has been set also by Mozart and Neefe.

by men who wrote nothing but volkstümliche Lieder. Of many songs the authorship is wholly unknown, and of others it is disputed.² Worthy to be mentioned as representative songs of this class are: 'Es ist bestimmt in Gottes Rat'; 'Ach, wie ist's möglich dann'; 'Prinz Eugenius'; 'Zu Mantua in Banden'; 'Wir hatten gebaut ein stattliches Haus'; 'Es zogen drei Burschen'; 'Morgen muss ich fort von hier'; 'Ännchen von Tharau'; 'Bekränzt mit Laub'; 'Gaudemus'; 'Es geht bei gedämpftem Trommelklang'; 'Was blasen die Trompeten'; 'Morgenrot'; 'Ich weiss nicht, was soll es bedeuten'; 'In einem kühlen Grunde'; 'Mädele ruck, ruck, ruck'; 'So viel Stern am Himmel stehen'; 'Es kann ja nicht immer so bleiben'; 'Der Mai ist gekommen'; 'O Tannenbaum'; 'Ich hatt' einen Kameraden'; 'Was ist des Deutschen Vaterland'; 'Die Wacht am Rhein,' etc.³ They are familiar in all classes, young and old; and the heartiness with which they are everywhere sung attests their vitality. Singing in unison is comparatively rare among Germans; their universal love and knowledge of music naturally predispose them to singing in parts. A regiment on the march, a party of students on a tour, or even labourers returning from work, all alike sing their favourite songs in parts, with remarkable accuracy and precision. And the natural aptitude of the nation for this practice is perpetually fostered by the *Singvereine* which exist in the most secluded corners of Germany.

The mere enumeration of the qualities by which the volkstümliches Lied can be recognised explains its popularity. It is strophical in form and is easy to sing; it has an agreeable, usually diatonic melody, a simple and pure harmony, an unpretentious accompaniment, a regular rhythm, and words inspired by natural sentiment. But it lacked the poetic and thoughtful treatment, both of words and music, which subsequently raised the lyric song to the level of true art.

It is now time to inquire in what manner the song was treated by some of the greatest composers of the 18th and 19th centuries—by Gluck, Haydn, Mozart, Beethoven, Spohr and Weber. Gluck was the contemporary of Graun, Agricola and Kirnberger; and like them he called most of his songs odes. But the standpoint from which he regarded the song was very different from theirs. Applying his theories about the opera to the song, he steadfastly aimed at a correct accentuation of the words in the music and the extinction of the

² Böhme, in his work entitled *Volkstümliche Lieder der Deutschen im 18. und 19. Jahrhundert*, has done much to rectify current errors as regards the authorship of these songs, such as attributing 'Herz, mein Herz, warum so traurig!' to Beethoven instead of to F. Gluck, and 'Willst du dein Herz mir schenken' to J. S. Bach instead of to Giovanni, etc.

³ In the various collections mentioned at the end of this article, the reader will find a multitude of other similar songs, including *Studenten-, Soldaten-, Trink-, Fest-, Tanz-, National-, Begräbniss-, Geistliche-, Kinderlieder*, etc.

Italian form of the melody, which required the complete subordination, if not the entire sacrifice to itself, of every other element of composition. 'The union,' wrote Gluck to La Harpe in 1777, 'between the air and the words should be so close that the poem should seem made for the music no less than the music for the poem,' and he conscientiously strove to be true to this ideal in all his work. But though he revolutionised the opera, he left no deep mark on the song, for indeed he never devoted to it the best of his genius. His few songs, chiefly Klopstock's odes, have no freshness about them, they are dry and pedantic; and with all Gluck's superiority to his contemporaries in aims and principles of composition, his odes are scarcely better than theirs.¹

With J. Haydn the influence of the Volkslied is once more apparent. Hence the vitality of his melodies where this element is strongest. His finest song, the Austrian National Anthem, 'Gott erhalte Franz den Kaiser,' closely resembles a Croatian folk-song² (see EMPEROR'S HYMN), and in his instrumental works numerous instances of his use of his native songs could be adduced. Yet, taking the bulk of Haydn's songs it cannot be denied that they are lacking in the freshness displayed in his instrumental works. The melodies are carefully and elaborately written, and the accompaniments often interesting and developed (see for instance 'O süßer Ton,' 'Rückerinnerung,' or 'Der erste Kuss'); but his want of interest in the words he chose and his disregard both for their meaning and proper accentuation, rob them of the first conditions necessary for the true lyric. His songs are conceived too exclusively from the instrumental point of view. As Schneider truly says, Haydn 'treats the vocal melody exactly as a pianoforte or violin motif, under which he places some words which only superficially agree in rhythm with the melody.'³ Freest from these defects and amongst his best and most popular songs are the twelve canzonets, containing such graceful and melodious numbers as 'My mother bids me,' 'Recollection,' and 'The Mermaid.' These and such simple little German songs as 'Jede meint das holde Kind' and the pretty serenade 'Liebes Mädchen, hör' mir zu' will never lose their charm.

The versatility of Mozart's powers is visible in his songs. Some of them might be described as arias and others as volkstümliche Lieder; some are lyrical and others dramatic, and yet Mozart cannot be said to have impressed his own great individuality upon the song except in a few instances. It was in the opera that he put forth his whole strength, and his operatic songs often derive from their simple joyous melodies a truly popular character. It is

evident that he treated song, pure and simple, as mere recreation, and bestowed little pains thereon. Many faults of accentuation could be pointed out in his songs, but his exquisite melodies and skilful accompaniments almost obliterate such defects. Mozart wrote many volkstümliche Lieder; some humorous, like 'Die Alte' (with its amusing expression-mark, 'Ein wenig durch die Nase zu singen'); some fresh and joyous as 'Komm, lieber Mai,' and the favourite 'Ich möchte wohl der Kaiser sein.'⁴ But it is in the form of the aria and *durchkomponirtes Lied* that we find his most perfect song-writing. 'Abendempfindung,' with the most beautiful opening phrases expressive of the calm moonlight evening, and his masterpiece, 'Das Veilchen,' which he wrote to words by Goethe, are on a level with his best work in other branches.

Some of Beethoven's earlier songs, such as 'An einen Säugling,' 'Das Krieglied,' 'Molly's Abschied,' and 'Der freie Mann,' are volkstümlich; the form is small and the accompaniment nothing more than the melody simply harmonised. The structure is similar in Gellert's sacred songs, op. 48, except in the 'Busslied,' where there is a fuller development, both of voice and accompaniment. 'Adelaide' is also an early work, but it is written in a larger form and shows signs of the dramatic treatment which for a while influenced Beethoven's vocal writing. Many other songs cast in the scena and aria form could be instanced, but of far higher interest are those written in the lyrical vein. He set six poems of Goethe's as op. 75, and three as op. 83, and although there is much in these songs which might have tempted Beethoven to use the scena or the cantata form, he resisted it. He adhered to the strophical divisions, and left it to the instrumental part to satisfy their dramatic requirements. In Mignon's song, 'Kennst du das Land,' each stanza has the same beautiful melody, and the accompaniment alone varies and intensifies. In Jettles' Liederkreis, 'An die ferne Geliebte,' op. 98, the unity which makes the cycle is wholly the work of the composer and not of the poet. It is Beethoven who binds the songs together by short instrumental interludes modulating into the key of the next song, and by weaving the exquisite melody with which the cycle begins into the last song. Most of the songs of this immortal cycle are strophical, but with great variety of accompaniment; and the just balance of the vocal and instrumental parts, and the warmth and fervour of the expression, equally contribute to the faithful representation of lyric thought and feeling. Enough stress cannot be laid on the importance of Beethoven's work in song-writing, for having effectively shown the power of harmony and

¹ For a good example see 'Willkommen, o silberne Mond,' given by Schneider, II. 267.

² See the Yugo-Slavonic section of this article, p. 32, note 8.

³ Schneider, *Das mus. Lied*, II. 269.

⁴ The little cradle-song, 'Schlafe, mein Prinzchen,' long attributed to Mozart, has recently been proved by Dr. Max Friedländer to have been written by Bernhard Flies.

modulation as means of expression; also for having enlarged the part sustained by the piano-forte. He taught his instrument, as it were, to give conscious and intelligent utterance to the poetic intention of the words. Furthermore, we must recognise that although Beethoven's genius rose to its loftiest heights in other branches of music, it was he who first raised song from the entirely subordinate position it had hitherto held to an honourable place in the ranks of musical art.

Spohr also wrote lyric songs, and was fitted for the work by his romantic and contemplative nature. But his songs are marred by excessive elaboration of minutiae, and in the profusion of details clearness of outline is lost. Again, his modulations, or rather chromatic transitions, are so frequent as to be wearisome. Of all his songs, 'Der Bleicherin Nachtlid' and 'Der Rosenstrauch' are freest from these faults, and they are his best.

A greater influence was exercised upon the song by Carl Maria von Weber.¹ He published two books of Volkslieder, op. 54 and op. 64, perfect in their simplicity and of real distinction. Of his other seventy-eight songs the most celebrated are those from Körner's 'Leyer und Schwert'; the cradle-song, 'Schlaf Herzenssöhnchen,' 'Die gefangenen Sänger,' and the finest of all, 'Das Mädchen an das erste Schneeglöckchen.' These songs deserve their celebrity, and there are indeed many others which are not so well known, nor as often heard as they deserve to be. Weber's fame as a song-writer has perhaps suffered somewhat from the circumstance that many of his best songs are in his operas, and it has been partially eclipsed by the supreme excellence of one or two composers who were immediately subsequent to him.

Incidental reference has already been made more than once to Goethe, to whom the obligations of the song are great. The fine outburst of lyric song which enriched the music of Germany in his lifetime was very largely due to him. The strong but polished rhythm and the full melody of his verse were an incentive and inspiration to composers. J. Fr. Reichardt was the first to make it a systematic study to set Goethe's lyrics to music, and between 1780 and 1810 he issued several collections.² So long as Reichardt merely declaimed the words in melody, or otherwise made the music subordinate to the verse, he was successful. Goethe's words were, in short, a sure guide for a talent like his. Reichardt was not a great master, but he may claim the honour of having struck the true keynote of lyrical songs, and greater artists

than himself immediately followed in his footsteps. Nothing he ever wrote is better than his setting of Tieck's 'Lied der Nacht,' and in this song he clearly shows himself to be the fore-runner of Schubert and Schumann. A younger contemporary, Zelter, also made his reputation by setting Goethe's words to music. Zelter was himself a friend of Goethe, and so great an admirer was the poet of Zelter's settings that he preferred them to Reichardt's and, through some strange obliquity of taste or judgment, to those of Beethoven and Schubert. Zelter's early songs were strophical, but in later years he adopted more freely the *durchkomponirte* form. Others of this group of writers were Ludwig Berger and Bernard Klein, albeit they differed somewhat in their treatment, both of the voice and instrumental parts.

If the general results of the period through which we have just passed be now regarded as a whole, it will be seen that the various conditions requisite for the perfection of the song had matured. The foundations and all the main structure had been built; it required only to crown the edifice. Starting from the *volkstümliches Lied*, the Berlin composers had demonstrated the necessity of full attention to the words. Mozart and Weber had given it a home in the opera. Mozart and Beethoven had developed its instrumental and dramatic elements; and had further shown that the interest of the song is attenuated by extension into the larger scena-form. Nothing, therefore, of precept or example was wanting, by which genius might be taught how to make the compact form of the song a perfect vehicle of lyrical expression. The hour was ripe for the man; and the hour and the man met when Schubert arose.

This wonderful man, the greatest of song-writers, has been so fully and appreciatively treated in other pages of this Dictionary,³ that it would be superfluous to do more here than examine the development of the song under him. So fertile was Schubert's genius that we have more than 600 of his songs, and their variety is as remarkable as their number. He was master of the song in every stage—whether it were the Volkslied, or the Ode, or the volkstümliches Lied, or the pure lyric song, or the Ballade and Romanze. And the secret of his greatness was largely due to his complete recognition of the principle that the balance between the melodic form and emotional meaning should be perfectly adjusted. The essence of true song, as Schubert clearly saw, is deep, concentrated emotion, entrancing words and music alike. Full of poetry himself, he could enter into the very heart and mind of the poet; and so wide was his range of sympathetic intuition that he took songs from all the great German

¹ It is worth while to note that Weber himself says in his literary works, that 'strict truth in declamation is the first and foremost requisite of vocal music. . . Any vocal music that alters or offends the poet's meaning and intention is a failure.'

² Some of Goethe's words appeared among Reichardt's miscellaneous songs as early as 1780; but in 1798 he published a separate collection, entitled 'Goethes lyrische Gedichte,' containing thirty poems. And in 1809 he issued a more complete collection under the title of 'Goethes Lieder, Oden, Balladen, und Romanzen mit Musik, von J. Fr. Reichardt.'

³ The reader should also consult Reissmann's 'Das deutsche Lied in seiner historischen Entwicklung und ihre Geschichte des deutschen Liedes.' Also Hadow's vol. v. of the *Oxford History of Music*.

poets, and as their styles varied, so did his treatment. His best compositions are lyrical, and it is scarcely possible to conceive higher excellence than is displayed in these masterpieces. Beauty and finish are bestowed with so even a hand, both on the voice-part and on the accompaniment, that it would be difficult to say that either takes precedence of the other. In the music which he wrote to the more dramatic, legendary, or ballad-like forms, such as Schiller's 'Der Taucher,' and 'Gruppe aus dem Tartarus,' Collins's 'Der Zwerg,' Mayrhofer's 'Memnon,' or Goethe's 'Ganymed' and 'Schwager Kronos,' the accompaniment is more important than the voice-part. Schubert's treatment of the song-cycle differed from that of Beethoven, inasmuch as Schubert did not weld together the music of the set, but bound them to one another by community of spirit. They can all be sung separately, but the 'Müllerlieder' and 'Winterreise,' which tell a continuous tale, lose much of their dramatic power if they be executed otherwise than as a whole. Some of Schubert's finest songs are strophical in form, and others have a change of melody or accompaniment, or both, for every stanza. But whatever treatment the words might call for, that Schubert gave them with unerring instinct.

Mendelssohn, although he comes after Schubert, belongs to an earlier school of song-writers. His songs exhibit all the best characteristics of the Berlin school; they are perfect in form, melodious and easy of comprehension. But they lack the marvellous variety we find in Schubert's songs. This is partly owing to the fact that Mendelssohn could not surrender himself completely to the poet whose words he was setting¹; the words to him were only an aid or incentive to the composition of a song already preconceived in his own mind. He also adhered to certain clearly pronounced types of melody and harmony; so that his songs all bear a strong resemblance to each other. He preferred the strophic form; and ranked the independence of the melody higher than the variations of expression the words demanded. Hence the slight influence Mendelssohn has exercised upon the song in Germany. Yet granted these limitations, the joyousness of his spring-tide songs, the tranquil beauty of such compositions as 'Scheidend' and the 'Nachtlied,' and the true Volkslied tone of 'Es ist bestimmt,' have rendered his songs popular in the best sense of the word. (See MENDELSSOHN.)

Meyerbeer's songs in general are but little known; but amongst the '40 Mélodies' published in 1840 by Brandus, Paris, many are

remarkable and well worth reviving; as, for instance, 'Le Moine,' 'Le Poète mourant,' 'Sur le balcon,' 'Du schönes Fischermädchen.' Still, they are open to Mendelssohn's criticism, that they are too pretentious and exaggerated, and are wanting in naïveté and spontaneity. Methods were adopted by Meyerbeer more suitable to the exigencies of opera than to the simple song.

With Robert SCHUMANN (*q.v.*) we approach a new departure in song-writing; and no composer since Schubert has exerted so wide and deep an influence upon the subsequent development of this art, both in Germany and in other countries. Schumann was at once poet and musician. His songs are the very soul of romantic poetry. With scrupulous art he reproduces all that runs in the poet's mind, be it ever so subtle and delicate, but he also permeates it with a deeper shade of meaning. This may be seen especially in his settings of the poets Heine, Reinick, Kerner, Geibel, Chamisso,² Rückert³ and Eichendorff, the last five of whom were essentially romantic poets. It is to Heine that Schumann's nature most deeply responded. Whether the poet be in a mood of subtle irony or bitter mockery, of strong passion or delicate tenderness, of joy or sorrow, with equal fidelity is he portrayed in the composer's music. What Schubert was to Goethe, Schumann was to Heine; but the requirements of the two poets were not the same. Goethe's thought is ever expressed in clear and chiselled phrase; while it is a habit of Heine to veil his meaning and leave whatever may be wanting to be supplied by the reader's imagination. The composer who would adequately interpret him must, therefore, have poetic fancy no less than a mastery of his own art. This Schumann had, and none of his songs rank higher than the splendid cycle 'Dichterliebe' from Heine's *Buch der Lieder*. Their melodic treatment is declamatory; not in recitative, but in perfectly clear-cut strophes, with great attention bestowed on the accentuation of emphatic words. As a general rule the instrumental part of Schumann's songs is too important, too independent to be called an accompaniment; it is an integral factor in the interpretation of the poem. While the voice-part often seems only to suggest, the pianoforte part unfolds the sentiment of the song and evolves from the poem a fuller significance than it could ever have owed to the poet's own unaided art.

We will here allude to another branch of modern German song, which comprises the Ballade, the Romanze and the Rhapsodie. In the ordinary English sense, the ballad is

¹ It is a strange paradox that Mendelssohn, with all his finished culture and literary tastes, never realised his responsibilities towards the poet, and did not hesitate to change the words if it suited his music better. To give one instance out of many: in Heine's 'Ich wollt' meine Schmerzen ergössen sich,' Mendelssohn substitutes 'Liebe' for 'Schmerzen,' thereby wholly altering the sense. Another strange contradiction is the fact that although Mendelssohn was steeped in Bach and possessed great contrapuntal skill, his accompaniments are never polyphonic.

² Chamisso's cycle 'Frauenliebe und Leben' is described fully under SCHUMANN.

³ Rückert's verse did not perhaps evoke in Schumann so full a measure of spontaneous melody as Eichendorff and Kerner. The most melodious, and perhaps the best known of the Rückert collection, are Nos. 2, 4 and 11, and these are by Frau Clara Schumann.

primarily a poem descriptive of an event or chain of incidents, leaving the reader to gather sentiment and reflection from bare narration. But the Ballade, as a German form of song, has some other properties. Goethe says it ought always to have a tone of awe-inspiring mystery, which fills the reader's mind with the presence of supernatural powers, and contain strong dramatic elements. The Romanze is of the same class as the Ballade, but is generally of more concise form, and by more direct references to the feelings which its story evokes approaches nearer to the lyric song. As distinguished from the Ballade and Romanze, the Rhapsodie is deficient in form, and its general structure is loose and irregular. The first poet who wrote poems of the true Ballade type was Bürger; his example was followed by Goethe, Schiller, Uhland and others, and then the attention of composers was soon caught. Inspired by Schiller, Zumsteeg composed in this vein, and his work is interesting as being the first of its kind. But Zumsteeg had too little imagination to handle this form successfully, and his best songs belong more correctly to the Romanze. We miss in his Balladen the bold, melodic, principal theme (which should stand out in relief from all secondary themes and ideas, and be repeated wherever the story needs it),¹ although in some of them the details are very well and truthfully painted—for instance, the fine gloomy opening phrase of the 'Pfarrers Tochter.' Neither Reichardt nor Zelter succeeded any better with the Ballade. They treated the 'Erlkönig' as a Romanze, and Schiller's Balladen, 'Ritter Toggenburg,' and 'Der Handschuh,' as rhapsodies. And even Schubert in his longer pieces was inclined to compose in a rhapsodical form. In some, such as 'Der Taucher,' 'Die Bürgschaft,' 'Der Sänger,' where he is faithful to the Ballade form, and where there are exquisite bits of melody appositely introduced and the accompaniments are thoroughly dramatic, the general effect of the piece is overlaid and marred by multiplicity of elaborate details and drawn out to too great length. To the Romanze Schubert gave the pure strophical form, as, for instance, in Goethe's 'Heidenröslein.'

The founder of the true Ballade in music was J. C. G. Loewe, who caught, as it were instinctively, the exact tone and form it required. His method was to compose a very short, distinct, though fully-rounded melody for one or two lines of a stanza and then repeat it throughout with only such alterations as were demanded by the narrative. This secures unity for the Ballade, but it necessitates a richly-developed accompaniment to contribute to the dramatic colouring of the incidents. The simpler the metrical form of the Ballade, the better will this treatment suit it. Take,

for example, Uhland's 'Der Wirthin Töchterlein.' All Loewe's music to it is developed from the melody of the first line; though other resources are brought into play as the tragic close draws near, the original idea is never lost to view, and the character with which the accompaniment began is preserved intact to the end. Still more importance is given by Loewe to the pianoforte part in the gloomy Northern Balladen 'Herr Olaf' and 'Der Mutter Geist,' and to his wonderful setting of 'Edward,' 'Archibald Douglas,' and the 'Erlkönig.' But his popular Balladen are 'Heinrich der Vogler,' 'Die Glocken zu Speier,' and 'Goldschmieds Töchterlein.' These have fresh and genial melodies, accompaniments full of characteristic expression and, stroke upon stroke, they effect a vivid presentment of animated scenes.

Mendelssohn never touched the Ballade form for the solo voice; and Schumann greatly preferred the Romanze. To his subjective lyric cast of mind the underlying thought was of more concern than external facts. In his beautiful music to Kerner's 'Stirb, Lieb' und Freud' he treats the melody as a Romanze and puts the Ballade form into the accompaniment. On the same plan are his 'Entflich' mit mir,' 'Loreley,' and 'Der arme Peter,' from Heine. More developed is the powerful 'Löwenbraut,' and the most complete as regards unity in variety and impressiveness is 'Die beiden Grenadiere.' When Schumann essayed to treat the Ballade melodramatically he failed. Singing, in his opinion, was a veil to the words; whenever, therefore, he wished them to have emphatic prominence he left them to be spoken or 'declaimed,' and attempted to illustrate the narrative of the song by the musical accompaniment. Still the Ballade form was too small and contracted for this kind of treatment, which is better suited to larger and more dramatic works aided by the orchestra. Subsequent composers have used the Ballade and Romanze form in various ways,² but with the exception of Martin Plüddemann none can be said to have devoted themselves exclusively to it. Plüddemann was at first under Wagner's influence: in his musical phrases he attempted to introduce the peculiarly pathetic declamatory utterances, and the Leitmotiv (see, for instance, 'Volks Nachtgesang' or 'Jung Siegfried'). But, later, he recognised Loewe to be the only true exponent of this form, and on Loewe's methods Plüddemann achieved his greatest success. It is a vexed question whether the repetition of the melody for every verse or its variation throughout is the better structure for the Ballade; but the former arrangement would seem to be the best adapted for short and simple pieces, and the latter for lengthier ones. If the melody be repeated for every verse in long Balladen, and unless the varied instrumental

¹ Loewe's ballads strikingly illustrate the value of this characteristic.

² See Brahms's 'Balladen und Romanzen.'

part be of paramount importance, an impression of monotony is apt to be created, and the necessarily varying aspects of the poem are imperfectly represented in the music.¹

The lyric song continued to hold in Germany the high place to which it was raised by Schubert and Schumann, and their traditions were worthily sustained by their successors, Robert Franz and Johannes Brahms. FRANZ (*q.v.* for a special study of his songs) devoted himself almost exclusively to the song, which was the form of music best suited to his lyrical temperament. His favourite poets are writers of quiet, pensive verse like Osterwald, Lenau, Geibel and Eichendorff.

All the best tendencies of the 19th century were summed up in the songs of Johannes Brahms. The perfection of formal structure, the high distinction of melody, the beauty and fitness of the accompaniments, the depth of thought and throughout the ring of truth and sincerity place his songs among the immortal works of the great classical masters. At all times Brahms gave earnest attention to the Volkslied.² The simple sentiment and originality of conception in the poetry of the folk-songs of his own and other countries were a strong incitement to him, and were reflected in his music with unsurpassable truth. Even where he uses Hungarian or other idioms, his language is always his own.³ His use of the old modes and of complex rhythms which had long fallen into disuse,⁴ show he had drunk deeply of the past in music, but he ever amalgamated it with his own living musical utterance. Brahms's full, rich accompaniments have also a character of their own. It is clear that he attached the highest importance to the fundamental bass, and there are many songs in which the bass alone is sufficient to support the voice. Again, whilst his consummate skill in the contrapuntal line is shown by the melodic life he has given the inner parts, his complete mastery over every technical resource of his art is visible in the multifarious rhythms and exquisite harmonies he employs.⁵ His accompaniments sometimes lead, sometimes follow the voice, or they pursue their own independent course. Many instances of these occur in the magnificent song-cycle from Tieck's *Magelone*. The poetical and intellectual qualities of Brahms's songs, as well as their more serious and spiritual properties, have been fully described elsewhere. (See BRAHMS.)

Turning to a side-group of composers who

¹ See Vischer's *Ästhetik*, pt. iii. p. 996; Albert Bach's *The Art Ballad*; Reissmann's *Das deutsche Lied*, p. 236; and M. Runze's *Schiller und die Balladenmusik* (*Die Musik*, 4. Jahr. Heft 15).

² P. Spitta, *Zur Musik*.

³ To show the power Brahms had to limit this form to its own compact structure, and without change evolve fresh meaning for every verse, see the pathetic Volkslied 'Schwesterlein.' And that he could equally raise it to the highest development of the art-song is exemplified by his treatment of the Wendic folk-song 'Von ewiger Liebe.'

⁴ Compare his use of the *hemiolia* with those which occur in Handel's 'Duetti da Camera.' Spitta, *Zur Musik*.

⁵ See, for example, 'Frühlingstrost' and 'O wüsst' ich doch,' from op. 63.

have worked more on the lines laid down by Mendelssohn, we find the names of Curschmann, Taubert, F. Lachner, F. Ries, Eckert, Rietz, Reinecke, Raff and Fanny Hensel. Their best work is unpretending and simple, but they lack the higher qualities of song-writing. Far more interesting and very different names are those of Cornelius, Jensen, Brückler, Herzogenberg and Lassen. Jensen was richly responsive to the vein of tender sentiment brought into prominence by the romantic school. The exquisite 'Dolorosa' cycle, the brilliant 'Spanisches Liederbuch' and gay student songs have won success for him. Both he and Hugo Brückler, whose posthumous songs Jensen edited, possessed the true lyric feeling for melody, and both wrote elaborate and interesting accompaniments. But in each of these song-writers we find a want of self-restraint and self-criticism and an over-ferocious imagination. Heinrich von Herzogenberg did not err in this respect; his refined and thoughtful songs, if lacking in spontaneity, are carefully worked out, and appeal to those who care for the intellectual side of song-writing. The number of E. Lassen's songs is great, and they vary much in merit. He had a sensitive feeling for the æsthetic side of art; and the slightness of means and material wherewith he obtains his effects is admirable.⁶ But his over-sentimentality and desire for popularity place Lassen on a far lower level than the above-mentioned composers. P. Cornelius stands on a wholly different plane, being as much a poet as a musician, and having too strong an individuality in thought and mode of expression to belong to any school. In Cornelius's personality there is a strange combination of subtle mysticism and transparent simplicity, which imparts a rare charm to his songs. The beautiful 'Weihnachtslieder' cycle, with their childlike sincerity and the exquisitely poetical 'Brautlieder' cycle represent his best work, but all his songs need to be intimately studied before they can make their full impression.

The history of German song during the last century bears witness to a continuous attempt towards heightening, by means of melody, harmony and rhythm, the effect of the words. The musical idea, nevertheless, did not subvert the literary, nor were the essentials of pure musical art forgotten. The latest development of German song has carried to the extreme the tendency of giving a place of primary importance to the words, and musical form is sacrificed to literary construction. The composer selects poems with regard to their literary value; the exigencies of verbal accent are enforced; repetition or alteration of words and other verbal licences countenanced in past days are prohibited. Musically regarded, the importance and independence of the instrumental part

⁶ See P. Bachmann's essay on Lassen in *Die Musik*, Feb. 1904.

has reached its climax; declamatory passages have replaced melodic phrases; all the resources of modern music in modulation, in harmonic and rhythmical combinations have been expended on the song-form with a lavish and often indiscriminating hand.¹ Sounds, musically chaotic, are tolerated by the aesthetic principle which recognises no obligation save the obligation to emphasise the mood or meaning of the verse. Expression, not beauty, is now the composer's ideal. This song-formula was adopted by Hugo Wolf and Richard Strauss and carried to its apogee by Max Reger and others belonging to the same school of thought—each engrafting thereon his individual qualities and idiosyncrasies. No one can deny the sincerity of these composers' methods of writing. They have realised the æsthetic value of complexity and ugliness, and it needs no defence in their minds. And yet all have shown that if they wished to write anything simple and beautiful they could do so—every resource in musical art being at their command.² Strauss and Reger will probably not rank among musicians primarily as song-writers, but with Hugo Wolf his songs are his master-work, and as such he justly holds the highest place. His earliest works show an unerring penetration into the very heart of the poet. His art demanded lyrical objectivity, and he deliberately avoided the subjective poets. This objectivity of theme requires a more vivid imaginative grasp and a wider sympathy than is necessary to a composer who makes the songs only represent his own emotion. There is no diffuseness in Wolf's writing; the finest thought is compressed into the smallest possible space. He seems to have triumphantly solved the problem of imparting a feeling of unity into the most declamatory and fragmentary phrases of his songs. He produces the effect on the one hand by concentration of imaginative conception and on the other hand by the more mechanical method of retaining one figure or *motif* throughout the whole song, which adapts itself with wonderful elasticity to each change in the situation. Wolf's accompaniments are usually polyphonic, or consist of kaleidoscopic and unconventional successions of chords and discords, the latter extended also to the voice-part. Songs of extreme beauty are to be found both in the 'Italienisches' and 'Spanisches Liederbuch,' and the 'Geistliche Lieder' of the latter cycle testify to the depth of his nature. In short, what music Wolf wrote was in all sincerity what Wolf felt. Fantastic, realistic and original he may be, but never wilfully affected or extravagant. Many interesting and beautiful songs have,

moreover, been written by Weingartner, Henschel, Hans Schmidt, Hans Sommer, E. d'Albert, Max Schillings, Th. Streicher and others.³ It may also be said that every German composer of modern times, with every diversity of talent, has cultivated the song as a serious branch of his art.

BIBLIOGRAPHY AND COLLECTIONS

A. MSS. from the 8th to the 17th Century

1. Fragments of the 'Hildebrandt' (8th century) in the Landesbibliothek, Cassel. (Facsimile published by W. Grimm in 1830. See O. Schade's *Altdeutsches Lesebuch*, 1862-65.)
2. The Wolfenbüttel MSS. (10th century), in the Ducal Library, Wolfenbüttel. (Contains some of the oldest secular songs in Germany.)
3. MSS. of the 'Ludwigelied' (10th century) in the Valenciennes Library. (See Schade's *Altdeutsches Lesebuch*.)
4. The St. Gall Cod. Lat. No. 393 (11th century).
5. 'Nithard's Song-book'—MSS. (13th century). In the possession of Professor v. der Hagen. (Printed in his work on the Minnesinger.)
6. The Limburg Chronicle (1347-80), in the Limburg Library. (This MS., reprinted in 1617, 1826 and 1880, contains chiefly knights' and monks' songs.)
7. The 'Jena Minnesinger Codex' (14th century) in the University Library. (Contains fine specimens of Minnesinger melodies, and amongst them Vogelweide's 'Reiseliad.' Reprint, 1902.)
8. The Colmar Minnesinger MSS. (14th century), at Munich. (Reprint, 1896.)
9. H. von Loufenberg's Song-book (1415-43), at Strassburg. (Destroyed by fire, 1870, but copied previously by Wackernagel.)
10. Spörl's Song-book (end of 14th and beginning of 15th century), in the Imperial Library, Vienna.
11. The Prague MS. (early 15th century), in the University Library, entitled *48n musikalischer Lehrcompendium d. H. d. Zealandia*. (The oldest Song-book (1452-60), in the Ducal Library, Wernigerode. (Edited in 19th century by Arnold and Bellermin.)
12. The Dresden Minnesinger MS. (15th century), in the Public Library. (Contains M. Behaim's hymns.)
13. The Vienna Song-book (1533), in the Imperial Library. (Consists of sacred and secular parts, words and music.)
14. Hager's Meisterliederbuch (1600). (Contains portrait of Hans Sachs and many Meisterlieder melodies from the Nuremberg School.)
15. Weid's Song-book (1646), in the State Library, Munich. (Contains many thousand songs; some are genuine Volkslieder of the 15th and 16th century and others later and more artificial.)

SONG-CYCLE, see LIEDERKREIS.

SONGE D'UNE NUIT D'ÉTÉ, LE (A Midsummer Night's Dream), opéra-comique in 3 acts, an absurd caricature of scenes in the life of Queen Elizabeth and Shakespeare, with no relation to his play; words by Rosier and De Leuven, music by Ambroise Thomas; produced Opéra-Comique, Paris, Apr. 20, 1850. G.

SONG-SCHOOL. A considerable part in the development of the art of music has been played by Song-Schools. It was the establishment of the *Schola cantorum* at Rome (see SISTINE CHOIR) that led to the development of Gregorian plain-song in the 5th and 6th centuries, and it was the establishment of other such schools at St. Gall, Reichenau, Metz, etc., which disseminated widely the knowledge of the Roman music. In England such musical centres were set up in the earliest days of the Roman mission, and in the 6th and 7th centuries there was great enthusiasm and much good work done under a succession of teachers who came from the Roman *Schola*. After the Danes had devastated monastic life, and with it the bulk of Saxon culture, musical and other, a Benedictine revival under St. Ethelwold took place which recovered music among other things, and English music long preserved some special features which it had learnt in French Benedictine music-schools, particularly at Fleury-sur-Loire.

In the later period before the Reformation two forces were at work in giving practical musical training. In connexion with the monasteries a song-school was almost a necessity. In such song-schools not only foreigners, like Guido d'Arezzo or Regino of Prüm, learnt their music, but English musicians too, such as Odington, Tunsted, Hothby, Fayrfax and, finally, Tallis. At Durham, for example, there was in the monastic days a song-school in which six children were taught and kept under a master, who was also bound to play the organ at the chief services. After the dissolution the building was pulled down, but the school continued under its old master in a different position; and still the song-school flourishes in connexion with the present cathedral. Like the monasteries the secular cathedrals had also a song-school, and others were maintained not only by the King for the Chapel Royal, but also by great ecclesiastics and nobles. Secondly, the foundation of chantries tended to multiply song-schools; for the work stipulated for from the chantry priest after he had said his Mass daily was usually schoolmaster's work, and in many cases either a song-school or a grammar school was annexed to the foundation. Hundreds of these smaller schools were mostly destroyed when Edward VI. confiscated the chantries, and English music has never recovered from the loss. The prevalence of song-schools made it possible for England to be a nation of musicians in the 15th and 16th centuries; but few survived the Reformation, except in connexion with great collegiate or cathedral churches, and England lost its skill. (Cf. MATRISE.)

W. H. F.

In Scotland 'Sang Schools' flourished from the 13th century onwards. A 'seule' for teaching singing existed in almost every one of

the cathedral cities in Scotland, and in many of the smaller towns, such as Ayr, Dumbarton, Lanark, Cupar and Irvine. Even in the far north, in 1544, Bishop Reid founded and endowed a 'Sang School' in Orkney. Before the Reformation the teaching in these schools was principally confided to 'musick, meaners and vertu,' but at a later date it extended to the proverbial 'three R's.' Music, however, seems to have been the chief course of instruction, and the original idea of confining its study to the cathedral singers was so far enlarged, that laymen were admitted to the schools, in which the Gregorian chant had naturally an early and important place. The master of the school was held in high esteem, and was occasionally selected from the clergy, the appointment at times leading to important preferment—thus William Hay, master of the Old Aberdeen School in 1658, was made Bishop of Moray; and John Leslie, Bishop of Ross, was once a teacher in the Aberdeen School.

Great attention seems to have been paid by the Parliament of the day to the study of music, for a statute was passed in 1574

'instructing the provest, baillies, and counsall, to sett up ane sang scull, for instruction of the youth in the art of musick and singing, quhilk is almaist decayit and sall shortly decay without tymous remeid be providit.'

Comparatively little interest seems to have attended either the Edinburgh or Glasgow schools, and from a minute of the Town Council of the latter we gather that the institution collapsed in 1588, 'the scule sumtyme callit the sang scule' being sold to defray the expenses incidental to the heavy visitation of a plague. The Aberdeen school appears to have been the one of chief celebrity, attracting teachers of even Continental fame, and the Burgh records contain references of a curious and amusing description. The school existed so early as the year 1370, its class of pupils being the same as those attending the grammar school. Both vocal and instrumental music were taught, as we learn from the title of Forbes's scarce work, 'Cantus, Songs and Fancies both apt for Voices and Viols as is taught in the Music School of Aberdeen' (1662). About this period, Mace, in his *Musick's Monument*, directed the attention of his countrymen to the sang school of Scotland as an institution well worthy of imitation south of the Tweed. A few excerpts from the Burgh records of Aberdeen and other places may not be uninteresting, and we give the following as a fair example of the attention paid by the civic authorities of the day to the subject of music. On Oct. 7, 1496, a contract was entered into between the Town Council of Aberdeen and Robert Huchosone, sangster, 'who obliges himself by the faith of his body all the days of his life to remain with the community of the burgh, upholding matins, psalms,

hymns,' etc., the Council also giving him the appointment of master of the Sang School. The four following extracts are also from the Aberdeen Burgh records, as faithfully transcribed by the editors of the Spalding Club publications:

4th October, 1577.

The said day the counsell grantit the soume of four pounds to the support of James Symsonne, doctour of thair Sang Scull, to help to buy him cloythis.

23 Novr., 1597.

The maister of the sang schoole sall serve bayth the Kirkis in uptacking of the psalmes theirin.

1594.

Item to the Maister of the sang schoile xliij.

1609.

'The bairnis and scolaris of the sang schoollis' are ordered to find caution for their good behaviour.

From Dundee Records, 1602.

Item to the master of the sang scule lxxx lbs.

From Air Records, 1627.

Item to the Mr of musick scule for teaching of the musick scule and tacking up the psalmes in the kirk x bolls victuall and xliij of silver.

From Irving Records, 1633.

Our doctour and musicianer jcil.

On Nov. 27, 1579, Andrew Buchan was appointed master of the Edinburgh Sang School and 'for uptaking the Psalms in the Kirk of said borough.'

The stipend of the master of the Edinburgh Sang School appears to have been the modest allowance of ten pounds in sterling money.

J. T. F.

SONG WITHOUT WORDS, see LIED OHNE WORTE.

SONNAMBULA, LA, an opera in 2 acts; libretto by Romani, music by Bellini. Produced Teatro Carcano, Milan, Mar. 6, 1831; King's Theatre, July 28, and Paris, Oct. 28 of the same year; Drury Lane in English, May 1, 1833; New York, Park Theatre, Nov. 13, 1835. G.

SONNECK, OSCAR GEORGE (b. Jersey City, New Jersey, Oct. 6, 1873), American writer on music, editor and librarian.

Educated in Germany at the Frankfort Gymnasium and the universities of Heidelberg and Munich, he studied music also in Germany. In 1902-17 he was in charge of the Music Division of the Library of Congress in Washington, which under his direction became one of the great and well-ordered music libraries of the world (see LIBRARIES). In 1911 he represented the United States government at the international music congresses at Rome and London. Since 1915 he has been editor of *The Musical Quarterly*, published by Schirmer (see PERIODICALS), and since 1921 he has been vice-president of that house.

As composer Sonneck is chiefly known through numerous songs. As historian and critic his work has been notable, particularly in

the field of early American music. Aside from two volumes of poems his more important books are:

- Classification of Music and Literature of Music.* (1904; revised 1917.)
Francis Hopkinson and James Lyon. (1905.)
Bibliography of Early Secular American Music. (1905.)
Early Concert-Life in America. (1907.)
Historical Report on 'The Star-Spangled Banner,' 'America,' 'Hail Columbia' and 'Yankee Doodle.' (1909.)
Critical History of the 'Star-Spangled Banner.' (1914.)
Catalogue of Opera Librettos printed before 1800. (2 vols., 1914.)
Early Opera in America. (1915.)
Catalogue of First Editions of Edward MacDowell. (1917.)
Catalogue of First Editions of Stephen C. Foster. (1917.)
A book of Essays, Swiss Cuisine. (1916.)
Miscellaneous Studies in the History of Music. (1921.)

W. S. S.

SONNLEITHNER, a noted Viennese family of musical amateurs. (1) CHRISTOPH (b. Szege-din, May 28, 1734; d. Dec. 25, 1786) came to Vienna at 2 years old and learned music from his uncle Leopold Sonnleithner, choir-master of a church in the suburbs. He also studied law, became an advocate of some eminence, was employed by Prince Esterhazy, and thus came into contact with Haydn. He composed several symphonies, which his friend Von Kees (often mentioned in Haydn's life) frequently played with his orchestra; and also thirty-six quartets, mostly for the Emperor Joseph, who used to call him his favourite composer. His church compositions, remarkable for purity of form and warmth of feeling, have survived in the great ecclesiastical institutions of Austria, and are still performed at High Mass. His daughter Anna was the mother of Grillparzer the poet.

His son (2) IGNAZ (d. 1831), Doctor of Laws and professor of commercial science (ennobled 1828), was an energetic member of the Gesellschaft der Musikfreunde, and took part in their concerts as principal bass-singer. At the musical evenings held at his house (the so-called 'Gundelhof') in 1815-24, in which his son Leopold took part as chorus-singer, Schubert's 'Prometheus,' though only with piano accompaniment, was first heard (July 24, 1816), as were also part-songs, 'Das Dörfchen' (1819), 'Gesang der Geister über den Wassern' (1821), and the 23rd Psalm for female voices (1822).

A second son, (3) JOSEPH (b. 1766; d. Dec. 26, 1835), devoted himself with success to literature and the fine arts, and in 1799 was sent abroad by the Emperor Franz to collect portraits and biographies of *savants* and artists for his private library. During this tour he made the acquaintance of Gerber and Zelter. In 1804 he succeeded Kotzebue as secretary of the court theatres, and as such had the entire management of both houses till 1814, and also of that 'an der Wien' till 1807. He directed his endeavours principally to German opera, and himself wrote or translated several libretti, including Beethoven's 'Leonore' from the French of du Bouilly (the title of which was changed against the composer's wish to 'Fidelio')¹; 'Agnes Sorel' and others for Gyorwetz; 'Kaiser Hadrian,' and 'Die Weihe

der Zukunft'—a *pièce d'occasion* for the visit of the Allies—for Weigl; 'Faniska' for Cherubini; an oratorio, 'Die vier letzten Dinge,' for Eybler, and numerous plays from various languages. He edited the Viennese *Theater-Almanach* for 1794, 1795 and 1796, which contains valuable biographies, and articles on the then condition of music in Vienna. For his services as founder (1811) and honorary secretary of the 'Gesellschaft adeliger Frauen zur Beförderung der Guten und Nützlichen' he was made a counsellor. With indefatigable energy he next applied himself to founding (1813) the Gesellschaft der Musikfreunde, and continued to act as its honorary secretary till his death, devoting himself unremittingly to the welfare of the society. Another institution in which he took equal interest was the Conservatorium, founded in 1817.² The formation of the archives, and especially of the library, was almost entirely his work, through his acquisition of Gerber's library remains in 1819, and his legacy of 41 MS. volumes in his own hand, full of valuable materials for the history of music. His discovery of the S. Gall Antiphoner in 1827 was an important event in the history of old liturgical music. The curious incident of the unique copy of Forkel's collection of 16th century church music, undertaken at Sonnleithner's instance, has been narrated under FORKEL. He lived in close friendship with Schubert and Grillparzer up to his death. He received the Dannebrog Order and honorary diplomas from several musical societies.

His nephew, (4) LEOPOLD EDLER VON SONNLEITHNER (b. Nov. 15, 1797; d. Mar. 3, 1873), son of Ignaz, advocate and eminent amateur, was a great friend of the sisters Fröhlich, Schubert, Schwind the painter, and Grillparzer. He took great care to preserve Schubert's songs, and to introduce the composer to the musical world, by publishing, with the help of other friends, his 'Erk König' and other early songs, for the first time. The 'Erk König' was sung by Gymnich³ at a soirée of the Gesellschaft der Musikfreunde, Jan. 25, 1821, and for the first time in public on Mar. 7 following, at the old Kärnthnertheater, by Vogl, with immense success. As member of the Gesellschaft der Musikfreunde (from 1860 an honorary one), Sonnleithner took an unwearied interest in the concerns of the society, to whose archives he left, among other papers, his highly valuable notes on the operas produced, on concerts, and other musical events in Vienna. His numerous articles on music are scattered through various periodicals. He was an intimate friend of Otto Jahn, and furnished him with much valuable material for the life of Mozart, as Jahn acknow-

¹ The first scheme of instruction was drawn up by Hofrath von Mosel.

² August von Gymnich, an Imperial official, and a much esteemed tenor, d. Oct. 6, 1821, aged 36.

¹ Revised by Treitschke for the revival of the opera in 1814.

ledges in his preface. Leopold von Sonnleithner was Ritter of the Order of the Iron Crown, an honorary member of the Gesellschaft der Musikfreunde, and of the Musikvereine of Salzburg, Innsbruck, etc. With his death disappeared a most persevering investigator and collector of facts connected with the history of music in Vienna, a class which daily becomes rarer, though its labours were never of more value than in the present age of new appearances and general progress.

C. F. F.

SONS OF THE CLERGY, THE CORPORATION

OF THE. This venerable institution, which was founded in 1655 by sons of clergymen, has for its objects the assisting necessitous clergymen, pensioning and assisting their widows and aged single daughters, and educating, apprenticing and providing outfits for their children. To aid in procuring funds for these purposes it holds an annual festival (at no fixed date), consisting of a choral service with a sermon, followed by a dinner. The first sermon was preached in the year of foundation at St. Paul's Cathedral by the Rev. George Hall, D.D., of St. Botolph's, Aldersgate Street. That similar meetings took place in following years is most probable, but there are no means of proving it, owing to the unfortunate destruction of the early records of the institution by fire, in 1838. We find, however, that in 1674 and 1675 sermons were preached at St. Michael's, Cornhill; that from 1676-96 they were delivered at Bow Church, Cheapside; and that from 1697 down to the present year (1926) they have been invariably given at St. Paul's Cathedral. The association was incorporated by charter of Charles II. in 1678. It was in 1698, according to the records, that 'music' (i.e. orchestral accompaniment to the service and anthems) was first introduced at the festivals. The compositions then performed were Purcell's *Te Deum* and *Jubilate in D*, composed for the celebration on St. Cecilia's Day, 1694, and these were annually repeated until 1713, when Handel's *Te Deum* and *Jubilate*, composed on the Peace of Utrecht, were given, from which time the two compositions were alternately performed until 1743, when both were laid aside in favour of the *Te Deum* composed by Handel to celebrate the victory at Dettingen, which continued to be annually performed (with the exception of one or two years when Purcell's *Te Deum* was revived) until 1843, after which its performance was discontinued in consequence of the services of the instrumental band being dispensed with in deference to the wishes of the Bishop of London (Blomfield). Handel's overture to the oratorio 'Esther' was almost invariably played as a prelude to the service from near the time of its production in 1720 until 1843. Dr. W. Hayes was at one time conductor of the festivals, and added instrumental parts to the Old Hundredth

Psalm tune for their use. Dr. Boyce also was for many years their conductor, and composed for them his two anthems, 'Lord, Thou hast been our refuge,' and 'Blessed is he that considereth the poor and needy,' besides adding accompaniments to Purcell's *Te Deum* and *Jubilate*, and expanding several movements in them. After 1843 the services were for some thirty years accompanied by the organ only, the choir being, as before, very largely augmented. Since 1873 orchestral accompaniment has again been called into requisition; Evensong has taken the place of Matins; and modern compositions by various living composers, often written expressly for the festival, have been introduced. A history of the corporation, by Rev. E. H. Pearce, was published in 1904.

W. H. H.

SONTAG, HENRIETTE, COUNTESS ROSSI (b. Coblenz, Jan. 3, 1806; d. June 17, 1854). Her father was a good comedian, her mother an actress of no ordinary merit, to whom the daughter, when at the height of fame, continued to turn for instruction. At 6, Henriette made her first public appearance, at the Darmstadt theatre, as Salome, in Kauer's 'Donauweibchen.' Three years later her mother, then a widow, settled at Prague, where Weber was conductor at the theatre. Here Henriette acted in juvenile parts, and in 1815 was admitted, though under the prescribed age, as a pupil at the Conservatorium of the city. She studied singing under Bayer and Frau Czegka, and when only 15 was suddenly called upon to replace the *prima donna* at the opera in the part of the Princess in Boieldieu's 'Jean de Paris.' Her precocity, appearance and vocal gifts at once created a great impression, but shortly afterwards her mother removed with her to Vienna, where the next few years were spent, Henriette Sontag singing both in Italian and German opera, and deriving, according to her own statement, incalculable benefit from the counsels and example of Mme. Fodor-Mainvielle. Here Weber, in 1823, after hearing her in the 'Donna del Lago,' went next day to offer her the title-rôle in his 'Euryanthe,' whose production, Oct. 25, was a triumph for Mlle. Sontag. Beethoven could not hear her, but 'How did little Sontag sing?' was his first question to those who had been at the performance. When, in 1824, his ninth symphony and Mass in D were produced, it was she who sustained the difficult and ungrateful soprano part. She was next engaged at Leipzig, and then for Berlin, making her first appearance at the Königsstadt theatre, Aug. 3, 1825, as Isabella in the 'Italiana in Algieri.'

Henceforward her career was one unbroken triumph. She made her début in Paris in June 1826, as Rosina in the 'Barbieri,' and became a favourite at once. Her introduction of Rode's air and variations created a furore. She sang

also in the 'Donna del Lago' and 'Italiana in Algeri,' and returned to Germany in July with heightened prestige. Everywhere her beauty, charming voice, and exquisite vocalisation combined to excite an admiration amounting to frenzy. At Göttingen her post-chaise was thrown into the river by the ardent crowd, no mortal being counted worthy to make use of it after her. Even Ludwig Börne, after commenting humorously on the extravagance of the public, confesses to have yielded in his turn to the prevailing infatuation. Her figure was slender and *mignonne*, her hair between auburn and blonde, her eyes large, and her features delicate. Her voice, a soprano of clear and pleasing quality, was specially good in the upper register, reaching the E in alt with facility, and in execution she seems to have been unsurpassed by any singer of her time. But she was deficient in dramatic power, and only appeared to the highest advantage in works of a light and placid style. On her return to Paris, in Jan. 1828, she essayed parts of a different order, such as Donna Anna and Semiramide, with success, but in passion and emotion never rose to the distinction she attained as a songstress.

In England she appeared first on Apr. 19, 1828, at the King's Theatre, as Rosina, and met with a most flattering reception, sharing with Malibran the honours of that and the succeeding season.

At Berlin, Mlle. Sontag had formed the acquaintance of Count Rossi, then in the diplomatic service of Sardinia. An attachment sprang up between them, and was followed by a secret marriage. It was feared that the young diplomat's future might be compromised were he to acknowledge an artist of low birth as his wife. But after a time Count Rossi's efforts to procure court sanction to his union were successful—the King of Prussia bestowed a patent of nobility on the lady, who henceforth appeared in documents as *née de Larunstein*, and she definitely bade farewell to artistic life. As Countess Rossi she accompanied her husband to the Hague, where he was representative of the Sardinian court. Occasionally she would sing for public charities, in concerts or oratorio—a style in which she is said to have been unrivalled; still, for nearly half her lifetime she remained lost to the musical public, following the career of her husband at the courts of Holland, Germany and Russia. As to her domestic felicity and the character of her husband, we quote the positive testimony of her brother, Carl Sontag: 'Rossi made my sister happy, in the truest sense of the word. Up to the day of her death they loved each other as on their wedding-day!' But the disorders of 1847–48 had impaired their fortunes, and she was tempted to return to the opera. It was notified to Rossi that he might retain his

ambassador's post if he would formally separate from his wife—on the tacit understanding that so soon as her operatic career was concluded she should be allowed to return to him. This he, however, at once refused, and resigned his post, though remaining on a friendly footing with the court. Lumley, then manager of Her Majesty's Theatre, having offered the Countess Rossi £6000 for six months, it was accepted, and in July 1849 her reappearance in London as 'Linda' was announced. The curiosity excited was extreme. Her voice and charms were unimpaired, and the unanimous opinion seems to have been that, in the words of Adolphe Adam, she now united to youth and freshness the qualities of a finished artist. As Amina, though Jenny Lind was fresh in the public memory, she was rapturously received, as also in Desdemona, and Susanna in the 'Nozze,' one of her favourite parts, and pronounced by a German critic the most perfect thing he had seen on any stage. Her extraordinary preservation of her powers was partly due, no doubt, to long exemption from the wear and tear of incessant public singing; but Sontag was always extremely careful of her voice, discarding any rôle that did not lie well within her register. Thus, in an early contract at Berlin, she expressly stipulates that she shall not be bound to sing in the operas of Spontini!

After a tour in the English provinces in the winter of 1849, she went to Paris, where a successful series of concerts, also under Lumley's management, preceded in the spring of 1850 her reappearance at Her Majesty's to win fresh laurels as Norina in 'Don Pasquale,' Elvira in the 'Puritani,' and Miranda in Halévy's new opera 'La Tempesta.' As Zerlina and the 'Figlia del reggimento,' she appeared for the first time, and with pre-eminent success. In the autumn of 1850 she sang in Italian opera at Paris, Lumley again being director of the company. During this season Alary's 'Tre nozze' was produced, and the polka-duet between Sontag and Lablache never failed to send the public into ecstasies. It was brought out in London in 1851, with similar results. During this season, Mme. Sontag's last in London, she sang in a round of her favourite parts, and in the production of 'L'Enfant prodigue.'

In Germany, wherever she went she carried all before her. At a concert at Munich she was expressly requested to stay to hear the last piece. It proved to be a 'Huldigungs Chor'—verses composed expressly in her honour by the Crown Prince, and set to music by Lachner.

In 1852, Mme. Sontag received offers from the United States, which tempted her thither with her husband in the autumn. The results were brilliant. Her voice was strengthened by the climate, and at this time she could sing in 'Lucrezia Borgia' and the 'Figlia del reggimento' on a single evening without over-

fatigue! Her last appearance was made in 'Lucrezia' at Mexico in 1854. She was attacked by cholera, and a brief illness cut short a life of unchequered prosperity. B. T.

Bibl.—THÉOPHILE GAUTIER, *Portraits contemporains* (1847, 3rd ed.).

SOPRANO, the name given to the highest of the three classes into which the voices of women are generally divided. (See CONTRALTO and MEZZO-SOPRANO.) The term is etymologically synonymous with 'Sovrano,' the head, chief or highest. But apart from the height to which the compass of the voice can climb, the true soprano is further distinguished by the unmistakable brightness and ring of its tone-quality. It may be classified as the dramatic, the lyrical and the *coloratur*. A compass which extends to *f'''* is necessary for a voice in the last-named category (see AGUJARI). B flat is about the effective limit downwards.

The voices of boys usually cover about two octaves—*a* to *a''* of the soprano range, with something approximating to the soprano quality. For artificial soprano see CASTRATO.

SORCERER, THE, comic opera in 2 acts; libretto by W. S. Gilbert; music by Sullivan. Produced Opéra-Comique Theatre, Nov. 17, 1877.

SORDINO, see MUTE.

SORGE, GEORG ANDREAS (*b.* Mellenbach, Schwarzburg, Mar. 21, 1703; *d.* Lobenstein, Apr. 4, 1778). After a period of but indifferent tuition he was appointed court and town organist at Lobenstein, which post he held to the time of his death. He was a prolific composer, not without merit, but he is best known by his theoretical work, being one of the discoverers of the 'combination tones,' which he discusses in his *Vorgemach der mus. Composition*, published before Tartini made his discoveries known to the world. Sorge was unfortunately a very conceited man, who thought that he alone possessed true knowledge, which led to bitter controversies, especially with Marpurgh and Quantz. Sorge introduced the system of building up chords by the superimposition of thirds which is still used in the teaching of harmony. A list of his theoretical works and his compositions is given in *Riemann* and *Q.-L.*

SORIANO (SURIANO, SURIANUS, SURIANI), FRANCESCO (*b.* Rome, 1549; *d.* there, Jan.¹ 1620), entered the choir at St. John Lateran at the age of 15. After the breaking of his voice he became a pupil of Montanari, then of G. M. Nanini, and lastly of Palestrina. After this his fame went on always increasing. In 1581 we find him maestro di cappella at St. Ludovico dei Francesi; in 1583 he was at the court of Mantua; in 1587 at Sta. Maria Maggiore; in 1599 at St. John Lateran. He returned, however, to Sta. Maria Maggiore, and

in 1603 made his final step to the head of the choir of St. Peter's. He was buried at Sta. Maria Maggiore.

Soriano published his first work in 1581, a book of madrigals, *a* 5. This was followed by a second in 1592; by a book of motets, *a* 8, 1597; by a second book of madrigals, *a* 4, 1601, 1602; by a book of masses for 4, 5 and 6 voices, 1609; by a collection of 110 canons on Ave Maris Stella, 1610, and by a second book of psalms and motets, *a* 8, 12 and 16, 1616. His last work was a Magnificat and Passione, *a* 4, Rome, 1619, containing his portrait. A complete list of his works is given in *Q.-L.* He arranged Palestrina's Missa Papae Marcelli for 8 voices. The Passion already mentioned, a Magnificat and five Antiphons are included in Proske's 'Musica Divina,' vols. iii. and iv., and two masses in the 'Selectus novus.' G.

SORIANO FUERTES, MARIANO (*b.* Murcia, Mar. 28, 1817; *d.* Madrid, Mar. 26, 1880), Spanish musical historian. In spite of musical upbringing, he was forced into a cavalry regiment; but soon retired and devoted himself to music. He founded two musical journals (1841 and 1860), and was for some time teacher at the Madrid Conservatoire (1843) and director of a musical institution at Córdoba. He held various posts as conductor of opera at Seville, Cadiz and Barcelona. He completed a *History of Spanish music from the times of the Phenicians down to 1850* (Madrid, 1855–59). It is confused and inaccurate, and is now superseded by the works of Riaño, Pedrell and Mitjana. He also wrote a treatise (of doubtful value), *Musica Árabe-Española* (1853). J. B. T.

SORS (SOR), FERNANDO (*b.* Barcelona, Feb. 17, 1780; *d.* Paris, July 8, 1839), Spanish guitarist. Like SOLER he was a pupil of the Escolanía at Montserrat; at 17 he composed an opera, 'Telemaco,' which was produced at Barcelona. In Paris he made the acquaintance of Méhul and Cherubini, and during the Napoleonic invasion, in 1809, fled to London, where he had much to do with stimulating interest in the guitar. He became a fashionable teacher, and was the only guitar-player who ever appeared at one of the Philharmonic Society's concerts. His studies are still in the repertory of every serious player of the guitar. J. B. T.

SORTE, BARTOLOMEO, lived at Padua, his native town, between 1570–90. He was singer at the cathedral, and composed masses (1596), Psalms, etc., and two books of madrigals (*Q.-L.*).

SOSTENUTO, 'sustained'; a direction which has of late come to be used with a considerable degree of ambiguity. It originally signified that the notes were to be held for their full value, and was thus equivalent to *tenuto*; but in music of the 'romantic' school it very often has the same meaning as *meno mosso*, or something between that and *ritenuto*—i.e. the

¹ *Riemann*.

passage so marked is to be played at an uniform rate of decreased speed until the words a *tempo* occur. No precise rule can be given for its interpretation, as its use varies with different masters, and even in different works by the same master.

M.

SOSTINENTE PIANOFORTE. A term used in connexion with several attempts, none of them permanently successful, to make a pianoforte capable of producing a sustained sound, such as that of the organ or violin. The lyrichord, melopiano, claviol and piano-violin, names adopted by inventors for certain of these attempts, are discussed below.

THE HURDY-GURDY (*q.v.*) is the germ of *sostinente* keyed instruments; allied to the harpsichord we meet with it in the Gambenwerk¹ of Hans Haydn of Nuremberg, dating about 1610. An instrument of Spanish origin, dated 1625, is in the Museum of the Conservatoire of Music at Brussels (see Mahillon, Cat. IV. p. 282 ff.). Pepys records in 1664 the exhibition of an **ARCHED VIOL** (*q.v.*), an instrument similar in principle. The lyrichord, patented by Roger Plenius² in London in 1741, demands notice as being a harpsichord strung with wire and catgut, made on the *sostinente* principle, and actuated by moving wheels instead of the usual quills, so that the bow of the violin and the tone of the organ were imitated. There is no specification to the patent, but a magazine article of 1755³ gives a drawing and complete description of the instrument, which was otherwise remarkable for sustaining power by screws, springs and balanced tension weights for tuning; for silver covering to the bass strings, like the largest bass-violins; for the use of iron to counteract the greater pull of the octave strings (in the drawing there are apparently four iron bars connecting the wrest-plank and sound-board, thus anticipating the later introduction of steel arches in grand pianofortes for similar service); and lastly for the Swell obtained by dividing the lid or cover into two parts, one of which is movable up and down by means of a pedal governed by the foot of the player. Another patent of Plenius, in 1745, added the 'Welch harp,' or buff stop (in his patent by a pedal), to the instrument. Another '*sostinente*' harpsichord was the **CELESTINA** of Adam Walker, patented in London in 1772.

The melopiano was a grand piano with a *sostinente* attachment, the invention of Caldera, applied in England by Kirkman, who secured the sole right to use it here and made several instruments with it. The principle was original, the apparently sustained sounds being produced by reiterated blows of small hammers placed nearer the wrest-plank bridge than the striking place of the ordinary hammers, and

suspended by a bar above and crossing the strings.⁴

An important '*sostinente*' instrument was the claviol⁵ or finger-keyed violin, the invention of Dr. John Isaac Hawkins⁶ of Bordertown, New Jersey, U.S.A., an Englishman by birth, who invented the real upright pianoforte. This upright piano (called 'portable grand') and the claviol, which was in form like a cabinet piano, with ringbow mechanism for the *sostinente*, were introduced to the public in a concert at Philadelphia, by the inventor, June 21, 1802. Hawkins was in England in 1813 and 1814, exhibiting his claviol, and in the latter year complained of his idea being appropriated by others through the expiration of his patent. Isaac Mott's '*Sostinente Piano Forte*,' patented by him in 1817, was a further development of the idea, and is fully described in the patent, No. 4098. Mott claimed the power to increase or diminish the tone at will; and by rollers acting on silken threads, set in action by a pedal, the '*sostinente*' was brought into action or stopped. Mott's instrument had some success, he being at the time a fashionable pianoforte-maker. Another instrument of this period was Kaufmann's **HARMONICHORD** (*q.v.*).

In 1865 Hubert Cyrille Baudet introduced an instrument in Paris named '*Piano Quatuor*,' patenting it in England as piano violin. The strings were of wire as in the PF., but of greater thickness, there being only one to each note. The strings were vertical, and attached to a nodal, or nearly nodal, point of each was a piece of stiff catgut, projecting in front more than an inch. A roller, covered with fine linen and slightly rosined, was made to turn by means of treadles with great rapidity. Motion was communicated through the ties to the wires and their musical vibration excited. The impression on the ear was that of the tone of a violin.

A. J. H., with addns.

SOTO DE LANGA, FRANCISCO (*b.* Langa, near Osma, 1539; *d.* Rome, Sept. 25, 1619), Spanish priest and adapter of *Laude Spirituali*. He came to Rome at an early age and entered the Papal Choir as a soprano in 1562. Shortly afterwards he became one of the followers of St. Philip Neri, and eventually joined the congregation of the Oratorio. He still remained a member of the Papal Choir, of which he was dean for many years, but he sang at the Chiesa Nuova up to the end of his life, and preserved his voice to the age of 80.

Examples from Soto's collections of *Laude* are given by D. Alaleona, *Storia dell' oratorio musicale in Italia* (Turin, 1908), and E. J. Dent, *Proc. Mus. Ass.* xliii. (1916-17), 80 ff. He includes a great many folk-songs, as being

¹ Figured in Praetorius's *Theatrum instrumentorum*, 1620.

² Plenius is said to have been the first to attempt to make a pianoforte in England.

³ Formerly in the possession of A. J. H.

⁴ The mechanism was more fully described under *MELOPIANO* in earlier editions of this Dictionary. See also Hopkins, *History of the Pianoforte*.

⁵ For descriptions see *Rees's Cyclopaedia*, 1819; *Mechanic's Magazine*, 1846, No. 1160, p. 136.

⁶ See *Scribner's Magazine*, 1880.

well known and suitable for congregational singing, and has no objection to consecutive fifths; though he also uses tunes of a more sophisticated type. Again, the words of many of his hymns are nothing more than parodies *a lo divino* of secular poems; in the example quoted by Mitjana (*Encl. de la musique, Espagne*, p. 1987), 'Esclarecida Madre' is a sacred version of a Spanish villancico, 'Esclarecida Juana' (Bibl. Medinaceli, MS. 13,230). The originals of many of the Italian folk-songs used by him have also been identified. Soto was responsible for the musical part of the five books of 'Laude flippine':

Il primo libro delle laudi spirituali, a 3 v. Rome, 1583. (Rome, Vallicelliana; Berlin: B.M.)

Il secondo libro delle laudi spirituali, a 3 et a 4 v. Rome, 1583. (Rome, Vallicell.; Florence, Riccardiana; Berlin: B.M.)

Il terzo libro delle laudi spirituali, a 3 e 4 v. Rome, 1588. (Rome: Vallicell., Casanatense; Berlin: B.M.)

Libro delle laudi spirituali dove in uno sono compresi i 3 libri già stampati. (Florence, Istituto musicale; Bologna, Liceo: B.M.)

Il quarto libro delle laudi a 3 et 4 v. Rome, 1591. (Rome, Vallicell., Casanat.; Bologna, Liceo; Berlin; Brussels, Conservatoire; B.M.)

Il quinto libro delle laudi spirituali a 3 et 4 v. del Reverendo P. Francesco Soto. Ferrara, 1598. (Rome, Vallicell.; B.M.)

Other compositions or arrangements by Soto are to be found in Ancina's 'Tempio armonico' (Rome, 1599) and Arascione's 'Nuovi laudi ariose' (Rome, 1600). The statement that many of the Laude were composed by Palestrina is an invention of Baini. J. B. T.

SOTTO VOCE, 'under the voice,' in an undertone; a direction of frequent occurrence in instrumental as well as vocal music. M.

SOUBIES, ALBERT (b. Paris, May 10, 1846; d. there, Mar. 19, 1918), was educated at the Lycée Louis-le-Grand, but, after studying for the legal profession, he entered the Conservatoire, where he studied under Savard, Bazin and Guilmant. His first essay as a writer on music, a career in which he had remarkable success, was in the continuation of the *Almanach Duchesne* under the title of *Almanach des spectacles* (1874 onwards). His principal work was a history of music in a series of small volumes arranged under different countries: *Allemagne et Russie* occupy two volumes; *L'Espagne*, three more; *Le Portugal*, *La Hongrie et la Bohême*, three; *Suisse* and *Hollande*, one each; *Belgique*, two; *États scandinaves*, three; and *Îles britanniques*, two. *Les Grands Théâtres Parisiens* deals with the Comédie Française, the Opéra (for sixty-seven years), the Opéra-Comique (for sixty-nine years), the Théâtre Lyrique, 1851-70, and the Théâtre Italien. *Une Première par jour* was crowned, with other of Soubies's works, by the Opéra, and other non-musical books are in his list. His last work was *Les Membres de l'Académie des Beaux Arts depuis la fondation de l'Institut* (Paris, 1917). He collaborated with Ch. Malherbe in the *Histoire de l'Opéra-Comique* (1840-87), *Mélanges sur Richard Wagner*, *L'Œuvre dramatique de Richard Wagner*; with H. de Czuzon in *Documents inédits sur le Faust de Gounod* (1912); and in a

Précis de l'histoire de l'Opéra-Comique, the last under the name of B. de Lomagne. He wrote for the *Soir* from 1876, and for the *Revue de l'Art dramatique* from 1885, and was a frequent contributor to the *Guide musical*; the *Ménestrel*; *Encyclopédie de la musique et Dictionnaire du Conservatoire*. G. F.

SOUND-BOARD (SOUNDING-BOARD). (1) In the organ the sound-board is the upper portion of the wind-chest, upon which the pipes stand.

(2) In the pianoforte the sound-board is usually called the BELLY (*q.v.*).

SOUND-HOLES (*ff* HOLES) (Fr. *ouïe*; Ger. *Schallock*; Ital. *occhi*). The two apertures in the form of italic *f*'s which face one another in the tables of violins—and the instruments of that family—on either side of the bridge.

These exercise a powerful influence upon the tone, regulating as they do the entire system of vibrations of the various parts of the instruments, by governing the amount of air which is contained within the body. Scientific investigation has proved that the best tonal results are arrived at when the contained mass of air in the body of a violin answers to 512 vibrations (i.e. corresponding to *c''*; see PITCH), and for this reason that standard of vibration has been generally adopted by all good violin-makers since the days of Stradivarius, whose violins are perfect examples of this system. The principle, however, cannot be applied by way of extension to the viola, or violoncello, a fact which was proved by those large violoncellos made by 17th century *luthiers* in accordance with violin measurements by mere augmentation, all of which have had to be reduced in size. According to Savart¹ the pitch of the viola being a fifth below that of the violin, and an octave above the violoncello, the instrument should contain a mass of air answering to 341.33 vibrations (*f'*: a system, however, not generally followed); and the violoncello, being pitched a fifth plus an octave below the violin, should give 170.66 vibrations (*f*)—neither of which, again, can be said to be arbitrary laws.

Savart at first questioned the necessity of curved sound-holes, but his later experiments proved that any deviation from the *f* form, where the belly was arched, had a disastrous effect upon the tone of the instrument. He also tested the effect of dispensing with one sound-hole by covering it with paper, with the result that the tone was immediately diminished, and the note given by the contained mass of air was flattened. A similar effect is produced when the holes are too small; but when they are too large the vibratory note of the air rises. Practically the proportions of the *ff* holes must depend upon the dimensions, thickness, height, etc., of the instrument, and they must be cut in strict relation to these conditions.

¹ *Mémoire sur la construction des instruments à cordes et à archet*

Although an established form and position of the sound-holes did not exist until the latter half of the 16th century, still there are evidences that sound-holes were employed in very early times. The monochord attributed to Ptolemy (circa A.D. 139) was apparently provided with a circular sound-hole, like some of the guitars depicted in ancient Egyptian frescoes, which show small sound-holes pierced in the upper table, on either side of the strings. To-day those presumptive descendants of the original inhabitants of Egypt—the Berbers—monopolise a musical instrument called the 'kissar,' considered to be of very ancient origin, which has a circular sound-hole placed in the now generally adopted position. In the 9th century we find a figure from the MS. found by Gerber in the Monastery of St. Blasius in the Black Forest, and copied by him, which shows (Fig. 1) C-shaped sound-holes well placed, but from that time to the

FIG. 1.

16th century pictorial and sculptural representations afford evidence that the various small predecessors of the viol properly so called depended entirely upon the whim of their makers for the shape of their sound-holes. Some of the viol's forerunners had as many as six sound-holes pierced in their diminutive bodies, others had four, and others two, but none among them approached the form finally adopted by the violin-makers proper. At the beginning of the 16th century, makers began to show more dexterity in cutting the sound-holes, and even in the previous century some Italian makers had already come very near to realising their correct position. A glance at Fig. 2, reproduced from an early woodcut representation of a seven-stringed viol which ornaments the front page of the 'First Book of Songs' by 'Aurelius Augurellus Ariminensis' (Verona, 1491), a copy of which is in the library of the British Museum, will corroborate this statement. During the first half of the 16th century the woodcut illustrations of bow instruments which appeared in the works of Sebastian Virdung (*Musica getutscht*, 1511), of Martin Agricola (*Musica instrumentalis*, 1528), and of Hans Gerle (*Musica teusch*, 1532), show rebecs with the C-shaped sound-holes on either side of the strings—sometimes turned

inward and sometimes outward; also viols with a 'rose' in the centre and the C-shaped

FIG. 2.

known as the 'flaming sword.' Generally speaking, the true era of the f-shaped sound-hole began with Andreas Amati (Cremona, about 1520-80) and Gasparo da Salò (Brescia, 1542-1609), and was the outcome of the ceaseless pursuit of perfection which marked the period of the Renaissance. The C-shaped (Fig. 2) sound-holes, it

FIG. 3.

was observed, lacked grace, so makers began to twist them about until they assumed the greater elegance of form. An example of this progression is shown in Fig. 5, which is taken from a tenor viol on one of the carved screens of Cremona Cathedral, dating from the first part of the 16th century. This was a distinct step in the right direction; but neither Gasparo da Salò nor Andreas Amati could quite throw

aside the C-shape, and the first employed that form for some of his grand tenors. Gasparo da Salò's *ff* holes are very long and pointed, stiff

FIG. 4.

FIG. 5.

in appearance and parallel in position, while Andreas Amati's lack symmetry by reason of their being cut too wide. Gasparo's pupil Paolo Maggini (Brescia, 1590-1640), according to Savart's experiments, committed the same error, the muffled tone of his instruments being due to this cause, the contained volume of air within the body of his violins answering to the vibrations of middle D. The brothers Amati and Jerome's son Nicolas—who added a touch of boldness to his father's *ff*—put grace of design into their sound-holes, but robbed their violins of power by placing them too far apart on the table. The fallacies inherent to these first attempts were discovered and rectified by Antonius Stradivarius (Cremona, 1644-1737), whose graceful, converging *ff* holes are acknowledged to be perfect in form, position, proportion, and intent. Although Stradivari had an ingenious method for ascertaining the correct place for his *ff* holes on the belly of the violin, and fixed upon the main features of these, yet on no two of his instruments can the *ff* holes be called identical. The spontaneous feeling and charm which characterised the work of his predecessors, who knew neither template nor pattern, or at least did not employ them, were by him preserved with an added touch of necessary exactitude. He realised the efficacy of flatter surfaces and the influence exercised by the contained mass of air, and made his *ff* holes to suit these ruling factors with a resulting balance of parts impossible to surpass. Deviations from the form or position established by Stradivari have never proved satisfactory. What Joseph Guarnerius gained in power by his more heroic form of sound-hole—magnificent as it is in many cases—was at the sacrifice of the tone of the G string. The E A D of his violins are sonorous and brilliant, but the fourth string suffers from combined effects due to the excessive thickness of the plates and the size of the sound-holes. In these days the form and position of the sound-holes have reached a point of almost mechanical perfec-

tion. With the exception of the attempted innovations made by Savart and Chanot, the present *f* shape has retained its position unchallenged for quite 300 years.

SOUND-POST (Fr. *âme*; Ger. *Stimmstock*; Ital. *anima*), a small pillar of pine wood which stands vertically within the body of the violin and the other instruments of that family. Originally it was a mere structural precaution, brought about by the introduction of the higher pitch, and consequent greater pressure upon the table of the instrument; but it is in reality the centre round which the vibrations of the body of the instrument focus, and from which they proceed. This important tone-producing factor is made either of fine-grained Swiss pine or spruce wood, and it is placed so that the fibres of its wood run at right angles to those of the table. Closely fitting against the arching of the back and table of the instrument, it retains its position under, and slightly behind, the right foot of the bridge, and is kept in position solely by the pressure of the strings upon the table. Its length depends upon the depth between the back and table of the instrument for which it is intended, and its diameter is subject to slight alteration, according to the modelling. If the sound-post is too slight, the tone of the instrument in which it is placed will be relatively thin, and the opposite effect is produced where it is too thick. The correct position to be assigned to the sound-post is an important matter, as the smallest variation of position materially alters the tone. The extreme range over which it may be moved is comprised within an area of about a quarter of an inch. As a general rule, when the vibrations of the back of an instrument are sluggish and require to be accelerated before the highest quality of tone of which it is capable can be produced, the sound-post should be brought nearer the bridge; in a contrary condition of things it should be moved farther away; and high-built instruments require the sound-post nearer the bridge than do those of flatter model.

The interesting series of experiments made in connexion with the sound-post by Savart, and later by Huggins, have proved the following axioms:

(1) That the sound-post conveys the combined vibrations of the table and sides to the back of the instrument, controlling the action of these parts, and bringing them into unison and equilibrium with the contained mass of air in the body of the instrument.

(2) That the material of which the sound-post is made influences the tone of the

instrument, as was evidenced by Huggins's introduction of lead, and of sealing-wax, into the centre of the post, whereby the volume of tone was diminished greatly. A sheet of india-rubber firmly wedged in at the upper and lower end of the sound-post, when in position, influenced the tone in a still more disastrous manner.

(3) That the sound-post placed directly under the right foot of the bridge diminished the intensity of tone, rendering it as meagre in quality as it is when the sound-post is dispensed with; placed under the left foot of the bridge, on the same side as the bass-bar, similarly unsatisfactory results were produced.

The object of the sound-post, therefore, is not so much to convey the vibrations of any of the sections of the violin one to another, as to render the vibrations regular and consonant, and experiment has proved that these results are best obtained by placing the sound-post slightly behind the right foot of the bridge. This conclusion has been borne out by the fact that trial has shown the fallacy and inefficacy of all innovations such (to name but a few) as Petizeau's hollow glass sound-post (brought before the Academy of Sciences in Paris a few years ago); Haussel's broad, flat, thin sound-post (described in the *A.M.Z.*, 1881, p. 75); and P. Davidson's sound-post with drilled holes, together with such patents as David Herring's sound-post made elastic, so as to double the amplitude of the vibrations (No. 18,028); Simoutre's round-legged or oval sound-post (No. 11,936), and others to be found in the *Abridgements of Specifications relating to Music and Musical Instruments*, published by the Commissioners of Patents. E. H.-A.

SOUPİR (a sigh), the French name for a crotchet rest. A quaver rest is called *un demi-soupír*; a semiquaver ditto, *un quart de soupír*, and so on. G.

SOURDINE, (1) an obsolete instrument of wood, with a small cylindrical bore, played with a double reed. The larger instruments of this family had two parallel tubes arranged much in the same way as those of the bassoon, and were furnished with several keys, as well as six finger-holes. The CURTAL (q.v.) was a very similar if not an identical instrument. D. J. B.

(2) See MUTE.

ŠOUREK, OTAKAR (b. Prague, 1883), musical critic of *Lidové Noviny* and *Venkov* (1919). An engineer by training, Šourek has devoted his literary energies chiefly to Dvořák and his work. His thematic catalogue of the works of Dvořák (Simrock) has been very useful in setting right the chronological errors which have accumulated round this musician's

compositions on account of the publishers having given them fictitious opus numbers. His numerous articles in the *Hudební Revue* and the *Listy Hudební Matice* are most important to the student of Dvořák's music. *The Life and Works of Antonín Dvořák*, of which two vols. have appeared (*Hudební Matice*, Prague), is the most detailed and authoritative book on the subject, and doubtless it will be translated from the Czech when completed by a third volume. Dr. Šourek has written the article on Dvořák for the present edition of this Dictionary. R. N.

SOUSA, JOHN PHILIP (b. Washington, D.C., U.S.A., Nov. 6, 1856), American bandmaster and popular composer. In 1880 he became the leader of the band of the U.S. Marine Corps. In 1892 his band was formed. Sousa's compositions include numerous comic operas, but it is by his marches that he is best known. W. S. S.

SOUTH PLACE SUNDAY CONCERTS.

A series of weekly concerts which for 6 or 7 months each winter enables music-lovers in London (especially the poorer ones) to hear the masterpieces of chamber music adequately performed by first-rate artists, the funds being provided by collections among the audience. Originally the Finsbury branch of the PEOPLE'S CONCERT SOCIETY (q.v.), the South Place Institute, was asked to take over the work in 1887. This was done with remarkable success, thanks to an energetic committee, and to the indefatigable exertions of A. J. Clements, the secretary, who has kept in touch with the most competent instrumentalists in or visiting London. About 1000¹ Sunday concerts have been given, and there is every prospect of a continuance of the work for an indefinite period, though not necessarily at South Place.

The chamber music of all periods and all schools has been placed before the public with remarkable completeness. On rare occasions the South Place Orchestral Society, an amateur organisation conducted by R. H. Walthew, has given performances; but chamber music has been the staple fare, with the addition of songs and instrumental solos. A salient feature has been the devotion of special evenings to the music of one composer, chiefly on the occasion of an anniversary or centenary celebration. In this way the following composers have been honoured: Haydn, Mozart, Beethoven, Bach, Schubert, Brahms, Schumann, Dvořák, Richard Strauss, Robert Fuchs, Parry, Stanford, Walford Davies, R. H. Walthew and Elgar. Modern British music has been represented, the programmes including the phantasies associated with the Cobbett Competitions (see COBBETT and FANCY), attention being also given on special evenings to modern French, Scandi-

¹ The 1000th concert was given on the 40th anniversary of the first concert, Feb. 20, 1927.

navian and Slavonic music. The name of the artists performing is legion, and all have given their services for a merely nominal fee. Exceptional mention should be made of the late John SAUNDERS, a violinist and quartet leader, who is the subject of a special notice. w. w. o.

SOWERBY, LEO (b. Grand Rapids, Michigan, May 1, 1895), American pianist and composer. Educated at the American Conservatory of Music in Chicago, he subsequently became a teacher in that institution. During the Great War he served as bandmaster with the American forces in England and in France. In 1922 he was awarded the American Prix de Rome. In the United States he has been soloist with various orchestras; he has also given recitals in London and in Italy, and in 1923 he took part in the Salzburg (contemporary music) Festival. His compositions include:

Pianoforte concerto; ballad for two pianos and orchestra; an orchestral suite, 'From the Northland,' and other orchestral pieces; chamber music; pieces for organ and pianoforte; and choral compositions. He has also written a 'Sincronata' for jazz orchestra.

W. S. S.

SPAGNOLETTI, P. (b. Cremona, 1768¹; d. London, Sept. 23, 1834), violinist, who held the post of leader of the King's Theatre orchestra for nearly thirty years. According to some MS. notes sent by the late George Bently—who was acquainted with some of Spagnoletti's relatives—to Dr. T. Lamb Phipson in 1877, this artist's real name was Paolo Diana. At the age of twelve he was introduced to the director of the Naples Conservatorio as a very promising pupil, whereupon the director placed an elaborate composition before the young aspirant, who, it is said, astonished his auditors by glancing at the printed sheet for a few moments, and then playing the piece through with the music turned upside down before him. About 1802 he was brought to London by the celebrated tenor Vagnoni, who heard him play at Milan, and shortly after, he was engaged as second violin in the King's Theatre orchestra. In 1812 he was leading the orchestra at the Pantheon, where Italian Opera was being played, under the patronage of many of the nobility who had become disgusted with the management of the King's Theatre. The following year with the establishment of the Philharmonic, Spagnoletti became one of the first thirty-eight Associates of that Society, and led a septuor with Vaccari, Lindley, Hill, Petuder, Cramer and Holmes, at one of the first of the season's concerts on Apr. 19, 1813. In 1817 he was leader of the King's Theatre orchestra, and his services were requisitioned by nearly every important orchestral society in London. At the Lenten Oratorios at the King's Theatre, at the Ancient Concerts, at the Philharmonic, at the R.A.M. concerts in the Hanover Square Rooms, at numberless benefit concerts during the season, Spagnoletti in-

variably led the orchestra, besides which he frequently led quartets at the Philharmonic, and gave a benefit concert in the Argyll Rooms each year. Frequent notices of his performances, 'which were characterised by an excellent and spirited attack,' appear in the *Harmonicon* between the years 1823 and 1833. When Paganini came to London in 1831, the management proposed to engage another leader for his concerts; but when Paganini heard of this, he immediately demanded that Spagnoletti should be engaged for all his performances, accompanying his request with a well-merited compliment on his abilities. This occasioned some unpleasant feeling between the leader and Laporte, especially when the latter underpaid Spagnoletti for his services at thirteen Paganini concerts. A law-suit ensued, and a letter from Spagnoletti on the subject appeared in the *Harmonicon* of that year. Spagnoletti was of a modest, retiring disposition, and so ardently devoted to his art that he invariably put it before all private interests, the result of which was his acknowledged pre-eminence as an orchestral leader rather than as a virtuoso.

One of his last appearances—if not his last—was at Alsager's Queen's Square Select Society on Mar. 28, 1834, some months before his death, when he led the first performance of Cherubini's Requiem in England. For several years he had been in a delicate state of health, owing to two severe strokes of paralysis, and it was a third seizure which deprived him of speech and the use of one side of his body, and to which he eventually succumbed. He was buried beside Madame Spagnoletti in Brompton Cemetery, but all trace of the grave-stone which marked the place where he rested has disappeared. Spagnoletti's favourite violin was a Joseph Guarnerius of excellent tone but poor preservation. It eventually became the property of the late Sir Howard Elphinstone, V.C., at one time comptroller to the household of H.R.H. the Duke of Edinburgh. An engraving of Spagnoletti and Lindley was published by Sharp, after a picture by Mrs. Wigley of Shrewsbury, in 1836. He composed various rather unimportant violin pieces and some songs.

SPALDING, ALBERT (b. Chicago, Aug. 15, 1888), American violinist and composer. After study of the violin at the Bologna Conservatorio and in Paris under Lefort, he made his début in Paris in 1905. Following numerous European appearances, his New York début was made with the New York Symphony Society in 1908, and in 1920 he was soloist in that orchestra's first European tour. In 1917-19 he served with the American Expedi-

¹ Not, as Q.-L. says, in 1761.

tionary Forces as artillery observation-officer in France and Italy. Since then he has toured in Europe and America, playing with the leading orchestras of both continents.

Spalding was the first American violinist to play at the regular concerts of the Société des Concerts du Conservatoire in Paris (1922), and the first American to be a member of the jury awarding the prize in the graduating violin class of the Conservatoire (June, 1923).

Besides 2 violin concertos, an orchestral suite and a violin sonata that are unpublished, Spalding's compositions include :

String Quartet, E minor, op. 10.
'Richiaggi,' Theme and Improvisation for violin and pianoforte.
Suite, C major, violin and pianoforte.
Pianoforte pieces, songs, many violin pieces and transcriptions.

W. S. S.

SPANGENBERG, (1) JOHANNES (b. Hargedgen, Hanover, Mar. 30, 1484; d. Eisleben, June 13, 1550); first Protestant pastor of Hargedgen, 1521; preacher at Nordhausen, 1524; from 1546 superintendent at Eisleben. He published Lutheran church songs; also a little book on musical theory for use at the school of Nordhausen; (2) CYRIAK, son of the former (b. Nordhausen, Jan. 17, 1528; d. Strassburg, Feb. 10, 1604), wrote an important work on the Meistersinger, *Von der edlen hochberühmten Kunst der Musica*, etc., republished by Ad. v. Keller, 1861; also the 'Eislebener Gesangbüchlein,' 1568 (7 melodies republished by Zahn); a Psalter (1582); and school-dramas (*Q.-L.*; *Riemann*).

SPANO, DONAT ANTONIO, of Naples, early 17th century, a pupil of Giov. de Macque, under whose supervision he composed, *Madrigaletti ariosi*, e vilanelli 4 v. (1607); 1 lib. de Madrigali 5 v. (1608).

SPARK, (1) WILLIAM, Mus.D. (b. Exeter, Oct. 28, 1823; d. Leeds, June 16, 1897), son of a lay-vicar of Exeter Cathedral, became a chorister there, and in 1840 was articled for five years to Dr. S. Sebastian Wesley. On Wesley's leaving Exeter for the Parish Church, Leeds, his pupil went with him, and soon became deputy-organist of the parish church, and organist of the churches of Chapeltown and St. Paul's successively. He was next chosen organist to Tiverton, Devon, and Daventry, Northampton; and on Wesley's removal to Winchester, in 1850, was appointed to St. George's Church, Leeds. His activity in Leeds, outside his own parish, was remarkable. Within a year of his appointment he founded the Leeds Madrigal and Motet Society, and the People's Concerts, held in the Town Hall, just then built. Municipal business had long required a new Town Hall, the central portion of which has ever since served the city for its chief concert-room. The organ was built by Gray & Davison, from the designs of Henry Smart and Spark. The hall was opened Apr. 1, 1859, and after a severe competition Spark was elected

the Borough organist, a post he held until his death. He took his degree of D.Mus. at Dublin in 1861. In 1869 he started the *Organists' Quarterly Journal* (Novello). It was followed by the *Practical Choir-master* (Metzler), and in 1881 by a biography of Henry Smart (Reeves, 8vo). *Musical Memoirs* (1888), and *Musical Reminiscences* (1892), contain an amusing picture of his time, and he did good work in many Yorkshire towns as a lecturer on music. He also published three cantatas, various anthems, services, glees, and other compositions.

His brother, (2) FREDERICK ROBERT (b. Feb. 26, 1831; d. Nov. 14, 1919), became editor and publisher of the *Leeds Express* in the fifties. He was officially connected with the Leeds Festival from its beginning in 1858, being honorary secretary from 1877. After the festival of 1907 he retired from active service, and was presented with a portrait of himself painted by Sir George Reid. He was joint author, with Joseph Bennett, of *A History of the Leeds Musical Festivals 1858-89* (1892).

G.; addns. F. K.

SPATARO (SPADARO SPADARIUS), GIOVANNI (b. Bologna, c. 1458; d. there, 1540), maestro di cappella of S. Petronio, which post he held from 1512 till his death. He was a learned musical theoretician, a pupil of Ramis de Pareira, whom he supported in his controversies with Gafurius and Burtius. Apart from controversial writings he published a treatise on the fifth (1531). Of his compositions only one Mass is still in existence (*Q.-L.*; *Riemann*).

SPAZIER, JOHANN GOTTLIEB KARL (b. Berlin, Apr. 20, 1761; d. Leipzig, Jan. 19, 1805), much esteemed in his time as the composer of 4-part and solo songs. He was founder and editor of the *Berlinische musikalische Zeitung* (1793); contributor to the *Leipziger allgemeine Musikzeitung* and author of a number of pamphlets on musical subjects (*Riemann*).

SPEAKER-KEYS. On wind instruments of the reed family, certain keys are fitted to facilitate the production of harmonics. These are known as 'speaker-keys.' Two are usually supplied on the oboe, and one on the clarinet, giving octaves on the one instrument and twelfths on the other. These keys open small holes by which the continuity of the air-column is broken, and the setting up of a 'loop,' or point of least variation of pressure, is made easy.

D. J. B.

SPEAKING-LENGTH. The pitch of the ordinary open flue-pipe on the organ is chiefly determined or controlled by the length of the portion above the mouth of the pipe, which is called the 'speaking-length.' Instances, however, occur in which the speaking-length differs from the true open flue length. See STOPPED PIPE; HARMONIC STOPS; DIAPASONS. T. E.

SPECIFICATION. The working specifica-

tion of an organ consists of a detailed description of the stops, materials, pipes, action movements, etc., and the method of procedure requiring to be followed in building the instrument.

T. E.

SPEE, FRIEDRICH (of the noble house von LANGENFELD) (*b.* Kaiserswerth-on-the-Rhine, Feb. 25, 1591; *d.* Trier, Aug. 7, 1635), a Jesuit; was a poet and probably also composer of the famous book of songs, 'Trutznachtigall oder geistlich-poetisches Lustwäldlein,' which since 1649 has appeared in a great many editions, the text also in Reclam's *Universal Bibliothek*; he also wrote 'Güldenes Tugendbuch' (1645, 1656), 28 songs.

E. v. d. s.

SPEER, (1) CHARLTON T. (*b.* Cheltenham, Nov. 21, 1859; *d.* Oct. 27, 1921). In 1873 he entered the R.A.M., winning the Sterndale Bennett Scholarship; for some time he studied composition under Sir George Macfarren, the piano under Walter Macfarren, and the organ under Dr. Steggall; in 1885 he became professor of piano-playing at the R.A.M. He held several posts as organist, and in 1899 became honorary organist and director of music at the parish Church, Sutton. His compositions include operas 'Odysseus,' 'Zara' and 'Helen,' with works for chorus and orchestra, of which 'The Battle of Lake Regillus' is perhaps the best known. He also wrote a symphonic poem ('King Arthur') and an overture in C, a ballade 'Guinevere,' a suite 'Cinderella,' and other works for orchestra, besides songs, piano pieces and church music.

(2) WILLIAM HENRY (*b.* London, Nov. 9, 1863), cousin of the above, studied under Dr. C. H. Lloyd when the latter was organist of Gloucester Cathedral, and subsequently entered the R.C.M., where he studied the organ under Sir Walter Parratt and composition under Sir Charles Stanford. At the age of 18 he went to Trinity College, Cambridge, took the M.A. and Mus.B. degrees in 1890, and the Mus.D. in 1906. He held more than one organist's post before 1903, when he was appointed to that at the parish church, Bexhill. Of his compositions the best known is 'The Jackdaw of Rheims,' a ballad for chorus and small orchestra, which has been performed by many choral societies in this country, and also in British Columbia. His cantata 'The Lay of St. Cuthbert' was produced in London (Queen's Hall) by the Edward Mason Choir in 1912. His orchestral works include a rhapsody in E \flat , a festival overture, and a symphony in E \flat , all of which were produced at the Bournemouth Symphony Concerts. He has also written a number of songs, and a string quartet in B \flat was first heard at the British Chamber Music Concerts in 1894 (see *B.M.S. Ann.*, 1920).

G. S. K. B., with addns.

SPEER, DANIEL (*b.* Breslau between 1620-1625), town-musician at Breslau; in 1680

cantor at Göppingen; in 1688-89 imprisoned for political publications; in 1692 cantor at Waiblingen. He composed a number of sacred partsongs, with organ, and some also with instruments. (See list in *Q.-L.*)

SPENCER DYKE STRING QUARTET, THE. This Quartet (composed of the following artists, all of British nationality: Spencer Dyke (*b.* 1880), leader; Edwin Quaife (*b.* 1889), 2nd violin; Ernest Tomlinson (*b.* 1879), viola; and B. Patterson Parker (*b.* 1871), violoncello) made its first appearance on Jan. 26, 1920, three of the party having played together in other quartets since 1900. A perfect ensemble results from this constant association, an annual series of recitals of quartet music forming a very attractive feature of London musical life.

First performances have been given of works by Herbert Howells, York Bowen, J. B. M'Ewen, Jaques-Dalcroze, L. Durey and others.

W. W. C.

SPENDIAROV, ALEXANDER (*b.* Kharkov, 1871), composer, at present (1926) living in the Crimea, was a pupil of Rimsky-Korsakov, and was accounted one of his close disciples. His compositions include: a concert-overture, op. 4; Crimean Sketches, op. 9; a memorial cantata to the art critic Vladimir Stasov; and many songs. His best-known work, the symphonic picture 'The Three Palm Trees' (op. 10), based upon a poem by Lermontov, was introduced to this country by Sir Henry J. Wood, at a Promenade Concert, Sept. 4, 1917.

R. N.

SPEYER, JOHANN MATHIAS (*d.* Ludwigs-lust, May 13, 1812), a contrabass player, who served in the chapels of Cardinal Batthyanyi, in 1780, of Prince Esterhazy (under Haydn), and from 1787 of the Duke of Mecklenburg at Ludwigs-lust. He composed motets, cantatas, symphonies, concertos, divertimenti, quartets, trios, sonatas, etc., mostly in MS. (*Q.-L.*; *Riemann*).

SPEYER, WILHELM (*b.* Frankfort-on-the-Main, June 21, 1790; *d.* there, Apr. 5, 1878), composer. He received his musical education at Offenbach under Thieriot (the friend of Weber) and André. He was already a prominent violinist when he went to Paris in 1812, to become a pupil of Baillot, from whose instruction and from the acquaintance of such men as Cherubini, Boieldieu, Méhul, etc., he derived much benefit. Returning to Germany afterwards, he settled down at Frankfort and exchanged the musical profession for that of a merchant, but continued to compose—at first chiefly chamber music. He published string quartets and quintets, and also violin duets, which last became widely popular. He afterwards devoted himself chiefly to vocal music. Amongst his *Lieder*—of which he published several hundred—many, such as 'The Trum-

peter,' 'Rheinsehsucht,' 'Die drei Liebchen,' etc., acquired great popularity. He also wrote vocal quartets and some choral works. G.

SPIANATO (Ital.) = 'level,' 'even.' A word used by Chopin in the Andante which precedes the Polonaise in E \flat , op. 22, to denote a smooth and equal style of performance, with but little variety. F. T.

SPICCATO (Ital.) = 'separate,' 'distinct.' The term is applied to a type of staccato bowing on instruments of the violin family, chiefly used for the execution of quick passages formed of notes of equal duration, e.g.

HAYDN. Quartet, Op. 64, No. 5.

The middle of the bow is used and a spring is obtained by a loose movement of the wrist.

SPIES, HERMINE (b. Löhnberger foundry, near Weilburg, Nassau, Feb. 25, 1857; d. Wiesbaden, Feb. 26, 1893), daughter of the resident manager. She was taught singing by Frau Fichtenberg at the Conservatorium of Wiesbaden, by Sieber at Berlin, and by Stockhausen at Frankfort. In July 1880, while still a student, she sang at the Mannheim Festival, and in 1882 she made her début at a concert at Wiesbaden; in 1883 she sang in concerts at Leipzig, Berlin, etc., speedily establishing her reputation as an excellent mezzo-soprano or contralto singer. She also sang in Austria, Hungary, Holland, Denmark and Russia. On June 3, 1889, she made her début in England at St. James's Hall at a Richter Concert, when she sang 'Che farò' and Lieder of Schubert, Schumann and Brahms. She attracted immediate attention on account of her fine voice and her excellent phrasing, expression and general intelligence. She confirmed her success at her two recitals in a selection of Schumann's 'Dichterliebe,' etc., also at the Philharmonic, where she sang in English Handel's 'Return, O God of hosts,' etc. In 1892 she married Dr. W. A. F. Hardtmuth, of Wiesbaden, a doctor of jurisprudence, and died the following year. She was unrivalled in her singing of the contralto part in Brahms's Rhapsody, op. 53, and in the Lieder of the same composer. A memoir by her sister, Minna Spies, appeared in 1894. A. C.

SPIESS, MEINRAD (b. Housolgen, Suabia, Aug. 24, 1683; d. monastery of Yrsee, Bavarian Suabia, July 12, 1761), prior of the monastery at Yrsee at the time of his death. He studied music under Gius. Ant. Bernabei at Munich; from 1712-49 was musical director at Yrsee; and from 1743 member of Mizler's 'Society of Musical Sciences.' He composed masses, Requiems and other church music; 12 trio sonatas for violins, violoncello and organ, and a theoretical treatise (*Riemann*; Q.-L.).

SPINA, CARL ANTON, the successor of the

Diabelli in that famous publishing house at Vienna, which for so long stood in the Graben, No. 1133, at the corner of the Bräunerstrasse. He succeeded them in 1852, and was himself succeeded by F. Schreiber in July 1872 (see **DIABELLI**). During that period Spina's activity showed itself especially in the publication of Schubert's works, a mass of whose MSS. he acquired from Diabelli. Chief among these were the octet, quintet in C, quartets in D minor, G, and B \flat ; the overture in the Italian style, those to 'Alfonso und Estrella,' 'Fierrabras,' 'Rosamunde,' with entr'actes in B minor and B \flat ; the B minor symphony, sonata for PF. and arpeggione, etc., all in score. Spina's enthusiasm for Schubert was not that of a mere publisher, as the writer from personal experience of his kindness can testify. It was he who allowed the Crystal Palace Company to have copies of several of the orchestral works for playing, long before there was sufficient public demand to allow of their being published. G.

SPINACCINO, FRANCESCO, a 15th-16th century lutenist of Fossombrone; author of 4 books in lute tablature containing arrangements of songs, ricercari and dances by himself and other masters; only a few of the latter are named, among whom Josquin appears once or twice. Books 1 and 2 were published by Petrucci in 1507; Book 4 in 1508; Book 3 is unknown. There is a bass-dance in a 16th-century MS. lute-book, Vienna Hofburg lib. (Q.-L.).

SPINDLER, FRITZ (b. Wurzbach, Lobenstein, Nov. 24, 1817; d. Niederlössnitz, near Dresden, Dec. 26, 1905), pianoforte-player and composer for that instrument, was a pupil of F. Schneider of Dessau, and was for many years resident in Dresden. His published works are more than 330 in number, the greater part brilliant drawing-room pieces, but amongst them much teaching-music, and some works of a graver character—trios, sonatinas, two symphonies, concerto for PF. and orchestra, etc. Favourite pieces in their day were—'Wellenspiel' (op. 6); 'Schneeglöcklein' (op. 19); 'Silberquell' (op. 74); 'Husarenritt'; six dance themes; transcriptions of 'Tannhäuser' and 'Lohengrin.' G.

SPINET (Fr. *épinette*, *clavicorde*; Ital. *spinetta*, *clavicordo*; Span. *clavicordio*; Eng. *spinet*, *virginal*). A keyed instrument, with plectra or jacks, used in the 16th, 17th and 18th centuries; according to Burney¹ a small harpsichord or virginal with one string to each note.

DERIVATIONS.—The following definitions are from Florio's *New World of Words*, 1611: '*Spinetta*, a kind of little spina . . . also a paire of Virginales'; '*Spinettegiare*, to play upon Virginales'; '*Spinetto*, a thicket of

¹ *Rees's Cycl.* 1819, *Harpsichord*.

brambles or briars.'¹ We first meet with the derivation of spinet from *spina*, a 'thorn,' in Scaliger's *Poetices* (1484-1550; lib. i. cap. lxiii.). Referring to the plectra or jacks of keyed instruments, he says that, in his recollection, points of crowquill had been added to them, so that what was named, when he was a boy, 'clavicymbal' and 'harpichord' (*sic*), was now, from these little points, named 'spinet.' (See JACK.) He does not say what substance crowquill superseded, but we know that the old cithers and other wire-strung instruments were twanged with ivory, tortoiseshell, or hard wood. (See HARSICHOED, Vol. II. p. 544.) Another origin for the name has been discovered, to which we believe that Signor Ponsicchi² was the first to call attention. In a very rare book, *Conclusioni nel suono dell' organo, di D. Adriano Banchieri Bolognese* (Bologna, 1608), is this passage:

'Spinetta riceve tal nome dall' inventore di tal forma longa quadrata, il quale fù un maestro Giovanni Spinetti, Venetiano, ed uno di tali stromenti hò veduto io alle mani di Francesco Stivori, organista della magnifica comunità di Montagnana, dentrovi questa inscrizione: JOANNES SPINETUS VENETUS FECIT. A.D. 1503.'

According to this, the spinet received its name from Spinetti, a Venetian, the inventor of the oblong form, and Banchieri had himself seen one in the possession of Stivori, bearing the above inscription. Becker of Geneva³ regards this statement as totally invalidating the passage from Scaliger; but this is not necessarily so, since the year 1503 is synchronous with the youth of Scaliger. The invention of the crowquill points is not claimed for Spinetti, but the form of the case—the oblong or table shape of the square piano and older clavichord, to which Spinetti adapted the plectrum instrument; it having previously been in a trapeze-shaped case, like the psalter, from which, by the addition of a keyboard, the instrument was derived. (See VIRGINAL; and also for the different construction and origin of the oblong clavichord.) Putting both statements together, we find the oblong form of the Italian spinet, and the crowquill plectra, in simultaneous use about the year 1500. Before that date no record has been found. The oldest German writers, Viridung and Arnold Schlick, whose essays appeared in 1511, do not mention the spinet, but Viridung describes and gives a woodcut of the virginal, which in Italy would have been called at that time 'spinetta,' because it was an instrument with plectra in an oblong case. Spinetti's adaptation of the case had therefore travelled to Germany, and, as we shall presently see, to Flanders and Brabant, very early in the 16th century; whence Becker conjectures that 1503 represents a late date for Spinetti, and that we should put his invention back to the

second half of the 15th century, on account of the time required for it to travel, and be accepted as a normal form in cities so remote from Venice.

EARLY SPECIMENS.—Considerable light has been thrown upon the hitherto profoundly obscure invention of the keyboard instrument subsequently known as the spinet, by Edmond van der Straeten. He quotes⁴ from a testamentary inventory of musical instruments which had belonged to Queen Isabella, at the Alcazar of Segovia, dated 1503: 'Dos Clavicinbanos viejos' that is to say, two old clavecins (spinetes). One of her chamberlains, Sancho de Paredes (p. 248), owned in 1500 'Dos Clabiorrganos'—two claviorgans or organised clavecins. In a previous inventory, dated 1480 (and earlier), the same chamberlain appears to have possessed a manicorde or clavichord with tangents. But van der Straeten is enabled to give a positive date, 1387 (p. 40, *et seq.*), when John the First, King of Aragon, had heard and desired to possess an instrument called 'exaquir,' which was certainly a keyboard stringed-instrument. He describes it later on as resembling an organ but sounding with strings. The name 'exaquir' may be identified with 'l'eschuaqueil d'Angleterre,' which occurs in a poem entitled 'La Prise d'Alexandrie,' written by Guillaume de Machaut in the 14th century. Van der Straeten inquires if this appellation can be resolved by 'échiquier' (chequers) from the black and white arrangement of the keys. The name échiquier occurs in the romance 'Chevalier du cygne' and in the 'Chanson sur la journée de Guinegate,' a 15th-century poem, in which the poet asks to be sounded—

'Orgius, harpes, naquaires, challemeilles,
Bons echiquiers, guisternes, doucemeilles.'

The inquirer is referred to the continuance of van der Straeten's notes on this interesting question, in the work above mentioned. It is here sufficient to be enabled to prove that a kind of organ sounding with strings was existing in 1387—and that clavecins were catalogued in 1503, that could be regarded as old; also that these dates synchronise with Ambros's earliest mention of the clavicymbalum, in a MS. of 1404.

Van der Straeten⁵ has discovered the following references to the spinet in the household accounts of Margaret of Austria:

'A ung organiste de la Ville d'Anvers, la somme de vi livres auquel madite dame en a fait don en faveur de ce que le xve jour d'Octobre xv. xxii [1522] il a amené deux jeunes enfans, filz et fille, qu'ils ont joué sur une spinette et chanté à son dîner.

'A l'organiste de Monsieur de Flenes, sept livres dont Madame lui a fait don en faveur de ce que le second jour de Décembre xv. xxvi [1526] il est venu jouer d'un instrument dit spinette devant elle à son dîner.'

The inventory of the Château de Pont d'Ain,

² *Il pianoforte*, Florence, 1878.

³ *Revue et Gazette musicale*, in the *Musical World*, June 15, 1878.

⁴ *La Musique aux Pays-Bas*, vol. vii. p. 246 (*Les Musiciens néerlandais en Espagne*, 1re partie), Brussels, 1885.

⁵ *La Musique aux Pays-Bas*, vol. i.

1531, mentions 'una espinetta cum suo etuy,' a spinet with its case; meaning a case from which the instrument could be withdrawn, as was customary at that time. Becker transcribes also a contemporary reference from the Munich Library:

'Quatorze Gaillardes, neuf Pavannes, sept Bransles et deux Basses-Dances, le tout reduit de musique en la tablature du l'eu [leu] Dorgues, Espinettes, Manichordons et telz semblables instruments muséaux, imprimées à Paris par Pierre Attaignant MDXXXIX.'

The manichord was a clavichord. Clement Marot (Lyons, 1551) dedicated his version of the Psalms to his countrywomen:

'Et vos doigts sur les Espinettes,
Pour dire Saintes Chansonnettes.'

With this written testimony we have fortunately the testimony of the instruments themselves, Italian oblong spinets (*spinetta a tavola*), or those graceful pentangular instruments, without covers attached, which are so much prized for their external beauty. Miss Marie Decca owned¹ a Rosso spinet dated 1550, and there is another by the same maker (signed Annibalis Mediolanensis) dated 1569, recently in the possession of H. Kohl, Hamburg, who obtained it from the palace of the San Severino family, at Crema, in Lombardy. These spinets are usually made entirely of one wood, the sound-board as well as the case. The wood appears to be a kind of cedar, from its odour when planed or cut, at least in some instances that have come under the writer's notice. The next oldest bearing a date is in the Conservatoire at Paris, by Francesco di Portalupis, Verona, 1523. The next by Antoni Patavini, 1550, is at Brussels. In the Bologna Exhibition, 1888, Historical Section, was shown a spinet bearing the inscription 'Alessandro Pasi Modenese,' and a date, 1490. It was exhibited by Count L. Manzoni. It is a true Italian spinet in a bad state of repair. The date, which has been verified, does not invalidate the evidence adduced from Scaliger and Banchieri concerning the introduction of the spinet, but it places it farther back and before Scaliger (*b.* 1484) could have observed it. There are at S. Kensington two by Annibal Rosso of Milan, 1555 and 1577, and one by Marcus Jadra (Marco dai Cembali; or dalle Spinette), 1568.² Of the date 1568 is also a virginal, or *spinetta tavola*, from the collection of Terme de Liège and now (1927) in the Victoria and Albert Museum. It had belonged originally to the family of Anne of Cleves; its compass is A-f^{'''}. It has boxwood keys, but the arrangement of the short octave is uncertain, as the lowest note may be G, F, or A. Kraus had, at Florence, two 16th-century spinets, one of which is signed and dated, Benedictus Florianus, 1571 (see *PLATE CX*).

¹ Ownership ascertained on publication of the 2nd edition of this Dictionary.

² A spinet in the Dublin Museum of Science and Art, which A. J. Hipkins described in his *History of the Pianoforte*, p. 60, as dated 1590, and the work of Domenico da Pesaro, has since been discovered to be by Francesco da Brescia and to bear the much earlier date 1564.

W. H. G. P.

No. 3); and at the Hôtel Cluny, Paris, there is one by the Venetian Baffo, date 1570, whose harpsichord (clavicembalo) at S. Kensington is dated 1574.

For the pentangular or heptangular model with the recessed keyboard, it is probable that we are indebted to Annibal Rosso, whose instrument of 1555 was engraved here in preceding editions. Carl Engel reprinted in the S. Kensington Catalogue (1874, p. 273) a passage from *La nobilita di Milano* (1595), which he thus renders:

'Hannibal Rosso was worthy of praise, since he was the first to modernise clavichords into the shape in which we now see them,' etc.

The context clearly shows that by 'clavichord' spinet was meant, *clavicordo* being used in a general sense equivalent to the German *Clavier*. If the modernising was not the adoption of the beautiful forms shown in the splendid examples at South Kensington—that by Rosso, of 1577, having been bought at the Paris Exhibition of 1867 for £1200 on account of the 1928 precious stones set into the case—it may possibly have been the wing-form, with the wrestpins above the keys in front, which must have come into fashion about that time, and was known in Italy as the *spinetta traversa*; in England as the Stuart, Jacobean or Queen Anne spinet, or couched harp. There is a very fine *spinetta traversa*, emblazoned with the arms of the Medici and Compagni families, in the Kraus Museum (1878, No. 193). Praetorius illustrates the Italian spinet by this special form, speaks³ of larger and smaller spinets, and states that in the Netherlands and England the larger was known as the virginal. The smaller ones he describes as 'the small triangular spinets which were placed for performance upon the larger instruments, and were tuned an octave higher.' Of this small instrument there are specimens in nearly all museums; the Italian name for it being 'ottavina' (also 'spinetta di serenata'). We find them fixed in the bent sides of the long harpsichords, in two remarkable specimens; one of which, by Hans RUCKERS (*q.v.* Vol. IV. p. 474), is preserved in the Schloss Museum, Berlin (there is a painting of a similar double instrument inside the lid); the other is in the Maison Plantin, Antwerp, and was made as late as 1734-35, by Joannes Josephus Coenen at Ruremonde in Holland. In rectangular instruments the octave one was removable, as it was in those double instruments mentioned under RUCKERS, so that it could be played in another part of the room.

COMPASS AND SHORT OCTAVES.—According to Mersenne,⁴ who treats of the spinet as the principal keyed instrument, there were three sizes: one of 2½ feet, tuned to the octave of the

³ *Organo-graphia*, Wolfenbüttel, 1619.

⁴ *Harmonie*, 1636, liv. 3, p. 101, etc.

'ton de chapelle' (which was about a tone higher than our old 'Philharmonic' or high concert pitch); one of $3\frac{1}{2}$ feet, tuned to a fifth above the same pitch; and the large 5-foot ones, tuned in unison to it. We shall refer to his octave spinet in another paragraph.

The compass of the 'ottavine' was usually from E to c''', three octaves and a sixth (a); of the larger 16th-century Italian spinette, four octaves and a semitone, from E to f''' (b). The French *épinettes* of the 17th century were usually deeper, having four octaves and a semitone from B to c''' (c).

The reason for this semitonal beginning of the keyboard is obscure unless the lowest keys were used for 'short octave' measure, an idea which suggested itself simultaneously to the writer and to Professor A. Kraus, whose conviction is very strong as to the extended practice of the short octave arrangement. The Flemish picture of St. Cecilia, in Holyrood Palace, shows unmistakably a short octave organ keyboard as early as 1484.¹

Fortunately, we are not left to such suggestion for the spinet short octave. Mersenne,² describing his own spinet, which, according to him, was one of the smallest in use, says:

'The longest string has little more than a foot length between the two bridges. It has only thirty-one steps in the keyboard, and as many strings over the sound-board, so that there are five keys hid on account of the perspective [referring to the drawing]—to wit, three principals and two chromatics ("feintes"), of which the first is cut in two; but these chromatics serve to go down to the third and fourth below the first step, or C *sol*, in notation

in order to arrive at the third octave, for the eighteen principal steps only make an eighteenth; that is to say, a fourth over two octaves.'

Here is the clearest confirmation of short-octave measure in the spinet, the same as in the organ, both keyboards, according to Mersenne, being conformable. But owing to the fact that the woodcut represents a different spinet from that described (apparently descending to B), the description is not clear. To reach the third octave would require an F, for which one-half the cut chromatic in the spinet described may be reserved. But the B of the drawing would, by known analogy with organ

¹ Hubert, or Jan Van Eyck's St. Cecilia, in the famous 'Mystic Lamb,' may be referred to here although appertaining to the organ and not the spinet, as a valuable note by the way. The original painting, now at Berlin, was probably painted before 1496 and certainly before 1492. The painter's minute accuracy is unquestionable. It contains a chromatic keyboard like the oldest Italian, with boxwood naturals and black sharps. The compass begins in the bass at the half-tone E. There is no indication of a 'short-octave,' but there is one key by itself, convenient to the player's left hand; above this key there is a latchet acting as a catch, which may be intended to hold it down as a pedal. D is the probable note, and we have in Van Eyck's organ, it seems to us, the same compass, but an octave lower, as is the German Positiv of the next century at South Kensington—viz. D, E, then three chromatic octaves from F, and finally F#, G, A. There is no bottom-rail to the keyboard, nor is there in the painting at Holyrood.

² *Harmonie*, liv. 3, p. 107.

practice, sound G, and A would be found on the C#, the B also on the D# key, though this is generally found retained as Eb on account of the tuning.³ It is inferred that F was reached by dividing the lowest natural key; these diagrams therefore represent what we will call the C short measure, as that note gave the pitch.

Mersenne's express mention of C as the longest string shows that the still deeper G and A were made so, in his spinet, by weight: an important fact, as we have not seen a spinet in which it could have been otherwise, since in large instruments the bridge is always unbroken in its graceful curve, as it is also in the angles—always preserved—of the bridge of an octave one. The intimate connexion of the spinet and organ keyboards must palliate a trespass upon ground that has been covered in ORGAN (Vol. III. p. 748). It is this connexion that incites inquiry into the origin of the short octaves, of which there are two measures, the French, German or English C one, which we have described, and the Italian F one, which we will now consider. We propose to call this F, from the pitch note, as before. We have reason to believe these pitch notes originally sounded the same, from which arose the original divergence of high and low church-pitch; the C instrument being thus thrown a fourth higher. The Italian short measure having been misapprehended the question of its construction was submitted to Professor Kraus, and of W. T. Best, who made a careful examination of the organs in Italy. Both are in perfect agreement. Kraus describes the Italian short octave as a progression of three dominants and tonics, with the addition of ecclesiastical tones. The principle, he writes, was also applied to the pedal keyboards, which are called 'Pedaliera in Sesta,' or 'Pedaliera a ottava ripiegata.'⁴ Kraus maintains the nearly general use of the short octave in Italian spinets, harpsichords, clavichords, and organs, and to some harpsichords he adds even another dominant.

³ It may have been on account of the tuning that A and D were left unfretted in the old 'gebunden' or fretted clavichords; but the double Irish harp which Gallie (*Dissertation on Ancient and Modern Music*, A.D. 1681) says had been adopted in Italy, had those notes always doubled in the two rows of strings, an importance our tuning hypothesis fails to explain.

⁴ But not 'Ottava Ripiegata,' which some inaccurately apply to the lowest octave of the short octave manual. This is a contrivance in small organs with pedals to disguise the want of the lowest diapason octave on the manual, by coupling on to it the contrabasso of the pedals with the register of the octave above.

According to this, the oldest harpsichord known to exist, the Roman one of 1521, at S. Kensington, is a short-octave F instrument. When, in the 18th century, the C short octaves were made long, it was by carrying down the G and A, and giving back the semitonal value to the B and C \sharp (sometimes also the D \sharp); but G \sharp was not introduced, since it was never required as a drone. The drones had sometimes given way to semitones as early as the 14th and 15th centuries.

A THEORY OF 'SHORT MEASURE.'—What was, then, the original intention of 'short measure'? We find it indicated in Mersenne's psaltery (G C D E F G A B \flat C d e f g) and in many delineations of portatives or regals in pictures of the old masters, whose sincerity, seeing the accurate manner in which they have painted lutes, cannot be questioned. We will confine our references to Orcagna's 'Coronation of the Virgin' (1350), in the National Gallery, London, and Master Stephen's 'Virgin of the Rosary' (1450), at Cologne, with the Holyrood picture of 1484, already referred to as an illustration of a Positive organ with short measure. May not Hopkins's quotation (see ORGAN, Vol. III. p. 745) of two long pipes in an organ of 1418 count as evidence for short measure as much as for pedals? We think so. In fine, we regard short measure as having been intended to supply, in deeper-toned instruments, drones for cadences, and in the shriller regals (which were no more than boxes of pitch-pipes, one, two, or three to a key) to prompt the intonation of the plain-song. The contraction of the keyboard, whether diatonic or chromatic, to suit the size of the hand, was probably due to these small instruments—

'Orgues avait bien maniables,
A une scuelle main portables,
Ou il mesmes soufflé et touche.'
Roman de la rose.

The contraction to the short-octave measure might have been intended to get rid of the weight of the heavier pipes not needed for dominants or intonation, and, at the same time, to keep the keyboard narrow. Both contractions—the keyboard and the short measure—were thus ready-made for the spinet, harpsichord and clavichord, when they came into use.

The short-octave group was finally partially doubled, so as to combine with the dominant fourths the ordinary chromatic scheme, by dividing the lowest sharps or chromatics, of which there is an example in a spinet by Pleyer or Player, made between 1710 and 1720, exhibited by Kirkman at S. Kensington in 1872. This instrument, with black naturals, and apparently 4 $\frac{1}{2}$ octaves from B to D, has the lowest C \sharp and D \sharp divided, called in the quotation in the Catalogue (p. 12) 'quarter tones.' But it is difficult to imagine enharmonic intervals provided for the deepest notes. We believe it to

have been intended for a 'short octave,' and to be thus explained:

			D \flat	E \flat	
			C \sharp	D \sharp	
Apparent notes	B	C	D	E	
			C \sharp	E \flat	
			A	B	
Real notes	G	C	D	E	
<hr/>					
			C \sharp	D \sharp	
			D \flat	E \flat	
or Apparent notes	B	C	D	E	
			A	B	
			C \sharp	E \flat	
Real notes	G	C	D	E	

A detailed examination of instruments contributed to the Historic Loan Collection (1885) proves that the natural keys of the Patavini Spinet mentioned on p. 92 are marked with their names. The lowest E key is clearly inscribed Do—C; on the next, the F, is written F. This writing is not so early as 1550, because Do was not then used for Ut. The probable date is about one hundred years later, when the solmisation was finally giving way before the simple alphabetic notation. There are other instances. As to the cut sharps¹: the small Maidstone clavichord, said to have been Handel's, has the two nearer or front divisions intended for fourths below the next higher naturals, the two further or back divisions being the usual semitones.

Two spinets by Keene, dated 1685, in private hands,² have the same apparently enharmonic arrangement. One by Player (*sic*), sent to South Kensington about 1882, is to be included with Kirkman's and the Keenes, and also a Player which belongs to Dr. A. H. Mann of Cambridge; but a Keene of Sir George Grove's, undated, has not the cut sharps, which we are disposed to regard as for mixed dominants and chromatics, because the independent keynote value of the chromatics was, about A.D. 1700, beginning to be recognised, and the fretted clavichords were soon to give way to those without frets. It was Bach who set all notes free as tonics. We see in Keene's and Player's spinets the blending of old and new—that which was passing away, and our modern practice.

THE TRANSVERSE SPINET.—Returning to the *spinetta traversa*, we find this model preferred in England in the Stuart epoch, and indeed in fashion for 160 years. The favourite makers during the reigns of Charles I. and II. were Thomas and John Hitchcock and Charles Haward; but there is an unaccountable differ-

¹ The oldest spinet with cut sharps in the Historic Loan Collection was, according to the Facies, by Edward Blount; but on the first key, and less legibly on the jacks, is written 'Thomas Hitchcock his make in 1664.' A similar autographic inscription of this maker, but dated 1703, was brought forward by Taphouse of Oxford. We are thus enabled to find Thomas Hitchcock's working time. We think John Hitchcock came after him, and was probably his son.

² Formerly H. J. Dale of Cheltenham and E. R. Hughes of Chelsea.

 2. ENGLISH SPINET (T. Hitchcock, *c.* 1700).
1. Dale Collection. 2. Messrs. Broadwood & Sons, Ltd.

ence between John Hitchcock's and Charles Haward's spinets¹ in the fine specimens known to the writer, the latter of much older character, though probably made after the former.

Thomas Hitchcock's spinets are better known than John's. The one on *PLATE LXXVI*. No. 2 belongs to Broadwood, and is numbered 1379.² (The highest number we have met with of Thomas Hitchcock, is 1547.) Broadwood's differs from the John Hitchcock of 1630 in having a curved instead of an angular bent side, and from the naturals being of ivory instead of ebony. The compass of these instruments—five octaves, from G, to g^{'''}—is so startling as to be incredible, were it not for the facts that several instruments are extant with this compass, that the keyboard did not admit of alteration, and that the Sainsbury Correspondence (see *RUCKERS*) mentions that a greater compass obtained in England in the time of Charles I. than was expected or required on the Continent. The absence also of the sound-hole, regarded as essential in all stringed instruments of that time, where the sound-board covered the whole internal space, shows how eminently progressive the Hitchcocks must have been. Not so Haward, in the instrument represented on *PLATE LXXVI*. No. 1. Charles Haward appears to have been contemporary with the Hitchcocks, and yet he is as conservative to old Italian or French practice as if John Hitchcock had never made an instrument in England.

A John Hitchcock spinet exists numbered 1676. Thomas and John were probably father and son. The Charles Haward spinet is small, with short keys and limited compass, being only of 4 octaves and a semitone, B,–c^{'''}. The naturals are of snakewood, nearly black; the sharps of ivory. There are wires on each bridge over which the strings pass, and along the hitchpin block, precisely the same as in a dulcimer. The decoration of the sound-board, surrounding an Italian rose, is signed 'I H,' with 'Carolus Haward Fecit' above the keys; and the name of each key is distinctly written, which we shall again have occasion to refer to. Pepys patronised Haward (or Hayward, as he sometimes writes the name). We read in his Diary :

'April 4, 1668. To White Hall. Took Aldgate Street in my way and there called upon one Hayward that makes Virginals, and there did like of a little espinette, and will have him finish it for me: for I had a mind to a small harpsichon, but this takes up less room.

'July 10, 1668. To Hayward's to look upon an Espinette, and I did come near to buying one, but broke off. I have a mind to have one.

'July 13, 1668. I to buy my espinette, which I did now agree for, and did at Haward's meet with Mr. Thacker, and heard him play on the harpsichon, so as I never heard man before, I think.

'July 15, 1668. At noon is brought home the espinette I bought the other day of Haward; costs me 5*l*.'

¹ Formerly in the possession of William Dale of London.

² This is the instrument in Millale's picture of 'The Minuet,' 1862. Thomas dated his spinets; John numbered them.

Another reference concerns the purchase of triangles for the spinet—a three-legged stand, as in our illustration. A curious reference to Charles Haward occurs in *A Vindication of an Essay to the Advancement of Musick*, by Thomas SALMON, M.A., London, 1672. This writer is advocating a new mode of notation, in which the ordinary clefs were replaced by B. (bass), M. (mean), and T. (treble) at the signatures :

'Here, Sir, I must acquaint you in favour of the aforesaid B. M. T. that t'other day I met with a curious pair of Phanatical Harpsechords made by that Arch Heretick Charles Haward, which were ready cut out into octaves (as I am told he abusively contrives all his) in so much that by the least hint of B. M. T. all the notes were easily found as lying in the same posture in every one or their octaves. And that, Sir, with this advantage, that so soon as the scholar had learned one hand he understood them, because the position of the notes were for both the same.'

The lettering over the keys in W. Dale's Haward spinet is here shown to be original. It is very curious, however, to observe Haward's simple alphabetical lettering, and to contrast it with the hexachord names then passing away. There is a virginal (oblong spinet) in York Museum, made in 1651 by Thomas White, on the keys of which are monograms of Gamaut (bass G) and the three clef keys, F *fa ut*, C *sol fa ut*, and G *sol re ut* !

Mace, in *Musick's Monumēt* (London, 1676), refers to John Hayward as a 'harpsichon' maker, and credits him with the invention of the pedal for changing the stops. There was a spinet by one of the Haywards or Hawards left by Queen Anne to the Chapel Royal boys. It was used as a practising instrument until the chorister days of the late Sir John Goss, perhaps even later.³

A. J. H.

SPIRIDIO (*SPEER* 'IN DIO), BERTHOLD, a late 17th-century Carmelite monk; first at the court of Savoy; in 1668 preacher in the diocese of Würzburg; finally (from 1670) in the monastery St. Theodor near Bamberg. He composed masses and other church music, and wrote an important work *Neue bis dato unbekannte Unterweisung*, etc., giving instructions in the art of composition, as well as in organ-, spinet-, monochord-playing, etc. (1670). Of this part 2-4 appeared separately as *Nova instructio pro pulsandis organis spinettis, manuchordis*, etc. (1671-79), and part 5 as *Musikalische Erzgruben*, etc. (1683). A selection therefrom as *Musica Romana* containing vocal compositions with 2 violins *ad lib.* by various composers included himself (1665) (*Q.-L.*; *Riemann*).

SPIRITOSO, i.e. 'spiritedly,' is, like *CON SPIRITO*, a designation of style rather than of pace. The variant 'spirituoso' occurs in some of Beethoven's arrangements of national airs.

SPITTA, JULIUS AUGUST PHILIPP (b. Wecchold, Hanover, Dec. 27, 1841; d. Berlin,

³ Details of the private ownership of further specimens known to the writer have been withheld from this edition as verification was impossible.—E.D.

Apr. 13, 1894), a well-known musical *littérateur*, son of the author of the 'Psalter und Harfe'; studied at Göttingen, and afterwards taught at Reval, Sondershausen and Leipzig, where he took part in the founding of the Bachverein in 1874. So great was his progress during this time, that in 1875 he was made professor of musical history in the Berlin University, and Perpetual Secretary to the Academy of Arts there. At Easter of the same year he became teacher of musical history in the Hochschule für Musik; in 1876 entered the direction, and at midsummer 1882 became a permanent director of that establishment. His principal literary work—*J. S. Bach*, in two vols. (B. & H.; vol. i. 1873, vol. ii. 1880), an authoritative treatise of all relating to the subject, but sadly wanting a better index—has remained the foundation of all modern Bach research and criticism. A translation by Clara Bell and J. A. Fuller Maitland was published in three volumes by Novello & Co. in 1884–85. He published a smaller biography of the same master, forming No. 1 of B. & H.'s *Musikalische Vorträge*, and another of Schumann, which, though issued as Nos. 37, 38 of the same series, was written for this Dictionary. (See Vol. IV. pp. 648–686.) His article on SPONTINI, written for the first edition of this Dictionary, was the first adequate treatment of that singular individual. An article on Homilius will be found in the *Allg. deutsche Biographie*, and many other productions of his pen in the *Leipzig A.M.Z.* for 1875–78, 1880–82, and in the earlier numbers of Eitner's *M.f.M.* He was co-editor with Chrysander and Adler of the *Vierteljahrschrift für Musikwissenschaft*, from 1885 to his death. His critical edition of the organ works of Buxtehude, in two volumes (B. & H., 1875, 1876), is an admirable specimen of editing, and, in addition to the music, contains much valuable information. He also edited the complete edition of Heinrich Schütz, and was a prominent member of the directorate of the *D.D.T.* A monument by Hildebrandt, the eminent sculptor, was erected to his memory in Berlin.

G. rev.

SPITZFLÖTE, **SPITZFLUTE**; i.e. pointed flute. An organ stop, so-called because its pipes are slightly conical, that is, taper gradually from the mouth upwards. The diameter of the top is generally one-third of that of the pipe at its mouth. The tone is thin and reedy, but pure and effective. The Spitzflöte may be of 8 ft., 4 ft., or 2 ft. pitch; in this country, stops of this kind are most commonly of 4 ft. pitch.

J. S.

SPOFFORTH, (1) **REGINALD** (b. Southwell, Nottingham, 1770; d. Brompton, Sept. 8, 1827), glee composer. His uncle, Thomas Spofforth, was organist of the Minster at Southwell. From him and from Dr. Benjamin Cooke he probably derived all his instruction in music.

About 1787 or 1788 he wrote a glee—probably his first—for three male voices, 'Lightly o'er the village green,' and in 1793 obtained two prizes from the 'Glee Club,' for his glees 'See I smiling from the rosy East,' and 'Where are those hours,' which brought him prominently forward. In 1796 he ventured into the theatre with his music to the farce 'The Witch of the Wood,' produced at Covent Garden.¹ About 1799 he published a 'Set of Six Glees,' one of which, 'Hail, smiling morn,' at once caught the public ear, and has ever since retained its popularity. Another, 'Fill high the grape's exulting stream,' gained a prize in 1810. Spofforth's masterpieces, however, are not among his prize glees, and 'Come, bounteous May,' 'Mark'd you her eye,' 'Health to my dear,' and 'How calm the evening'—all for male voices—are among the finest specimens of his genius. For several years before his death his health was bad. He was buried at Kensington, where a monument was erected to his memory in St. Mary Abbots Church. After his death W. Hawes published a number of his MS. glees, but some of these pieces are crude and imperfect, and probably not intended for publication.

Reginald's younger brother, (2) **SAMUEL** (b. 1780; d. London, June 6, 1864), was appointed organist of Peterborough Cathedral when only 18, and in 1807 was made organist of Lichfield Cathedral. D. B.

SPOHR, **LOUIS**² (b. Brunswick, Apr. 5, 1784; d. Cassel, Oct. 22, 1859), great violinist and composer. He was born in the house of his grandfather, a clergyman. Two years after, his father, a young physician, took up his residence at Seesen, and it was there that young Spohr spent his early childhood. Both parents were musical: the father played the flute; the mother was pianist and singer. The boy showed his musical talent very early, and sang duets with his mother when only 4 years of age. At 5 he began to play the violin, and when hardly 6 was able to take the violin-part in Kalkbrenner's trios. His first teachers were Riemenschneider and Dufour, both amateurs. The latter, a French émigré, was so much impressed with his pupil's exceptional talent that he persuaded the father to send him for further instruction to Brunswick. Along with his first studies on the violin went his earliest attempts at composition, which consisted chiefly of violin duets.

EDUCATION AND TRAVEL.—At Brunswick he attended the grammar-school and continued his musical studies. His teachers were Kunisch, a member of the Duke's band, for the violin, and Hartung, an old organist, for counterpoint. This was the only instruction in the theory of music he ever received. According to his own

¹ Information from W. B. S.

² So, and not Ludwig, he calls himself in his Autobiography.

statement, it was principally through an eager study of the scores of the great masters, especially Mozart, that he acquired mastery over the technicalities of composition. His first public appearance was at a school-concert, when he played a concerto of his own with so much success that he was asked to repeat it at one of the concerts given by the Duke's band. Kunisch then insisted on his taking lessons from Maucourt, the leader of the band, and the best violinist at Brunswick. Spohr was only 14 when he undertook his first artistic tour. With a few letters of introduction in his pocket he set out for Hamburg. But there he failed even to get a hearing, and after some weeks had to return to Brunswick on foot, greatly disappointed, his slender means thoroughly exhausted. In his despair he conceived the idea of presenting to the Duke a petition asking for means to continue his studies. The Duke was pleased with the lad's open bearing, heard him, was struck with his talent, at once gave him an appointment in his band, and after a short time expressed his willingness to defray the expenses of his further musical education under one of the great recognised masters of the violin. Viotti and Ferdinand Eck both declined to receive a pupil, but the latter recommended his brother, Franz Eck, who was just then travelling in Germany. He was invited to Brunswick, and as the Duke was greatly pleased with his performances, an agreement was made that young Spohr should accompany him on his journeys and receive his instruction, the Duke paying one-half of the travelling expenses and a salary besides. In the spring of 1802 they started, master and pupil, for Russia. They made, however, prolonged stays at Hamburg and Strelitz, and it was on these occasions that Spohr profited most from his master's tuition. Latterly this became very irregular. Spohr, however, derived much benefit from constantly hearing Eck, who certainly was a very excellent violinist, though but an indifferent musician. At this period Spohr, who had an herculean frame and very strong constitution, often practised for ten hours a day. At the same time he composed industriously, and among other things wrote the first of his published violin concertos (op. 1) which is entirely in the manner of Rode, and also the violin duets op. 3. In St. Petersburg he met Clementi and Field, of whom he tells some curious traits; and after having passed the winter there without playing in public, returned to Brunswick in the summer of 1803. There he found Rode, and heard him for the first time. The playing of this great master filled him with the deepest admiration, and for some time it was his chief aim to imitate his style and manner as closely as possible. After having given in a public concert highly satisfactory proof of the progress made during his

absence, he again entered on his duties in the Duke's band. An intended journey to Paris in 1804 was cruelly cut short by the loss of his precious Guarnerius violin, the present of a Russian enthusiast. Just before entering the gates of Göttingen the portmanteau containing the violin was stolen from the coach, and all endeavours to recover it proved fruitless. He returned to Brunswick, and after having acquired, with the help of his generous patron, the Duke, another, though not equally good violin, he started on a tour to Berlin, Leipzig, Dresden and other German towns. His success was everywhere great, and his reputation spread rapidly. At his Berlin concert he was assisted by Meyerbeer, then only a boy of 13, but already a brilliant pianist.

In 1805 Spohr accepted the post of leader in the band of the Duke of Gotha. It was there he met and married his first wife, Dorette Scheidler, an excellent harp-player, who for many years appeared with him in all his concerts, and for whom he wrote a number of sonatas for violin and harp, as well as some solo-pieces. Having at his disposal a very fair band, Spohr now began to write orchestral works and vocal compositions of larger dimensions. His first opera, 'Die Prüfung,' which belongs to this period, was performed at a concert. In 1807 he made a very successful tour with his wife through Germany, visiting Leipzig, Dresden, Prague, Munich, Stuttgart (where he met Weber), Heidelberg and Frankfurt. In 1808 he wrote his second opera, 'Alruna'; but this, again, never reached the stage, although accepted for representation at Weimar and apparently gaining the approval of Goethe, at that time manager of the Weimar theatre, who was present at a trial-rehearsal of the work. In the course of this year Napoleon held the famous Congress of Princes at Erfurt. Spohr, naturally anxious to see the assembled princes, went to Erfurt, where a French troupe, comprising Talma and Mars, performed every evening to a pit of monarchs. But on arrival he heard, to his great disappointment, that it was impossible for any but the privileged few to gain admittance to the theatre. In this dilemma he hit on a happy expedient. He persuaded the second horn-player of the band to allow him to take his place; but as he had never before touched a horn, he had to practise for the whole day in order to produce the natural notes of the instrument. When the evening came, though his lips were black and swollen, he was able to get through the very easy overture and entr'actes. Napoleon and his guests occupied the first row of stalls; but the musicians had strict orders to turn their backs to the audience, and not to look round. To evade this fatal regulation Spohr took with him a pocket looking-glass, and by placing it on his desk got a good view of the famous personages assembled.

In 1809 he made another tour through the north of Germany, and at Hamburg received a commission for an opera, 'Der Zweikampf mit der Geliebten'—or 'The Lovers' Duel'—which was produced with great success the year after. At this time he had already written six of his violin-concertos, and as a player had hardly a rival in Germany. The year 1809 is memorable for the First Music Festival in Germany, which was celebrated under Spohr's direction at Frankenhausen, a small town in Thuringia. It was followed by another, in 1811, for which Spohr composed his first symphony, in E♭. In 1812 he wrote his first oratorio, 'Das jüngste Gericht' (not to be confounded with 'Die letzten Dinge,' or 'The Last Judgment'), on the invitation of the French Governor of Erfurt, for the 'Fête Napoléon' on Aug. 15. He naively relates¹ that in the composition of this work he soon felt his want of practice in counterpoint and fugue-writing; he therefore obtained Marpurg's treatise on the subject, studied it assiduously, wrote half-a-dozen fugues after the models given therein, and then appears to have been quite satisfied with his proficiency!

VIENNA.—The oratorio was fairly successful, but after two more performances of it at Vienna in the following year, the composer became dissatisfied, and laid it aside for ever. In autumn 1812 he made his first appearance at Vienna, and achieved as performer a brilliant, as composer an honourable, success. The post of leader of the band at the newly established Theatre 'an der Wien' being offered to him under brilliant conditions, he gave up his appointment at Gotha and settled at Vienna. During the next summer he composed his opera 'Faust,' one of his best works, and soon afterwards, in celebration of the battle of Leipzig, a great patriotic cantata. But neither of these works was performed until after he had left Vienna. During his stay there Spohr naturally came into contact with Beethoven; but in spite of his admiration for the master's earlier compositions, especially for the quartets, op. 18, which he was one of the first to perform at a time when they were hardly known outside Vienna (indeed, he was the very first to play them at Leipzig and Berlin)—yet he was quite unable to understand and appreciate the great composer's character and works, as they appeared even in his second period. His criticism of the C minor and Choral Symphonies has gained for Spohr, as a critic, an unenviable reputation.²

Although his stay at Vienna was on the whole very successful, and did much to raise his reputation, he left it in 1815, after having quitted his appointment on account of disagreements with the manager of the theatre. He passed the summer at the country-seat of Prince Carolath in Bohemia, and then went to

conduct another festival at Frankenhausen, where he brought out his cantata 'Das befreite Deutschland,' after which he set out on a tour through the west and south of Germany, Alsace, Switzerland and Italy. On his road, with the special view of pleasing the Italian public, he wrote the eighth concerto—the well-known 'Scena cantante.' He visited all the principal towns of the Peninsula, played the concerto in Rome and Milan, and made acquaintance with Rossini and his music—without approving much of the latter, as will be readily believed.

Returned to Germany, in 1817 he visited Holland, and then accepted the post of conductor of the opera at Frankfort-on-the-Main. Here, in 1818, his opera 'Faust' was first produced. It was quickly succeeded by 'Zemire und Azor,' which, though hardly equal to 'Faust,' gained at the time even greater popularity. Owing again to differences with the manager he left Frankfort, after a stay of scarcely two years.

LONDON AND PARIS.—In 1820 he accepted an invitation from the Philharmonic Society in London, and paid his first visit to England. He appeared at the opening concert of the season (Mar. 6),³ and played with great success his concerto No. 8, 'Nello stilo drammatico.' At the second Philharmonic concert he led his solo quartet in E. At the next he would naturally have been at the head of the violins to lead the band, while Ries, according to the then prevailing fashion, presided at the piano. But, after having overcome the opposition of some of the directors, Spohr succeeded in introducing the conductor's stick for the first time into a Philharmonic concert. It was on this occasion (Apr. 10) that he conducted his MS. symphony in D minor, a fine work, composed during his stay in London. At the last concert of the season another symphony of his was played for the first time in England, as well as his nonetto for strings and wind (op. 31). Spohr was delighted with the excellent performance of the Philharmonic orchestra, especially the stringed instruments. Altogether his sojourn in London was both artistically and financially a great success. At his farewell concert his wife made her last appearance as a harp-player, and was warmly applauded. Soon after she was obliged, on account of ill-health, to give up the harp for the piano, on which she would occasionally play in concerts with her husband, who wrote a number of pianoforte and violin duets especially for her.

On his journey home Spohr visited Paris for the first time. Here he made the personal acquaintance of Kreutzer, Viotti, Habeneck, Cherubini and other eminent musicians, and was received by them with great cordiality and esteem. His success at a concert which he gave

¹ *Selbstbiogr.* i. 169.

² *Ibid.* i. 202, etc.

³ At a miscellaneous concert on Mar. 22 Spohr was described on the programme as making his first appearance in England.

at the Opéra was complete, although his quiet unpretentious style was not, and could not be, as much to the taste of the French as it was to that of the German and English public. Cherubini appears to have felt a special interest in Spohr's compositions, and the latter takes special pride in relating how the great Italian made him play a quartet of his three times over. Returned to Germany, Spohr settled at Dresden, where Weber was just then engaged in bringing out his 'Freischütz.' Spohr was no more able to appreciate the genius of Weber than that of Beethoven. It is curious that, without knowing of Weber's opera, he had had the intention of setting a libretto on the same story; but when he heard that Weber had treated the subject, he gave it up. During Spohr's stay at Dresden, Weber received an offer of the post of Hofkapellmeister to the Elector of Hesse-Cassel; but being unwilling to leave Dresden, he declined, at the same time strongly recommending Spohr, who soon after was offered the appointment for life under the most favourable conditions.

APPOINTMENT AT CASSEL.—On New Year's Day, 1822, he entered on his duties at Cassel, where he remained for the rest of his life. He had no difficulty in gaining at once the respect and obedience of bands and singers, and soon succeeded in procuring a more than local reputation for their performances. Meanwhile he had finished his 'Jessonda,' which soon made the round of all the opera-houses in Germany, with great and well-deserved success. It must be regarded as the culminating point of Spohr's activity as a composer. At Leipzig and Berlin, where he himself conducted the first performances, it was received with an enthusiasm little inferior to that roused a few years before by the 'Freischütz.' In the winter of 1824 he passed some time in Berlin, and renewed and cemented the friendship with Felix Mendelssohn and the members of his family, which had been begun when they visited him at Cassel in 1822. In 1826 he conducted the Rhenish Festival at Düsseldorf, when his oratorio 'The Last Judgment' (Die letzten Dinge), previously given at Cassel (see Vol. III. p. 111), was performed. It passed so much that it was repeated a few days later in aid of the Greek insurgents. His next large work was the opera 'Pietro von Abano,' which, however, like his next operas, 'Der Berggeist' and 'Der Alchemist,' had but a temporary success. In 1831 he finished his great *Violin School*, which has ever since its publication maintained the place of a standard work, and which contains, both in text and exercises, a vast amount of extremely interesting and useful material. At the same time, it cannot be denied that it reflects somewhat exclusively Spohr's peculiar style of playing and is therefore of especial value for the study of his own violin-compositions. It is also true that its elementary part is of less

practical value from the fact that the author himself had never taught beginners, and so had no personal experience in that respect.

The political disturbances of 1832 caused a prolonged interruption of the opera performances at Cassel. Spohr, incensed by the petty despotism of the Elector, proved himself at this time, and still more during the revolutionary period of 1848 and 1849, a strong Radical, incurring thereby his employer's displeasure, and causing him innumerable annoyances. However, he made good use of the interruption to his official duties by writing his symphony 'Die Weihe der Töne' (The Consecration of Sound, No. 4, op. 86), which was produced at Cassel in 1832. During the next year he composed the oratorio 'Des Heilands letzte Stunden' (Calvary), on a libretto which Rochlitz had offered to Mendelssohn, but which the latter, being then engaged on 'St. Paul,' had declined. Spohr's oratorio was first performed at Cassel on Good Friday, 1835. His first wife had died in 1834; in 1836 he married Marianne Pfeiffer, a pianist, who survived him, dying at Cassel, Jan. 4, 1892.

ORATORIOS FOR ENGLAND.—In 1839 he paid his second visit to England, where meanwhile his music had attained great popularity. He had received an invitation to produce his 'Calvary'¹ at the Norwich Festival, and in spite of the opposition offered to the work by some of the clergy on account of its libretto, his reception appears to have surpassed in enthusiasm anything he had before experienced. It was a real success, and Spohr for the rest of his life refers to it as the greatest of his triumphs. Soon after his return to Cassel he received from Professor Edward Taylor the libretto of another oratorio, 'The Fall of Babylon,' with a request that he would compose it for the Norwich Festival² of 1842.

In 1840 he conducted the Festival at Aix-la-Chapelle. Two years later he brought out at Cassel Wagner's 'Der fliegende Holländer.' That Spohr, who, in the case of Beethoven and Weber, exhibited such inability to appreciate novelty—and who at bottom was a conservative of conservatives in music—should have been the very first musician of eminence to interest himself in Wagner's talent is a curious fact not easily explained. To some extent his predilection for experiments in music—such as he showed in his 'Weihe der Töne,' his symphony for two orchestras, the 'Historic Symphony,' the 'Quartet-Concertante' and some other things—may account for it; while his long familiarity with the stage had doubtless sharpened his perception for dramatic effect, and thus enabled him to recognise Wagner's eminently

¹ Previously given with an English translation by Edward Taylor at Hanover Square Rooms, London, by the VOCAL SOCIETY, under Taylor, Mar. 27, 1837.

² For the circumstance of the Norwich Festival performances, see *Annals of the Norfolk and Norwich Musical Festivals*, by R. H. Legge and W. E. Hazrell, 1896.

dramatic genius. But there was in Spohr, both as man and as artist, a curious mixture of the ultra-conservative, nay almost philistine element, and of the radical spirit.

To the great disappointment of himself and his English friends, he was unable to conduct the 'Fall of Babylon' at Norwich, since the Elector refused the necessary leave of absence. Even a monster petition from his English admirers and a special request from Lord Aberdeen, then at the head of the Government, to the Elector, had not the desired result. The oratorio, however, was performed with the greatest success, and Spohr had to be satisfied with the reports of his triumph, which poured in from many quarters. On the first day of his summer vacation he started for England, and soon after his arrival in London conducted a performance of the new oratorio at the Hanover Square Rooms. On this and other occasions his reception here was of the most enthusiastic kind. The oratorio was repeated on a large scale by the Sacred Harmonic Society in Exeter Hall. The last Philharmonic concert of the season (July 3) was almost entirely devoted to Spohr, having in its programme a symphony, an overture, a violin-concerto and a vocal duet of his. By special request of the Queen and Prince Albert an extra concert with his co-operation was given on July 10, in which also he was well represented. A most enjoyable tour through the South and West of England, and Wales, brought this visit of Spohr to a happy end.

The year 1844 was marked by the composition of his last opera, 'Die Kreuzfahrer' (The Crusaders), for which he had himself arranged the libretto from a play of Kotzebue. It was performed at Cassel and Berlin, but had no lasting success. During his vacation he made a journey to Paris, and witnessed at the Odéon the 32nd performance of the 'Antigone' with Mendelssohn's music. The members of the Conservatoire orchestra arranged in his honour a special performance of his 'Consecration of Sound.' In the same year he conducted the 'Missa Solennis' and the Choral Symphony at the great Beethoven Festival at Bonn. The year 1847 saw him again in London, where the Sacred Harmonic Society announced a series of three concerts for the production of his principal sacred compositions: 'The Fall of Babylon,' 'Calvary,' 'The Last Judgment,' 'The Lord's Prayer' and Milton's 84th Psalm. However, on grounds similar to those which had roused so much opposition at Norwich, 'Calvary' was omitted from the scheme, and 'The Fall of Babylon' repeated in its place.

LAST YEARS.—On his return to Cassel, Spohr seems to have been quite absorbed by the great political events then going on in Germany. In the summer of 1848 he spent his vacation at Frankfort, where the newly

created German Parliament was sitting, and he was never tired of listening to the debates of that short-lived political assembly. In 1849 he composed a fresh symphony, 'The Seasons'—his ninth. With 1850 a long chain of annoyances began. When his usual summer vacation time arrived, the Elector, probably intending to show displeasure at his political opinions, refused to sign the leave of absence—a mere formality, as his right to claim the vacation was fixed by contract. After several fruitless attempts to obtain the signature, Spohr, having made all his arrangements for a long journey, left Cassel without leave. This step involved him in a law-suit with the administration of the theatre, which lasted for four years, and which he finally lost on technical grounds.

For the London season of 1852 Spohr had received an invitation from the new Opera at Covent Garden to adapt his 'Faust' to the Italian stage. He accordingly composed recitatives in place of the spoken dialogue, and made some further additions and alterations. It was produced with great success under his own direction on July 15, the principal parts being sustained by Castellani, Ronconi, Formes and Tamberlik. In 1853, after many fruitless attempts which were regularly frustrated by the Elector, he at last succeeded in bringing out Wagner's 'Tannhäuser' at Cassel. In reference to it he says in his Autobiography, 'This opera contains a great deal that is new and beautiful, but also some things which are ugly and excruciating to the ear,' and speaking of the 2nd finale he says: 'In this finale now and then a truly frightful music is produced.' That he considered Wagner by far the greatest of all living dramatic composers he declared as soon as he became acquainted with 'The Flying Dutchman.' From 'Tannhäuser' he would have proceeded to 'Lohengrin,' but owing to the usual opposition of the court, all his endeavours to bring it out were frustrated. In the same year he came for the sixth and last time to England, to fulfil an engagement at the New Philharmonic concerts. At three of these he conducted not only many of his own works—especially the symphony for two orchestras—but also the Choral Symphony. At the same time 'Jessonda' was in preparation at Covent Garden. But as it could not be produced before the close of his vacation, Spohr was unable to conduct it himself.

From this time his powers began to decline. He still went on composing, but declared himself dissatisfied with the results. In 1857 he was pensioned off, very much against his wish, and in the winter of the same year had the misfortune to break his arm, which compelled him to give up violin-playing. Once more, in 1858, at the celebration of the fiftieth anniversary of the Prague Conservatorium, he con-

ducted his 'Jessonda' with wonderful energy. It was his last public appearance. He died quietly on Oct. 22, 1859, at Cassel,¹ and thus closed the long life of a man and an artist who had to the full developed the great talents and powers given to him; who throughout a long career had lived up to the ideal he had conceived in youth; in whom private character and artistic activity corresponded to a rare degree, even in their foibles and deficiencies. That these last were not small cannot be denied.

QUALITIES OF THE MUSICIAN.—His utter want of critical power in reference both to himself and to others is fully exposed in his interesting Autobiography,² which, however, bears the strongest possible testimony to his rare manly straightforwardness and sincerity in word and deed, and to the childlike purity of mind which he preserved from early youth to latest age. Difficult as it is to understand his famous criticisms on Beethoven and his interest for Wagner, their sincerity cannot be doubted for a moment. According to his lights he ever stood up for the dignity of his art, with the same unflinching independence of character with which he claimed, not without personal risk, the rights of a free citizen. It is true that he called himself a disciple of Mozart. But the universality of Mozart's talent was the very reverse of Spohr's exclusive individualism; and except in their great regard for form, and in a certain similarity of melodic structure, the two masters have hardly anything in common. Spohr certainly was a born musician, second only to the very greatest masters in true musical instinct; in power of concentration and of work hardly inferior to any. But the range of his talent was not wide; he never seems to have been able to step out of a given circle of ideas and sentiments. He never left the circle of his own individuality, but drew everything within it.

He was fond of experiments in composition—such as new combinations of instruments (to wit the double quartet, the symphony for two orchestras, the quartet-concerto and others), or adoption of programmes ('Consecration of Sound'; concertino, 'Past and Present,' etc.), and thus showed his eagerness to strike out new paths. (See SYMPHONY, pp. 221-3.) But after all, what do we find under these new dresses and fresh-invented titles but the same dear old Spohr, incapable of putting on a really new face, even for a few bars? 'Napoleon,' says Robert Schumann³ (à propos of Spohr's Historical Symphony),

'once went to a masked ball, but before he had been in the room a few minutes folded his arms in his well-known attitude. "The Emperor! the Emperor!" at once ran through the place. Just so, through disguises of the Symphony, one kept hearing "Spohr, Spohr" in every corner of the room.'

Hence there is considerable sameness—nay, monotony—in his works. Be it oratorio or concerto, opera or string-quartet—he treats them all very much in the same manner, and it is not so much the distinctive styles peculiar to these several forms of music that we find, as Spohr's peculiar individuality impressed upon all of them. He certainly was not devoid of originality—in fact his style and manner are so entirely his own that no composer is perhaps so absolutely unmistakable as he is. That an originality so strong and so inalienable, unless supported by creative power of the very first order and controlled by self-criticism, would easily lead to mannerism is obvious; and a mannerist he must be called. Certain melodious phrases and cadences, chromatic progressions and enharmonic modulations, in themselves beautiful enough, and most effective, occur over and over again, until they appear to partake more of the nature of mechanical contrivances than to be the natural emanations of a living musical organism.

To his violin-concertos—and among them especially to the 7th, 8th and 9th—must be assigned the first place among his works. They are distinguished as much by noble and elevated ideas as by masterly thematic treatment; while the supreme fitness of every note in the solo-part to the nature of the violin need hardly be mentioned. His duets and concertantes for two violins, and for violin and viola, are of their kind unsurpassed. By the frequent employment of double stops great sonority is produced, and, if well played, the effect is charming. The mass of his chamber music, a great number of quartets, quintets, double quartets, trios, etc., is nowadays not often heard in public. Spohr as a composer of quartets was rarely able to shake off the great violin-virtuoso. Some of the quartets—the so-called 'Quatuors brillants' or solo quartets—are avowedly violin-concertos accompanied by violin, viola and violoncello, and appear to have been written to supply a momentary want. And even those which claim to be quartets in the proper sense of the term, almost invariably give to the first violin an undue prominence, incompatible with the true quartet-style. Allowing all this, it must be maintained that many of the slow movements are of great beauty; and together, in spite of undeniable drawbacks, his quartets contain so much fine and noble music as certainly not to deserve the utter neglect they have fallen into.

His oratorios, still enjoying a certain popularity in England, are but rarely heard in other countries. They contain, no doubt, much beautiful music, and occasionally rise even to grandeur and sublimity. Yet one cannot help feeling a certain incongruity between the character of the words and the musical treatment—between the stern solemnity of such subjects as 'Calvary'

¹ A Spohr Museum was founded at Cassel in 1921.

³ *Gesammelte Schriften*, iv. 89.

or 'The Last Judgment' and the quiet charm and sweetness of Spohr's music, which even in its most powerful and passionate moments lacks the all-conquering force here demanded.

Of his many songs a few only have attained great popularity, such as 'The Bird and the Maiden.'

SPOHR AS VIOLINIST.—As an executant Spohr counts amongst the greatest of all times. Through Franz Eck he received the solid principles of the Mannheim School, and Rode's example appears afterwards to have had some influence on his style. He was, however, too original to remain fettered by any school, still less under the influence of a definite model. He very soon formed a style of his own, which again—like his style as a composer—was a complete reflex of his peculiar individuality. It has often been remarked that he treated the violin pre-eminently as a singing instrument, and we can readily believe that the composer of the *Scena Cantante* and of the slow movements in the 9th and other concertos, played with a breadth and beauty of tone and a delicacy and refinement of expression almost unequalled. A hand of exceptional size and strength enabled him to execute with great facility the most difficult double-stops and stretches. His manner of bowing did not materially differ from that of the old French School (Viotti, Rode). Even in quick passages he preserved a broad full tone. His staccato was most brilliant and effective, moderately quick, every note firmly marked by a movement of the wrist. The lighter and freer style of bowing, that came in with Paganini, and has been adopted more or less by all modern players, was not to his taste. He appears to have had a special dislike to the use of the 'springing bow,' and it is a characteristic fact that, when he first brought out Mendelssohn's 'Midsummer Night's Dream' overture at Cassel, he insisted on the violins playing the quick passage at the opening with firm strokes.

If Spohr's compositions for the violin do not present abnormal difficulties to the virtuoso of the present day, such was not the case at the time when they were written. They were then considered the *ne plus ultra* of difficulty. We must also remember that he was too great an artist and musician to care for display of executive skill for its own sake, and that in consequence the difficulties contained in his works do not by any means represent the limit of his powers as an executant. He had a large number of pupils, the best known of whom were St. Lubin, Pott, Ferdinand David, Kömpel, Blagrove, Bott, Bargheer. Spohr was considered one of the best conductors of his time. An unerring ear, imperturbable rhythmical feeling, energy and fire, were combined with an imposing personal appearance and great dignity of bearing.

As a man he was universally respected, although, owing to a certain reserve in his character and a decided aversion to talking, he was not rarely reproached with coldness and brusqueness of manner. At the same time he gained and kept through a long life certain intimate friendships—with Hauptmann¹ and others—and in many instances showed great kindness, and extended not a little courtesy, to brother artists. That this was not incompatible with an extraordinary sense of his own value and importance is evident in every page of his *Selbstbiographie*, a most amusing work, deserving a better translation than it has yet found.²

His works, of which a catalogue is given below, comprise 9 great symphonies; a large number of overtures; 17 violin-concertos and concertinos; many other concert pieces (Potpourris, Variations, etc.) for the violin, for violin and harp; 15 violin-duets; duets for violin and PF.; 4 concertos and other pieces for clarinet; 33 string quartets; 8 quintets; 4 double quartets; 5 PF. trios; 2 sextets; an octet; and a nonet; 4 great oratorios; a Mass; several psalms and cantatas; 10 operas; a great many songs, part songs and other vocal pieces—over 200 works in all.

LIST³ OF WORKS

- | | |
|---|--|
| Op. | Op. |
| 1. Concerto for violin (No. 1, A min.). | 23. Potpourri on themes of Mozart (No. 3, G) for vln. with acc. of Quartet, flute, oboe, clarinet, 2 bassoons and 2 horns. |
| 2. Concerto for vln. (No. 2, D min.). | 24. Potpourri on themes of Mozart (No. 4, B) for vln. with acc. of 2nd vln., viola and bass. |
| 3. 3 Duos Concertants for 2 vln. 4. 2 String Quartets (C, G min.). | 25. 6 German Songs. |
| 5. First Potpourri on Air of Dalayrac for vln. with acc. of 2nd vln., viola and bass. | 26. Concerto for clarinet (No. 1, C min.). |
| 6. Variations (No. 1, D) for vln. solo, 2nd vln., viola and bass. | 27. Quartet for 2 vln., viola and violone (No. 6, G min.). |
| 7. Concerto for vln. (No. 3, C min.). | 28. Concerto for vln. (No. 6, G min.). |
| 8. Variations (No. 2, A min.) for vln. solo, 2nd vln., viola and bass. | 29. 3 String Quartets (No. 7, 8, 9; E♭, C min., F min.). |
| 9. 2 Duos Concertants for 2 vln. (Nos. 4, 5). | 30. String Quartet (No. 10, A). |
| 10. Concerto for vln. (No. 4, B min.). | 31. Grand Nonetto (F. maj.) for vln., viola, v'cl., bass, flute, oboe, clarinet, bassoon and horn. |
| 11. Quatuor Brillant for 2 vln., viola and v'cl. (No. 3, D min.). | 32. Octet (E maj.) for vln., 2 violas, v'cl., clarinet, 2 horns, and bass. |
| 12. Overture (No. 1, C min.). | 33. 2 Quintets for 2 vln., 2 violas and v'cl. (No. 1, E♭; No. 2, G). |
| 13. Grand Duo for vln. and viola (No. 6). | 34. Nocturno (in C) for wind instruments and Turkish band. |
| 14. * | 35. Fantasia for harp (A♭). |
| 15. 2 String Quartets (Nos. 4, 5; C, A). | 36. Variations for harp (F). |
| 15a. Overture (No. 2, D), 'Die Prüfung.' | 37. 6 German Songs (2nd book of Songs). |
| 16. Grande Sonate for PF. (or harp) and vln. (B.). | 38. Concerto for vln. (No. 7, E min.). |
| 17. Concerto for vln. (No. 5, E♭). | 39. 3 Duets for vln. (Nos. 7, 8, 9; D min., E♭, E). |
| 18. * | 40. Grande Polonaise (A min.) for vln. with orch. |
| 19. * | 41. 6 German Songs (3rd book of Songs). |
| 20. First Symphony (E♭). Peters. | 42. Potpourri. Arrangement for vln. and PF. of op. 24. |
| 21. Overture (No. 3, E♭), 'Al-runa.' | |
| 22. Potpourri on themes of Mozart (No. 2, B♭) for vln. with acc. of 2nd vln., viola and bass. | |

¹ Hauptmann's letters to Spohr have been published by Schoene and Hiller. See also *Letters of a Leipzig Cantor*, translated and edited by A. D. Coleridge (1892).

² *Louis Spohr's Autobiography*, Longmans, 1865.

³ Founded on the catalogue edited by H. M. Schletterer, B. & H., 1881. An earlier catalogue, imperfect but very useful in its time, was that of Jantzen—*Verzeichnis*, etc., Cassel, Lückhardt.

* Unknown and not to be found in Schletterer's Catalogue. Probably represented by works left in manuscript.

- Op.
43. Quatuor Brilliant for stringed Instr. (No. 11, B.).
44. 6 4-part Songs for male voices.
45. 3 String Quartets (Nos. 12, 13, 14; C, E min., F min.).
46. Introduction and Rondo (E) for PF. and vln.
47. Concerto for vln. No. 3, A min. 'In modo d'una scena cantante' ('Gesangs-scene').
48. First Concertante for 2 vln. and orch. (A min.).
49. Second Symphony (D min.) Ded. to Philharmonic Society.
50. Potpourri (F# min.) for vln. and PF. on Airs from 'Die Zaubertöte.' Peters.
51. Grand Rondo for vln. and PF. concertante.
52. Quartet for FF., flute, clarinet, horn and bassoon (C min.).
53. Arrangement of op. 52 for PF. and stringed instr.
54. Mass for 5 solo voices and 2 6-part choirs.
55. Concerto for vln. (No. 9, D min.).
56. Potpourri for vln. and PF. on Airs from 'Das unterbrochene Opferfest'.
57. Concerto for clarinet (No. 2, E).
58. 3 String Quartets (Nos. 16, 17, 18; E, A min., G).
59. Potpourri (A min.) on Irish Airs for vln. and orch.
60. 'Faust,' Opera.
61. Quatuor Brilliant for stringed Instr. (No. 15, B min.).
62. Concerto for vln. (No. 10, A min.).
63. 'Jessonda,' Opera.
64. Potpourri (Ap) on Airs from 'Jessonda' for vln. and v'cl. with orch.
65. Double String Quartet (No. 1, D min.).
66. Potpourri (A min.) on Airs from 'Jessonda,' for vln. and orch.
67. 3 Duos Concertants for 2 vln. (Nos. 10, 11, 12; A min., D, G min.).
68. Quatuor Brilliant (No. 19, A).
69. Quintet for stringed instr. (No. 3, B min.).
70. Concerto for vln. (No. 11, G).
71. Scena and Airs for soprano.
72. 6 German Songs (Book 4 of Songs).
73. 'Der Berggeist,' Opera.
74. 3 String Quartets (Nos. 20, 21, 22; A min. Bp, D min.).
75. Overture, 'Macbeth' (B min.).
76. 'Pietro von Abano,' Opera.
77. Double Quartet for stringed instr. (No. 2, E).
78. Third Symphony (C min.).
79. Concerto for vln. (A min.).
80. Potpourri for clarinet (F).
81. Fantasia and Variations for clarinet (B).
82. 3 String Quartets (Nos. 23, 24, 25; E, G, A min.).
83. Quatuor Brilliant for stringed Instr. (No. 28, Bp).
84. 3 String Quartets (No. 27, 28, 29; D min., Ap, B min.).
85. 3 Psalms for double choir and solo voices.
86. Fourth Symphony, 'The Consecration of Sound'.
87. Double Quartet for stringed Instr. (No. 3, E min.).
88. Second Concertante for 2 vln. with orch.
89. 'Erinnerung an Marienbad,' vases for orch. (A min.).
90. 6 4-part Songs for male voices.
91. Quintet for stringed Instr. (No. 4, G min.).
92. Concertino for vln. (No. 2, E maj.).
93. Quatuor Brilliant for stringed Instr. (No. 30, A min.).
94. 6 Songs for contralto or baritone (Book 5 of Songs).
95. Duo Concertant for PF. and vln. (G min.).

- Op.
96. Duo Concertant for PF. and vln. (F).
97. Hymn, 'St. Caecilia,' chorus, soprano solo.
97a. Psalm 24, for chorus, solo voices and PF.
98. Hymne, 'Gott, du bist gross' (Gott, thou art great), for chorus, solo voices, and orch.
99. Fantasia on Raupach's 'Die Tochter der Luft' in form of a concert-overture for orch. (See op. 102).
100. *
101. 6 German Songs (Book 6 of Songs).
102. Fifth Symphony (G min.). Fantasia on op. 99 used as first movement.
103. 6 German Songs with acct. of PF. and clarinet (Book 7 of Songs).
104. 'Water user' (words by Klopstock).
105. 6 Songs (Book 8 of Songs).
106. Quintet for stringed instr. (No. 6, G min.).
107. 3 Duets for soprano and tenor with PF.
108. 3 Duets for 2 sopranos.
109. *
110. Concertino for vln. 'Sonst Fantasia on op. 99 (A min.).
111. Rondo alla Spagnuola (C) for PF. and vln.
112. Duo Concertant for PF. and vln. (No. 3, E).
113. Sonate Concertante for harp and vln. (E).
114. Do. (E).
115. Do. (Ap).
116. Historical Symphony (No. 6, C). Dedicated to the Philharmonic Soc., London.
117. Fantasia for PF. and vln. on Airs from 'Der Alchymist'.
118. Fantasia for PF. (or harp) and vln. on Airs of Handel and Abt Vogler.
119. Trio Concertant (E min.) for PF., vln., and v'cl.
120. 6 4-part Songs for mixed voices.
121. Double Symphony, 'Irdisches und Göttliches im Menschenleben,' for double orch.
122. Part 128. Chorus and solo voices with organ or PF.
123. Trio Concertant for PF., vln. and v'cl. (No. 2, F maj.).
124. Trio Concertant for PF., vln. and v'cl. (No. 3, A min.).
125. Sonata (Ap) for FF. Dedicated to Mendelssohn.
126. Concert-Overture, 'Im ersten Styl' (D).
127. Gleiches u. humoristisch, 6 Duettinos for PF. and vln.
128. Concerto for vln. (No. 15, E min.).
129. Quintet for stringed Instr. (No. 5, E min.).
130. Quintet for PF., 2 vln., viola and v'cl.
131. Quartet Concerto for 2 vln., viola and v'cl. with orch.
132. String Quartet (No. 31, A).
133. Trio for FF., vln., and v'cl. (No. 4, Bp).
134. Psalm 84 (Milton). Chorus and solo voices with orch.
135. Sechs Salontücke for vln. and PF.
136. Double Quartet (No. 4, Bp).
137. Symphony (No. 3, G min.). Dedicated to the Philharmonic Soc. of London.
138. Sonatina for PF. and voice, 'An Sle am Clavier'.
139. 5 Songs (Book 9). Lückhardt.
140. Sextet for 2 vln., 2 violas and 2 v'cl. (C maj.).
141. Quartet (No. 32, C).
142. Trio for PF. vln. and v'cl. (No. 5, G min.).
143. Symphony 'The Seasons' (No. 9).
144. Quintet for stringed Instr. (No. 7, G min.).
145. Sechs Salontücke for vln. and PF.
146. String Quartet (No. 33, G).
147. Septet for PF., flute, clarinet, horn, bassoon, vln. and v'cl.

- Op.
148. 3 Duets for 2 vln. (No. 1, F). — dedicated to the brothers Holmes. (See opp. 150, 153).
149. Rondoletto for PF. (G).
150. 3 Duets for 2 vln. (No. 2, D). (See opp. 148, 153). Peters.
151. 6 4-part Songs for mixed voices.
152. String Quartet, No. 34 (E).
153. 3 Duets for 2 vln. (No. 3, C).
154. 6 Songs for a baritone voice with acc. of vln. and PF.
WORKS WITHOUT OPUS-NUMBER
'Der Zweikampf mit der Geliebten.' Opera.
Overture and Bass Air from the Cantata, 'Das befreite Deutschland'.

- 'Zemire und Azor.' Opera.
'Die letzten Dinge' (The Last Judgment), Oratorio.
'Vater unser' (words by Mahlman).
'Der Alchymist.' Opera.
Violinschule.
'Des Hellsands letzte Stunden' (Calvary). Oratorio.
Overture and Song for the play 'Der Matrose'.
'Der Fall Babylons.' Oratorio.
'Die Kreuzfahrer' (The Crusaders). Opera.
36 Violin Studies by Fiorillo, with a 2nd vln. part added, fingered and bowed.
A number of Songs, written for and published in various Albums and Collections.
A considerable number of works remain in manuscript.
P. D.

SPONDEE (Lat. *spondæus*). A metrical foot, consisting of two long syllables (— —). (See METRE.)

SPONTINI, GASPARO LUIGI PACIFICO (b. Majolati, near Jesi, Nov. 14, 1774; d. there, Jan. 14, 1851), opera composer, the son of simple peasants. With a view to the priesthood, an uncle gave him elementary instruction and showed at first no sympathy with the boy's love of music, resorting indeed to harsh measures to drive it out of him. The result was that Spontini ran away to Monte San Vito, where he had another uncle of a milder disposition, who procured him music lessons from a certain Quintiliani. In the course of a year the uncle at Jesi relented, took back his nephew, and had him well grounded by the local musicians.

In 1791 his parents took him to Naples, where he was admitted into the Conservatorio de' Turchini, studying counterpoint and composition under Sala and Tritto and singing under Tarantino.¹ In the Neapolitan Conservatories a certain number of the more advanced pupils were set to teach the more backward ones. These 'monitors,' as we should say, were called *maestri* or *maestricelli*.² In 1795 Spontini became a candidate for the post of fourth *maestrino*, but the examiners gave the preference to another pupil. This seems to have roused the lad to special industry, and in a short time he was appointed first *maestrino*. His exercise for the competition of 1795 has been preserved, and is now in the archives of the Real Collegio di Musica at Naples. It must be the earliest of his compositions now in existence.³

Having already composed some cantatas and church music performed in Naples and the neighbourhood, in 1796 Spontini had an opportunity of attempting opera. The invitation came from one of the directors of the Teatro Argentina in Rome, who had been pleased with some of Spontini's music which he had heard at Naples. The professors seem to have refused him leave to go, so he left the Conservatorio by stealth, and reaching Rome, quickly composed 'I puntigli delle donne' with brilliant success.

¹ Fiorino's *Cenno storico sulla scuola musicale di Napoli* (Naples, 1869), vol. I, p. 50. On p. 673 Fiorino speaks of Salieri and not Tarantino as Spontini's master.

* Unknown and not to be found in Schletterer's Catalogue. Probably represented by works lost in manuscript.

He was readmitted into the Turchini at the intercession of Piccinni, who had lived at Naples since his return in 1791, and gave Spontini valuable advice with regard to composition, particularly for his next opera, 'L'eroismo ridicolo.'¹ This also was produced in Rome (1797), as well as a third, 'Il finto pittore' (1798). Next followed three operas for Florence, all in 1798. Meantime Naples had begun to fix its attention on Spontini. 'L'eroismo ridicolo' (one act) was given at the Teatro Nuovo during the Carnival of 1798, and reproduced in two acts as 'La finta filosofa' at the same house in the summer of 1799. In the Carnival of 1800 the same theatre brought out a new work, 'La fuga in maschera.'² At the close of 1798 the court, alarmed at the advance of the French troops, had taken flight to Palermo, and Cimarosa, who as maestro di cappella should have gone too, refusing to stir, Spontini was put in his place, and during 1800 composed for the court in Palermo no less than three operas, in the facile and rapid style of a true disciple of the Neapolitan School. This is specially worth noting, as he afterwards completely changed in this respect, and elaborated most slowly and carefully the very works on which his European fame rests. In Palermo he also began to teach singing, but towards the end of 1800 was forced to leave, as the climate was affecting his health. After supplying more operas for Rome and Venice, he paid a visit to Jesi, and then took ship at Naples for Marseilles. His objective was Paris, and there he arrived in 1803.

From Lully downwards all Italian composers seem to have been impelled to try their fortunes in the French capital, and invariably have had to encounter the onslaughts of the national jealousy. The Bouffonists, Gluck, Cherubini, all went through the same experience; it was now Spontini's turn. The work by which he introduced himself at the Théâtre Italien, 'La finta filosofa,' was, it is true, well received; but when he entered on the special domain of the French opéra-comique he was roughly disillusioned. His first work of the kind, 'Julie, ou le pot de fleurs' (Mar. 1804), failed, and though remodelled by the composer and revived in 1805, could not even then keep the boards.³ The second, 'La Petite Maison' (June 23, 1804), was hissed off. This fate was not wholly undeserved. Spontini had fancied that the light, pleasing, volatile style, which suited his own countrymen, would equally please the Parisians; the melodies, though very attractive, are often trivial. Stronger work than this was needed to compete with Méhul, and Boieldieu, who had

already written the 'Calife de Bagdad.' During this period Spontini was making a livelihood by giving singing-lessons.

His next opera, 'Milton' (Nov. 27, 1804), a little work in one act, is of an entirely different character, the melodies more expressive, the harmony and orchestration richer, the whole more carefully worked out, and the sentiment altogether more earnest. But the most interesting point in the score is the evidence it affords of Mozart's influence. One is driven to the conclusion that Spontini had now for the first time made a solid acquaintance with the works of the German masters. Even in old age he used to speak of Don Giovanni as 'that immortal chef-d'œuvre,' and it was one of the very few works besides his own which he conducted when director-general at Berlin.

'Milton' took at once with the French, and made its way into Germany, being produced in Berlin (translated by Treitschke) Mar. 24, 1806,⁴ Weimar, Dresden and Vienna.

The writer of the libretto, Étienne Jouy, played a considerable part in Spontini's life. He saw in him a man of great dramatic talent, and offered him the libretto of 'La Vestale.'⁵ It was originally intended for Cherubini, but he could not make up his mind to compose it, and after a long delay returned it.⁶ To Spontini it afforded the means of ranking himself at once with the first operatic composers of the day. The score was finished in 1805, and the first performance took place Dec. 15, 1807.

Spontini was now fortunately in favour with the Empress Josephine—to whom he dedicated the score of 'Milton'—and was appointed her 'Compositeur particulier.' A cantata, 'L'ecce-celsa gara,' performed Feb. 8, 1806, at the fêtes given in honour of Austerlitz, helped to increase this goodwill, which proved of vital importance to Spontini in maintaining his ground against the opposition of the Conservatoire. To such a length was this opposition carried that at one of the Concerts Spirituels in Holy Week, 1807, an oratorio of his was yelled off the stage by the students. Meantime, however, through the Empress's patronage, 'La Vestale' was in rehearsal at the Opéra. But so prejudiced were the artists against the work that the rehearsals went on amid ridicule and opposition, both inside and outside the theatre. Some foundation for this no doubt did exist.⁷

⁴ Teichmann's *Literary Remains*, edited by Dingelstedt (Stuttgart, Cotta, 1863), p. 415.

⁵ See Jouy's own account, *Notes anecdotiques sur l'opéra de la Vestale*, in the *Théâtre d'Étienne Jouy* (Paris, 1824), vol. ii. p. 149 et seq.

⁶ So says Fétis. Others have stated that besides Cherubini it had been offered to Méhul, Boieldieu, Paër and others, and that the then unknown Spontini was a last resource. That the latter part of the statement is positively untrue we know from Jouy himself, and the rest will not bear examination. The mistakes as to the details of Spontini's life are very numerous. Jouy even did not know the correct date of his birth, for he speaks of him in 1804 as 'à peine âgé de vingt-cinq ans.' For a long time he was universally supposed to have been born in 1778.

⁷ The 'Vestale' was a marvel of noise for its day, and a good story was current about it in Paris at the time. A well-known physician had advised a friend to go and hear it as a remedy for his deafness, and accompanied him to the theatre. After one of the loudest

¹ I can find no quite satisfactory ground for the statement so often made in print that it was Cimarosa and not Piccinni who gave Spontini instruction in composition.

² Fétis speaks of yet another opera, 'L'Amore segreto' (Naples, 1799), but there is no mention of it in Florimo's 4th volume.

³ At least so says Fétis, who was living in Paris from the middle of 1804-11, and who not only took great interest in Spontini's works but was personally acquainted with him. Ledebur, in his *Berliner Tonkünstler-Lexicon* (Berlin, 1861), p. 501, gives a wholly opposite account, but Fétis seems the more credible witness.

Spontini's thoughts were throughout fresh and significant, but, not having before attempted lyric tragedy, he did not in all cases succeed in giving them a satisfactory form. Then began an interminable altering and remodelling on his part; the most trying experiences at rehearsals did not discourage him from again and again re-casting passage after passage, until he had hit on the best possible form. This indefatigable polishing and experimenting became henceforth one of his characteristics, and instead of diminishing, as he acquired command of his means, as might have been expected, each new work seemed to strengthen the habit.

The success of 'Vestale' was the most brilliant imaginable, and it long remained a favourite with the Parisians, having been performed 200 times as early as the year 1824. The cast on the first night was as follows:

Licinius, Nourrit; Cinna, Lais; the High-Priest, Dérivis; the Chief-Augur, Bonel; A Consul, Martin; Julia, Mme. Branchu; the Chief Vestal, Mme. Armand.

It soon became known beyond France. The first performances at San Carlo in Naples (to an Italian translation by Giovanni Schmidt) took place Sept. 8, 1811.¹ In Berlin it was given on Jan. 18, 1811, to a translation by Herklots, at Munich on Jan. 14, and Würzburg, Jan. 10, 1812.

Jouy drew the material of his poem, the action of which takes place in the year of Rome 269, from Winckelmann's *Monumenti antichi inediti*. As for the music it is so entirely new, and so utterly unlike the Neapolitan style, that it is not to be wondered at if the malicious story that Spontini was not the composer of it has occasionally been believed. Of the influence of Mozart we have already spoken, but that of Gluck, with whose works he became acquainted in Paris, was more important still. With Gluck he shares that touch of grandeur, the refined melancholy of which is often so peculiarly attractive, though as a rule the depth of Gluck's sentiment is beyond the reach of the Italian master. As with Gluck too the dramatic gift preponderates in Spontini over the purely musical.

Between the 'Vestale,' which we take to have been finished in 1805, and Spontini's next opera four years elapsed. To this period apparently belongs a collection of six songs, with accompaniment for PF. or harp, entitled

'Sensations douces, mélancoliques et douloureuses, exprimées en vers par M. de G.—L., et en musique avec accompagnement de piano ou harpe par Gaspard Spontini, Maître de Chapelle du Conservatoire de Naples.'

His next opera was 'Fernand Cortez,' the first performance of which took place Nov. 28, 1809. The libretto was again by Jouy, and not

by Esménard,² who merely made some alterations and additions. Napoleon took an interest in the production of 'Cortez,' from an idea that it might influence public opinion in favour of his plans for the Spanish war, then in progress.³ Its success was very great, equalling if not exceeding that of the 'Vestale.' On the whole we should not be wrong in pronouncing 'Cortez' the more finished work of the two. The harmony is stronger, the tendency (latterly so exaggerated) to pile up means in order to produce imposing effects is still kept within due bounds. Remarkable skill is shown in the treatment of the masses, and the construction of the larger dramatic forms. Throughout we are brought in contact with an individual artist, who has created for himself his own means of expression.⁴ The certainty of touch, too, in the different characters is worthy of all praise. Here Spontini is seen to be a worthy successor of Gluck, who was the first to attempt this kind of problem in his 'Paris et Hélène.'

The form in which we know 'Cortez' is not that in which it first appeared. After a long interval it was revived May 26, 1817, in an entirely new shape. Esménard was dead, and for the alterations in the poem Jouy was entirely responsible. The third act became the first, the first act the second, and a part of the second the third; some passages were suppressed and others added, and the part of Montezuma was entirely new.

In 1810 Spontini became conductor of the Italian opera, which was united with the Comédie Française under the title of 'Théâtre de l'Impératrice,' and located at the Odéon. He formed a distinguished company of singers, improved the orchestra, and threw more variety into the repertory. One signal service was his production, for the first time in Paris, of 'Don Juan' in its original form. He also instituted Concerts Spirituels, at which he successfully introduced such works as Mozart's Requiem, Haydn's Symphonies, and extracts from the 'Creation.' But he did not keep the conductorship long. Differences arose between himself and Alexandre Duval, the director of the theatre, and in 1812 Spontini was dismissed from his post by de Rémusat, surintendant of the imperial theatres.

On the restoration of the Bourbons in 1814 Spontini was reinstated, but soon gave up the post to Catalani for a money consideration. His conduct as conductor of the opera does not give a favourable idea of his character. When Count Brühl was in Paris, Spontini was described to him by the managers of the Opéra as 'grasping

burst, 'Doctor' cried the friend in ecstasy, 'Doctor, I can hear!' but alas, the doctor made no response, the same noise which had cured his friend had deafened him.

¹ See Florimo, *Scuola musicale di Napoli*, iv. 268. In his earlier work, *Cenno storico sulla Scuola musicale di Napoli* (Naples, 1869), p. 631, he says the first performance took place in 1809.

³ *Théâtre d'Étienne Jouy*, vol. ii. p. 199 et seq.

⁴ In face of this self-evident fact but little importance will be attached to the discovery made in Paris that the trio 'Créateur de ce nouveau monde,' was an imitation of an 'O Salutaris Hostia' of Gossec. See *Journal des Débats* for June 1, 1817.

and indolent; ill-natured, treacherous, and spiteful.' ¹ Catalani, too, always averred that he had treated her badly. Some, however, took a more favourable view, and maintained that he had been both zealous and successful in his efforts for the furtherance of art. Fétis believed that it was not Spontini but Duval who should have been dismissed in 1812. It is curious thus to find the same difference of opinion in Paris with regard to Spontini's character which was afterwards so noticeable in Berlin.

On May 30, 1814, Louis XVIII. became king of France, and in commemoration of the event Jouy and Spontini wrote a festival-opera in two acts called 'Pélage, ou le Roi de la paix.' The first performance took place Aug. 23, 1814. The work is of no value and must have been very quickly composed.

He next took part with Persuis, Berton and Kreutzer in an opéra-ballet, 'Les Dieux rivaux,' produced June 21, 1816, in honour of the marriage of the Duc de Berri. Spontini's share was confined to two or three dances, and a song, 'Voici le Roi, Français fidèles,' of little value. Other ballet-music, however, composed for Salieri's 'Danaïdes,' rises to the level of 'Cortez' and the 'Vestale.' The opera, revived with this addition Oct. 22, 1817, was enthusiastically received.

But these *pièces d'occasion* sink into insignificance before the grand opera 'Olympie,' 'imitated' by Briffaut and Dieulafoy from Voltaire's tragedy. Spontini took a most unusual length of time for the composition. He was at work upon the last act in Dec. 1815, and yet the opera was not finished by Jan. 1819.² After so much trouble and pains he not unnaturally considered it his best work. At the first performance (Paris, Dec. 15, 1819) a bitter disappointment awaited him, for the opera failed in spite of his numerous supporters, and of the generally favourable disposition of the Parisians towards him. Spontini, however, was not the man to throw up his cause for a first failure. The libretto was chiefly to blame. The writers had adhered too closely to Voltaire, without remembering the requirements of the music, or the established forms of 'Grand' opera. The tragical conclusion especially was objected to as an innovation. This was remedied first of all, and a happy ending substituted. By Feb. 1820, Spontini was at work on the revision, which he completed in less than a year, and the opera was produced in its new form, May 14, 1821, at Berlin. In 1822 it was again revised, the changes this time being in the airs for Olympie and Cassandre, the duet for the same in the first act, and a new scene with terzetto in the third. As this last is not in-

cluded in the printed edition it looks as if the final form of the opera had not even yet been attained. Schlesinger of Berlin published a complete pianoforte score in 1826.³ The opera was again put on the stage in Paris, Feb. 28, 1826, and by Mar. 15 it had already been played six times.⁴ Each time it pleased more, and at last Spontini was able to count it among his great triumphs. It was, however, only in Berlin, where he settled in 1820, that it kept a place in the repertory, though it has now completely disappeared from musical life.

'Olympie' stood alone at this period for grandeur of conception. True, in isolated scenes of the 'Huguenots' and the 'Prophète,' Meyerbeer approached his predecessor, but he never succeeded in creating so well-proportioned a whole. The unity of design is remarkable, each act seems to be cast in one mould; and this from the fact that musically the several scenes of each act run into each other in a much more marked manner than in 'Cortez' or the 'Vestale.' The principal characters are well defined, and the tone assigned to each at the start is skilfully maintained. But these qualities are accompanied by defects, the lack of charm in the details and of variety in the accompaniments; nor is there plasticity of melody nor the power of assigning the instrumental music its due share in the dramatic development. In all these respects he was far surpassed by Cherubini and Weber, each in his own line.

Whilst Spontini was busy in Paris composing 'Olympie,' the way was being prepared for the most important event in the second half of his life—his summons to Berlin.⁵ King Frederick William III., during a visit of two months to Paris (Mar. 31 to the beginning of June 1814), heard Spontini's operas several times, and was deeply impressed by them. Not only was 'Cortez' at once put in rehearsal at Berlin and produced Oct. 15, 1814, but the King, on the return of peace, occupied himself with various plans for improving the state of music in Prussia, one of which was to give fresh impulse to the court Opera by engaging a conductor of acknowledged ability. For this last post Spontini was the man fixed upon. So far back as the autumn of 1814 proposals had been made to him at Vienna, offering him the then immense salary of 5000 thalers (£750) on condition of his furnishing two operas a year for Berlin. Spontini was inclined to accept, but the plan did not meet with the approval of the Intendant of the royal theatre—Count Brühl, who had succeeded Iffland in Feb. 1815. Brühl's opinion was entitled to the more weight as there had scarcely ever

⁵ Papers belonging to the royal theatres of Berlin and the Prussian Royal Family were consulted for the facts here related. The details were discussed more fully by the writer in former editions of the Dictionary.

been a theatrical manager in Germany who knew his business so well, and he was doubtful of Spontini's capabilities as a conductor. (See BERLIN, section OPERATIC HISTORY.)

It was not until 1819 that the contract was drawn up, signed by the King on Sept. 1, giving Spontini the titles of chief Kapellmeister, and general director of music, with an additional one of 'Superintendent-General of the Royal Music' to be borne abroad.

Although nominally subordinate to Brühl, Spontini was by this contract virtually made his colleague. Brühl's experienced eye, however, soon detected certain passages in the document admitting of two interpretations, and exposing the management to all the dangers of a divided authority. He could not help feeling mortified at the way he had been superseded in the business; this would naturally make him mistrust Spontini, and thus the two came together under unfavourable auspices. The Opera was at this time, thanks to Brühl's exertions, in a high state of efficiency. The company was unusually good, and the band had been well trained by Bernhard Weber. Brühl took immense pains to secure finish in the performances, had added to the repertory all the great masterpieces, and had introduced 'Fidelio' and 'Armida,' besides establishing permanently in Berlin other operas of Gluck. He had also mounted the 'Vestale' and 'Cortez' with the utmost care and intelligence, and was entitled to boast that he had made the Berlin opera the first in Germany, as indeed every one allowed. Spontini found neither blemishes to remove nor reforms to introduce.

He started with the best intentions. Brühl was informed of various plans for increasing the orchestra, establishing a training-school for the chorus, and introducing new methods into the existing singing-school. He was considering the best means of educating the singers in the dramatic part of their art, and drew up a new set of rules for the band. Little, however, came of all this, partly because several of Spontini's proposals were already in existence in other forms, and partly because of his own want of purpose and temper. In fact, it soon came to a trial of strength between him and Brühl, leading to ill-concealed irritation on both sides.

During the preparations for the performance of 'Olympia,' Spontini had an opportunity of appearing before the court and public with a new composition. In the beginning of 1821 the Grand Duke Nicholas, heir-presumptive to the throne of Russia, and his consort, paid a visit to Berlin, and court festivities on a grand scale were instituted in their honour. Moore's *Lalla Rookh* was then much talked of, and Brühl conceived the idea of representing the principal scenes in a series of *tableaux vivants*. Schinkel undertook the scenery and arrangement of the groups, and Spontini composed the

songs, introductory march, and dance-music.¹ The performance took place Jan. 27, 1821, at the Royal Palace, and was pronounced to be the most brilliant and quaintly beautiful thing of the kind ever seen.

The first performance of 'Olympia' was eagerly anticipated. Mar. 5, 1821, was first fixed, but it was postponed till May 14, a delay for which Spontini was to blame. The translator, E. A. Hoffmann, only got the last act from him bit by bit, the chorus-master had not seen a note of it by Feb. 18, nor had the ballet-master been consulted. Spontini insisted on at least three months' rehearsals. The expenditure on the *mise-en-scène* was so lavish that even the king remonstrated. The chorus and orchestra were materially strengthened, the scenery was by Schinkel and Gropius, and there were forty-two rehearsals. The result was one of the most brilliant and perfect performances ever seen, and an enormous success. Even Brühl was carried away, and Spontini's triumph was complete. Even his opponents acknowledged that 'Olympia' had no rival among modern operas.

Spontini's supremacy in the musical world lasted exactly five weeks, for on June 18, 1821, 'Der Freischütz' was produced at the newly erected theatre in Berlin. Its immediate success may not have more than equalled that of 'Olympia,' but it soon became evident that the chief effect of the latter was astonishment, while the former set the pulse of the German people beating. 'Olympia' remained almost restricted to the stage of Berlin, while 'Der Freischütz' spread with astonishing rapidity throughout Germany and the whole world. Spontini could not conceal that he had, on the morrow of a great triumph, been completely vanquished by an obscure opponent, and that, too, after consciously doing his very utmost. Even this might not have discouraged him, but that in 'Der Freischütz' he was brought face to face with a phase of the German character totally beyond his comprehension. He had no weapons wherewith to encounter this opponent. A man of weaker will would have contented himself with such success as might still be secured in Germany; but Spontini could brook no rival, and finding that he could not outdo Weber's music, tried to suppress him by means wholly outside the circle of art. The success of 'Der Freischütz' did not improve his relations with Brühl, a personal friend of Weber, and a great admirer of his music.

From the first night of 'Der Freischütz' the public was divided into two parties. The national party, far the strongest in intellect and cultivation, rallied round Weber. The King and the court persistently supported Spontini, though even their help could not

¹ *Lalla Rookh*. A festival play with songs and dances, performed at the Royal Palace of Berlin, Jan. 27, 1821. Edited by Count Brühl and S. H. Spiker. Berlin, L. W. Wittich, 1822.

make him master of the situation. The Censorship interfered to check the expression of public opinion against him, and his complaints of supposed slights were always attended to.¹ But his artistic star, which had shone with such lustre after the first night of 'Olympia,' was now slowly setting.

Whether Spontini had a specific talent for conducting cannot be determined, for as a rule he conducted only two operas besides his own—'Armida' and 'Don Giovanni,' and these he knew thoroughly.² But if he never completely mastered the technicalities of the art, his manner of conducting recitatives especially being clumsy and undecided,³ and was thus very slow in rehearsing a work, the same laborious accuracy which he showed in composing was carried into every detail of the performance. He never rested till each part was reproduced exactly as it existed in his own imagination, which itself had to be cleared by repeated experiments. His rehearsals not unfrequently lasted from 8 A.M. till 4 P.M., or from 5 P.M. till 11 at night. He only treated others, however, in the same way that he treated himself, for no trouble was too great for him to take in revising his work down to the smallest particulars. When the first night arrived, every member of the orchestra knew his work by heart, and Spontini might beat as he liked, all went like clockwork.⁴ He insisted on the complete fusion of the vocal and instrumental, the dramatic and the musical elements, and demanded from the chorus, as well as the solo-singers, an entire absorption in their parts, and an intelligent rendering of each situation. His love for the grandiose and the awe-inspiring led him to employ all the resources of decoration, and what then seemed enormous masses of musicians, singers and dancers; and also to employ the strongest accents and most startling contrasts. 'His forte,' says Dorn, 'was a hurricane, his piano a breath, his crescendo made every one open their eyes, his diminuendo induced a feeling of delicious languor, his sforzando was enough to wake the dead.'⁵ His appearance at the head of his musicians was almost that of a general leading an army to victory. When he glided rapidly through the orchestra to his desk every member of the band was in position, and on the alert to begin. At such moments he looked an aristocrat to the backbone, but also an autocrat who would insist on subjugating all other wills to his own. The pedantic side of his character also came out in many little traits—he could only conduct from a MS. score, and his desk must be of a certain peculiar construction. His baton was a

thick stick of ebony with a solid ivory ball at each end; this he grasped in the middle with his whole fist, using it like a marshal's staff.⁶

By May 14, 1821, the 'Vestalin,' 'Cortez' and 'Olympia' had all been produced according to the composer's own ideas at the Berlin opera, where they long remained stock-pieces. But their frequent repetition was more to gratify the king than the public, and indeed the theatre had soon to be filled by a large issue of free admissions. A new opera of his was, however, still an exciting event, partly because of his own personality and position, partly because the public was sure of a splendid spectacle. He was bound to furnish two grand operas every three years; 'Olympia' counted as one, and by the end of 1821 he was thinking of the second, and chose the 'Feast of Roses,' from Moore's *Lalla Rookh*, influenced, no doubt, by the success of his earlier Festspiel, and the prospect, welcome to a slow worker, of using portions of his old material; but the subject did not seem very congenial. The libretto was written by Herklots, librettist to the Opera. The first performance of 'Nurmahal' took place May 27, 1822, in honour of the marriage of the Princess Alexandrina of Prussia, to whom the Emperor dedicated the PF. score (Schlesinger). This is not, as has often been said, merely a revised version of 'Lalla Rookh,' comparatively little of that music having been used in it.

The merits of the libretto of the 'Vestale,' 'Cortez' and 'Olympia' outweigh their defects. Not so, however, that of 'Nurmahal'; its plot and characters are alike insipid, and it is in fact a mere *pièce d'occasion*. The Oriental colouring, which must have been its attraction for Spontini, still forms its sole interest. But, inferior as it is to 'Oberon,' it gives a high idea of its author's dramatic instinct, when we consider the inability French and Italian composers as a rule showed in dealing with the fantastic and mythical.

On June 9, 1821, Spontini started for a seven months' leave. He went first to Dresden, and there met Weber. Weber was cordial and obliging, while Spontini, though polite in manner, took pains to make his rival feel the newness of his reputation as a composer.⁷ By June 29 he was in Vienna trying to arrange a performance of 'Olympia' for the following season; but this did not take place. Thence he went to Italy, revisiting his birthplace; and by September was in Paris at work on the revision of 'Olympie.' He also made some experiments on 'Milton,' telling Brühl (Jan. 12, 1823) that he would put it before him in three different forms. By the end of January he was back in Berlin, apparently anxious to keep on good terms with Brühl, though such good

resolutions seldom lasted long. One of their many differences was on the subject of star-singers (*Gastspieler*). These Brühl wished to encourage, as a means of testing the artists, and their chance of popularity; but Spontini disliked the system.

He had now been in office four years, and the stipulated two grand operas every three years, or smaller one each year, were only represented by a *scena* or two for 'Olympia,' and a couple of pieces for 'Nurmahal.' It was plain that he had undertaken a task wholly beyond his strength, owing to his pedantic manner of working. He thought (Aug. 2, 1823) of turning 'Milton' into a grand opera with recitatives, choruses and ballets, but soon relinquished the idea, and by Oct. 17 was 'busy, night and day, with "Alcidor".' The libretto was by Théaulon, who had formerly altered 'Cortez.' The first performance was on May 23, 1825, and the reception from Spontini's adherents was unmistakably hearty, many outsiders being dazzled by its new effects of scenery and music; the national party, however, were louder than ever in their disapprobation.¹

Another grand opera was due for the summer of 1826, and a week after the production of 'Alcidor' Spontini asked Count Brühl whether a revised and lengthened version of 'Milton' would do for the purpose. The Count thought the material too scanty, but the King (June 29) agreed to the proposal. Spontini, having obtained eleven months' leave, started for Paris, where he was present at a revival of 'Olympie' on Feb. 28, 1826, returning immediately afterwards to Berlin. Nothing more was heard of 'Milton,' and during this year he furnished no work for the King's theatre. Ernst Raupach was now librettist to the Opera, and Spontini agreed with him on a subject from German mediæval history, which eventually became the opera 'Agnes von Hohenstaufen.' He set to work with the seriousness which was his main characteristic as an artist: read, studied, and did everything to imbue himself with the spirit of the epoch, one wholly foreign to anything he had before attempted.² The first act—long enough for a complete opera—was ready by 1827, and performed May 28. The whole three acts were finished in 1829, and produced June 12 for the marriage of Prince Wilhelm (afterwards the Emperor William I.). Spontini, dissatisfied with his work, had the libretto altered by Baron von Lichtenstein and other friends, and made more vital changes in the music than in almost any other of his grand operas. In this form it was revived Dec. 6, 1837.

It was the last opera which Spontini completed. Various new plans and schemes continued to occupy him, and some progress was

made with a poem by his old friend Jouy, 'Les Athéniennes,' first offered him in 1819, and accepted in a revised form in 1822. In a review of the poem³ written in 1830, Goethe implies that the music was complete, but at Spontini's death nothing was found but unimportant fragments.⁴ An opera founded on English history occupied him longer. We have already mentioned the revision of his 'Milton.' His studies for this deepened his interest in the English history of the 17th century. In 1830 Raupach wrote a libretto for a grand opera, 'Milton,' which was bought by the committee of management for 30 Friedrichs d'or, and placed at Spontini's disposal.⁵ The only portion of the smaller opera retained was the fine Hymn to the Sun. After completing the revision of 'Agnes von Hohenstaufen,' Spontini wrote to the Intendant (May 9, 1837) that he hoped in the winter of 1838 to produce 'Miltons Tod und Busse für Königsmord' (Milton's death, and repentance for the King's execution). He spent the summer of 1838 in England, studying historical, national and local colouring for this 'historico-romantic' opera. Raupach's poem, extended and revised by Dr. Sobernheim, had now assumed a political and religious tendency, so distasteful to the King as to make him prohibit the opera. Further alterations ensued, and it became 'Das verlorene Paradies' (Paradise Lost). By May 1840 the score of part of the 1st, and two-thirds of the 2nd act was complete. Up to Mar. 1841 he certainly intended finishing it, but not a note of it has ever been heard.

Spontini's other compositions during his residence in Berlin are unimportant. A hymn for the coronation of the Emperor Nicholas of Russia, to words by Raupach, was performed at Berlin, Dec. 18, 1826, and May 9, 1827.⁶ A cantata to Herklots' words, 'Gott segne den König,' had a great success at the Halle Musical Festival in Sept. 1829, which Spontini conducted so much to the general satisfaction as to procure him an honorary Doctor's degree from the University, and a gold medal inscribed *Liricae Tragoediae Principi Germania meritorum cultrix*. A 'Domine saluum fac regem,' a 12, with accompaniment of organs, trumpets, violoncelli and basses, was written on Oct. 15, 1840, for presentation to the King. Besides these he published a number of French, German and Italian vocal pieces, with PF. accompaniment, the best of which is 'Die Cimbern,' a war-song for three men's voices.⁷

Considering his great position, Spontini did

² *Spontini in Deutschland*, p. 102 (Leipzig, Steinaecker und Hartknoch, 1830).

not accomplish much for music in Berlin. His efforts as a rule were concentrated on the operas which he himself conducted; the pieces directed by his vice-conductors went badly, partly because Spontini exhausted the singers, and partly because he took little interest in the general repertory. He had, too, no power of organisation or administration. As long as the excellent material lasted which Brühl transferred to him in 1820 this defect was not glaring, but when his solo-singers began to wear out and had to be replaced, it was found that he had not the judgment, the penetration, nor the impartiality necessary for such business. The art of divining the taste of the public, of at once meeting it, elevating and moulding it—the art, in fact, of keeping the exchequer full without sacrificing artistic position—this was wholly out of his reach. At the King's theatre, the audiences steadily fell off, especially after the opening of the Königstadt theatre in 1823. In time even the admirers of his music felt that his personal influence was bad, and that the opera would never prosper as long as he remained at its head.

Spontini was to have the receipts of the first nights of his own operas for his annual benefit, or in default of such representations a sum of 4000 francs. In the latter case he might give a concert, and in fact he gave a considerable number, both vocal and instrumental. 'My concerts,' in his own words, 'are dedicated to the great masters, whose memory I strive to keep alive with the public, while testifying my own respect by performing their works in the most brilliant and complete manner possible.'¹ His programmes consisted principally of German music, Handel, Haydn, Mozart and Beethoven. The first performance in Berlin of Beethoven's symphony in A was at a concert of Spontini's on May 12, 1824, and on Apr. 30, 1828, he gave Beethoven's C minor symphony, the Kyrie and Gloria from his Mass in D, the overture to 'Coriolan,' and the Credo from Bach's B minor Mass. As Bach's Mass had only just been published by Nägeli of Zürich, Spontini was the first to introduce a portion of it to the public of Berlin, as he had been to acquaint them with Beethoven's masses.²

As we have already mentioned, Spontini's late operas had no success outside Berlin. Except a couple of stray performances of 'Olympia' at Dresden and Darmstadt, they did not even gain a hearing. Occasionally he conducted one of his own works, as for instance the 'Vestale' at Munich³ (Oct. 7 and 11, 1827), and Hamburg (Sept. 18, 1834). But such personal contact does not seem to have led

to sympathetic relations. Speaking generally, the 'Vestale' and 'Cortez' were the only operas of his appreciated in Germany.

In Berlin itself, each year added to the number of his opponents. He was morbidly sensitive to public opinion, and, against the advice of judicious friends, he replied in person to anonymous attacks, suffered flatterers to use unpractised pens in his behalf, and even called in the Censorship. Such steps could but damage his cause.⁴ His ten years' contract finished in 1830; it was renewed, on terms more favourable to the Intendant-General—Brühl had resigned in 1828, being succeeded by Count Redern—and this, with the fact of his ceasing to compose, gave an opportunity to his enemies.

On June 7, 1840, King Frederick William III. died, and Spontini's one mainstay was gone. Though obliged occasionally to express displeasure at his perpetual squabbles with the Intendant, the King had been steadfast in his attachment to Spontini and his music. The new King made no change in his position, but his sympathies were in a different direction, and no place was destined for Spontini in the grand designs he was elaborating. This soon became known. If Spontini could have kept himself quiet the change might have been delayed, but he was injudicious enough to lay before the King a paper complaining of the Management and of Count Redern. The King questioned the Intendant, and was satisfied with his explanations, but to obviate all appearance of partisanship he appointed a commission to inquire into Spontini's grievances. In the meantime the press had taken up the matter. A definite attack was made, to which Spontini was unwise enough to reply (*Leipzig Allgemeine Zeitung* of Jan. 20, 1841) in such a manner as to give Count Redern ground for an indictment for *lèse-majesté*, and (on Feb. 5) to a direct reprimand from the King.

But this treatment of the royal house by a foreigner who had enjoyed for years almost unexampled court favour immensely increased the public feeling against Spontini, and for two months he remained in private. On Apr. 2, however, in spite of repeated warnings, he took his seat to conduct 'Don Juan.' His appearance was the signal for a tremendous uproar, and cries of 'hinaus! hinaus!'—'off! off!' He stood firm, began the overture, and would have proceeded with the opera, but a rush was made to get at him on the stage, and he was forced to retire from the theatre. He never entered it again as conductor.

The trial kept Spontini in Berlin all the

F. L., and *The Lament of Herr Ritter Gasparo Spontini . . . over the decline of dramatic music*. Translated from the French, with explanatory remarks by a body of friends and admirers of the great master. Leipzig, Michelsen, 1837.

summer, but he obtained leave from Aug. 31-Dec. 10, and went to Paris. His connexion with the opera was severed by the King on Aug. 25, on terms of royal generosity. He was to retain his title and full salary, and live where he pleased, 'in the hope that in repose he might produce new works, which the King would hail with pleasure if he chose to conduct them in person at Berlin.' To these munificent arrangements no conditions whatever were attached. Spontini was convicted of *lèse-majesté*, and condemned to nine months' imprisonment, a sentence confirmed by the higher court to which he appealed, but remitted by the King. In the face of all this he had the effrontery to demand a further sum of 46,850 thalers, on the ground that the Management had not supplied him with a sufficient number of libretti, whereby he had lost the sum guaranteed him for first nights, besides profits from other performances and from publishers—reckoned at 3000 thalers for each opera! The King referred him to the Law Courts, but Spontini's better nature seems at length to have prevailed, and he withdrew his application Dec. 23, 1841. When he finally left Berlin in the summer of 1842, the King granted him a further sum of 6000 thalers. His friends gave him a farewell concert on July 13, 1842, for which he wrote both words and music of an 'Adieu à mes amis de Berlin.'¹

He left few friends behind him. He was, however, long and gratefully remembered by the members of the King's band. The orchestra were proud of their majestic conductor, who so often led them to triumph, and who, moreover, had a tender care for their personal interests. The poorer members found his purse ready of access, and in 1826 he established a fund for them, called by special permission the 'Spontini-Fonds,' to which he devoted the whole proceeds of his annual benefit concerts. The fund speedily attained to considerable proportions, and still exists, though the name has been changed.

Of his last years there is little to relate. On leaving Berlin he went to Italy, and in Jan. 1843 was in Majolati. In that year he left Italy and settled at Paris, where he had many pleasant connexions through his wife, an Erard, whom he had married soon after the production of 'Cortez.' He had been a member of the Institut since 1838. In 1844 the Pope made him Count of S. Andrea, and other distinctions followed. But the hope expressed by King Frederick William IV. that he would produce other works was not realised; Berlin had broken him down physically and mentally. He revisited Germany two or three times. In 1844 he was in Dresden, where Richard Wagner had prepared for him a performance of the 'Vestale,' which he conducted with all his old

energy.² He was invited to the Cologne Musical Festival of May 1847 to conduct some excerpts from 'Olympia,' and had a warm reception, but was too infirm to conduct, and his place was taken by Dorn, then Kapellmeister at Cologne.³ In August he visited Berlin, and was most graciously received by the King, who gave him an invitation to conduct some of his own operas at Berlin during the ensuing winter. He was much delighted, and thought a great deal about the performances after his return to Paris, and also of the best manner in which he could express his gratitude and devotion to the King; but the project was never realised, as he was ill all the winter. In 1848 he became deaf, and his habitual gravity deepened into depression. He went back to Italy, and settled at Jesi, where he occupied himself in founding schools and other works of public utility. In 1850 he removed to Majolati. Having no children he left all his property to the poor of Jesi and Majolati.

P. S., abridged.

SPONTONE (SPONTINI), BARTOLOMMEO, a madrigal composer, a pupil of Nicola Mantovano, and maestro di cappella in the cathedral of Verona. He published a first book of Masses, *a* 5, 6 and 8, in 1588; a book of four-part madrigals in 1558; and three sets of madrigals for five voices at Venice in 1561 (2nd ed. 1583), 1567 and 1583. Others are contained in the collections of Waelrant (1594) and others. Cipriano de Rore prints a Dialogo, *a* 7, by him in 1568. A Mass, *a* 6, is in vol. ii. of Torchi's 'L'arte musicale in Italia.'

SPRING GARDEN, see VAUXHALL GARDENS.

SQUARCIALUPI, ANTONIO (*d.* Florence, c. 1475) (also called Antonio degl' organi), a famous Florentine organist who lived in the 15th century, and who was living in Siena in 1450, and at the Florentine court in 1467, as organist of Santa Maria. None of his compositions are extant, and he is only known as an esteemed contemporary of Dufay. A letter written by him to Dufay, dated 1467, is given by Otto Kade in the *Monatshfte* for 1885, No. 2. See also Haberl's 'Dufay' in the *Vierteljahrsschrift*, i. 436. A volume of music by various early composers, which was in Squarcialupi's possession, is in the Bibl. Laurenziana in Florence, and is described in J. Wolf's *Geschichte der Mensural-Notation*, pp. 228 ff. There is a monument to his memory in the Duomo at Florence. (*Q.-L.*; *Riemann.*)

M.

SQUIRE, WILLIAM BARCLAY (*b.* London, Oct. 16, 1855; *d.* there, Jan. 13, 1927), one of the most distinguished musical scholars of his day, was educated privately, at Frankfort, and at Pembroke College, Cambridge, where he took the B.A. degree in 1879, taking honours in the History Tripos. He proceeded to the M.A.

² For a clever and amusing account of it see Wagner's *Gesammelte Schriften*, v. 114.

³ Dora's *Aus meinem Leben*, vol. iii. p. 21.

¹ Robert, p. 52, etc.

degree in 1902. While still an undergraduate he was asked by Sir George Grove to contribute to the first edition of this Dictionary an account of the music in the Fitzwilliam Museum. He was also a prominent member of the Cambridge University Musical Society. He became a solicitor in 1883, and practised until 1885, when he was appointed an assistant in the library of the British Museum, his special knowledge of music and of modern languages fitting him for the superintendence of the printed music. In this capacity he earned the gratitude of students by the unflinching generosity with which he placed his great knowledge at the disposal of those who genuinely desired to make researches among the treasures of the museum. After his retirement (1917) his connexion with the British Museum was maintained since he undertook the charge of the valuable Buckingham Palace collection of music placed there by King George V. and known as the Royal Music Library. Squire was engaged in arranging and cataloguing this collection up to the time of his death, and his catalogue of the Handel MSS. was then in the press.

For some years he acted as musical critic, writing in 1890-94 for the *Saturday Review*, in 1893 for the *Westminster Gazette*, for the *Globe* in 1894-1901, and for the *Pilot* in 1900-04. He also wrote the libretti of Stanford's 'Veiled Prophet' and Bridge's 'Callirrhoe.' He was honorary secretary of the Purcell Society, and for several years was joint honorary secretary to the International Musik-Gesellschaft. For the three editions of this Dictionary, for the *Encyclopædia Britannica*, for the *Dictionary of National Biography*, and for *Archæologia* and other periodical publications, English and foreign, he wrote much that is of permanent value, as his sound knowledge of the art went hand in hand with minute historical accuracy. He was elected a fellow of the Society of Antiquaries in 1888. His *Catalogue of Accessions to the old Printed Music in the British Museum since 1886* appeared in 1899, a list of music in the Chapter Library of Westminster Abbey was printed as a Supplement to the *Monatshfte* for 1903, and a *Catalogue of the Printed Music in the Library of the Royal College of Music* appeared in 1909. (This library was arranged by him and was under his supervision.) He edited Purcell's harpsichord music for the Purcell Society, and prepared new editions of Byrd's masses and Palestrina's *Stabat Mater*; and he issued a valuable series of madrigals (see *AUSGEWÄHLTE MADRIGALE*) and several motets, etc. Squire collaborated with J. A. FULLER MAITLAND (*q.v.*) in the issue of the 'Fitzwilliam Virginal Book' and other publications. Apart from music, he edited a reprint of Robert Jones's *Muses Garden for Delights* (words only, 1901), and worked with Helena, Countess of Radnor, in preparing the

sumptuous *Catalogue of the Pictures in the Collection of the Earl of Radnor* (1909). During the war Squire did valuable work for the Foreign Office, and his handbook on Tunis, prepared there, was officially adopted by the French Government after the Versailles Conference. C. L. G., addns.

SQUIRE, (1) WILLIAM HENRY (*b.* ROSS, Aug. 8, 1871). His father was a clever amateur violinist, and the boy's first teacher. He gained a violoncello scholarship at the R.C.M. in 1883, which was extended for a further period of three years. He studied under Edward Howell, and made his début at a concert of Albeniz at St. James's Hall, Feb. 12, 1891. At the Crystal Palace he first appeared on Apr. 20, 1895, in Saint-Saëns's concerto in A. In the same year he held the place of principal violoncello at the Royal Opera, Covent Garden. He was elected an associate of the R.C.M. in 1889. He has written a concerto for his instrument, very numerous and successful works in a popular style, many songs, two operettas (unpublished), and has had a useful and prosperous career as a concert-player and in orchestras; he was a prominent member of the original Queen's Hall Orchestra, and for some time belonged to the London Symphony Orchestra.

His sister, (2) MME. EMILY SQUIRE, a pupil of the R.C.M. and the R.A.M., became a successful soprano singer. She first appeared at Bath in 1888, and at the Crystal Palace in 1891. M.

SRB-DEBRNOV, JOSEF (*b.* Prague, 1836; *d.* there, 1904). A Czech musical writer who was an intimate friend of SMETANA and Karel BENDL (*q.v.*) and played an active part in the musical life of Prague. He adopted the name of Debrnov as a pseudonym. For many years he undertook the business management of the choral society Hlahol (1864-65 and 1874-91). He wrote (in Czech): *The Science of Instrumentation* (1883); *A Short History of the Prague Conservatoire* (1877); *A History of Music in Bohemia and Moravia*. R. N.

STAATSOPER, see BERLIN.

STABAT MATER. This mediæval poem, which has had a greater popularity than any similar composition, is of uncertain authorship. It is generally ascribed to Jacopone. It was not liturgical, and had originally no music of its own; but it came into popular use as a devotion in the 13th century; indulgences were granted to those who used it, and finally it crept into liturgical books and was provided with musical settings. It did not obtain its place in the Roman Missal as a Sequence till 1727, nor did a cento from it obtain a place as a hymn in the Breviary till even later. The musical history of the poem, therefore, is concerned with the polyphonic and later writers. M.

The classical polyphonic settings are those of

JOUSQUIN DES PRÉS (Vol. II. p. 792), PALESTRINA (Vol. IV. p. 28). Famous later examples are by ASTORGA, CLARI, STEFFANI, PERGOLESE, HAYDN. Outstanding examples of the 19th century and after are by ROSSINI, VERDI, DVOŘÁK, STANFORD (1907). C.

STABILE, ANNIBALE (b. Padua), pupil of Palestrina, maestro di cappella at the Lateran, Rome, 1575; from 1576-90 at the German college; in 1592 at S. Maria Maggiore, Rome; and in 1604 Kapellmeister at the Polish court at Cracow. He composed 3 books of motets, 5-8 v., 3 books 5-part madrigals, and 4-part litanies, and single numbers in various collective volumes (Q.-L.; Riemann).

STABILINI, GIROLAMO (HIERONYMO) (b. Rome, c. 1762; d. Edinburgh, July 13, 1815), violinist. Having attained some distinction in Italy he was invited to Edinburgh, to replace Giuseppe Puppo, as leader of the St. Cecilia Hall concerts.

Stabilini arrived at Edinburgh in 1783, and died of dropsy there, being buried in the graveyard of St. Cuthbert's or the 'West Kirk.' His tombstone is still to be seen built into an old boundary wall. Stabilini, though he does not appear to have been of very extraordinary talent, was eminently popular in Scotland, a popularity heightened by his performance and arrangement of Scots airs; 'I'll gang na mair to yon toon' being especially associated with him.

There is a head of him in Kay's *Edinburgh Portraits*. F. K.

STACCATO (Ital.) (Fr. *détaché*) = 'detached,' a word used in all languages to mean the shortening of notes in a phrase so as to separate each from each.

The *staccato* style is indicated either by pointed dashes (·) or round dots (· ·). The distinction between them, not very strictly preserved in practice, is discussed under DASH (q.v.). The *staccato*, unlike its opposite the *legato*, is susceptible of degree, and its effect varies very much according to the amount of accent with which it is allied. Pianists therefore recognise different types of *staccato* according to the technical method by which the effect is obtained, e.g. from the fingers, the wrist or the forearm. The *staccato* varies even more widely on bowed strings according as it is obtained from the point, the middle or close to the nut of the bow, or by means of a springing bow (see SPICCATO and SAUTILLÉ). Notation gives no accurate indication of these different types, but it recognises the *mezzo staccato* (half-detached) in the use of dots combined with a slur, indicating that while the notes are to be separated their relation to one another as parts of the same phrase is to be carefully observed. In the *mezzo staccato* the separation must be no more than a slight check in the tone.

The term *staccato* is occasionally used as a general direction at the beginning of a movement or passage. C.

STADEN, (1) JOHANN (b. Nuremberg, 1581¹; d. there, Nov. 15, 1634). From 1603 to about 1616 he was in the service of the Margrave Christian Ernst of Kulmbach and Bayreuth as court organist. In 1616 he returned to Nuremberg, where he received the appointment of organist, first to the St. Lorenz-Kirche, and shortly afterwards to the more important St. Sebald-Kirche, in which latter post he remained till his death.

Staden occupies a place of some importance in the transition period of musical history at the beginning of the 17th century, when German musicianship was endeavouring to combine with the older style of pure vocal music the advantages of the newer style of instrumental accompaniment with its greater freedom of harmonic modulation. Staden, however, was on the whole more conservative and less enthusiastically progressive than his contemporaries Michael Praetorius and J. H. Schein, not to mention Heinrich Schütz. His publications were fairly numerous, though all are not preserved complete. There are six of church works proper, partly with Latin, partly with German texts, entitled respectively, 'Harmoniae sacrae pro festis praecipuis' 4-8 voc., 1616; 'Harmoniarum sacrarum continuatio' 1-12 voc., 1621; 'Kirchenmusik,' 1 Theil mit 2-14 St., 1625; 'Kirchenmusik,' 2 Theil zu 1-7 St. mit Violon und anderen Inst., 1626; 'Harmoniae novae' 3-12 voc., 1628; 'Harmoniae variatae,' 1-12 voc., 1623. In these works three styles of church music are represented: the pure vocal motet, in which basso continuo is not required; the motet with only basso continuo; and the sacred concerto with obligato accompaniment and instrumental preludes and interludes denominated respectively symphonies and ritornelli.

Another series of Staden's publications consists of sacred music on German texts intended more for private or domestic performance, a kind of music which would seem to have been much in vogue among the Nuremberg citizens of those days. His chief publication of the sort is expressly entitled 'Hausmusik,' which originally appeared in four separate parts in 1623-28, and afterwards in a complete edition in 1646. This work contains 118 mostly short and comparatively simple pieces *a 3-4* for voices, or instruments *ad libitum*, in a few cases instruments *obbligati*. Another work of the same kind, a little more elaborate, is entitled 'Musicalischer Freuden- u. Andachtswecker oder geistliche Gesänge' zu 4-6 St., 1630. Other works belonging to the same class entitled 'Hertzentrosts-Musica,' 1630, and 'Geistlicher Music-Klang,' 1633, contain mostly Lieder for one voice only

¹ Not 1579, as stated in Q.-L.

with continuo accompaniment for organ, lute, or theorbo. Several of Staden's Lieder found their way into later Choral-books. Another department of Staden's activity as a composer consists of secular songs and instrumental dances. Three collections of secular songs *a* 4-5 with an appendix of instrumental dances appeared 1606, 1609 and 1610. Two other collections of dances alone, Pavanes, Galliardas, Courantes, etc., appeared 1618 and 1625. A comprehensive collection of instrumental works by Staden was published posthumously in 1643, containing not only dances, but pieces described as sonatas, symphonies and canzonas. Staden would appear to have been incited to the composition of these instrumental works by his official connexion for a time with the Stadtpfeifer or town musicians of Nuremberg. It only remains to add, *D.D.T.* (second series), VII. i. and VIII. i., contains a selection of Staden's vocal works, including ten Latin motets *a* 4-8 and twenty-five German pieces *a* 3-8, with a full biographical and critical introduction.

(2) SIGMUND GOTTLIEB (or THEOPHIL) (*b.* 1607; *d.* Nuremberg, July 30, 1655), son of Johann. At the age of 13 he was sent by the town authorities of Nuremberg, at the request of his father, to receive further musical instruction from Jacob Baumann, organist and 'Stadtpfeifer' or town musician of Augsburg. This might seem strange, considering that Johann Staden was himself a more distinguished musician than Baumann, but Baumann appears to have had during his lifetime a greater reputation as an instrumentalist. Later on, in 1626, Sigmund was again sent at the expense of the Nuremberg authorities to Berlin to receive instruction in the playing of the viola bastarda, a form of the gamba, from one Walter Rowe or Roy, an English instrumentalist in the service of the Elector of Brandenburg. In 1627 Staden received an appointment as one of the 'Stadtpfeifer' or town musicians of Nuremberg. On the death of his father, he became organist to the St. Lorenz-Kirche in succession to Valentin Dretzel, who took the elder Staden's place as organist to the St. Sebald-Kirche. Whether Staden received any further promotion is unknown. He is now chiefly known as the composer of the first German operatic work that was ever published, an allegorical SINGSPIEL (*q.v.*), the full title of which is:

'Das geistliche Waldgedicht oder Freudenpiel genannt Seelewig. Gesangsweis auf Italienische Art gesetzt, 1644.'

The work is an interesting example of the early monodic style for solo voices with accompaniment of figured bass, but having also short instrumental preludes and interludes, sometimes for viols or violins only, sometimes for three flutes, at other times for two or three 'schalmeien' or oboes. It has been republished by Eitner in modern form with the harmonies of

the figured bass written out. The text is by G. P. Harsdörffer, one of the founders of the Pegnitzschäferlei Gesellschaft in Nuremberg, who brought from Italy to Nuremberg the peculiar taste for artificial pastoralism in poetry, and for the Florentine monodic style of music in association with allegorical and spiritual dramas. Other poetical texts by Harsdörffer were set by Staden as simple Lieder for one voice with figured bass. He did not, however, forsake altogether the older style of choral music. In 1637 he put forth a new edition of Hans Leo Hassler's 'Kirchengesänge mit vier stimmen simpliciter gesetzt' (1608), in which he included eleven new Choral-tunes and settings by his father, and five by himself. He also followed in the wake of his father in the encouragement of domestic sacred music, by publishing, in 1644, two collections entitled 'Seelenmusik,' with settings of hymns *a* 4 with basso continuo, and furnishing new melodies to the various Gesangbücher of the time. *Q.-L.* mentions an Instruction-Book for singing by him, 1648.

J. R. M.

STADLER, MAXIMILIAN, ABBOT (*b.* Melk, Lower Austria, Aug. 4,¹ 1748; *d.* Vienna, Nov. 8, 1833), a sound and solid composer. At 10 he became a chorister in the monastery of Lilienfeld, where he learnt music, completing his education in the Jesuit College at Vienna. In 1766 he joined the Benedictines at Melk, and after taking priest's orders worked as a parish priest and professor till 1786, when the Emperor Joseph, who had noticed his organ-playing, made him abbot first of Lilienfeld, and three years later of Kremsmünster. Here his prudence averted the suppression of that then famous astronomical observatory. After this he lived at various country-houses, then privately at Linz, and finally settled in Vienna. Between 1803 and 1816 he was parish priest at Alt-Lerchenfeld and afterwards in Bohemia. Haydn and Mozart had been old friends of his, and at the request of the widow he put Mozart's musical remains in order, and copied from the autograph score of the Requiem, the Requiem and Kyrie, and the Dies irae, both copy and original being now in the Hofbibliothek at Vienna. (See Vol. III. p. 566.) He also came forward in defence of the Requiem against Gottfried Weber, in two pamphlets—*Vertheidigung der Echtheit des Mozartschen Requiem* (Vienna, 1825-26), and *Nachtrag zur Vertheidigung*, etc. (*ib.* 1827). Stadler was an excellent contrapuntist, and an authority in musical literature and history. His printed compositions include sonatas and fugues for PF. and organ; partsongs; two Requiems; several masses; a Te Deum; 'Die Frühlingsfeier,' cantata, with orchestra, to Klopstock's words; psalms, Misereres, responses, offertoriums, etc.; also a response to Haydn's farewell-card for two

¹ Biemann gives Aug. 7.

voices and PF. (See Vol. II. p. 579.) Among his numerous MSS. are fine choruses for Collin's tragedy, 'Polyxena.' Stadler's greatest work, 'Die Befreiung von Jerusalem,' an oratorio in two parts, words by Heinrich and Matthäus von Collin, was given with great success in 1816 at the annual extra concert of the Gesellschaft der Musikfreunde, for the benefit of the proposed Conservatorium, and in 1829 at Zürich. (For list of works see *Q.-L.*)

C. F. P.

STADLMAYR, JOHANN (*b.* Freising, Bavaria; *d.* Innsbruck, July 12, 1648). Fétis dates his birth 1560,¹ but in the absence of precise documentary evidence Eitner, in *Q.-L.*, considers this far too early, as the works published by the composer himself only begin in 1603 and continue to 1645. On the basis of the indications furnished by the title-pages and dedications of his works, Eitner gives the appointments which he held, as stated below. In 1603 Stadlmayr subscribes himself as a musician in the service of the Archbishop of Salzburg. In 1610 he was Kapellmeister to the Archduke Maximilian of Austria probably at Innsbruck. In 1625 he acts in the same capacity to the Archduke Leopold at Innsbruck, and from 1636 he subscribes himself as music-director to the Archduchess Claudia at Innsbruck. He is described, at the time of his death, as having been hof-Kapellmeister. Stadlmayr's works are all for the services of the Roman Church, but show the gradual supersession of the earlier pure vocal style of church music by the modern style of instrumental accompaniment. There is, first, the regular employment of basso continuo, followed by the substitution *ad libitum* of an instrumental choir, *a 4* or *8* as the case may be, for one or other of the vocal choirs; and the culminating point is reached in the definite specification of instruments which are now written for in a definitely instrumental style. The dates and titles, somewhat abbreviated, of Stadlmayr's chief publications as given below, will serve to confirm what we have said:

1603. Magnificat *a 5-8*, 10 n. (No mention of basso continuo in the title of this or the work following.)
 1608. Magnificat *a 4-8*, 13 n.
 1610. Missae 8 voc., cum duplici basso ad organum. 5 n.
 1614. Magnificat, Symphoniae variae secundum varios modos musicos, aliae octonis, una 12 voc., cum Bc.
 1616. Missae 12 voc., cum triplici Bc.
 1618. Cantici Mariani septies variati cum 12 voc. c. triplici bass. org.
 1625. Musica super cantum gregorianum. Pars I. Missarum dominicalium introitus . . . 52 n. Pars II. Festorum introitus. 50 n. 5 voc. c. Bc. *ad libitum*.
 1628. Hymni totius anni . . . *a 4*, quibus et ali pro festis solemnioribus cum symphonia *a 4-8*, accesserunt in quibus pro ratione varii possunt instrumenta musica cum basso continuo.
 1631. Missae concertatae *a 6* adjuncto choro secundo sive ripieni.
 1639. Odae sacrae . . . *a 5 v.*, et totidem instr.
 1640. Psalmi *a 2* et *3 v.* c. *2 v.* o. cornetti.
 1641. Psalmi integri *a 4* voc. concertantibus, quatuor aliis accessoris ad lib. accinentibus cum 2 cornet, sive violini.
 1642. Missae concertatae *a 10-12* et instrum., cum *4* partibus pro secundo choro.
 1643. Missae 1x voc. primo choro concert. *a 5* voc. Secundo pleno cum symphonis.
 1646. Apparatus musicus sacrarum cantorum 6-24 vocib. et instr.

Of all these works, the only one which has as yet appeared in a modern reprint is the Hymni *a 4*, 1628, edited by J. E. Haberl for the *D.T.Ö.*,

III. i. But Haberl has only given the simple Hymns *a 4*, without accompaniment. It might have been more interesting, historically, if he had also given the Hymns with instrumental accompaniment and ritornelli.

STÄNDCHEN (Ger.), 'Serenade.'

STAFF, see STAVE.

STAFFORD, WILLIAM COOKE (*b.* York, 1793; *d.* Norwich, Dec. 23, 1876²), published at Edinburgh in 1830 a 12mo volume entitled *A History of Music*, a work chiefly noted for its inaccuracy, but which notwithstanding was translated into French (12mo, Paris, 1832) and German (8vo, Weimar, 1835).

W. H. H.

STAGGINS, NICHOLAS (*d.* 1705), was taught music by his father, a musician of little standing. Although of slender ability he won the favour of Charles II., who, in 1674,³ appointed him Master of the King's Band of Musick; and in the same year the University of Cambridge, upon the King's request, conferred upon him the degree of Mus.D. The performance of the customary exercise being dispensed with, great dissatisfaction was occasioned, to allay which Staggin, in July 1684, performed an exercise, whereupon he was appointed professor of music in the University, being the first who held that office. Staggin composed the Odes for William III.'s birthday in 1693 and 1694, and for Queen Anne's birthday, 1705. In 1693 he was allowed £200 per annum as Master of the Musick (Calendar of Treasury Papers). In 1697 he gave a concert of his own music in York-buildings, London; in the following year Eccles succeeded him as Master of the King's Musick. Songs by him are contained in 'Choice Ayres, Songs and Dialogues,' 1675, and other collections of the time; and a dialogue, 'How unhappy a lover am I,' composed for Dryden's 'Conquest of Granada,' Part II., is included in J. S. Smith's 'Musica Antiqua.'

W. H. H.; addns. W. H. G. F. and *Q.-L.*

STAHLSPIEL (Ger. *Stahl*, 'steel,' and *Spiel* 'play'). (1) An instrument consisting of a series of accurately-tuned steel bars loosely fastened to a frame and generally played by means of two small hammers—one in each hand of the performer—but sometimes constructed so as to be played from a keyboard. It is used in military music and known by the name *Lyra*, the steel bars being arranged on a lyre-shaped frame. For orchestral use the bars are arranged in two rows, in the exact relative positions of the white and black keys of the pianoforte. The compass is from two to two and a half octaves, and the tone is incisive and penetrating; but although the instrument is susceptible of very charming effects it should be sparingly used. It is very frequently written for under the names GLOCKENSPIEL and CARILLON, so much so that in modern use the three names are alternatives for one and

² Brit. Mus. Blog.

³ Date given by W. H. G. F., who adds that he was appointed musician for the violin, Dec. 21, 1671.

¹ Riemann accepts 1560

the same thing. Originally the two latter were applied to an instrument consisting of a series of small bells; but steel bars have been found to be more convenient, more easily manipulated, better in tone—being free from the dissonant overtones so particularly prominent in small bells—and capable of the most accurate tuning. Excellent examples of the effective treatment of the instrument will be found in the works of Wagner ('Walküre' and 'Meistersinger'), Tchaikovsky, Strauss, Elgar, Parry, Mackenzie, Cowen, etc.

(2) An organ stop consisting of a series of steel bars played from the manuals and generally extending from middle C upwards, but rarely exceeding three octaves in compass. W. W. S.

STAINER, (1) JACOB (b. Absam, near Hall, Austria, July 14, 1621; d. 1683), a celebrated German violin-maker. According to one story, the boy had a love of music, which induced the parish priest to send him to an organ-builder at Innsbruck. This trade, however, he found too laborious. He therefore took to making stringed instruments, serving his apprenticeship to an Innsbruck 'Lautenmacher'; after which he proceeded to travel, working, according to tradition, at Cremona, under Antonio or Nicolo Amati, and visiting other places in Italy, including Venice, where he wrought in the shop of Vimercati. Of all this, however, there is not a particle of evidence. It may be said that violins are in existence, signed by Stainer and dated from Cremona; but these are now believed to be spurious. He began at a very early age, if we may trust an apparently genuine label dated 1641. He married in 1645 Margaret Holzhammer, by whom he had eight daughters, and one son who died in infancy. Henceforward, to his death in 1683, the life of Stainer shows little variety. He made a great number of stringed instruments of all sorts, which he chiefly sold at the markets and fairs of the neighbouring town of Hall. The forests of 'Haselfichte' (see KLOTZ), which clothe the slopes of the Lafatsch and the Gleirsch, supplied him with the finest material in the world for his purpose. In 1648 the Archduke Ferdinand Charles became his patron. Ten years later he received by diploma the title of Hofgeigenmacher to the Archduke. In 1669, having fallen under a suspicion of Lutheranism, he was imprisoned and forced to recant. He was still at work in 1677, in which year he made two fine instruments for the monastery of St. Georgenbourg. Soon after this date he ceased from his labours. In his latter years Stainer became of unsound mind, in which condition he died in 1683.

Stainer's place in the history of German fiddle-making is strongly marked. He was the first to introduce into Germany those Italian principles of construction which are the secret of sonority, but his originality cannot be

precisely determined. Some trace his model to the early Tyrolese viol-makers, others say the peculiarities of the Stainer violins are strictly original. As a mere workman Stainer is entitled to the highest rank. He made an immense number of instruments, some more, and others less, finely finished, but all substantially of the same model: the main design of which bears a rough resemblance to that of the Amati. Stainer's best instruments have written labels: some of the common ones have in very small Roman letterpress in the middle of a large slip of paper, 'Jacobus Stainer in Absom prope Oenipontum Anno (1678).' It is not impossible that some of these may have been made by other hands under his direction.

H. E.-A.

(2) MARCUS, brother of Jacob, from whom he learned his trade, set up for himself at the village of Laufen. The famous Florentine player Veracini had two violins by this maker, christened 'St. Peter' and 'St. Paul,' and he reckoned them superior to all Italian violins. In sailing from London to Leghorn in 1746 Veracini was shipwrecked and the fiddles were lost. The instruments of this maker are extremely rare. They are made of unusually fine material, of somewhat large size, covered with dark varnish, and are sweet though decidedly feeble in tone. Like those of Jacob Stainer, they usually contain written labels. One of these runs thus: 'Marcus Stainer, Bürger und Geigenmacher in Kufstein, anno 1659.' Occasionally Marcus Stainer yielded to an obvious temptation, and sold his violins under the name of his more famous brother.

E. J. P.

STAINER, SIR JOHN, Mus.D. (b. London, June 6, 1840; d. Verona, Mar. 31, 1901), son of a schoolmaster, entered the choir of St. Paul's Cathedral in 1847—by which time he was already a remarkable player and an excellent sight-singer—and remained there till 1856, very often taking the organ on occasion. In 1854 he was appointed organist and choirmaster of St. Benedict and St. Peter, Paul's Wharf, of which the Rev. J. H. Coward, classical master to the choristers, was rector. At the same time he learnt harmony from Bayley, master of the St. Paul's boys, and counterpoint from Dr. Steggall, for whom he sang the soprano part in his Mus.D. exercise at Cambridge in 1852. Through the liberality of Miss Hackett (see CHORISTER) he received a course of lessons on

the organ from George Cooper at St. Sepulchre's. In 1856 he was selected by Sir F. Ouseley as organist of his then newly founded College at Tenbury, where he remained for some time. In 1859 he matriculated at Christ Church, Oxford, and took the degree of Mus.B. Shortly after, he left Tenbury for Magdalen College, Oxford, where, after six months' trial, he was appointed organist and *informator chorum*. He then entered St. Edmund Hall as a resident undergraduate, and while discharging his duties at Magdalen, worked for his B.A. degree in Arts, which he took in Trinity Term 1863. Meantime, on the death of Stephen Elvey, he had been appointed organist of the University of Oxford, and was conductor of a flourishing College Musical Society and of another association at Exeter College. At Magdalen he raised the choir to a very high state of efficiency. In 1865 he proceeded to his Mus.D. degree, and 1866 to his M.A., and became one of the examiners for musical degrees. In 1872 he left Oxford and succeeded Goss as organist of St. Paul's Cathedral. The services were at that time by no means what they should have been; but Stainer possessed the confidence of the Dean and Chapter, and his hard work, knowledge and tact at last brought them to a worthier pitch of excellence.

Stainer did not confine his activity to his own University. He was a member of the Board of Musical Studies at Cambridge, and for two years was also examiner for the degree of Mus.D. there. He was examiner for musical degrees in the University of London; an Hon. Member of the R.A.M. and Hon. Fellow of the Tonic Sol-fa College; President of the College of Organists and of the Musical Association, of which he was virtually the founder. He was a juror at the Paris Exhibition of 1880, and at its close was decorated with the Legion of Honour. He was attached to the NATIONAL TRAINING SCHOOL FOR MUSIC (*q.v.*) as a professor of organ and harmony, from its foundation, and at Easter 1881 succeeded Sullivan as principal. In 1882 he succeeded Hullah as inspector of music in the elementary schools of England for the Privy Council. He was also a member of Council of the R.C.M. In 1888 he was obliged to resign his post at St. Paul's owing to his failing sight. In the same year he received the honour of knighthood. He was appointed professor of music in the University of Oxford in 1889, and was master of the Company of Musicians in 1900. He was buried at Holywell Cemetery, Oxford, Apr. 6, 1901.¹

His compositions embrace an oratorio, 'Gideon'; a cantata, 'The Daughter of Jairus,' composed by request for the Worcester Festival of September 1878; a cantata, 'St. Mary Magdalen' (Gloucester Festival, 1883); and an oratorio, 'The Crucifixion'—his most

popular work—1887. He also wrote many services and anthems, and among his most successful pieces of church music must be named the well-known 'Sevenfold Amen.' He was the author of the two very useful manuals of *Harmony* and *The Organ* in Novello's series, and of a work on Bible music, and was part editor with W. A. Barrett, of a *Dictionary of Musical Terms* (see DICTIONARIES OF MUSIC). He also edited the interesting *Dufay and his Contemporaries*, 1898. His son, J. F. R. Stainer, and daughter, Miss Cecilia Stainer, collaborated with him in that production. Both, like their father, have done valuable research work and have been contributors to this Dictionary.

Sir J. Stainer was beloved and esteemed by all who knew him, and was an admirable and efficient musician in all branches; but his great excellence was in his organ-playing, and especially his accompaniments, which were unsurpassed. He was a shining example of the excellent foundation of sound musical knowledge which may be got out of the various duties and shifts of the life of a clever chorister in one of our cathedrals. G., addns.

STAMATY, CAMILLE MARIE (b. Rome, Mar. 23, 1811; d. Paris, Apr. 19, 1870), son of a Greek father and a very musical French mother. After the death of his father in 1818 his mother returned to France, remained some time at Dijon, and finally went to Paris. There, after long coquetting between music and business as a profession, Stamaty, in 1828, took an employee's post in the Prefecture of the Seine. But music retained its influence on him, and under Fessy and Kalkbrenner he became a remarkable player. An attack of rheumatism forced him from playing to the study of composition. In Mar. 1835 he made his first public appearance in a concert, the programme of which contained a concerto and other pieces of his composition. This led to his being much sought after as a teacher. But he was not satisfied, and in Sept. 1836 went to Leipzig, attracted, doubtless, by the fame of Mendelssohn and Schumann, then both resident there. After a short course of instruction from Mendelssohn, he returned to Paris early in 1837, and introduced much more classical music—Bach, Mozart, Beethoven, etc.—into his programmes. In 1846 he lost his mother, in 1848 he married, and in 1862 was made Chevalier of the Legion of Honour. From a crowd of pupils it is sufficient to name Gottschalk and Saint-Saëns. His most permanent works are educational—'Le Rhythme des doigts,' much praised; 'Études progressives' (opp. 37-39); 'Études concertantes' (opp. 46, 47); 'Esquisse' (op. 19); 'Études pittoresques' (op. 21); 'Six études caractéristiques sur Obéron,' and 12 transcriptions entitled 'Souvenir du Conservatoire.'

Besides these, his solo sonatas in F minor and

¹ See *Mus. T.*, 1901, p. 287, etc.

C minor; a PF. trio, op. 12; a concerto in A minor, op. 2; sonatas, opp. 8 and 14; and other works, were much esteemed at the time. The concerto and some brilliant variations on an original theme (op. 3) were reviewed very favourably by Schumann (*Ges. Schriften*, ii. 155, 181).

G.

STAMITZ (STEINMETZ), a Bohemian musical family of much renown in the 18th century. (1) JOHANN WENZL ANTON¹ (b. June 19, 1717; d. Mannheim, Mar. 30,² 1757), son of the schoolmaster at Deutschbrod; a man evidently of great originality and force. In 1742 he took part as a solo violinist in the festivities at the coronation of the Emperor Carl VII., and shortly afterwards was taken to Mannheim by the Elector, who in 1745 appointed him his leading violin and director of chamber-music; he remained there till his death. He wrote much music for the violin, which shows him to have been a great and brilliant player. Six concertos, 3 sets of 6 sonatas, and some solo exercises, giving the effect of duets, were published at Paris, and 21 concertos and 9 soli are still in MS. He also wrote symphonies, of which several sets of 6 were published, as well as concertos and sonatas for the harpsichord. The thematic catalogue of 45 symphonies and 10 orchestral trios is given in *D.D.T.* (second series) III. i., which contains four of the symphonies and a trio. The introduction by Hugo Riemann is the most detailed account of the family that has yet appeared. Other works of Johann Stamitz are to be found in VII. i., XV. and XVI. of that publication, and recent criticism has assigned a place of first-rate importance to him as a pioneer of symphonic design (see SYMPHONY). The music shows a great advance in effect and expression on anything that preceded it.

(2) His brother, ANTON THADDEUS (b. 1721; d. Allbunzlau, Aug. 23, 1768), was a violoncello-player; according to Gerber, he was also in the Mannheim band. He became a priest, and rose to many dignities. Another brother, Joseph, was distinguished as a painter. Cannabich was one of Johann's pupils; but a still more memorable one was his eldest son, (3) CARL (b. Mannheim, May 7, 1746; d. Jena, 1801); like his father, a remarkable violinist and composer. He was a second violin in the Mannheim band in 1762-70. In 1770 he went to Paris, and was known there as a player of the viola and viola d' amore. He played in London in 1778. His opera, 'Der verliebte Vormund,' was given at Frankfurt. In 1785 he returned to Germany, and in 1787 we find him at Prague and Nuremberg, in 1790 at

Cassel, and then at St. Petersburg, where he remained for some years, and where he brought out a grand opera, 'Dardanus.'

His works include 70 symphonies, many published in opp. 1, 2, 3, 4, 6, 9, 13, 15, 16, 18, 19 and 24; others are in MS. They are mostly for a larger orchestra than that employed by his father; some have two 'concertante' violin parts; there are also many concertos, quartets, trios, etc. (see the summary in Riemann's preface to *D.D.T.* III. i.). Another son of Johann was (4) ANTON (b. Mannheim, Nov.³ 1754; d. circa 1820). He went to Paris with Carl, and published 13 symphonies, 3 piano concertos, a violin concerto, a violoncello concerto, and many quartets, trios, and duets. The family had a great influence on the development of the symphonic form; the father raised the band to a pitch of superlative excellence, and Carl's experiments in orchestration pointed the way for later men. G., addns.

BIBL.—Riemann's Preface to *D.D.T.* (second series) III. i. R. SONDEHEIMER, *Die formale Entwicklung der vorklassischen Sinfonie* (*A.M.* Jan. 1922); Riemann and Q.-L.

STANDISH, (1) FREDERIC, a 16th- or 17th-century composer. A MS. anthem of his is in Ely Cathedral. The following were all organists at Peterborough Cathedral: (2) DAVID (1661-76); (3) WILLIAM (1677-90); (4) ROGER (1690-1713) (Q.-L.).

STANFORD, SIR CHARLES VILLIERS, Mus.D., D.C.L., LL.D. (b. Dublin, Sept. 30, 1852; d. London, Mar. 29, 1924), was distinguished both as composer and conductor, and was eminent as a teacher of composition.

His father, an enthusiastic amateur vocalist, was Examiner in the Court of Chancery in Dublin.⁴ His first teachers were Arthur O'Leary and Sir Robert Stewart, and various efforts in songs, piano pieces, etc., were published while he was yet a child. His first composition is stated to have been a march composed in 1860, and played in the pantomime 'Puss in Boots,' at the Theatre Royal, Dublin, 1863-64.⁵ He matriculated at Queens' College, Cambridge, in 1870, as choral scholar. On his appointment in 1873 to the important post of organist to Trinity College, in succession to Dr. J. L. Hopkins, Stanford 'migrated' as an undergraduate to that college, from which he graduated in 1874 in Classical Honours. He had filled the post of conductor of the Cambridge Amateur Vocal Guild for a year or two before this, and had brought Sir R. Stewart's cantata, 'The Eve of St. John,' to a hearing in 1872. This Society was soon joined to the Cambridge University Musical Society (the choir of which had hitherto consisted of male voices only), and Stanford raised the position of the Society to a remarkably high level, incidentally making Cambridge an important musical centre (see

¹ The confusion between Johann and Carl, his son, is made worse by the habit of calling the father 'Johann Carl' as many authorities have done. Eitner says that his son Carl sometimes used the name Johann.

² Riemann discovered the exact date; it is given in the Registry of Deaths in the Catholic parsonage at Mannheim.

³ Baptized Nov. 25.

⁴ The house where Stanford was born, 2 Herbert Street, Dublin, is now marked with a limestone tablet commemorating the fact.

⁵ See *Mus. T.*, 1898, p. 785.

CAMBRIDGE). He was appointed conductor of the Society in 1873, and his activity was not long in bearing good fruit, in the first performances in England of Schumann's 'Faust' (pt. iii.) and many other things, such as Brahms's 'Alto Rhapsodie.' In each year, from 1874-76, he was given leave of absence in order to prosecute his studies, first with Reinecke at Leipzig, and then with Kiel at Berlin. In the spring of 1876, on the production of Tennyson's 'Queen Mary' at the Lyceum Theatre, the incidental music was provided by Stanford, having been composed at the poet's suggestion. This work, and a symphony which gained the second prize in a competition held at the Alexandra Palace, in the same year, brought the young composer's name into prominence, and from that time onwards he was more or less regularly before the public as composer and conductor. In 1877, when he proceeded M.A., he organised and directed a concert at which works by Brahms and Joachim were performed for the first time in England, on the occasion when the Honorary Mus.D. degree was offered to both composers, and accepted by the latter. This was the first of many concerts at which the recipients of honorary musical degrees were similarly honoured. In 1877, too, a Festival Overture by Stanford was played at the Gloucester Festival, and subsequently given at the Crystal Palace. A setting of Psalm xlii. was produced at Cambridge, and afterwards at a Richter concert.

The symphony just mentioned, in B flat, was played at the Crystal Palace in Mar. 1879, but like a second 'Elegiac' symphony in D minor, played at Cambridge in 1882, concertos for PF. and for violoncello, etc., is not included in the list of opus-numbers. Stanford's first opera, 'The Veiled Prophet of Khorassan,' to a libretto by W. Barclay Squire, produced at the Court Theatre, Hanover, Feb. 6, 1881, was only given once in England, at Covent Garden, July 26, 1893; an orchestral serenade (op. 17) was produced at the Birmingham Festival of 1882. In 1883 he received the hon. degree of Mus.D. at Oxford, and the same degree at Cambridge in 1888. In 1885 he succeeded Otto Goldschmidt as conductor of the Bach Choir, and held that position until 1902 when he resigned it; in 1887 he was elected professor of music in the University of Cambridge, on the death of Sir G. A. Macfarren, and this appointment he retained till his death in 1924. He devoted his energies to improving the standard of general education required for the musical degrees at Cambridge, and in this and many other ways his influence on the music of the University, and the country at large, has been of great importance. On the opening of the R.C.M. he became professor of composition, conductor of the orchestra and of the operatic class. In the

annual performances of opera he maintained a high standard of excellence, and brought many neglected works, old and new, to a hearing. In 1892 he resigned the post of organist to Trinity College, and henceforth lived in London. In 1901 he was appointed conductor of the Leeds Festival in succession to Sullivan, and directed four triennial festivals there (1901-10). He received the honour of knighthood in 1901 and in 1904 he was elected a member of the Royal Academy of Arts at Berlin. Through all his later years Stanford's most important work, apart from his composition, was done at the R.C.M. In the course of forty years of composition teaching a very large proportion of the English composers who have since gained distinction passed through his hands and benefited by his influence.¹

Stanford's Irish descent gives his music a strong individuality, which is not only evident in his arrangements of Irish songs and in his work as a collector (see IRISH MUSIC), but stands revealed in his 'Irish Symphony' (op. 28), in the opera, 'Shamus O'Brien' (op. 61), the orchestral 'Irish Rhapsodies,' the 'Irish Fantasies' for violin, and in many other definitely Irish compositions. The easy flow of melody, and the feeling for the poetical and romantic things in legendary lore (illustrated in the early song, 'La Belle Dame sans Merci,' the 'Voyage of Maeldune,' and in other works), are peculiarly Irish traits; but his rare mastery of the resources of orchestra or voices, the thoroughness of his workmanship, and his remarkable skill as a teacher of composition, are qualities not generally associated even with the more brilliant natives of Ireland. His wonderful versatility allowed him to adopt, successfully, styles far removed from one another; that of the Latin settings of Te Deum, Requiem, Stabat Mater, and of the Mass in G, has an affinity with the Italian composers of the 18th century. Part of his oratorio 'Eden' is strictly modal in utterance, a large number of his instrumental compositions are in the classical idioms of Germany, and all these contrast with his use of the fantastic or rhapsodical style of Ireland already referred to.

In yet another style he won what is perhaps the greatest success he achieved: the early song, 'In praise of Neptune,' from op. 19, may have been a kind of essay in the nautical style, which reached its full fruition in the splendid 'Revenge' (Tennyson) (Leeds Festival, 1886), the choral ballad, which is known and loved wherever the best choral music is practised. The five 'Songs of the Sea' (op. 91), for baritone solo, male chorus, and orchestra, and the 'Songs of the Fleet' (op. 117) for baritone solo, mixed choir and orchestra (the poems of both sets by Henry Newbolt), have

¹ A stone tablet has been placed by his pupils in the wall of the room in which Stanford taught at the R.C.M. His own collection of photographs of his pupils also decorates the walls.

had hardly a less success, and in all these there is a breezy and unmistakably English atmosphere that endears them to all hearers. His use of orchestral colour is full of interest, and his scores are models of effective yet not exaggerated writing; but in one and all the colouring is properly subordinated to the design, and in the thematic development of his subjects will be found the central interest of these compositions.

Although his 'Shamus O'Brien' was a great success, running for many weeks, his more serious operas have not as yet been heard by enough English people to be properly assessed on their real merits. The first, already mentioned, was only given for one extra night after the close of one of Harris's seasons; his second, 'Savonarola,' brought out at Hamburg Apr. 18, 1884, was only performed for a single night under Richter at Covent Garden, July 9, 1884, owing to difficulties connected with its publication; the third, 'The Canterbury Pilgrims,' had four performances at Drury Lane Theatre by the Carl Rosa Company, in 1884; 'Much Ado about Nothing' (words by Julian Sturgis) was produced with great care and effect at Covent Garden, May 30, 1901, but in spite of the success of its two performances it also disappeared quickly from the repertory. Of course it is necessary to remember the singular methods of operatic management in England before assuming that these works have failed to attract the English public. Neither 'Savonarola' nor 'The Canterbury Pilgrims' has a really good libretto; the former, which begins with a passionately emotional prologue, loses its dramatic interest before the end is reached, and the frequent allusions to the lovely 'Angelus ad virginem,' though beautiful musically, are of small value on the stage. In the same way, 'Sumer is iumen in' is used as a kind of motto to 'The Canterbury Pilgrims,' and with all the brightness of its first act, and the romantic charm of the second, the impression left by the trial in the third act is not very strong. 'Much Ado about Nothing,' alone of these works, has a remarkably effective close, and the dirge to Hero strikes a note of welcome pathos. 'Shamus O'Brien' was furnished with regular recitatives in place of the original spoken dialogue, for the performance in Germany (Breslau, 1907); in its original form, and interpreted by capable actors, it is deliciously bright and characteristic, with a touch of wild and fantastic beauty in the 'caoine' of the banshee.

It is always difficult to prophesy within a few years of a composer's death what place his works will ultimately gain; and the task is especially hard in the case of Stanford, for before we can predict what place he will hold in the history of the art, we must know what is to be the fate of that 'modern' music with which he had so very little sympathy. If, as

is not improbable, we shall see a return to something like the normal conditions, and the re-establishment of the old ideals, then we may be sure that the best works of Stanford will gain in the general estimation of musicians as time goes on. But if the artistic revolution of our own day should be a repetition of that great revolution when the rich polyphony of the 16th century gave way before the halting utterances of the early monodists, then it is to be feared that Stanford's name will be known by only a few compositions.

All through his career a similar fate befell nearly all his works, as if some malevolent fairy had been unpropitiated at his birth. Each piece of music as it was brought out was received with favour and often with enthusiasm by the public and the press; and after a single performance it would be neglected or eventually forgotten. Of course there are brilliant exceptions, like 'The Revenge,' 'The Voyage of Maeldune,' the Irish rhapsodies, many of his part songs, and the opera 'Shamus O'Brien.' But the greater number of his operas, all his oratorios, many of his choral and orchestral works in the larger form, have undergone the same fate. The conditions of musical production in England at the end of the 19th century were partly responsible, for it had not then been realised that anything mattered except a first performance of a new work. Nowadays we are wiser and our concert-managers know the importance of repetition in winning the favour of the public. There may also have been personal reasons for the neglect.

As a teacher of composition he was without a rival in Europe. Some artistic creators have found the work of creation so easy that they are unable to help less gifted people through difficulties unfelt by themselves; but Stanford had so thoroughly fought out his own problems that he could sympathise with those that lay before his pupils, and he had a natural gift of imparting his great knowledge. He knew the resources of orchestra and voices as very few have known them; and there is none of his works that may not be profitably studied for the perfection of its presentment. His melodic ideas, too, were of the highest quality, and full of suggestion for the development to which they were subjected. So rich was his endowment in the invention of these that he poured them out lavishly, seldom caring to make sure that they were indeed his own. The curiously numerous instances in which themes of his have been discovered in older works would have laid a lesser man open to a charge of plagiarism; but with him the fitness of some phrase for some particular word or idea often led him to use it without realising that some one else had used it before. Perhaps the most instructive instance is the Dogberry theme in 'Much Ado about Nothing,' where 'write me

down an ass' receives the most vivid musical illustration in a theme well known to all admirers of Corelli.

As he wrote with such consummate skill and ease, it was inevitable that much of his work, especially in his later years, should deserve the oblivion which for the time has befallen so many of the compositions in which his best qualities were exhibited. And unless the whole *corpus* of classical music should be swept away or become merely food for the antiquary, there is little doubt that Stanford's operas, with their knowledge of musical stage effect, his symphonies with their adroit manipulation of themes, the many songs in which the natural accentuation of the word seems always to have suggested the musical idea, and his beautiful works in chamber-music, will regain a firm place in the affections of musicians. M.

LIST OF WORKS

(Unpublished works are indicated by an asterisk.)

- Op. 1. Eight songs from George Eliot's 'Spanish Gypsy.'
2. Suite for pf.
3. Toccata for pf.
4. Six songs by Heine.
5. 'Die Auferstehung,' Resurrection Hymn by Klopstock, for choir and orchestra.
6. Incidental music for Tennyson's 'Queen Mary.' (Lyceum Theatre, 1876.)
7. Six songs by Heine.
8. Ps. xlii, for soli, choir and orchestra.
9. Sonata, pf. and v'cl., in A.
10. Morning, Communion, and Evening Service in B flat...
11. Sonata for pf. and vin. in D.
12. Evening Service in A (Festival of the Sons of the Clergy, 1880), for choir, orchestra and organ.
13. Three Intermezzi, pf. and clarinet.
14. Six songs ('Requiescat,' 'Ode to the Skylark,' 'Sweeter than the violet,' 'There be none of Beauty's daughters,' 'Tragicôde,' and 'Le bien vient en dormant').
15. Quartet, pf. and strings in F.
16. 'Awake, my heart,' Hymn by Klopstock.
17. Serenade for full orchestra in G.
18. Three Cavalier Songs (Browning), for baritone and male choir.
19. Six songs ('A Hymn in praise of Neptune,' 'Lullaby,' 'To the Rose,' 'Come to me when the earth is fair,' 'Boat Song,' 'The Rhine Wine').
20. Pf. Sonata in B flat.
21. Elisea Ode (Walt Whitman), for soli and chorus and orch. (Norwich Festival, 1884.)
22. Oratorio, 'The Three Holy Children.' (Birmingham Festival, 1885.)
23. Incidental Music to the 'Eumenides.' (Cambridge, 1885.)
24. 'The Revenge' (Tennyson), choral ballad. (Leeds Festival, 1886.)
25. Quintet for pf. and strings, in D minor.
26. Carmen Sæculare (Tennyson), for soprano solo and chorus. Composed for Queen Victoria's Jubilee, 1867.
27. Psalm cl. for soprano and chorus. (Opening of Manchester Exhibition, 1887.)
28. 'Irish Symphony' in F minor. (Richter, 1887.)
29. Incidental music to the 'Oedipus Tyrannus.' (Cambridge, 1887.)
30. A Child's Garland of Songs (Stevenson).
31. Symphony in F. (Berlin, Jan. 14, and Crystal Palace, Feb. 23, 1889.)
32. Suite for vin. and orchestra. (Berlin, Jan., and Philharmonic, Mar. 28, 1889.)
33. Overture, 'Queen of the Seas.' (Armada Tercentenary.)
34. 'The Voyage of Maeldune' (Tennyson), soli, choir and orchestra. (Leeds Festival, 1889.)
35. Trio in E flat for pf. and strings.
36. Morning, Communion, and Evening Service in F.
37. Two Anthems.
38. Anthem, 'The Lord is my Shepherd.'
39. Second Sonata for pf. and v'cl. in D minor.
40. Oratorio, 'Eden' (Robert Bridges). (Birmingham Festival, 1891.)
41. Choral Ballad, 'The Battle of the Baltic.' (Hereford Festival, 1891.)
42. Six pf. pieces.*
43. Six Songs, to poems by R. Bridges.
44. String Quartet in G.
45. String Quartet in A minor.
46. Mass in G, for soli, choir and orchestra.
47. Four part songs.
48. Incidental Music to Tennyson's 'Becket.' (Lyceum Theatre, 1893.)
49. Six Elizabethan Pastorals for unaccompanied choir, 1st set.
50. Ode, 'The Bard' (Gray), for baritone, chorus and orchestra.
51. Three Motets for unaccompanied chorus.
52. Ode 'East to West' (Swinburne), for chorus and orchestra.
53. Six Elizabethan Pastorals, 2nd set.
54. Six Irish Pastorals for vin. and pf.
- Op. 55. Opera, 'Lorenza.'*
56. Symphony in D, 'L' Allegro ed il Penseroso.'*
57. Fantasia and Toccata for organ.
58. Ten Dances for pf. (five of them also scored for orchestra as a Suite of Ancient Dances).
59. Concerto, pf. and orchestra, in G.*
60. Moore's Irish Melodies, restored, edited and arranged.
61. Opera, 'Shamua O'Brien.' (Opera-Comique, London, Mar. 2, 1896.)
62. Choral Ballad, 'Phauidrig Crochore' (J. S. Le Fanu), for choir and orchestra. (Norwich Festival, 1896.)
63. Requiem for soli, choir and orchestra in memory of Lord Leighton. (Birmingham Festival, 1897.)
64. String Quartet in D minor.
65. The Clown's Songs from 'Twelfth Night.'
66. Te Deum, for soli, choir and orchestra. (Leeds Festival, 1898.)
67. Six Elizabethan Pastorals 3rd set.
68. Cycle of Quartets from Tennyson's 'Princess' with pf. accompaniment.
69. Opera.*
70. Sonata for pf. and vin. in G.*
71. Variations on an English Theme ('Down among the dead men'), for pf. and orchestra.
72. Ballad, 'Die Wallfahrt nach Kevlaar' (Hefne), voice and pf.
73. Trio, No. 2, for pf. and strings in G minor.
74. Ten, and orchestra in D. (Leeds Festival, 1904.)
75. 'The Last Post' (Henley), for choir and orchestra. (Hereford Festival, 1900.)
76. 'Songs of Erin,' a collection of 80 Irish folk-songs.
- 76a. Opera, 'Much Ado about Nothing.' (Covent Garden, May 30, 1901; Leipzig, 1902.)
77. An Irish Idyll (Molra O'Neill), for voice and pf.
78. Irish Rhapsody, No. 1 in D minor.
79. Four Irish Dances for Orchestra.*
80. Concerto for clarinet and orchestra.*
81. Morning, Communion, and Evening Service in G. *
82. Five sonnets from 'The Triumph of Love' (E. Holmes), for voice and pf.
83. Motet, 'The Lord of Might,' for chorus and orchestra. (Festival of the Sons of the Clergy, 1903.)
84. Irish Rhapsody, No. 2, for orchestra.*
85. Quintet for strings, No. 1, in F.*
86. Quintet for strings, No. 2, in C minor.*
- 87.
88. Six Preludes for Organ.
89. Four Irish Dances for orchestra.
90. Overture in the style of a Tragedy.*
91. Songs of the Sea, for baritone, male choir and orchestra. (Leeds Festival, 1904.)
92. Three Rhapsodies from Dante, for pf. solo.
93. Five Characteristic Pieces for vin. and pf. (also for v'cl. and pf.).
94. Symphony in E flat.* (In memoriam G. F. Watts.)
95. Serenade-Nonet in F for strings and wind.*
96. Stabat Mater, Symphonic Cantata for soli, choir and orchestra. (Leeds Festival, 1907.)
97. Six 'Songs of Faith' (Tennyson and Walt Whitman).
98. Evening Service on Gregorian Tones.
99. String Quartet in G minor.*
100. Wellington (Tennyson) for soli, chorus and orchestra. (Bristol Festival, 1908.)
101. Six Short Preludes and Postludes for Organ, 1st set.
102. Overture and Incidental Music to 'Attila' (Binyon). (His Majesty's Theatre, 1907.)
103. Fantasia and Fugue for organ.
104. String Quartet in B flat. (In memoriam Joseph Joachim.)
105. Six Short Preludes and Postludes for organ, 2nd set.
106. Four Part songs for male voices.
107. A Welcome Song for the opening of the Franco-British Exhibition, 1908 (to words by the Duke of Argyll), for chorus and orchestra.
108. Installation March for the Chancellor of the University of Cambridge, for wind band, published in an arrangement for organ.
109. Three Military Marches.
110. Four Part songs for mixed choir.
111. Three Part songs for mixed choir.
112. Four Songs.
113. Four Bible Songs, for voice and organ.
114. Ave atque Vale, overture with choral portions, written for the Haydn Centenary. (Bach Choir, London, 1909.)
115. Morning, Evening, and Communion Service in C.
116. Two organ pieces, 'Te Deum Laudamus' and 'Cantonsa.'
117. Five 'Songs of the Fleet,' for baritone solo and chorus. (Leeds Festival, 1910.)
118. Cushendall an Irish song cycle.
119. Eight Part songs (S.A.T.B.).
120. Anthem for Harvest, and 2 Choral Hymns.
121. Idyll and Fantasia, for organ.
122. Quartet for strings, in A minor.
123. Anthem, 'Ye choirs of New Jerusalem.'
124. Seventh Symphony, in D minor, for orchestra. (Philharmonic Society, 1912.)
125. Four Songs, 'John Kelly,' 'The Song of Asia,' 'Phoebe,' 'The Song of the Spirit of the Hour.'
126. Second Concerto, in C minor, for pf. and orchestra. (Norfolk Va., Musical Festival, June 3, 1915.)
127. Eight Part songs (S.A.T.B.).
128. Festival Communion Service, in B flat (including Coronation Service, 'Gloria in Excelsis'), for voices and orchestra.
129. Sonata, for clarinet (or viola) and pf.
130. Incidental music to 'Drake' (Louis N. Parker).*
131. Three Idylls, 'Fair Day,' for women's choir and small orchestra.
132. Six characteristic pieces, for pf.
133. Quartet, for pf. and strings.*
134. Anthem, 'Blessed City, heavenly Salem.'
135. Three Motets: 'Ye Holy Angels,' 'Eternal Father,' 'Powerful God.'
136. Five Capricci, for pf.
137. Irish Rhapsody, No. 3, for v'cl. and orchestra.*

- Op.
138. Six Two-part Songs (two soprano).
139. Cycle of Seven Songs, 'A Fire of Turf,' for voice and pf.: 'A Fire of Turf,' 'The Chapel on the Hill,' 'Cowslip Time,' 'Scared,' 'Blackberry Time,' 'The Fair,' 'The West Wind.'
140. 'A Sheaf of Songs from Leinster,' for voice and pf.: 'Grandeur,' 'Thief of the World,' 'A Soft Day,' 'Little Peter Morrissey,' 'The Bold Unbiddable Child,' 'Irish Skies.'
141. Irish Rhapsody, No. 4, in A minor, for orchestra.
142. An Eight-part Ode, 'Time.'
143. Choral Work, 'Thanksgiving Hymn.'
144. Opera, 'The Critic' (Sheridan). (Shaftesbury Theatre, Jan. 1916).
145. Anthem, 'Lo I raise up.'
146. Opera, 'The Travelling Companion' (Newbolt, after Hans Andersen). (Published Carnegie Trust.) (Theatre Royal, Bristol, Oct. 25, 1928).
147. Irish Rhapsody, No. 5, for orchestra.*
148. 'Night Thoughts,' six pieces for pf.
149. First Sonata, in F, for organ.
150. Scènes de Ballet, for pf.
151. Second Sonata, 'Eroica,' for organ (including 'Verdun,' 1916).
152. Third Sonata, 'Britannica,' for organ.
153. Fourth Sonata, 'Celtica,' for organ.
154. Six Pieces, for violin.
155. Six Easy Pieces, for violin.
156. Ten Part-songs.*
157. Eight Songs.
158. Third Trio, in A, for pf., violin and v'cl.
159. Fifth Sonata, in A, 'Quasi una Fantasia,' for organ.
160. 'Ballata and Ballabile,' for v'cl. and orchestra.
161. Irish Concertino, for violin, v'cl. and orchestra.*
162. Second Concerto, in G minor, for violin and orchestra.*
163. Twenty-four Preludes (in all the keys), for pf.
164. Magnificat, for unaccompanied choir.
165. Two Sonatas, for violin solo, with pf. accompaniment.*
166. Quartet in C, for strings.*
167. Quartet in C minor, for strings.*
168. 'A Song of Agincourt,' for orchestra.*
169. Mass in D minor (a cappella).
170. Ballade, in G minor, for pf.
171. Third Concerto, for piano, for orchestra.*
172. 'Merlin and the Gleam' (Tennyson), for baritone solo, chorus and orchestra.
173. Mass, 'Via Victrix.'
174. Six Songs, from 'The Glens of Antrim' (Moirá O'Neill).
175. Six Songs.
176. Mass (a cappella).
177. 'At the Abbey Gate' (Judge Darling), for baritone solo, chorus and orchestra.

WITHOUT OPUS-NUMBERS

- Festival Overture. (Gloucester Festival, 1877).
Symphony in B flat. (Alexandra Palace, 1876).
Elegiac Symphony, in D minor. (Cambridge, 1882).
Scherzo in B minor for pf.*
Songs—'Irish Eyes,' 'A Valentine,' 'Three Ditties of the olden Time,' 'La Belle Dame sans Merci,' 'Prospect' (Browning), 'The Tomb,' contr. to an album published by Teague and King (Winchester), 'I liken my love' (contr. to album of Twelve New Songs by British Composers, 1891).
Arrangements of Irish Songs—'Songs of Old Ireland,' 1882; 'Irish Songs and Ballads,' 1893.
The 'Petrie Collection of Irish Music' was edited by Stanford for the Irish Literary Society in 1902-05.
The operas, 'The Veiled Prophet,' 'Savonarola' and the 'Canterbury Pilgrims,' which have no opus-numbers, are referred to above.
Mention should also be made of an Installation Ode for the Chancellor of the University (the Duke of Devonshire), in 1892, which is a 'quodlibet' on well-known tunes (cf. op. 108).

LITERARY WORKS

- Studies and Memories.* (1908.)
A collection of articles on various musical subjects which had appeared previously in periodicals.
History of Music, with Cecil Forsyth.
Musical Composition (1911). A short treatise for students.
Papers from an Unwritten Diary. (1914.)
Further occasional papers.

STANLEY, CHARLES JOHN, Mus.B. (b. London, Jan. 17, 1713; d. May 19, 1786), at 2 years old became blind by accident, at 7 began to learn music from John Reading, organist of Hackney, and a few months later was placed with Maurice Greene, under whom he made such rapid progress that in 1724 he was appointed organist of All Hallows, Bread Street, and in 1726 organist of St. Andrew's, Holborn. On July 16, 1729, he graduated as Mus.B. at Oxford. In 1734 he was appointed one of the organists of the Temple Church. In 1742 he published 'Six Cantatas, for a Voice and Instruments,' the words by Hawkins, the future historian of music, which proved so successful that a few months later he published a similar set to words by the same author. In 1757 he produced his 'Jephthah,' and in 1760 joined

J. C. Smith in carrying on the oratorio performances formerly conducted by Handel, for which he composed 'Zimri,' 1760, and 'The Fall of Egypt,' 1774. In 1761 he set to music Robert Lloyd's dramatic pastoral, 'Arcadia, or The Shepherd's Wedding,' written in honour of the marriage of George III. and Queen Charlotte. Eight soli for a German flute, violin or harpsichord appeared as op. 1, and six concertos in seven parts, for strings, as op. 2; another set of flute soli was made from these latter. He published also 'Three Cantatas and Three Songs for a Voice and Instruments,' and three sets, of ten each, of organ voluntaries. In 1774, on the retirement of Smith, he associated Thomas Linley with himself in the conduct of the oratorios. In 1779 he succeeded Boyce as Master of the King's Band of Music. Burney says he was 'a neat, pleasing, and accurate performer, a natural and agreeable composer, and an intelligent instructor.' His portrait by Gainsborough was finely engraved by Mary Ann Rigg (afterwards Scott), and another portrait, at the organ, was engraved by MacArdell. (See *D.N.B.*) W. H. H., addns.

STANSBURY, GEORGE FREDERICK (b. Bristol, 1800; d. June 3, 1845), son of Joseph Stansbury, a player upon the flute, bassoon and viola, residing in Bristol. When only 12 years old he was proficient on the pianoforte, violin and flute, and at 19 was engaged by Mme. Catalani as accompanist during a concert tour through England. He was, in 1820-23, musical director at the Theatre Royal, Dublin. In 1828 he appeared at the Haymarket Theatre as Capt. Macheath in 'The Beggar's Opera,' and on Jan. 15, 1829, at Covent Garden in A. Lee's 'Nymph of the Grotto.' He sang there and at Drury Lane for several years. He was re-engaged at Dublin from 1833-35; his music for 'Life in Dublin' was given there in 1834.

He was engaged as musical director and conductor at the St. James's, the Surrey, and other theatres. He composed music for 'Waverley' (with A. Lee) and 'Puss in Boots,' 1832; 'The Elfin Sprite' and 'Neuha's Cave,' 1833, and other pieces, besides many songs, etc. His voice was of poor quality, but he was an excellent musician and a ready composer. He died of dropsy. W. H. H.; addn. by W. H. G. F.

STANSFIELD, ELY, a Yorkshire musician, settled at or near Halifax in the early part of the 18th century. He issued

*Psalmody Epitomis'd, being a brief collection of plain and useful Psalm Tunes, both old and new, in four parts, London, second ed., 1781, 8vo.

The book is of considerable interest as a volume of Yorkshire psalmody, many of the tunes being by Stansfield himself, and named after Lancashire and Yorkshire towns. F. K.

STARCK (VON BRONSART), INGEBORG (b. St. Petersburg, 12/24 Aug. 1840; d. Munich, June 17, 1913), pianist and composer, of Swedish

parentage. Henselt was one of her first masters. When 18 she studied for some time under Liszt at Weimar, and then made a long concert tour through the principal towns of Germany, playing at the Gewandhaus-Concerts in 1858 and 1859, at Paris and St. Petersburg. In 1862 she married Hans von Bronsart. After staying some time in Leipzig, Dresden and Berlin, Bronsart and his wife settled in Hanover, where he was intendant of the theatre. Here she devoted herself entirely to composition. An opera by her, 'Die Göttin von Sais,' had been unsuccessful in Berlin; but her next dramatic work, a setting of Goethe's 'Jery und Bätely,' was played with great success in Weimar, Cassel, and many other places. In 1870 she wrote a 'Kaiser Wilhelm March,' which was played at Berlin at a state performance, to celebrate the return of the troops. In 1891 her four-act opera, 'König Hiarne,' was produced, the libretto by Hans von Bronsart and Friedrich von Bodenstedt. 'Manfred,' a dramatic tone-poem in five pictures, was given at Weimar in 1901, and another opera, 'Die Sühne,' appeared at Dessau, 1909. After settling in Hanover, Frau von Bronsart, who was a pianist of rare excellence, was seldom heard in public. Her compositions further include a concerto and other PF. pieces, many songs, and some music for strings. W. S. S.

STARK, LUDWIG (b. Munich, June 19, 1831; d. Stuttgart, Mar. 22, 1884), was educated at the University there, and learned music in the school of the Lachners. In 1856 he went to Paris, and after a short residence there removed to Stuttgart, and in conjunction with Faisst, Lebert, Brachmann and Laiblin, founded the Stuttgart Music School. Stark's energies were since that time continually concentrated on the school, which flourished accordingly, and in July 1865 was allowed to assume the title of Conservatorium.

A large number of works have been prepared for the use of the students, among which the 'Grosse Klavierschule' of Lebert and Stark, in 4 vols., is conspicuous. Also by the same—'Instruktive Klavierstücke' in four grades; 'Jugendbibliothek' and 'Jugendalbum,' each in twelve parts; 'Instruktive klassischer Ausgabe,' of various writers, in 21 vols., by Lebert, Faisst, I. Lachner, Liszt, and Bülow; and many more. The famous Cotta edition of Beethoven's PF. sonatas is the best-known of these publications.

Stark was made Royal Professor in 1868, and Hon. Dr. Ph. 1873, and had many other distinctions.

STARKE, FRIEDRICH (b. Elsterwerda, Saxony, 1774; d. Hamburg, early in 1836).¹ As town musician he learned to play all the usual instruments, and studied theory and composition. In later years he continued these under Albrechtsberger in Vienna, after

a roving life as Kapellmeister of a circus, theatres, and an Austrian military band. After settling at Vienna, Beethoven entrusted him with the musical education of his nephew. He composed masses and other church music, a cantata and chamber music, and published the *Journal für Militärmusik*, the *Journal für Trompeterchöre*, etc. (Q.-L.; Riemann).

STAR-SPANGLED BANNER, THE, long accounted an American national song, by regulation the official anthem of the Army and Navy of the United States and of late years generally accepted as the national anthem, it has never been officially so adopted.

The words were written by Francis Scott Key (1779–1843) in Sept. 1814, inspired by his witnessing of the defence of Fort M'Henry, near Baltimore, Md., against the British bombardment, Sept. 13-14 of that year. Concerning the melody to which it is sung, English in origin and known as 'To Anacreon in Heaven,' there has, however, been much discussion and disagreement. Long attributed to Dr. Samuel Arnold, it is now generally conceded to have been composed by John Stafford SMITH (1750–1836), to words of Ralph Tomlinson.

In an exhaustive and authoritative *Historical Report* in 1909, further elaborated in 1914, O. G. Sonneck establishes Smith's claim to the composition of the 'Anacreontick Song,' as it was popularly called. This was a song so widely familiar that the peculiar form and metre of its text unquestionably served as model for Key's poem. It is undetermined whether he himself consciously fitted it to that melody or whether, as some hold, it was Judge Joseph Hopper Nicholson who was responsible for the actual wedding of words and music that now live, with some slight modifications and variations, as 'The Star-Spangled Banner.'

BIRL.—O. G. SONNECK, *Report on 'The Star-Spangled Banner,' 'Hail Columbia,' 'America,' 'Yankee Doodle,'* p. 256 (Washington, 1909), Library of Congress publications. *The Star-Spangled Banner* (revised and enlarged from the Report on the above and other alms, issued in 1909), p. 115, with 25 plates (1914).

STASSOV, VLADIMIR VASSILEVICH (b. St. Petersburg, Jan 14, 1824; d. there, Oct. 23, 1906), a celebrated art critic and the literary champion of the 'new Russian school of music' (see BALAKIREV). He was the son of an architect of great talent, and was educated, like Serov and Tchaikovsky, at the School of Jurisprudence, which he left in 1843. From 1851–54 he resided abroad, chiefly in Rome and Florence, as private secretary to Prince Demidov. In the former city he wrote his first important contribution to musical literature, *L'Abbé Santini et sa collection musicale à Rome*. On his return to St. Petersburg he began by being private assistant to the director of the Imperial Public Library, Baron Korf, and in 1872 was himself appointed director of the department of Fine Arts, a position which he held until his death.

¹ Schilling says Dec. 18, 1836.

Stasov wrote indefatigably on a great number of subjects, artistic and literary, and was much preoccupied with the theory—which he shared with Glinka—that the national epics of Russia were mainly of Eastern origin. His earlier musical articles had chiefly an erudite and archaeological interest, but with the birth and struggles of the young Russian school they assumed a new and far more vigorous character, and henceforth he stood as the representative champion of nationality in art. His views are clearly and trenchantly defined in such remarkable essays as *Twenty-five Years of Russian Art, The Tracks of Russian Art, Art in the XIXth Century*, etc. His style is intensely individual, his sincerity unquestionable; while his views invariably inclined to the progressive and liberal side. The value of his criticisms was increased by his extensive and accurate learning, which enabled him to use comparative methods most effectually. Apart from polemics, Stasov collected and published the most valuable materials for the biographies of the chief Russian composers. His monographs upon Glinka, Moussorgsky, Borodin, Cui and Rimsky-Korsakov are indispensable to those who desire to study the development of Russian national music. His influence on contemporary Russian art was immense, and can best be realised in the number of works undertaken at his suggestion, and dedicated to him. His collected works from 1847–86 were published by his admirers in a jubilee edition (3 vols., St. Petersburg, 1894), and a fourth volume, dedicated to Count Tolstoi, was added in 1905.

STATE SYMPHONY ORCHESTRA, see NEW YORK.

STATUE, LA; opéra-comique in 3 acts, text by Carré and Barbier; music by Ernest Reyer. Produced Opéra-Comique, Paris, Apr. 11, 1861; revived at the Opéra, 1903.

STAUDIGL, (1) JOSEPH (b. Wöllersdorf, Lower Austria, Apr. 14, 1807; d. Mar. 28, 1861), one of the most distinguished and accomplished singers of his time. His father destined him for his own calling, that of Imperial huntsman (*Revierjäger*), but for this he was not sufficiently strong, and in 1816 he entered the Gymnasium of Wiener Neustadt, where his beautiful soprano voice soon attracted attention in the church. In 1823 he attended the philosophical college at Krems, and was persuaded, in 1825, to enter upon his noviciate in the Benedictine Monastery at Melk. Here his voice, which had developed into a fine sonorous bass, was invaluable for the church services. A vague impulse drove him in Sept. 1827 to Vienna to study surgery, but money ran short, and he was glad to accept a place in the chorus at the Kärnthnertheater Theater. Here he took occasional secondary parts, until the sudden illness of one of the solo singers brought him forward as Pietro in the 'Stumme von Portici' ('Mas-

aniello'), after which all the principal parts fell into his hands. High as was his position on the stage, he was still greater as a singer of oratorio and church music. In 1831 he was admitted to the court chapel, and in 1837 sang for the first time at the great musical festival of the Gesellschaft der Musikfreunde in the 'Creation.' In 1833 he sang in the 'Seasons' for the Tonkünstler Societät, a society to which he rendered the greatest services. Though not even a member, he sang at no less than eighty of its concerts, and absolutely declined to accept any fee. Differences with the management of the court theatre led him to the theatre 'an der Wien' on its reopening in 1845. There he acted as chief manager, and, with Pischek and Jenny Lind, entered on a series of fresh triumphs. He returned to the court theatre in 1848, but only to expose himself to fresh annoyance up to Feb. 1854, when an abrupt dismissal embittered the rest of his life. His last appearance in public was in 'St. Paul,' at the Tonkünstler Societät, on Palm Sunday, 1856. A few days after, insanity developed itself, and he was taken to an asylum, which he never quitted alive. His repeated tours abroad spread his fame far and wide, and he had many admirers in England, which he often visited, and where he sang in English. He created the part of 'Elijah' at the Birmingham Festival of 1846, singing the music at sight at the grand rehearsal. As a singer of Schubert's Lieder he was without a rival.

His youngest son, (2) JOSEPH (b. Mar. 18, 1850; d. Apr. 1916), possessed a flexible sonorous baritone, which he cultivated with success under Rokitsansky at the Vienna Conservatorium till 1874, when he left. He made his mark as an oratorio singer in the principal towns of Germany and Switzerland. In 1875–1883 he was frequently engaged at the court theatre of Carlsruhe, and was chamber-singer to the Grand Duke. In 1885 he married Gisele Koppmayer, an Austrian, pupil of Mme. Marchesi, who was a favourite contralto singer in opera at Hamburg, Berlin, Bayreuth, etc. They sang together in a concert tour in America (*Musik. Wochenblatt*, 1888, p. 349).

C. F. F.; addn. A. C.

STAVE (Eng. *stave, staff*; Fr. *portée*; Ger. *Linien-system, System*; Ital. *sistema*; Lat. *systema*). A series of horizontal lines, so arranged that the signs used for the representation of musical notes may be written upon or between them.

Their number is now invariably five. For the history of the stave's development see NOTATION, Vol. III. p. 659.

STAVELESS NOTATION. The staveless designation of notes, according to the system long used in Germany, has been adopted in England for the names of the notes in various octaves, but in past times in England the

nomenclature was very vague. Organists and writers on the organ have been in agreement for many years, and 'great C,' 'double C,' and 'tenor C' have been long recognised as denominating the notes sounded by pipes of 16, 8, and 4 feet respectively. 'High C' and 'low C' are terms which can only be understood in relation to different voices or instruments, and even then are sufficiently vague. The terms 'in alt' and 'in altiss' are rather loosely used, and, though as a general rule it may be taken that the octave called 'in alt' begins on the G above the treble stave, yet many persons call the F above it the 'F in altiss' instead of the 'F in alt.' It is greatly to be wished that the reasonable plan of designation shown above the notes in the following example should be generally understood by scientists and musicians. The main difficulty in regard to its universal adoption is that the note C of

the 'Great Octave' (German system) is identical with CC of the organ-nomenclature. M.

STAVENHAGEN, BERNHARD (b. Greiz, Reuss, Nov. 25, 1862; d. Geneva, Dec. 26, 1914), studied with Kiel and Rudorff, and became one of the most beloved of Liszt's own pupils. He received the Mendelssohn prize for pianoforte-playing in 1880, and lived till 1885 in Berlin, when he settled in Weimar, where in 1890 he became court pianist to the Grand Duke and in 1895 Kapellmeister. In 1898 he went to Munich in the latter capacity, and was elected director of the Royal Academy of Music there in 1901, but gave up the post in 1904 and returned to Weimar, where he was teacher, pianist and conductor until 1907, when he removed to Geneva to conduct the subscription concerts there. He composed two piano concertos, some piano pieces, of which a minutet is well known. In 1890 Stavenhagen married the singer Agnes Denis. H. V. H.

STCHERBATCHEV, (1) NICHOLAS VLADIMIROVICH (b. Aug. 24, 1853), pianist and composer, spent part of his youth in Rome, but on his return to Russia became closely associated with the young Russian School. His compositions, mostly published by Belaiev in Leipzig, are as follows:

A. *Orchestral*.—'Serenade,' op. 33; two Idylls.
B. *Pianoforte*.—'Féeries et pantomimes,' op. 8 (two books); 'Mosaics,' op. 16; 'Scherzo-Caprice,' op. 17; 'Echoes,' op. 18; 'Allegro appassionato,' op. 22; three Idylls, op. 23; two pieces, op. 28; 'Expromptu,' op. 29; 'Melancholia,' op. 31; 'The First Snow,' op. 32; 'Barcarolle,' op. 35; 'two Expromptus,' op. 36; 'Impromptu Valse,' op. 38; 'Valse,' op. 21 (3), op. 27 (2), op. 34 (Valse entr'acte); Mazurkas, op. 16, 40, 42; Preludes and Interludes, op. 20, 35, 37; Études, op. 19, 26, 30.
C. *Vocal*.—Six songs to words by Count A. Tolstol, op. 24; six songs to words by Heine.

(2) ANDREW VLADIMIROVICH (b. Government of Poltava, Jan. 29, 1869), entered the St. Petersburg Conservatoire in 1887, where he studied under F. Blumenfeld, Liadov and Rimsky-Korsakov, composer of a march for orchestra, op. 5, a pianoforte sonata, op. 6, and a considerable number of songs and piano pieces.

(3) VLADIMIR VLADIMIROVICH (b. Jan. 24, 1889), was educated at the St. Petersburg Conservatoire and has composed symphonies, PF. sonatas and chamber music. R. N.

STEDMAN'S PRINCIPLE, see CHANGERING.

STEFANINI (STEFFANINI), GIOVANNI BATTISTA, of Modena, maestro di cappella in 1608 of S. Maria della Scala, Milan; between 1608 and beginning of 1614 of Turin Cathedral; in 1614 of Madonna della consolazione, Rome; in 1618 and in 1626 of Modena Cathedral. He composed 4 books of motets, 1 book of 'Concerti ecclesiastici,' also a masque, together with 'Capilupi,' performed at Modena, Jan. 26, 1600 (Q.-L.).

STEFFANI, AGOSTINO (b. Castelfrance, July 25, 1654; d. Frankfurt, Feb. 12, 1728), composer and diplomatist, was one of the most remarkable men of his age. He appears to have entered one of the Conservatori early and become a singing-boy at St. Mark's in Venice,¹ where, in 1667, he was heard by a Count von Tattenbach, probably an emissary of the court of Bavaria. The Count was so delighted with his voice and intelligence that he carried him off to Munich. He was educated at the expense of the Elector Ferdinand Maria and apprenticed to Johann Kaspar Kerl to learn to play the organ. At the beginning of Oct. 1673 he travelled to Rome in order to perfect himself in his art. Here he began to compose assiduously.

In 1674 Bernabei succeeded Kerl as Kapellmeister at Munich. After his return Steffani again took up his position as Kammermusik, and almost immediately published his first work:

'Psalmodia vespertina volans 8 plenis vocibus concinenda ab August. Steffana in lucem edita aetatis suae anno 19,' Monachii, 1674.

This work was a brilliant success for the young composer, and a portion of it was thought worthy of being included by Padre Martini in his *Saggio di contrappunto*, published just a hundred years later. On Mar. 1, 1675, he was appointed court organist.

MUNICH.—But music was not the only study which had occupied his mind; he had studied mathematics, philosophy and theology, and in 1680 he was ordained a priest with the title of Abbate of Lepsing. Such was the favour shown to him by the new Elector, his old

¹ Riemann says he was brought up at Padua.

² On this erroneous statement of age see Q.-L. It is from the same dedications that we know him to have learnt from Bernabei.

friend Ferdinand Maria having died the year before, that a decree of Nov. 3, 1680, accords to the 'Honourable priest, Court and Chamber musician, and Organist Steffani,' a present of 1200 florins for 'certain reasons and favours' (gewissen Ursachen und Gnaden). Hitherto he had confined himself to the composition of motets and other church music, but now appeared his first work for the stage. The title, taken from the contemporary MS., evidently the conducting score, in the Royal Music Library B.M. (formerly at Buckingham Palace), in an Italian hand, probably that of his secretary and copyist Gregorio Piva, runs thus:

'Marco Aurelio, Drama posto in Musica da D. Agostino Steffani, Direttore della Musica di Camera di S. A. S. etc. di Baviera, l' anno 1681.'

It will be seen that a further step had been gained—he was now director of chamber-music. In 1683 appeared some Sonate da Camera for two violins, alto and bass, and in 1685 a collection of motets entitled 'Sacer Janus Quadrifrons 3 voc. Monachii,' but no trace of these works is to be found. For the Carnival of 1685 he composed the opera 'Solone,' which appears to have been an opera buffa in three acts; the score, however, like all the Munich operas by Steffani with the exception of 'Marco Aurelio,' is lost. He also composed in this year a musical introduction for a tournament, with the title: 'Audacia e rispetto.' The new Elector Maximilian Emanuel was married at the end of 1685 to the Archduchess Maria Antonia, daughter of Leopold I., and the wedding festivities in Munich in the first days of January 1686 began with the opera 'Servio Tullio,' again by Steffani, with ballets arranged by Rodier, and music to them by Dardespin, the Munich Konzertmeister, danced by twelve ladies and gentlemen of the court, with costumes from Paris. On Jan. 18, 1687, the birthday of the young Electress, we have an opera—the text of which was by the new Italian secretary Luigi Orlandi, whose wife sang on the stage—called 'Alarico il Balto, cioè l' audace, rè dei Gothi,' with ballets composed, arranged and danced as before. For this opera fresh Italian singers were brought from Italy. In 1688 he composed the opera 'Niobe, regina di Tebe,' probably for the Carnival, the text again by Orlandi. This was his last work for the court of Munich.

Various reasons have been put forward to account for his leaving a court where he had been so well treated, and where the art of music was held in such esteem, for Munich had not only at this time good singers, a good orchestra and experienced and intelligent audiences, but had likewise a splendid musical history. The Elector had granted him 750 florins on account of his two operas and for a 'Badekur' in Italy in June 1686. In May 1688 gracious permission was given to him to go again to Italy, in con-

sideration of his twenty-one years' service; his salary was not only paid to the end of June, but from the beginning of July he was given three years' salary as a reward! Not only so, but his debts were paid by the court treasurer out of this, and the balance was sent to him in Venice, where he had gone. The main reason for his deserting Munich was no doubt that on the death of the elder Bernabei at the end of the year 1687 his son, who had come from Italy in 1677 to fill the post of vice-Kapellmeister, was in the early part of 1688 made Kapellmeister, thus debarring Steffani from further promotion. Added to this, the Duke of Brunswick, Ernst August, who had been present at the festivities when 'Servio Tullio' was performed, was so delighted with Steffani's music and singing that he had already made him an offer to go to Hanover, and Steffani appears actually to have made use of the leave granted for the Badekur in Italy in 1686 to spend his time in Hanover instead of there. The appointment then of the younger Bernabei to the Munich Kapellmeistership must have decided him at once to leave Munich, and from Venice at the end of 1688 or early in 1689 he made his way to Hanover, there to remain and become Kapellmeister, and a good deal besides.

HANOVER.—The court of Hanover was renowned for its magnificence and courtesy, which were, however, combined with a friendly simplicity held to be the best in Germany.¹ One of its principal ornaments was the great philosopher Leibniz, who had resided there since 1676, and who, with the Duchess Sophia, had raised the tone of the court to a very high intellectual standard. Up to this time the operas at Hanover (chiefly imported from Venice) were given in the small French theatre, but that being deemed too small a new opera-house was built, which was pronounced to be the most beautiful in all Germany. It created the reputation of its architect, Thomas Giusti, and caused him to be called to Berlin and other towns for similar purposes. The new house was opened in 1689 with 'Henrico Leone,' by Mauro and Steffani. The score² gives a list of the scenes, machinery, etc., which might astonish even a 20th-century reader. It had a very great success, was given in German in 1696 at Hamburg and in 1697 at Brunswick, and acquired great celebrity. The opera shows marked advance on 'Marco Aurelio.'

'Henrico Leone' was followed in the summer of this year by 'La lotta d' Alcide con Achelao,' a divertimento drammatico in one act, a charming work, written probably also by Mauro. It seems to have been performed at the Summer Theatre at Herrenhausen. The next opera was 'La superbia d' Alessandro,' in 1690 (the conducting score gives 1691 as the date), the words by Mauro; a fine work. 'Orlando generoso'

¹ See Chrysander's *Händel*.

² Roy. Lib., B.M.

came out in 1691—another fine work written in conjunction with Mauro. 'Le rivali concordi' appeared in 1692 (1693, *Riemann*), written again by Mauro, and afterwards performed at Hamburg. We now come to 'La libertà contenta' (Mauro) in 1693, in which evidence is given of great further progress, for nothing of such importance had hitherto come from his pen.

It was in the next year that Steffani issued his celebrated pamphlet entitled

'Quanta certezza habbia da suoi Principii la Musica, ed in qual pregio fosse perciò presso gli Antichi. Amsterdam, 1695. Risposta di D. A. Steffani Abbate di Lepsing Protonotario della San Sede Apostolica. Ad una lettera del S^{no} Marche. A. G. in difesa d'una Proposizione sostenuta da lui in una Assemblea. Hannovera Sett, 1694.'

Steffani ably discusses the question whether music exists only in the imagination, or is grounded on nature and science. In 1695 we have the opera 'I trionfi del Fato, o le glorie d' Enea.' It found its way to Hamburg in 1699. An opera in one act, 'Baccanali,' was also composed this year for the small theatre in Hanover. For the Carnival of 1696 the grand opera of 'Briseide' was composed, the words by Count Palmieri. No composer's name is mentioned, and Chrysander thinks it is not by Steffani; but the two scores and collections of Steffani's songs in the Roy. Mus. Lib., B.M., leave little doubt on examination that it is his work, and in his usual manner.

DIPLOMATIC CAREER.—A change was now about to take place in Steffani's circumstances. He was no longer to be the active composer of operas, and Kapellmeister, but from this time forth was destined to devote his time chiefly to diplomacy, though he never forsook the art of which he was so great an ornament. Ernst August had sent 5000 men to assist the Emperor against the Turks, and some 8000 against the French; his two eldest sons, George (afterwards King of England) and Frederick Augustus, had served in the field, and three others had been killed in the wars. The Emperor as a reward determined, in 1692, to create a ninth Elector, and raise the younger branch of the house of Brunswick-Lüneburg to the Electorate. This was generally deemed just, but many difficulties stood in the way, and during four years the position of Ernst August as Elector became more and more difficult, so that, in 1696, it was determined to send an Envoy Extraordinary round to the various German courts to smooth matters over, and Ernst August and Leibniz could find no one among the court *personnel* in Hanover so well fitted for the post as Abbate Steffani. So admirably did he succeed that at the end of the mission he was not only granted a considerably larger salary than he had hitherto had at court, but Innocent XI. was induced to raise him in 1706 to the dignity of Bishop (*in partibus infidelium*) of Spiga in Anatolia, Asia

Minor—the ancient Cyzicus. In the early part of 1698 he was sent to Brussels as ambassador, and there had his first audience on Mar. 1. In this year the Elector Ernst August died, and Steffani afterwards transferred his services to the Elector Palatine at Düsseldorf, where he became a Privy Councillor and, in 1709, the Pope's Protonotarius for North Germany, though at what time this occurred is not known. In 1707 the opera 'Arminio' was composed. In 1709 we find Steffani again with two new operas. Both are stated in the scores of the Roy. Mus. Lib., B.M., to be by Gregorio Piva—his secretary, whose name he adopted for his compositions after he became a statesman. The opera given at Hanover is called 'Enea, or Amor vien dal destino,' in the large copy, but in the conducting score 'Il Turno'—in three acts. The Düsseldorf opera, 'Tassilone Tragedia in 5 Atti,' is only represented in the Roy. Mus. Lib., B.M., by a vocal score; the overture and all instrumental effects are wanting, only the bass being given to the different pieces; but the singers' names, all Italian, are mentioned.

VOCAL DUETS.—Though, however, his operas were his greatest works, they could not attain the same universal popularity as his well-known duets for various voices, with a bass accompaniment. These are mostly in three long movements, some with recitatives and soli, in the cantata form, following Carissimi and Stradella. Of these celebrated duets there are more than a hundred in the British Museum, and in the splendid copy in 3 vols. in the Roy. Mus. Lib. The words were mostly by Ortensio Mauro, Averara, Abbate Conti, Conte Francesco Palmieri, etc. The testimony to the great excellence of these compositions is abundant. Burney says in speaking of these duets, 'Those of the admirable Abbate Steffani were dispersed in MS. throughout Europe.' Mattheson again, 'In these duets Steffani is incomparable to all I know, and deserves to be a model, for such things do not easily become old.' Chrysander also writes, 'These duets are the greatest of their kind.' The most renowned singers, Senesino, Strada and others, delighted in them, and used them constantly for practice in both expressive and florid singing.¹ No copies of these duets are dated, but they were probably all composed after he went to Hanover; and some of them are known to have been written for the Princess Sophia Dorothea.

Steffani was in Italy on a diplomatic mission to the Papal Court from Oct. 1708 to June 1709.² It was then that he met HANDEL (see Vol. II. p. 506), whom he induced to visit Hanover. Handel testifies to Steffani's great kindness to him while at Hanover. He was

¹ Several movements from these duets are included in 'Duetti da camera,' edited by J. A. Fuller Maitland.

² Woker, *Aus den Papieren des kurfürstlichen Ministers Agostino Steffani*. (Vereinschrift der Görresges. 1885) See also Streitfeld's *Handel*, p. 44.

anxious, too, that Handel should become Kapellmeister at this court.

The Duke of Brunswick, Anton Ulrich, was converted to Catholicism in 1710, and we find Steffani going from Düsseldorf to Brunswick to accept in the name of the Pope a piece of ground as a site for a church. About the year 1712 the new church in Brunswick was so far ready that the Pope sent Bishop Steffani to consecrate the building and perform the opening service. Two years later the Elector of Hanover became King of England, but Steffani did not accompany him to London; indeed, we do not meet with his name again till 1724, when the ACADEMY OF ANCIENT MUSIC (*q.v.*) in London unanimously elected him its Hon. President for life. Steffani appears to have sent over the following four works for performance—the fine and well-known madrigal ‘Qui diligit Mariam,’ for S.S.A.T.B.; another madrigal, called ‘La Spagnuola,’ ‘Al rigor d’un bel sembiante,’ for two altos and tenor, not so remarkable; and the beautiful madrigal ‘Gettano i Rè dal soglio.’ These are generally found in the MS. collections of the time. The fourth piece was the great Stabat Mater, composed for S.S.A.T.T.B., accompanied by strings and organo, and undoubtedly one of the finest works of any composer of the period immediately preceding that of the giants Bach and Handel. His great contemporaries Alessandro Scarlatti and Purcell produced nothing finer. No exact dates can be assigned to these four works, but they all belong to his later manner. In Steffani it is to be found the perfection of counterpoint without stiffness, and with that real sign of genius, exhaustless variety. As in Bach, there is marvellous freedom in the movement of the parts, and no hesitation at a good clashing dissonance produced by this freedom. He was an adept too at writing the charming minuets and gavottes which were then so fashionable, and in which his operas abound. At the British Museum there is likewise a ‘Confitebor’ for three voices with violins and bass in E minor, said to be of the year 1709, with a splendid bass solo (‘Sanctum et terribile’)—a species of accompanied recitative; the whole work being full of exquisite beauties. In the R.C.M. there is a book of ‘XII Mottetaper celeberrimum Abbatem Stephanum’ for three voices with soli and recitatives, but it is only a vocal score, without the symphonies and accompaniments which all undoubtedly had. In another book in the same library, however, we find two of them complete. Early in 1727 Steffani was once more and for the last time in Italy. At the palace of Cardinal Ottoboni, who still kept up his Monday performances of music, Steffani, now 74 years old, occasionally sang.¹ Hawkins reports

on the authority of ‘those who heard him’ that

‘He was just loud enough to be heard, but that this defect in his voice was amply recompensed by his manner, in the chasteness and elegance of which he had few equals.’

From Hawkins we also learn that

‘As to his person he was less than the ordinary size of men, of a tender constitution of body, which he had not a little impaired by intense study and application. His deportment is said to have been grave, but tempered with a sweetness and affability that rendered his conversation very engaging; he was perfectly skilled in all the external forms of polite behaviour, and, which is somewhat unusual, continued to observe and practise them at the age of fourscore.’

He was back in Hanover in a short time, and the next year, going to Frankfurt on some public business, died and was buried there after a short illness.

The last word has not yet been said about this remarkable musician, and it is to be hoped that some of his duets, and perhaps his glorious Stabat Mater and Confitebor, may still be heard in the concert-room. His career was certainly one of the most extraordinary in musical history. Born of obscure parents he raised himself by his talents and industry from the position of a poor choir-boy, not only to be one of the foremost musicians of his age, but likewise the trusted confidant of princes and the friend of such a man as Leibniz. The only other instance of an artist having become an ambassador is to be found in the painter Rubens. The materials for this notice have been chiefly gathered from Rudhardt, Hawkins and Chrysander, the latter having supplied some important information hitherto unpublished. Besides these authorities the following may be consulted: A. Neisser’s *Dissertation* on ‘Servio Tullio,’ 1902; F. W. Woker’s article in the *Vereinschriften* of the *Görresgesellschaft* (see p. 127, n. 2). (For list of extant works, see *Q.-L.*)

STEFFKINS, (1) THEODORE (THEODORUS), a foreign professor of the lute and viol, who lived in London in the latter half of the 17th century. He is commended in Thomas Salmon’s *Essay to the Advancement of Music*, 1672. His brother, (2) DIETRICH, was one of the band of Charles I. in 1641, and his two sons, (3) FREDERICK and (4) CHRISTIAN, were famous performers on the viol. They were members of the King’s band in 1694, and Christian was living in 1711.

W. H. H.

STEGGALL, (1) CHARLES, Mus.D. (b. London, June 3, 1826; d. there, June 7, 1905), was educated at the R.A.M., from June 1847, principally by Sterndale Bennett. In 1848 he became organist of Christ Church Chapel, Maida Hill; in 1851 a professor at the R.A.M., and in the same year accumulated the degrees of Mus.B. and Mus.D. at Cambridge. In 1855 he was appointed organist of Christ Church, Lancaster Gate, and in 1864 organist of Lin-

¹ The statement formerly accepted that Handel met Steffani on this occasion and heard him sing is unfounded. Handel was in London in the spring of 1727.

coln's Inn Chapel. In 1884 he was elected on to the Board of Directors of the Academy, and in 1887 was one of those who carried on the duties of head of the institution between the death of Macfarren and the appointment of Mackenzie. In 1903 he resigned his professorship. He was one of the founders of the R.C.O. in 1864, and was examiner for the Mus.D. degree at Cambridge in 1882 and 1883. He was hon. secretary to the Bach Society, founded by Bennett, from 1849 to its dissolution in 1870. He composed anthems and other church music, and lectured upon music in the metropolis and elsewhere.

W. H. H., addns.

His youngest son, (2) REGINALD (b. London, Apr. 17, 1867), was educated at the R.A.M., where he gained the Balfé Scholarship in 1887, afterwards becoming an Associate, in due course a Fellow, and, in 1895, organ professor. In 1886 he was appointed to the post of organist of St. Anne's Church, Soho, and some years afterwards became his father's assistant at Lincoln's Inn Chapel, being appointed to succeed him in 1905.

He first came prominently before the public as a composer at a concert organised by Granville Bantock in 1896 at the Queen's Hall, when a scena, 'Elaine,' was performed; an Ave Maria was given at another concert of the same kind, and his scena 'Alcesteis' was given at the Crystal Palace earlier in the year. His 'Variations on an Original Theme' for orchestra were played at Bournemouth in Feb. 1903,¹ and later orchestral works include a Fantasy Overture, produced there in Mar. 1914. A symphony, and a Mass, together with many anthems, a Festival Evening Service, and organ pieces, are included among his compositions.

M., addns.

STEGMANN, KARL DAVID (b. Dresden, c. 1751; d. Bonn, May 27, 1826), a pupil of the Kreuzschule, afterwards of Weisse and Homilius. He appeared at Breslau successfully in 1772 as operatic tenor, and after engagements in that capacity at Königsberg, Danzig, Gotha and Hamburg, became Kapellmeister at the Hamburg Theatre in 1798, retaining that position until 1811, when he retired to Bonn. For a list of his numerous compositions (operas, singspiele, concertos, etc.), see Gerber, i. and ii. (q.-L.; Riemann).

STEIBELT, DANIEL (b. Berlin, 1765; d. Sept. 20, 1823), was so celebrated in his day as a pianoforte-player and composer that many regarded him as the rival of Beethoven.

He was the son of a Berlin harpsichord and pianoforte maker, and coming under the patronage of the Crown Prince, afterwards Frederick William II., was sent to Kirnberger for instruction in the harpsichord and composition. His musical education was interrupted by his joining the army for a while,² and was finally

brought to an end, as far as Berlin was concerned, by his departure from that city, probably in 1784.

His career as a composer and virtuoso began in Paris at some date between 1787 and 1790. Besides winning success as a pianist and writer of pianoforte music, Steibelt also essayed opera, his 'Romeo and Juliet,' a setting of a libretto written by the Vicomte de Ségur, one of his patrons, being produced at the Théâtre Feydeau on Sept. 10, 1793, meeting with considerable approval.

This completely confirmed Steibelt's position in Paris. His pianoforte music, though considered difficult, was extremely popular, and as a teacher he counted amongst his pupils the most eminent amateurs of the time; but he presently injured his reputation by selling as new some pieces in a slightly altered form which had already been published elsewhere, and in consequence he felt it desirable to leave Paris, at any rate for a time. England attracted his attention, and, journeying by way of Holland, he reached London about the close of 1796.³ His first public performance seems to have been at Salomon's Benefit Concert on May 1, 1797, and a fortnight later (May 15) he played a pianoforte concerto of his own at an opera concert. Not long after this he wrote the pianoforte concerto in E (No. 3), containing the 'Storm Rondo,' a work of enormous popularity, in all probability first performed in public at Salomon's concert on Mar. 19, 1798. At the close of the same year (Dec. 11) its author again came forward as an opera composer, 'a new grand Heroic Romance, in three acts, called Albert and Adelaide; or the Victim of Constancy,' being produced at Covent Garden; a medley this, both words and music, the latter being only in part original, eked out by the insertion of a quintet from 'Lodöiska' and the like expedients. Even the 'original' music was not all written by Steibelt, as Attwood contributed some of it.⁴ As teacher and performer Steibelt appears to have been as fully employed during his stay of three years or so in London as he had been previously in Paris. Two circumstances of interest connected with his visit to England may be mentioned. The first of these is the fact that he conceived a decided predilection for English pianofortes, always using them in preference to any others; the second is his marriage with a young Englishwoman, described as possessed of considerable personal attractions and as a good player on the pianoforte and tambourine. The last-named accomplishment led her husband to add a tambourine accompaniment to many of his subsequent pieces.

² According to Fétis, Steibelt did not leave Paris till 1796; but Broadwood & Sons have records in their possession which prove that he was established in London by Jan. 2, 1797.

³ A. J. H.
⁴ This information is derived from an advertisement of Longman, Clementi & Co. in *The Morning Chronicle* of Jan. 22, 1799. These pianofortes were common enough then, and until the end of the first quarter of the 19th century.

¹ See Dan Godfrey's *Memories and Music*, p. 304. ² *A.M.Z.* ii. 622.

Steibelt now resolved on visiting his native country, reaching Hamburg in Sept. or Oct. 1799, and going on to Dresden, where he gave a concert on Feb. 4, 1800, Prague, Berlin¹ and Vienna. For the account of his meeting and contest with Beethoven, see BEETHOVEN. His discomfiture on this occasion naturally affected his success at Vienna, and a concert that he gave at the Augarten-Saal was rather thinly attended. His German tour as a whole was only partially successful, and Steibelt determined to return to the more congenial atmosphere of Paris. He arrived there in Aug. 1800, carrying with him the score of Haydn's 'Creation,' giving a performance of the work, with a translation by de Ségur and with some alterations and additions of his own to the music, at the Opéra on Christmas Eve, 1800.² The adaptation of the words seems to have been fairly performed; at the alterations made in the score competent judges were, naturally enough, extremely indignant. Moreover, the circumstances of his departure some four or five years before had not been forgotten, and thus, in spite of the success of the performance of the 'Creation' and of that of his ballet 'Le Retour de Zéphyr,' given at the Opéra on Mar. 3, 1802, Steibelt did not feel very comfortable in Paris. On the 22nd of the same month he returned to London.

The next six years of his life were about equally divided between London and Paris. His popularity in London was as great as ever. For the King's Theatre in the Haymarket he wrote two ballets, 'Le Jugement du berger Paris'³ in 3 acts (produced May 24, 1804), and 'La Belle Laitière'⁴ (produced Jan. 26, 1805). Returning to Paris, Steibelt produced an intermezzo, 'La Fête de Mars,' composed in celebration of the Austerlitz campaign, at the Opéra on Mar. 4, 1806, while 'La Princesse de Babylone,' an opera in three acts, was accepted by the Opéra, and was in active preparation when the importunity of his creditors compelled the composer to leave Paris suddenly in the autumn of 1808. But his energies were by no means confined to writing for the stage. Much of his chief pianoforte music dates from these years; the two concertos in E♭ (Nos. 4 and 5), the Méthode published in French, German and Spanish, in which he claims to have invented the signs for the use of the pedals adopted by Clementi, Dussek and Cramer (see MUTE), and his Étude—a collection of fifty studies in two books.

Having received the offer of a very advantageous appointment from the Emperor Alexander, Steibelt left Paris for St. Petersburg in

Oct. 1808. He stopped at Frankfort to give a concert on Nov. 2,⁵ and at Leipzig made a stay of some weeks and repeated the programme of the Frankfort concert.

It is not very clear when he was appointed director of the Opéra Français at St. Petersburg, but when Boieldieu left, at the close of 1810, Steibelt received the title of maître de chapelle to the Emperor in his place. In managing and writing for the opera, and in teaching and composing for the pianoforte, the remaining years of Steibelt's life were spent. His early years in the city were marked by production of the ballets 'La Fête de l'Empereur' in 1809, and 'Der blöde Ritter' (before the end of 1812); he also wrote two operas, each in three acts, 'Cendrillon' and 'Sargines'; a third, 'Le Jugement de Midas,' he did not live to finish. He also spent some time in revising 'Roméo et Juliette.' In the midst of these avocations he was seized with a painful disease, of which, after lingering some time, he died. A number of his friends combined to honour him with a quasi-public funeral, and the military governor of St. Petersburg, Count Milarodovitch, organised a subscription concert for the benefit of his family, who were left in very straitened circumstances.

A comprehensive list of Steibelt's compositions appeared in the former editions of this Dictionary. J. H. M., abridged.

STEIGLEDER, HANS ULRICH (b. circa 1580; d. 1635) came of an organist family settled at Stuttgart. After serving as organist at Lindau on the Bodensee, he was appointed in 1617 Stifts-Organist at Stuttgart, in which capacity he had also to serve as musician generally to the court of Würtemberg. For the organ he published two works, the first of which is so far remarkable as being the first specimen in Germany of copper-plate engraving for organ or clavier music. As the title informs us, the engraving was by his own hands,

Ricercar Tabulatura, Organis et Organocdis unice inserviens et maxime conduens adornata a J.U.S. . . . ejusdemque Autoris sumptibus et manibus propriis Aeri Cupreo incusculpta et excusa. Anno 1624.

Although mentioned by Gerber, this work was unknown to modern musicians, until a copy sent from the Royal (now State) Library at Stuttgart was shown at the Vienna Musical Exhibition of 1892. The engraving is said to be rather coarsely done. Some account of the music is given in Seiffert, *Geschichte der Klaviermusik*, Bd. I. p. 105. It consists of ricercari of the earlier Italian fugal type. The other published work of Steigleder is entitled,

Tabulatur-Buch darinnen das Vater Unser auf 2, 3 und 4 Stimmen componirt und vierzig mal variiert wüirdt . . . auf Orgeln und allen andern Instrumenten ordentlich zu appliciren . . . 1627.

This work consists of forty 'Bearbeitungen' or Variations on the melody of the 'Vater Unser'

¹ All authorities seem to place the visit to Berlin between his concert at Prague and his arrival at Vienna. Otherwise, it would be natural to conjecture from the dates that he went to Berlin before going to Dresden.

² See PLEYEL for the original plan regarding this production at the Opéra.

³ See *Morning Chronicle*, May 25, 1804.

⁴ *Ibid.* Jan. 28, 1805.

⁵ The correspondent of the *A.M.S.* (xi. 170) oddly describes him as 'Steibel of London.'

⁶ It is worth noting that some authorities declare this was written for Paris. This opera has been considered his greatest work.

im Himmelreich,' which show the influence of the newer technique of the English-Dutch Variation School of Sweelinck, as well as of the South German toccata style of George Muffat. Two specimens are given in Ritter, *Geschichte des Orgelspiels*, Nos. 87 and 88. J. R. M.

STEIN, a family of pianoforte makers and players.

(1) JOHANN ANDREAS (b. Heidesheim, Palatinate, 1728; d. Feb. 29, 1792), the founder of German pianoforte-making. He appears to have been in Paris in 1758, and to have remained there for some years. We may conclude that he was engaged in organ-building and harpsichord-making, since he was not only a good musician, but a proficient in both handicrafts, before he turned to pianoforte-making. After Paris we find him at Augsburg, organist of the Barfüsserkirche, the famous organ of which he built, as well as that of the Kreuzkirche. Several examples of Stein's pianoforte, exhibited at Vienna in 1892, are now in the collection of Mr. Steinert of New Haven, Conn., U.S.A. A grand piano, which was secured by Victor Mahillon for the Museum of the Conservatoire, Brussels, is inscribed

'Jean André Stein
Facteur d'orgues et des Clavecins
Organiste à l'Eglise des Minorites
Augsbourg, 1780.'¹

The action of this bichord grand piano is the same as that illustrated in Fig. 10 of the article PIANOFORTE, which was copied from a scarce pamphlet preserved in the Library of the Gesellschaft der Musikfreunde at Vienna. The wedge damper is Cristofori's; the escapement and other parts of the action differ entirely from that maker's and from Gottfried Silbermann's as preserved in three instruments at Potsdam, in which the Florentine maker Cristofori is closely followed. This instrument has also the *genouillère* or knee-pedal for raising the dampers, which preceded the foot-pedal. (See MUTE.) The *genouillère* and Stein's escapement are described by Mozart with great gusto in a letter addressed to his mother, in Oct. 1777, only a very few years before Mahillon's piano was made. What action was used by Spaeth of Ratisbon, also referred to by Mozart, we do not know, but Mahillon's discovery at Brussels of a square piano, with the rudiments of Stein's action—that is, the same centred percussion without the hopper escapement—leads directly to the conclusion that this simple action, clumsy as Mozart found it without the escapement, was in common use before Stein brought his inventive genius to bear upon its improvement.²

¹ The last figure is indistinct, and Mahillon thought that it might be 5 or 6 instead of 0.

² The small Viennese piano now at the R.C.M. has these attributes of Stein, action and knee-pedals, and of so clever a mechanism that it was said by an expert to be fifty years in advance of its time. It was found in Italy by Heron-Allen—who gave it to Mrs. Rudolph Lehmann—and she bequeathed it to A. J. Hipkins; but it came too late for him to gratify his curiosity as to its maker. E. J. H.

Welcker von Gontershausen (*Der Clavierbau*, Frankfurt, 1870, p. 173) gives a drawing of this action without hopper escapement, attributing it to Silbermann; but, as far as we can see, without proof. Many of the early German pianos have neither date nor inscription, which makes the attribution to a maker difficult. We are disposed to think that Silbermann would not have abandoned the good action of Cristofori, which he knew how to finish well, for a crude tentative mechanism; we therefore conclude that the Seven Years' War having entirely stamped out Saxon pianoforte-making, a new era began with the restoration of peace, and that the merit of founding that German pianoforte-making which was so long identified with the school of Vienna, belongs to Stein, whose inventive talent and artistic devotion were displayed in the good instruments he made, which by 1790 at latest, were adopted as models both in North and South Germany, as the two grand pianos formerly belonging to Queen Louise, made by Huhn, 'Organ-builder,' of Berlin,³ and preserved in memory of her at Potsdam, unmistakably show.

Gerber, in his *Lexicon*, has preserved a list of numerous inventions by Stein (of one, the 'Melodica,' the inventor published an account in 1772) of which none are now of value save the escapement and the keyboard shifting by means of a pedal. He introduced the latter in his 'Saitenharmonica' in 1789, carrying the hammers from three strings to one, which he spaced rather away from the other two unisons. This 'una corda' he named 'Spinettchen.' A. W. Thayer⁴ unearthed a record of Pastor Junker, showing that Beethoven in 1791, when residing at Bonn, always used an instrument of Stein's.

Stein died, leaving two sons, MATTHÄUS ANDREAS and FRIEDRICH, and a daughter, Maria Anna, known as NANNETTE, who married STREICHER (*q.v.*), and was really the most prominent of the group.

Though Streicher ultimately succeeded to the business, which had been removed from Augsburg to Vienna, his name does not appear for several years in connexion with it. (See PIANOFORTE, Vol. IV. p. 158, note 5.) The firm as late as 1801 was 'Geschwister Stein'; subsequently 'Nannette Stein' only, which appears as the maker's name on a grand pianoforte with six pedals, existing (1882) in Windsor Castle. A. J. H.

(2) MARIA ANNA (NANNETTE) (b. Augsburg, Jan. 2, 1769; d. Jan. 10, 1838). When barely 8 she played to Mozart on his visit to Augsburg in 1777, and, in spite of the bad habits she had contracted, he said of her 'She

³ One of these instruments, and apparently the older one, bears no name outside, but internal examination shows that the maker was the same who made the 1790 one; both closely resemble Mozart's piano by Walther, at Salzburg, and the original model by Stein of 1780.

⁴ Beethoven, II. 209-15.

may do yet, for she has genius' (Jahn, i. 368). Her talent and capacity were so obvious that her father early initiated her into the details of his business, and on his death she carried it on, in conjunction with her brother, Matthäus Andreas, with a decision and energy almost masculine. In 1793 she married Johann Andreas STREICHER, an excellent pianist and teacher from Stuttgart, and then she, her husband and mother, moved to Vienna. The new firm of 'Nannette and Andreas Stein' (constituted by Imperial decree, Jan 17, 1794) established itself in the 'Red Rose,' No. 301 in the Landstrasse suburb. In 1812 the factory was removed to premises of their own, which had been rebuilt and enlarged some years before, No. 27 in the Ungargasse. In 1802 the brother and sister dissolved partnership, each setting up for themselves, as 'Matthäus Andreas Stein,' and 'Nannette Streicher, geborene Stein.' Streicher, who had hitherto managed only the commercial part of the business, now took his full share of the work. Both firms endeavoured to perfect their instruments in every possible way,¹ while still adhering to the traditions of their father, and Stein of Vienna became as celebrated as Stein of Augsburg had been. In 1823 the Streichers took into partnership their son Johann Baptist (b. Vienna, 1796). Nannette Streicher was at once an energetic and capable woman of business, a pianist of remarkable excellence, a person of great general cultivation, and a model wife and mother. Her name is closely connected with that of Beethoven. It is well known that she did much to help him in his domestic arrangements, lightened the burden of his housekeeping, and even looked after his bodily health. Thayer, in his *Beethoven* (iii. 239), gives us a striking picture of their relationship. (See also BEETHOVEN, Vol. I. p. 290.) Her husband died in the same year as his wife, on May 25. The business was carried on successfully by their son, J. B. Streicher, and his son, Emil. Her brother,

(3) MATTHÄUS ANDREAS (b. Augsburg, Dec. 12, 1776; d. May 6, 1842), accompanied his sister to Vienna, set up for himself in 1802, marrying on Nov. 12, 1796. His son,

(4) KARL ANDREAS (b. Vienna, Sept. 4, 1797; d. Aug. 28, 1863), also a pianoforte-maker and composer, early showed talent for music, and became an excellent pianist and teacher. He was a pupil of Förster in harmony and composition, and published a considerable number of works principally for his instrument. He also left in MS., among others, two PF. concertos with orchestra, two orchestral overtures, and a comic opera, 'Die goldene Gans,' words by Langbein. He appeared several times in

public, but latterly devoted himself entirely to the factory, in the working of which his father had early initiated him. In 1829 a patent was granted to him. Karl Andreas travelled much, and his pianos were appreciated abroad, as well as by the first artists of his own country. In 1844 he was appointed court pianoforte-maker. His book 'on the playing, tuning, and preservation of Stein pianofortes,'² contains valuable matter.

C. F. P.

(5) FRIEDRICH (b. Augsburg, May 26, 1784), younger son of Johann Andreas (1), at the age of 10 went to Vienna, and studied counterpoint and composition with Albrechtsberger. He became one of the first pianoforte-players of the capital, and was considered to be a very promising composer. He appeared rather frequently in the Augarten and Burgtheater concerts as a player of concertos, especially those of Mozart. Reichardt (Apr. 1, 1809) calls him:

'A performer of great power and genius. . . . A rare power, combined with the deepest feeling, characterised his performance. He played some of Beethoven's most difficult pieces, and variations of his own composition, full of invention and deep sentiment, and of monstrous difficulty. Since then I have heard him at home on his magnificent Streicher pianoforte, and am confirmed in my opinion of his assiduous study and great talents.'

These eulogies are borne out by other contemporary notices.

Friedrich Stein is the subject of Ries's anecdote (*Notizen*, p. 115). Beethoven had played his concerto in G at his own concert, Dec. 22, 1808 (Vol. I. p. 286), with astonishing spirit and speed, and immediately after called upon Ries to play it in public, with only five days for its study. Ries naturally shirked such a task, preferring to play the C minor one instead. At this his master was offended, and turned to Stein, who accepted the task, but was unable to accomplish it, and played the C minor instead, not satisfactorily.

Stein was an industrious composer, but few of his vocal compositions reached the stage. He left three operettas and a ballet, of which only one—'Die Fée radiante'—came to public performance. Also a set of songs, a violin concerto, a grand sonata for the PF., and a PF. trio. He also arranged Beethoven's fourth and sixth symphonies for two PFs.

A. W. T.

STEINBACH, (1) EMIL (b. Lengenrieden, Baden, Nov. 14, 1849; d. Mainz, Dec. 6, 1919), studied at the Leipzig Conservatorium 1867–1869, in 1877 became conductor of the town band, and in 1898 director of the town theatre of Mainz. He was especially known as a conductor of Wagner, in which capacity he appeared at Covent Garden in 1893. He composed much chamber and orchestral music and many songs.

¹ From this period dates the so-called 'Viennese mechanism,' the principle of which was really the same as that of the Augsburg pianos.

² *Kurze Bemerkungen u. d. Spielen, Stimmen, u. Erhalten d. F.P., etc.*, Wien, 1801.

(2) FRITZ (*b.* Grünsfeld, Baden, June 17, 1855; *d.* Munich, Aug. 13, 1916), brother of the above, whose pupil he was till he went to the Leipzig Conservatorium in 1873. In 1880 he became second Kapellmeister at Mainz till 1886, when he was summoned by the Grand Duke of Meiningen to the post of conductor of his celebrated orchestra, and later on became his general music-director. In 1902 he visited England with the whole of the Meiningen orchestra, and made one of the greatest sensations that has been caused by any musical performances within recent years in this country, his renderings of Bach and Brahms being specially appreciated. All the four symphonies of Brahms were included in his programmes. He was also a frequent visitor to England in later years, when he conducted concerts of the LONDON SYMPHONY ORCHESTRA (*q.v.*). In 1902 he succeeded Willner as town Kapellmeister and director of the Conservatorium at Cologne. He was also well known as a composer, chiefly through his septet (op. 7) and a violoncello sonata.

H. V. H.

STEINWAY & SONS, a firm of pianoforte-makers in New York, the merit of whose instruments early gave them equal rank with those of famous European make.

The founder of the Steinway house, Henry Engelhard Steinway (originally Steinweg), a piano-maker, with three of his four sons emigrated to New York from the Duchy of Brunswick in 1849, and in that city in 1853 established the firm of Steinway & Sons (incorporated in 1876). In 1855 they exhibited a square piano in which the principle of a single casting was combined with a cross or overstring scale, the foundation of the so-called Steinway system.

From that year onward the Steinway piano was awarded honours and prizes at exhibitions and expositions in England, Europe and America. The first Steinway grand piano was built in 1856; the first upright in 1862. In 1865 Theodore, the eldest son of Henry Steinway, joined the firm in New York, and to him were due many of the inventions which gave the Steinway its signal merit and made it a model for the German makers of that day.

In 1866 Steinway & Sons opened a concert-hall in New York. This was sold in 1925 when the firm moved to West 57th Street. In 1875 a branch was opened in London, also with a concert-room attached (see STEINWAY HALL and GROTRIAN STEINWEG); and in 1880 a Hamburg branch was added. In 1925 the London house was moved to 1-2 George Street, Conduit Street, W.

W. S. S.

STEINWAY HALL. This small concert-hall attached to the original premises of Steinway & Sons in Lower Seymour Street, now renamed Wigmore Street, was formerly known as the Quebec Institute, where various literary

societies held their meetings. In 1878 it was used for music, Hans von Bülow giving the inaugural concert. For many years it was the principal small concert-hall in London and many well-known musicians appeared there. In later years it was greatly used for first appearances of young performers and singers. When the lease of the premises expired and the firm moved to Conduit Street the hall was closed, the last concert being given there in December 1924. The seating capacity was 400. It was reopened in 1925 as Grotrian Hall (see GROTRIAN STEINWEG).

STEINWEG, see GROTRIAN STEINWEG.

STENHAMMAR, VILHELM EUGEN (*b.* Stockholm, Feb. 7, 1871; *d.* Nov. 20, 1927), pianist, and a leader of music in Sweden since about 1900, has also earned a reputation, at home and abroad, as a composer. His father was Per Ulrik Stenhammar, who wrote several church choruses and solo pieces which became very popular. He studied the piano, first under Rich. Andersson (1888), and later in Berlin (1892-93) under Barth, and was taught composition by E. Sjögren and others. He qualified as an organist at the Conservatoire in 1890. His first noted work, 'The Princess and the Page,' for solo, chorus and orchestra, was produced in Stockholm by the Philharmonic Society in 1892. For the inauguration of the new Opera-House, Stenhammar wrote the musical drama 'Tirfing,' which was produced at the Royal Theatre in 1898. He had already written 'Gildet på Solhaug,' first performed in Stuttgart in 1899 and afterwards at the Royal Theatre, Stockholm, in 1902. He held a prominent position as conductor of the Royal Orchestra in Stockholm and later extended his musical leadership to Gothenburg, where he has gained great popularity.

Stenhammar is a noted song-composer and has also written chamber music, orchestral works and opera. In 1900 he became a member of the Academy of Music.

Among his works are:

'Ett folk' ('A People'); 'Ithaka' (both for barytone and orchestra); 'Målvinter'; the second piano-concerto in D minor; 'Two sentimental romances,' for violin; 'Folket i Nifelheim,' op. 30 and 'Intermezzo.'

There is a striking portrait of Stenhammar at the piano, by Robert Thøgerström (*b.* 1857), in the National Museum, Stockholm.

See articles in *Swedish Musical Journal*, 1895, 1897, 1902, 1906, 1909; German biogr. by T. Norlind in 'Die Musik,' Berlin, 1904.

G. A. S.

STENHOUSE, WILLIAM (*b.* Roxburghshire, Scotland, 1773; *d.* Nov. 10, 1827), a writer on Scottish music. He was an accountant in Edinburgh, and before 1817 conceived the idea of annotating Johnson's *Scots Musical Museum*, with historical references regarding both words and music. He contributed specimens of these notes to *Blackwood's Magazine* for July 1817. For a republication of the *Scots Musical Museum* Stenhouse's notes were printed in 1820, but

laid aside for a considerable period, being ultimately published in 1839 and again in 1853. Stenhouse's work has been a bone of contention among musical antiquaries since its publication.

There is undoubtedly a vast mass of interesting and trustworthy information in the notes, together with many careless and slipshod references which have caused the whole work to be condemned. (See SCOTTISH NATIONAL MUSIC, section LATER COLLECTIONS.)

Stenhouse edited the musical portion of James Hogg's *Jacobite Relics*, 1819-21. F. K.

ŠTĚPÁN, VÁCLAV (b. Pečky, 1889), Czech composer, pianist and musical critic. Ph.D. of the University of Prague. He studied the piano with J. Čermák and composition with Vít. Novák, professor of aesthetics in the Prague Conservatoire. He has appeared as a pianist in many European centres (England, 1919), and done much to make modern Czech music known to the world. His 'Musical Symbolism in Programme Music' (1914) first came out as a series of articles in the defunct *Hudební Revue*, to which he was a frequent contributor. His published works include the poem 'Po-hoda Života' (Life's Halcyon Days), for violoncello and piano (Hudební Matice, Prague).

R. N.

STEPHENS, (1) CATHERINE (b. London, Sept. 18, 1794; d. 9 Belgrave Square, London, Feb. 22, 1882), the daughter of Edward Stephens, a carver and gilder in Park Street. Having given early indications of aptitude for music, she was in 1807 placed under the instruction of Gesualdo Lanza, whose pupil she remained for five years. Early in 1812 she appeared in subordinate parts at the Pantheon as a member of an Italian Opera Company. Soon afterwards her father, dissatisfied with the apparently small progress she made under Lanza, placed her under the tuition of Thomas Welsh. On Sept. 23, 1813, she appeared anonymously at Covent Garden as Mandane in 'Artaxerxes' with decided success. She repeated the part on Sept. 28, as 'Miss Stevens,' and on Sept. 30 under her proper name. On Oct. 22 she sang Polly in 'The Beggar's Opera,' Rosetta in 'Love in a Village,' and afterwards Clara in 'The Duenna,' in each gaining ground in public favour. In Mar. 1814 she was engaged at the Concert of Ancient Music, and later in the year she sang at the festivals at Norwich and Birmingham. She sang in Edinburgh in 1814, and at Dublin in 1816, 1821 and 1825. She continued at Covent Garden from 1813-22, when she broke with the managers on a question of terms and transferred her services to Drury Lane. She occupied the principal position on the English operatic stage, at the first concerts, and the festivals, until 1835, when she retired into private life. Her voice was a pure soprano, rich, full, and powerful, and of extensive compass, and her execution neat,

although not very remarkable for brilliancy. She somewhat lacked dramatic instinct and power, and her enunciation was very bad, but she excelled in the expression of quiet devotional feeling and simple pathos. In such songs as Handel's 'Angels, ever bright and fair,' and 'If guiltless blood,' and in ballads like 'Auld Robin Gray,' and 'Savourneen Deelish,' she captivated every hearer. On Apr. 19, 1838, she was married to the widowed octogenarian Earl of Essex in his house No. 9 Belgrave Square,¹ and on Apr. 23, 1839, became his widow. She survived him for nearly forty-three years. A portrait by John Jackson is in the National Portrait Gallery. W. H. H., addns.

(2) CHARLES EDWARD (b. Edgware Road, London, Mar. 18, 1821; d. London, July 13, 1892), nephew of the preceding. Displaying early tokens of musical organisation, he was placed under Cipriani Potter for pianoforte, J. A. Hamilton for harmony, counterpoint and composition, and Henry Blagrove for the violin. In 1843 he was elected organist of St. Mark's, Myddelton Square, and subsequently held the same office at Holy Trinity, Paddington, 1846; St. John's, Hampstead, 1856; St. Mark's, St. John's Wood, 1862-63; St. Clement Danes, 1864-69, and St. Saviour's, Paddington, 1872-1875. In 1850 he was elected an associate, and in 1857 a member of the Philharmonic Society, of which he was repeatedly chosen a director. In 1865 he was elected a Fellow of the R.C.O., in 1870 an honorary member of the R.A.M., and in 1877 a licentiate, *honoris causa*, of Trinity College, London. His trio for pianoforte, violin and violoncello was produced at the Society of British Musicians, himself performing the pianoforte part; his works also include several concert overtures of merit, No. 4 of which, 'A Dream of Happiness,' was played at the Crystal Palace, Nov. 13, 1875. His partsong, 'Come, fill ye right merrily,' gained the prize given by Henry Leslie's Choir in 1858, and in Apr. 1879 he was awarded both the first and second prizes given by Trinity College, London, for the best string quartet. His symphony in G minor was performed at the Philharmonic Concert in Mar. 1891.

W. H. H., addns.

STEPHENS, JOHN, Mus.D. (d. Dec. 15, 1780), was educated as a chorister in Gloucester Cathedral, and in 1746 succeeded Edward Thomson as organist of Salisbury Cathedral. He graduated as Mus.D. at Cambridge in 1763, and conducted the Gloucester Festival in 1766.

¹ In the Parish Register of St. George's, Hanover Square, the marriage was originally entered as having been celebrated in 'the Parish Church.' These last three words were, however, subsequently *erased* (in two places) with a sharp instrument, and '9 Belgrave Square' written upon the erasures, but without any note, or authentication of the alteration being made in the Register. The original entry is proved by the words 'the Parish Church' remaining unaltered in the certified copy of the Register at Somerset House, until Mar. 1852, when the discrepancy was pointed out by the present writer, and measures taken for its correction. It is to be hoped that this is a solitary instance of so flagrant a violation of the directions of the Act of Parliament as to the mode in which erroneous entries in Registers are to be rectified.

A volume of 'Cathedral Music' by him, edited by Highmore Skeats, was published in 1805.

W. H. H.

STERKEL, JOHANN FRANZ XAVER (Abbé Sterkel) (*b.* Würzburg, Dec. 3, 1750; *d.* there, Oct. 21, 1817), was a distinguished amateur. He went through his college course at Würzburg University, took orders and became vicar and organist of Neumünster. In 1778 he was called to the court of the Elector of Mainz at Aschaffenburg as chaplain and pianist. Next year the Elector sent him on a journey through Italy; success attended him everywhere, and at Naples he brought out an opera, 'Farnace,' in 1780, with éclat. In 1781 he returned to Mainz and was promoted to a canonry. He wrote about this date some German songs which were great favourites, and he formed some excellent pupils—among composers Hofmann and Zulehner, among singers Grünbaum and Kirschbaum. In Sept. 1791 occurred the great musical event of Sterkel's life, though he probably did not know its significance—his meeting with Beethoven, then a youth of 20. Beethoven came to Aschaffenburg with the band of the Elector of Bonn, and was taken by Ries and Simrock to call on the great player, whose reputation was something like that of Liszt in after years. Sterkel was the first great executant that Beethoven had heard, and the extreme refinement and finish of his style evidently struck him much. He watched him with the closest attention, and not unnaturally declined to play in his turn, till Sterkel induced him to do so by speaking of his twenty-four variations on Righini's 'Venni Amore.' They had been published only a few months previously, and Sterkel declared that they were so hard that he did not believe even the composer could play them. Beethoven played what he could recollect, and improvised others fully equalling the originals in difficulty—but the curious thing was that he adopted Sterkel's delicate style all through. They do not appear to have met again. In 1793 Sterkel succeeded Righini as Kapellmeister to the Elector, and this threw him still more into serious composition; but the French war forced the Elector to leave Mainz, and his Kapellmeister returned to Würzburg. In 1805 he became Kapellmeister at Ratisbon, where all his old energy revived, and he taught and composed with the greatest vigour and success. The war of 1813 at length drove him back from Ratisbon to Würzburg.

The list of Sterkel's published compositions is immense. (See *Q.-L.*) It embraces:

10 symphonies; 2 overtures; a string quintet; a quartet for FF. and strings; 6 string trios; 6 do. duos; 6 FF. concertos; a very large number of sonatas for FF. both for two and four hands; variations, and minor pieces; 10 collections of songs for voice and FF.; Italian canzonets, duets, etc.

The number of editions which some of these went through shows how widely popular

Sterkel was in his day. A Mass and a Te Deum are in MS.

G.

STERLING, ANTOINETTE (*b.* Sterlingville, State of New York, Jan. 23, 1850?; *d.* Hampstead, Jan. 9, 1904), singer. She possessed, even in childhood, a voice of extraordinary range, which afterwards settled into a contralto of great richness and volume, with a compass from *eb* to *f*°. Her first serious study of singing began in 1867 in New York under Abella, better known as the husband of Mme. d'Angri. She came to England in 1868 and remained a few months, singing chiefly in the provinces, *en route* for Germany. There she was first a pupil of Mme. Marchesi at Cologne, then of Pauline Viardot at Baden-Baden, and lastly of Manuel Garcia in London. She returned to America in 1871, and soon took a high position as a concert singer. On May 13, 1873, she took leave of her native country in a concert at the Irving Hall, Boston, arrived in England, and made her first appearance on Nov. 5 at the Covent Garden Promenade Concert, under the conductorship of Sir Julius Benedict. At the Crystal Palace she first sang on Dec. 6, and shortly after appeared at the Saturday Popular, Feb. 21, 1874, Sacred Harmonic, Philharmonic, Albert Hall and London Ballad Concerts. At Gloucester, in the following September, she sang at the Festival. She was married on Easter Sunday 1875, at the Savoy Chapel, to John MacKinlay; and from that time, excepting a few months in the same year, when she sang in America in a series of forty concerts under Theodore Thomas, resided in London, and was one of the most popular singers there. She was not unknown in classical music. On her first arrival here she sang the Cradle Song from Bach's Christmas Oratorio with much effect, and her repertory contained songs of Mendelssohn and Schumann. But she was essentially a ballad singer. Her voice was one of great beauty and attractiveness; but it was her earnestness and intention, the force which she threw into the story—especially if it was weird or grim, such as 'The Three Fishers,' 'The Sands of Dee,' or 'The Three Ravens'—and the distinctness with which she declaimed the words, that formed the real secret of her success. Her son, Sterling MacKinlay, a baritone singer, published a memoir in 1906.

G.

STERN, JULIUS (*b.* Breslau, Aug. 8, 1820; *d.* Berlin, Feb. 27, 1883), removed at an early age to Berlin, where he learned music under Maurer, Ganz and Rungenhagen, at the Singakademie and the Royal Academy of Arts and soon began to compose. 'Please enquire about Mr. Julius Stern of Berlin,' says Mendelssohn,¹ 'who has sent me a book of songs with a kind note. From the first glance I think they show talent, but I have not seen or heard anything else about him.' In 1843 he received a

¹ Mendelssohn Family, II. 67.

travelling scholarship from the King, which led him first to Dresden, for the special study of singing, and then to Paris, where he soon became known as conductor of the German 'Gesangverein.' Here he performed the 'Antigone,' first in the studio of Henry Lehmann the painter,¹ and then at the Odéon Theatre, which drew from Mendelssohn a very characteristic letter (May 27, 1844). In 1846 he returned to Berlin, and in 1847 founded the Society which bore his name (Stern'scher Gesangverein). The first performance of 'Elijah' in Oct. 1847 gave a specimen of the powers of the new Association, and the level was fully maintained subsequently by performances of a very wide range of works both ancient and modern. In 1874 ill-health obliged Stern to retire from the conductorship, and he was succeeded by STOCKHAUSEN.

Meantime, in 1850, with Kullak and Marx, he had founded his Conservatorium, which, notwithstanding the defection of his two colleagues, flourished and educated many good musicians. From 1869-71 he conducted the Berlin 'Sinfonie-Kapelle,' and at Christmas 1873 undertook the Reichshall concerts, which, however, only lasted for two seasons. He then confined himself to his Conservatorium till his death. Stern published many vocal pieces and arrangements, but his most enduring work will probably be his edition of Exercises by Vaccaj (Bote & Bock), Crescentini (Peters), etc. He was made a 'Königliche Musikdirector' in 1849 and 'Königliche Professor' in 1860. G.

STERN, LEOPOLD LAWRENCE (*b.* Brighton, Apr. 5, 1862; *d.* London, Sept. 10, 1904), violoncellist. He belonged to a musical family, his father being a German violinist and his mother (*née* Annie Lawrence) an English pianist. From his early youth he showed strong musical leanings, and as a boy played the drum in the 'Brighton Symphony Society,' of which his father was the conductor. In 1877 he became a student at the South Kensington School of Chemistry, keeping up his music meanwhile, and eventually began the violoncello under Hugo Daubert. In 1880 he accepted a business appointment at Thornliebank, near Glasgow; but three years later he finally abandoned chemistry in favour of music and, returning to London, entered the R.A.M., studying the violoncello first under Pezze and then under Piatti, and subsequently visiting Leipzig in order to take lessons from Julius Klengel and Davidov. Returning to England in 1886, he played both in London and the provinces, accompanied Patti on one of her tours, and later on played in concerts with Sauret and Paderewski. In Paris he played with Godard and Massenet. In 1895 he visited Prague, where, being favourably impressed by his playing,

Dvořák selected him to bring out his violoncello concerto, and came himself to London to conduct in person the first public performance of the same, which took place at the Philharmonic Concert in Mar. 1896, when Stern achieved his greatest success. He subsequently played it at Prague, the Leipzig Gewandhaus, and the Berlin Philharmonic.

In 1897 and 1898 Stern toured through the United States and Canada, and henceforth appeared but rarely before an English audience.

Stern was twice married: firstly, in 1891, to Nettie Carpenter, a violinist of some distinction; and secondly, in 1898, to Suzanne Adams, the accomplished operatic singer.

In his early years Leo Stern played upon a violoncello by Guidantus, later on the 'General Kyde' Stradivari (an instrument of large proportions), and finally on the 'Baudiot' Stradivari. W. W. C.

STERNDALE BENNETT, see BENNETT.

STERNHOLD, see PSALTER.

STEURLEIN (STEUBLIN), JOHANN (*b.* Schmalkalden, July 5, 1546; *d.* Meiningen, May 5, 1613), was town clerk of Wasungen in 1575; government clerk at Weimar, 1588; imperial notary and poet-laureate, 1604. He was a very successful and gifted amateur composer of several books of sacred and secular songs, motets, psalms and occasional songs (*Q.-L.*).

STEVENS, RICHARD JOHN SAMUEL (*b.* London, Mar. 27, 1757; *d.* Sept. 23, 1837), was educated in St. Paul's Cathedral choir under William Savage. He distinguished himself as a glee composer, and obtained prizes from the Catch Club for his glees 'See, what horrid tempests rise,' 1782, and 'It was a lover and his lass,' 1786. He was appointed organist of the Temple Church, 1786, organist of the Charter House, 1796 (retaining his appointment at the Temple), and on Mar. 17, 1801, was elected to the GRESHAM MUSICAL PROFESSORSHIP (*q.v.*). He published three sets of glees, three harpsichord sonatas (op. 1) and songs. Nine glees and a catch by him are included in Warren's collections. Among his best glees may be mentioned 'Ye spotted snakes,' 'Blow, blow, thou winter wind,' 'Crabbed age and youth,' 'Sigh no more, ladies,' 'The cloud-capt towers,' 'From Oberon in fairy land,' all of which still retain their popularity with lovers of that class of composition. He edited 'Sacred Music for one, two, three and four voices, from the works of the most esteemed composers, Italian and English,' an excellent collection in 3 vols. fol. He left a valuable collection of music to the R.A.M. W. H. H.

STEVENSON, SIR JOHN ANDREW, Knight, Mus.D. (*b.* Dublin, Nov. 1761; *d.* Headfort House, Sept. 14, 1833), son of John Stevenson, a violinist in the State Band in Dublin, was admitted a chorister of Christ Church Cathed-

¹ Mendelssohn Family, ii. 295.

dral, Dublin, in 1771, and in 1775-80 was in the choir of St. Patrick's Cathedral. He became a vicar-choral of St. Patrick's in 1783 and of Christ Church in 1800. He composed new music to O'Keeffe's farces, 'The Son-in-Law' (1781), 'The Dead Alive' (1781) and 'The Agreeable Surprise' (1782), to enable them to be performed in Dublin, and also composed for the Irish stage some of the music of 'The Contract,' 1782; 'Love in a blaze,' 1799; 'The Patriot,' 1810; 'The Burning of Moscow' and 'Bedouins,' 1801. He obtained his honorary Mus.D. degree at Dublin in 1791, and his knighthood from the Lord-Lieutenant (Lord Hardwicke) in 1803. In 1814 he was appointed the first organist and musical director at the Castle Chapel. He composed some services and anthems (a collection of which he published, with his portrait prefixed, in 1825), 'Thanksgiving' (Dublin Musical Festival, Sept. 1831), an oratorio, and numerous glees, duets, canzonets, songs, etc. But he is best known by his symphonies and accompaniments to the collection of Irish Melodies, the words for which were written by Thomas Moore. He died at Headfort House, while on a visit to his daughter, the Marchioness of Headfort. A monument was erected to his memory in St. Patrick's Cathedral. A biographical sketch, by John Bumpus, appeared in 1893.

W. H. H.; addns. and corr. W. H. G. F.

STEVENSON, ROBERT, Mus.D. Oxon. (2nd half of 16th cent.), English composer of church music. He had supplicated for his Mus.B. degree in 1583, but did not obtain it until 1587, when he had been for thirty-three years a student of music. He proceeded Mus.D. in 1596 (C. F. Abdy Williams, *Degrees in Music*). He was organist of Chester Cathedral from 1570-99 (West's *Cath. Org.*). A whole Service by him (including V.; T.D.; B.; K.; C.; M. and N.D.) is in Durham Cathedral Library (Durh. C 8 and 13; Durh. O.B. A 3/23); an anthem, 'When y^e Lord turned,' is at Peterhouse, Cambridge (tenor cantoris part in B.M. Add. MSS. 30,478-9); and 4 parts of a 6-part medley beginning 'Miserere' (with a plain-song in the tenor) by 'Dr. Stevenson' are also in the British Museum (Add. MSS. 18,936-9).

J. M^K.

STEWART, NEIL, one of the early Edinburgh music-publishers. In 1759 he was at the sign of the 'Violin and German Flute' in the Exchange, but before 1761 he had removed to a shop, 'opposite the Head of Blackfriar's Wynd,' which had probably been Bremner's place of business. He again removed to the Exchange, and then to Miln's Square (now demolished), facing the Tron Church. Afterwards the business was in Parliament Square, and finally in South Bridge Street. The stock-in-trade and plates were sold off by auction in 1805. Originally founded by the elder Neil

Stewart, the business afterwards developed into a partnership as 'Neil Stewart & Company,' and finally belonged to Neil and Malcolm Stewart, the two sons.

The Stewart publications comprise a great bulk of important works of Scottish music, and include republications of M'Gibbon; collections of reels and country dances; marches and minuets; M'Glashan's works; Scots Songs; and great quantities of interesting music sheets.

F. K.

STEWART, SIR ROBERT PRESCOTT, Knight, Mus.D. (b. Dublin, Dec. 16, 1825; d. there, Mar. 24, 1894), son of Charles Frederick Stewart, librarian of the King's Inns, Dublin, was educated as a chorister of Christ Church Cathedral, Dublin, of which he was appointed organist in 1844, in which year he was also appointed organist of Trinity College, Dublin. In 1846 he became conductor of the University of Dublin Choral Society, the members of which defrayed the expenses of the performance of his music for degrees of Mus.B. and Mus.D. which took place in 1851, besides presenting him with his graduate's robes and a jewelled baton. In 1852 he became a vicar-choral of St. Patrick's Cathedral, and in 1861 was appointed professor of music in the University of Dublin. For the great Peace Festival held in America at Boston, in 1872, he composed a fantasia on Irish airs for orchestra, organ and chorus, but declined the invitation to represent Ireland there. On this occasion he received knighthood from the Lord-Lieutenant (Earl Spencer) and became professor of theory in the Royal Irish Academy of Music. In 1873 he was appointed conductor of the Dublin Philharmonic.

Amongst Stewart's many compositions, his glees deserve particular mention. In this branch of his art he won numerous prizes and well-merited renown. His more important works include an ode for the opening of the Cork Exhibition of 1852; 'Ode on Shakespeare,' produced at the Birmingham Festival, 1870; and two cantatas, 'A Winter Night's Wake' and 'The Eve of S. John,' given by Stanford at Cambridge in 1872. He edited the Irish 'Church Hymnal' (1876).

Sir Robert Stewart enjoyed a high reputation as an organist and extemporiser; his playing at the Great Exhibition of 1851 and at that of Manchester in 1857 excited general admiration. His musical memory was remarkable. As occupant of the Dublin Chair of Music, his excellent lectures and writings on music bore evidence to his wide culture and literary skill, as well as to his high musical attainments. He was the first to require candidates for the musical degrees to pass a literary test, and the good example was afterwards followed at Cambridge. A portrait by Sir T. A. Jones is in the Royal Irish Academy of Music, and his statue is on

Leinster Lawn, Dublin. A biography by Olinthus John Vignoles appeared in 1898, and Dr. Culwick's *The Works of Sir R. P. Stewart*, with a catalogue of his compositions (Dublin, 1902), may be consulted. W. H. H., addns.

STIASTNÝ, (1) BERNARD WENZEL (*b.* Prague, 1770; *d.* there, 1835), violoncellist, was a member of the Prague orchestra. He studied with Seegr and was probably professor at the Conservatorium, to which he dedicated his work on the violoncello. It is remarkable for what may be almost called a treatise on the accompaniment of recitative as it was then practised.

(2) JOHANN (*b.* Prague, 1764; *d.* circa 1820), brother of the above, was in the orchestra at Prague in 1800–20. He seems to have studied harmony and the violoncello at Prague, under his brother, but he must have soon left that city, as he is described on the title of his op. 3 as 'Violoncelle de S. A. R. le Grand Duc de Frankfort.' According to Fétis he was musical director at Nuremberg in 1820, and from thence went to Mannheim. He is known to have been in London, and he dedicated two of his finest compositions to Lindley and Crosdill, as well as his three duets, op. 8, to Sir W. Curtis. His last and perhaps finest work was published and probably written in London. He was also in Paris, where he arranged his op. 11 for violoncello and piano, and he dedicated his op. 3 to the pupils of the Conservatoire. There exists a beautiful French edition of his six grand duets, op. 1, and also of his two sonatas, op. 2, the latter in score. Though the list of his works only amounts to thirteen in number, the originality and purity of them all entitle him to rank among the very first writers for the instrument. A list of his works follows:

- Op. 1. Six grand duets for two v'cls., dedicated to his brother.
2. Two sonatas for v'cl. solo with accompaniment for a second v'cl.
3. Divertissement for v'cl. solo with accompaniments for tenor and second v'cl.
4. Twelve 'Petites pièces pour violoncelle et basse à l'usage de com-ménçants.'
5. Six pièces faciles for v'cl. and bass.
6. Three grand duets for two v'cls.
7. Concertino for v'cl. with accompaniments for flute, two tenors, v'cl. and contrabass, dedicated to Lindley.
8. Three duets for two v'cls.
9. Six pièces faciles for v'cl. and bass.
10. Andante with variations for v'cl. solo with accompaniments for flute, two violins, tenor and v'cl., dedicated to Crosdill.
11. Six solos for v'cl. and bass.
12. Theme with variations and rondo with quartet accompaniment.
13. Grand trio for v'cl. solo with accompaniment for tenor and second v'cl., published in London by Welsh & Hawes, but unknown on the Continent.

G. H.

STICCADO-PASTROLE, an early name for a kind of wooden dulcimer formed of a graduated series of rods which being struck give forth musical sounds. (See XYLOPHONE.) A trade card, in date about 1770, advertises that 'G. Smart, Sticcado-Pastrole maker, from Mr. Bremner's music shop . . . continues to make the above instruments with improvements.' The above G. Smart was afterwards a music-publisher, and was the father of Sir George SMART (*q.v.*).

F. K.

STICH, JOHANN WENZEL, known as PUNTO (*b.* Bohemia, c. 1755; *d.* Feb. 16, 1803), eminent horn-player; was taught music and the French horn by Matejka and Hampel of Dresden, at the expense of Count Thun. On his return to the Count's household he considered himself ill-treated, and ran away with some of his comrades. To avoid recognition he Italianised his name to Punto, and travelled in Germany and France, settling for a time in Würzburg, Treves, Coblenz, Paris, etc., and attracting considerable attention. In Paris he made the acquaintance of Mozart, who composed for him a Sinfonie Concertante for flute, oboe, horn and bassoon, never played and now unfortunately lost. 'Punto plays magnificently' (*bläst magnifiquement*), writes Mozart to his father. In 1788 he was engaged by Mara (with Graff, Fischer and Florio) for her concerts at the Pantheon, London. In Vienna, Beethoven composed his sonata for PF. and horn (op. 17) for him, and they played it together without rehearsal, at Punto's concert, Apr. 18, 1800. It was received enthusiastically, and at once encored. After this Punto made another tour with Dussek, returned to Prague and gave a concert at the theatre there in 1801. He died after a long illness. His epitaph runs:

'Omne tulit punctum Punto, cui Musa Bohema
Ut plausit vivo, sic morienti gemit.'

His compositions were published in Paris by Sieber, Nadermann, Cochet, Imbault, Le Duc and Pleyel.

C. F. P.

STICKER, a light wooden rod used in organ action for conveying motion by a pushing movement. (See TRACKER.)

T. E.

STIEHL, HEINRICH (*b.* Lübeck, Aug. 5, 1829; *d.* Reval, May 1, 1886), second son of J. D. Stiehl (1800–73), an esteemed organist there. He studied at Lübeck and Weimar, and at Leipzig under Moscheles, Gade and Hauptmann. In 1853 he settled in St. Petersburg as organist to the St. Peter's Church, and director of the Singakademie. In 1867 he moved to Vienna, and after staying there two years went on to Italy. In 1872 and 1873 he was in London, and from Oct. 1874–77 resided in Belfast as conductor of the Philharmonic Society and founder of the Cecilia Society there. He then returned to England, settling as a teacher at Hastings, and in 1880 was called to Reval in Russia, where he held a leading position as professor of music, organist and conductor of the Musical Society of the town. He gave an excellent performance of Bach's 'Matthew-Passion' (the first in Russia) on Mar. 17, 1883, and repeated it at St. Petersburg, Apr. 6.

Stiehl's compositions are numerous. They include two operas, 'Der Schatzgräber' and 'Jery und Bätely.' A little orchestral piece called 'The Vision' was produced at the

Crystal Palace, Apr. 12, 1873, and was much applauded for its delicate fanciful character. A 'Hexentanz,' 'Ungarisch,' Waltzes, and a gavotte are also well known in Germany. He published three PF. trios, a sonata for PF. and v'cl., sonata quasi fantasia for PF. solo, and many other works, the latest being a string quartet, op. 172. G.

STIMME (Ger.), is used both for the human voice and for the individual parts in polyphonic composition or concerted music, whether vocal or instrumental.

STIMMFÜHRUNG (Ger.), see PART-WEITING.

STIMPSON, JAMES (b. Lincoln, Feb. 29, 1820; d. Birmingham, Oct. 4, 1886), son of a lay-vicar of Lincoln Cathedral, who removed to Durham in 1822, where James became a chorister in 1827. In Feb. 1834 he was article to Ingham, organist of Carlisle Cathedral; in June 1836 was appointed organist of St. Andrew's, Newcastle; and in June 1841, on Ingham's death, was made organist of Carlisle.

In Feb. 1842 James Stimpson was unanimously chosen organist at the Town Hall and St. Paul's, Birmingham, out of many competitors, and in the following year justified the choice by founding the Festival Choral Society and its Benevolent Fund, in connexion with the Triennial Festivals. (See BIRMINGHAM.) He continued organist and chorus-master to the Society until 1855. In 1844 he was instrumental in starting the weekly Monday Evening Concerts, of which, in 1859, he took the entire responsibility, to relinquish them only after heavy losses in 1867.

In 1845 Stimpson had the satisfaction of having the pedals of the Town Hall organ increased from 2 to 2½ octaves, so that he was able to perform the works of J. S. Bach unmutilated. From his weekly recitals in the Town Hall, given throughout the year to audiences varying from 600 to 1000, many a young amateur has derived his first taste for classical music. He was permanent organist of the Birmingham festivals, and Mendelssohn's last visit there was to conduct 'Elijah' for Stimpson's benefit, Apr. 25, 1847. He introduced Sims Reeves and Charles Hallé to Birmingham, and laboured from 1849-68, in many ways, in the service of good music, gaining thereby the gratitude and respect of his fellow-townsmen. He was for many years professor of music at the Blind Institution.

D'Almaine published in 1850 'The Organists' Standard Library,' edited by Stimpson, consisting principally of pieces hitherto unpublished in this country. His other publications consist mostly of arrangements and a manual of theory published by Rudall, Carte & Co. G.

STIRLING, ELIZABETH (b. Greenwich, Feb. 26, 1819; d. London, Mar. 25, 1895), an eminent English organist and composer,

learned the organ and piano from W. B. Wilson and Edward Holmes, and harmony from J. A. Hamilton and G. A. Macfarren. She attained a remarkable degree of execution on the organ pedals, as may be inferred from her first public performance, given at St. Katherine's Church, Regent's Park, when, out of fourteen numbers, the programme contained five pedal fugues and preludes, three pedal trios, and other pieces, by J. S. Bach. In Nov. 1839 she was elected organist of All Saints', Poplar, which she retained till Sept. 1858, when she gained the same post at St. Andrew's Undershaft, by competition. This she resigned in 1880. In 1856 she submitted an exercise (Ps. cxxx. for five voices and orchestra) for the degree of Mus.B. Oxon.; but though accepted it was not performed, since at that time women were not eligible for degrees. She published some original pedal fugues and slow movements, and other pieces for her instrument, as well as arrangements from the works of Handel, Bach and Mozart. Also songs and duets, and many part-songs for four voices, of which a well-established favourite is 'All among the barley.' In 1863 she married F. A. Bridge. G.

STIVORI, FRANCESCO, a 16th-17th century organist and church composer, pupil of Claudio Merulo. From 1579-1601 or 1602 he was town organist at Montagnana, afterwards in the service of the Archduke Ferdinand of Austria, until 1605. He composed 6 books of sacred songs ('Sacrae cantiones'), 5-8 v. (1579-1601); 6 books of madrigals (1583-1605), also masses, Magnificat, etc., and 3 books of ricercari, etc. for instruments (. . . , 1594, 1599) (Q.-L.; Riemann).

STOBÆUS, JOHANN (b. Graudenz, West Prussia, July 6, 1580; d. Königsberg, Sept. 11, 1646). In 1595 he was sent, for his further education, to Königsberg, where also from 1600 he attended the University. In 1599 he became the pupil in music of Johann Eccard, then ducal Kapellmeister at Königsberg. In 1601 Stobæus was bass singer in the ducal chapel, and in 1602 was appointed cantor at the Domkirche and the school in connexion therewith. In 1626 he received the appointment of Kapellmeister to the Elector of Brandenburg at Königsberg, which he retained till his death.

Stobæus followed Eccard in the contrapuntal setting of the Choral-tunes for voices alone, in a style midway between that of the motet proper, and that of mere note-for-note harmony. In 1634 he published:

* Geistliche Lieder auf gewöhnliche Preussische Kirchen-Melodeyen durchaus gerichtet und mit fünf Stimmen componirt.*

This work contains 102 settings a 5 of the Choral-tunes, half of them by Eccard, the remainder by Stobæus. In 1642 and 1644 appeared two parts of 'Preussische Fest-Lieder mit 5, 6, 8 Stimmen,' 27 by Eccard, 21 by Stobæus. In this work the tunes, as well as

the settings, are by the composers. It has been reproduced in modern score by Teschner. An earlier publication of Stobaeus is his 'Cantiones sacrae 5, 6, 7, 8 et 10 vocibus item aliquot Magnificat 5 et 6 vocibus adornatae,' Frankfurt, 1624. The Königsberg Library also contains a large number of occasional compositions by Stobaeus, sacred and secular.

J. R. M.

STOCK, FREDERICK AUGUST (b. Jülich, Germany, Nov. 11, 1872), German-American conductor and composer: Mus.D., Northwestern University, 1915. The son of a bandmaster in the German army, Stock began his musical studies with his father, and at 14 entered the Cologne Conservatorium. Graduating as a violinist, he then studied theory and composition under Humperdinck, Gustav Jensen and Franz Wüllner.

After five years as violinist in the Cologne Orchestra, in 1895 Stock went to the United States to become a violinist in the Chicago Symphony Orchestra (see CHICAGO). Made assistant to Theodore THOMAS (*q.v.*), then conductor, in 1899, from 1903 he conducted the orchestra's out-of-town concerts, and in January 1905, upon Thomas's death, he succeeded to the conductorship. In that post, which he still holds (1926), he has proved himself an able conductor, unusually catholic in his tastes.

As composer Stock is less widely known, although certain of his works have been played repeatedly at Chicago, and others were brought forward by KNEISEL (*q.v.*) The more important include:

Symphony, C minor.
Symphony, E flat.
'Variations', orchestra.
'Life', symphonic poem.
3 Overtures.
Symphonic Sketches.
Concerto, violin.
'Psalmody Rhapsody', solo, chorus and orchestra.
Chamber music, songs, violin and pianoforte pieces.

W. S. S.

STOCK EXCHANGE ORCHESTRAL AND CHORAL SOCIETY, THE, was founded in Nov. 1883, and gave its first concert on Mar. 5, 1885. On Dec. 18, 1885, the first subscription concert was given in the Prince's Hall; and continuously from that date the Society has given a series of concerts in each season at St. James's and Queen's Hall. The Male Voice Choir was established in Oct. 1886, and gave its first concert in Feb. 1887. The choir made its first appearance with the orchestra in May 1888. In Oct. 1899 the orchestra and choir amalgamated under the present title. One of the objects of the Society is the production of new works by native composers. George Kitchen, an amateur, was honorary conductor of both orchestra and choir from their foundation until his retirement in 1897. Arthur W. Payne conducted the orchestra from Oct. 1897, and Munro Davison the choir from Oct. 1898. In 1925 the Society was conducted

by Cecil Engleheart with Francis H. Harper as deputy conductor. The hon. secretary is C. F. Hipwell, Stock Exchange, E.C.2.

S. J. S., addns.

STOCKFLÖTE, see CZAKAN.

STOCKHAUSEN, (1) *née* MARGARETE SCHMUCK (b. Gebweiler, 1803; d. Oct. 6, 1877), was trained in Paris as a concert-singer by Cartruffo. She became the wife of the harpist and composer Franz Stockhausen (1792-1868), and the mother of the singer Julius Stockhausen (2). Husband and wife travelled, giving not very remunerative concerts in Switzerland (1825). Paris was visited later, but Mme. Stockhausen's greatest successes attended her in England, where she was induced to return almost every year from 1828-40, singing at some of the concerts of the Philharmonic and Vocal Societies, and also taking part in the principal private and benefit concerts. She had little or no dramatic feeling, but as she gained in power she grew in public favour, and came to be recognised as a true musician and an accomplished singer. She was frequently engaged at provincial festivals, and her delivery of the music of Mary in Spohr's 'Calvary' evoked special praise among her oratorio parts.

A few years after her farewell appearance in London, a home was made in Colmar, whither the Stockhausens retired to devote themselves to the education of their six children. Up to 1849 Mme. Stockhausen was heard with her son at local concerts; she left Alsace only occasionally to appear in public, and in her last visit to Paris (1849) her singing showed a great falling off.

L. M. M.

(2) JULIUS (b. Paris, July 22, 1826; d. Sept. 22, 1906), son of the foregoing, one of the most remarkable singers of his time. His gifts showed themselves early, and his mother was accustomed to say that he could sing before he could speak. He and his younger brother Edward (who died early) accompanied their parents on a concert tour to England, and learnt there to sing Bishop's duet 'Where are you going, sweet sister Fay?' In 1833 Julius was placed at a school at Gebweiler in Alsace, where he remained till 1840, with a view to taking orders. But such intentions were dispelled by the violent turn for music which asserted itself after a concert at Basle in 1842, in which Mme. Stockhausen took part. He took a prominent part in the concerts at Gebweiler as singer, accompanist, violin-player and even drummer. In 1844 he moved to the seminary of Strassburg, and there his performances on the violoncello and organ sealed his fate as a priest. In 1845 and 1846 he visited Paris with his father, took lessons in the piano from Charles Hallé and Stamaty, and in singing from Manuel Garcia, and entered thoroughly into the abundant musical life of the French capital, to the great advantage of his musical

education. His devotion to the profession of music was, however, not absolutely decided till 1848, when, at the invitation of Ernst Reiter, the conductor, he suddenly took the part of Elijah in a performance of that oratorio at Basle. His success decided his future course, and he at once threw himself energetically into the art, and for the next few years travelled in all directions, singing at innumerable concerts Schubert's 'Schöne Müllerin' and other songs. In 1849 he came to England, renewed his lessons with Garcia and sang at various concerts. In 1851 he returned, and sang three times at the Philharmonic, Apr. 7, in the Choral Symphony, Apr. 28, in two trios, and June 9 in a scena from Boieldieu's 'Chaperon rouge.' Taste in England was not then sufficiently advanced to call for the Lieder just mentioned. To these, at the instance of Schröder-Devrient, he shortly added Schumann's 'Dichterliebe' and others. His first appearance on the stage seems to have been at Mannheim in 1852-53, and he joined the Opéra-Comique at Paris in 1857-59, taking such parts as the Seneschal in 'Jean de Paris.' At this time he became intimate with Ary Scheffer; and with Mme. Viardot, Berlioz, Duprez, Saint-Saëns and others, formed one of the circle by whom much German music was performed in the studio of the great painter.

The years 1859-62 were occupied in more concert tours, and it was during this time at Leipzig and Cologne that he first attempted Schumann's 'Faust' music. In 1862 he came to an anchor at Hamburg as director of the Philharmonic Concerts and of the Singakademie, a position which he retained till 1869, when he was made Kammersänger to the King of Württemberg at Stuttgart with a salary of 2000 gulden, residing at Canstatt. During all this time he made many concert tours, especially with Mme. Schumann, Joachim and Brahms. In the latter part of 1870 he brought over his pupil Sophie Löwe to England, sang at the Popular Concerts, and remained till late in 1871. He once more sang at the Philharmonic, and appeared at the Crystal Palace, and the Monday Populars, where he introduced several fine unknown Lieder of Schubert. He and Frl. Löwe reappeared here the next winter, and remained till the end of the summer season of 1872.

In 1874 he moved from Stuttgart to Berlin, and took the direction of the Sternscher Gesangverein, founded by STERN (*g.v.*), which under his genial and able direction rose to the highest point of excellence. In the four years that he conducted it there were no less than twenty-eight performances of great works, including Beethoven's Mass in D, Mozart's Requiem, Bach's Matthew-Passion, Schumann's 'Faust' music (complete), and 'Paradise and the Peri,' Brahms's Requiem, etc. In 1878 he again

changed his residence, this time to Frankfort, to take the department of singing in the Conservatorium founded by Dr. Hoch, and presided over by Raff. This post, however, he soon gave up, and retired to his house at Frankfort, teaching the many private pupils who resorted to him there. After the death of Raff in 1882 he returned to the Conservatorium. In 1886-1887 he published his *Method of Singing* (translated by Mme. Sophie Löwe, new edition, 1907).

Stockhausen's singing in his best days must have been wonderful. Even to those who, like the writer, only heard him after he had passed his zenith, it is a thing never to be forgotten. Perhaps the maturity of the taste and expression made up for a little falling off in the voice. His delivery of opera and oratorio music—his favourite pieces from 'Euryanthe,' 'Jean de Paris,' 'Le Chaperon rouge,' and 'Le Philtre'; or the part of Elijah, or certain special airs of Bach—was superb in taste, feeling and execution; but it was the Lieder of Schubert and Schumann that most peculiarly suited him, and these he delivered in a truly remarkable way. The rich beauty of the voice, the nobility of the style, the perfect phrasing, the intimate sympathy, and, not least, the intelligible way in which the words were given—in itself one of his greatest claims to distinction—all combined to make his singing of songs a wonderful event. Those who have heard him sing Schubert's 'Nachtstück,' 'The Wanderer,' 'Memnon,' or the Harper's songs; or Schumann's 'Frühlingsnacht,' or 'Fluthenreicher Ebro,' or the 'Löwenbraut,' will corroborate all that has just been said. But perhaps his highest achievement was the part of Dr. Marianus in the third part of Schumann's 'Faust,' in which his delivery of the scene beginning 'Hier ist die Aussicht frei,' with just as much of acting as the concert-room will admit—and no more—was one of the most touching and remarkable things ever witnessed. G.

STOCKHORN, a rude musical instrument mentioned by early writers as being in use among the Scottish peasantry. It appears to have been identical with or similar to the PRIGORN (*g.v.*). The instrument is figured in a vignette in Ritson's 'Scotish Songs,' 1794, also on the frontispiece to the editions of Ramsay's 'Gentle Shepherd,' illustrated by David Allan, 1788 and 1808. It was then almost obsolete, for Robert Burns, the poet, had much difficulty in obtaining one. It appears to have been made in divers forms, with either a wooden or a bone stock, the horn being that of a cow. Burns, in a letter to George Thomson, Nov. 19, 1794, thus describes it:

'Tell my friend Allan . . . that I much suspect he has in his plates mistaken the figure of the stock and horn. I have at last gotten one; but it is a very rude instrument. It is composed of three parts, the stock, which is the hinder thigh bone of a sheep . . . the horn which is a common Highland cow's horn cut off at the smaller end until the aperture be

large enough to admit the stock to be pushed up through the horn, until it be held by the thicker end of the thigh bone; and lastly, an oaten reed exactly cut and notched like that which you see every shepherd-boy have, when the corn stems are green and full grown. The reed is not made fast in the bone, but is held by the lips, and plays loose on the smaller end of the stock; while the stock with the horn hanging on its larger end, is held by the hand in playing. The stock has six or seven ventages on the upper side, and one back ventage, like the common flute. This of mine was made by a man from the braes of Athole, and is exactly what the shepherds are wont to use in that country. However, either it is not quite properly bored in the holes, or else we have not the art of blowing it rightly, for we can make little of it.'

An example of the Stockhorn is preserved in the Library of the R.C.M. and was once the property of Charles Keene. It consists of a cylindrical tube pierced through the stock or body of the instrument, having seven holes for the fingers in front and one at the back. The lower end terminates in a short bell of natural horn. The reed is covered by a pierced wooden cap like that of the practice chanter of the bagpipe, within which the reed vibrates under the breath of the performer. Unfortunately, a double-reed has been substituted for the single-beating reed which is characteristic of the instrument (*PLATE LIV.* No. 5). Another and probably unique example is in the Museum of Scottish Antiquities, Edinburgh; it has fourteen finger-holes, and two thumb-holes at the back, arranged in pairs, so that each finger closes or opens two holes at once. The total length of this instrument is about twenty-two inches, with a bell-mouth expanding to 2½ inches, and its scale is from *f*' to *g*'. The object of the double bore appears to have been the production of a strong beating tone from mistuned consonances, as is commonly found in the Egyptian Zummarah or double reed-pipe of the present day, which also has single-beating reeds. (See *PBBGORN*).

F. K. and F. W. G.

STOCKMARR, JOHANNA (b. Copenhagen, Apr. 21, 1869), pianist, studied in Copenhagen and later in Paris, and established her reputation as an artist of first-rate ability. In England she was associated with Lady Hallé at the Monday Popular Concerts, and from 1900 onwards she was frequently to be heard with the orchestra under Richter and Wood. c.

STODART. A family of eminent pianoforte-makers, whose business was founded in Wardour Street, Soho, about the year 1776, by (1) **ROBERT STODART.** It is said he had been in the Royal Horse Guards, to be a private in which corps involved at that time the payment of £100, an amount that must now be estimated by the then higher value of money. Having little duty and much leisure, Stodart became a pupil of John Broadwood to learn pianoforte-making, and in the books of Broadwood's firm appears, during the year 1775, to have taken his share in tuning for customers. It was while he was under Broadwood that he had the privilege, enjoyed by them as friends, of assist-

ing Americus Backers in the invention of the new movement for the grand pianoforte since generally known as the 'English' action. After Backers's death, Stodart, now upon his own account, entered upon grand pianoforte making with energy and ability, and soon made a considerable reputation. The pianoforte was at that time hardly emancipated from the harpsichord, and there were frequent endeavours to combine both principles in one instrument. An endeavour of this nature was patented by Stodart in 1777, which is otherwise remarkable by the first mention of the word 'grand' in connexion with a pianoforte. In it he worked his crow-quill registers, and also a swell, by means of pedals.

We find the business in 1795 removed to Golden Square, (2) **WILLIAM STODART** in that year taking out, from that address, a patent for an 'Upright Grand.' This was the horizontal grand turned up vertically in the same way the upright harpsichord had been. The giraffe-like upright grand was then coming into fashion, and the speciality of Stodart's patent was to introduce one in the form of a bookcase. Of the highest importance was the patent of James Thom and William Allen, who were in Stodart's employ, a compensating framing of metal tubes and plates at once secured by Stodart's firm. This meritorious invention, which was really Allen's, was brought out in 1820, and paved the way to the general introduction of iron in pianofortes as a resisting power. (See *PIANOFORTE* and the writer's *Pianoforte Primer*, p. 16.) When (3) **MALCOLM STODART**, who had shown great promise, died, the interest of the survivors ceased, and the business, which had been declining, came, in 1861, to an end.

A. J. H.

STOELZEL (Stöltzel) GOTTFRIED HEINRICH (b. Grünstädel, Saxony, Jan. 13, 1690; d. Gotha, Nov. 27, 1749), a pupil of Umlauf at Schneeberg and of Musikdirektor Hofmann at Leipzig, where he also studied at the University and joined Telemann's Musical Society. From 1710-12 he was teacher of music at Breslau, where he produced his first opera 'Narcissus' in 1711, which was followed by several operas for Naumburg. In 1713 he went to Italy and on his return he remained at Prague for three years where he produced several operas and oratorios; thence he went to Bayreuth. In 1718 he was in the service of the Count of Gera and from 1719 was Kapellmeister to the Duke of Gotha. Stoelzel was a prolific composer (22 operas, 14 oratorios, masses, trio-sonatas, concertos, etc., mostly MS.) who possessed melodic invention, and imbued his orchestral parts with individuality; but he lacked true genius and never rose beyond fluency of melody. He wrote also some theoretical essays. A violin concerto of his was republished by Prof. A. Schering in *D.D.T.*

E. v. d. s.

STOJOWSKI, SIGISMOND DENIS ANTOINE (b. Strzelce, Poland, Apr. 8,¹ 1870), Polish pianist and composer. In his early youth he studied with Zenlenski at Cracow; later at the Paris Conservatoire under Diémer, Dubois, Delibes and Massenet, and finally with Gorski and Paderewski. After numerous European tours, in 1905-11 he was head of the pianoforte department of the Institute of Musical Art (New York). He has taught extensively in that city. As soloist he has played with most of the leading orchestras of America.

The list of Stojowski's compositions is a long one and includes:

Symphony, D minor, op. 21.
Concerto, piano, F-sharp minor, op. 3.
Romanza, violin and orchestra, op. 20.
Concerto, violin, G minor, op. 22.
Symphonic Rhapsody, pianoforte and orchestra, op. 23.
Concerto, violoncello, D, op. 31.
Concerto, pianoforte, op. 32.
A Prayer for Poland, chorus, organ and orchestra, op. 40.
A cantata; numerous sonatas and other chamber music; many pianoforte pieces and songs.

W. S. S.

STOKES, CHARLES (b. 1784; d. London, Apr. 14, 1839), an excellent musician who received his first instructions as a chorister in St. Paul's Cathedral. He was afterwards a pupil of Webbe, the glee composer, who was his godfather—and of other masters; but he was most indebted for his musical knowledge to Samuel Wesley, with whom he was long and intimately acquainted. He officiated for several years as assistant-organist to Calcott, at St. Paul's, Covent Garden and Bartleman at Croydon; but he latterly preferred the quiet pursuit of his own studies, in domestic retirement, to the exertion and fatigue of public engagements. Yet his musical acquirements were of the highest order. Vincent Novello speaks of him as a most able teacher, an excellent organist, a delightful pianoforte-player, a refined and tasteful composer, and one of the most profound musical theorists then living. His name was little known, and his published music was almost confined to the pieces printed in Novello's 'Select Organ Pieces' (from which this notice is derived). That collection contains ten pieces by Stokes, full of quiet feeling, and real, though somewhat antiquated, musicianship. Novello also published an Anthem of his, 'I will lay me down in peace.' a.

STOKOWSKI, LEOPOLD (b. London, Apr. 18, 1882), orchestral conductor. Of Polish parentage, his early education was obtained in England, France and Germany, and included instruction in violin, piano and organ. At the R.C.M. his teachers included Stevenson Hoyte (organ), Walford Davies and Stanford. From 1900 he was organist of St. James's, Piccadilly. Going to America in 1905 he was for three years organist of St. Bartholomew's Church in New York; then, after a year's conducting in Europe, he became, in 1909, the conductor of the Cincinnati Symphony Orchestra.

Since 1912 Stokowski has been conductor of the Philadelphia Symphony Orchestra, where his rise to fame and popularity has been notable. He has brought that orchestra to a high place among the orchestras of the world, and he has been hospitable to the music of American composers and to the newer works of Europeans. In 1911 he married the pianist, Olga SAMAROFF (q.v.); they were divorced twelve years later.

W. S. S.

STOLTZ, ROSINE (b. Paris, Feb. 13, 1815; d. there, July 28,² 1903), celebrated French singer, whose chequered life has afforded materials for more than one romance. Her real name was Victoire Noël, but she entered Ramier's class in Chorion's school in 1826 as Rosine Niva. She became a chorus singer at one of the theatres after the Revolution of 1830, and in 1832 made a very modest début at Brussels. She first adopted her mother's maiden name of Stoll, which she converted into Stoltz. In 1833 she sang at Lille under the name of Heloise Stoltz. Her knowledge of music was deficient and she never became a perfect singer, but nevertheless made a considerable mark in lyric tragedy. The first time she displayed her powers was when acting with A. Nourrit as Rachel in 'La Juive' at Brussels in 1836. There she married the following year A. Lescuyer, manager at the Théâtre de la Monnaie.

She reappeared in the part of Rachel at the Opéra in Paris, Aug. 25, 1837. Though inferior to Mlle. Falcon, who had created the rôle, the public was interested by a talent so original and full of fire, though so unequal, and Mme. Stoltz became a favourite from the day she appeared in parts written expressly for her. Indeed throughout Léon Pillet's management (1841-1847) she reigned without a rival. She created the following mezzo-soprano parts: Lazarillo in Marliani's 'Xacarilla' (1839); Léonore in 'La Favorite' (1840); Agathe in 'Der Freischütz' (1841); Catarina in 'La Reine de Chypre' (1841); Odette in 'Charles VI' (1843); Zayda in Donizetti's 'Dom Sébastien' (1843); Beppo in Halévy's 'Lazzarone,' Desdemona in Rossini's 'Otello,' Marie Stuart in Niedermeyer's opera of that name (1844); Estrelle in Balfe's 'Étoile de Séville' (1845); David in Mermet's opera of that name and Marie in Rossini's pasticcio 'Robert Bruce' (1846). The last three were failures, and in 1849 she left Paris, but appeared for some time longer in the provinces and abroad. She appeared at the Opéra in Sept. 1854 and in 1855 as Fidès ('Prophète'). In 1857 she sang at Montpellier, and in 1860 at Lyons—the end of her dramatic career. Then no more was heard of her excepting the fact of her several marriages, by which she became successively a Baroness, Countess of Kestchendorf, and

¹ Date given in *Amer. Supp.*; Riemann and Baker give May 14.

² See *Le Ménestrel*, Aug. 2, 1903.

Princess of Bassano. Schoen and Laval published in her name six melodies for voice and PF. in 1870.

Among the works based on the life of Rosine Stoltz may be mentioned :

SCUDO, *Histoire d'une cantatrice de l'Opéra*; LAMER, *Mme. Rosine Stoltz* (Paris, 1847, 16mo); CANTINJOU, *Les Adieux de Mme. Stoltz* (Paris, 1847, 18mo); and Mlle. EUGÉNIE FÉRONON, *Rosine Stoltz* (Paris, 1847, 8vo); GUSSAYE BORD, *Rosine Stoltz de l'Académie Royale de Musique* (1815-1903) (Paris, 1905).

G. C.

STOLTZER, THOMAS (b. Schweidnitz, Silesia, early 16th cent.), became Kapellmeister at Ofen or Buda to King Louis, who reigned over both Hungary and Bohemia from 1517-26. Fétis gives the date of Stoltzer's death as Aug. 29, 1526, but although the fact has not been noticed by musical historians, it is somewhat significant that this is merely the date of the Battle of Mohacs, at which King Louis with the flower of the Hungarian nobility fell in fighting against the Turks. But there is no evidence that Stoltzer was with King Louis on this occasion, or that his life came to an end with the taking of Buda shortly afterwards by the Turks. It is very probable that he was still alive between 1536 and 1544, when the greater part of his works appeared in the Collections of the time. A letter of his, addressed to Duke Albert of Prussia, dated Feb. 23, 1526, is extant, which seems to refer to some offer made to him from the Duke to become his Kapellmeister at Königsberg. He sent to the Duke an elaborate composition of the 37th Psalm in Luther's German Prose version in seven divisions ('*motettisch gesetzt*') for three to seven voices. There are four other psalms of the same kind which, with the one above mentioned, Otto Kade considers to represent the high-water mark of Stoltzer's abilities as a composer. The MSS. of these are now in the State Library at Dresden, for which Kade negotiated their purchase in 1858, and one of them, Psalm xii., 'Hilf, Herr, die Heiligen sind abgenommen,' he has since published in score in the *Beilagen* to Ambros's *Geschichte*. Ambrose gives considerable praise to the Latin psalms and motets of Stoltzer, which appeared in the various collections 1538 to 1545 and 1569. This praise he largely qualifies in the case of the thirty-nine settings *a* 4-5 of Latin Church Hymns, which constitute Stoltzer's contribution to Rhau's 'Hymni sacri' of 1542. These latter he considers somewhat heavy, though showing solid workmanship. Other German works of Stoltzer are seven settings of *Geistliche Gesänge* and ten of *Weltliche Lieder* in the collections of Schöffer, 1536, Forster, 1539, and Ott, 1544. One of the secular songs, 'Entlaubet ist der Walde,' deserves mention, because the tune in Stoltzer's tenor was afterwards adopted as the Choral-tune for the hymn 'Ich dank dir, lieber Herre.' The tune itself is said to have been known about 1452, and it also appears in Hans Gerle's *Lautenbuch*

of 1532. Harmonised by Bach, it forms the conclusion of his cantata, 'Wer da glaubet und getauft wird.' It is given with Stoltzer's own harmony in Schöberlein's *Schatz*, Bd. iii. n. 443. One of the *Geistliche Gesänge* also deserves mention, 'König, ein Herr ob alle Reich,' because the first words of the three verses form the acrostic 'König Ludwig' (King Louis of Hungary), and the hymn itself first appears in company with the better-known 'Mag ich Unglück nicht widerstehn,' which also forms the acrostic 'Maria,' for Queen Maria, the wife of Louis, and daughter of the Emperor Charles V. A large number of Latin motets by Stoltzer exist in MS. in the Library at Zwickau. J. R. M.

STOLZ, TERESA (b. Elbe Kosteletz, 1836; d. Milan, 1902), dramatic soprano, lives in musical history from her connexion with two of Verdi's most famous works. She was the first Aida in Italy—at La Scala in 1872—and the soprano of the great quartet that, with Verdi conducting, sang in the Requiem Mass at the Albert Hall in 1875. She was the Aida, under Verdi, at Vienna in 1875 and at Paris in 1876. Her various engagements at La Scala extended from 1865-77. Like Madame Waldmann, who sang with her in 'Aida' and the Requiem Mass, Madame Stolz was a pupil of Lamperti. A woodcut portrait of Madame Stolz, together with those of Madame Waldmann, Masini and Medini, the bass, appeared in the *Graphic* in 1875. S. H. P.

STONARD (STONNARD, STONERD), WILLIAM, Mus.B. Oxon. (d. 1630), English composer of church music. In 1608, when he took his degree (not Mus.D. as Hawkins says) he was required to compose an 8-part choral hymn (C. F. Abdy Williams, *Degrees in Music*). In this year he became organist of Christ Church, Oxford, and held this post until his death. A 4-part catch by him, 'Ding dong bell,' is in four different MSS. (B.M. Add. MSS. 29,386, 31,463, 31,811, 31,809). The 5-part Evening Service in C included in the Tudway Collection (Harl. 7337-42) is noted as being 'composed by Mr. Stonard . . . in 1558.' Unless this date is a mistake, this is obviously the work of a Stonard of an earlier generation. The words of some of his anthems are given in Clifford's collection (1663).

SERVICES

Evening Service in C, *a* 5. (M.; N.D.) Harl. 7337-42.
Evening Service in D. (M.; N.D.) Ch. Ch. 1227. Organ score.

ANTHEMS

Be merciful unto me, O God. Tenb. O.B. 277.
Behold how good, *a* 5. B.M. Add. MSS. 17,797.
Harken, all ye people, *a* 5. B.M. Add. MSS. 17,797.
Hear, O my people. PH.
My God, my God (verse anthem). Durh. C11/159; Durh. O.B. A6/365. B.M. Add. MSS. 30,478-9. Tenor cantoris part only.
Sing unto God ('for a Bass'). PH.; R.C.M. 1048-51 (Barnard's MS. Collection).
When the sorrows of Hell. PH.

STONE (STONES), ROBERT (b. Alphenington, Devon,¹ 1516; d. July 2, 1613), English com-

¹ *q*. L.

poser of church music. He was early connected with Exeter Cathedral,¹ but entered the Chapel Royal about 1543, and remained there until his death. His name appears in the Establishment Book for 1552 in a list of 'The Master of the Children and forty Gentleman of the Chapel' (B.M. Stowe 571), and in 1603 among the gentlemen who received an allowance of mourning livery for the funeral of Queen Elizabeth.² He is important as the harmoniser of Cranmer's Litany, and composed a setting of the Lord's Prayer for the first Morning Service in Day's 'Certain Notes' (1560). J. M^s.

STONINGS (?) (STONINGES, STENINGS) (16th cent.), English composer. B.M. Add. MSS. 31,390 is a collection of In Nomines, fancies and anthems, madrigals and motets by 16th century (chiefly English) composers arranged for 5 viols, and contains an In Nomine, a Miserere and a 'Browninge, my dere,' by Stonings. A 4-part Latin Magnificat by him is bound up in a late 16th century MS. (B.M. Add. MSS. 17,802-5), with four other settings by W. Mundy, Tallis, Shepherd and Taverner.

J. M^s.

STOPPED PIPE, an organ pipe, the upper end of which is closed by a wooden plug, or cap of metal. The pitch of a stopped pipe is one octave lower (roughly speaking) than that of an open pipe of the same length; it is usual, therefore, in a specification, to state the pitch of a stopped pipe instead of its length; thus, 'Open Diapason 16 ft.,' 'Bourdon 16 ft.-tone,' etc. By the former it is understood that the longest pipe is 16 ft. long; by the latter that the longest pipe (though only 8 ft. in length) gives the same note as an open pipe of 16 ft.

J. S.

STOPPING is the term used for the action of the fingers of the left hand in playing instruments with strings stretched over a finger-board, in order to produce sounds higher in pitch than those produced by the 'open' strings. To obtain such notes the vibrating part of the string must be shortened by stopping the vibration at a certain point between nut and bridge, i.e. by using one of the fingers of the left hand as an artificial nut or stopping-point. The nearer this point is to the bridge, the shorter the vibrating part of the strings, and the higher in pitch therefore the sound produced. A correct intonation or playing in perfect tune obviously depends entirely on exactness of stopping. See FINGERING (VIOLIN), DOUBLE STOPPING and HARMONICS. P. D.

For stopping as applied to brass instruments, see HORN.

STOPS (HARPSICHORD). Like the organ, the harpsichord had stops, by which, with double keyboard, contrasts as well as changes could be made. The principle, borrowed from the organ, was the simple movement of each

rack of jacks forming a register, so that the quills of the jacks might or might not touch the strings. The earliest notice of stops to a keyed stringed instrument appears in the Privy Purse Expenses of Henry VIII., Apr. 1530, published by Sir N. Harris Nicholas in 1827 (Rimbault, *History of the Pianoforte*, 1860, p. 33). The item mentions 'ii payer of Virginals in one coffer with iiiii stoppes.' The term 'virginals' in England under the Tudors and up to the Commonwealth, had, like 'Clavier' in German, the general signification of any keyed stringed instrument. (See VIRGINAL.) We therefore interpret this quotation as a double harpsichord, in one case, with four stops. If this be so, we must perforce limit Hans Ruckers's invention to the 'ottava,' the octave string (see RUCKERS), withdrawing from him the double keyboard and stops. In all unaltered Ruckers' harpsichords, we find the registers made as in the old Positive organs,³ by the prolongation of the racks as rails or slides, so as to pass through and project beyond the right-hand or treble side of the case. Each rail-end has a short loop of cord to pull it by. The late Miss Twining's Andries Ruckers of 1640, and the Countess of Dudley's Hans Ruckers the younger of 1642 have only this simple arrangement. But subsequently, to be nearer the hands, the registers were shifted by iron crank levers, and manipulated by brass knobs divided into two groups on either side of the nameboard, and immediately above the keys. The older instruments were often altered and modernised by the addition of this contrivance. The two unison stops were placed to the player's right hand, and as the reversed position of the quills when acting upon the strings required, could be brought into play by squeezing the two brass knobs together, or made silent by pushing them apart. The ottava was placed to the player's left hand, with the Lute and Harp stops, which were of later introduction, and require separate description.

The Lute, a timbre or colour stop, doubtless arose from observation of the power which lute-players, like viol- and guitar-players, had of changing the quality of the tone by touching the strings closer to the bridge. Perhaps the earliest reference to an attempt to imitate these instruments on the harpsichord has been found by Count L. F. Valdrighi, of Modena, in a letter in the Este records dated Mar. 3, 1595, by Giacomo Alsise, horn-maker of Padua, who says:

'I have let Messer Alessandro see and hear . . . one of my quill instruments (da penna), of new invention, that with two unisons (due mani di corde) forms three changes of sound.'

The passage is obscure, but if, as is probable, two jacks touched one string in Alsise's

³ See the organ depicted in 'Music,' attributed to Melozzo da Forlì (1438-94), in the National Gallery, London.

¹ Q.-L. ² See H. C. de Lafontaine, *The King's Music*.

instrument, one must touch nearer the bridge than the other, and produce a different quality of sound. This might seem far-fetched were not Lady Dudley's Antwerp harpsichord of 1642 actually so made. Here are four certainly original changes, with three strings, two unisons and an octave, and the different quality is sought for upon the octave string. A few years later, and in England, Thomas Mace (*Musick's Monument*, 1676) speaks of the 'Theorboe' stop, which may have been only another name for the Lute stop. Certainly in England in the next century the use of the Lute stop, with its fascinating oboe quality, was universal,¹ and it was frequently added to old harpsichords.

The second fancy stop, the 'Harp,' was contrived to push small pieces of firm leather against the second unison.² We have unquestionable authority for this in a double harpsichord of Shudi's, of 1771, that has never been disturbed. From the material being leather, this is often called the 'buff' stop, and a single harpsichord, now at Torquay, inscribed 'Longman & Broderip,' but bearing inside the real maker's name, 'Culliford,' and date 1775, which has all the stops named, has this one marked 'Silent.' The earliest mention of the Harp stop (as 'Welch harp') is in a patent taken out by Roger Plenius in 1745. The combination of the Lute stop by the first unison on the upper keyboard, and the second unison, which could be muted by the Harp stop on the lower, was effected by a pedal for the left foot. But to allow this pedal to be used, a stop placed inside the case, at the bass end of the keyboards, away from the other stops, had to be pushed back. Culliford's harpsichord gives the name for this pedal stop, the 'Machine,' derived from the ironwork of the pedal movement placed outside the case, and usually concealed by a box covering. The alternation of Lute and Harp with the normal registers of the upper and lower keyboards, is the most pleasing colour effect of the harpsichord. In Kirkman's harpsichord we find the Lute muted, without knowing for certain if this was the original plan. This muting has the high authority of the late Carl Engel, who transferred Kirkman's description of the stops from the *Catalogue of the Special Exhibition at South Kensington*, 1872, to his admirable *General Catalogue of Musical Instruments in the Museum*, 1874, p. 352.

The right-foot pedal is for the SWELL (*q.v.*). Mace attributes the inventions of the harpsichord pedal to John Hayward, a 'harpsichon' maker. Kirkman and Shudi did not place

their fancy stops alike. Kirkman's arrangement (and Culliford's), proceeding from the bass, was Harp, Lute, Octave; Shudi's was Lute, Octave, Harp. In all, the Lute, Octave and first Unison move to the right; the Harp and second Unison to the left. Shudi marked this on Frederick the Great's harpsichords, still preserved at Potsdam, with arrows and the English words 'ring' and 'dumb'; the Machine stop, 'open,' 'shut.' The Germans do not appear at that time to have cared for the varieties in the harpsichord given by stops. C. P. E. Bach makes no remarks in his *Versuch* about them. He merely says (1753, p. 131) that on a Flügel with more than one keyboard, the player has the forte and piano; that is to say, the lower and upper keyboards make those changes.³ (See *Pianoforte Primer*, p. 86.)

A. J. H.

STOPS (ORGAN). This word is used in two senses—for the handles or draw-stops which are placed near the organ-player, and by which he can shut off or draw on the various registers; and for the registers themselves. Thus we speak of a 'stop' being half-out, meaning the actual handle communicating with the sliders, and at the same time we speak of 'an organ having twenty stops,' meaning twenty registers. The latter use of the word has caused the appearance of a new expression, namely, 'sounding stops' or stops acting on pipes, as opposed to couplers and other accessory movements governed also by a stop-handle. When the pipes governed by a stop do not go through the whole compass, it is said to be a 'short-stop,' 'incomplete stop,' or 'half-stop.' When a complete row of pipes is acted upon by means of two stops, treble and bass, it is called a 'divided stop.' (See ORGAN: VOCABULARY OF STOPS; REGISTER; REGISTRATION.)

J. S.

STORACE, (1) ANN (ANNA) SELINA (*b.* London, 1766; *d.* Dulwich, Aug. 24, 1817), daughter of Stefano Storace (originally Sorace), an eminent Italian contrabassist who had settled in England, and who lived and taught in Dublin in 1750-56. She was first instructed in music by her father, and when only 8 years old appeared as a singer at the Haymarket Theatre in a concert given by Evans, the harper, Apr. 15, 1774. She was afterwards a pupil of Rauzzini, and in 1777 sang in the oratorios at Covent Garden and at Hereford Festival. On Apr. 27, 1778, she had a benefit concert at the Tottenham Street Rooms 'to enable her to pursue her studies, as she intends to go to Italy in the course of the ensuing summer.' She accordingly repaired to Venice, where she became a pupil of the Conservatorio dell' Ospedaletto, under Sacchini. In 1780 she appeared at La Pergola, Florence, with

¹ Queen Charlotte's Shudi harpsichord at Windsor Castle has an original Lute stop, and the date is 1740. This instrument, long at Kew Palace, was probably made for Frederick, Prince of Wales, George the Third's father.

² Shudi put a spring on the second unison slide, so that it could not be pushed off without moving a rail outside the case, next the 'Machine.'

³ In the posthumous second edition, 1797, he recommends Hohlfeld's pedal, which appears to have been a sostenente, for a dynamic change.

great success.¹ In 1781 she sang at Parma, and in 1782 at La Scala, Milan. In 1784 she was engaged at the Imperial Theatre, Vienna, at a salary equal to £500 sterling for the season, a then unprecedented sum. During her stay in the Austrian capital two important events in her career happened, (1) her appearance on May 1, 1786, as the original Susanna in Mozart's 'Nozze di Figaro,' and (2) her ill-starred marriage with Fisher the violinist. (See FISHER, John Abraham.) She returned to England in Mar. 1787, and appeared at the King's Theatre, Mar. 24, as Gelinda, in Paisiello's 'Gli schiavi per amore,' and afterwards in other comic operas, but she soon abandoned the Italian for the English stage, on which she made her first appearance at Drury Lane, Nov. 24, 1789, in her brother's opera, 'The Haunted Tower,' and for several years afterwards sustained, with the greatest success, a variety of characters in comic opera. In 1791 she sang at the Handel Festival in Westminster Abbey, and in 1792 at Hereford Festival. She formed an intimacy with BRAHAM (*q.v.*) and toured with him on the Continent. In 1801 she was engaged at Covent Garden, where she continued to perform till May 30, 1808, when she took her leave of the public in the opera of 'The Cabinet.' She lived at Dulwich until her death, and was buried at St. Mary's, Lambeth. She accumulated a considerable fortune, and by her will, dated Aug. 10, 1797 (twenty years before her death), bequeathed upwards of £11,000 in pecuniary legacies alone, including two munificent gifts of £1000 each to the old Musical Fund (Royal Society of Musicians) and New Musical Fund. This will was proved Oct. 11, 1817, the personality being sworn under £50,000. It was said in 1820 that after payment of all the legacies, there remained but little short of £40,000 for her cousin, Miss Trusler, the residuary legatee. Her studious concealment, after her return to England, of her marriage, is evidenced by her having made her will in her maiden name and avoided any description in it of her quality or condition, and also by the fact that her executor, in proving the will, describes her as a spinster. A miniature of her is in the Soane Museum.

W. H. H.

(2) STEPHEN (*b.* London, Jan. 4, 1763; *d.* there, Mar. 19,² 1796), opera composer, brother of the preceding. His early taste for music was cultivated by his father, so that when 10 years old he was able to perform the most difficult violin music of Tartini and Giardini with correctness and steadiness. When 12 years old he was placed in the Conservatorio di St. Onofrio at Naples, where he studied the harpsichord, violin and composition. On his sister's arrival in Italy, a few

years later, he joined her and visited with her the principal cities of that country, and eventually went to Vienna, where he produced his two operas, 'Gli sposi malcontenti' (June 1, 1785) and 'Gli equivoci,' the subject taken from Shakespeare's 'Comedy of Errors,' Dec. 27, 1786. He gained great advantage whilst there from his association with Mozart. He wrote, no doubt, during his Viennese period, two quintets and a sextet. Many amusing stories of Storace and his sister are told in Michael Kelly's *Reminiscences*. In Mar. 1787 he returned to England and was engaged to superintend the production of the opera in which his sister appeared at the King's Theatre, but soon became disgusted with the prevalent petty jealousies and intrigues, and retired for a time to Bath, where he devoted his attention to drawing, for which he had considerable talent. He returned to his musical pursuits in the ensuing year, and on Oct. 25, 1788, produced at Drury Lane the musical farce of 'The Doctor and the Apothecary,' adapting some of the well-known 'Doctor und der Apotheker' of Dittersdorf. On Nov. 24, 1789, he brought out his three-act opera 'The Haunted Tower,' the success of which was unbounded; it was performed fifty nights in the first season and kept its place upon the stage for nearly half a century. On Apr. 16, 1790, he produced his charming little opera 'No Song no Supper,' in which he introduced some of the music of 'Gli equivoci.' In the same year he wrote music for 'La cameriera astuta.' Jan 1, 1791, witnessed the production of the opera 'The Siege of Belgrade,' in which he introduced much of the music of Martini's 'La cosa rara.' This also long continued an established favourite. On May 3, in the same year, he produced the 'Cave of Trophonius,' an adaptation of Salieri's 'La grotta di Trofonio,' with some additional music by himself, but with no success. He fared better when, on Nov. 20, 1792, he brought out 'The Pirates,' in which he incorporated several pieces from 'Gli equivoci.' The finale to the first act is regarded as his masterpiece. In the same year he produced his opera 'Dido, Queen of Carthage,' which met with but small success, notwithstanding that the heroine was undertaken by Mara. 'The Prize,' musical entertainment, first performed on his sister's benefit night, Mar. 11, 1793; 'My Grandmother,' musical farce, produced Dec. 16, 1793; 'Lodoiska,' musical romance, the music partly adapted from Cherubini and Kreutzer, and partly composed by himself, performed June 9, 1794; 'The Glorious First of June,' occasional piece, produced July 2, 1794; the ballet of 'Venus and Adonis' (1794), and the 'Cherokee,' comic opera, Dec. 20, 1794, were all well received, as was also 'The Three and the Deuce,' musical drama, performed Sept. 2, 1795. On

¹ See Michael Kelly's *Reminiscences* and the *D.N.B.*

² The day of his death is given on his monument as the 16th.

Mar. 12, 1796, Colman's 'Iron Chest,' with Storace's music, was performed for the first time. He was then recovering from a severe attack of gout and fever; yet he determined to attend the first rehearsal. The consequence was fatal; he took cold, the gout attacked his stomach, and on March 19 he died.

At the time of his death he had an opera, 'Mahmoud, or The Prince of Persia,' in preparation for Braham's début in London. This work was left incomplete, but by the assistance of Kelly and the selection of some music by the composer's sister, Ann Storace, it was fitted for performance and produced for the benefit of his widow (a daughter of John Hall the engraver) and his children, Apr. 30, 1796, was well received, and performed many times. Storace's melodies are thoroughly English in character, whilst in his instrumentation the influence of Mozart and the Italian composers is evident. He was almost the first English composer who introduced into his works the type of finale, in which the business of the scene is carried on by concerted music.¹ Some fine examples occur in his works.

W. H. H.

STORIONE, LORENZO (b. Cremona, 1751), one of the last famous Cremonese violin-makers, who worked on the model of Stradivari from 1776-95. His violoncellos are particularly admired for their full tone.

STORNELLO. 'A short poem, in lines of eleven syllables each: it is peculiar to, and liked by the people in Tuscany, who extemporise it with elegant simplicity.' This is the definition of Stornello we find in Tommaseo's Dictionary. The *Vocabolario degli Accademici della Crusca*, the stronghold of the purity of the Italian language, does not contain the word; this fact added to the other, not less significant, that neither Crescimbeni, nor Quadrio, nor Tiraboschi, mention the word in their elaborate works, inclines us to believe that the word *stornello* has not the definite meaning that, for instance, *sonnetto* has, but is merely a name given in some parts of Italy to very short poems, more with regard to their purport than their form. Tommaseo again, somewhere else, speaking of Tonio and Beatrice, two peasants who sang and recited popular songs and popular poems to him, says: 'Tonio makes a difference between *rispetti* and *ramanzetti*: the latter are composed of only three lines, the former of eight or ten. And those that Tonio called *ramanzetti* Beatrice called *strambotti*, as Matteo Spinello and King Manfredi did; and in the territory of Pistoja and in Florence they are distinguished by the name of *stornelli*.' The two *stornelli* we subjoin may be taken as fair examples of this kind of poem.²

- (1) 'Tutta la notte in sogna mi venite;
Ditemi, bella mia, perchè lo fate?
E chi viene da voi quando dormite?'
- (2) 'Flori di pepe.
So giro intorno a voi come fa l'ape
Che gira intorno al fiore della siepe.'

The first line may contain either five or eleven syllables; the other two are of eleven syllables each. The first line rhymes with the third, i.e. the two have the last syllable, and the vowel of the last syllable but one, alike; the intermediate line, while corresponding in its last syllable with the last syllable of the other two lines, changes the vowel of the accented one. In the second form given above, the verse begins with the name of a flower. A *stornello* is embodied in Browning's 'Fra Lippo Lippi,' and Lola, in 'Cavalleria rusticana,' sings one.

The etymology of 'stornello' is very uncertain; Tommaseo, however, has some ground for asserting that it is a corruption of 'ritornello,' or 'refrain.' G. M., addns.

STOUGHTON MUSICAL FESTIVAL, see BOSTON, sub-section HANDEL and HAYDN SOCIETY.

STRADA DEL PÒ, ANNA. An Italian soprano, brought from Italy by Handel in 1729, with Bernacchi, Merighi, Fabri, and others, for the opera in the Haymarket. She appeared there in 'Lotario,' Dec. 2, 1729; in 'Partenope,' Feb. 24, 1730; 'Poro,' Feb. 2, 1731; 'Ezio,' Jan. 15, 1732; 'Sosarme,' Feb. 19, 1732; in 'Acis and Galatea,' June 10, 1732; and in 'Orlando,' Jan. 23, 1733. She was the only one of Handel's company who did not desert him for the rival new opera in Lincoln's Inn in the end of 1733, and she remained faithful to him till her departure from this country in June 1738, when a quarrel with Heidegger, the manager, put an end to her connexion with England. In the interval between 1733 and the last-named date she took part in Handel's 'Ariodante,' 'Alcina,' 'Atalanta,' 'Arminio,' 'Giustino,' 'Berenice'; also in 'Athaliah' and 'Alexander's Feast.'

Even on her arrival, though according to Handel,³ 'a coarse singer with a fine voice,' Strada must have had some brilliant execution, for the first air which she sang on those boards contains no less than thirty opportunities to display her shake. Coming after Cuzzoni and Faustina, and having so little to recommend her to the eye that she was nicknamed the 'pig,' it took her some time to get into favour. But Handel took pains with her, wrote for her, and advised her, and at length rendered her equal to the first singers of the Continent. G.

STRADELLA. (1) Lyric drama, music by Flotow. Produced Palais Royal Theatre, Paris, Feb. 1837. Then recomposed, as a Grand Opera, and produced at Hamburg, Dec. 30, 1844, as 'Alessandro Stradella.' In English

¹ Dibdin had foreshadowed it in his 'Quaker.'

² From Tigri's 'Canto popolare Toscani' (Florence, 1869).

³ Burney's *History*, iv. 342. The above information is compiled from the same volume, pp. 339-427.

(altered by Bunn) as 'Stradella,' Drury Lane, June 6, 1846; in German, Drury Lane, May 21, 1849; in Italian, Covent Garden, 1864. (2) Opera in 5 acts, by Niedermeyer; produced Opéra, Mar. 3, 1837. G.

STRADELLA, ALESSANDRO (b. circa 1645; d. 1682), Italian composer. The place of birth is uncertain; Genoa (Arteaga) and Venice (Carrier) are unlikely. Naples (Burney and, following him, Fétis and Riemann) is more generally accepted. Hess makes out a very fair case for the province of Modena, probably Vignola or Montefestino. Stradella's father, Marcantonio, was governor of Vignola for Prince Boncompagni in 1642, and at the siege of the town by the Papal troops in 1643 is said to have retreated to Montefestino. Rumour has it that Marcantonio Stradella evacuated Vignola after an insufficient defence, and when help was practically in sight. This point is worth mentioning, if only as a faint sign of a possibly weakening hereditary influence. Of Stradella's mother nothing is known. The date of Alessandro's death (1682) is obtained from a document in the archives at Modena quoted by Hess, who thus corrects the early authorities. (Bourdelot has 1670 and Burney 1678, both palpably in error, seeing that the score of 'Il barcheggio' is dated 1681, that work having been commanded for a wedding ceremony on July 6 of that year.) Hess's Modena document also corrects the date 1681 which had been accepted by Adler, Riemann, Combarieu and others.

The true facts of Stradella's life are in part unknown and for the rest so overlaid with legend and conjecture as to be equally problematical. The truth, were it discoverable, would probably be stranger than any of the fictions which at present abound with regard to this musician's life. The earliest authority is Bourdelot,¹ and from him there starts the fictive account of the happenings that befell Stradella. The tale which until recently has obtained credence is that Stradella went to Venice, where he taught and composed. Here he fell in love with the mistress of a Venetian nobleman and eloped with her to Rome (*via* Naples, according to Burney, whose statement lacks further verification). In Rome he first encountered the assassins who had been set on his path by the enraged Venetian nobleman. These ruffians are said not only to have desisted from their monstrous intent, after having their hearts melted by the exquisite strains of Stradella's oratorio 'S. Giovanni Battista' in the church of S. Giovanni Lateran, but to have warned the two young people of the danger threatening them. At this point, with evident art, the tale breaks off. Little more is told. We hear that Stradella and his lady fled there and then to Turin, where, 'about 1670,' the musician was

finally run to earth and murdered by a fresh band of hirelings. Thus far Bourdelot. Burney follows him except for the one point mentioned above and for the fact of Stradella's death being placed in 1678, a statement which Burney was able to uphold by the possession of the score of an opera, 'La forza d'amore' (since lost), dated Genoa, 1678, and which Burney takes to be Stradella's last composition. Fétis follows Burney in the main details. Since then the dated score of 'Il barcheggio' lengthens Stradella's life up to 1681, and, as has been noted, the latest research puts his death early in 1682.

Heinz Hess, in his *Die Opern Alessandro Stradellas*, has gathered together the conflicting versions of the musician's life and sifted the evidence. His is the most complete and reliable account, and from his book the following is taken. Stradella's position in Venice (it is not known in what year he went there) was that of a teacher of singing, not, as Bourdelot says, composer of operas commissioned by the Republic. Burney (*General History*) says that Stradella 'was not only an excellent composer but a great performer on the violin and, besides these qualifications, was possessed of a fine voice and an exquisite manner of singing.' The lady with whom Stradella eloped, generally called Ortensia, was not² the mistress of the Venetian nobleman Pignaver, but 'una giovane patrizia destinata sposa' of the Venetian senator Alvise Contarini.³ The flight to Rome is not vouched for by any contemporary document. It is possible that Stradella visited Rome from Venice and returned thither to embark on his love affair. (The couple may, in that case, have fled straight to Turin, where, according to contemporary documents, an abortive attempt at the assassination of Stradella was carried out.⁴) This assumption still leaves room for a second visit to Rome, this time with his lady, where the first attempt at assassination may have taken place. It seems that Stradella entered into service as a court musician under the Regent Marie de Nemours, Duchess of Savoy, in Turin. It is not related definitely whether he married Ortensia. From a document in the archives of Modena,⁵ his death in 1682 at Genoa is placed beyond doubt. Another document from the same source mentions a son.

Of Stradella's musical education nothing is known. The dates of his compositions are equally undiscoverable. Larousse⁶ mentions, without giving sources, the performances of operas in Venice between 1665 and 1668. Cesti's 'Dori' is dated 1672, and to this work Stradella wrote a Prologue. The score of 'S. Giovanni Battista' bears the date 1676. Burney says that his copy of 'La forza d'amore'

¹ According to Bourdelot.

was dated 1678. It is known that 'Il barcheggio' was written for performance in 1681.

Stradella's compositions, comprising operas, serenades, religious and secular cantatas, oratorios, motets, madrigals and string concertos, are nearly all in MS. Hess gives a full account of the operas and discusses them from the point of view of their novelty of structure and treatment. Burney traces the influence of Stradella on Purcell, founding this hypothesis on the latter's use of the ground-bass, which, he says, was fostered 'by viewing the works of an author who, according to tradition, was his greatest favourite.' Parry¹ mentions Stradella at some length in regard to his use of ground-bass and his position as a composer of cantatas and oratorios. The oratorio 'S. Giovanni Battista' is probably Stradella's greatest work and is undoubtedly of interest, showing, as it does, an important step in the evolution of that form from Carissimi to later oratorio writers like Handel. Parry says of it, 'The genuine musicianship and breadth of treatment in this work are indeed remarkable for the time when it appeared. . . .' In this respect it is of interest to notice the two sides of Stradella's character. On the one hand there is the free-living, amorous gallant; on the other, the composer of moving and apparently deeply felt religious music.

The serenade which Handel laid under contribution for 'Israel in Egypt' is 'Qual prodigio ch'io miri,' and is to be found in the supplement of the German Handel Society's edition.

An exhaustive catalogue of the Stradella MSS. will be found in Hess. The following list shows the principal printed works:

STRADIVARI (STRADIVARIUS), (1) ANTONIO (b. ? 1644; d. Cremona, Dec. 18, 1737), 'brought the violin to perfection and left to Cremona an imperishable name as master of his craft'; thus the inscription now affixed by the municipality of Cremona to the house in the Piazza Roma where the great violin-maker passed the

most successful years of his life² and where he died.

Regarding the etymology of the name, E. J. Payne, in the first edition of this Dictionary, pronounced it to be derived from 'the plural form of 'Stradivare,' a Lombard variety of 'Stradiere,' a tollman or douanier, a feudal official who was posted on the Strada (or high road) for the purpose of exacting dues from passengers'; while Mandelli, quoting from the catalogue of ancient rolls of the community of Cremona, compiled by the Piedmontese professor, Astegiano, to the year 1300, and printed at Turin in 1899, states that:

'The form of the name "de Stradaverta" as used in 1298 is derived from "Strada Averta" of the Cremonese dialect; in Italian, "Strada Aperta."'

A further outcome of Mandelli's researches is the remarkable genealogy of the Stradivari family which he traced down to 1883. Beginning with Giulio Cesare Stradivari of the parish of S. Michele Vecchio, who married Doralice Milani, a widow of the cathedral parish, on Apr. 10, 1600, we find Antonio Stradivari's father recorded in the register entry of the son born to them two years later and christened Alessandro, Jan. 15, in the same church. Later we find this same Alessandro, son of Giulio Cesare Stradivari, entering into the bonds of matrimony with Anna, daughter of Leonardo Moroni, on Aug. 30, 1622, which fact is duly recorded in the marriage register of the parish of S. Prospero. Three children are recorded to have been born of this union: Giuseppe Giulio Cesare, (b. Mar. 1623); Carlo Felice (b. Sept. 1626); Giovanni Battista (b. Oct. 1628). After the birth of the last-mentioned child documentary evidence concerning the family ceases entirely, and no effort has yet dissipated the obscurity which enshrouds the birth of Antonio Stradivari. Every record relating to the subject has, it would seem, been destroyed, or lost, and the only available explanation of this singular deficiency has been furnished by the wars and famine which visited Cremona in 1628, the year Giovanni Battista was born, and again in 1629. Again in 1630 the inhabitants were further harassed by the ravages of a plague which caused innumerable deaths, and compelled all those who could do so to leave the city. It is further recorded that Hieronymus Amati, his wife and his daughters, succumbed to the disease; but there is no indication that Alessandro Stradivari and his family were still at Cremona at the time, and Mandelli has perhaps rightly interpreted the complete lack of documentary evidence regarding the date and place of Antonio Stradivari's birth, to signify that

² It should be stated at once that the whole of the facts available as the reward of untiring effort and research concerning the family of the great 'Stradivarius,' as well as his own personality and work, have been amassed in the monumental study which has been, it may be said, the life-work of the sons of William Elsworth Hill—Antonio Stradivari, *His Life and Work (1644-1737)*, by W. Henry Hill, Arthur F. Hill, F.R.S., and Alfred Hill (London, 1902). To this work the writer acknowledges his great indebtedness.

¹ *Org. Hist. Mus.* vol. III. pp. 181 et seq.

his parents had fled to some haven of refuge where in the fullness of time Antonio first saw the light. The names of the three children above mentioned are the only entries to be found in the birth registers relating to children born in wedlock to Alessandro Stradivari, and the only direct allusion to the relationship existing between Antonio and Alessandro Stradivari is furnished by the contract for the purchase of his house wherein he signs himself 'Antonio Stradivari, son of the late Alessandro.'

The earliest authentic evidence of Antonio Stradivari's residence in Cremona has been supplied by a violin—dated 1666—recorded by Alfred Hill, in whose hands it has been. The original label in this instrument runs as follows:

'Antonius Stradiuarius Cremonensis Alumnus Nicolai Amati, Faciebat Anno 1666.'

followed by the familiar Maltese cross and the initials A. S. enclosed within a double circle. He was then—as will be gathered later—22 years of age and, it may be assumed, had probably served an apprenticeship to Nicolo Amati (see AMATI, 4) for the seven or eight preceding years. It is quite possible that he began to insert his own labels some years before 1666, but this date may be said to have marked the later limit of his pupilage; in any case it proved his competence to claim the authorship of his own instruments, and the labels found in his violins of the following year bear no allusion to Nicolo Amati, nor is there any further reference to his master on the labels of any of his later instruments. Following the same lines of deduction, the year in which Antonio Stradivari was born has been generally accepted as 1644, by reason of his custom of adding his age to his labels during the latter part of his life. In 1732 he states himself to be '89,' in 1736, '92,' and in 1737, '93.' Another noticeable feature of these labels is the alteration in the spelling of his name. About the year 1730 he seems to have discarded the first orthography, i.e. 'Antonius Stradiuarius,' and replaced the u with a roman v. The origin of this change may have been a chance misprint which commended itself to him; but it was certainly not due to any orthographical views on the part of the Stradivari family, for his son, Omobono, still continued to employ the earlier, while Francesco adopted the later spelling.

Accepting the year of Antonio Stradivarius's birth as 1644, we find that he was twenty-three years of age when he married Francesca Feraboschi in 1667. This lady was the widow of Giovanni Giacomo Capra, who had committed suicide in the Piazza S. Agata, Cremona, three years previously, and was Stradivari's senior by a few years. After the union Stradivari and his wife settled in a house known as the Casa del Pescatore, which was situated in his wife's

parish of S. Matteo; and a year after the marriage the Cremona census reports record that a daughter, christened Giulia Maria, had been born to them. Until 1680 Stradivari continued to live at the Casa del Pescatore, where his family was increased by the birth of a second daughter, Catterina (b. Mar. 25, 1674; d. June 17, 1748), and four sons: Francesco (b. Feb. 6, 1670), who only lived a week; Francesco (2); Alessandro (b. May 25, 1677; d. June 26, 1732); Omobono (3). In 1680 Stradivari and his family removed to the house he had purchased in the Piazza San Domenico of a Cremonese family named Picenardi. According to the deed of sale, first brought to light by Lombardini,¹ and now preserved in the National Archives of Cremona, Stradivari paid 7000 imperial liras (about £840) for his new home. 2000 lire of this amount he paid in cash, 4990 he agreed to pay within four years, and the balance of ten lire was foregone by the vendors provided he paid the Canons of the Cathedral the yearly tithe of six imperial sols. Until his death Stradivari resided in this house, known in his day as No. 2 Piazza San Domenico, but since 1870 as No. 1 Piazza Roma, and for nine years after his demise the remaining members of his family lived there. In 1746 it was let to Stradivari's pupil, Carlo Bergonzi, who occupied the house until 1758. In the following year it was tenanted by Giacomo Caraffe, and until 1777 by Giuseppe Paleari and others; but in that year Stradivari's grandson, named Antonio after him, sold the house to Signor Giovanni Ancina. During these years the building escaped alteration, but in 1888 the proprietor of the adjoining *café* purchased it and carried out such extensive alterations that little of the original form of the structure remained.

Eighteen years of domestic tranquillity followed the establishment of the Stradivari family—which included Susanna Capra, his wife's only daughter by her first husband—in their new abode, until May 25, 1698, when a break was caused in the home circle by the death of the violin-maker's wife, Francesca Feraboschi. She was buried with conspicuous honours in a tomb situated in the choir of the church of St. Domenico, and fifteen months after her death Stradivari consoled himself, becoming united in Aug. 1699 to Antonia Maria Zambelli, daughter of Antonia Zambelli, of the parish of S. Donato. This second marriage was blessed with five children: one daughter—named after the first wife—Francesca Maria (b. Sept. 19, 1700; d. Feb. 11, 1720); Giovanni Battista Giuseppe (b. Nov. 6, 1701; d. July 8, 1702); Giovanni Battista Martino (b. Nov. 11, 1703; d. Nov. 1, 1727); Giuseppe (b. Oct. 27, 1704; d. Dec. 2, 1781), who became a priest; Paolo Bartolomeo (b. Jan. 26, 1708; d. Oct. 14,

¹ Antonio Stradivari e la celebre scuola cremonese, 1872.

1776), a cloth-merchant. The last named, together with Stradivari's first child, Giulia Maria (by his first wife), were apparently the only members of his family who married.

TOMB AND RELICS.—It was in 1729 that Stradivari is recorded to have purchased, from the heirs of Francesco Villani, the burial-place and tombstone belonging to that noble family. The exact locality of this vault has been entirely lost since the total destruction (1869) of the church of S. Domenico and its chapel—named after the Blessed Virgin of the Rosary—which contained the Villani, afterwards the Stradivari tomb. A commemorative inscription on one of the decorative vases in the grounds (now a public garden) perpetuates the memory of the church of S. Domenico, but the fact that it was the last resting-place of the illustrious violin-maker is not alluded to. The Villani tombstone, however, from which the coat of arms and family inscriptions were so imperfectly effaced that they are still visible under Stradivari's name, is now preserved in the Municipal Museum, and the Parish Register of S. Matteo records that Stradivari's second wife was interred in the Villani vault on Mar. 4, 1737. She was the first member of the family to be buried there, and nine months later she was followed by her husband, who was laid to rest on Dec. 19, 1737. The following members of his family were also interred in the same vault :

Omobono Stradivari, June 9, 1742; Francesco Stradivari, May 13, 1743; Paola Bartolomeo Stradivari, Oct. 16, 1776; Giuseppe Antonio Stradivari, Dec. 3, 1781; Catarini Stradivari (spinster), June 18, 1784.

After the departure from the house in the Piazza San Domenico of Stradivari's son Paolo Bartolomeo, with his wife Elena Templari and their four children, in 1746, the new tenant, Bergonzi, presumably became the owner of Stradivari's tools and violin-making appurtenances; but during the thirty-nine years or so which elapsed between Stradivari's death and the sale of his designs, moulds, etc., by his descendants to Count Cozio di Salabue, many of these interesting relics necessarily became scattered abroad and passed into different hands. With the exception of his callipers, the great violin-maker's tools were not included in the Count's collection, which subsequently passed to the Marchese Dalla Valle in Turin. There are sixteen moulds for violins, and three for violas, in this collection, besides various drawings and designs for the minutest details of his art, which are of great interest. Vuillaume, it is said, also preserved some of Stradivari's moulds, and these were presented by him to the Musée de la Paris Conservatoire, whilst the French luthier, Chanut-Chardon, owned a set of small planes said to have belonged to Stradivari.

As no genuine portrait of Stradivari exists, we still have to rely on the verbal description of him handed down to us by Polledro from

his master Pugnani, for an idea of his personal appearance. According to Fétis (*Biog. des Mus.*), on whose authority we have the account, Polledro (*d.* 1882), formerly first violin at the court of Turin, records that his master, Pugnani, knew Stradivari during the latter part of his life, and delighted in talking about him. He described him as tall and thin. As a rule his head was covered with a white woollen cap in the winter, and a white cotton cap in the summer; over his clothes he wore an apron of white leather, and, as he rarely ceased from work, his costume varied seldom. Fétis also recounts that Stradivari's untiring industry and his frugal habits brought him to an old age of such easy circumstances that his affluence became a standard of comparison to the people of Cremona, who adopted the phrase *Ricco come Stradivari*.

METHOD AND WORKMANSHIP.—In the opinion of Messrs. Hill, Stradivari was undoubtedly an apprentice in Nicolo Amati's workshop, but they unhesitatingly repudiate the idea that Stradivari assisted Amati in the construction of his later instruments, and this on the grounds that there is no indication of any such help to be found in the latter's work. The explanation of this is possibly to be found in the fact that Stradivari's superior gifts placed him in a high position of trust, freed him from many of the duties exacted from his comrades, and gave him the privilege of making his own instruments and using his own labels. The question must still be somewhat a matter of surmise, but the above conclusion is certainly strengthened by the excellent violins which issued from Stradivari's hands whilst apparently he still worked in the studio of the great Amati. Again, the termination of Stradivari's apprenticeship can only be approximately stated to have taken place a couple of years before he purchased his house in the Piazza Roma in 1680. Already in 1666—and possibly as early as 1660—Stradivari was making violins in which he affixed his own labels. These early violins are particularly noticeable for their poor material, thick yellow varnish, solid build, and their proportions, which follow those of Amati's smaller pattern, *i.e.* about 13 $\frac{7}{8}$ long; 7 $\frac{1}{8}$ width of lower bouts; 6 $\frac{3}{8}$ width of upper bouts; 1 $\frac{3}{8}$ lower ribs; 1 $\frac{1}{8}$ upper ribs. With one or two exceptions, notably the ornamented violin known as the 'Hellier' Strad (1679), which tends towards the grand Amati in measurement, and is remarkably heavy in style of work, Stradivari adhered to the small model until 1684, after which date he definitely turned his attention to larger-built instruments. There is little doubt that by this time he had gained some prestige as a maker, and this, combined with the loss of his master's living influence, gave freedom to and further awakened his inventive faculties. Until 1684 he merely

proved himself to be an uncommonly skilled craftsman, but the years which intervened between 1684 and 1700 marked the progress of those experiments which were to culminate in the uttermost perfection of form and balance. It must be observed, however, that notwithstanding the changes which took place in Stradivari's work during this period—generally alluded to as the 'Amatisé period'—the perfect poise and equilibrium, so characteristic of his later work, is to some extent lacking. That Nicolo Amati's precepts still strongly influenced him is proved by his first innovation, which consisted in adopting a standard of length, varying from 14 inches to $14\frac{1}{8}$ inches, and proportions similar to those of the 'grand' Amati. In some instances he flattened the model, in others arched it almost to a central point, more generally he adhered entirely to the Amati model, though the solidity of his edges always remained the same. The scrolls also, during these years, evidence the master's indecision by the deviating vigour and occasional feebleness.

A marked alteration in the detail of his work took place in 1688, when Stradivari first outlined the curves of the scroll in black, and also similarly accentuated the centre-line or back rib of the scroll. This original idea was one which evidently commended itself to him and to his patrons as, with but few exceptions, he continued to place it on his scrolls until the end of his life. Briefly to summarise this early period, we may say that, between 1684 and 1690, Stradivari principally strove to avoid the defects of others, while seeking new paths for himself; but in the meantime the beauty, accuracy, and finish of his work was gaining steadily every year. The cutting of his *ff* holes, the carving of his scrolls, the exquisite precision of the purfling, all prove the complete dexterity with which he handled his knife. Then, as a crowning point to this perfect craftsmanship a new set of proportions suddenly suggested themselves to his maturing brain, and we find him in 1690 creating the 'Long Strad.' The abrupt appearance of this complete innovation is not easy to account for, but the growing demand for strongly toned instruments for use in the churches doubtless influenced Stradivari in the first place, and as the authors of *Gio. Paolo Maggini, his Life and Work* (Hill & Sons), state, the form and proportions were suggested by a Maggini violin which came under his notice. This search for power in Stradivari's work is observable from the moment that he threw off the yoke of the 'small' Amati pattern. He gradually increased his breadths year by year, and even contemporaneously with the 'Long Strad,' he made violins in 1691 and 1692 of still larger proportions, by combining extreme breadth with the utmost length of the long pattern. The dimensions of a typical

'Long Strad' of 1690 will be found recorded in Messrs. Hill's Appendix to their work already mentioned.

During the years following 1684 the varnish upon Stradivari's violins became gradually deeper in colour, and, as on the 'Long Strads,' it is of a rich hue of amber and light red. Until 1698 Stradivari adopted the 'long pattern' almost entirely, then came a return to the proportions which preceded the year 1690, and we get violins of about 14 inches in length, with widths similar to those of the 'Long Strad,' but with outlines more curved, corners longer, body fuller, and a whole of more harmonious appearance. It is interesting to note before leaving this period that the backs of the 'Long Strads' are nearly always cut in one piece; that the model is rather flat, but sloping gracefully from the centre to the purfling; that the *ff* holes, to fall in with the general design, are set rather upright, nearer together, and more open; the pine is fine grained, the mitres square, and the exquisitely carved scrolls are proportionately long.

With the year 1700 dawned the finest decade of his greatest period. Slowly but surely he discarded the Amati tradition which had again asserted itself in 1698 and continued to a certain extent until about 1702. We find him still adhering to the 14-inch length, but broadening, developing, and arching the model, until it assumes an unsurpassable grandeur and symmetry. His years of experiment have resulted in a neatly compacted instrument, with light edges, accurate corners, round arching, broadly treated but exquisitely graceful sound-holes and scroll, and a varnish soft in texture, which shades deliciously from orange to red. From 1703 until about 1709, the year of those famous violins 'La Pucelle' and the 'Viotti,' Stradivari seems to have settled upon certain points of construction, from which he rarely departed afterwards. A slight variation of curve is observable, but the main features and general dimensions agree with one another. Then followed years of indecision, in which no consistency of plan is to be traced, and until the end of his career, some minute changes of thickness, width, or length, characterise his work. Yet, in spite of these diversities, the years following 1710 undoubtedly mark the production of some of his finest instruments. In 1711 he made the fine violin known as the 'Parke'; in 1713, the 'Boissier,' which belonged to Sarasate; in 1714 the 'Dolphin'; in 1715 the 'Gillot' and 'Alard,' which experts look upon as the master's finest creation; and in 1716 came the 'Messiah' (see *TARISIO*). These years also mark the production of some of his grandest violoncellos, such as the 'Duport,' 1711; the 'Batta,' 1714; and—the most superb of all—the 'Piatto' in 1720. All of these are instruments of smaller proportions (about $29\frac{1}{2}$ inches

long) than those he made anterior to the years following 1700, which kept to the dimensions of his contemporaries. That Stradivari did not occupy himself with the proportions of the violoncello, as he did with those of the violin, is hardly to be wondered at, seeing that the capacities of the violoncello were hardly understood in his day. It was not until the latter years of his life that such artists as FRANCISCELLO employed it as a solo instrument, and Stradivari—with his usual quick responsiveness to the demands of artistic appreciation—gradually modified the proportions of his instruments from about 31½ inches to about 29½ inches in length, as the progressing technique of the contemporary virtuosi exacted a diminution in size.

His violas bear a more distinctive stamp of his creative genius than do his violoncellos. The changes so apparent in his violins are quite as evident in these larger instruments, and the models marked 'TV' and 'CV' preserved in the Dalla Valle collection evidence that he made these in two sizes, *i.e.* 'Tenor Viola' and 'Contralto Viola.' Before 1690 the influence of the Brescian school, and of the Amatis, still ruled the proportions of his violas, but after that year he adopted a smaller model—about 16½ in length—and to this he mainly adhered. These three members of the string quartet seem to have occupied Stradivari's attention almost exclusively. No authentic double basses or any designs for the same have as yet come to light, and with the exceptions of the remains of a viola da gamba, a kit—now in the Musée of the Paris Conservatoire—two handsome guitars, dating from the early years of his career, and the head of a third, it may be said with truth that Stradivari's fame rests entirely upon his violins, violas and violoncellos.

Stradivari's methods have been preserved from century to century, until they have become the fundamental basis of the art of violin-making. No detail of his work was too unimportant for the master's vigilant observation. That he personally designed the pegs, finger-boards, tail-pieces, inlaid patterns, bridges, and even the minutest details of his violin cases, is attested to by the numerous drawings of these in the Dalla Valle collection, while the several sketches for bow-tips and nuts reveal the interesting fact that he also made bows. His material, as already stated, was not always of the finest, owing to the restriction of limited funds during the early part of his career. However, it may be said that in the classification of the relative importance of the various factors required to make a perfect violin, material and dimensions are subservient to varnish, and it was in the application of this that Stradivari surpassed his contemporaries, rather than in the discovery of any new compound for the same.

Generally speaking, the so-called 'Lost Cremona Varnish' was, in the writer's opinion, no secret in Stradivari's lifetime, but the common property of the luthiers of the day, who compounded it from the materials used by the great painters of the epoch. Space will not admit of our discussing the many theories put forth regarding the component parts which constituted this varnish. Suffice it to state here that, in the opinion of the writer—an opinion which, it must be said, is controverted with some skill by Messrs. Hill—the late Charles Reade's hypothesis of an oil varnish over a spirit varnish is the most fundamentally correct solution of Stradivari's varnishing (vide *Readiana* and the *Pall Mall Gazette*, Letters, 1872). The exigencies of time-limits which have brought a demand for quick-drying varnishes in modern times sounded the death-knell of the brilliant, tender, transparent varnish of the Cremona School, so that the world has been forced to acknowledge that it is now a mere memory. Stradivari's own recipe was inscribed on the fly-leaf of a family Bible, but his descendant Giacomo Stradivari destroyed this, though it is said that he kept a copy of it which he carefully preserved for any future members of the family who might adopt the profession of their illustrious ancestor.

SYNOPSIS OF THE MOST NOTICEABLE VIOLINS, ETC., MADE BY ANTONIO STRADIVARI.—According to Messrs. Hill's careful calculations Stradivari made 1116 instruments between the years 1666 and 1737; of these, 540 violins, twelve violas, and fifty violoncellos are actually known to them to-day, whilst they have traces (unconfirmed) of over one hundred more. The earliest dated instruments seen by them are of the years 1666, 1667 and 1669. Count Cozio di Salabue states, however, that Stradivari was working and inserting his own labels in 1659. The following are the names of some of Stradivari's most noticeable violins: The 'Hellier,' 1679; the 'Sellière,' made between 1666 and 1680; the 'Tuscan,' 1690 (see MOSER); the 'Betts,' 1704; the 'Ernst,' 1709 (presented to Lady Hallé by Earl Dudley and others); 'La Pucelle,' 1709; the 'Viotti,' 1709; the 'Vieux-temps,' 1710; the 'Parke,' 1711; the 'Boissier,' 1713; the 'Dolphin,' 1714 (so named from its iridescent varnish); the 'Gillot,' 1715; the 'Alard,' 1715; the 'Cessol,' 1716; the 'Messie,' 1716 (preserved in Count Cozio di Salabue's collection for fifty years without being played on; hidden by Luigi Tarisio for thirty years in an isolated farm near the village of Fontenato, Italy; purchased by Vuillaume when Tarisio died in 1854; preserved by him in a glass case in his shop; sold to E. Crawford, an enthusiastic musical amateur, for £2000, and now the property of Messrs. William Hill). The 'Sasserno,' 1717; the 'Maurin,' 1718; the 'Lauterbach,' 1719; the 'Blunt,' 1721;

1, 2, 3. The 'Hellier' Stradivari Violin, 1679. 4. The 'King' Guarneri del Gesù Violin 1735.
From Hipkins & Gibbs's *Musical Instruments*. By permission of The Encyclopedia Britannica Co., Ltd.

the 'Sarasate,' 1724; the 'Rode,' 1722; the 'Deurbroucq,' 1727; the 'Kiesewetter,' 1731; the 'Habeneck,' 1736; the 'Muntz,' 1736 (both of these show the shaky hand of the veteran master).

Violas: The 'Tuscan,' 1690, preserved in the Municipal Institute, Florence—it bears Stradivari's monogram stamped on the mortice of the neck, the original finger-board, tail-piece, tail-nut, and bridge; two violas, 1696, belonging to the quintet of inlaid instruments for some years owned by King Philip IV. of Spain; the 'Archinto,' 1696 (named after Count Archinto who owned a Quartet of Strads); the 'Macdonald,' 1701; Paganini's viola, 1731, which inspired Berlioz to write his symphony 'Harold in Italy.'

Violoncellos: The 'Archinto,' 1689; the 'Tuscan,' 1690; the 'Aylesford,' 1696; the 'Cristiani,' 1700; the 'Servais,' 1701; the 'Gore-Booth,' 1710; the 'Duport,' 1711; the 'Adam,' 1713; the 'Batta,' 1714; the 'Piatti,' 1720; the 'Baudiot' and 'Gallay,' 1725, comprise some of the finest instruments made by Stradivari (see also QUARTETS OF INSTRUMENTS).

(2) FRANCESCO (b. Cremona, Feb. 1, 1671; d. May 11, 1743), son of the above by his first wife, née Francesca Feraboschi.

(3) OMOBONO (b. Cremona, Nov. 14, 1679; d. June 8, 1742), also a son by the first wife. Both were interred in the Villani vault. They were the only members of Stradivari's family who embraced their father's profession, and although their work is not without merit, their brilliant and long-lived father entirely eclipsed them. During the latter years of Stradivari's life there is little doubt that they assisted him, probably in conjunction with Carlo Bergonzi, in constructing his violins. This would account for those specimens of the great master's work that frequently gave rise to controversy. But for the hand of the vandal these 'doubtful' instruments would bear the label 'sotto la disciplina d'Antonio Stradivari,' by which inscription he distinguished the instruments made in co-operation

with his sons. These tickets have, however, in almost every case, been removed, and fresh ones, bearing Antonio Stradivari's name alone, inserted. Of the two brothers, Francesco was the better luthier. His work is not without originality, the outline of his *ff* holes in particular differing greatly from that of his father. A picture of one of his violas is included in George Hart's *The Violin*.

E. H.-A.

STRAETEN, EDMOND VAN DER (b. Oudenarde, Flanders, Dec. 3, 1826; d. there, Nov. 25, 1895), distinguished Belgian musician and writer on music, was educated for the law, first at Alost, and afterwards in the University of Ghent.

On his return to Oudenarde he continued the cultivation of his taste for music, in combination with numismatics and archæology, the last-named pursuit powerfully influencing the determination of his career. While in his native town he organised and directed performances of excerpts from operatic works, and in 1849 himself set to music a three-act drama, entitled 'Le Proscrit.' At this early age he began that research in the rich musical archives of his native country which he later gave to the public in his literary works. Van der Straeten next became secretary to Fétis, who was then director of the Brussels Conservatoire, at the same time continuing his studies in harmony and counterpoint, the latter under Fétis, with whom he entered into active collaboration, in cataloguing the historical section of the Royal Library and contributing numerous articles to Fétis's biographical dictionary. He thus spent fourteen years in preparation for his own historical productions. During this time he acted as musical critic to *Le Nord*, *L'Écho du Parlement* and *L'Étoile belge*, and wrote, as well, in various reviews. His early books are *Coup d'œil sur la musique actuelle à Oudenarde* (1851); *Charles Félix de Hollande* (1854); *Les Carillons d'Oudenarde* (1855); *Recherches sur la musique à Oudenarde avant le XIX^e siècle* (1856); *Examens des chants populaires des Flamands de France* (1858); *Jacques de Goyé* (1863); and *J. F. J. Janssens* (1866).

The first volume of his great work, *La Musique aux Pays-Bas*, appeared in 1867, and the eighth in 1888; it marks the period of his entire devotion to the publication of his archaeological discoveries. He had formed an important library of materials for the musical history of the Low Countries, and had also collected musical instruments bearing upon his studies, including his beautiful Jean Ruckers clavessin of 1627, figured in his third volume.

The Belgian Government now charged van der Straeten with artistic and scientific missions which involved his visiting Germany, Italy, France and Spain. He visited Weimar in 1870, for the model representations of Wagner's operas, and his reports are alike distinguished

by æsthetic sentiment and clearness of analytical vision. He was appointed by his government, in concert with the Académie Royale, on the committee for the publication of ancient Belgian compositions. The most important of his later books are: *Le Théâtre villageois en Flandre*, 2 vols. (1874 and 1880); *Les Musiciens néerlandais en Italie* (1882); *Les Musiciens néerlandais en Espagne* (first part, 1885); *Charles V musicien* (1894), and *Les Willem luthiers gantois du XVII^e siècle* (with C. Snoeck, 1896). A complete bibliography of his works to 1877 is appended to an interesting biographical notice, written by Charles Meerens, and published at Rome. (See also RIEMANN.)

A. J. H.

STRAETEN, EDMUND SEBASTIAN JOSEPH VAN DER (b. Düsseldorf, Apr. 29, 1855), violoncellist, writer and composer; living in London since 1881. For over thirty years he has identified himself with the revival of the viols and ancient chamber music as player of the viola da gamba and lecturer on the viols and musical history. He instituted chamber concerts at the North-East London (now Hackney) Institute under the auspices of Ebenezer Prout, and in the West End between 1890-1910; played as soloist in London and the provinces in the last concert of Mme. Trebelli's farewell tour; played the gamba at the Handel Festival at Halle in 1922; and founded the Tonal Art Club at St. John's Wood in 1900. He has been an extensive contributor to the 3rd edition of this Dictionary. His publications include *The History of the Violoncello*, *The Romance of the Fiddle*, *The Technics of Violoncello Playing*, *Handbook of Musical Form*, *The Revival of the Viols* (in *The Strad*), a series of books on *How to play Violin Solos* and *Violoncello Solos*. Compositions: two albums, a suite, 'Romance' and other solos for violoncello and violin, *Méthode de Violoncello*, 3 books. His unpublished include 'The Lily of Kashmir,' 3-act opera, and a Christmas cantata, *Elegy* and other pieces for orchestra.

STRAIGHT & SKILLERN, a firm of London music-publishers. Thomas Straight and Thomas Skillern were established in Great Russell Street, Covent Garden, and issued a set of Country Dances for 1768. On the death of James Oswald about 1769, they appear to have taken over his business at 17 St. Martin's Lane, and to have reissued some of the Oswald publications, in some instances in conjunction with William Randall. About 1777 or 1778, Thomas Straight either died or gave up business, and Skillern was left alone at 17 St. Martin's Lane, where, he remained until about 1799 or 1800, at which time his death occurred, his plates and stock-in-trade being bought by Preston. Skillern's son (presumably) now went into partnership with Challoner (evidently Neville Butler Challoner, the harpist) at 25 Greek

Street; they afterwards, c. 1815, were near the corner of Regent Street and Oxford Street.

Thomas Straight, jun., after his father's death, set up a music business at 138 St. Martin's Lane, removing about 1796, and apparently devoting himself to music engraving solely, at 7 Lambeth Walk. Another address of the same or another Straight is 4 Green Street, Leicester Square.

F. K.

STRAKOSCH, (1) MAURICE (b. Lemberg, Moravia, 1825¹; d. Paris, Oct. 9, 1887), well known in the United States as an entrepreneur of operatic and concert ventures, the elder of two brothers, studied at the Vienna Conservatorium, and from 1845-60 lived in the United States, first as a teacher and then as an impresario. After Rossini's death he gave performances of the 'Messe solennelle' at the Salle Ventadour, Paris, where he organised a successful opera season in 1873-74. He was European agent for his sister-in-law, Mme. Patti, from her début in 1859 until her marriage, and also for many other distinguished singers. In 1857 he managed his first season of Italian opera in New York and in 1859 took his company to Chicago. Two operas of his composition, 'Sardanapalus' and 'Giovanna di Napoli,' were given in New York. He joined his brother in management of the Apollo Theatre in Rome in 1884-85. In 1887 he published a volume of memoirs, *Souvenirs d'un impresario*, and died suddenly in the same year.

His younger brother, (2) MAX (b. 1834; d. New York, Mar. 17, 1892), remained in America when Maurice went to Europe, and managed in his stead. He directed many successful enterprises of Italian opera, and managed the Apollo Theatre in Rome with his brother in 1884-85.

A. C.; addns. *Amer. Supp.*

STRALOCH MS., a famous MS. collection of airs written in lute tablature, for Robert Gordon of Straloch, and dated 1627 and 1629. The MS. was in small oblong octavo of ninety-two leaves, and was entitled,

'An playing Booke for the Lute. Where in ar contained many cvernts and other mysvical things.
At Aberden. Notted and Collected by Robert Gordon [Sir Robert Gordon of Straloch.] In the year of our Lord 1627. In Februarie.'

On the back of the title was a sketch of a person playing on the lute.

It was given, in 1781, by Dr. George Skene of Aberdeen, to Dr. Burney, who does not appear to have mentioned it or to have made any use of it. It afterwards came into the possession of James Chalmers of London, at the sale of whose effects it disappeared. In 1839 it was lent to George Farquhar Graham, who made some extracts from it. Graham's original transcript was in the library of the late T. W. Taphouse of Oxford, and was sold in 1905. A fair copy was made by Graham, and deposited in the

¹ *Musical World* gave 1823.

Advocates' Library, Edinburgh; other copies, too, have been made from the original transcript, one by the present writer. Though the Straloch appears to be the earliest MS. containing Scottish airs, yet the list of contents (see *Gentleman's Magazine*, Feb. 1823) shows how small a proportion they bear to the English and foreign airs.

F. K.

STRANIERA, LA (The Stranger), opera in 2 acts; libretto by Romani, music by Bellini. Produced La Scala, Milan, Feb. 14, 1829; King's Theatre, June 23, 1832.

G.

STRANSKY, JOSEF (b. Hupoleč, Bohemia, Sept. 9, 1874), orchestral conductor, who after studying medicine at Prague, Vienna and Leipzig, studied music under such famous masters as Fibich and Dvořák in Prague, Fuchs and Bruckner in Vienna.

His career as conductor began at the German theatre in Prague and was continued at the Hamburg Opera (1900–09). He followed Mahler as conductor of the New York Philharmonic Society (1911–22), and since then has been in charge of other orchestral and operatic organisations in America. His compositions include an opera, 'Der General,' given at Hamburg.

Amer. Supp.

STRATHSPEY, a Scottish dance, closely allied to the REEL (*q.v.*), derives its name from the strath or valley of the Spey, in the North of Scotland, where it appears to have first been danced. The word does not appear in connexion with music till late in the 18th century, but much earlier than that tunes are found suited for the style. Though slower in time than the Reel, the Strathspey calls for more exertion. The former is a gliding dance, while the Strathspey abounds in those jerky motions which call every muscle into play. Thus the music of the Reel is composed of a series of passages of equal quavers, while the Strathspey consists of dotted notes and semiquavers. The latter frequently precede the long note, and this peculiarity has received the name of the SCOTCH SNAP (*q.v.*). That the two words were formerly almost synonymous, is shown by a volume which is still of the highest authority and of which the title-page runs thus:

'A Collection of Strathspeys or Old Highland Reells, with a Bass for the Violincello [*sic*], Harpsichord, or Pianoforte. By Angus Cumming, at Granton. Strathspey. 1780.'

The word Strathspey is here printed in very large letters, while 'Old Highland Reells' are in the smallest. Moreover, throughout the volume the word Strathspey is not once used, but always *Reell So-and-so*. No. 5, for example, though clearly a Strathspey, is entitled 'Acharnae Reell.' (See REEL and SCOTTISH MUSIC.) The Strathspey differs from the Reel in tempo; the Strathspey ♩=94, the Reel ♩=126 is an approximate indication. Another difference is the smoothness of the notes in

the Reel as compared with the broken notes of the Strathspey.

REEL. *Olydeside Lasses.*STRATHSPEY. *Tullochgorum.*

With the Reels and Strathspeys of Scotland the name of Neil Gow (*q.v.*) is indissolubly associated.

T. L. S.

STRAUBE, KARL (b. Berlin, Jan. 6, 1873), organist and conductor, is the son of a German father and an English mother. He studied the organ under Heinrich Reimann, and from 1894–1897 gave organ recitals all over Germany and elsewhere, arousing wide admiration for both the virtuosity and the musical quality of his playing. In 1897 he was appointed organist of the Willibrodé Dom at Wesel. In 1902 he went to Leipzig as organist of the Thomaskirche, a post he retained until 1918. In 1903 he became conductor of the Leipzig Bach Society, and in 1904 conducted the second German Bach Festival. In 1908 he conducted the Leipzig Bach Festival on the occasion of the unveiling of Seffner's Bach monument, and further Bach Festivals at Leipzig in 1911, 1914, 1920 and 1923—this last one being held to commemorate the bicentenary of Bach's appointment as cantor.

Meanwhile, in 1907, he had been appointed organ-teacher at the Leipzig Conservatorium, and was granted the title of 'Royal Professor' in 1908. In 1918 he succeeded Gustav Schreck as cantor of the Thomasschule, and in 1919 effected the merging of the Bach Society in the Gewandhauschor, of which he is conductor. In 1925 he was the chief organiser of an important Handel Festival at Leipzig and conducted the greater part of it. Since his appointment as cantor in 1918, his duties have been so exacting and multifarious that he has almost given up playing the organ in public, but the general German opinion is that he is the finest organist that Germany has produced in recent generations. His repertory includes all the best organ music, new and old, and his powers of improvisation are unrivalled. Max Reger met him in early years, and it is owing to his admiration for Straube's playing that he produced most of his finest organ works. At one time, indeed, there was a kind of friendly warfare between them. Reger was determined that he would write works which would defeat even Straube's virtuosity, but after each onslaught Straube was left with the victory. As a conductor, whether of the Thomanerchor or the Gewandhauschor, he has done an immense

amount of admirable work, introducing music hitherto unknown in Germany—early Netherland, Italian and English church music, as well as modern choral works of different nationalities, including Vaughan Williams's unaccompanied Mass in G minor; while his interpretation of accepted masterpieces such as Bach's Passion Music and the B minor Mass or Handel's oratorios is always masterly. His profound knowledge of music of all periods, coupled with his exceptionally wide general culture and his ever-fresh curiosity about anything that touches human affairs, makes him one of the leading figures in the artistic and intellectual life of present-day Germany.

H. B.

STRAUS, LUDWIG (*b.* Pressburg, Mar. 28, 1835; *d.* Cambridge, Oct. 23,¹ 1899), an excellent violin-player; entered the Vienna Conservatorium in 1843, and remained there till the revolution in 1848; was pupil of Böhm for the violin, and Preyer and Nottebohm for counterpoint; made his first appearance (at the same time with Fräulein Csillag) in a concert at the hall of the Musikverein, Vienna, in June 1850. During the next few years he made various public appearances, besides playing in the private concerts of several patrons of music, especially Ober-Finanzrath Baron von Heintl, at whose réunions he played second fiddle to Mayseder for three years. At the Mozart Centenary Festival in 1856 he met Liszt, and, like many other young artists, benefited by his kindness. Straus's first concert tour was made in 1855, and extended as far as Venice and Florence. In 1857 he made the acquaintance of Piatti, with whom he took a second tour through Germany and Sweden. In 1860 he was appointed Konzertmeister of the theatre (till 1862) and of the Museum-concerts in Frankfurt (till 1864), giving also quartet concerts, and leading the subscription concerts in the neighbouring towns. In 1860 he first visited England, played at the Musical Union, June 5, etc., and at the Monday Popular Concert of June 18. In 1861 he returned, and appeared twice at the Philharmonic, Apr. 29 and June 24.

In 1864 he took up his residence in England, settling after a time in Manchester, where he was leader of Hallé's orchestra. But he often visited London, to take either first fiddle or viola in the Popular Concerts, or to play soli at the Crystal Palace or the Philharmonic; during his residence in England he played at Dresden, Vienna, etc. Straus was a member of the Queen's private band, and 'solo violinist' to Queen Victoria. In 1888 he resigned the leadership of the Hallé orchestra, and settled altogether in London. In 1893 he gave up all active work, being crippled with arthritis; he went to live at Cambridge, where,

a short time after his retirement, his many friends and admirers presented him with a fine Stradivarius violin. G., addns.

STRAUSS, (1) JOHANN (*b.* Vienna, Mar. 14, 1804; *d.* there, Sept. 25, 1849), composer of dance music of world-wide celebrity.

As a child he showed talent for music, and a love for the violin, but his parents, small inn-keepers, apprenticed him to a bookbinder, from whom he ran away. A friend met him, took him back, and persuaded the parents to entrust him with the boy's education as a musician. With the son of this benefactor he learnt the violin from Polyschansky, afterwards studying harmony and instrumentation with Seyfried. He soon played the viola in string quartets at private houses, and at fifteen entered Pamer's orchestra at the 'Sperl,' a favourite place of amusement in the Leopoldstadt. At that time the excellent playing of LANNER (*q.v.*) and the brothers Drahanek was exciting attention; Strauss offered himself, and was accepted as fourth in the little band. Soon, however, their numbers had to be increased to meet their numerous engagements, and Strauss acted as deputy-conductor till 1825, when he and Lanner parted.

In the Carnival of 1826 Strauss and his little orchestra of fourteen performers appeared in the hall of the 'Swan' in the Rossau suburb, and took the hearts of the people by storm. His op. 1, the 'Täuberl-Walzer' (Haslinger), was speedily followed by others, the most successful being the 'Kattenbrücken-Walzer,' called after the Hall of that name. Strauss was next invited to return with his now enlarged orchestra to the 'Sperl,' and with such success as to induce the proprietor, Scherzer, to engage him for six years, which virtually founded the reputation of the 'Sperl' and its orchestral conductor. Meantime Strauss was appointed Kapellmeister of the first Bürger-regiment, and entrusted with the music at the court fêtes and balls. As his band was daily in request at several places at once, he increased the number to over 200, from which he formed a select body for playing at concerts, in music of the highest class. He now began to make tours in the provinces and abroad, visiting Pest in 1833; Berlin, Leipzig and Dresden in 1834; West Germany in 1835; and North Germany, Holland, Belgium and the Rhine in 1836.

His next tour began in Oct. 1837, and embraced Strassburg, Paris, Rouen, Havre, Belgium, London, and the larger towns of Great Britain; he then returned to Belgium, and back to England and Scotland. His success in Paris was unprecedented, notwithstanding the formidable rivalry of Musard and Dufresne, with the former of whom he wisely joined for a series of thirty concerts. A disagreeable intrigue nearly made him throw up the journey to England, but it was only there that his profits

¹ Not 16th, as Riemann states.

at all remunerated him for his enormous expenses. In London he played at seventy-two concerts, and at innumerable balls and fêtes given in honour of Queen Victoria's coronation (June 28, 1838). On his second visit he had great difficulty in keeping his band from dispersing, so weary were they of continual travelling. He managed, however, to go again to Birmingham, Liverpool and Dublin, besides visiting Reading, Cheltenham, Worcester, Leicester, Derby, Nottingham and Sheffield. At Sheffield his receipts were small, and at Halifax still less, but when the amateurs of both places discovered the kind of musician they had been neglecting, a deputation was sent with post-horses to Leeds to bring him back again. He was taken ill at Derby, and only reached Vienna with great difficulty in Dec. 1838.

His first reappearance at the 'Sperl' was quite a popular fête. On May 5, 1840, he conducted for the first time in the imperial Volksgarten, which was crowded whenever his band performed. Strauss now introduced the quadrille, which he had studied in Paris, in place of the galop. His first work of the kind was the 'Wiener Carneval-Quadrille' (op. 124). Henceforward, except waltzes—among which the 'Donaulieder' (op. 127) are still played—he composed only quadrilles, polkas, and marches, including the favourite 'Radetzky-March.' On Apr. 16, 1843, he and the band of his old Bürger-regiment accompanied the body of his old colleague Lanner to the grave. An excursion to Olmütz, Troppau, etc., in the autumn of 1844, was succeeded in the next autumn by one to Dresden, Magdeburg and Berlin, where he was immensely fêted. The King appeared in person at Kroll's Garden, and invited Strauss to play at the palace. The Prince of Prussia, afterwards the Emperor William I., ordered a performance at Kroll's by more than 200 bandmen, conducted by the Kapellmeister General Wipprecht, before Strauss and his orchestra, when the royal princes, the generals, and the pick of the nobility attended. On his departure a grand torchlight procession and serenade were given in his honour. On his return to Vienna he was made conductor of the court balls. In the autumn of 1846 he went to Silesia, and the year following again to Berlin and Hamburg, where he revenged himself for some slights caused by professional jealousy by giving a concert for the poor. He returned to Vienna by Hanover, Magdeburg and Berlin. During the stormy days of Mar. 1848 he did homage to the spirit of the times in the titles of his pieces, but Strauss was at heart a Viennese of the olden time, a fact which caused him much unpleasantness on his next tour, in 1849, by Munich, Stuttgart, Frankfort, the Rhine, and Brussels to England.

He stayed in London and the provinces from Apr. to July. After a brilliant farewell concert

he was accompanied down the Thames by a fleet of boats, one of which contained a band playing the popular air, 'So leb' denn wohl du stilles Haus,' from Raimund's 'Verschwender.' In the midst of this gay scene poor Strauss was oppressed with a presentiment that he should never revisit London. Shortly after his return to Vienna he was taken ill with scarlet fever, to which he succumbed on the fourth day. With him departed a feature of Viennese life, and that the people themselves felt this was shown by the vast concourse at his funeral. A Requiem was performed in his honour on Oct. 11 by his own band, and the Männer-gesangverein of Vienna, the soli being sung by Mesdames Hasselt and Ernst, Aloys Ander and Staudigl, all from the court opera. Strauss married, in 1824, Anna Streim, daughter of an innkeeper, who bore him five children, Johann (2), Joseph (3), Eduard (4), Anna and Therese. They separated after eighteen years, on the ground of incompatibility of temper.

There are numerous portraits from which an idea can be gathered of Strauss's personal appearance. Though small he was well made and distinguished-looking, with a singularly formed head. His dress was always neat and well chosen. Though lively in company he was naturally rather silent. From the moment he took his violin in his hand he became another man, his whole being seeming to expand with the sounds he drew from it.

As an artist he furnished many pleasant hours to thousands, and high and low combined to do him honour, while great masters like Mendelssohn, Meyerbeer and Cherubini acknowledged his talent. He raised dance music to a higher level than it had ever reached before, and invested his copious melodies with all the charm of brilliant instrumentation. Full of fire, life, and boisterous merriment, they contrasted well with Lanner's softer and more sentimental airs, and must be judged by a totally different standard from that of mere dance music. As a conductor it was his constant endeavour to mingle classical names in his programmes, and thus to exercise an elevating influence on the masses. His works, published almost entirely by Haslinger, number 251, and comprise 152 waltzes, 24 galops, 6 cotillons and contredanses, 32 quadrilles, 13 polkas, and 18 marches, including some without opus numbers. The bulk of these have made, so to speak, the tour of the world; each new waltz was in its way an event, not only in Vienna, but wherever the first printed copies penetrated. Innumerable pens, including those of poets, celebrated his works, and the stage itself took part in the general homage, 'Strauss and Lanner' being the title of a one-act comedy by Töpfer, and a three-act piece by Anton Langer. His complete works were published in 1889 by B. & H., in seven volumes.

Of his three sons, the eldest, (2) JOHANN

(*b.* Vienna, Oct. 25, 1825; *d.* there, June 3, 1899), was scarcely less gifted than his father. In accordance with the father's wish that none of his sons should adopt his own line of life, Johann, after finishing his education at the Gymnasium and Polytechnic Institute, became a clerk in the savings bank, although he had, with his mother's help, long taken lessons in secret on the violin, and even studied composition with Drechsler. When only six he composed, at Salmansdorf near Vienna, where the family used to spend the summer, his first waltz, which was performed on his fiftieth birthday as 'Erster Gedanke.' The constraint put upon him became at length unbearable, and on Oct. 15, 1844, he first appeared as a conductor at Dommayer's, at Hietzing, playing compositions of his own, and his father's 'Loreley Walzer.' His success on that occasion decided his future career. After his father's death he incorporated the two bands, and made a tour to the country towns of Austria, Warsaw and the more important towns of Germany. He also undertook for ten years the direction of the summer concerts in the Petropaulovski Park at St. Petersburg. On Aug. 28, 1862, he married the popular singer Henriette ('Jetty') Treffz, and in 1863 became conductor of the court balls. This post he resigned after his brilliant success on the stage, but he had in the meantime composed nearly 400 waltzes, of as high a type as those of his father.

His music is penetrated with Viennese gaiety and spirit, and has made its way into all countries. The waltz, 'An der schönen blauen Donau' ('The Blue Danube') (op. 314), became a kind of musical watchword in Vienna, and was played on all festive occasions. 'Tausend und eine Nacht,' 'Man lebt nur einmal,' 'Weiner Blut,' and 'Künstlerleben' are among the most famous. Besides Russia, Strauss visited Paris (during the Exhibition of 1867), London, New York, Boston, and the larger towns of Italy. The Theatre 'an der Wien' was the scene of his triumphs as a composer of operettas, which rapidly spread to all the theatres, large and small. 'Indigo und die vierzig Räuber' (his first, 1871), 'Der Karneval in Rom' (1873), 'Die Fledermaus' (1874), 'Cagliostro' (1875), 'Prinz Methusalem' (1877), 'Blinderkuh' (1878), 'Das Spitzentuch der Königin' (1880), 'Der lustige Krieg' (1881), 'Eine Nacht in Venedig' (1883), 'Der Zigeunerbaron' (1885), 'Simplicius' (1887), 'Ritter Pasman' (1892), 'Fürstin Ninetta' (1893), 'Jabuka' (1894), 'Waldmeister' (1895), and 'Die Göttin der Vernunft' (1897), all published by Spina, were soon known all over the world, and were sung everywhere. Posthumously produced were a ballet, 'Aschenbrödel,' and an orchestral piece, 'Traumbilder.' A biography by R. von Procházka in his Riemann's series of *Berühmte Musiker*. (See *Riemann*.) After the

death of his wife on Apr. 8, 1878, he married another dramatic singer, Angelica Dittrich.

His next brother, (3) JOSEPH (*b.* Vienna, Aug. 22, 1827; *d.* there, July 22, 1870), was also obliged to accommodate himself to his father's wishes, and became an architect. He had, however, studied music in secret, and during an illness of his brother's in 1853 he conducted for him with a baton, as he did not learn the violin till later. He next collected a band, began to compose, and published in rapid succession 283 works (Haslinger and Spina) not less popular than those of his brother. He had always been delicate, and the excitement incidental to his calling increased the mischief year by year. A visit to Warsaw in 1870, against the wish of his friends, was very disastrous. Some Russian officers, having sent for him in the middle of the night to play for them, so shamefully ill-treated him for his refusal that he had to take to his bed. Under the devoted nursing of his wife (married in 1857) he rallied sufficiently to return to Vienna, but sank a few days afterwards.

The youngest of his brothers, (4) EDUARD (*b.* Vienna, Feb. 14, 1835; *d.* there, Dec. 28, 1916), was educated at the Schotten and Akademien Gymnasiums. His father having died before he grew up he devoted himself entirely to music, learnt the harp, and studied composition with Preyer. In 1862 he made his first appearance as a conductor in the Dianasaal, and was well received for his father's sake. In 1865 he took his brother Johann's place at the concerts in St. Petersburg, and in 1870 became conductor of the court balls. He and his band made repeated tours to Dresden, Leipzig, Breslau, Berlin, Hamburg, Frankfurt, etc. He appeared regularly in Vienna on fixed days at the Volksgarten, and in the winter in the large hall of the Musikverein, when his programmes were always attractive. He composed over 200 pieces of dance music, published by Haslinger, and latterly, with few exceptions, by Spina (Schreiber). Eduard Strauss married in 1863. In 1885 his orchestra was engaged at the Inventions Exhibition in London, when the daily concerts created a furore. He came also a few days later and played at the Imperial Institute.

BIBL.—FRITZ LANGE, *Josef Lanner und Johann Strauss* (Vienna, 1904; 2nd ed. Leipzig, 1919); ERNST DECEY, *Johann Strauss* (Stuttgart, Berlin, 1922); ED. STRAUSS, *Erinnerungen*, 1906.

STRAUSS, RICHARD (*b.* Munich, June 11, 1864), eminent alike as composer and conductor, was without a doubt the greatest figure in music of the last decade of the 19th century.

His father, Franz Strauss, was well known in Munich as the leading horn-player in the Munich Opera Orchestra. He was credited with having, at Wagner's own request, reduced the famous horn-call in 'Siegfried,' which in its original form was almost unplayable, to its final shape. The composer's mother was one of the famous

brewing family of Pschorr. The boy Richard early showed musical talent, and his father, who was a conservative of the strictest sect, took care that he should be brought up in the strictest classical traditions. His earliest teacher was F. W. Meyer. At the age of 6 he composed a 'Schneiderpolka' and a Christmas song. He pursued the ordinary education of a German boy at an elementary school from 1870-74, after which he entered the Gymnasium, whence he proceeded to the University of Munich in 1882. In 1871 he had already published a Festival March for orchestra and written a Serenade for wood-wind instruments, published as opus 7. In view of later happenings the fact that he composed the chorus from the *Elektra* of Sophocles, which was performed at a school concert, has a certain historical interest. The first record of a public performance of any of his works is of the singing of three of his songs by Frau Meysenheim. His quartet, opus 2, was played in Mar. 1881, by a quartet led by his violin master, Benno Walter. A still greater distinction was the performance of a symphony in D minor (at present unpublished) by Hermann Levi. All this time his musical and general education were proceeding side by side. He left the University in 1883 with the intention of devoting himself to music. Until that time even Schumann and Brahms had been too advanced for him, and although there are a few prophetic hints, certain turns of phrase, which are still characteristic of him, his earliest works remain strictly classical.

In the winter of 1883-84 Strauss was in Berlin, and this proved a turning-point in his career, for some of his works attracted the attention of von Bülow, who had his Serenade played at one of the concerts of the Meiningen Orchestra. Bülow also helped him to start his career as a conductor. In Oct. 1885 Bülow secured for him an appointment as Assistant Music Director at Meiningen. During this period he played solos and concertos and conducted his own symphony in F minor, opus 12, which had already been performed in 1884 at New York under Theodore Thomas. The two last works and the choral work 'Wanderers Sturmlied,' though not lacking in individuality, clearly show the very strong influence of Brahms.

At this period comes the real beginning of Strauss's career as a composer. He himself attributes his change of view to Alexander Ritter (*q.v.*), who had been at school with Bülow, and was a convinced adherent of Wagner and Liszt. The question has often been discussed at length and will never be answered fully how far Strauss's conversion is due to ideas that germinated in his own brain and how far to the external influence of Ritter. The probabilities are that both answers are true, or at any rate the question may now be considered as a purely academic one. For most people

Strauss's own account of his relationship to Ritter is sufficient:

'His influence was in the nature of the storm-wind. He urged me on to the development of the poetic, the expressive in music, as exemplified in the works of Liszt, Wagner and Berlioz. My symphonic fantasia, "Aus Italien," is the connecting link between the old and the new methods.'

It was not long before this change in Strauss's outlook, which may be briefly described as a conversion to the new German school which had as its motto 'Music as Expression' ('Musik als Ausdruck'), became evident. Strauss was appointed successor to Bülow at Meiningen in 1885 and spent a good deal of the spring of 1886 in Italy, and brought back with him the fantasia 'Aus Italien,' which was first performed in Munich in the spring of 1887. In the meantime, in Aug. 1886, he was appointed sub-conductor at the Munich Opera, a position which he held till July 1889, and in the following August he became assistant to Lassen at Weimar.

In 1886 was published the first group of songs, op. 17, of which the one now best remembered is 'Seitdem dein Aug' in meines schaute.' In this the new ideal of music expressionism is first fully realised. The violin sonata, op. 18, in which there are many turns of phrase suggestive of the later Strauss, appeared in 1887, and in 1888 'Don Juan,' op. 20, was first performed in Berlin; 'Tod und Verklärung' was first performed in 1889. Although it is numbered op. 23, 'Macbeth' had been written earlier than either of these. They show that the conversion to the new ideals was complete.

At this time Strauss's works were generally becoming known, and the controversies which their audacity aroused, controversies which to-day seem to belong to an age long past, began. The chief events of Strauss's stay at Weimar, which extended to June 1894, were a severe illness in 1892 which made necessary a voyage to Egypt and Sicily in 1892, and the composition during this time of the opera 'Guntram,' first performed at Weimar in 1894. The part of the heroine Freihild was played by Pauline de Ahna, who shortly afterwards became the composer's wife. In the following winter Strauss was appointed conductor of the Philharmonic concerts in Berlin in succession to Bülow, and shortly before that he had conducted the first performance of 'Tannhäuser' at Bayreuth.

During this period Strauss became one of the most prominent German travelling conductors. He visited London in 1897 for the first time and all the other important European towns. At this time came the composition of 'Till Eulenspiegels lustige Streiche,' which was first performed at Frankfurt in Sept. 1895. Here may be interpolated mention of the fact that on Mar. 21, 1896, Manns played 'Till Eulenspiegel' at the Crystal Palace, this being the first time

that Strauss's name appeared in an English orchestral programme. Mann thought the work so hard to understand that he had it played twice. 'Don Quixote,' op. 35, written in 1897 (first performance at Cologne, Mar. 8, 1898), and 'Ein Heldenleben,' op. 40, written in 1898, followed quickly. On Nov. 1, 1898, he was appointed conductor of the Royal Opera House at Berlin. Next came his second opera 'Feuersnot,' op. 50, first produced in Dresden on Nov. 21, 1901. In June 1903, came the series of concerts, known as the Strauss Festival, in London in the old St. James's Hall, given in conjunction with the Amsterdam orchestra, which he and Mengelberg conducted alternately, and at which several of his works were introduced to England.

The controversies about Strauss had all this time continued to rage fiercely in all the musical centres of Europe and America. They reached their height after the production, in Dresden, on Sept. 9, 1905, of his opera 'Salomé' to Oscar Wilde's text. The greater part of the year 1904 was devoted to the composition of the 'Symphonia Domestica,' which was first performed in New York in April of that year under the composer's direction, for the first time in Europe on June 1, at the Tonkünstler-Verein Festival at Frankfurt, and on Nov. 6 in London.

The chief event of 1905 was the first performance at Dresden of 'Salomé,' under von Schuch with Frau Wittich and MM. Burrian and Perron in the chief parts. This period of 1906-09 may be passed over rapidly. It was filled simply with many successes as conductor, culminating in the appointment as conductor of the Berlin Opera Orchestra, a post which Weingartner had retained when he relinquished the conductorship of the opera.

The first performance of 'Elektra' (text by von Hofmannsthal) was at Dresden on Jan. 25, 1909, and Strauss conducted the opera the first time in London in Mar. 1910. During this time 'Der Rosenkavalier' was being composed and was completed on Sept. 26, 1909, at his country house in Garmisch. Its first performance took place at Dresden on Jan. 26, 1911. In November 1910 Strauss resigned from the conductorship of the Berlin Opera. Since that date there have been few external events in his life, and the history of Strauss is chiefly that of his compositions.

After the composition of 'Der Rosenkavalier,' which to a certain extent showed that a modification of Strauss's style was inevitable and impending, came 'Ariadne auf Naxos,' which in its first version is an integral part of Molière's *Le Bourgeois gentilhomme*. It was first produced in Stuttgart, Oct. 25, 1912,¹ and in 1913 in London at His Majesty's

Theatre under BEECHAM (*q.v.*). This showed a further tendency towards simplification, of which, however, there were few, if any, signs in the 'Legend of Joseph,' op. 63, first produced by Diaghilev's Russian Ballet in Paris shortly before the war (1914), and a few weeks later given in London under the conductorship of the composer at Drury Lane Theatre (in June 1914). It was due to the war that it was not heard in Germany till 1921. The most important works of the war period were the opera 'Die Frau ohne Schatten,' text by Hugo von Hofmannsthal, which was first produced at Vienna on Oct. 1, 1919, and, for the present, the last of the orchestral compositions, the 'Alpine Symphony,' 1915, which was first heard in England under Sir Thomas Beecham at Queen's Hall in 1923. He also composed 'Parergon to the Domestic Symphony,' in other words, a free fantasia on themes from that work, for the one-armed pianist Paul von Wittgenstein, who had been wounded in the war. This is for the piano (left hand alone) and orchestra. It was played privately by von Wittgenstein in arrangement for two pianos in London.

The two other works of this last period are the ballet-pantomime 'Schlagobers' (Whipped Cream), Vienna, 1924, and the comic play opera 'Intermezzo,' for which Strauss wrote his own text (a thing he had not done since the days of 'Guntram'), produced in 1925 in Vienna.

He is engaged (1926) in the composition of another opera, text by von Hofmannsthal, on the subject of Helen of Egypt. Among his other works the only ones calling for mention here are editions of Gluck's 'Iphigenia in Tauris,' and editions of his father's posthumous works, chiefly studies for horn.

Since the war Strauss has paid three visits to London, one in the beginning of 1923 as conductor of his works, and two in 1926. On the first of these (April) he conducted the film version of 'Der Rosenkavalier,' for which he had adapted the music of his opera; on Nov. 9 he conducted the 'Alpine Symphony' and other works at a concert of the B.B.C.

QUALITIES OF STRAUSS'S ART

The history of the appreciation of Strauss's music in England is peculiar. It has probably never before happened to a composer of his rank that, just when the popularity of his works seemed to be steadily growing and controversy was dying down and the good was being separated from the bad, his works have suddenly been for about 10 years made inaccessible to the public. The 10 years in question are just the period in which musical as well as other history moved faster than at any time since the world began, while, for

¹ Given in the small house of the newly opened Hoftheater as the chief event in a festival of Strauss's works to celebrate the opening of the new theatre on Oct. 14.

reasons totally independent of music itself, we were not able to hear it or write an opinion about it. Russian and French music held our world, and native music, both old and new, had a vogue such as it had never had before.

When Strauss's music was heard again in England, it came into a world totally different from that in which we had last known it, and revaluation became indispensable. It was quickly realised that much which had been most eagerly fought about in the pre-war years had passed beyond the realm of controversy. The later developments of Russian music made much which had seemed strange and cacophonous before 1914 now seem harmless and ordinary. Ears which had not flinched at the 'Sacre du printemps' found the Battle Scene of 'Ein Heldenleben' quite innocent. On the other hand, lasting qualities of much of Strauss's work which controversialists had not allowed us to enjoy in peace were shown in a clearer light. Pre-war controversy as to the justification of programme music and 'hearing vertically' began to have no more than antiquarian interest at the time when Strauss's music was heard again. But it is as well not to forget that at the time the problems had been acute.

THE SYMPHONIC POEMS.—At the time when Strauss first came under the influence of Alexander Ritter and professed himself a 'musician of expression' ('Ausdrucks Musiker') the world had hardly begun to understand the true functions and scope of programme music, and many wild experiments were made. The first of Strauss's really modern works was, as has already been said, 'Macbeth,' in which, however, he did not carry the development of the symphonic poem beyond the point where Liszt had stopped (see SYMPHONIC POEM). He had realised the truth of what Wagner said in writing of Liszt's works, that, under the guise of describing the individual, they really helped to interpret the universal. Each successive symphonic poem of Strauss carried the effort to enlarge the descriptive scope of music beyond the depicting of the elementary emotions. It was not enough for him to associate with 'Don Juan' one or two themes expressive of violence and restlessness. He attempted to delineate the various phases of his mental development.

It would almost appear that at this period, perhaps subconsciously, a feeling grew on him that the Symphonic Poem, which in its beginnings in the hands of Liszt had been a protest against the formalism into which symphony was degenerating, or at any rate running a risk of degenerating, was in its turn creating a rigid dogma of its own. A very large percentage of symphonic poems, whether they attempted merely to tell stories in music—an error which Strauss never com-

mitted—or not began to conform to an unvarying pattern, of which the chief characteristic was that the composition must end with a coda based on a 'glorification' of the themes of the chief character. Strauss tried to shake himself free of such fetters, until, in 'Till Eulenspiegel,' the highest splendour of the themes of 'Till' is the central, not the final, feature of the work, and at the end there is a return to the simplicity with which the composition began, that is the æsthetic justification of its rondo form.

The variation form of 'Don Quixote' is, for analogous reasons, equally appropriate to the subject, for the main object of the whole work is to show the modifications which the knight's mind and temperament undergo till he returns to sanity and rises to a higher spirituality. 'Ein Heldenleben' has really two main subjects, the hero and his mate, and the real text of the work is the development of the two chief characters.¹

Inevitably, in his efforts to enlarge the expressive scope of his music, Strauss wandered into fields hitherto deemed inaccessible to music, or at least inappropriate to music of high aims. But to say this without qualification is to leave out of account the element of humour and satire. There is real humour in all these works, except 'Macbeth,' although there is, and probably will be for a long time to come, much controversy as to the quality of the humour. Whatever may be our ultimate judgment on passages like those associated with the attack on the wind-mills, the wind machine and the herd of bleating sheep in 'Don Quixote' or the music of the 'Adversaries' in 'Ein Heldenleben,' one thing about them should be borne in mind; although they have perhaps been talked about more than the whole of the rest of the works put together, in actual performance they only occupy one or two minutes out of forty or forty-five. If such a thing as musical humour is at all possible, that quality can no more be denied to the music associated with Sancho Panza in 'Don Quixote' or to the passage associated with the Wandering Friars in 'Till Eulenspiegel' or the Penitents in 'Don Quixote,' than to Beethoven in his more irresponsible moments or the subtler comedy of Mozart. 'Till' is in a different category, for there the humour is inherent in the themes themselves.

Strauss has never given to the world a long reasoned exposition of his views of the function of music, but it is possible to gather the principal features of what may be called his musical system from his scattered utterances, and of course from his works themselves. The

¹ Perhaps one might call 'the Adversaries' the third topic; but they are important more because they influence the Hero, and the way in which finally the themes coalesce is a subtle piece of psychology.

fundamental principle on which he has worked, ever since the days when he came under the influence of Ritter, may be summed up briefly thus: he refuses to recognise the distinction between abstract music and programme music; the only two categories he recognises are good music and bad music, and he defines good music as that which expresses most. How far this belief can be reconciled with the very marked preference which he has always shown for the music of Mozart over that of Beethoven is an interesting but hardly practical speculation. This taste, however, finds its expression in certain passages of his later music of which more will be said presently. Music he contends can do more than merely describe outward occurrences; it can express inner states of the mind and more than that, can arouse in the hearer the same emotions as the thing described. The answer given by himself and his adherents to the argument that it is impossible to set to music a system of philosophy and the accusation that he attempts to do so in 'Also sprach Zarathustra' is that he aims only at putting the hearer into a frame of mind analogous to that which would result from the study of philosophy. (See PROGRAMME MUSIC.)

This is perhaps the best place in which to deal with the charge of formlessness and the want of logic which was so often brought against his music in the past. It is not without interest to note that others have accused him with equal vehemence of cold-blooded calculation which takes the place of artistic impulse. It may be said with a good deal of force that in his earlier works, as for instance 'Aus Italien' and 'Macbeth,' he was preoccupied rather with the question how much can be expressed within the limits of a given form of music, whereas in later symphonic poems his chief anxiety was to find the musical form which would best express what he had to say. The difference in shape between 'Till Eulenspiegel,' who returns to a new life in legend, and 'Don Quixote' is accounted for by this modification of his aesthetic theory, which also explains the peculiarity of the structure of 'Ein Heldenleben,' especially at its eloquent close.

Later events have made it almost superfluous to discuss at any length his theories of 'vertical hearing' which at the time caused so much heart-burning. The problems which he set the musical world in this direction now seem almost elementary, and the resulting tonal effects which at first seemed irredeemably cacophonous to contemporary opinion are now accepted as completely innocuous.

Both their original strangeness and their subsequent familiarity have been quoted over and over again as proof of his artistic worthlessness on the one hand, and as proof of commanding ability on the other. It may be noted in

passing that in the nature of things a good deal depends on the way in which the outstanding passages in the various works are presented by different conductors. To take two extreme instances: Strauss himself rather emphasises their asperities and freakishness in performance whereas Arthur Nikisch used rather to tone them down, and when Strauss was once told by a friend that Nikisch made his music sound more amiable his reply was, 'I don't want it to be always beautiful.'

That Strauss is an almost unapproached master of orchestral effect and tone colour is a point that need not be laboured. (See ORCHESTRATION.) The two most characteristic passages in which he has set out to paint the beauties of nature are the movements 'At Sorrento' in 'Aus Italien' and at the opposite end of his career the passage depicting the sun shining on the Alpine waterfall in the 'Alpine Symphony.' For sensuous charm there are not many passages in modern music to be quoted which equal the love music in 'Ein Heldenleben' and the 'Domestic Symphony' and, above all, the variation chiefly concerned with Dulcinea in 'Don Quixote.'¹ The rich colour of these is in strong contrast to the more incisive tones of much of 'Till Eulenspiegel,' 'Don Quixote' and, above all, 'Don Juan' with its reckless gaiety. The closes of 'Don Quixote' and 'Ein Heldenleben,' which are closely akin in mood, could hardly be surpassed as expressions of serenity and resignation. It would be possible to quote endless passages descriptive of every variety of mood from tragedy to force. One peculiarity of Strauss remains to be mentioned; he is reputed to have said once that every theme in his symphonic poems occurs to him as connected with a certain instrument. He hears it first on the violin, the horn, the oboe, as the case may be, but, he added, it does not follow that it is on that instrument that it makes its appearance in the work itself.

It will be well to consider next Strauss's way of making a certain instrument of the orchestra personify a certain character in his symphonic poems. The salient instances which will occur to every one are the solo violin which represents the Mate and the bassoons which typify the Adversaries in 'Ein Heldenleben,' and the oboe d' amore which stands for the Child in the 'Symphonia domestica,' and in 'Don Quixote' again the viola which is Sancho Panza's mouthpiece, so to speak. Strauss had to a certain extent been anticipated by Berlioz in the 'Symphonie Fantastique' and 'Harold in Italy,' but he extended the scope of this use of the individual instruments, making them more an integral part of the orchestra, and his choice has an unfailing felicity. This brings

¹ It is not without interest as bearing on Strauss's sensibility to the emotional values of keys to remark in passing that one is in G \flat and the other in F \sharp major.

us again to another aspect of Strauss's works, the use of humour. It cannot be denied that often with him humour is synonymous with unlovely realistic sounds, but there are occasions when humour is combined with fine music. The viola passages in 'Don Quixote' connected with Sancho Panza, referred to above, are good instances of this, while the music which illustrates the death of Till Eulenspiegel may be quoted as being on the border-line. Thus in many cases with Strauss's music it is difficult to make a sharp distinction between descriptive realism, in the strict sense, as, for instance, the bleating of sheep in 'Don Quixote,' and the wind machine, and merely suggestive passages without raising the vexed question of humour in music, which is also illustrated by the parodied ecclesiastical music in 'Don Quixote' and 'Till Eulenspiegel.'

THE SONGS.—Coming now to Strauss as a writer for the voice, we find among the songs a great variety of music on various levels of excellence. His most rabid opponents cannot deny the beauty of songs like 'Traum durch die Dämmerung' (op. 29), 'Morgen,' 'Heimliche Aufforderung,' 'Ruhe meine Seele,' and 'Cécilie' (op. 27), 'Ich schwebe' (op. 48) and 'Allerseelen' (op. 10), which are remarkable both for lyrical charm of melody and extraordinary insight into the meaning of the text and picturesque accompaniment. He has, however, another vein which is almost equally well developed, the musical value of which is perhaps doubtful, such as 'Steinklopfers Lied' (op. 49), and many others, in which the composer has the excuse that the text which he has chosen does not deal with the beautiful things of this life but with the ugly side of the world, and violent subversive feelings. He has also a group of songs which are full of delightful *naïveté*, of which 'Muttertändelei' (op. 43) is a good specimen; in them are found genial themes of Mozartian simplicity.

In a letter to Franz von Hausegger, dated 1903, he wrote an extremely interesting confession as to his methods of composing songs, which it will be best to transcribe in full:

'For some time,' he says, 'I will have no impulse to compose at all. Then one evening I will be turning the leaves of a volume of poetry; it agrees with the mood I am in; and at once the appropriate music is instinctively fitted to it. I am in a musical frame of mind, and all I want is the right poetic vessel into which to pour my ideas. If good luck throws this in my way, a satisfactory song results.'

But often, he says, the poem that presents itself is not the right one; then he has to bend his musical mood to fit it the best way he can; he finds then that he works laboriously and without the right kind of enthusiasm at it.

His texts are mostly taken from modern German poets, of whom he is in particular sympathy, and his choice is happy, but sometimes his literary judgment fails him. He has

also, it cannot be denied, written a good many songs which bear traces of being composed without an inner impulse. A word should be spared for the beautiful 'Enoch Arden' (op. 38), a recitation for voice and piano, which is as nearly a song as such a hybrid can be. He has written, too, some fine songs for voice and orchestra, as distinct from those the piano accompaniment of which was later transcribed for orchestra, of which 'Hymnus' and 'Gesang der Apollopriesterin' (op. 33) are the most characteristic of Straussian rapture.

THE OPERAS.—It remains now to speak of Strauss as an operatic composer. His first work for the stage, 'Guntram' (op. 25), dates from 1892. He wrote his own libretto on a subject obviously inspired by Wagner's idea of what Nietzsche called the 'inevitable redeeming female' (*das obligat erlösende Frauenzimmer*). Its defect was the lack of action, which was not redeemed by the merits of the music, amongst which a long confession of faith by the hero and a duet between the hero and heroine are the best numbers. Next, in 1900, came 'Feuersnot' (op. 50), the libretto of which was by von Wolzogen. Here Strauss is more himself. The story of 'legendary time' (*fabelhafte Unzeit*) gave him full scope for brilliantly effective treatment of the folk-song elements of music, for musical sarcasm and for voluptuous love music. The finale remains one of the most gorgeously coloured of his tone pictures, and the choruses are remarkable for almost unsuspected powers of solid choral architecture, which is also observable in the choral ballad 'Taillefer' (op. 52), composed three years later.

After an interval of six years, during which he composed the 'Symphonia domestica' and 'Taillefer,' came 'Salomé,' which, with the exception of 'Elektra,' is the most hectic opera, or music-drama, ever written. These two works make the end not only of a period of Strauss's development, but of the development of music-drama in general. The force of passionate excitement could go no further.

'Salomé'—apart from the religious objections to the subject—was criticised when it first appeared on the ground that it misrepresented the archaism of Wilde's style with its cold glitter, but the real opposition is between Wilde and the subject. In 'Salomé' Strauss's short sharp themes are found in their fullest development. The use of the *Leitmotiv* is carried to the utmost extent, and the excitement is worked up to the highest pitch by the almost physical violence of the unusually large orchestra. Its great defect is the almost inhuman demand which Strauss makes on the voice, and the brutality of the *dénouement*, which, however, is brought about with lightning rapidity. The reasons of its undoubted success (for it is still played in Germany after

twenty years) are the gorgeous colour of the instrumentation, the vivid contrast between the music of Salomé, Herodias and Herod and that of Jochanaan, which comes as a relief after the hysterical excitement which precedes his entries. The Dance of the Seven Veils and Salomé's address to the head of Jochanaan are still to be heard on the concert platform in this country and each has a beauty of its own. 'Salomé' was first played in Dresden on Dec. 9, 1905, and in New York in Jan. 1907. The censor's objections to its production in England were overcome by altering the names of the principal characters and some few modifications in the text.

With Strauss's next music-drama, 'Elektra,' his partnership with Hugo von Hofmannsthal, which still (1926) lasts, began. 'Elektra' was first performed at Dresden on Jan. 25, 1909. The poet took as his subject the drama of Sophocles, while the psychology is to some extent that of Euripides. It affords the composer ample scope for his gifts of musical characterisation, both with regard to the themes and their orchestral treatment. It has been said that it is more brutal and sordid than 'Salomé,' but it must not be forgotten that, whereas in 'Salomé' the viciousness is unredeemed, the brutality of Elektra has its foundations in her noble desire to avenge her father. The musical characterisation in 'Elektra' has great power. The contrast between Elektra and Chrysothemis is incisively illustrated, and the musical picture of the neurotic over-wrought Clytemnestra, who is the female counterpart of Herod in 'Salomé,' is drawn with a firm hand. The first solo of Elektra, the duet of Elektra and Chrysothemis and the scene of the recognition of Orestes by Elektra contain magnificent vocal passages which stand out from the somewhat unvoiced main body of the work. The recognition scene is in itself a refutation of the common accusation that Strauss is merely a cerebral musician without keen emotion.

When he had finished 'Elektra' Strauss no doubt felt that he had gone as far as was possible in the way of stirring the emotions of his hearers by violence, orchestral and otherwise, and his next opera 'Der Rosenkavalier'—of which the text was also by Hugo von Hofmannsthal—shows a complete change of style. It has been rightly called his 'Meistersinger.' Three elements are to be discerned in the music, and the skill with which they are combined in a homogeneous whole is masterly. The first element is the dramatic Strauss, who is represented in the overture, with which he had dispensed in 'Salomé' and 'Elektra'; the second element is that of Viennese folk-song and dance, and the third is naïve Mozart-like melody. It must suffice to mention a few of the salient passages in the opera, such as the

valses, the brilliant scene of the entry of the Rosenkavalier in Act II., the trio of three female voices, and the soliloquy of the Princess at the end of Act I., wherein she deplores her lost youth. Nothing in German opera, except the quintet of the 'Meistersinger,' can stand by the side of the trio for beauty and skill of workmanship. Here, too, Strauss's great gifts of characterisation show themselves, and nowhere more successfully than in the delineation of the character of the licentious Baron Ochs von Lerchenau.

His next work for the stage was 'Ariadne auf Naxos' which has had a strange history. In its first version, produced in Stuttgart on Oct. 25, 1912, the 'Ariadne' drama was incorporated with Molière's *Le Bourgeois gentilhomme* and the comedy of 'Zerbinetta and her Companions.' In a second version the two are separated and more prominence is given to the ballet scenes of Molière. In the third *Le Bourgeois gentilhomme* and all connected with it was scrapped and von Hofmannsthal wrote an entirely new prologue, and the rest is left practically unchanged.¹ Here Strauss went a step further in the direction of simplicity; the orchestra is small and the musical texture less complicated. Strauss has caught the spirit of the Italian *commedia d'arte* in the 'Zerbinetta' episodes completely, and in the drama of 'Ariadne' he has aimed at the creation of a new musical idiom, which, however, retains the hall-mark of his personality. The most remarkable part of the score is the long coloratura aria of Zerbinetta. This was considerably shortened and partly transposed in the new version.² It has been said that this is not in keeping with the Italian ideal, but it may be assumed that Strauss is not aiming so much at reproducing as at further developing it.

The ballet of the 'Legend of Joseph,' which he composed for Diaghilev's Russian Ballet, also contains a certain amount of music of greater simplicity, but it cannot be considered as a great success. Except in the 'Alpine Symphony,' this movement towards simplicity has been uninterrupted, and it is to be noticed also in his ballet, 'Schlagobers,' and in his 'Intermezzo.' Whether it is to be discerned also in the 'Egyptian Helen,' which is to be produced in 1927, remains to be seen. In 'Die Frau ohne Schatten'—libretto also by Hugo von Hofmannsthal—produced in Vienna on Oct. 10, 1919, he was rather hampered by a mystical and unintelligible libretto, and in it he seems to have returned to his older style.

¹ The chief reason for the changes made by Strauss: first, that the interest was not concentrated enough; and secondly, the practical financial difficulties of employing a dramatic and an operatic ensemble on one and the same evening. Such difficulties did not, however, weigh much with Strauss in the cases of 'Salomé' and 'Elektra,' both of which are too short for a whole evening and too long to go with any other work.

² The first English performance of 'Ariadne' in the new version took place at Covent Garden in 1924.

CONDUCTING AND PERSONALIA.—Strauss's activities as a conductor have been manifold, and he would have earned fame in that capacity alone if he had not composed. He is a complete master of all his orchestral forces, and his interpretations are always distinguished by youthful fire¹ and impulse, and a keen sense of musical beauty: these qualities have made him pre-eminent as a conductor of Mozart. When he conducts his own work, however, he often over-accentuates the bizarre and realistic points, but latterly he has not, as far as one can judge from his recent appearance in London, conducted his own work with the same zeal that he used to show.

In person Strauss is tall and thin. His appearance is rather that of a successful business man than of a musician. In the society of his friends he is extremely genial, but he has great power of sarcasm. The chief article of his musical creed, as far as can be gathered from his conversation is adoration of Mozart, of which indeed his music bears ample traces, especially in his later works. His great relaxation is playing cards, especially 'skat,' at which he is a past-master and which he has illustrated musically in 'Intermezzo.' He has done admirable work in the 'Deutsche Tonkünstler-Verein,' and elsewhere, in safeguarding the practical interests of his fellow-musicians. One feature of his character which cannot remain unnoticed is his keen business sense, which indeed is sometimes carried to excess. When during his first visit to America, he conducted concerts in a large drapery store, he was severely attacked for his inartistic behaviour in so doing, but he replied to his detractors that the conditions under which he gave his concerts were perhaps even more artistic than those in ordinary concert halls, and it was better to earn money honestly than to complain to those who do. But he cannot be absolved from all blame in some later incidents, as when he rearranged the score of the 'Rosenkavalier' to fit a film and himself conducted the performances with inferior orchestras in cinemas.

TO SUM UP.—With the example of Verdi before us, there is no reason to suppose that his creative career is at an end, but it is probably safe to draw certain conclusions. He passed through the phase of severe classicism to that of modernity and is now partly retracing his steps. His chief services, which have made him the most prominent figure in the music of the day, may be said to be that he has settled the boundaries of descriptive music, at least till the old but ever-new conflict between programme music and absolute music revives once more. When it does revive it will be on a different field of battle, so to speak; and it

is chiefly to his work that this is due. One thing must not be forgotten. It is a necessary result, for good or for evil, of present-day criticism that more stress is always laid in a new work on the startling features, which may be mere externals, than on the essentials. What chiefly distinguishes him from the ultra-moderns who have come after him (and later movements have left him untouched) is that he claims (and his claim can be fully established) to have built on the foundation well and truly laid by his great predecessors; whereas some later composers assert that they have laid new foundations altogether. Time alone can decide between them. Though his work is not all on the highest level (whose is?), he has written enough music to insure him, by reason of its true beauty, its sincerity and above all its vast technical skill, a lasting place among the great ones of music.

LIST OF COMPOSITIONS

(With dates of first performances in England.)

- Op.
1. Festival March for orch.
2. String Quartet in A.
3. Five pieces for PF. solo.
4. PF. Sonata in B min.
5. Sonata for PF. and v'cl.
6. Sonata for PF. and v'cl.
7. Serenade for Wind Instruments.
8. Violin Concerto.
9. Stimmungsbilder, five pieces for PF.
10. Eight Songs.
11. Concerto for French Horn.
12. Symphony in F min. Nov. 28, 1896.
13. Quartet for PF. and Strings.
14. 'Wanderers Sturmlied' for 6-part choir with orch.
15. Five Songs.
16. 'Aus Italien'—Symphonic Fantasia.
17. Six Songs.
18. Sonata, violin and PF. in E flat.
19. Six Songs ('Lotosblätter').
20. 'Don Juan,' tone poem for orch. May 24, 1897.
21. Five Songs ('Schlechte Weisen').
22. Four Songs ('Mädchenblumen').
23. 'Macbeth,' tone-poem for orch. June 5, 1903.
24. 'Death and Transfiguration,' tone-poem for orch. Dec. 7, 1897.
25. 'Guntram,' opera in 3 Acts.
26. Two Songs.
27. Four Songs.
28. 'Zill Eulenspiegel's Merry Pranks,' tone-poem for orch. Aug. 21, 1896.
29. Three Songs.
30. 'Also sprach Zarathustra,' tone-poem for orch. Mar. 6, 1896.
31. Four Songs.
32. Five Songs.
33. Four Songs, with orchestral accompaniment.
34. Two Anthems for 16-part chorus.
35. 'Don Quixote,' Fantastic Variations for v'cl. and orch. June 4, 1903.
36. Four Songs.
37. Six Songs.
38. 'Enoch Arden,' melodrama (music for recitation).
39. Five Songs.
40. 'Ein Heldenleben,' tone-poem for orch. Dec. 6, 1902.
41. Five Songs.
42. Two Male Chorus.
43. Three Songs.
44. Two 'Grossere Gesänge' for low voice with orch.
45. Three Choruses for Male Voices.
46. Five Songs.
47. Five Songs.
48. Five Songs.
49. Eight Songs.
50. 'Feuersnot,' opera in 1 Act. July 9, 1910.
51. 'Das Thal,' for bass Voice and Orch.
52. 'Tallier,' Choral Ballad with soli and orch. 1905.
53. 'Symphonia domestica' for orch. Feb. 25, 1905.
54. Opera, 'Salomé,' in 1 Act. Dec. 8, 1910.
55. 'Bardengesang,' 1906.
56. Six Songs. 1906.
57. Two Military Marches. 1906.
58. 'Elektra,' opera in 1 Act. Feb. 19, 1910.
59. 'Der Rosenkavalier,' opera in 3 Acts. Jan. 29, 1913.
60. 'Ariadne on Naxos,' opera. 1st version, May 27, 1913; new version, May 27, 1924.
61. 'Le Bourgeois gentilhomme,' comedy with dance.
62. 'Festliches Präludium,' Nov. 4, 1913.
63. German Motet.
64. Alpine Symphony. Nov. 16, 1923.
65. 'Die Frau ohne Schatten,' opera.
66. 'Krämerspiegel,' twelve songs for voice and PF.
67. Six Songs.
68. Six Songs.

¹ Thus, of his reading of 'Die Meistersinger' it used to be said that while Richter approached it from the point of view of Hans Sachs, Strauss looked at it through the eyes of Walter.

- Op.
 69. Five Small Songs.
 70. 'Schlagobers,' ballet.
 71. 'Drei Hymnen,' for voice and orch.
 72. 'Intermezzo,' opera.
 Suite for orch. from the music of 'Le Bourgeois gentilhomme.'
 Dance suite from piano pieces of François Couperin for orch.
 A. K.

STRAVINSKY, IGOR (b. Oranienbaum, near St. Petersburg, June 5 (18), 1882), composer, was the son of an operatic singer who took care to develop his son's precocious and astonishing musical gifts. There was no question, however, of making a professional musician of him, and he was induced to prepare himself for a legal career. A classical education was followed by a few years' study at the University of St. Petersburg. But Stravinsky did not neglect music, and by the time he was 22 years of age, his talent had so far matured that Rimsky-Korsakov, whom he met at this time, strongly advised him to drop the law and devote himself entirely to musical studies. It was under Rimsky-Korsakov, accordingly, that he received his first systematic training.

The first work of importance figuring in the list of Stravinsky's published compositions, is a symphony, begun in 1905 and finished in 1907. A song-cycle with orchestra, 'Faun and Shepherdess,' followed soon afterwards and was in its turn succeeded by two orchestral pieces, 'Fireworks' and 'Scherzo fantastique.' At a performance of the latter, Serge Diaghilev, whose 'Russian Ballet' came into vogue at that time, was so struck by the young composer's uncommon gifts that he invited him to write the music for one of his forthcoming productions. This was 'The Firebird,' a brilliant score which, next to its unmistakable indebtedness to Rimsky-Korsakov, reveals more than the germs of a remarkable individuality. It appeared in 1910, and only a year later followed a new ballet, 'Petroushka,' which completely unfolded the composer's striking personality. As regards brilliancy and originality of scoring, and aptness of characterisation, this work still remains Stravinsky's undisputed masterpiece.

Although many critics deny that Stravinsky ever surpassed 'Petroushka,' all are agreed that he went on developing with disconcerting rapidity. In 1913 appeared his third ballet, 'Le Sacre du printemps,' which created a sensation at its production in Paris by its deliberate primitiveness and uncouthness of rhythm and orchestral colour. Even those who disliked the elemental brutality of the work were compelled to own that it was

expressed to perfection and in a manner that had never been attempted in music before.

Next came an opera, 'The Nightingale,' based on a tale by Hans Andersen. This was not finished until 1914, but included a good deal of music of much earlier date. The result was a certain incongruity of style, which the composer cleared away in 1917 by converting the second and third acts alone into a symphonic poem, 'The Song of the Nightingale.' It has been staged as a ballet with a scenario based on the original libretto.

Between 1915 and 1920 Stravinsky wrote and published a number of small works, including the three pieces for string quartet, the 'Pribaoutki' (Pleasant Songs) for voice and eight instruments, the easy pieces for piano duet, the 'Berceuses du chat' for voice and three clarinets, the three pieces for solo clarinet, the 'Ragtime' for small orchestra or piano, the 'Piano Rag-Music,' and some songs. But along with these minor works, all of which, though of a somewhat tentative character, are too highly finished to be dismissed as mere sketches, several new compositions for the stage gradually took shape, and consolidated the composer's newly acquired views and principles. Among these are 'Renard' (1918; produced in Paris, May 1922), 'Les Noces' (produced in Paris, June 1923), 'Pulcinella,' a ballet on music by Pergolesi in a modernised setting (1919; produced in Paris, May 1920), and 'L'Histoire du soldat' (published 1920).

Of later date still are the 'Concertino' for string quartet, the symphony for wind instruments, dedicated to the memory of Debussy, and the opera in one act, 'Mavra,' based on a tale by Pushkin, where the composer reverts to the traditions, if not to the actual forms, of the *bel canto*. It is in the latter work and in 'Pulcinella' that Stravinsky's recent affectation of facing two ways at once first manifests itself clearly. In 'Mavra' he claims spiritual kinship with Glinka and Tchaikovsky, in 'Pulcinella' he makes actual use of music by Pergolesi, while his own personality remains uppermost in either work. 'Mavra' was a failure, but the revival of an 18th-century Italian scenario with music of the same period, presented in a modern version that sparkles with humour and technical adroitness, is brilliantly successful in spite of the fact that the old and the new elements fail to blend. Less satisfactory is the first piano concerto, where the composer professes to write in the style of Bach. If the pretence of taking that master for its model is left out of account, the work is dreary and hollow; compared with Bach it is too completely lacking in the latter's spirituality to be taken seriously and too devoid of wit to be amusing as a parody.

Thanks to the extensive tours undertaken by

the 'Russian Ballet,' Stravinsky made his first successes outside Russia, more particularly in France and England. He left his native country at an early age, and has since lived in Paris and at various places round the Lake of Geneva.

The dominating principle that governs the art of Stravinsky from 'Petrushka' onward, is his belief that music should make a purely physical appeal to the hearer, and should be free from any literary and pictorial associations which address themselves to the intellect. It may appear curious that his chief output should fall into the domain of the ballet, a form of art in which music is apt to assume a subordinate function; but it is precisely in his mature works of this type that we may observe how his music is raised from the subsidiary form of a mere accompaniment to the dignity of an independent organism by being made to appeal exclusively to the senses, while the scenario occupies the mind. The composer's intention is that these two entities should make their impression simultaneously on two distinctly separate human faculties, and that they should thus assist each other without servility on either side. We find that a ballet like 'Le Sacre du printemps' can be staged at will in a realistic or a fantastic manner, without regard for the music, and that in works like 'Renard' and 'L'Histoire du soldat' a series of musical pieces are used whose form is in no way determined by the stage action. In 'Les Noces' the running accompaniment of solo song and chorus is to all appearance entirely irrelevant to the subject of the dances, but nevertheless produces a similar mental and emotional reaction.

The composer sees no reason why an impression that is already conveyed by one art should be merely duplicated by another. A fine poem, to him, gains nothing by being set to music, and this explains how, in his later songs, he came to choose words which in themselves possess no beauty and very little sense. The 'Pribaoutki,' the 'Berceuses du chat,' the '4 Chants russes' and the '3 Histoires pour enfants' are all written to childish or simple popular texts of no literary significance. The early 'Pastorale' for voice and piano has no words at all.

Stravinsky's art in its later stages obeys no rules but those of its own making, and these again are subject to no definite system. His music is far from shapeless, but questions of form are invariably determined by the nature of the work itself, and not by any rigid patterns deliberately chosen beforehand. Nor is Stravinsky's harmony subject to any laws of progression or combination. He shuns no dissonance and avoids no orthodox chord if it happens to serve his purpose. No mode of expression is considered illegitimate by him, so

long as a desired effect can be gained by it, but it must always remain a means to an end, for Stravinsky never sets out to startle his hearers at any price, as he has been unjustly accused of doing. On the other hand, he is frequently experimental, and has allowed the publication of some smaller works which will probably be regarded by future generations as little more than unimportant essays in the new media subsequently exploited by him in more significant compositions. This is not to say, however, that any of the published works are lacking in finish from the technical point of view: Stravinsky handles his material with remarkable virtuosity even where he fails to reach his ultimate aim with complete success.

Everything that Stravinsky writes is admirably suited to the medium for which it is intended. He is obviously incapable of inventing a musical phrase without simultaneously realising the particular instrument it calls for. His orchestral scores are not only full of colour and brilliance, but they have a thematic variety that is the direct outcome of his feeling for the peculiarities of each instrument. In the later works he frequently uses very small orchestral combinations, which are capable of bringing to light instrumental characteristics with still greater lucidity. These transparent scores ('Japanese Lyrics,' 'Pribaoutki,' 'L'Histoire du soldat,' 'Pulcinella,' 'Ragtime,' etc.) have in their turn led to new discoveries in the way of harmonic and thematic combination. The composer found, for instance, that a chord played by a number of instruments of vastly different timbres has a far greater plasticity than one given to a group of closely related ones, the ear being enabled in the former case to hear each sound separately and to follow the melodic thread of each part more easily. Thus even in passages that proceed in harmonic blocks, the feeling of a sort of colour-counterpoint is gained, and the musical fabric acquires immense point and clarity.

A final estimate of Igor Stravinsky's work can scarcely be arrived at while it still continues to advance towards the ultimate solution of the problems that constantly arise out of its development; but there can be no doubt that a composer who provokes such bitter controversy must be a personality of exceptional strength, whose firm belief in his principles, be they right or wrong, is indisputable. Adverse criticism has, indeed, seldom denied his genius: arguments about his art are generally confined to the question whether his exceptional gifts are being properly employed.

The following is a complete list of Stravinsky's works up to 1925, each section being arranged as strictly as possible in chronological order:

ORCHESTRA

Symphony in E flat maj.
Faun and Shepherdess, 3 Songs for voice and orch.
Lament on the Death of Rimsky-Korsakov.
Scherzo fantastique.
Fireworks.
Suite from 'L'Oiseau du feu.'
Song of the Hauliers on the Volga, for wind instr.
The Song of the Nightingale, symphonie poem.
Suite from 'L'Histoire du soldat,' for small orch.
Ragtime, for small orch.
March, Valse, Polka and Galop, for small orch. (arr. from the pieces for PF, duet).
Symphony for wind instr.

DRAMATIC WORKS

The Firebird, ballet.
Petroushka, ballet.
Le Sacre du printemps, ballet.
The Nightingale, opera.
Renard, burlesque.
Les Noces, ballet with songs and chor.
The Song of the Nightingale, ballet.
L'Histoire du soldat, a story, told, acted and danced.
Pulcinella, ballet with songs, after Pergolesi.
Mavra, comic opera in 1 act.

CHAMBER MUSIC

3 Japanese Lyrics, for voice and instr.
Pribaoutki (Chansons plaisantes), for voice and 8 instr.
Berceuses du chat, for voice and 3 clarinets.
3 Pieces for str. quartet.
3 Pieces for clarinet solo.
Suite from 'L'Histoire du soldat,' for clarinet, vln. and PF.
Concertino for str. quartet.
Octet for wind instr.

PIANOFORTE MUSIC

4 Études.
3 Easy Pieces for PF. duet.
5 Easy Pieces for PF. duet.
Ragtime.
Piano Rag-Music.
Les Cinq Douces, very easy pieces on 5 notes.
Étude for pianola.
2 Concertos for PF. and orch.
Sonata (1925).

VOCAL WORKS

Faun and Shepherdess, 3 songs.
2 Songs: Spring (The Cloister)—A Song of the Dew.
2 Songs on Poems by Paul Verlaine.
Pastorale, wordless song.
3 Japanese Lyrics.
3 Russian Songs.
2 Songs on Poems by K. Balmont.
Canzons, 'Le Roi des collines,' for male voices and orch.
3 Histoires pour enfants.
4 Chants russes.
Pribaoutki (chansons plaisantes).
Berceuses du chat.

(See also under Dramatic Works.) E. B.

STREET, JOSIAH, a Yorkshire musician, who issued 'A Book containing great variety of Anthems in two, three, and four parts.' London, second edition, 1746. This was published by Joseph Lord of Wakefield. A previous edition is stated to be *circa* 1729, but this is probably too early. A later one is dated 1785. F. K.

STREICHER, (1) JOHANN ANDREAS (b. Stuttgart, Dec. 13, 1761; d. May 25, 1833), a professor of music in Vienna, and, by marriage with Nannette STEIN (see STEIN, (2) MARIA ANNA) the founder of the pianoforte-making firm in that city, derived from Stein of Augsburg, that was to become in course of time the famous house of Streicher und Sohn.

Streicher was a man of education and great intelligence, and was, moreover, distinguished by his friendship with Schiller. He brought up his son (2) JOHANN BAPTIST (b. Jan. 3, 1796; d. Mar. 28, 1871) to the business, and long before his death, resigned it to the son's complete control. Johann Baptist maintained the excellent traditions of his worthy predecessors; and when he died left his son (3) EMIL the proprietor of this historical business, the services of which in the improvement of pianoforte construction are duly recognised in the articles PIANOFORTE and STEIN. Ernst

PAUER (*qv.*) was a grandson of J. A. Streicher and Nannette Stein, and a great-grandson of the object of Mozart's admiration, J. A. Stein of Augsburg. A. J. H.

STRETTO (Ital.), literally 'close' or 'narrow' (Ger. *Engführung*), a term used in two ways. (1) In fugue it designates the following of response to subject at a closer interval of time than at first. (See FUGUE, subsection STRETTO.)

(2) The second use of the word occurs more especially in Italian opera, when towards the end of a piece the time is quickened, bringing the accents closer together.

STRIGGIO, ALESSANDRO (b. Mantua, c. 1535; d. there, after Sept. 22, 1587). In the judgment of his contemporaries he was a cultivated musician, an organist of renown, a fine lutenist and viola-player. Bartoli¹ writes that Striggio was most excellent in playing of the viola

'e far sentir in essa quattro parti a un tratto con tanta leggiadria e con tanta musica, che fa stupire gli ascoltanti,'

adding that his compositions were as musical and as good as any to be heard at that time; and Garzoni² mentions among famous players of various instruments 'il Striggio passato nel lauto.' From about 1560 Striggio was at Florence, attached to the court of Cosmo de Medici, who died 1574; on the title-pages of Striggio's works published in 1560, 1565-66 and 1569, he is described as

'gentilhuomo mantovano. Servitore dell' Illustrissimo et eccellentissimo Cosmo de Medici, Duca di Firenze e di Siena,'

but from 1570-85 he is merely 'gentilhuomo mantovano' and probably was living in Mantua at this later period. He was certainly there in 1574, the bearer of a letter dated Sept. 1, 1574, in which the Emperor Maximilian II. recommends Striggio, 'a man eminent in the art of music,' to the good offices of the Duke Guglielmo of Mantua, with the result that Striggio was released from a dragging lawsuit in which he had been involved.

Striggio was one of the first to compose music for the Intermedii in representations at court festivities. An interesting example and one of the earliest is *La Cofanaria, commedia di Francesco d'Ambrà, con gl' intermedii di G. B. Cini*, Firenze, 1566, written on the occasion of the marriage of Francesco de Medici with Johanna of Austria. Striggio set the first, second and fifth intermedio³ to music. A copy of this work is in the British Museum; on p. 16 a description of the music is given with a list of the instruments required, including:

- 4 Graviembali doppi.
- 4 Viole d' arco.
- 2 Tromboni.
- 2 Tenori di flauti.
- 1 Cornetto mute.
- 1 Traversa.
- 2 Leuti, a dolzaina, a storfina, and a ribecchino.

¹ *Ragionamenti accademici*, 1667, p. 376.

² *La piazza universale*, Venezia, 1585, p. 450.

³ For description of Striggio's Intermedii see *Mus. Ant.* III. 40.

In the *Dialoghi di Massimo Troiano* (Venetia, 1569), recounting the principal events in the festivities celebrated at the wedding of Wilhelm VI. of Bavaria and Renata di Loreno, mention is made (*Lib. 3, p. 147*) of a motet in 40 parts composed by Striggio, 'il quale fu degno d'ogni honore e laude'; it was written for 8 tromboni, 8 viole da arco, 8 flauti grossi, uno instrumento da penna, and un liuto grosso, and was twice performed before large audiences.

In a little book published at Florence in 1579, *Feste nelle nozze del sereniss. Dom Francesco Medici, e della sereniss. Sig. Bianca Cappello, da Raffaello Gualterotti*, p. 20, there is an allusion to the 'diverse musiche, con molte voci ed infiniti strumenti' composed by Striggio, that most excellent musician. He was also responsible for music to the first, second and fifth intermedio in the *Commedia* written for the wedding of Cesare d'Este and Virginia de Medici at Florence (Bastiano de' Rossi, *Descrizione*. Firenze, 1585).

Striggio also composed a great many madrigals; Morley in his *Plaine and easie Introduction*, 1597, p. 35, gives illustrations of various proportions in 'measured' music from Striggio's madrigal 'All' acqua sagra' for six voices, and also includes Striggio's name in the list of 'practitioners the moste parte of whose works we have diligently perused, for finding the true use of the moods.' Burney scored several of the madrigals: one, 'Invidioso amor' for five voices, from the 'Secondo libro de la muse', 1559, is in the British Museum, Add. MSS. 11,583; and another, 'Gravi pene' from 'Madrigali a 4 voci di Cipriano e Annibale', 1575, is in the Add. MSS. 11,588. Another of his madrigals, 'Chi fara fed' al cielo' for four voices, afterwards used by Peter Philips as a theme for a fantasia (in the 'Fitzwilliam Virginal Book,' i. 312), is to be found rather unexpectedly in a rare book published at Frankfurt in 1615, called *Les raisons des forces mouvantes avec diverses machines*, etc., par Salomon De Caus; in the account of 'La roue musicale (un orgue mécanique)' it is the 'pièce de musique qui est posée sur ladite roue,' and the music, the four parts scored, is reproduced on the back of plate 38.

The following works by Striggio were published, some during his lifetime, others after his death by his son Alessandro:

Di Alessandro Striggio, gentiluomo mantovano, servitore deli Illustriss. et eccellentiss. Cosmo de Medici, Duca di Firenze et di Siena. Il primo libro de madrigali a sei voci.

(The earliest edition of this book is not known; it was reprinted in Venice by Antonio Gardano in 1560, 1565, 1569, and later editions were published there by Francesco Rampazetto in 1566, by Girolamo Scotto and his successors in 1566, 1578 and 1585, and by Angelo Gardano in 1579 and 1592.)

Il secondo libro de madrigali a sei voci.

(This was also reprinted in Venice, by Girolamo Scotto and his successors in 1571, 1573, 1579 and 1582, and by Angelo Gardano in 1592: the earliest edition is unknown.)

Di Alessandro Striggio, gentiluomo mantovano, servitore, etc. Il primo libro de madrigali a cinque voci.

(Of this work again only reprints are known, by Antonio Gardano in 1560 and in 1569, by Scotto in 1560, 1566 and 1585, and by Fr. Rampazetto, circa 1566.)

Il secondo libro de madrigali a cinque voci di M. Alessandro Striggio, gentiluomo mantovano, nouamente posti in luce. In Vinea appresso Girolamo Scotto, 1570.

(It was reissued by Scotto in 1571, 1573, 1579 and 1583.)

Il terzo libro de madrigali a cinque voci del Sig. Alessandro Striggio, etc. Venetia, Angelo Gardano, 1590.

(Dedicated to the Duke of Mantua by Striggio's son Alessandro, who in alluding to his father, writes of this work 'd'uno che nacque suo suddito e viase al tempo seruatore della felice memoria del sereniss. Sig. suo Padre, che sia in gloria, e morì finalmente servendo l' A.V.')

Il quarto libro de madrigali a cinque voci, etc. Venetia, Angelo Gardano, 1596.

Il quinto libro de madrigali a 5 voci, etc. Venetia, Angelo Gardano, 1597.

(Both books edited by Striggio's son.)

Il cicalamento delle donne al bucato et la caccia di Alessandro Striggio, con un lamento di Didone ad Enea per sua partenza di Cipriano Rore, a 4, 5, 6 e 7 voci. Di nouo posto in luce per Giulio Bonagionta da San Gesei, musico della illus. Signoria di Giulio S. Marco, Vinea. Girolamo Scotto, 1567.

(Reprinted in 1569, and again in 1584, with a slightly different title.)

Il cicalamento delle donne al bucato e la caccia di Alessandro Striggio a 4, 5, 6 e 7 voci, con il gioco di primiera a cinque voci del medesimo, nouamente agiunto.

(This is a manuscript copy in five partbooks in Ch. Ch. Library, Oxford.)

Other MSS. are to be found in the libraries at

Berlin.—MS. Z, 28, dated 1599, a score of 'Faciem tuam' ('Nasce la penna') for six voices; the same composition in MS. Z, 35, a 16th-century lute-book. (Eitner.)

Bologna.—A 1613 MS. contains four madrigals for six voices in score. (Gasparini's Cat.)

Brieg.—Imperfect copies of 'Nasce la penna.' (Kuhn's Cat.)

Brussels.—Madrigals in MS. 2289. (Fétis, *Bibl. royale*.)

Leipzig.—Eight madrigals for six voices. (Prida's Cat.)

Milan.—Conservatoire.—A Mass for four voices and a Mass for five voices. (Canal.)

Modena.—Bibl. palatina. A canzone with lute accompaniment.

Munich.—MS. 218, dated 1628, 'Ad nitida' ('Chi fara') for five.

'Nascitur cum dolore' ('Nasce la penna mia') for six.

'Quae mulier' ('All' apparir') for eight voices. (Maier's Cat.)

Protestant Library.—In MS. 774 and 75, thirteen madrigals. (Eitner.)

R.O.M., London.—In MS. 1831, four partbooks of 17th century.

'Love hath proclaimed' for six voices. A lute piece in MS. 1964.

Upsala.—MS. J. mus. 108, a piece in organ tablature.

Zwickau.—MS. 739, dated 1587, 'Ecce beatum hominem' a 40

vocius in 4 chori, Bassone canato delle parti più

basse del 40 persone. Chorus I. eight voices;

Chorus II. ten voices; Chorus III. sixteen voices;

Chorus IV. six voices (Vollhardt's Cat.)

About 41 of Striggio's compositions were also published at Venice in collected works, ranging from the year 1559 to 1626. Five of his madrigals are in Torchi, *L'arte musicale in Italia*, vol. 1.

C. S.

(2) ALESSANDRO, son of the above, was a violin and lyre player at the court of Mantua, and is memorable in musical history as the author of the book of Monteverdi's 'Orfeo' (1607). He published certain of his father's madrigals (see list above).

STRIKING REED, a beating reed. One in which the vibrator or tongue strikes the face of the reed. (See REED and REED-STOP.) T. E.

STRINASACCHI, REGINA (b. Ostiglia, near Mantua, 1764; d. Gotha, c. 1823), was a distinguished violin and guitar player, educated at the Conservatorio della Pietà in Venice, and in Paris. From 1780-83 she travelled through Italy, and won great admiration by her playing, her good looks, and her attractive manners. She next went to Vienna, and gave two concerts at the National Court Theatre in the Burg on Mar. 29 and Apr. 24, 1784. For the second of these Mozart composed a sonata in B₇ (Köchel 454), of which he wrote out the violin-part complete, but played the accompaniment himself from a few memoranda which he had dashed down on the PF. staves.¹ The Emperor Joseph, noticing from his box above the blank look of the paper on the desk, sent for Mozart and obliged

¹ This interesting MS. came into the possession of F. G. Kurtz of Liverpool. Mozart filled in the complete accompaniment afterwards in an ink of slightly different colour from that which he first employed, so that the state of the MS. at the first performance can be readily seen. See Zahn, *W. A. Mozart*, 2nd ed. II. 25.

him to confess the true state of the case. 'Strinasacchi plays with much taste and feeling,' writes Mozart to his father, who quite agreed with him after hearing her at Salzburg. 'Even in *symphonies*,' Leopold writes to his daughter, 'she always plays with expression, and nobody could play an adagio more touchingly or with more feeling than she; her whole heart and soul is in the melody she is executing, and her tone is both delicate and powerful.' In Vienna she learnt to appreciate the gaiety of Haydn's music, so congenial to her own character. She played his quartets before the court at Ludwigslust, and also at Frau von Ranzow's, with peculiar naïveté and humour, and was much applauded for her delicate and expressive rendering of a solo in one of them. She is also said to have been an excellent guitar-player. She married Johann Conrad SCHLICK (*q.v.*), a distinguished violoncellist in the ducal chapel at Gotha. The two travelled together, playing duets for violin and violoncello, and appeared at Leipzig between 1793 and 1800. The last concert spoken of in the *Leipziger Zeitung* was at Rome in 1809. Schlick died at Gotha in 1825, two years after the death of his wife.

C. F. P., with addns.

STRING (Fr. *corde*; Ger. *Saite*; Ital. *corda*), a slender length of gut, silk, or wire, stretched over raised supports called bridges, between which it is free to vibrate. When weighted to resist the drawing power or tension, the rapidity of its transverse vibrations depends upon the tension, the length, and the specific gravity of the material; and in exact ratio with this rapidity the ear is sensible of the difference of musical pitch. From the 6th century B.C. the MONOCHORD (*q.v.*) or single string, stretched over a sound-board and measured by movable bridges, has been the canon of musical intervals, the relative scale pitch. The string by itself would give but a faint tone in the surrounding air, and a sound-board is necessary to reinforce the tone, and make it sufficiently audible.

Of the materials employed for strings, silk has been much used in the East, but in European instruments gut and wire have had the constant preference. Gut (*χορδή* in Greek, whence the familiar 'chord') was the musical string of the Egyptians, Greeks and Romans; wire was practically unknown to them, since wire-drawing was invented only about A.D. 1350, synchronising with the probable invention of keyed instruments with strings, such as the clavichord, harpsichord, or virginal. From that epoch gut and wire have held divided rule, as they do in our own day in the violin and the piano. The general name for gut strings is catgut,¹ but it is really made from the intestines of sheep and goats, chiefly the former; the best and strongest being of lamb's gut when the lamb is of a certain age and development, whence it

comes that September is the month for fiddle-string making; particularly for first (or E) fiddle-strings, which are the smallest though they have to bear the greatest strain of the four. For the deeper-toned strings the gut is overlapped with silver, copper, or mixed metal. According to J. Rousseau (*Traité de la viole*, 1687) this loading of the string was introduced in France by Sainte Colombe about A.D. 1675. The tension of the four strings of a violin was stated by Tartini, in 1734, to be 63 lb.

Wire strings were originally of latten or brass, with which psalteries and dulcimers were strung. As late as the first half of the 18th century, clavichords were generally strung with brass wire only; pianofortes retained a batch of brass strings until about 1830. Steel wire, as the special iron music-wire was called, was, however, very early introduced, for Virdung (*Musica getutscht und ausgezogen*, A.D. 1511) expressly states that the trebles of clavichords were then strung with steel. Early in the 19th century Nuremberg steel was in great request, but about 1820 the Berlin wire gained the preference. The iron of both came from the Harz Mountains. About 1834 Webster of Birmingham brought out cast steel for music wire, and gave piano strings a breaking weight of about one-third more than the German. But in 1850 Miller of Vienna was able to contend for the first place, and in the following year actually gained it at the Great Exhibition, for cast steel wire-drawing. After that, Pöhlmann of Nuremberg came forward and was considered by some experts to have surpassed Miller.² Webster's firm was not idle during a competition to the results of which the present power of the pianoforte to stand in tune owes so much. A trial made under direction of the writer gives for average breaking weight of 24 inches, of No. 17½ wire, Pöhlmann's 297 lb., Miller's 275 lb., Webster and Horsfall 257 lb., all nearly doubling the tension required for use. It is not, therefore, with surprise that we accept the eminent authority of Dr. William Pole, who regarded cast steel music-wire as the strongest elastic material that exists. The earliest covered piano strings, about a hundred years ago, spun in long interstices of brass over steel, have in time become close spun in single, double, and even treble overlays of copper, or mixed metal composed of spelter and copper, gaining in the largest strings a diameter of 0.21 of an inch, and considerable power of strain. The greatest tension of a string recorded by Messrs. Broadwood in the technical part of their Exhibition book of 1862 is 315 lb.—for the *highest* single string of a concert grand. They give the whole tension at that time for Philharmonic pitch (*viz.* A 454, C 540 double vibrations per second) of two of their

¹ The origin of the term catgut has not yet been traced. G.

² Unpublished correspondence of Theobald Böhm, the flautist, shows that Pöhlmann was indebted to him for improving his manufacture.

concert grands, as well as the tension of each separate note. The first of the two is 34,670 lb. (15 tons 9 cwt., etc.); the other, a longer scale, 37,160 lb. (16 tons 11 cwt., etc.). In later years tension was much increased, but not sufficiently so to account for the much higher totals or for the breaking-weights of wire recorded in Mendel's *Lexikon*. (See A. J. Hipkins's *History of the Pianoforte*, pp. 39, 83, 86.)

A. J. H.

STRINGENDO (Ital.), 'forcing, compelling'; pressing or hastening the time. This word conveys, besides the idea of simple acceleration of pace, that of growing excitement, working up to some climax.

M.

STRING-PLATE (Fr. *sommier en fer*; Ger. *Anhängeplatte, metallner Saitenhalter*; Ital. *cordiera*). The iron plate on the hitch-pin block of pianofortes to which the farther ends of the strings are attached. Formerly it formed with the tension bars the metal framing of the instrument. The frame made in a single casting has superseded the separate string-plate. See under PIANOFORTE, the section on the modern frame.

STRINGS. A term used colloquially to mean the bowed stringed instruments used in the orchestra: violins, violas, violoncelli and double basses. (See VIOLIN FAMILY.)

It is similarly used in combination with other words, e.g. string quartet (Fr. *quatuor à cordes*; Ger. *Streichquartett*) means a body of four bowed stringed instruments (normally 2 violins, viola and violoncello).

STROGERS (STROWGER), E. (early 16th cent.), English composer. An organ score of a *Miserere* by him is in the British Museum (Add. MSS. 29,996/6b). This MS. is in the hand of John Redford (*d. circa* 1545). Two 5-part madrigals by him, in Italian tablature, 'If the, my dere' and 'By croked ways,' are also in the British Museum (Add. MSS. 31,992/51b, 52b). Add. MSS. 31,390 contains a collection of In Nomines, fancies and arrangements of anthems, madrigals, motets, etc., for 5 viols by 16th cent. (chiefly English) composers and includes 2 In Nomines by Strogers. The treble viol parts of two others for 5 viols and two more for 6 are in B.M. Add. MSS. 32,377/18b, 19b (*c. 1584*). Some of the compositions attributed to Nicholas STROGERS (*q.v.*) are possibly by E. Strogers.

J. M^r.

STROGERS, NICHOLAS (late 16th and early 17th cent.), English organist and composer. Two In Nomines and a piece 'upon ut re my fa soul la' for organ are at Oxford (Ch. Ch. 371), as well as a soprano solo, 'O doleful deadly pang,' with accompaniment for 5 instruments (Ch. Ch. 984-8). He contributed a fantasia to the 'Fitzwilliam Virginal Book,' and a galliard to Jane Pickering's Lute Book, *c. 1616* (B.M. Egerton MSS. 2046/17). His Morning and Evening Service in D is one of the 'six services

for the Kings Royall Chappell' included in Benjamin Cosyn's Virginal Book. The canto, alto and tenor parts of a pavan for 5 viols by him are in the British Museum (Add. MSS. 30,826-8). A 6-part In Nomine arranged in Italian tablature (B.M. Add. MSS. 29,426/55b —after 1611) is probably his also, but with regard to two pieces 'Poore downe' and 'The world is a world' in the Batten Organ Book, as well as some Latin church music, it is not certain whether he is his or the work of E. STROGERS (*q.v.*). (See *Mus. Anth.* iv. 113.)

SERVICES, ETC.

First Whole Service. (V.; T.D.; B.; K.; C.; M.; N.D.) B.M. Add. MSS. 29,289/46. Altus part only.
Whole Service in D. (T.D.; B.; K.; C.; M.; N.D.) B.M. Add. MSS. 17,764/105. Bass part only.
Whole Service (of 4 parts in D min.). (T.D.; B.; K.; C.; M.; N.D. and Deus Misericord.) B.M. Add. MSS. 30,085/41. Score.
Short Service, 4. (V.; T.D.; B.; C.; K.; M.; N.D.) Barnard. Benedictus. B.M. Add. MSS. 17,868/12. Tenor part only.
Magnificat, fragments (*Eurientes, a 3*, *Sicut locutus, a 2*). Ch. Ch. 45/33, 40.

STROHMEYER, CARL (*b. Stollberg district, 1780; d. Weimar, Nov. 11, 1845*), a bass singer, a Kammersänger at Weimar, who sang in a festival at Frankenhäusen in June 1810, and is mentioned by Spohr for the extraordinary compass of his voice from D to g' (see Spohr's *Selbstbiographie*, i. 142). He was employed successively at Gotha and at Weimar.

G.

STROLLERS, THE, see DUBLIN.

STROLLING PLAYERS' AMATEUR ORCHESTRAL SOCIETY, THE, was founded in 1882 by Norfolk Megone, who gave up his position as conductor of the School of Mines Orchestra to fulfil the duties of honorary conductor. He remained at the head of the Society's operations for 20 years, being succeeded in 1902 by William Shakespeare, who conducted till 1905, when Joseph Ivinney was appointed. The first concert was given Dec. 13, 1882, at the School of Dramatic Art, Argyll Street, London. Soon afterwards St. James's Hall was used for the 'Ladies' Concerts,' the smoking concerts being held in St. Andrew's Hall, Newman Street. Subsequently the concerts of both kinds have been given in the Queen's Hall. The president is H.R.H. the Duke of Connaught, and the hon. secretary is Miss W. M. Elder. During the war 1914-18 many concerts were given for war charities and for the entertainment of soldiers and sailors.

M.

STRONG, GEORGE TEMPLETON (*b. New York City, May 26, 1856*), an American composer whose career has been made chiefly in Europe. Both of his parents were musical. His mother was a good pianist and sang agreeably, and his father, G. T. Strong, a lawyer associated with

the corporation of Trinity Church and a trustee of Columbia College, was an amateur organist, and for four years was president of the Philharmonic Society of New York (*q.v.*). In 1879 he went to Leipzig, where he entered the Conservatorium, abandoned the oboe in favour of the viola, studied harmony with Richard Hofmann, counterpoint and fugue with Jadassohn, and horn with Gumbert of the Gewandhaus orchestra. In Leipzig he belonged to the coterie of Liszt champions of which men like Siloti, Friedheim, Dayas and Krause were members, and frequently visited that master in Weimar. From 1886–89 he lived in Wiesbaden, associating much with his friend and fellow-countryman MacDowell, and falling under the influence of Raff. He then settled at Vevey, Switzerland, having spent one year (1891–92) in the United States as teacher at the New England Conservatory of Music in Boston. In Vevey he turned his thoughts for a time to water-colour painting, and founded the *Société Vaudoise des Aquarellistes*, having become discouraged by the failure of American composers to find recognition in their native land. Of Strong's published pieces the most important are two for soli, male chorus, and orchestra: 'Wie ein fahrender Hornist sich ein Land erblickt,' op. 26, and 'Die verlassene Mühle,' op. 30, and a symphony entitled 'Sintram,' based on de la Motte Fouqué's romance of that name and Dürer's famous print 'Ritter, Tod und Teufel.' A symphonic poem 'Undine' and a symphony 'In den Bergen' have been successfully played at home and abroad. A considerable number of chamber music pieces, two 'American Sketches' for violin solo and orchestra, a short dramatic cantata, arrangements for four hands pianoforte of some of Bach's organ works, songs, instrumental soli, etc., remain in manuscript. Later works include a third symphony, 'An der See,' a symphonic idyll, 'An der Nixenquelle' (2 PF.s), 'Knights and Dryads' (soli, choir and orch.) and various pieces for piano. A humorous trio (2 vlns. and vla.) called 'A Village Music-Director' was played by the Flonzaley Quartet in America in 1917.

H. E. K.; addns. *Amer. Supp.*

STROUD, CHARLES (*b. circa 1705; d. Apr. 26, 1726*), was educated as a chorister of the Chapel Royal under Dr. Croft. After quitting the choir he officiated as deputy organist for his instructor and became organist of Whitehall Chapel. He was buried in the west cloister of Westminster Abbey. He is known as a composer by his beautiful anthem, 'Hear my prayer, O God,' included in Page's 'Harmonia sacra,' and long a favourite in English Cathedrals.

W. H. H.

STROZZI, BARBERA, a 17th-century Venetian lady, the adopted daughter of the poet Giulio Strozzi. Nicolo Fontei, who composed his 'Bizzarrie poetiche' for her in 1636, calls her a 'virtuosissima cantatrice.' She was her-

self a talented composer, who wrote 5 books of cantatas, ariettas and duets, 1 book of madrigals, 2-5 v., 1 book of sacred songs for one voice basso continuo, published between 1644 and 1664, also single numbers in collective volumes (*Q.-L.*).

STRUNGK, (1) DELPHIN (*b. 1601; d. Brunswick, 1694*), was a capable organist, and held posts successively at the Wolfenbüttel Hauptkirche, 1630–32; at Celle, and at the church of St. Martin, Brunswick. In a complimentary dedication to the Burgomaster of Brunswick of his work on music published in 1652, Conrad Matthaei alludes to 'der sehr berühmte Organist, Herr Delphin Strungk.'¹

Strungk composed music for the organ—an example is printed in Ritter's *Geschichte des Orgelspiels*, 1884, ii. 207, a Choralvorspiel in 4-part writing 'Lass mich dein sein'; Max Seiffert published two more. In a Lüneburg MS. there are six of these organ arrangements²; other compositions for voices with instruments, as well as a Choralvorspiel, are in MS. in Berlin. In the Wolfenbüttel Library is an autograph MS. of music for five voice and eight instrumental parts, composed in June 1671,

'Musikalischer Glückwunscher Zurfuff (Kommt und sehet die Werke des Herrn) als . . . Rudolphus Augustus, Herzog zu Braunschweig und Lüneburg in der Erbhuldigungsstadt Braunschweig den Gottesdienst in der Kirchen zum Brüdern erstesmahls beigewohnt.'

His son,

(2) NICOLAS ADAM STRUNGK (or STRUNCK) (*b. Celle, Nov. 1640; d. Dresden, Sept. 23, 1700*) studied music with his father and at the age of 12 was acting as organist at the Magnuskirche, Brunswick. Later he entered Helmstadt University, and worked there for some years, taking violin lessons in the vacations from Schnittelbach of Lübeck. In 1660 he was appointed first violin in the Wolfenbüttel Hofkapelle, but changed subsequently to a similar post at Celle, with a yearly salary of 200 thalers. In 1665 he joined the Hofkapelle of the Elector Johann Friedrich of Hanover.

About this time he paid his first visit to Vienna, and played the violin before the Emperor Leopold I. In 1678 he was appointed director of music in Hamburg, where a great effort was being made to foster German musical talent, long overshadowed by Italian influences. There he wrote and produced many operas: 'Der glückselig-steigende Sejanus,' and 'Der unglücklich-fallende Sejanus' in 1678, the German libretto by Christoph Richter being adapted from the Italian of Nicola Minato; 'Esther,' 'Die drei Töchter Ceroops,' 'Doris' and 'Alceste' in 1680; 'Theseus,' 'Semiramis' and 'Floretto' in 1683.

Friedrich Wilhelm of Brandenburg, when visiting Hamburg, tried to secure Strungk's services as Kapellmeister, but this was not allowed,

¹ Vogel, *Handschr. zu Wolfenbüttel*, 1890, p. 182.

² Prof. Jungmann, *Bach als Schüler*, 1870.

Hanover having a prior claim. The Elector Ernst August appointed Strungk chamber organist, and presented him to a canonry at Einbeck, and eventually Strungk accompanied him to Italy and remained there some time. It was at Rome that the meeting between Strungk and Corelli took place, so graphically described by Hawkins (ed. 1875, vol. ii. p. 676). Strungk again visited Vienna, this time playing on the clavier before the Emperor with much success. From 1682–86 he remained a member of the Hanover Hofkapelle, but on Jan. 26, 1688, Johann Georg II. of Saxony appointed him Kammerorganist and vice-Kapellmeister to the Dresden Hofkapelle, with a salary of 500 thaler. He was the successor of Carlo Pallavicini, who died on Jan. 29, leaving an unfinished opera which Strungk was asked to complete. The libretto was by Pallavicini's son, Stefano. Strungk apparently contributed the music to the third act, and the opera, 'L'Antiope,' was performed four times in Feb. 1689, at Dresden. Strungk seems to have suffered at Dresden from the usual friction between the Italian and German musicians, although the Germans were gradually gaining the upper hand, for on Mar. 30, 1688, Elector Johann Georg III. was appealed to because the Italians refused to join in any performance of Strungk's compositions, and would only acknowledge his authority when Bernhard the Kapellmeister was absent through illness. This resulted in the dismissal of the ringleader Fedeli in the following September. Bernhard died on Nov. 14, 1692, and was succeeded by Strungk, who composed some music in his memory.

On June 13, 1692, Strungk obtained permission from Johann Georg IV. of Saxony to found an opera-house in Leipzig. With the aid of two associates, Glaser and Sartorio, an architect, the work was put in hand in Mar. 1693, and a theatre of wood was erected in the Brühl, at a cost of 10,000 thaler. It was opened on May 8, 1693, with Strungk's opera 'Alceste'; the German libretto by Paul Thiemich was adapted from the original Italian of Aurelio Aureli. A contemporary chronicle¹ narrates that pictured announcements were suspended in the streets of Leipzig, giving a description of the opera, and the time of its performance. Johann Georg IV. came from Dresden to be present at the opening performance. In 1693 Strungk's opera 'Nero' was also given, and his 'Agrippina' in 1699. Strungk was financially much embarrassed by his Leipzig undertaking, although he retained his Dresden post and salary until 1697, when he retired with a pension. His daughters Philippine and Elisabeth were two of the principal singers in the Leipzig theatre from 1705–09.

Very little of Strungk's music is known at the present day, and it nearly all remains in MS.

¹ *Leipzigerisches Geschicht-Buch*, 1714, p. 883.

He composed a 'Ricercar auf den Tod seiner Mutter, verfertigt zu Venedig am 20. Dec. 1685,' also 'Die Auferstehung Jesu,' first performed on Apr. 21, 1688; and he published at Dresden in 1691—

'Musikallische Übung auf der Violin oder Viola da gamba, so wohl zur Ehre Gottes als menschlicher Ergötlichkeit bestehend, in etlichen Sonaten über die Festgesänge, dann auch etliche Ciaconen mit zwei Violinen.'

A selection of his opera airs was published in Hamburg, 1684—

'Ein hundert auserlesene Arien zweyer Hamburgischen Opern, Semiramis und Esther. Mit beigefügten Ritornellen.'

A MS. copy is in the Königsberg Library as well as some MS. Choralvorspiele also attributed to Strungk, although they may be the work of his father, Delphin Strungk (see Müller's Cat.). MS. copies of a sonata for two violins and viola da gamba, and a sonata for six strings, are in the Upsala Library. Various MSS. are also in the Berlin and Dresden Libraries, and in the Wolfenbüttel Library, MS. 253 'Les Aires avec les Flauts douces pour son Altesse Serenissime monseigneur le Prince Ludwig Rudolf, Duc de Bruns. et Lüneberg,' containing ten numbers, chiefly dances. C. S.

BIBL.—MAX SEIFFERT, *Zur Biographie Delphin Strungk's*. A.M. Jan. 1920; FRITZ BEREND, *Nicholas Adam Strungk, 1649–1709. Sein Leben und seine Werke, mit Beiträgen zur Geschichte der Musik und des Theaters in Celle, Hannover, Leipzig*. Freiburg i. B., 1916.

STRUTIUS (STHROCUS), THOMAS (b. Rathenow, Brandenburg; d. Danzig, 1678), organist at Stargard in 1603, of Holy Trinity, Danzig, in 1656, and of S. Mary's, Danzig, in 1668. In all his works he gives prominence to the Choral which he strives to present in its most artistic form. Winterfeld counts him among the best composers of his time. He composed psalms, sacred songs, etc., also a sonata for eight instruments (1658) (Q.-L.).

STUBBS, SIMON (late 16th and early 17th cent.), English composer of church music. He contributed several settings to Ravenscroft's 'Whole Book of Psalms' (1621), as well as the first two anthems in the list of his music below to Thomas Myriell's collection 'Tristitiaee remedium' (1616).

STUCK, JOHANN BAPTIST, see BATISTIN, Jean.

STUCKEN, FRANK VAN DER (b. Fredericksburg, Texas, Oct. 15, 1858), American conductor and composer, of German and Belgian parentage. Educated in Europe, he numbered among his teachers Benoît, Reinecke and Grieg. In 1884–95 he was conductor of the Arion Society (male chorus) of New York, and in 1892 he took that organisation on a tour of Germany. He was also active as an orchestral conductor during those years and was the first to present 'all-American' orchestral programmes. In 1895–1903 he was director of

the Cincinnati College of Music, and (1895-1907) conductor of the Cincinnati Symphony Orchestra. In 1906-12 (and also in 1923) he was conductor of the Cincinnati Music Festival, succeeding Theodore Thomas, and he has conducted numerous other festivals both in Europe and America. Since 1908 he has spent much of his time in Europe.

In addition to an opera, 'Vlasda' (Weimar, 1883), his compositions include :

Incidental music to 'The Tempest.'
Prologue to Heine's 'William Ratcliff,' orchestra, op. 10.
'Pax Triumphans,' symphonic prologue, op. 26.
'Louisiana,' festival march, orchestra, op. 32.
Other orchestral pieces, choral music and many songs.

W. S. S.

STUDIES, see ÉTUDES.

STURGEON, NICHOLAS (*d. circa 1454*), English ecclesiastic and composer of church music. He was prebendary of Reculverand in 1440, and two years later became a canon of Windsor. In July of this year he also became precentor of St. Paul's, but still held office at Windsor, as he became steward there in 1443, and was in residence in 1444 and more or less continuously from 1446-52, when he obtained the prebend of Kentish Town in St. Paul's.¹ He is important in that he either possessed or wrote out the 15th century MS. preserved at the College of St. Edmund's, Old Hall, near Ware, Herts, which contains music by members of the English Dunstable group of composers. The MS. was probably connected with St. George's Chapel, Windsor, and Sturgeon's compositions, which each bear his name, are :

* Et in terra pax '—3 settings a 3 v.
* Patrem omnipotentem '—2 settings a 3 v.
* Sanctus '—a 3 v.
* Et in Nomine Domini '—a 3 v.

J. M^{rs}.

STURGES, EDWARD, see TURGES.

STURTON (TURTON), EDMUND (late 15th and early 16th cent.), English composer of church music. He is probably the 'Turton' who was clerk and instructor of the choristers at Magdalen College, Oxford, in 1509-10, when he received 3s. 4d. and 4s. 10d. 'pro notacione diversorum cantorum.'² An Ave Maria by him is at Lambeth, and he is the composer of a 6-part 'Gaude Virgo Mater,' one of the 43 hymns to the Virgin, preserved in an early 16th century MS. in the library of Eton College. He is referred to by Morley in his *Plaine and Easie Introduction* (1597).

J. M^{rs}.

SUB. The Latin preposition 'under' is used in connexion with the organ, and denotes the octave below, as 'Sub Bass,' 'Sub Octave couples,' etc. (See COUPLER.)

SUBDIAPENTE. A polyglot word, part Latin, part Greek, to signify a fifth below, just as 'Epidiapente' signified a fifth above. A 'Canon in Subdiapente' was a canon in which the answer was a fifth below the lead. Similarly 'Subdiatessaron' is a fourth below, and 'Epidiatessaron' a fourth above.

G.

SUBDOMINANT, the fourth note of the scale upwards. The note below the dominant, as F in the key of C. The radical bass of the penultimate chord in the Plagal CADENCE (*q.v.*). When groups of movements are balanced together in threes the central one is most frequently in the key of the subdominant, as in sonatas of three movements, the minuet and trio form, marches, vales, etc. In the actual body of a large movement in forms of the sonata order, the key of the subdominant is not antithetically acceptable, and examples of its occurrence in modern music as the key of the second section or second subject are extremely rare, and evidently not well advised. But in dependence on the tonic key it is one of the most important of harmonic centres, and digressions in that direction are very common in modern music (cf. FORM; SONATA).

C. H. H. P.

SUBJECT (Fr. *sujet*; Ital. *tema*, *sogetto*; Ger. *Thema*, *Subjekt*) is used generally to mean a phrase of melody, with or without harmony, of sufficient distinction to be regarded as a musical thought.

Every species of musical FORM (*q.v.*) is dependent for consistency on the use of subjects of one kind or another, and the history of musical form is largely concerned with the increasing clearness in articulating the subjects, from the rhythmless adoption of *canti fermi* by mediæval composers to the incisive rhythmic figures of the classical era (see CANTO FERMO and FIGURE). The whole of the fugal style of writing is generated by the recognition of one or more prevalent subjects as a starting-point. The immanence of the subject is as important to the free use of IMITATION (*q.v.*) in the modern style as it was to the strict writers of FUGUE (*q.v.*). Each form (see SONATA; SYMPHONY; SUITE) has had its own kinds of subjects suitable to its special method of development.

C.

SUBMEDIANT, the sixth note of the scale rising upwards. The note next above the dominant, as A in the key of C. The submediant of any major scale is chiefly brought into prominence as the tonic of its relative minor.

C. H. H. P.

SUCCESSOR, *i.e.* sub-cantor, a cathedral officer, deputy to the precentor. His duty is to supply his principal's place during absence, in the regulation of the service, and other duties of the precentor.

G.

SUCH, (1) HENRY (*b. London, Mar. 31, 1872*), violinist, son of Edwin C. Such, Mus.B. He began studying at the age of 6, and made his first public appearance when 8 years old. Following the advice of Joachim he entered the Hochschule at Berlin in 1885, remaining there till 1892, in which year his first public appearance in Berlin was successfully made. After touring in Germany he studied during 1895-96

¹ W. Barclay Squire, *Sammelb. Int. Mus. Ges.* vol. II.
² *Ibid.* *Archæologia*, vol. IV.

with Wilhelmj, and again travelled in Holland and Scandinavia. He then visited Vienna, meeting and playing with Brahms, and in 1896 made two public appearances with Richter conducting. Settled in London in 1898, and was appointed professor at the Guildhall School of Music. He has a large repertory and an excellent technique. His violin is one of the Stradivari instruments formerly possessed by Paganini.

(2) PERCY FREDERICK (b. London, June 27, 1878), brother of the above, went to Berlin in 1887 and studied the violoncello under Otto Ludemann, pupil of Robert Hausmann, who accepted him as private pupil in 1889, and continued to give him lessons when he joined the Hochschule in 1892. In the latter institution he remained until 1898, having the advantage of lessons in ensemble-playing from Joachim. His first public appearance in Berlin was with the Philharmonic Orchestra in 1898. Besides playing as soloist, he assisted the Joachim Quartet as second violoncello at many concerts in Germany and Holland, including the Beethoven Festival at Bonn in 1899. He appeared in London first at St. James's Hall with the Joachim Quartet in 1901, and followed with a series of recitals. Held the post of principal violoncello during the two final seasons of the Popular Concerts. His training and purity of style fit him especially for the performance of chamber music. He plays upon an exceptionally fine Gagliano violoncello. W. W. C.

SUCHER, JOSEF (b. Döbör, Eisenburg, Hungary, Nov. 23, 1844; d. Berlin, Apr. 4, 1908), was brought up in the Löwenburg Konvikt at Vienna, as a chorister in the Hofkapelle, which he joined on the same day with Hans Richter, the conductor. On completing his course at the Konvikt he began to study law, but soon threw it aside, worked at counterpoint with Sechter, and adopted music as his profession. Beginning as sub-conductor of a Singing Society in Vienna, he advanced to be 'Repetitor' of the solo singers at the imperial court Opera, and conductor at the Comic Opera, and in 1876 went to Leipzig as conductor of the City Theatre. In the following year he married ROSA HASSELBECK (b. Velburg, Feb. 23, 1849; d. Berlin, 1927), the then prima donna of the same house. Her first engagement was at Trèves. Thence she went to Königsberg and thence to Berlin and Danzig, where she was engaged by her future husband for Leipzig. From Leipzig in 1879 husband and wife went to Hamburg, where they settled as conductor and prima donna, and where the latter attracted immediate attention by her performance of Chryssa in Rubinstein's 'Nero.' They visited England in 1882, and Mme. Sucher proved her eminent qualities both as a singer and an actress by the extraordinary range of parts in which she appeared at the German opera at

Drury Lane. She made her début as Elsa on May 18, and besides singing as Elizabeth and Senta, she sang Eva on May 30, and Isolde on June 20, on the respective productions in England of 'Die Meistersinger' and 'Tristan,' and as Euryanthe on the revival of that opera. Her husband produced a 'scene' or cantata entitled 'Waldfräulein' ('The Wood Maiden') for soli, chorus and orchestra, at the Richter Concert of June 5. Sucher's early compositions had included songs, masses, cantatas and overtures, one of which, to an opera called 'Ise,' was brought forward at a concert in Vienna in 1873. One of his best-known published works is a Liedercyclus entitled 'Ruheort.' Frau Sucher gained great renown by her singing of Isolde at Bayreuth in 1886. From 1888-99 Sucher was conductor at the Hofoper at Berlin.

Frau Sucher, after successful performances of Kundry and Eva at Bayreuth in 1888, became a prima donna at Berlin, where she remained until 1898, as a noted Wagner singer. On leave of absence, she sang at Bayreuth and other cities of Germany, and in 1892 sang both at Covent Garden and Drury Lane as Brünnhilde in 'Siegfried,' and once as Isolde, and was warmly received. She would have played Isolde again but for a peremptory recall to Berlin, where her services were urgently required. On Nov. 3, 1903, she took a final farewell of the stage at Berlin as Sieglinde. She wrote a book of reminiscences, *Aus meinem Leben*, in 1914. A. C.

SÜSSMAYER,¹ FRANZ XAVER (b. Steyer, Upper Austria, 1766; d. Sept. 16, 1803), composer and Kapellmeister, educated at the monastery of Kremsmünster, where he attempted composition in several branches. Some MS. operas still existing at Kremsmünster are mentioned in Q.-L.

At Vienna he had instruction from Salieri and Mozart. With the latter he formed the closest attachment, becoming, to use Seyfried's expression, 'the inseparable companion of the immortal Amphion.' Jahn details the work he did for the 'Clemenza di Tito' on its production at Prague, whether he accompanied Mozart. Süssmayer was at the composer's bedside the evening before Mozart's death, while the latter tried to give him the necessary instructions for completing his Requiem, a task for which he was peculiarly fitted by his knack of imitating Mozart's handwriting. Jahn has stated in detail (ii. 172) how much of that work is in all probability Süssmayer's. (See MOZART, Vol. III. p. 566.)

As a composer Süssmayer's name (as 'pupil of Salieri and Mozart') first appears at Schikaneder's Theatre, where his opera 'Moses' was brought out May 4, 1792, revived in 1796, and again in concert form in 1800. This was

¹ He signs himself on a symphony SIESSMAYA.

followed by 'L' incanto superato,' a 'music-romantic fable' (Burgtheater, 1793), and by 'Der Spiegel von Arkadien' (Schikaneder's Theatre, 1794), libretto by Schikaneder, which became a favourite, and was enliterated by the *Wiener Zeitung*. He became in 1794 composer, and in 1795 Kapellmeister, to the Kärnthnerthor Court Theatre, where he produced successively 'Die edle Rache' (1795), 'Die Freiwilligen' (1796), 'Der Wildfang' (1797), 'Der Marktschreier' and 'Soliman der Zweite' (1799), 'Gulnare' (1800), and 'Phasma' (1801). His patriotic cantata, 'Der Retter in Gefahr,' was performed at an entertainment to the Vienna volunteers in the large Redoutensaal at a time of threatened war (1796), and several times repeated in the same building, and by the Tonkünstler-Societät. Süßmayer also composed two operas for Prague. Several of the above works were printed, some only in part, while others—masses, and smaller church-works, instrumental pieces, etc.—exist only in MS. Though wanting in depth and originality his works are melodious, and have a certain popular character peculiar to himself. Prince Esterhazy bought his entire MSS. from his widow. C. F. P.

SUEVUS (SUEVIS; real name 'Schwab'), FELICIANUS (*b.* Altdorf Weingarten, Württemberg, 1639), a Franciscan monk in the monastery of Weingarten. In 1656 he was made priest and Musikdirektor at the monastery at Constance, and afterwards guardian at his own monastery. He composed 3 books of masses, and a large amount of other church music of all kinds between 1634–56 (*Q.-L.*).

SUGLIA, GUILHERMINA (*b.* Oporto, June 27, 1888), violoncellist. Having played in the Oporto City Orchestra from an early age (leading violoncellist at 12 years old), she studied with Paul Klengel at Leipzig (1904) and made her appearance as a soloist at one of the Gewandhaus concerts conducted by Nikisch. After a tour in Europe she worked for a time with Casals, and made another extensive tour in 1912. Since the war Madame Suggia has lived in London; her beauty of style and perfection of phrasing and intonation have never been surpassed. Her portrait has been painted by Augustus John. J. B. T.

SUITE. (1) **THE CLASSICAL TYPE.**—In the period between the latter part of the 16th and the beginning of the 18th century the most conspicuous feature of universal instrumental music is the profusion of dance tunes. All the most civilised nations of that time took equal pleasure in them; and partly owing to the itinerant musicians who traversed divers countries, and partly to the wars which brought representatives of different nationalities into frequent contact, both friendly and hostile, the various characteristic types were spread from one land to another, were adopted uni-

versally by composers, irrespective of nationality, and were so acclimatised as to become in many cases as characteristic of and as popular in the countries of their adoption as in that of their origin.

ENGLISH AND GERMAN PROTOTYPES.—This is sufficiently illustrated in Morley's *Plaine and easie Introduction*, 1597. For when he comes to treat of dance-music, the first things he takes notice of are pavans and galliards, almanes and branles; of which the first two are of Italian origin, the third probably Suabian, and the last French. The first two were not only in common use for dancing purposes in Queen Elizabeth's time, but were adopted by the great composers of the day and a little later as a favourite basis for instrumental pieces, which were intended as much for private enjoyment as music as for accompaniments to dances; and they are found plentifully scattered in such collections as the 'Fitzwilliam Virginal Book' and 'Parthenia,' among sets of variations, preludes and fantasias. (See VIRGINAL MUSIC.) A large proportion of such dances were naturally taken singly, but composers early perceived the advantage of contrasting one with another. Thus Morley, in the same part of the work just mentioned, speaks of the desirableness of alternating pavans and galliards; since the first was 'a kind of staid musick ordained for grave dancing,' and the latter 'a lighter and more stirring kind of dancing'; and he further describes more obscurely the contrast arising from the 4-time and 3-time which subsists between them. Spitta¹ mentions the same contrast as popular in Germany a little later, and refers to the publication of thirty paduans and gaillards by Johann Ghrö of Dresden in 1604. In such a manner originated the idea of joining different dance tunes together to make an artistic balance and contrast, and in this lies the germ of the suite; in which, by selecting dances of various nationalities, and disposing them in the order which displayed their relative bearings on one another to the best advantage, composers established the first secular instrumental cyclic art-form.

It is not possible, for want of materials, to trace fully the process of selection. The pavans and galliards dropped out of fashion very early, and allemandes and courantes came in, and soon became a sort of established nucleus, to which was sometimes appended a sarabande, or even several other dance movements, and a prelude. Indeed, when the principle of grouping movements together was once accepted, the speculations of composers in that line seem to have been only limited by their knowledge of dance-forms. It was in fact by experimenting with various methods of grouping that the most satisfactory succession was arrived at;

¹ *Life of Bach* (i. 681, Engl. trans. ii. 73).

and thus many of the earlier suites contain a greater profusion and variety than is found in those of the maturer period. In Purcell's suites, for instance, which date from the last ten or twenty years of the 17th century, besides the allemande and courante, which occupy just the very position in which they are found in the suites of Bach and Handel, in one case the group also comprises a sarabande, cello, minuet, riggadoo, intrade and march; while another contains a trumpet tune and a chacone, and another a hornpipe. One of the most curious features in them is the absence of the jig, which in the mature suite-form was the only one admitted of English origin. The opening with a prelude is almost invariable; and this is not astonishing, since this kind of movement (which can hardly be described as a 'form') was as familiar as the dances, from having been so often attempted by the early instrumental composers, such as Byrd, Orlando Gibbons, Bull and Blow among Englishmen. The order of four movements which served as the nucleus in the large proportion of suites of the mature period is also occasionally, by accident, found very early; as for instance in one of the suites of Froberger, which Nottenbohm says was written in 1649; and another by Lully, which was probably written early in the second half of the same century.

GROUPING AND TITLES.—These groups had, however, as yet no uniform distinctive title. In England, in common with other combinations of divisions or movements, they were generally called lessons, or suites of lessons, and continued to be so called till after Handel's time. In Italy similar groups were called sonate da camera; in Germany they were called Parties or Partitas, as in the Clavierübung of Kuhnau published in 1689, and the set of six by Johann Krieger¹ published in 1697; and in France they were as yet commonly known as ordres. Thus the fact evidently existed universally for some time before the name by which it is now known came into general use.

The composers of different countries illustrated in different degrees the tendency towards consolidation which is inevitable in an art-form. The steps taken by the Italians appear to be particularly important as illustrating the distinct tendencies of the suite and the sonata. Corelli's earlier sonate da camera are scarcely distinguishable from the suite type, as they consist of a string of dance tunes preceded by a prelude. The later sonatas or solos of his Opera Quinta, however, represent different types. Some still consist of dance tunes, but many also show a fair proportion of movements of more abstract nature; and in several the dance element is, in name at least, quite absent. These are indeed a sort of combination of the

church and chamber sonata into a secular form, adding a canzona or free fugal movement in the place of the allemande, and transmuting the other dance types into movements with general qualities analogous to the earlier sonatas. Where this abstract character prevailed, the type approached more distinctly to that of the modern sonata; and where the uniformity of a dance rhythm prevailed throughout, it approached more nearly to the suite type. In these cases the arrangement had already ceased to be a mere crude experiment in antithesis, such as the early balance of galliard and pavan, and attained to the dignity of a complete art-form. With the Italians the remarkable distinction of their violin school led to the greater cultivation of the violin SONATA (*q.v.*), which, though retaining a few dance-forms, differed markedly in their distribution, and even in the structure of the movements.

THE FRENCH STYLE.—In both France and Germany more attention seems to have been paid to the clavier, and with it to the suite form. The former country very early showed many proofs of appreciation of its principles; as an instance, the suite by Lully in E minor, mentioned above, has the complete series of allemande, sarabande, courante, minuet and gigue. But a little later, theatrical influences seem to have come into play, and Rameau and Couperin, though in many cases adopting the same nucleus to start with, added to it a profusion of rondeaux and other short movements called by various eccentric names. In one of Couperin's ordres the number of little pieces amounts to no less than twenty-three; and in such a case it is clear that a sense of form or complete balance in the whole can hardly have been even aimed at. The movements are strung together in the same key, according to the recognised rule, as a series of agreeable ballet pieces, and the titles point to their belonging to quite a different order of art from that illustrated by the suite in its maturity. In fact their kinship must be attributed mainly to the order of programme music. Thus in the tenth ordre of Couperin, the first number is called 'La Triomphante' and also 'Bruit de guerre.' In the eleventh ordre a series of pieces represents 'Les Fastes de la grande et ancienne Mxnstrndxsn,' in five acts, the fourth of which is 'Les Invalides,' etc., in which the right hand is made to represent 'Les Disloqués' and the left 'Les Boiteux,' and the last is 'Désordre et déroute de toute la troupe: causés par les Yvrognes, les Singes, et les Ours.'

In Germany, composers kept their faces more steadfastly set in the direction of purer art-form, and the prevalence of uniformity in their distribution of movements soon became remarkable. Kuhnau's examples have been already referred to, and an example given in Pauer's 'Alte Clavier-Musik' illustrates the usual order

¹ See *Mus. T.* 1901, p. 163.

absolutely. Spitta mentions that the famous organist Buxtehude made a complete suite out of variations on the Choral 'Auf meinem lieben Gott' in the form of sarabande, courante and gigue. Twelve sets of 'Pièces de clavecin' by Mattheson, which were published in London as early as 1714, two years before Couperin's first set, are remarkably regular. The first, in D minor, has a prelude, allemande and double, courante and double, sarabande, and gigue. The second begins with a toccatina, the fifth with a fantasia, the ninth with a 'boutade,' and the tenth with a 'symphonie,' but in other respects most of them follow the same outlines of general distribution. The 'Six Suits of Lessons' of the Dutchman Johann Loeillet, published a little earlier still, are equally precise. From these facts it is quite clear that by the beginning of the 18th century certain definite principles of grouping the movements were generally known and accepted; and that a nucleus, consisting of allemande, courante, sarabande and gigue, had become the accepted type of the art-form.

CONTRAST WITH SONATA.—The differences between the structure of suite movements and sonata movements have already been traced in the article SONATA. It remains here only to summarise, with more special reference to the suite. While sonata movements constantly increased in complexity, suite movements remained almost stationary. They were based upon the persistence of the uniform type of a dance rhythm, throughout the whole of each several movement. Hence the ground principles of subject in sonata and suite are altogether different. In the former the subjects are concrete, and stand out in a marked manner both in contrast to one another and to their immediate context; and it is a vital point in the form that they shall be fully and clearly recapitulated. In the suite, on the other hand, the subject does not stand out at all prominently from its context, but is only a well-marked presentation of the type of motion and rhythm which is to prevail throughout the movement. To this there is no contrasting subject or episode, and definite recapitulation is no part of the scheme at all. In a few cases—which must be regarded as accidents in relation to the logical principles of the form—the opening bars happen to be sufficiently marked to have something of the character of a sonata subject; and in such cases it may also happen that they are repeated with sufficient simplicity to have the effect of recapitulation. But nevertheless it must be maintained that this is not part of the principle of construction. And with reference to this point it is well to remember that composers did not attain the ultimate distinct outlines of sonata and suite with a definite purpose and plan before them; but that in working with particular materials

they were led almost unconsciously to differentiate the two forms. The plan is found to exist when the work is done; but it is not theoretically propounded and then worked up to. It is not therefore a matter for surprise that in early times some points in the development of abstract form of the sonata kind were worked out in dance movements of the suite type, and applied and extended afterwards in works which had more distinctly the sonata character. Nevertheless the sonata is not an outgrowth from the suite; but, inasmuch as both were descended from a kindred stock, before the distinctions had become well defined, it is natural that many works should have continued to exhibit suggestions and traits of both sides promiscuously. On the whole, however, it is remarkable how soon the distinct types came to be generally maintained; and from the number of instances which conform, the system can be fairly deduced.

PRINCIPLES OF THE CLASSICAL FORM.—The most marked external point is the uniformity of key. In Corelli's earlier sonate da camera, which in general are decided suites, the one exception which marks a sonata tendency is that the slow dance is often in a different key from the rest of the movements. In later suites of all sorts the uniformity of key throughout is almost universal. In the whole of Bach's the only exceptions are the second minuet of the fourth English suite, and the second gavotte in that known as the 'Overture in French Style.'¹ Hence the contrast is purely one of character between the several movements; and this is emphasised by the absence of any marked contrast of key or subject in the movements themselves. They are almost invariably constructed upon the simple principle of balanced halves, each representing the same material in different phases, and each strengthened by repetition. The first half sets out from the tonic key, and without any marked pause or division modulates so as to settle into the key of the dominant or relative major, and closes in that key. The second half begins afresh from that point, and proceeding in most cases by way of the key of the subdominant, settles well back again into the original key and concludes. The only break therefore is in the middle; and the two halves are made purposely to balance one another, as far as may be, without definite recapitulation. In a few movements, such especially as sarabandes and intermezzi, the second half is somewhat extended to admit of a little development and free modulation, but the general principles in the average number of cases are the same, namely, to diffuse the character of the principal figures and features throughout, rather than to concentrate the interest of the subject in definite parts of the

¹ 'Overture à la manière française.'

movement. In order, however, to strengthen the effect of balance between the two halves, certain devices are common and characteristic, especially with regard to the beginnings and endings of each half. Thus though composers do not seem to have aimed at recapitulation, there is frequently a clear relation between the opening bars of each half. This often amounts to no more than a subtle equivalence in the distribution of the group of rhythms in the bar, or a very loose transcript of its melodic features. But in some cases, most especially in Bach, the opening bars of the latter half present a free inversion of the beginning of the first half, or a sort of free shuffling of the parts approximating to double counterpoint. The first mode is clearly illustrated by the courante of the third partita in A minor as follows :

The Allemande of the fourth 'Suite anglaise' supplies a remarkable example of free inversion of figures and parts at the same time :

The other point, of even more common occurrence, is the correspondence of the ends of each half, which prevails particularly in allemandes, courantes and giges. A very fine and full example is supplied by the allemande of Bach's first 'Suite anglaise'; the courante of his second 'Suite française' supplies another of some length; and among works of other composers the allemande of Lully's suite in E minor, the courante of Mattheson's suite No. 5 in C minor, the courante of Handel's fourth suite, the gigue of his eighth suite, and most of

his allemandes, are instances to the point. In the particular manner of the suite movements both these devices are exceedingly effective as emphasizing the balance of halves, and in the finest movements the balance of material and modulation is carefully distributed for the same end. Thus much of form applies more or less to all the movements which are based on dance rhythms, or developed on that principle.

ORDER AND CHARACTER OF MOVEMENTS.—Each of the movements has also severally distinct characteristics, upon which the form of the suite as a whole is mainly based. For the better understanding of this it will be best to take the group which forms the average nucleus or so-called canon of the suite. In the severest simplicity of the form the ALLEMANDE comes first, as in all Bach's French suites, in some of Couperin's, and many by earlier composers. The origin of the movement is obscure, and it is maintained that it is not based upon any dance, since the allemande of Suabian origin, said to be the only dance-form of that name known, is quite distinct from it. However that may be, its constitution, which is most important, consists mainly of moderately slow 4-time, with regular smooth motion—most frequently of semiquavers—distributed in a figurate manner between the various parts, and its character has been generally regarded as appropriately quiet and sober; which Mattheson described as the 'Ruhe des Anfangs.' To this the COURANTE, which almost invariably follows it in the mature suite, is supposed and intended to supply a contrast, but it cannot be maintained that it always does so successfully. The character of this movement varies considerably, owing chiefly to the fact that there are two decidedly distinct forms derived from different sources. The one of Italian origin which is found most frequently in Corelli's sonatas, in most of Handel's, in some but not all of Purcell's suites, and in Bach's fifth and sixth French suites, and fifth partita, is in 3-4 time, of quick, light and direct movement, full of rapid passages of simple character, with simple rhythm, and free from complication. This in general supplies in an obvious sense a fair contrast to the allemande. The other courante, of French origin, is normally in 3-2 time, but its characteristic is a peculiar intermixture of 3-2 and 6-4, which is supposed to produce a stronger antithesis to the smooth motion of the allemande. In the original dance it is said that this characteristic was chiefly confined to the last bars of each half, but in mature suite movements it was elaborately worked into the body of the movement with very curious effect. The quality is shown as early as Kuhnau, but more frequently in Couperin's suites, from whom it is said Bach adopted it. The following example from Couperin's third suite is characteristic :

It is possible that Bach adopted this form as affording opportunities for rhythmic experiments; he certainly carried it to great lengths, such as giving the right hand a passage in 3-2 and the left in 6-4:

but the result is not on the whole very successful. In most cases the French courantes are the least interesting movement of his suites, and as contrasts to the allemande do not compare favourably with the Italian courante. As an element of contrast the crossing of the time is rather theoretical than real, and the necessity of keeping the time moderate in order to make it intelligible brings the strong beats and the average quickness of the shortest notes, as well as the full spread of the bar, too near to those of the allemande; and in the general effect of the suite these externals tell more strongly than the abstract restlessness of crossing rhythms. It is possible, however, that the French courante has one advantage over the Italian: that inasmuch as the latter has more stability in itself, it calls less for a succeeding movement, and presents less perfectly the aspect of a link in the chain than of a movement which might as well stand alone. There is a slight touch of uneasiness about the French courante which, as a step towards the SARABANDE, is very appropriate. In this latter movement, which is of Spanish or possibly Moorish origin, rhythmic principle is very pronounced, and at the same time simple. Its external aspect is chiefly the strong emphasis on the second beat of a bar of three in slow time, as is clearly illustrated in Handel's sarabande in the G minor suite, in his 'Lascia ch' io pianga,' and in the sarabande of Bach's F major 'Suite anglaise.' This is an obvious source of contrast with both the preceding members of the suite, since in both allemande and courante there is no pronounced and

persistent rhythm, and the pace, though not necessarily quick, scarcely ever comes within the range of motion or style characteristic of definitely slow movements. There is also a further and equally important element of contrast. The first two numbers are characterised in a considerable proportion of instances by a similar free motion of parts. The process of carrying on the figures is sometimes knit by a kind of free imitation, but, however desirable it may be theoretically to regard them so, they cannot fairly be described as movements of imitation. The process is rather that of free figuration of two or three parts, giving in general a contrapuntal effect to the whole. In the sarabande the peculiar rhythmic character puts both systematic imitation and regular contrapuntal motion equally out of the question. Consequently as a rule a more decidedly harmonic style obtains; the chords are fuller, and move more simultaneously as blocks of harmony. The character of the finest examples is necessarily very pliable, and varies between free melody with simple accompanying harmony, such as those in Bach's 'Suites anglaises' in F and D minor, Handel's suites in G minor and E minor; examples in which the prominent melodic features are distributed successively without regularity between the parts, as in those in the 'Suites anglaises' in G minor and A minor, the 'Suite française' in B minor, the partita in B \flat , and several of Couperin's; and a few examples in which a figure or characteristic mode of motion is made to prevail almost throughout, as in the 'Suite française' in E \flat . The general effect of the sarabandes is noble and serious, and the music is more concentrated than in any other member of the group of movements. It is thus in various respects the central point of the suite: in position; in musical interest and unique quality; and in the fact, as observed and curiously commented on by Nottebohm, that the preceding movements generally tend to the solidity and the succeeding movements to lightness and gaiety. The order is in this respect somewhat similar to that of average sonatas, and seems to be the exposition of the same ideas of form from the point of view of the musical sense, though differently carried out as far as the actual manner and material of the movements are concerned.

In the most concise examples of the suite the sarabande is followed by the final gigue; but it is so common with all the most notable writers of suites to interpolate other movements, that it may be well to notice them first. These appear to have been called by the older writers galanterien, and more lately intermezzi; and seem to have been regarded as a sort of concession to popular taste. But in any way they answer the purposes of form exceedingly well. A very great variety of dances is introduced at

this point. The most familiar are the GAVOTTES, BOURRÉES, MINUETS and PASSEPIEDS. But besides these the most distinguished writers introduced LOURES, POLONAISES, movements called arias and other less familiar forms. Their character on the average is especially light and simple, and in the dance numbers it is remarkable that they always preserve their dance character more decidedly and obviously than any other member of the group. It is not possible to describe them all in detail, as they are too numerous, but their aspect in the group is for the most part similar, and is analogous to that of the scherzo or minuet and trio in the modern sonata. They evidently strengthen the balance on either side of the sarabande both in quality and amount. In many cases there is a considerable group of them, and in these cases it is that the ARIA is sometimes introduced. This movement has little connexion with the modern piece of the same name, as it is generally a short movement in the same balanced form as the other movements, but free from the dance basis and rule of time. It is generally moderately slow, and sometimes consistently melodious, as in Mattheson's suite in A; but often it is little more than a string of figures, without even melody of much importance. The group of intermezzi is generally contrasted with the sarabande and the gigue either by a square time or by the interchange of moderate movement, such as that of the minuet; and the conciseness and distinctness of the type is always sufficient to make the relations on both sides perfectly clear.

The GIGUE which concludes the series is theoretically, and in most cases actually, of light and rapid style. It is usually based on some rhythmic combination of 3 feet, but even this is not invariable. The balance is in favour of 12-8 time; but 6-8 is also common, and 12-16 and 3-8 not unfrequent; while a few are in some form of common time, as the slow gigue in the first French suite of Bach, and the remarkable example in his last partita in E minor. The old fancy for concluding a work with a fugue is illustrated by the common occurrence of fugal treatment in this member alone of the regular group of the true suite series. The treatment is met with in all directions; in Kuhnau, Mattheson, Handel, Couperin, as well as Bach. The method of application is commonly to begin and carry out a free sort of fugue in the first half, concluding like the other movements in the dominant key; and to take up the same subject freely 'al rovescio' or by contrary motion in the second half, with regular answer as in a fresh fughetta, and carry it out on that basis with the usual direction of modulation, concluding in the original key. Thus the fugal treatment is an accessory to the usual form of

the suite movement, which is here as regularly and invariably maintained as in the other members of the group.

The most important accessory which is commonly added to this nucleus is the PRELUDE. It appears in a variety of forms, and under a great variety of names. (It is worth noticing that all six introductory movements of Bach's partitas have different titles.) The chief point which is most obvious in relation to the other movements is that their characteristic form of nearly equal halves is systematically avoided; in fact any other form seems to have been taken in preference. In many important examples it is the longest and most elaborate movement of all. In some it is a sort of rhapsody or irregular group of arpeggios and other figures based on simple series of chords. Bach commonly developed it on the same broad outlines as some of his largest sonata movements, and the first and last of the Italian concerto—that is, the distinct balancing section of clear musical character and full close at the beginning and end of the movement, and the long passage of development and modulation in the middle, sometimes embracing new figures. This is illustrated by the preludes to the 'Suites anglaises' in A minor, G minor, F and E minor. In other examples the treatment is fugal, or contains a complete fugue along with other matter of more rhapsodical cast, as in the toccata of the partita in E minor; or yet again it is in the form of a fantasia, or of the overture as then understood. The effect is certainly to add breadth and stability to the group in no mean degree, and the contrast with the rest of the movements is in every respect unmistakable. This completes the general outline of the suite in its finest and most consistently complete form, as illustrated in Bach's 'Suites anglaises,' which must be regarded as the culminating point of the suite as an art-form.

EXCEPTIONAL TYPES.—In the matter of actual distribution of movements there are plenty of examples of experiments, even in the time when the usual nucleus had come to be generally recognised; in fact, there is hardly any large collection of suites which does not present some exceptions to the rules. Bach's departures from the usual outline are chiefly in the earliest examples, such as the partitas, in one of which he concludes with a rondo and a caprice. The 'Overture à la manière française,' for clavier, is in appearance a suite, but it is clear that Bach had not only the clavier suite type in his mind in laying out its plan, but also the freer distribution of numbers in the so-called French overture said to date from Lully. In this there is no allemande; the sarabande has intermezzi on both sides of it, and it concludes with an 'Echo' after the gigue. The works of his which are now commonly known as orchestral suites must be put

in the same category. For the inference suggested by Dehn's trustworthy observations on the MSS. is that Bach regarded them as overtures, and that the name suite was added by some one else afterwards. They depart from the average order of the clavier suite even more conspicuously than the above-mentioned work. In his later compositions for clavier, as has been already remarked, he was very strict. Handel's suites, on the other hand, are conspicuous departures from the usual order. They are, in fact, for the most part hybrids, and very few have the genuine suite character as a whole. The introduction of airs with variations, and of fugues, in the body of the work, takes them out of the category of strict interdependent art-forms and makes them appear rather as casual strings of movements, which are often as fit to be taken alone or in different groups as in the group into which he has thrown them. Moreover they illustrate somewhat, as Nottebohm has also observed, the peculiar position which Handel occupied in art, as not pure German only, but also as representative of some of the finest traits of the Italian branch of the art. The tendency of the Italians after Corelli was towards the violin sonata, a distinct branch from the original stem, and to this order some of Handel's suites tend to approximate. It was chiefly by thorough Germans that the suite-form was developed in its austere simplicity; and in that condition and in relation to their keyed instruments it seems that the usual group is the most satisfactory that has been devised.

It is obvious that the suite as an art-form is far more elementary and inexpensive than the sonata. In fact it attained its maturity long before the complete development of the latter form; and not a little of the interest which attaches to it is derived from that and collateral facts. It was the first instrumental form in which several movements were combined into a complete whole. It was the first in which the ecclesiastical influences which had been so powerful in all high-class music were completely supplanted by a secular type of equally high artistic value. Lastly, it was the highest representative instrumental form of the contrapuntal period, as the sonata is the highest of the harmonic period. It was brought to perfection when the modern sonata was still in its infancy, and before those ideas of key and of the relations of harmonies which lie at the root of sonata-form had become tangible realities to men's minds. In some respects the complete plan has the aspect of formalism and rigidity. The uniformity of key is sometimes taken exception to, and the sameness of structural principle in each movement is also undoubtedly somewhat of a drawback; but it must be remembered that the form is a representative product of a peculiar artistic period,

and devised for a particular keyed instrument, and for minds as yet unaccustomed to the varied elaboration of the sonata. The results are remarkable and valuable in a high degree; and though this may be chiefly owing to the exceptional powers of the composers who made use of the form, it is possible that as a pattern for the combination of small pieces it may still be worthy of regard. In fact the combination of short lyrical movements such as are characteristic of modern times has strong points of analogy with it. Moreover, since it is obviously possible to introduce modifications of some of the details which were too rigid in the early scheme without destroying the general principles of the form, it seems that genuine and valuable musical results may still be obtained by grafting characteristics of modern treatment and expression upon the old stock. Jahrh. Krieger* (Berlin Dissertation, 1921).

(2) MODERN VARIETIES.—The classical type of suite, so completely rounded off in the first half of the 18th century, received a certain measure of revival in the latter part of the 19th century by composers who found an attraction in experimenting with old forms. The suites of Lachner and Bargiel among the minor composers of Germany set a new fashion followed with conspicuous success by Grieg, in his 'Aus Holberg's Zeit,' and many others. Among English composers none contributed to that revival more decisively than Parry, whose 'Lady Radnor Suite' for strings and 'English Suite in G' (published posthumously) are perfect examples of that grafting on the old stock to which his last sentence above refers.

But the widespread modern use of the name has generally nothing to do with the old form. The works of Tchaikovsky may be pointed to as giving salient examples of two types quite distinct from the old dance forms. On the one hand, the orchestral suites (opp. 43, 53, 55) trace descent from the *DIVERTIMENTI*, *CASSATIONS* (q.v.) and similar groups of pieces of the late 18th century; on the other, the popular 'Casse-noisette' suite is typical of the very prevalent practice of compiling suites for independent performance from ballet music.

The most common uses of the term in current practice approximate to one or other of these types. The composer groups his numbers together on any principle, either of purely musical affinity or contrast or in accordance with some descriptive programme, which appeals to him. He accepts the term 'suite' as one which allows him a freer hand than symphony and one which indicates more definiteness of design than symphonic poem. Rimsky-Korsakov's 'Scheherazade' suite and Holst's 'The

Planets' are outstanding instances. The other use is commonly adopted by the composer of ballet music and of incidental music to plays who wishes subsequently to throw his work into a form suitable to concert performance. From Grieg's 'Peer Gynt' to Stravinsky's 'Firebird' their number is legion. A third distinct use of the term is that of the arranger and orchestrator of old music for modern use. Among English composers none has been more drawn on for this purpose than Henry Purcell. The many charming suites of his theatre tunes and dances heard in concert-rooms to-day must not be confused with his own harpsichord suites referred to in the foregoing article. c.

SUK, JOSEF, (b Křečovice, S. Bohemia, Jan. 4, 1874), a leading Czech composer, and member of the BOHEMIAN (CZECH) STRING QUARTET (*q.v.*). His father was school- and choir-master of Křečovice. Suk, therefore, springs from that old pedagogic stock which has made the musical culture of Bohemia famous.¹ His father, his first teacher, laid the solid foundations of his musical education. In 1885 he entered the Prague Conservatoire where, under the guidance of the Director, Ant. Bennewitz, he became an excellent violinist. At the same time he studied piano (Jiránek) and theory (Foerster, Stecker and Knittl). After passing his final examinations, in 1891, he remained another year at the Conservatoire to work at chamber music under Wihan and composition under Dvořák. He was the favourite pupil of Dvořák, with whom he afterwards entered into close relationship by marriage with his daughter Ottilie. In Wihan's class Suk met his colleagues, K. Hoffmann, O. Nedbal, and O. Berger (a violoncellist who died young), and in 1892 they founded the well-known Bohemian Quartet. Suk, nevertheless, found time to work hard at composition. At the beginning of this century, he was already regarded as joint leader with NOVÁK (*q.v.*) of the modern Czech school. Since 1922 he has been professor of composition in the 'master school' of the Prague Conservatoire. In the years 1924-26 he was elected director of this institution.

Suk's first essays in composition date from very early in his career, and the first to be known outside his own country (the pianoforte quartet in A minor, op. 1, and the serenade for string orchestra, op. 6) belong to his student days at the Conservatoire. They are remarkable for an assured mastery of the art of composition; the Viennese classicists, Schubert, Brahms, and more especially his teacher, Dvořák, are his models; classical sonata-form is the keystone of his work. But already his individuality is clearly apparent. He is far more tender, intimate and melancholy than Dvořák; his rhythm is not so racially ele-

mentary, therefore richer; his breadth of melody is not greatly concerned with periodicity; polyphony stands well in the foreground; the harmony is very original. In his 'Dramatic overture,' op. 4, he already shows great tragic pathos and profound passion; the serenade and early piano works stamp him as a delicate lyrical composer. The great wealth of invention shown in his first group of chamber music (the piano quartet; piano quintet, op. 80; string quartet in B, op. 11) and in his first symphony (E flat) assured him an outstanding position among Czech composers.

During the time of his love for Dvořák's daughter, and in the early years of their short married life, the lyrical quality of Suk's art became most prominent; his subjective side increased in power, and, from this point, his works gradually became autobiographical confessions. In connexion with this tendency came a remarkable growth of individuality in his technique, especially as regards harmony. The first work he composed at this time, the text of which reflected his mood, was the music to a dramatic fairy tale, 'Radúz and Mahulena,' by the Czech poet Julius Zeyer. Suk set to music chiefly those parts of the work which stirred his lyrical instincts: the entr'actes and melodramatic scenes. Only in the description of the curse of the wicked queen Runa he shows once more the passionate side of his art. The poet was so enthusiastic about Suk's work that he begged him also to compose incidental music for his dramatic legend 'Pod jabloní' (Under the Apple-trees). This is an idyll pervaded by an atmosphere of Catholic mysticism. Suk, however, was most interested in depicting the happiness of the young married couple—the principal characters in the legend—just as in the preceding work the love of Radúz and Mahulena became the central point of his music. Moreover, in these two works Suk succeeded in catching the atmosphere of the old Slavonic legendary world, thus introducing something new into Czech music. Here, too, is shown that fantastic element which became so marked in his later works. The scherzo of the first symphony and the bacchanal from the legend are forerunners of similar movements, such as the fantasy for violin and orchestra, op. 24; the fantastic scherzo, op. 25; and the scherzo movements in the later symphonic works.

The presentiment of an unhappy destiny, which pursued him as the result of much pondering upon the instability of human joy and drove him to feverish imaginative activity, is reflected in the fantasy. The same dreamy, fanciful mood prevails in the scherzo, op. 25. Upon this followed the symphonic poem 'Prague,' the apotheosis of the noble past, and the hopeful future, of the capital city of his fatherland.

With 'Prague,' however, this period of Suk's

¹ See Burney, *The Present State of Music in Germany*.

creative activity ended, for now came the dreaded catastrophe which so deeply influenced the composer's life and achievement. In 1905 his wife died, a year after her father. After a nervous breakdown Suk returned to the composition of his second symphony, begun in 1904. He called it 'Asrael' and dedicated it to the memory of the two beloved persons whom he had lost. The work is the starting-point of what, so far, is the latest phase of Suk's art; a period which has meant for him a slow victory over the blows of fate, and a gradual working towards life's affirmation. Besides the important orchestral works in which he has embodied this mental and emotional process—'Asrael,' 'Midsummer Tale,' 'Maturity' and 'Epilogue'—Suk has written smaller works belonging, however, to the same spiritual impulse. These consist of piano pieces and a string quartet. The pianoforte cycle 'About Mother' was written for his little son; it contains a series of intimate reminiscences. The symphonic poem in five movements, 'A Summer Tale,' gives us pictures from Nature, in which the composer sought, and believed he had found, consolation. The later cycle of piano pieces, 'Things lived and dreamed,' is rich in many new methods of expression, and, together with the string quartet, op. 31, gives us a further picture of the soul's conflict. Here we find much inward sorrow and also much bitter irony. The victory over all the shadows cast by fate is expressed in the symphonic poem 'Maturity' (based on a poem by Ant. Sová). It is the most modern of Suk's compositions up to the present time. Subtlety of harmony, richness yet clearness of polyphony, rhythm and periodicity liberated from all fetters, breadth of melody, brilliance of orchestration and freedom of form and tonality—all these qualities reach their highest level here. The latest of Suk's works—unfinished at the time of writing—is called 'Epilogue,' and is intended to complete the cycle of symphonic works mentioned above. All these works are fundamentally subjective, while aiming at something wider. They speak for all; expressing in music what humanity has experienced from the beginning of time. During the war (1914-18) Suk wrote two works intended for his own country. The 'Meditation on the Chorale St. Wenceslaus' originated in the nation's greatest hour of need; the 'Legend of dead victors' is the apotheosis of the heroes who died for their convictions on the battlefield (the Czechoslovak legionaries who fought with the Allies).

Suk's early works (in manuscript), without opus numbers, include:

Str. quartet, D min.; fantasy for str. orch.; funeral march for strings; Mass in B flat maj.; ballade for str. quartet; fugue for PF. and str. quartet; ballade for vln. and PF.; cradle song with PF. accompaniment.

WORKS WITH OPUS NUMBER

ORCHESTRAL.—Dramatic overture, op. 4, orch. (PF., 4 hands, M. Urbánek, Prague); Serenade, op. 6, strings (score parts and PF., 4 hands, Šimrock); overture to Shakespeare's 'A Winter's Tale,

op. 9 (MR.); incidental music to Zeyer's dramatic fairy tale, 'Radúz and Mahulena' (PF. score, Hudební Matice, Prague); prologue for vln. and PF., 4 hands, (M. Urbánek); symphony in E maj., op. 14 (score parts and arrangement for 4 hands, N. Šimrock); 'Pohádka' (A Tale), op. 16; a suite from the music to 'Radúz and Mahulena,' op. 13 (Šimrock); 'Pod jabloni' (Under the Apple-trees), op. 20; music to a dramatic legend by Zeyer (five numbers for mixed chorus, alto solo, PF., 4 hands) and harmonium, German and Czech words, N. Šimrock; fantasia for vln. and orch., op. 24 (N. Šimrock); fantastic scherzo for large orch., op. 25 (Breitkopf & Härtel); 'Prague,' symphonic poem, op. 26 (MS. arrangement for PF., 4 hands, M. Urbánek); symphony, 'Asrael,' op. 27 (score and parts, Breitkopf & Härtel); arrangement for PF., 4 hands, Hudební Matice, Prague; 'Pohádka léta' (A Summer Tale), op. 29, symphonic poem in five movements (Universal Edition, Vienna); 'Zrání' ('Maturity,' sometimes translated 'Ripening,' though 'Harvest-ide' best represents its meaning), a symphonic poem for Prague modern orch., op. 34 (Hudební Matice, Prague; J. & W. Chester, London); 'Epilogue,' for full orch., baritone solo and women's choir, op. 37 (unfinished as yet).

CHORAL.—Ten songs for women's voices, op. 15, with accompaniment for PF., 4 hands; Slavonic folk-poems (Šimrock); four songs for male-voice chorus, op. 13, from Serbian folk-poetry (M. Urbánek); three songs for mixed chorus with accompaniment for PF. ad lib. (M. Urbánek); male-voice choruses with folk-texts, op. 32 (Hudební Matice).

PIANOFORTE.—Polish fantasia, op. 5 (F. A. Urbánek, Prague); PF. pieces, op. 3, F. A. Urbánek; 'Náladý' (Moods), op. 10 (Šimrock); PF. pieces, op. 12 (Šimrock); PF. suite, op. 21 (M. Urbánek); 'Jaro' (Spring) and 'Letní doimy' (Summer Impressions), two cycles of pieces, op. 22 (M. Urbánek); 'O matince' (About Mother), op. 26 (J. Otto, Prague); 'Země, která nás živí' (Things lived and dreamed), ten pieces, op. 30 (Breitkopf & Härtel); 'Ukořebavky' (Slumber Songs), op. 33 (Šimrock); 'Opátelské' (Friendship), op. 36 (Hudební Matice and J. & W. Chester, London).

CHAMBER MUSIC, ETC.—PF. quartet, op. 1, A min.; PF. trio, op. 2, C min. (both by F. A. Urbánek, Prague); str. quartet No. 1, in B flat, op. 11 (Šimrock); str. quartet No. 2, op. 31 (Šimrock); str. quartet, 'Meditation on the Chorale St. Wenceslaus,' op. 35a (also for str. orch. and organ, F. A. Urbánek); ballade and serenade for v'cl. and PF. accompaniment, op. 3 (M. Urbánek); elegy for vln. and v'cl. with accompaniment for str. quartet, harmonium and harp, suggested by Zeyer's epic 'Výšehrad,' op. 23 (M. Urbánek).

Also a few small works recently printed, without opus: Humoresque for PF. (Neldner, Riga); a male-voice chorus, words by J. Kolář (F. A. Urbánek); 'Vesnická Serenáda' (Village Serenade) for PF. (J. Otto, Prague); 'Episody,' for PF. (Hudební Matice and J. & W. Chester); Bagatelle, '8 Kytice v lunc' (With roses in hand), for flute, vln. and PF. (Hudební Matice and J. & W. Chester).

R. V. (translated R. N.)

SULLIVAN, SIR ARTHUR SEYMOUR (b. 8 Bolwell Terrace, Lambeth, May 13, 1842; d. Westminster, Nov. 22, 1900), was the son of an Irish soldier who became Sergeant of the Band at the Royal Military College, Sandhurst, and eventually professor of the clarinet at Kneller Hall (see ROYAL MILITARY SCHOOL OF MUSIC), upon that Institution being opened in 1857. The opportunity for a thoroughly practical parental grounding in orchestral instruction was thus provided for the boy, whose general education was also not neglected, for he attended a private school at Bayswater, kept by a Mr. W. G. Pless. On Apr. 12, 1854, he had the good fortune to enter the Chapel Royal as a chorister upon the recommendation of Sir George Smart. There he received invaluable and systematic instruction in music from the Rev. Thomas Helmore, master of the children, and there, we cannot doubt, since it rests upon his own written word, he received the

'care and attention bestowed upon every branch of my education and the constant and kindly interest taken in my progress [that] have been in no small manner influential in making me what I am, viz. an earnest labourer in the cause of true Art.'

His first published composition, an anthem, 'O Israel,' was accepted by Novello in 1855 while he was yet a chorister.

In July 1856 he became, in open competition, the first holder of the recently established MENDELSSOHN SCHOLARSHIP (q.v.) at the R.A.M., where he became a pupil of Sterndale Bennett, Sir John Goss and O'Leary. He

SANTLEY

retained his choristership until 1858, although we may suspect that, as a boy of 16, his voice had become uncertain. But under the terms of the Scholarship he was enabled to go to Leipzig to further his education, and he arrived there in the autumn of 1858. Here he entered upon a yet more intensive period of study at the Conservatorium under teachers of European renown. Moritz Hauptmann for counterpoint and fugue, Rietz for composition, David for orchestral conducting, Moscheles and Plaidy for the pianoforte. There he had as contemporaries John Francis BARNETT, Walter BACHE, Franklin TAYLOR and Carl ROSA, and there he remained till 1861 steeping himself in German taste and tradition, full of reverence for German thoroughness and method, yet still maintaining sturdily his own remarkable artistic individuality. He then returned to London, having won golden opinions of his teachers, and for the last months of his stay, above and beyond the period of his Scholarship, having been partly maintained by the self-denying exertions of his devoted father.

On Apr. 12, 1862, his music to Shakespeare's 'Tempest,' composed at Leipzig, was produced at a Crystal Palace Saturday concert by August Manns. The following week—an unprecedented occurrence—it was repeated, and Sullivan awoke to find himself famous in the world of music. A few months later it was again heard, this time at a Hallé concert in Manchester, and so the two leading orchestras of the day set the seal of their approval upon the young composer's début. In the preceding autumn he had become organist at St. Michael's, Chester Square, a position he occupied for several years, during which period his time was occupied partly by teaching (a profession he detested) and partly, and largely, by composition.

In 1864 he composed the music for a ballet, 'L'île enchantée,' which was produced at Covent Garden, and was, we may conjecture, the means of procuring him the post of organist at the theatre, then under the sway of Sir Michael Costa. This was his first practical experience of the theatre from the professional side of the curtain, and it had the further advantage of bringing him into touch with Costa, probably the most influential musician in England of his time. Through Costa's good offices Sullivan was invited to write a cantata for the Birmingham Festival of 1864, of which the former had been conductor for many years. The result was 'Kenilworth,' written in collaboration with his friend Henry F. CHORLEY. In this year he also wrote some music to an opera libretto by Chorley, entitled 'The Sapphire Necklace,' which was never produced, and the music for which Sullivan thriftily used in later works.

At this time he also came under the influence of Sir George Grove, of whom he became a

devoted friend and disciple, a friendship only terminated by their deaths within a few months of each other. The year 1864 was full of importance to Sullivan, for he composed the Irish symphony during a visit to the land of his fathers. It also was produced at the Crystal Palace. In 1866 he was appointed a professor of composition at his alma mater, the R.A.M., and in September of that year he suffered a severe bereavement by the death of his father, which was the *motif* expressed by his 'In Memoriam' overture produced at the Norwich Festival on Oct. 30 of that year.

A concerto for violoncello and orchestra was played by Piatti at the Crystal Palace on Nov. 24. The following year he was commissioned by the Philharmonic Society to write an overture, 'Marmion,' and the composition was duly performed on June 3, 1867. This year was, however, even more memorable to Sullivan for the journey he took with Grove to Vienna in search of the lost Schubert MS. scores of 'Rosamünde,' the triumphal result of which is related elsewhere (see SCHUBERT). At the same time his 'In Memoriam' overture was produced at the Gewandhaus at Leipzig, the scene of his boyish experiences and successes.

In 1867 the first of those works which have brought such enduring and world-wide fame to Sullivan was heard. It was an adaptation by F. C. Burnand (sometime editor of *Punch*) of Maddison Morton's famous farce, *Box and Cox*. The title was reversed and the libretto 'Cox and Box' handed to Sullivan. The performance was to take place a fortnight later at Moray Lodge, Campden Hill, the residence of Mr. Arthur Lewis, a wealthy and cultured amateur of the day. With incredible labour and rapidity this was accomplished, and on Apr. 27, 1867, the little masterpiece was born. Later in the year it was added to the repertory of Mr. and Mrs. German Reed, with whom it had a long run.¹

In December of the same year, 1867, 'Contra-bandista,' a 2-act libretto by Burnand, was set to music by Sullivan, and produced at St. George's Hall by the German Reeds, not meeting, however, with the success of its predecessor. In 1869 his first oratorio, the 'Prodigal Son,' was performed on Sept. 8 at the Worcester Festival, Mmes. Tietjens and Trebelli, with Sims Reeves and Charles Santley, taking the solo parts.

In 1870 the overture 'Di ballo' (in E_b) was heard at the Birmingham Festival, a work which, while couched throughout in dance-rhythm, is constructed in regular classical form. To continue the list of his commissioned works, in 1871, in company with Gounod, Hiller and Pissuti, he wrote a piece for the opening, on May 1, of the Annual International Exhibition

¹ It was revived in London by the D'Oyly Carte Opera Company (Prince's Theatre, Monday, Nov. 28, 1921), until then exclusively occupied with the works in which Sullivan had collaborated with Gilbert.

at the Albert Hall. This was a cantata, to words by Tom Taylor, 'On Shore and Sea,' for solo, chorus and orchestra.

In the same year at the Prince's Theatre, Manchester, his music to a revival of the 'Merchant of Venice' was heard, and at the close of the year another attempt at comic opera was made, not wholly successfully, with 'Thespis, or The gods grown old' (Gaiety, Dec. 26, 1871). The importance of this lies in its being the occasion of his first association with W. S. Gilbert, the famous humorist, whose name is for ever associated with that of the composer.

At this time Sullivan was also closely engaged in editing the collection of 'Church Hymns with Tunes' for the S.P.C.K. and the Hymnary for Novello, for both of which he wrote a large number of original tunes, among them his famous setting of 'Onward! Christian Soldiers' (1872). Another popular work was, perhaps, his best-known partsong, 'Oh hush thee, my babe' (Novello), first sung at St. James's Hall, May 23, 1867.

In 1872, at the call of the Crystal Palace Company, he composed a Festival Te Deum, for soprano solo, orchestra and chorus for the rejoicings to honour the recovery of the Prince of Wales from typhoid fever.

By this time Sullivan's life had become so strenuous that he found it expedient to resign the two organistships he held, at St. Michael's, Chester Square, and St. Peter's, Cranley Gardens. He had undertaken the conductorship of the Royal Aquarium, Westminster, and of the Promenade Concerts at Covent Garden Theatre, and was besides in continuous request for social and musical functions in many quarters.

In 1873 he made a third appearance at Birmingham, this time with the leading feature of the Festival, an oratorio entitled the 'Light of the World,' the words, like those of the 'Prodigal Son,' selected from the Bible by himself. Shortly afterwards he was honoured by the bestowal of the degree of Doctor of Music by Cambridge University. He had also become in a special degree the intimate friend of the Royal Family, in particular of the Duke of Edinburgh, an enthusiastic amateur violinist (see ROYAL AMATEUR ORCHESTRAL SOCIETY). In 1874 he wrote music for 'The Merry Wives of Windsor,' produced at the Gaiety Theatre, Jan. 2, 1875, by John Hollingshead.

In 1875 Richard D'Oyly CARTE (*q.v.*) procured Sullivan's collaboration with Gilbert for the production, entitled a Dramatic Cantata, of 'Trial by Jury' at the Royalty Theatre, Soho, then under the temporary direction of Mme. Selina Dolaro, for a season of Offenbach opera with Carte as manager. It was produced on Mar. 25, 1875, with instantaneous success, owing in part to the very humorous conception of the character of the Judge by Sullivan's brother Frederick. It was the only Gilbert

and Sullivan opera set to music entirely without spoken dialogue.

In June of that year, 1875, Sullivan also collaborated with B. C. Stevenson in a comic operetta entitled 'The Zoo,' produced at the St. James's Theatre. About the same busy period he began a connexion with the Choral and Orchestral Union of Glasgow. The following year D'Oyly Carte took a lease of the Opéra-Comique Theatre and formed a syndicate for the express purpose of producing operas by Gilbert and Sullivan. The first result was the production, on Nov. 17, 1877, of 'The Sorcerer,' which ran uninterruptedly for 175 nights, and was responsible for the introduction to the London public of George Grossmith, Rutland Barrington and Richard Temple, who created leading parts in the subsequent series of these operas.

In May 1876 the National Training School (see ROYAL COLLEGE OF MUSIC) was opened by the Duke of Edinburgh, and after strenuous persuasion Sullivan was induced to become its first director. This was a colossal addition to an already overburdened man's work, but he undertook it and retained it for three years, resigning definitely in 1881. In 1878 he wrote incidental music for Charles Calvert's revival of Shakespeare's 'Henry VIII.,' produced at Manchester. In January of this year he suffered the loss of his elder brother Frederick, to which was directly due the composition of his most popular song, 'The Lost Chord.'

The 'Sorcerer' was followed at the Opéra-Comique by 'H.M.S. Pinafore' on May 25, 1878. This not only ran in London for 700 consecutive nights (besides an unauthorised series of performances at another theatre), but had an extraordinary vogue in the provinces, and was adopted and pirated in the United States to a degree exceeding all previous records. At one time it was stated

'the spectacle was presented at every theatre and every Concert Company of importance in the big Cities, producing the same piece without the author and composer receiving a farthing for their work.'

To attempt to protect their interests Gilbert and Sullivan visited New York in 1879 to produce the authorised version at the Fifth Avenue Theatre.

An attempt to bring out the piece in Berlin as 'Amor am Bord' failed owing to the difficulty of anything like stage political caricature in Germany. But it was published by Litolf in 1882.

The next and fifth of the joint productions, 'The Pirates of Penzance' (produced Apr. 3, 1880) was given a copyright performance at Paignton on Tuesday, Dec. 30, 1879, almost simultaneously with the New York premiere at the Fifth Avenue Theatre, in which Jessie Bond, Rosina Brandram and Alice Barnett all appeared.

For the Leeds Festival of 1880 Sullivan succeeded Costa as conductor and wrote for it 'The Martyr of Antioch,' to words selected by W. S. Gilbert from Dean Milman's poem. Following a run of nearly 400 nights by the 'Pirates,' 'Patience,' the sixth opera, was produced on Apr. 25, 1881. It was a satire upon the ridiculous 'æsthetic' craze of the day, led by the pose of the brilliant but erratic writer, Oscar Wilde. During the run of the opera it was transferred (Oct. 10) from the Opéra-Comique to D'Oyly Carte's new theatre at the Savoy, where, in conjunction with its previous performances, it enjoyed a run of 408 performances.

On Saturday, Nov. 25, 1882, three nights after the last night of 'Patience,' 'Iolanthe' (seventh of the series) was produced, and six months later the popular musician received the honour of knighthood. 'Iolanthe' ran for more than a year, and was followed on Jan. 5, 1884, by the eighth opera, and possibly the least successful, 'Princess Ida.' When this was withdrawn in October, as if to compensate the public for any disappointment, its successor, ninth of the series, 'The Mikado' (produced Mar. 14, 1885), proved the Savoy composer, librettist and manager to be literally at the top of their form. It is impossible to relate the history of this amazing production here, and it must suffice to say that it ran for 672 nights continuously from its first night, and is still probably the prime favourite of an enormous public.

The authors and D'Oyly Carte had to take the closest precautions against American piracy, in which they happily succeeded. In the same year, 1885, Sullivan added to his many activities the conductorship of the Philharmonic Society, which he only retained, however, until 1887. In 1880 he had written the 'Martyr of Antioch' for the Leeds Festival Committee, but had not followed this up by a contribution in 1883.

In 1886, however, he wrote the 'Golden Legend,' to a libretto by his friend Joseph Bennett from Longfellow's poem. It was produced on Oct. 16, 1886, and achieved, with press and public alike, an immense and overwhelming success, greatly to the surprise of those who could not reconcile it with such compositions as 'The Pirates of Penzance' and 'Pinafore.'

'Ruddigore, or the Witch's Curse,' the tenth opera, succeeded 'The Mikado,' after its prodigious run, on Jan. 22, 1887, and ran for eight months, including the hottest weather of the Jubilee Year, no slight drawback. Between the date of its termination and the next production Sullivan found time to compose his incidental music for Irving's revival of 'Macbeth' at the Lyceum. On Oct. 3, 1888, eleventh in the succession, 'The Yeomen of the Guard' was produced, which is understood to have been regarded by its composer

and author as the best and most meritorious of the great series. The libretto and plot were entirely set free from the peculiar—and popular—form of humour known as Gilbertian, and the musical setting followed the spirit of this lead. But the twelfth and next opera, 'The Gondoliers,' produced Dec. 7, 1889, reverted to the earlier type of success and easily secured a similar measure of popularity. Among its many claims to distinction it secured the signal honour of a 'command performance' at Windsor Castle before Queen Victoria. During its run, there was an unhappy rupture between the famous partners, and while the differences were still unsettled, Carte relied on revivals of the repertory that had been formed. Sullivan himself, however, collaborated with Sidney Grundy in the production of 'Haddon Hall' on Sept. 24, 1892. The reconciliation which followed was a matter of national rejoicing, and on Oct. 7, 1893, the thirteenth Gilbert and Sullivan opera was produced, called 'Utopia Limited.' This enjoyed a run of 245 nights. In 1894 Sullivan wrote incidental music for Irving's production of Comyns Carr's version of 'King Arthur' at the Lyceum, and it is known that the subject of the play was one which the composer had in his mind to use as the libretto for a serious opera.

There were five more light operas written, viz.: 'The Chieftain' (Dec. 12, 1895)—a modernised and elaborated version of the old 'Contra-bandista,' written as far back as 1867—'The Grand Duke' (Mar. 7, 1896), in which for the last time he and Gilbert worked together; 'The Beauty Stone' (May 28, 1898), to a libretto by Pinero and Comyns Carr; and 'The Emerald Isle,' to a book by Basil Hood, upon which he was at work in 1900 when seized by his fatal illness. None of the first three can, however, be credited as successful, but 'The Rose of Persia' (produced Nov. 29, 1899), to a libretto by Basil Hood, received such warm welcome from the public that a new period of success seemed to have been begun. 'The Emerald Isle' was completed by Edward German and produced on Apr. 27, 1901.

We have related the story of this unique series of productions as far as possible without interruption. We must now revert to the years 1889-90, during which Sullivan—probably urged to some extent by public sentiment,¹ and partly influenced by his own consciousness that the attempt was due—determined to write a 'grand' opera. Gilbert, whom he asked for a libretto, declined the task, feeling that it was not the kind of work the public would take from him, and himself suggested the name of Julian Sturgis, to whom eventually the composer turned, and in collaboration with whom his

¹ In the 1st Edition of this Dictionary, Sir George Grove expressed the hope that Sullivan would apply his gifts to the production of a serious opera on some 'subject of abiding human or national interest.'

first and last 'grand' opera, 'Ivanhoe,' was produced on Saturday, Jan. 31, 1891. This is not the place to relate the story of the building in which the long-anticipated production was achieved. D'Oyly Carte had, after infinite labour, at enormous expense, borne upon his own shoulders the titanic task of constructing a new English Opera House in Cambridge Circus, a district at that time quite outside the London theatre-goer's range. A fine list of singers was engaged, and in order to secure a long run and save the voices of the principals, alternate casts were provided, but in spite of the success of this manoeuvre, a run extending to 160 nights, and the friendly reception at the outset, other circumstances intervened, notably the colossal expenses involved, and the difficulty of providing an English repertory, and so the courageous scheme collapsed. Messenger's charming 'La Basoche' was put on to follow 'Ivanhoe,' and after a few weeks Carte decided to sell the theatre to a music hall syndicate.

The Diamond Jubilee of Queen Victoria was celebrated by Sullivan in two compositions: the ballet 'Victoria and Merrie England' (Alhambra, May 25, 1897), in which a danced fugue was the best and most interesting number, and a 'Festival Te Deum,' given at the Chester Festival, 1897.

Sullivan had, we may here remark, for many years been looked to on occasions of national rejoicing for some musical expression of public feeling. As far back as 1872 this was evident on the recovery of the Prince of Wales, and almost the last effort of his failing powers was his attempt to assist the sale of a popular song by Rudyard Kipling, 'The Absent-Minded Beggar,' during the Boer War in 1899. Sullivan's songs were in their day as well known as his comic operas, but the most prolific period of his success as a song-writer ended in the year 1877 with the writing of the 'Lost Chord' and the production of the 'Sorcerer.' For very many years now we may safely say few ballads have approached the vogue that was enjoyed by such compositions as 'The Arabian Love Song' and 'If Doughty Deeds' (1866). The Shakespeare songs and the Tennyson cycle of 'The Window' (1871), 'O fair Dove' (1868), 'The Sailor's Grave' (1872), 'Sleep, my love, Sleep' (1874), 'The Distant Shore,' 'Let me dream again,' 'Thou'rt passing hence,' 'Sweethearts,' 'My dearest Heart' and 'The Lost Chord.'

The same tunefulness and appropriateness that have made his songs such favourites also distinguish his numerous hymns and anthems. Public taste has, in fact, altered less in this latter respect than in the former.

The easy flow of the voices, the display of excellent and learned counterpoint, and the frequent examples throughout of that melodious style and markedly independent treatment

in which they bring to mind certain periods of the older English Schools, are still recognised by the frequency with which his name occurs in Church of England Services. The whole of his hymn tunes, fifty-six in number, were republished in one volume in 1902 (Novello).

His musical gifts were so amazingly varied that although we have enumerated many claims to fame we have hardly yet done justice to his orchestral music. The output in this was relatively small, but his music to 'The Tempest,' 'The Merchant of Venice,' 'Macbeth,' his oratorios, the 'In Memoriam' overture, the symphony in E—unfortunately his only work in this department—show what remarkable gifts he had for the orchestra. Form and symmetry he seemed to possess by instinct, rhythm and melody clothe everything he touched; the music shows not only sympathetic genius, but sense, judgment, proportion and a complete absence of pedantry; while the orchestration is distinguished by a happy and original beauty hardly surpassed by the greatest masters.

He had received the Cambridge degree of Doctor of Music in 1876, and Oxford followed suit in 1879. In 1878 he acted as British Commissioner for Music at the International Exhibition at Paris, and was decorated with the *Légion d'honneur*. He also bore the Order of Saxe-Coburg and Gotha, and on May 22, 1883, was knighted by Queen Victoria, on the recommendation of Gladstone.

At the 1898 Leeds Festival performances, of which he had been conductor for fifteen years, it was evident that he was in failing health, but he accomplished the difficult task of conducting although suffering much pain. A terribly painful malady from which he had been a lifelong sufferer had undermined his constitution. It is a harrowing thought that a very great number of his most sparkling and delicious melodies were written during the intervals between spasms of the illness. It was little short of heroism that enabled him to conceal this from the public, and, indeed, to all save his most intimate friends, his spirits ever appeared buoyant, cheery and even jocular. His old friend, Sir George Grove, predeceased him by only a few months, though at a greater age, and the cultured manager who associated his name for ever with those of Gilbert and Sullivan, Richard D'Oyly Carte, passed away soon afterwards.

Sullivan was taken ill by a chill in Nov. 1900, and on the morning of the 22nd at his residence, 58 Victoria Street, Westminster, he died at the age of 58. A vast concourse of people lined the streets on Nov. 27 to see the last honours paid to the composer, whose remains were laid to rest in St. Paul's Cathedral.

It is not to be denied that his more serious works, including his oratorios, cantatas and his one 'grand' opera, have declined in popularity

within the last quarter of a century. It is quite obvious, however, that in this respect they have but shared the fate that has largely overtaken many oratorio performances on the grand scale. In the North of England this is not so noticeable as in London and the Home Counties in the South. He would be a bold man, however, who argued from this that they are permanently extinct. It is quite probable that the pendulum will swing back some day and a new period of popularity begin. Meanwhile in ever-increasing circles the fountain of joy which he created sparkles and gushes out to the inexpressible pleasure of the third generation of playgoers whose purest pleasures are found in the delights of 'Savoy' Opera.

H. S. W.

A chronological list of Sullivan's stage works, with date of production, is given below, to facilitate reference:

- 'The Tempest.' Incidental music. Crystal Palace, Apr. 12, 1862.
- 'L'le enchantée.' Ballet. Covent Garden, 1864.
- 'The Sapphire Necklace.' Libretto by Chorley, 1864 (never produced).
- 'Cox and Box.' Adaptation by F. C. Burnand from Maddison Morton. Moray Lodge, Campden Hill, Apr. 27, 1867.
- 'Contrabandists.' Libretto by F. C. Burnand. St. George's Hall, 1867.
- 'Merchant of Venice.' Incidental music. Prince's Theatre, Manchester, 1871.
- 'Thepsis, or the gods grown old.' With Gilbert. Gaiety, Dec. 26, 1871.
- 'Many Wives of Windsor.' Incidental music. Gaiety, Jan. 2, 1875.
- 'Trial by Jury.' With Gilbert. Royalty Theatre, Boho, Mar. 26, 1875.
- 'The Zoo.' With B. C. Stevenson. St. James's Theatre, June 1875.
- 'The Sorcerer.' With Gilbert. Opéra-Comique, Nov. 17, 1877.
- 'Henry VIII.' Incidental music. Manchester, 1878.
- 'H.M.S. Pinafore.' With Gilbert. Opéra-Comique, May 25, 1878.
- 'The Pirates of Penzance.' With Gilbert. Opéra-Comique, Apr. 3, 1880.
- 'Patience.' With Gilbert. Opéra-Comique, Apr. 25, 1881.
- 'Iolanthe.' " Savoy, Nov. 26, 1882.
- 'Princess Ida.' " Jan. 5, 1884.
- 'The Mikado.' " Mar. 14, 1885.
- 'Ruddigore.' " Jan. 22, 1887.
- 'Macheath.' Incidental music. Lyceum, 1888.
- 'The Yeomen of the Guard.' With Gilbert. Savoy, Oct. 3, 1888.
- 'The Gondoliers.' With Gilbert. Savoy, Dec. 7, 1889.
- 'Ivanhoe.' With Julian Sturgis. Jan. 31, 1891.
- 'Haddon Hall.' With Sidney Grundy. Sept. 24, 1892.
- 'The Foresters' (Tennyson). Incidental music. Daly's Theatre, 1892.
- 'Utopia Limited.' With Gilbert. Savoy, Oct. 7, 1893.
- 'King Arthur.' Comyns Carr's version. Incidental music. Lyceum, 1894.
- 'The Chieftain.' With Burnand. Savoy, Dec. 12, 1895.
- 'The Grand Duke.' With Gilbert. Savoy, Mar. 7, 1896.
- 'The Beauty Stone.' With Pinero and Comyns Carr. Savoy, May 28, 1898.
- 'The Rose of Persia.' With Basil Hood. Savoy, Nov. 29, 1899.
- 'The Emerald Isle.' With Basil Hood. Completed by Edward German. Savoy, Apr. 27, 1901.

A complete and tabulated list of Sullivan's compositions will be found in the memoir *Arthur Seymour Sullivan* by H. SAXE-WYNDHAM (London, 1926).

SUL PONTICELLO, see PONTICELLO.

SULZER, (1) SALOMON (b. Hohenems, Vorarlberg, Mar. 30, 1804; d. Vienna, Jan. 18, 1890), precentor of the Jews' synagogue in Vienna, and reformer of their musical service. The name was derived from Sulz in Württemberg, the ancient residence of the family. When only 13 he was made cantor of the synagogue at his native village by the Emperor Franz I., and in 1825 was called to Vienna to conduct the music at the newly built synagogue there. There he took lessons in composition from Seyfried, and set himself earnestly to reform the service by reducing the old melodies to rhythm and harmonising them. His collection of Jewish hymns, under the name of 'Schir

Zion' (the Harp of Zion), was used all over Germany, Italy and even America; but it was not till 1838 that he could succeed in publishing it. It contains a setting of the 92nd Psalm (in Moses Mendelssohn's version) by Schubert, for baritone solo and four men's voices, made in July 1828, the autograph of which is in possession of the synagogue (Nottebohm's *Catalogue*, p. 229). In 1842 a second edition appeared, and in 1865 a second volume. A collection of home and school songs, entitled 'Dudaim' (Mandrakes), appears to be still in MS. In 1866 a fête was held in his honour and a silver laurel presented to him with the inscription 'The Artists of Vienna to the Artist Sulzer.' From 1844-47 he was professor of singing at the Vienna Conservatorium. He was a Knight of the Order of Franz Joseph (1868), and carried the medals of various societies. His voice, a baritone, is said to have been magnificent.

G.

(2) JOSEPH (b. 1850-51; d. Vienna, Jan. 14, 1926), son of Salomon, was a violoncellist in the opera orchestra of Vienna, and composer of several works for his instrument. He brought out a revised edition of his father's work 'Schir Zion'.

SUMER IS ICUMEN IN. No English or foreign history of music is without its account of this 13th-century composition, which is *facile princeps* among specimens of mediæval music. In six directions is it pre-eminent, for (i.) it is the oldest known canon; (ii.) it is the oldest known harmonised music which is frequently performed and enjoyed by singers and listeners to-day; (iii.) it is the oldest known 6-part composition; (iv.) it is one of the oldest known specimens of the use of what is now the major mode; (v.) it is the oldest known specimen of ground-bass; (vi.) it is the oldest known manuscript in which both secular and sacred words are written to the music. The last point gives us some idea of the estimation in which it was held in its own day. In addition to the numerous references of the histories, it has been made the subject of a 56-page monograph by J. B. Hurry (Novello, 1914), which is chiefly valuable for its collection of 32 verdicts from the writings of English and foreign experts. From among these we select for quotation that of Dr. Ernest Walker¹:

'It combines beauty of sound and ingenuity of workmanship in a way that has no parallel in early music. Artistically we may say that nothing written for two hundred years afterwards can touch it.'

The date is generally accepted now as 1240; it may possibly be as early as 1227 (*vide* Hughes-Hughes, *Catalogue* of MS. Music in the British Museum), but is probably not earlier than 1239; the question seems to turn on whether the MS. (British Museum, Harl. 978)

¹ *History of Music in England*, p. 9.

was written all at one time, or at separate dates. The scribe is supposed to have been one John of Fornsete (? Forncett in Norfolk). But the MS. is from Reading Abbey, and the English words are certainly in Wessex dialect.

The form of the composition is an infinite canon at the unison for four voices, accompanied by two ground-basses singing in canon with one another. The directions shown in the facsimile may be translated thus:

'Four companions can sing this rota. But it ought not to be rendered by fewer than three, or two at the least, in addition to those who sing the bass. Now it is sung thus: the others keeping silent, one begins, with those who sing the bass, and when he shall have arrived at the first note after the cross, another begins; and so on with the rest. And each one shall pause at the written rests, and not elsewhere, for the space of one long.'

'Bass. (1.) One performer repeats this as often as there is need, counting a rest at the end.

'(ii.) The second sings this, with a rest in the middle, but not at the end, where he repeats the beginning at once.'

Certain alterations, some made at the time of writing, some shortly afterwards, are of interest but not of vital importance. If rightly discerned, they show that the music in its original form was still a canon susceptible of a satisfactory performance; also that the original system of notation was partly independent of the Franconian scheme, each note deriving its value from the corresponding value (after a trochaic scheme) of the syllable which was sung to it.

The Latin text '*Perspicie Christicola*' was presumably added to make this musical gem available for performance within the Abbey Church of Reading.

Musical historians of a speculative turn of mind have often thought that the relatively marvellous height of perfection reached by the Rota made it certain that other music of a like character once existed, and have held that this one specimen is sufficient to prove the existence of an early English school of composition. Evidence in support of this claim was, however, entirely lacking until a German scholar, Fr. Ludwig, pointed out that the same MS. contained a catalogue of organa and motets (the actual music having disappeared) coinciding in part with the famous contemporary collections from Notre Dame at Paris (now at Florence, Wolfenbüttel, Madrid, Turin, etc.), but ascribed here to 'W. de Winc' (= ? Wulfstan of Winchester). One such motet, *Ave gloriosa mater*, survives in this MS., Harl. 978. (See also PES.)

The many facsimile reprints, and translations into modern notation, reliable and otherwise, are too numerous to list here. Nearly all those published in the present century are substantially accurate, though all require some very slight adaptation of the text to produce a satisfactory final close. *Mus. T.* No. 95 (Novello) is a typical handy performing edition,

while *Oxf. Hist. Mus.* vol. i. p. 333 is the most complete. The facsimile shown on the Frontispiece to this volume has been made for this edition of the Dictionary by photography of the original.

SUMMATONAL TONES, see RESULTANT TONES.

SUMMER'S NIGHT, A, opera in one act; text and music by G. H. Clutsam, based on a story from the *Heptameron*. Produced His Majesty's Theatre, July 23, 1910.

SUNDAY CONCERT SOCIETY, see QUEEN'S HALL.

SUNDAY MUSICAL UNION, see QUEEN'S HALL.

SUNDERLAND, Mrs. (b. Brighouse, Yorkshire, Apr. 30, 1819; d. there, May 6, 1905), singer, the daughter of a gardener. Her maiden name was Susan Sykes.

Her voice first attracted the attention of Luke Settle, a blacksmith at a village near Brighouse, who, hearing her singing in her father's garden, offered to teach her. She afterwards joined the Halifax Choral Society, under the leadership of Dan Sugden, who gave her her first fee, of five shillings, for singing a solo at the quarterly concert of the Society. Her next important appearance as a solo singer was on Feb. 19, 1838, at a concert given in the Exchange Rooms, Bradford. She then had five months' training in London, and soon became a local celebrity, was styled the 'Yorkshire Queen of Song,' and for more than a quarter of a century was the leading vocalist in the North of England. She was physically robust, and her voice was a high soprano of great force and volume, which she managed with much expression. Her repertory was chiefly composed of the principal songs in the 'Messiah,' 'Judas' and the 'Creation'; but she had also some secular songs, mostly of a popular kind. Her first appearance in London was in the 'Messiah' at Exeter Hall, Nov. 2, 1849, and she continued to sing first soprano for the Sacred Harmonic Society and other bodies in the 'Messiah,' 'Creation,' 'Elijah,' etc., until 1856. The directors of the Ancient Concerts esteemed her voice and expression so much that they offered to send her abroad for further tuition. Indeed, had her early training equalled the quality of her voice and her natural feeling, there can be little doubt that she would have risen to very great general eminence. She frequently sang at Leeds concerts, notably at the opening of the Town Hall by Queen Victoria in 1858, and at the first of the Leeds Festivals in the same year. Her last appearance in public was in the 'Messiah,' at Huddersfield, June 3, 1864. Mrs. Sunderland married at the age of 19, her husband being a butcher. Their golden wedding was celebrated by a concert on June 7, 1888, the proceeds of which helped to found the Sunderland Vocal

Prize for natives of the West Riding of Yorkshire. G.; addns. F. K.

SUOR ANGELICA, opera in one act; text by Gioachino Forzano; music by Puccini. Produced Metropolitan Opera House, New York, Dec. 14, 1918; Costanzi Theatre, Rome, Jan. 11, 1919; Covent Garden, June 18, 1920.

SUPER. (1) The Latin preposition, 'above,' is used in organ terminology to denote the octave above, and is sometimes, but erroneously, used for 'octave' (see **COUPLER**). (2) The supernumeraries in a theatre, who appear in crowded scenes, but do not speak, sing or dance, are colloquially called 'Supers.'

SUPERTONIC, the second note of the scale upwards, as D in the key of C. It is brought into much prominence as the dominant note of the dominant key. The strong tendency to find the chief balance and antithesis in that key, and to introduce the second subject of a movement in it, as well as the tendency to make for that point even in the progress of a period, necessarily throws much stress upon the root-note of the harmony which leads most directly to its tonic harmony, and this is the dominant of the new key or supertonic of the original one. It has consequently become so familiar that its major chord and the chord of the minor seventh built upon it, although chromatic, are freely used as part of the original key, quite irrespective of the inference of modulation which they originally carried.

C. H. H. P.

SUPPÉ, VON (b. Spalato, Apr. 18, 1820; d. Vienna, May 21, 1895), light operatic composer, known as **FRANZ VON SUPPÉ**, was of Belgian descent, though his family for two generations had lived at Cremona; he was born at Spalato, or on board ship near it, and his full baptismal name was **FRANCESCO EZECHIELE ERMENEGILDO CAVALIERE SUPPÉ DEMELLI**.

His taste for music developed early. At 11 he learned the flute, at 13 harmony, and at 15 produced a Mass at the Franciscan church at Zara. A piece called 'Der Apfel' was produced privately at Zara in 1834. His father, however, had other views for him, and sent him to the University of Padua. But music asserted itself; he learned from Cigala and Ferrari, and wrote incessantly. At this moment his father died, the mother settled in Vienna, where Francesco joined her; and after a little hesitation between teaching Italian, practising medicine and following music, he decided on the last, got lessons from Seyfried, and obtained a gratuitous post as conductor at the Josephstadt theatre. This was followed by better engagements at Pressburg and Baden, and then (about 1862) at the theatres 'an der Wien,' Quai and Leopoldstadt in Vienna, with the last-named of which he was connected from 1865 until his death. His work at these houses,

though for long mere patching and adding, was excellent practice, and he gradually rose to more independent things. In 1844 a 'Sommernachtstraum,' founded on Shakespeare, and composed by him, is mentioned in the *A.M.Z.* 'Der Krämer und sein Commis' followed. In 1847 he was at the theatre 'an der Wien' and (Aug. 7) brought out a piece, 'Das Mädchen vom Lande' (The Country Girl), which met with wild success. Ten years later (Jan. 8, 1858) a Singspiel, 'Paragraph 3,' spread his fame into North Germany, and from that time a stream of pieces flowed from his pen. His works are said by the careful Wurzbach 'to reach the astonishing number of 2 grand operas, 165 farces, comediettas and vaudevilles, etc., as well as a Mass ('Missa dalmatica,' Spina, 1877), a Requiem produced at Zara in 1860 under the title of 'L' estremo Giudizio,' etc. etc. A list of 49 of his operatic pieces is given by Wurzbach, but a few only are dated. Another list of 21 is given by Batka in Pougins's supplement to *Fétis*, but the titles are French, and it is hard to make the dates agree. Some of the pieces are mere parodies, as 'Tannenhäuser,' 'Dinorah, oder die Turnerfahrt nach Hütteldorf.' One, 'Franz Schubert,' is founded on the life of Schubert, and contains five of his songs. In *Riemann* the number of his operettas is given as 31, and 180 'possen' and slighter pieces are mentioned. The only pieces of Suppé's known out of Germany are 'Fatinitza,' produced at Vienna, Jan. 5, 1876; at the Alhambra, London, June 20, 1878; and at the Nouveautés, Paris, Mar. 1879; and 'Boccaccio' (originally produced in 1879, and brought out in London, at the Comedy Theatre, Apr. 22, 1882). The overture to 'Dichter und Bauer,' known in England as 'Poet and Peasant,' must be his most popular work abroad, since it has been arranged for no less than 59 different combinations of instruments, all published by Aibl of Munich. The overture to 'Light Cavalry' (1886) has also had a long-maintained popularity. G.

SURETTE, THOMAS WHITNEY (b. Concord, Mass., Sept. 7, 1862); American teacher, composer and writer on music. Graduating from Harvard in 1891, where he studied piano with Foote and theory with Paine, he was for some years an organist in Concord and later in Baltimore. Since 1895 he has been a lecturer on music, and his activities in this field have been extensive both in England and America. In 1921 he was made director of music at Bryn Mawr College, Pennsylvania. His books include: *The Appreciation of Music* (with Daniel Gregory Mason, 1907); *The Development of Symphonic Music* (1915); and *Music and Life* (1917). His compositions include an opera, 'Cascabel' (Pittsburgh, 1899); 'Priscilla,' an operetta frequently performed;

'The Eve of St. Agnes,' dramatic ballet for soli, chorus and orchestra; anthems and instrumental pieces. W. S. S.

SURIANO, see SORIANO.

SUSANNA, oratorio in 3 parts by Handel; the author of the words is not known; begun July 11, and finished Aug. 24, 1748. It was produced during the season of 1749. G.

SUSATO, TYLMAN (b. at or near Cologne, end of 15th cent.; d. before 1564¹), printer and composer of music. His name is regularly written by himself in the full form given above, although the spelling of the first part of it is extremely irregular.² A document referred to by Fétis³ describes Susato as 'son of Tylman.' It is therefore only through an inexplicable forgetfulness of diplomatic usage that Fétis and others⁴ have taken Tylman for a surname.⁵ These writers have also accepted a conjecture of Dehn⁶ that 'Susato' indicated the place of the composer's birth, namely, the town of Soest (*Susatum*); in one of his books, however, he expressly describes himself as 'Agripinensis,'⁷ which can only refer to Cologne.⁸ Consequently we have to consider 'Susato' (or 'de Susato'—as it once occurs, in a document of 1543⁹) as a family name, 'van (or 'von') Soest,' doubtless originally derived from the Westphalian town. By the year 1529 Tylman is found settled at Antwerp, where he maintained himself by transcribing music for the chapel of the Virgin in the cathedral; in 1531 he is mentioned as taking part, as trumpeter, in the performance of certain masses there. He was also one of the five musicians supported by the city ('Stadsspeelieden'), and as such possessed, according to a list of 1532, two trumpets, a 'velt-trompet' and a 'teneur-pipe.' Losing his post on the arrival of Philip II. in 1549 he appears, for some unexplained reason, never to have been again employed by the city. Before this date however, in 1543, he had found another occupation as a printer of music. For a short time¹⁰ he worked in company with some friends; but from 1543 onwards he published on his own account, bringing out between that year and 1561 more than fifty volumes of music, nearly every one of which contains some compositions of his own.

¹ Goovaerts, p. 31.

² In works with Latin titles Susato writes himself in a great majority of cases *Tilmannus*; *Tielmannus*, *Tilmannus*, *Tylmannus* and *Tylmannus* occurring but rarely. In Flemish his favourite form seems to have been *Tielman*. In French *Tylman*, the spelling adopted by Fétis and Mendel, is found most frequently; *Tielman*, which is preferred by Goovaerts, is less usual; while *Tilmann*, the spelling which is adopted by Van der Straeten and is now practically the accepted one in the Netherlands, is met with only twice.

³ *Biogr. univ. des Musiciens* viii. 276; 2nd ed.

⁴ Thus Mendel and Reissmann, *Musikal. Convers.-Lex.* x. 355; Berlin, 1851.

⁵ Cp. Alphonse Goovaerts, *Histoire et bibliographie de la typographie musicale dans les Pays-bas*, pp. 26, 27; Antwerp, 1880.

⁶ See his letter in *Fétis*, l.c.

⁷ Goovaerts, p. 191.

⁸ At the same time Goovaerts notes (pp. 26, 27) we are not to confound Susato, as Fétis and Mendel have done, with a contemporary Tielman van Ceulen, who was a brewer, and whose father's name was Adolf.

⁹ Edmond van der Straeten, *La Musique aux Pays-bas avant le dixième siècle*, v. 258; Brussels, 1880.

¹⁰ Goovaerts, pp. 18-26.

Susato's first publication is a first book of four-part 'Chansons' (1543), and his next is entitled 'Premier Livre de chansons à trois parties, auquel sont contenues trente et une nouvelles chansons conuenables tant à la voix comme aux instrumentz' (1544). Eight of these pieces are by himself. The rest of his publications,¹¹ so far as they are now extant, include

(1) In French, sixteen books of 'Chansons' in 2-8 parts.

(2) 'Madrigali e canzoni francesi a 5 voci' (1558).

(3) In Latin, three books of 'Carmina,' three of masses, one of 'Evangelia Dominicalium,' fifteen of 'Ecclesiastical Cantiones' or motets (1553-60), 'Motecta quibus vocibus, auctore Clemente non Papa' (1546), and five books of 'Cantiones sacrae quae vulgo Moteta vocant' [sic] (1546).

(4) In Dutch there are his three books of songs, etc. (1551), entitled 'Musyck boexken,' and one book (1561), apparently the second of a series of 'Souter-Liedekens' (Psalter-ditties), which are of peculiar interest.

The third of the Musyck boexken contains some dances by Susato himself, which are described¹² as 'full of character' and excellently written. The souterliedekens, which Ambros further¹³ states to be found in four more Musyck-boexken, are pieces from the Psalms according to the rhymed Flemish version, set without change to the popular song-tunes of the day ('gemeyne bekende liedekens'¹⁴). The charm, however, of these compositions lies less in the airs adapted in them than in the independence and originality of the part-writing, an art in which Susato was so proficient that some of his three-part songs are composed in such a manner as to be suitable, he states, equally for three and for two voices with omission of the bass. Susato appears also to have co-operated with Clemens non Papa in some of his work, and not to have been merely his publisher. Still, it is as a publisher¹⁵ that Susato has hitherto been almost exclusively known, the masters whose works he printed being very numerous and including such names as Créquillon, Gombert, Goudimel, O. de Lassus, P. de Manchicourt, J. Mouton, C. de Rore, A. Willaert, etc.

BIBL.—P. BERGMANS, *Un Imprimeur musicien, Tilmann Susato. Bulletin de la Société de Bibliophiles anversois* (Antwerp, 1923).

SUSPENSION is the process of arresting the conjunct motion of one or more parts for a time, while the rest of the components of the chord proceed one step onwards, and thereby come to represent a different root. The part which is stayed in this manner commonly produces dissonance, which is relieved by its then passing on to the position it would have naturally occupied sooner had the motion of the parts been simultaneous. (See HARMONY, Vol. II. p. 530.)

SUTOR, WILHELM (b. Edelstetten, Bavaria, c. 1774; d. Linden, near Hanover, Sept. 7, 1829), studied singing under Valesi, and under

¹¹ Further details of compositions are given in Q.-L.

¹³ *Geschichte der Musik*, iii. 318 (Brussels, 1868). These, however, are not mentioned by Goovaerts, whose general accuracy may lead one to suspect a mistake on Ambros's part.

¹⁴ Ambros, iii. 313.

¹⁵ His publications are rarely found in England, the B.M. only possessing one volume of masses.

other masters, also composition, violin and pianoforte. He entered the court chapel of the Prince-Bishop of Eichstaett as tenor singer. In 1800 he was chorus-master at the Stuttgart opera, and in 1801 Konzertmeister. From 1818 he was court Kapellmeister at Hanover. He composed 5 operas for Stuttgart, an oratorio, 2 cantatas, a melodrama, incidental music to *Macbeth*, partsongs for male voices, canzonets and songs with PF. (Q.-L.; *Riemann*).

SVENDSEN, JOHAN SEVERIN (b. Christiania, Sept. 30, 1840; d. Copenhagen, June 14, 1911), composer.

His father was a military bandmaster at Christiania. At the age of 11 he wrote his first composition for the violin. When 15 he enlisted in the army, and soon became bandmaster. Even at that age he played, with considerable skill, flute, clarinet and violin. He soon left the army, and worked during the next few years in the orchestra of the Christiania theatre, and at a dancing academy, for which he arranged some études by Paganini and Kreutzer for dancing. A strong desire to travel drove him, at 21, on a roving tour over a great part of Sweden and north Germany. Two years after, being in Lübeck in extremely reduced circumstances, he fortunately met with the Swedish-Norwegian Consul Herr Leche, whose interest he gained, and who shortly after obtained a stipend for him from Charles XV. to enable him to perfect himself as a violinist; but being soon afterwards attacked with paralysis in the hand, he was compelled to give up the bow for composition. He went to Leipzig in 1863, and his works being already known there, he was placed in the finishing class of the Conservatorium, receiving, however, instruction in elementary theory of music, which he had never been taught. His instructors were Hauptmann, David, Richter and Reinecke. He wrote a quartet in A, an octet and a quintet, all for strings; quartets for male voices; and a symphony in D.

On leaving Leipzig in 1867 he received the great honorary medal of the Academy. After travelling in Denmark, Scotland and Norway, Svendsen went in 1868 to Paris. The Second Empire was then at its zenith, and his sojourn in the capital of France influenced the composer to a very great extent. Whilst there he played in Musard's orchestra, and at the Odéon, and became intimately acquainted with Wilhelmine Szarvady, De Bériot, Vieuxtemps and Léonard. He arranged the incidental music to Coppée's 'Le Passant,' in which both Sarah Bernhardt and Agar performed, but on the whole his Paris productions were few—a concerto for violin in A, and orchestral arrangements of studies by Liszt and Schubert; he also began 'Sigurd Slembe,' the overture to a Norwegian drama of that name. He left Paris at the beginning of the war in 1870 for Leipzig,

where he had been offered the conductorship of the Euterpe Concerts, which, however, were discontinued owing to the war. At a great musical festival at Weimar in the same year, he first met Liszt and Tausig, and his octet was played by a party containing David, Hellmesberger, Grützmacher and Hechmann, with great approbation. Early in the following year his symphony in D was performed at the Gewandhaus, and his fame as a composer established. He composed in that year his concerto for violoncello in D. In the autumn he went to America to be married to an American lady, whom he had met in Paris, and returned the same year to Leipzig, where, after the end of the war, he undertook the leadership of the Euterpe Concerts for one year. There he finished the overture to 'Sigurd Slembe,' which was played at the Euterpe then, and in the following year at the musical festival at Cassel, both times with great success. In this year he met Wagner at Bayreuth, and soon became his intimate associate. For the next five years (1872-77) he was conductor of the Christiania Musical Association and teacher of composition, and composed comparatively few works, which may be explained by the unfortunate want of pecuniary independence. The pieces of this period are numbered opp. 10-22 in his list.

In 1874 his labours found some appreciation from his countrymen in the shape of an annuity granted by the Storting, and several decorations conferred on him by the king. After five years of hard work, he was enabled once more to proceed abroad. In 1877 he revisited Leipzig, and conducted a new work at the Gewandhaus; went thence to Munich, and eventually to Rome, where he spent the winter. In 1878 he visited London for the first time, and there met Sarasate, who assisted him in the performance of his quartet, quintet and octet. From London he went to Paris, where he stayed until 1880, during which time his works were several times performed—as also at Angers, where the post of conductor was offered him by the Musical Association. But Svendsen refused this lucrative appointment, and in the autumn of that year we again find him in his old post as conductor of the Musical Association in Christiania. In 1883 he became court conductor at Copenhagen: in 1888 he visited England again, conducting his symphony in D at the Philharmonic Concert of May 31. In later years he produced only some minor compositions, besides arranging for orchestra several studies by foreign composers.

Svendsen's music is all of high character, remarkable for strong individuality and conciseness, as well as for an elaborate finish strictly in harmony with the traditions of the great masters.

His printed works are as follows :

- | | |
|--|---|
| Op. | Op. |
| 1. String quartet in A minor. | 15. Symphony No. 2 in B \flat . |
| 2. Songs for men's voices. | 16. Carnaval des artistes norvégien. |
| 3. Octet for strings in A minor. | 17. Rhapsodie norvégienne No. 1, for orch. |
| 4. Symphony in D. | 18. Overture to Romeo and Juliet. |
| 5. String quintet in C. | 19. Rhapsodie norvégienne No. 2, for string quartet. |
| 6. Concerto for violin and orch. in A. | 21, 22. Rhapsodies norvégiennes Nos. 3, 4. |
| 7. Do. for violoncello and orch. in D minor. | 23. Five songs, French and German, for voice and PF. |
| 8. Overture in G to Björnson's drama of 'Sigurd Stenbe'. | 24. Four songs, French and Norwegian, for voice and PF. |
| 9. Carnaval à Paris, for orch. | 25. Romance by Popper, arranged for violoncello and PF. |
| 10. Funeral march for Charles XV. | 26. Romance for violin and orch. in G. |
| 11. Zornahede, legend for orch. | |
| 12. Polonaise for orch. | |
| 13. Coronation march for Oscar II. | |
| 14. Marriage Cantata, for chor. and orch. | |

C. S.

SVENDSEN, OLUF (b. Christiania, Apr. 19, 1832; d. London, May 15, 1888), a distinguished flute-player. He learnt the rudiments of playing from his father, a musician; when 12 years old played the flute in small orchestras; and at 14 was engaged as first flute in the Christiania theatre. In 1851 he went to Copenhagen, and took lessons from Nils Petersen, then a flute-player there. In 1853 he entered the Conservatoire at Brussels, where he studied for two years, after which he was engaged by Jullien for his concerts in London. In Sept. 1856 he joined the band of the Crystal Palace, Sydenham, where he remained till the end of 1858. In 1861 Svendsen was appointed first flute in the Queen's private band, and the same year joined the Philharmonic Orchestra. He was ten years in the orchestra at Her Majesty's Theatre; and from 1867 was professor of his instrument at the R.A.M.

G.

SWAEN, GUILLAUME DE, a 16th-century Netherlander, author of 'Den Singende Zwaan,' a collection of Catholic sacred songs published in 1654, which appeared in various editions, the latest (?) being of the year 1759 (Q.-L.).

SWAIN, FREDa (b. Portsmouth, Oct. 31, 1902), composer and pianist, studied piano playing under Dora Matthay (1913-19) and Arthur Alexander (1920-21), to whom she was married in December 1921; composition under Stanford at the R.C.M., where she also received some instruction in violin-playing from Achille Rivarde. Her student works include a sonata in C minor and a 'Mauresque' for violin and piano, 3 preludes for piano and a sonata-poem, 'The Sea,' for the same instrument.

Having appeared several times on the concert platform with her husband, interpreting works for two pianos, Freda Swain for the first time introduced an extensive composition of her own to the public when 'The Harp of Ængus,' a work for violin and orchestra on a poem by W. B. Yeats, was played by Achille Rivarde at Queen's Hall in Jan. 1925. The same artist produced the sonata in B minor, 'The River,' at two recitals in May 1925, with the composer at the piano.

Other important works by Freda Swain are a sonata in C minor in one movement for violoncello and piano, a piano sonata in F minor and a string quartet ('Norfolk') in E minor. An operatic setting of 'The Shadowy Waters' by Yeats has so far remained unfinished.

The work of Freda Swain at its best shows intellectual vigour and an uncompromising earnestness which at times verges on austerity. The workmanship is at once solid and imaginative, and in the later works there is always a remarkable agreement between the thought expressed and the medium through which it is conveyed. The unaccompanied duets for two violins and the 'Danse barbare' for violin and violoncello, for instance, make the most of the limited possibilities of unsupported string instruments; the 'Barbaric Scherzo' for 3 pianos exploits the qualities of keyboard instruments very effectively; the songs are admirably vocal; and the numerous works for violin and piano show a fine sense of how to combine two essentially antagonistic values.

Among the smaller works are a 'Poem-nocturne' and a 'Lament' for violin and piano; an arrangement for the same instruments of the Irish air, 'The Valley lay smiling before me'; a number of piano pieces (some of which are published); and several sets of songs to words by Bridges, Burns, Housman, Stephens and translations of Chinese and Japanese poems.

E. B.

SWEELINCK (SWELINCK),¹ (1) JAN PIETERSZON (b. 1562; d. Amsterdam, Oct. 16, 1621), the greatest of Dutch organists, was born of a Deventer family.

His father, 'Mr. Pieter,' was organist of the Old Church at Amsterdam, which place disputes with Deventer the honour of having given the son birth.² He was taught by Jacob Buyck (Buchius), the pastor of the Old Church. There is a tradition that he was sent to Venice to study music under Zarlino and Gabrieli; but with this is connected a mistake of old standing, which places his birth in 1540, twenty-two years too early.³ Now, as we know that he was in Holland from 1577, at latest, onwards, it becomes barely credible that the lad of 15 could have followed the instruction of the

¹ Of the seven or more ways in which the name is spelled, these two have the warrant of the musician's own signature. The Germans of the time seem to have naturalised him as Schwelling; in Amsterdam he was known as Jan Pietersz.

² Deventer is consistently mentioned by Sweelinck's later biographers; but the Amsterdam claim has the support of the official entry of his marriage there in 1590, in which his birthplace is not stated. The omission was the rule when the person was a native of the city. Else documentary evidence is equally wanting on both sides.

³ The correction of this and the rest of the mistakes which confuse every single date in Sweelinck's life is due to the essay of F. H. J. Tiedeman, *J. P. Sweelinck, een bio-bibliografische Schets*, published by the Vereeniging voor Nederlandsche Muziekgeschiedenis (Amsterdam, 1876), which supersedes a shorter sketch published by the same writer as an introduction to the 'Regina Coeli,' in 1869. Both are based upon a biography (which remains in MS. in the possession of the Vereeniging) by Robert Eitner, who did good service by rescuing the works of Sweelinck from the obscurity of the Graue Kloster at Berlin.

Venetian masters to any important extent; and it is likely that the whole story is based upon the close study which his works prove him to have devoted to those of 'the apostle of musical science,'¹ whose 'Istitutioni harmoniche' he translated.² Some time between 1577 and 1581 Sweelinck was appointed to the organistship previously held by his father (who died in 1573); and this post he filled until his death. For a generation he was the glory of Amsterdam. When he played the organ there, says a contemporary, 'there was a wonderful concourse every day; every one was proud to have known, seen, heard the man.'³ And when he died it was the greatest of Dutch poets, Vondel, who wrote his epitaph, and surnamed him 'Phoenix of Music.' He must also have been a distinguished figure in the society of Amsterdam, then in its greatest brilliancy, not only for his unmatched powers as an organist, but also for his skill, fancy and charming versatility on the clavicymbel.⁴ The town bought him for public service a new 'clavecimpbel' from Antwerp at a cost of 200 gulden; and the instrument seems to have travelled with him all over the country.⁵

What was published, however, by Sweelinck in his lifetime was entirely vocal music, and includes, besides occasional canons, marriage-songs, etc.—his 'Chansons françaises' (three parts, Antwerp, 1592-94), 'Rimes françaises et italiennes' (Leyden, 1612), and the great collections of sacred music on which, with his organ works, his fame chiefly rests. These are the 'Pseaumes mis en musique' for 4-8 voices (published in several editions at Leyden, Amsterdam and Berlin), and the 'Cantiones sacrae' (Antwerp, 1619). A 'Regina Coeli' from the latter, three chansons and eight psalms in six parts were reprinted, in organ-score, by the Association for the History of Dutch Music (pts. i., v., vi. and vii.; Utrecht and Amsterdam, 1869-77); which has also published for the first time seven of Sweelinck's organ works⁶ (pt. iii.) (see VEREENIGING). In 1894-1901 B. & H. published Sweelinck's complete works in twelve volumes, edited by Max Seiffert, who added prefaces, etc., see below. The chanson, 'Tu as tout seul' is in vol. i. of 'Arion,' and two of the Italian madrigals are in 'Ausge-

wählte Madrigale.' The beautiful 'Hodie Christus natus est' is in the Bach Choir Magazine, etc.

The psalms make an interesting link between the tranquillity of the old polyphonists and the rhythm of modern music. Formally they stand nearest to the earlier style, but the strictness of their counterpoint, the abundance of imitation and fugue in them, does not hinder a general freedom of effect, very pure and full of melody, to a greater degree than is common in works of the time. The organ pieces are also historically of signal importance. Though they may not justify the claim made for Sweelinck as 'the founder of instrumental music,'⁷ they at all events present the first known example of an independent use of the pedal (entrusting it with a real part in a fugue), if not with the first example of a completely developed organ-fugue.

It is as an organist and the founder of a school of organists that Sweelinck had most influence, an influence which made itself felt through the whole length of northern Germany.⁸ In the next generation nearly all the leading organists there had been his scholars; his learning and method were carried by them from Hamburg to Danzig. His pupil Scheidemann handed down the tradition to the great Reincke⁹—himself a Dutchman—from whom, if we accept a statement supported alike by unanimous testimony and by exhaustive analysis of their works, it turned to find its consummation in Sebastian Bach.¹⁰

The contents of the complete edition are as follows:

- i. Organ and Clavier works.
- Book I. of Psalms.
- iv. and v. Book II. of Psalms.
- vi. Book III. of Psalms.
- vii. Book IV. of Psalms.
- viii. Cantiones sacrae.
- ix. Chansons & c.
- x. Rimes françaises et italiennes.
- xi. Miscellaneous and occasional compositions.
- xii. Compositions-Regeln, ed. by Dr. H. Gehrmann.

Two portraits are reproduced, and the prefaces by Dr. Seiffert are given in Dutch and German.

R. L. P.

(2) DIRK JANSSEN (*bapt.* Amsterdam, May 26, 1591; *d.* there, Sept. 1652¹¹), followed his father, Jan Pieter, as organist of the Oude Kerk at Amsterdam. He published an edition of the 'Livre septième des chansons vulgaires,' with the addition of some of his own songs (*Q.-L.*).

SWELL (HARPSICHORD). The desire for a power of increase and decrease on keyboard instruments like the harpsichord and organ, so as to emulate the bow instruments, and even the human voice, in that flow and ebb which are at the foundation of form no less than of expression, has led to the contrivance of

¹ So Zarlinio is entitled by his biographer, F. Caffi, *Della vita e delle opere del prete G. Zarlinio* (Venice, 1836). Neither here nor in the chapters on Zarlinio and Andrea Gabrieli contained in his *Storia della musica sacra*, vol. I, p. 129, etc. (Venice, 1854) does Caffi take any notice of the Dutch scholar. Nor have I been able to discover any trace of his residence at Venice in the MS. collections of S. Marco.

² MS. at Hamburg, formerly belonging to the great organist Reincke.

³ Sweertius, in Tiedeman, p. 16. Sweelinck's portrait at Darnstadt gives his strong irregular features a kindly expression, with a touch of sadness in them. It is reproduced in photograph by F. H. J. Tiedeman.

⁴ On this he was the master of Christina van Erp, the famous lutenist, and wife of the more famous poet, Pieter Corneliszoon Hooft. See the *Bouwsteenen* of the Vereeniging, vol. I, pp. 13 f.

⁵ See an anecdote in Baudartius, *Memorien*, xlii, p. 163; cited by Tiedeman, p. 16.

⁶ The bibliography of Sweelinck is given at length by Tiedeman, pp. 43-75. To this should be added some supplementary particulars communicated by Dr. J. P. Heije in the *Bouwsteenen*, vol. I, pp. 39-46.

⁷ See Eitner's preface to the edition, and Tiedeman, pp. 54 ff.

⁸ The wide distribution of his works is shown by early transcripts existing in the British Museum, and by copies of the extremely rare printed works preserved in the Bibliothèque Nationale. Curiously enough not a single MS. of Sweelinck remains in Holland.

⁹ Or Reincken.

¹¹ Buried Sept. 20.

mechanical swells as the only possible approach to it. A swell was first attempted on the organ; the harpsichord swell was introduced by Robert Plenius in a *sostinente* (see *SOSTINENTE PIANOFORTE*) variety of the instrument, named by him Lyrichord, and is described (in 1755) as the raising of a portion of the lid or cover of the instrument by means of a pedal. Kirkman adopted this very simple swell, and we find it also in many small square pianos of the 18th century. About 1765 Shudi introduced the Venetian swell, and patented it in 1769. This beautiful piece of joinery is a framing of *louvres* which open or close gradually by means of the right pedal and thus cause a swell, which may be as gradual as the performer pleases. Shudi bequeathed this patent to John Broadwood, who inherited it on the death of Shudi in 1773. When the patent expired, Kirkman and others adopted it, and it was fitted to many old harpsichords, and even to pianos, but was soon proved unnecessary in an instrument where power of *nuance* was the very first principle.

The English organ-builders perceived the great advantage of Shudi's Venetian swell over the rude contrivance they had been using (see *ORGAN*, Vol. III. p. 753), and it became generally adopted for organs, and has since been constantly retained in them as an important means of effect.

A. J. H.

SWELL-ORGAN. The *clavier* or manual of an organ which acts upon pipes enclosed in a box, such box having shutters, by the opening of which, by means of a pedal, a *crescendo* is produced. The shutters are made to fold over each other like the woodwork of a Venetian blind, hence the expressions 'Venetian Swell' and 'Venetian Shutters' sometimes found in specifications. To the swell-organ a larger number of reed-stops is assigned than to other manuals.

The first attempt at a 'swelling-organ' was made by Jordan in 1712. The *crescendo* was obtained by raising one large sliding shutter which formed the front of the box. The early swell-organs were of very limited compass, sometimes only from middle C upwards, but more generally taken a fourth lower, namely, to 'fiddle G.' For many years the compass did not extend below tenor C. (See *ORGAN*, Vol. III. p. 753)

SWERT, JULES DE (b. Louvain, Aug. 16, 1843; d. Ostend, Feb. 24, 1891), a representative violoncellist of the Belgian school. When only 8 years of age he began playing in public, though his studies were not completed until 1858, in which year he took first prize in the class of Servais at the Brussels Conservatoire. His subsequent career was that of a travelling

virtuoso until 1865, when he became Konzertmeister at Düsseldorf. Between 1869 and 1873 he resided at Berlin, where his functions were those of royal Konzertmeister and professor at the Hochschule. He also held appointments at Weimar, Wiesbaden, Leipzig and finally at Ostend. At the last-named town he was appointed in 1888 director of the local music school, acting as professor at the neighbouring Conservatoires of Bruges and Ghent, until his death. As a soloist he visited London first in 1875, and was esteemed as a warm, temperamental player, producing a tone of exceptional volume. Three concertos, one of which was produced with great success at the Berlin Philharmonic in 1886; a symphony, 'Nordseefahrt'; and two operas, 'Die Albigenenser' (Wiesbaden, 1878) and 'Graf Hammerstein,' represent his more serious work as a composer.

W. W. C.

SWIETEN, GOTTFRIED, BARON VAN (b. Vienna, 1734; d. there, Mar. 29, 1803), a musical amateur of great importance, who resided at Vienna at the end of the 18th century and beginning of the 19th. The family was Flemish, and Gottfried's father, Gerhard,¹ returned from Leyden to Vienna in 1745, and became Maria Theresa's favourite physician. Gottfried was brought up to diplomacy, but his studies were much disturbed by his love of music, and in 1769 he committed himself so far as to compose several of the songs in Favart's 'Rosière de Salency' for its public production at Paris. In 1771 he was made ambassador to the court of Prussia, where the music was entirely under the influence of Frederick the Great, conservative and classical. This suited Van Swieten. Handel, the Bachs and Haydn were his favourite masters; in 1774 he commissioned C. P. E. Bach to write six symphonies for orchestra. He returned to Vienna in 1778; succeeded his father as prefect of the Public Library, and in 1781 was appointed president of the Education Commission. He became a kind of musical autocrat in Vienna, and in some respects his influence was very good. He encouraged the music which he approved; had regular Sunday-morning meetings for classical music, as well as performances of the great choral works of Bach, Handel and Hasse, etc.; employed Mozart to add accompaniments to Handel's 'Acis,' 'Messiah,' 'St. Cecilia' and 'Alexander's Feast,' and Starzer to do the same for 'Judas'; translated the words of the 'Creation' and the 'Seasons' into German for Haydn²; and himself arranged Handel's 'Athaliah' and 'Choice of Hercules.' He supplied Haydn now and then

¹ Evidently not a very wise person. See Carlyle's *Frederick*, Bk. xxi. ch. 5.

² Max Friedländer, *Van Swieten und das Textbuch zu Haydns Jahreszeiten*, shows from an examination of the MS. libretto that Van Swieten made many suggestions that actually guided Haydn in his musical setting (*J.M.P.* 1909).

with a few ducats, and gave him a travelling-carriage for his second journey to England.¹ In his relation to these great artists he seems never to have forgotten the superiority of his rank to theirs; but this was the manner of the time. Van Swieten patronised Beethoven also (see BEETHOVEN, Vol. I. p. 274); but such condescension would not be at all to Beethoven's taste, and it is not surprising that we hear very little of it. His first symphony is, however, dedicated to Van Swieten. He was the founder of the 'Musikalische Gesellschaft,' or Musical Society, consisting of twenty-five members of the highest aristocracy, with the avowed object of creating a taste for good music—a forerunner of the 'Gesellschaft der Musikfreunde,' founded in 1808. g.

SWINEY (MACSWINEY), OWEN (b. near Enniscorthy, Ireland, 1680; d. Oct. 2, 1754), was the son of the rector of Enniscorthy. In a letter,² dated Oct. 5, 1706, and addressed to Colley Cibber, whom he calls in turn 'puppy,' 'his Angel' (twice), 'his Dear' and finally 'Unbeliever'—this singular person describes how Rich had sent for him from his 'Quarters in the North,' and how 'he was at a great charge in coming to town, and it cost him a great deal of money last winter,' and 'he served him night and day, nay, all night and all day, for nine months.' He had 'quitted his post in the army' on the faith of promises that, in return for managing 'the playhouse in the Haymarket' under Rich, he was to have '100 Guineas per annum Salary, a place at Court, and the Devil and all.' Having come up to London, as described, in 1705, he soon found that Rich intended nothing seriously for his advantage; and he announces (in the same letter) that, in consequence of the general discontent of the actors with Rich, and although Rich might have had the house for £3 or £3:10s. a day, he (Swiney) had taken a lease for seven years at £5 a day, and meant to begin in a few days.

In 1707 we find him in partnership with Wilks, Dogget and Cibber in the King's Theatre, having taken the lease from Vanbrugh, and very soon quarrelling with them and petitioning the Lord Chamberlain's interference in his favour. He was mixed up in most of the quarrels and intrigues of the time.

In March 1709 Swiney engaged the famous Nicolini for three years, produced Handel's 'Pastor Fido' (Nov. 1712) and 'Teseo' (Jan. 1713) and became bankrupt (Mar. 1713).

After this he lived for some years in Italy; but on his return to England (1718) a place in the Custom-house was found for him, and he was appointed Keeper of the King's Mews. While in Italy with Lord Boyne and Walpole, he wrote to Colman (July 12, 1730) from

Bologna, on the subject of engaging singers for the Opera, then in the hands of Handel. He was given a benefit at Drury Lane, Feb. 26, 1735. Swiney died, leaving his fortune to Mrs. Woffington. He was the author of several dramatic pieces, viz. 'The Quacks, or Love's the Physician' (1705); 'Camilla' (1706); 'Pyrrhus and Demetrius' (1709); and an altered version of the first piece.

Two years before his death a fine portrait of Swiney, after Van Loo, was scraped in mezzotint by J. Faber, junr. It represents him, in black velvet, holding in his hand a book, of which the title seems to be *Don Quixote*.

SYMPATHETIC TONE, RESONANCE, or VIBRATION is the term used to describe one of the commonest and most beautiful of acoustical phenomena. Any sound-producing body, such as a stretched string, or any cavity, has one particular note to which it will respond if the same note be sounded in its neighbourhood. The easiest illustration of the fact is given by raising the dampers from the strings of a piano by pressing the right pedal, and then singing a note over the strings; these will be found to give forth the same notes uttered by the voice, in faint 'sympathy.' The fact has been turned to account in various ways in practical music. The viola d'amore was provided with 'sympathetic' strings below the finger-board, which were usually tuned to the chord of D major, and resounded when notes of that chord were played. The charm of the pianoforte pedal is not so much in prolonging the tone of the notes that are actually struck, as in allowing the sympathetic resonance to be heard from the strings corresponding to the upper partial tones of the lower notes. This power, again, is easy to analyse by placing the fingers successively or simultaneously upon the notes of the chord of C major from middle C upwards (without sounding them), and then striking the bass C firmly; on releasing this latter key, the upper notes, or overtones, of the chord will be distinctly heard, sounded by sympathetic vibration from the upper strings. The effect of all sympathetic vibration is to enrich the quality of the tone produced; and the fact that the harp, with its obvious poverty of tone as a solo instrument, is one of the most effective members of the full orchestra, is no doubt partly due to the sympathetic vibration reacting on

the large surface of strings that are capable of resonance. M.

SYMPHONIA was apparently a keyboard¹ instrument, and although named by Schlick² and Praetorius³ neither writer describes what is meant by this name, a fact which shows it to have been popular. Coeleus,⁴ in Latin text, speaks of the 'clavichordium' with brass or iron wires touched by keys and says 'if the instrument is softer it is called "symphonia"; if louder, "clavieymbalum," indicating gradations in power; but how achieved is not explained.

Praetorius gives a complete list of musical instruments that includes 'symphonies.' Again, it is mentioned by Chaucer in his 'Tale of Sir Thopas.'

'Heer is the queen of fayerie
With harp, and lute and symphonie.'

The name occurs once in the Bible in Daniel (iii., 5, 10, 15) as 'Symphoniah' but wrongly translated as 'dulcimer.' By comparing the name with almost identical form in Greek and Italian, it would seem to have been a kind of bagpipe, the use of which was known from remote antiquity in Persia, Egypt and Phœnicia.

It would have been better translated 'sack-but'; and the passage read thus 'Harp (sebaka); dulcimer (psanterin); bagpipe (symphonia).'⁵ E. J. H.

SYMPHONIC POEM (Fr. *poème symphonique*; Ger. *sinfonische Dichtung*). The phrase was the happy invention of Liszt as the general title for a series of orchestral works the production of which occupied the decade 1850-60 (see LISZT, LIST OF WORKS). It has become a generic term used to describe orchestral works generally of large design but not according with any of the accepted categories of musical form, and having some reference to a programme (see PROGRAMME MUSIC; also SYMPHONY, subsection SPOHR'S PROGRAMME SYMPHONIES) more or less governing the style and course of the music.

Liszt's connotation of the term was more definite than this. Eight of the series refer to actual poems; 'Ce qu'on entend sur la montagne' after a poem of Victor Hugo, 'Tasso' after Byron's *Lament of Tasso*, 'Les Préludes' after one of Lamartine's *Méditations poétiques*, are typical. His intention was to produce a musical paraphrase of the thought, feeling and colour of the poem, to say in the language of music what the poet says in that of words. How far he succeeded or could succeed is immaterial here. The point is that to him the symphonic poem meant a certain tone of mind

in the composer. He laid no claim to the origination of a new 'Form.' His emphasis laid on certain characteristics of style, such as the use of representative themes and rhythmical transformations of themes, was merely the adaptation to his own needs of methods which Berlioz had used in the programme symphony and Wagner was even then developing in the music drama. His position was not that form was unimportant but that the poetic impulse of the composer could be trusted to produce a satisfactory form according to the needs of each individual case; in fact, that form should be conditioned by content not by a prearranged pattern.

The example of Liszt had the most immediate effect on his contemporaries. His own contributions to the type were still incomplete when Smetana, the champion of Czech nationalism, produced his series of six symphonic poems, 'Má Vlast' (My Country). The nationalistic movement, characteristic of the second half of the 19th century, and pursued with peculiar eagerness among the Slavonic races of Europe, favoured the extension of the ideas set on foot by Liszt. Works descriptive of the life and scenery, the folklore, dance and song, of the several countries flowed from innumerable pens and were given the title (not necessarily by the composers themselves) of 'Symphonic Poem.' They ranged geographically from Borodin's 'Steppes of Central Asia' to Saint-Saëns's 'Africa' (PF. and orch.), and in later times from Delius's 'Appalachia,' to Sibelius's 'Finlandia,' and embraced every type and style of orchestral fantasia or rhapsody which attempted the record in music of impressions from without.

Two composers of the generation after Liszt stand out for their treatment of the symphonic poem apart from national sentiment or scenic representation. Tchaikovsky in Russia and César Franck in Paris have little in common in temperament or musical style, but they were alike in this, that each contributed something essential to the renaissance of the symphony proper, and each also worked on the lines of the symphonic poem. Tchaikovsky in 'Hamlet,' 'Romeo and Juliet,' and 'Francesca da Rimini' seized on the central features of dramatic situations and characterised them in strong theatrical colouring. Franck in 'Les Éolides,' 'Le Chasseur maudit' and 'Les Djinn' (PF. and orch.), with less concern for the external effects and indeed much less power of visualising them objectively, allowed his symphonic style to be dominated by the mood of the poem chosen. The symphonic poems of Tchaikovsky are propelled forward by the human personality and the clash of incident; in Franck the influence of the poetic idea is felt more generally in texture and colouring. The application by Franck of the term 'poème

symphonique' to certain choral works with words, notably 'Rédemption' and 'Psyché,' must here be noted.

The composer most acclaimed as the direct successor of Liszt is Richard Strauss, whose period of symphonic poems, usually called by him *Tondichtung* (tone-poem, a term practically synonymous), ranges from 'Don Juan' (1889) to 'Ein Heldenleben' (1899). The first of these, 'after Lenau,' begins by preserving something of the literary flavour of Liszt's attitude, but it is noticeable that Strauss's tone-poems become increasingly objective in the point of view—till at last poetry gives way to prose in the details of the 'Sinfonia domestica' (1904), which, as its title suggests, belongs more to the category of the programme symphony than to that of the symphonic poem. Strauss brought to his task a full equipment; the power to amalgamate both the subjective and the objective views of his literary matter in his musical presentation; he used a richer orchestral palette than any of his predecessors and evolved a technical style for his purpose which was very much more supple than anything known to his predecessors. 'Don Juan,' 'Tod und Verklärung,' 'Also sprach Zarathustra' probe deeply into the psychological situations propounded by these subjects. In two of the series, 'Till Eulenspiegel' and 'Don Quixote' (violin-cello and orch.), it is noteworthy that he declares allegiance to two of the classical forms, the rondo and variations, respectively. The general structure of 'Ein Heldenleben' in a series of movements contrasted in mood and rhythm, unified by identity of theme, shows him tending more towards the plan of the programme symphony. It also shows him creating his own images, as Berlioz had done in the 'Symphonie fantastique,' no longer projecting himself into the mind of poet or of dramatist, which process seems to be the true *raison d'être* of the symphonic poem.

Among the innumerable symphonic poems produced by English composers of the post-Victorian generation¹ it will suffice to name two examples, Bantock's 'Fifine at the Fair' (produced 1912) and Elgar's 'Falstaff' (produced 1913). Neither bears the words 'symphonic poem' or 'tone-poem' on its title-page; the one is described as 'an orchestral drama with a prologue,' the other as 'symphonic study, with two interludes.' Both, however, accord precisely with that tone of mind which Liszt indicated in his adoption of the term. The one takes a poem of Robert Browning, the other the character of 'Falstaff' as represented by Shakespeare in *Henry IV.*, and both are concerned rather with the psychology of their several subjects than with the portrayal of incident.

The dates from Liszt to Elgar seem to outline an historical period of the prevalence of the symphonic poem. While many later specimens appear there has been a distinct reaction in modern music from the tone of mind which generated works of the type, and the tendency to reassert the independence of purely instrumental music from association with literary ideas is one of the marked characteristics of the present day (1926).

SYMPHONY (Lat. *sinfonia*; Ger. *Sinfonie*; Fr. *symphonie*). The terms used in connexion with any branch of art are commonly very vague and indefinite in the early stages of its history, and are applied without much discrimination to different things. In course of time men consequently find themselves in difficulties, and try, as far as their opportunities go, to limit the definition of the terms, and to confine them at least to things which are not obviously antagonistic. In the end, however, the process of sifting is rather guided by chance and external circumstances than determined by the meaning which theorists see to be the proper one; and the result is that the final meaning adopted by the world in general is frequently not only distinct from that which the original employers of the word intended, but also in doubtful conformity with its derivation.

In the case of the word 'symphony,' as with 'sonata,' the meaning now accepted happens to be in very good accordance with its derivation, but it is considerably removed from the meaning which was originally attached to the word. It seems to have been used at first in a very general and comprehensive way, to express any portions of music or passages whatever which were thrown into relief as purely instrumental in works in which the chief interest was centred upon the voice or voices. Thus, in the operas, cantatas and masses of the early part of the 17th century, the voices had the most important part of the work to do, and the instruments' chief business was to supply simple forms of harmony as accompaniment. If there were any little portions which the instruments played without the voices, these were indiscriminately called symphonies; and under the same head were included such more particular forms as overtures and ritornelli. The first experimentalists in harmonic music generally dispensed with such independent instrumental passages altogether. For instance, most if not all of the cantatas of Cesti and Rossi² are devoid of either instrumental introduction or ritornel; and the same appears to have been the case with many of the operas of that time. There were, however, a few independent little instrumental movements even

¹ The first to use the term was William WALLACE (q.v.).

² MSS. in the Christ Church Library, Oxford.

in the earliest operas. Peri's 'Euridice,' which stands almost at the head of the list (having been performed at Florence in 1600, as part of the festival in connexion with the marriage of Henri IV of France and Marie de' Medici), contains a 'Sinfonia' for three flutes, which has a definite form of its own and is very characteristic of the time. The use of short instrumental passages, such as dances and introductions and ritornels, when once fairly begun, increased rapidly. Monteverdi, who followed close upon Peri, made some use of them, and as the century grew older they became a more and more important element in dramatic works, especially operas. The indiscriminate use of the word 'symphony' to denote the passages of introduction to airs and recitatives, etc., lasted for a very long while, and got so far stereotyped in common usage that it was even applied to the instrumental portions of airs, etc., when played by a single performer. As an example may be quoted the following passage from a letter of Mozart's—'Sie [meaning STRINASACCHI, *q.v.*] spielt keine Note ohne Empfindung; sogar bei den Sinfonien spielte sie alles mit Expression,' etc.¹

With regard to this use of the term, it is not necessary to do more than point out the natural course by which the meaning began to be restricted. Lully, Alessandro Scarlatti and other great composers of operas in the 17th century, extended the appendages of airs to proportions relatively considerable, but there was a limit beyond which such dependent passages could not go. The independent instrumental portions, on the other hand, such as overtures or toccatas, or groups of ballet tunes, were in different circumstances, and could be expanded to a very much greater extent; and as they grew in importance the name 'symphony' came by degrees to have a more special significance. The small instrumental appendages to the various airs and so forth were still symphonies in a general sense, but the symphony *par excellence* was the introductory movement; and the more it grew in importance the more distinctive was this application of the term.

GENESIS FROM THE OPERATIC OVERTURE.—The earliest steps in the development of this portion of the opera are chiefly important as attempts to establish some broad principle of form; which for some time amounted to little more than the balance of short divisions, of slow and quick movement alternately. Lully is credited with the invention of one form, which came ultimately to be known as the 'Ouvverture à la manière française.' The principles of this form, as generally understood, amounted to no more than the succession of

a slow solid movement to begin with, followed by a quicker movement in a lighter style, and another slow movement, not so grave in character as the first, to conclude with. Lully himself was not rigidly consistent in the adoption of this form. In some cases, as in 'Persée,' 'Thésée' and 'Bellérophon,' there are two divisions only—the characteristic grave opening movement and a short free fugal quick movement. 'Proserpine,' 'Phaëton,' 'Alceste' and the Ballet piece, 'Le Triomphe de l'amour,' are characteristic examples of the complete model. These have a grave opening, which is repeated, and then the livelier central movement, which is followed by a division marked *lentement*; and the last two divisions are repeated in full together. A few examples are occasionally to be met with by less famous composers than Lully, which show how far the adoption of this form of overture or symphony became general in a short time. An opera called 'Venus and Adonis,' by Desmarets, of which there is a copy in the Library of the R.C.M., has the overture in this form. 'Amadis de Grèce,' by Des Touches, has the same, as far as can be judged from the character of the divisions; 'Albion and Albanus,' by Grabu, which was licensed for publication in England by Roger Lestrangle in 1687, has clearly the same, and looks like an imitation direct from Lully; and the 'Venus and Adonis' by Dr. John Blow, yet again the same. So the model must have been extensively appreciated. The most important composer, however, who followed Lully in this matter, was Alessandro Scarlatti, who certainly varied and improved on the model both as regards the style and the form. In his opera of 'Flavio Cuniberto,'² for instance, the 'Sinfonia avanti l'opera' begins with a division marked *grave*, which is mainly based on simple canonical imitations, but has also broad expanses of contrasting keys. The style, for the time, is noble and rich, and very superior to Lully's. The second division is a lively allegro, and the last a moderately quick minuet in 6-8 time. The 'Sinfonia' to his serenata 'Venere, Adone, Amore,' similarly has a Largo to begin with, a Presto in the middle, and a movement, not defined by a tempo, but clearly of moderate quickness, to end with. This form of 'Sinfonia' survived for a long while, and was expanded at times by a succession of dance movements, for which also Lully supplied examples, and Handel at a later time more familiar types; but for the history of the modern symphony, a form which was distinguished from the other as the 'Italian Overture,' ultimately became of much greater importance.

This form appears in principle to be the exact opposite of the French overture; it was similarly divided into three movements, but

¹ 'She does not play a note without feeling, and even in the symphonies played all with expression.' The same use of the name for the ritornelli between the verses of a song was common in England down to the middle of the 19th century.

² MS. in Christ Church Library.

the first and last were quick and the central one slow. Who the originator of this form was it seems now impossible to decide; it certainly came into vogue very soon after the French overture, and quickly supplanted it to a great extent. Certain details in its structure were better defined than in the earlier form, and the balance and distribution of characteristic features were alike freer and more comprehensive. The first allegro was generally in a square time and of solid character; the central movement aimed at expressiveness, and the last was a quick movement of relatively light character, generally in some combination of three feet. The history of its early development seems to be wrapped in obscurity, but from the moment of its appearance it has the traits of the modern orchestral symphony, and composers very soon obtained a remarkable degree of mastery over the form. It must have first come into definite acceptance about the end of the 17th or the beginning of the 18th century; and by the middle of the latter it had become almost a matter of course. Operas, and similar works, by the most conspicuous composers of this time, in very great numbers, have the same form of overture. For instance, the two distinct versions of 'La clemenza di Tito' by Hasse, 'Catone in Utica' by Leonardo Vinci (1728), the 'Hypermnestra,' 'Artaserse' and others of Perez, Piccinni's 'Didone,' Jomelli's 'Betulia liberata,' Sacchini's 'Œdipus,' Galuppi's 'Il mondo alla roversa'—produced the year before Haydn wrote his first symphony—and Adam Hiller's 'Lisuart und Dariolette,' 'Die Liebe auf dem Lande,' 'Der Krieg,' etc. And if a more conclusive proof of the general acceptance of the form were required, it would be found in the fact that Mozart adopted it in his boyish operas, 'La finta semplice' and 'Lucio Silla.'

With the general adoption of the form came also a careful development of the internal structure of each separate movement, and also a gradual improvement both in the combination and treatment of the instruments employed. Lully and Alessandro Scarlatti were for the most part satisfied with strings, which the former used crudely enough, but the latter with a good deal of perception of tone and appropriateness of style; sometimes with the addition of wind instruments. Early in the 18th century several wind instruments, such as oboes, bassoons, horns, trumpets and flutes, were added, though not often all together; and they served, for the most part, chiefly to strengthen the strings and give contrasting degrees of full sound rather than contrasts of colour and tone. (See ORCHESTRATION.) Equally important was the rapid improvement which took place simultaneously in internal structure; and in this case the development followed that of certain other departments of

musical form. In fact the progress of the 'Sinfonia avanti l'opera' in this respect was chiefly parallel to the development of the clavier sonata, which at this time was beginning to attain to clearness of outline and a certain maturity of style.

It will not be necessary here to repeat what has elsewhere been discussed from different points of view in the articles on FORM, SONATA and SUITE; but it is important to realise that in point of time the form of this 'Sinfonia avanti l'opera' did not lag behind in definition of outline and mastery of treatment; and it might be difficult to decide in which form (whether orchestral or clavier) the important detail first presents itself of defining the first and second principal sections by subjects decisively distinct. A marked improvement in various respects appears about the time when the symphony first began to be generally played apart from the opera; and the reasons for this are obvious. In the first place, as long as it was merely the appendage to a drama, less stress was laid upon it; and, what is more to the point, it is recorded that audiences were not by any means particularly attentive to the instrumental portion of the work. The description given of the behaviour of the public at some of the most important theatres in Europe in the middle of the 18th century seems to correspond to the descriptions which are given of the audience at the Italian Operas in England in the latter half of the 19th. Burney, in the account of his tour, refers to this more than once. In the first volume he says:

'The music at the theatres in Italy seems but an excuse for people to assemble together, their attention being chiefly placed on play and conversation, even during the performance of a serious opera.'

In another place he describes the card-tables, and the way in which the 'people of quality' reserved their attention for a favourite air or two, or the performance of a favourite singer. The rest, including the overture, they did not regard as of much consequence, and hence the composers had but little inducement to put out the best of their powers. It may have been partly on this account that they took very little pains to connect these overtures or symphonies with the opera, either by character or feature. They allowed it to become almost a settled principle that they should be independent in matter; and consequently there was very little difficulty in accepting them as independent instrumental pieces. It naturally followed as it did later with another form of overture. The 'Symphonies' which had more attractive qualities were played apart from the operas, in concerts; and the precedent being thereby established, the step to writing independent works on similar lines was but short; and it was natural that, as undivided attention would now be given to them, and they were no more in a

secondary position in connexion with the opera, composers should take more pains both in the structure and in the choice of their musical material. The symphony had, however, reached a considerable pitch of development before the emancipation took place; and this development was connected with the progress of certain other musical forms besides the sonata, already referred to.

INFLUENCE OF OTHER FORMS.—It will accordingly be convenient, before proceeding farther with the direct history of the symphony, to consider some of the more important of these early branches of musical art. In the early harmonic times the relationships of nearly all the different branches of composition were close. The symphony was related even to the early madrigals, through the 'Sonate da Chiesa,' which adopted the canzona or instrumental version of the madrigal as a second movement. It was also closely related to the early fantasias, as the earliest experiments in instrumental music, in which some of the technical necessities of that department were grappled with. It was directly connected with the vocal portions of the early operas, such as airs and recitatives, and derived from them many of the mechanical forms of cadence and harmony which for a long time were a necessary part of its form. The solo clavier suite had also something to do with it, but not so much as might be expected. As has been pointed out elsewhere, the suite-form, being very simple in its principle, attained to definition very early, while the sonata-form, which characterised the richest period of harmonic music, was still struggling in elementary stages. The ultimate basis of the suite-form is a contrast of dance-tunes; but in the typical early symphony the dance-tunes are almost invariably avoided. When the symphony was expanded by the addition of the minuet and trio, a bond of connexion seemed to be established; but still this bond was not at all a vital one, for the minuet is one of the least characteristic elements of the suite-form proper, being clearly of less ancient lineage and type than the allemande, courante, sarabande or gigue, or even the gavotte and bourrée, which were classed with it, as 'Intermezzi' or 'Galanterien.' The form of the clavier suite movements was in fact too inelastic to admit of such expansion and development as was required in the orchestral works, and the type did not supply the characteristic technical qualities which would be of service in their development. The position of Bach's orchestral suites was somewhat different; and it appears that he himself called them overtures. Dehn, in his preface to the first edition printed, says that the separate MS. parts in the Bach archives at Hamburg, from which he took that in C, have the distinctive characteristics of the handwriting of John Sebastian, and have

for title 'Ouvverture pour 2 violons,' etc.; and that another MS., probably copied from these, has the title 'Suite pour orchestre.' This throws a certain light upon Bach's position. It is obvious that in several departments of instrumental music he took the French for his models rather than the Italians. In the suite he followed Couperin, and in the overture he also followed French models. These therefore appear as attempts to develop an independent orchestral work analogous to the symphony, upon the basis of a form which had the same reason for existence and the same general purpose as the Italian overture, but a distinctly different general outline. Their chief connexion with the actual development of the modern symphony lies in the treatment of the instruments; for all experiments, even on different lines, if they have a common quality or principle, must react upon one another in those respects.

Another branch of art which had close connexion with the early symphonies was the concerto. Works under this name were not by any means invariably meant to be show pieces for solo instruments, as modern concertos are; and sometimes the name was used as almost synonymous with symphony (see CONCERTO GROSSO). The earliest concertos seem to have been works in which groups of 'solo' and 'ripieno' instruments were used, chiefly to obtain contrasts of fullness of tone. For instance, a set of six concertos by Alessandro Scarlatti, for two violins and violoncello, 'soli,' and two violins, tenor and bass, 'ripieni,' present no distinction of style between one group and the other. The accompanying instruments for the most part merely double the solo parts, and leave off either to lessen the sound here and there, or because the passages happen to go a little higher than usual, or to be a little difficult for the average violin-players of that time. When the intention is to vary the quality of sound as well, the element of what is called instrumentation is introduced, and this is one of the earliest phases of that element which can be traced in music. The order of movements and the style of them are generally after the manner of the 'Sonate da Chiesa,' and therefore do not present any close analogy with the subject of this article. But very soon after the time of Corelli and Alessandro Scarlatti the form of the Italian overture was adopted for concertos, and about the same time they began to show traces of becoming show-pieces for great performers. Allusions to the performance of concertos by great violin-players in the churches form a familiar feature in the musical literature of the 18th century, and the three-movement form (to all intents exactly like that of the symphonies) seems to have been adopted early. This evidently points to the fact that this form

appealed to the instincts of composers generally, as the most promising for free expression of their musical thoughts. It may seem curious that J. S. Bach, who followed French models in some important departments of instrumental music, should exclusively have followed Italian models in this. But in reality it appears to have been a matter of chance with him; he always followed the best models which came to his hand. In this department the Italians excelled; and Bach therefore followed them, and left the most important early specimens of this kind remaining—almost all in the three-movement form, which was becoming the set order for symphonies. Setting aside those specially imitated from Vivaldi, there are at least twenty concertos by him for all sorts of solo instruments and combinations of solo instruments in this same form. It cannot therefore be doubted that some of the development of the symphony-form took place in this department. But Bach never to any noticeable extent yielded to the tendency to break the movements up into sections with corresponding tunes; and this distinguishes his work in a very marked manner from that of the generation of composers who followed him. His art belongs in reality to a different stratum from that which produced the greater forms of abstract instrumental music.

It is probable that his form of art could not, without some modification, have produced the great orchestral symphonies. In order to get to these, composers had to go to a different, and for some time a decidedly lower, level. It was much the same process as had been gone through before. After Palestrina a backward move was necessary to make it possible to arrive at the art of Bach and Handel. After Bach men had to take up a lower line in order to get to Beethoven. In the latter case it was necessary to go through the elementary stages of defining the various contrasting sections of a movement, and finding that form of harmonic treatment which admitted the great effects of colour or varieties of tone in the mass, as well as in the separate lines of the counterpoint. Bach's position was so immensely high that several generations had to pass before men were able to follow on his lines and adopt his principles in harmonic music. The generation that followed him showed scarcely any trace of his influence. Even before he had passed away the new tendencies of music were strongly apparent, and much of the elementary work of the modern sonata-form of art had been done on different lines from his own.

THE 18TH-CENTURY TYPE.—The 'Sinfonia avanti l'opera' was clearly by this time sufficiently independent and complete to be appreciated without the opera, and without either name or programme to explain its meaning; and within a very short period the

demand for these sinfonias became very great. Burney's tours in search of materials for his History, in France, Italy, Holland and Germany, were made in 1770 and 1772, before Haydn had written any of his greater symphonies, and while Mozart was still a boy. His allusions to independent 'symphonies' are very frequent. Among those whose works he mentions with most favour are Stamitz, Emanuel Bach, Christian Bach and Abel. Works of the kind by these composers and many others of note are to be seen in great numbers in sets of partbooks in the British Museum.¹ These furnish most excellent materials for judging of the status of the symphony in the early stages of its independent existence. The two most important points which they illustrate are the development of instrumentation and the definition of form. They appear to have been generally written in eight parts. Most of them are scored for two violins, viola and bass; two hautboys, or two flutes, and two 'cors de chasse.' This is the case in the six symphonies of op. 3 of John Christian Bach; the six of Abel's op. 10, the six of Stamitz's op. 9, op. 13 and op. 16; also in a set of 'Overtures in 8 parts' by Arne, which must have been early in the field, as the licence from George II., printed in full at the beginning of the first violin part, is dated January 1740/41. The same orchestration is found in many symphonies by Galuppi, Ditters, Schwindl and others. Wagenseil, who must have been the oldest of this group of composers (having been born in the 17th century, within six years after Handel, Scarlatti and Bach), wrote several quite in the characteristic harmonic style, 'à 4 parties obligées avec cors de chasse ad libitum.' The treatment of the instruments in these early examples is rather crude and stiff. The violins are almost always playing, and the hautboys or flutes are only used to reinforce them at times as the 'ripieni' instruments did in the early concertos, while the horns serve to hold on the harmonies. The first stages of improvement are noticeable in such details as the independent treatment of the strings. In the 'symphonies before the opera' the violas were cared for so little that in many cases² not more than half-a-dozen bars are written in, all the rest being merely 'col basso.' As examples of this in works of more or less illustrious writers may be mentioned the 'Sinfonias' to Jommelli's 'Passione' and 'Betulia liberata,' Sacchini's 'Œdipus,' and Sarti's 'Giulio Sabino.' One of the many honours attributed to Stamitz by his admiring contemporaries was that he made the violas independent of the basses. This may seem a trivial detail, but it is only by such details, and the way in which

¹ See also *D.D.T.* (second series) for examples by Stamitz and other members of the Mannheim School.

² It is notorious that Mozart gave fuller parts to the second violin because of the incompetence of the viola-players.

they struck contemporary writers, that the character of the gradual progress in instrumental composition can now be understood.

The general outlines of the form were extremely regular. The three movements as above described were almost invariable, the first being a vigorous broad allegro, the second the sentimental slow movement and the third the lively vivace. The progress of internal structure is at first chiefly noticeable in the first movement. In the early examples this is always condensed as much as possible, the balance of subject is not very clearly realisable, and there is hardly ever a double bar or repeat of the first half of the movement. The divisions of key, the short 'working-out' portion and the recapitulation are generally present, but not pointedly defined. Examples of this condition of things are supplied by some MS. symphonies by Paradisi in the Fitzwilliam Museum at Cambridge, which in other respects possess excellent and characteristically modern traits. The first thing attained seems to have been the relative definition and balance of the two subjects. In Stamitz, Abel, J. C. Bach and Wagenseil, this is already commonly met with. The following examples from the first movement of the fifth symphony of Stamitz's op. 9 illustrate both the style and the degree of contrast between the two principal subjects.

1st subject.

2nd subject.

The style is a little heavy, and the motion constrained, but the general character is solid and dignified. The last movements of this period are curiously suggestive of some familiar examples of a maturer time; very gay and

obvious, and very definite in outline. The following is very characteristic of Abel:

It is a noticeable fact in connexion with the genealogy of these works, that they are almost as frequently entitled 'overture' as 'symphony'; sometimes the same work is called by the one name outside and the other in; and this is the case also with some of the earlier and slighter symphonies of Haydn, which must have made their appearance about this period. One further point which it is of importance to note is that in some of Stamitz's symphonies the complete form of the mature period is found. One in D is most complete in every respect. The first movement is allegro with double bars and repeats in regular binary form; the second is an andante in G, the third a minuet and trio, and the fourth a presto. Another in E \flat (which is called No. 7 in the partbooks) and another in F (not definable) have also the minuet and trio. A few others by Schwindl and Ditters have the same, but it is impossible to get even approximately to the date of their production, and therefore little inference can be framed upon the circumstance, beyond the fact that composers were beginning to recognise the fourth movement as a desirable ingredient.

THE STYLE OF C. P. E. BACH.—Another composer who precedes Haydn in time as well as in style is Emanuel Bach. He was his senior in years, and began writing symphonies in 1741, when Haydn was only nine years old. His most important symphonies were produced in 1776; while Haydn's most important examples were not produced till after 1790. In style Emanuel Bach stands singularly alone, at least in his finest examples. It looks almost as if he purposely avoided the form which by 1776 must have been familiar to the musical world. It has been shown that the binary form was employed by some of his contemporaries in their orchestral works, but he seems determinedly to avoid it in the first movements

of the works of that year. His object seems to have been to produce striking and clearly outlined passages, and to balance and contrast them one with another according to his fancy, and with little regard to any systematic distribution of the successions of key. The boldest and most striking subject is the first of the symphony in D :

The opening passages of that in E \flat are hardly less emphatic. They have little connexion

with the tendencies of his contemporaries, but seem in every respect an experiment on independent lines, in which the interest depends upon the vigour of the thoughts and the unexpected turns of the modulations ; and the result is certainly rather fragmentary and disconnected. The slow movement is commonly connected with the first and last either by a special transitional passage, or by a turn of modulation and a half-close. It is short and dependent in its character, but graceful and melodious. The last is much more systematic in structure than the first ; sometimes in definite binary form, as was the case with the early violin sonatas. In orchestration and general style of expression these works seem immensely superior to the other early symphonies which have been described. They are scored for horns, flutes, oboi, fagotto, strings, with a figured bass for 'cembalo,' which in the symphonies previously noticed does not always appear. There is an abundance of unison and octave passages for the strings, but there is also good free writing, and contrasts between wind and strings ; the wind being occasionally left quite alone. All the instruments come in occasionally for special employment, and considering the proportions of the orchestras of the time Bach's effects must have been generally clear and good. The following is a good specimen of his scoring of an ordinary full passage :

Corn in E \flat .

CHARACTERISTICS OF HAYDN AND MOZART.—It has sometimes been said that Haydn was chiefly influenced by Emanuel Bach, and Mozart by John Christian Bach. At the present time, and in relation to symphonies, it is easier to understand the latter case than the former. In both cases the influence is more likely to be traced in clavier works than in

those for orchestra. For Haydn's style and treatment of form bear far more resemblance to most of the other composers whose works have been referred to, than to Emanuel Bach. There are certain kinds of forcible expression and ingenious turns of modulation which Haydn may have learnt from him ; but their best orchestral works seem to belong to quite

distinct families. Haydn's first symphony was written in 1759 for Count Morzin. It is said by Pohl¹ to be 'a small work in three movements for two violins, viola, bass, two oboes and two horns'² from which particulars it would appear to correspond exactly in externals to the examples above described of Abel and J. C. Bach, etc. In the course of the next few years he added many more; most of which appear to have been slight and of no great historical importance, while the few which present peculiarities are so far isolated in those respects that they do not throw much light upon the course of his development, or upon his share in building up the art-form of the symphony. Of such a kind is the movement (dramatic in character, and including long passages of recitative) in the symphony in C, which he wrote as early as 1761.³ (No. 2.) For, though this kind of movement is found in instrumental works of an earlier period, its appearance in such a manner in a symphony is too rare to have any special historical bearings. The course of his development was gradual and regular. He seems to have been content with steadily improving the edifice of his predecessors and with few exceptions to have followed their lines. A great deal is frequently attributed to his connexion with the complete musical establishment which Prince Esterházy set up at his great palace at Esterház; where Haydn certainly had opportunities which have been the lot of scarcely any other composer who ever lived. He is described as making experiments in orchestration and ringing the bell for the band to come and try them; and, though this may not be absolutely true in fact, there can scarcely be a doubt that the very great improvements which he effected in every department of orchestration may to a great extent be attributed to the facilities for testing his works which he enjoyed. At the same time, the really important portion of his compositions were not produced till his patron, Prince Nicolaus Esterházy, was dead and the musical establishment broken up; nor, it must be remembered, till after that strange and important episode in Haydn's life, the rapid flitting of Mozart across the scene. When Haydn wrote his first symphony, Mozart was only three years old; and Mozart died in the very year in which the famous Salomon concerts in London, for which Haydn wrote nearly all his finest symphonies, began. Mozart's work, therefore, comes between Haydn's lighter period and his greatest achievements; and his symphonies are in some respects prior to Haydn's, and certainly had an effect upon his later works of all kinds.

Mozart's authentic symphonies are numbered

at 39.⁴ The first, in E \flat (K 16), was written in London in 1764, when he was 8 years old, and only five years after Haydn wrote his first. It was on the same pattern as those which have been fully described above, being in three movements and scored for the usual set of instruments, viz. two violins, viola, bass, two oboes and two horns. Three more followed in close succession, in one of which clarinets are introduced instead of oboes, and a bassoon is added to the usual group of eight instruments. In these works striking originality of purpose or style is hardly to be looked for, and it was not for some time that Mozart's powers in instrumental music reached a pitch of development which is historically important; but it is nevertheless astonishing to see how early he developed a free and even rich style in managing his orchestral resources. With regard to the character of these and all but a few of the rest it is necessary to keep in mind that a symphony at that time was a very much less important matter than it became fifty years later. The manner in which symphonies were poured out, in sets of six and otherwise, by numerous composers during the latter half of the 18th century, puts utterly out of the question the loftiness of aim and purpose which has become a necessity since the early years of the 19th century. They were all rather slight works on familiar lines, with which for the time being composers and public were alike quite content; and neither Haydn nor Mozart in their early specimens seem to have specially exerted themselves.

The general survey of Mozart's symphonies presents a certain number of facts which are worth noting for their bearing upon the history of this form of art. The second symphony he wrote (K. 17) had a minuet and trio; but it is hardly possible that he can have regarded this as an important point, since he afterwards wrote seventeen others without them; and these spread over the whole period of his activity, for even in that which he wrote at Prague in 1786 (K. 504), and which is last but three in the whole series, the minuet and trio are absent. Besides this fact, which at once connects them with the examples by other composers previously discussed, there is the yet more noticeable one that more than twenty of the series are written for the same peculiar little group of instruments, viz. the four strings, a pair of oboes or flutes, and a pair of horns. His use of clarinets in the symphony only begins⁵ with the Paris Symphony in D (K. 297) and subsequently is exceedingly sparing, Mozart having added clarinet parts to the score of that in G minor (K. 550). Even bassoons are not common; the most frequent addition to the little nucleus of oboes or flutes and horns being trumpets and drums. The

⁵ The early symphony in E \flat (K. 18) with clarinets is not now regarded as authentic.

two which are most fully scored are the Parisian, in D, just alluded to, which was written in 1778, and that in E \flat , which was written in Vienna in 1788, and stands first in the famous triad. These facts explain to a certain extent how it was possible to write such an extraordinary number in so short a space of time. Mozart's most continuously prolific period in this branch of art seems to have been when he had returned to Salzburg in 1771; for between July in that year and the beginning of 1773 it appears to be proved that he produced no fewer than fourteen. But this feat is fairly surpassed in another sense by the production of the last three in three successive months, June, July and Aug. 1788; since the musical calibre of these is so immensely superior to that of the earlier ones.

One detail of comparison between Mozart's ways and Haydn's is curious. Haydn began to use introductory adagios very early, and used them so often that they became quite a characteristic feature in his plan. Mozart, on the other hand, did not use one until his symphony in C (K. 425), written in 1783. What was the origin of Haydn's employment of them is uncertain. The causes that have been suggested are not altogether satisfactory. In the orthodox form of symphony, as written by the numerous composers of his early days, the opening adagio is not found. He may possibly have observed that it was a useful factor in a certain class of overtures, and then have used it as an experiment in symphonies, and finding it answer, may have adopted the expedient generally in succeeding works of the kind. It seems likely that Mozart adopted it from Haydn, as its first appearance (in the symphony which is believed to have been composed at Linz for Count Thun) coincides with the period in which he is considered to have been first strongly influenced by Haydn.

The influence of these two great composers upon one another is extremely interesting and curious, more especially as it did not take effect till comparatively late in their artistic careers. They both began working in the general direction of their time, under the influences which have been already referred to. In the department of symphony each was considerably influenced after a time by a special circumstance of his life; Haydn by the appointment to Esterházy before alluded to, and the opportunities it afforded him of orchestral experiment; and Mozart by his stay at Mannheim in 1777. For it appears most likely that the superior abilities of the Mannheim orchestra for dealing with purely instrumental music, and the traditions of Stamitz, who had there effected his share in the history of the symphony, opened Mozart's eyes to the possibilities of orchestral performance, and encouraged him to a freer style of composition

and more elaborate treatment of the orchestra than he had up to that time attempted. The Mannheim band had in fact been long considered the finest in Europe; and in certain things, such as attention to *nuances* (which in early orchestral works had been looked upon as either unnecessary or out of place), they and their conductors had been important pioneers; and thus Mozart must certainly have had his ideas on such heads a good deal expanded. The qualities of the symphony produced in Paris (K. 297) early in the next year were probably the first-fruits of these circumstances; and it happens that while this symphony is the first of his which has maintained a definite position among the important landmarks of art, it is also the first in which he uses orchestral forces approaching to those commonly employed for symphonies since the latter part of the 18th century.

Both Haydn and Mozart, in the course of their respective careers, made decided progress in managing the orchestra, both as regards the treatment of individual instruments, and the distribution of the details of musical interest among them. It has been already pointed out that one of the earliest expedients by which contrast of effect was attempted by writers for combinations of instruments was the careful distribution of portions for 'solo' and 'ripieno' instruments, as illustrated by Scarlatti's and later concertos. In J. S. Bach's treatment of the orchestra the same characteristic is familiar. The long duets for oboes, flutes or bassoons, and the solos for horn or violin, or viola da gamba, which continue throughout whole recitatives or arias, all have this same principle at bottom. Composers had still to learn the free and yet well-balanced management of their string forces, and to attain the mean between the use of wind instruments merely to strengthen the strings and their use as solo instruments in long independent passages. In Haydn's early symphonies the old traditions are most apparent. The balance between the different forces of the orchestra is as yet both crude and obvious. In the symphony called 'Le Matin' (No. 6), for instance, which appears to have been among the earliest, the second violins play with the first, and the violas with the basses to a very marked extent—in the first movement almost throughout. This first movement, again, begins with a solo for flute. The slow movement, which is divided into adagio and andante, has no wind instruments at all, but there is a violin solo throughout the middle portion. In the minuet a contrast is attained by a long passage for wind band alone (as in J. S. Bach's second Bourrée to the 'Overture' in C major); and the trio consists of a long and elaborate solo for bassoon. Haydn early began experiments in various uses of his orchestra, and his ways of

grouping his solo instruments for effect are often curious and original. C. F. Pohl, in his life of him, prints from the MS. parts a charming slow movement from a symphony in B \flat which was probably written in 1766 or 1767. It illustrates in a singular way how Haydn at first endeavoured to obtain a special effect without ceasing to conform to familiar methods of treating his strings. The movement is scored for first and second violins, violas, *solo violoncello* and bass, all 'con sordini.' The first and second violins play in unison throughout, and the violoncello plays the tune with them an octave lower, while the violas play in octaves with the bass all but two or three bars of cadence; so that in reality there are scarcely ever more than two parts playing at a time. The following example will show the style:

Towards a really free treatment of his forces he seems, however, to have been led on insensibly and by very slow degrees. For over twenty years of symphony-writing the same limited treatment of strings and the same kind of solo passages are commonly to be met with. But there is a growing tendency to make the wind and the lower and inner strings more and more independent, and to individualise the style of each within proportionate bounds. A fine symphony in E minor (No. 44), which appears to date from before 1772, is a good specimen of Haydn's intermediate stage. The strings play almost incessantly throughout, and the wind either doubles the string parts to enrich and reinforce them, or else has long holding notes while the strings play characteristic figures. The passage from the last movement, given in the next column, will serve to illustrate pretty clearly the stage of orchestral expression to which Haydn had at that time arrived.

In the course of the following ten years the progress was slow but steady. Many other composers¹ were writing symphonies besides Haydn and Mozart, and were, like them, improving that branch of art. Unfortunately the difficulty of fixing the dates of their productions is almost insuperable; and so their greater representatives come to be regarded, not only

¹ The work of Michael Haydn is important. Several of his symphonies were accepted as Mozart's at the time of Köchel's Catalogue.

as giving an epitome of the history of the epoch, but as comprising it in themselves.

Mozart's first specially notable symphony (K. 297) falls in 1778. This was the one which he wrote for Paris after his experiences at Mannheim; and some of his Mannheim friends who happened to be in Paris with him assisted at the performance. It is in almost every respect a very great advance upon Haydn's E minor symphony, just quoted. The treatment of the instruments is very much freer, and more individually characteristic. It marks an important step in the transition from the kind of symphony in which the music appears to have been conceived almost entirely for violins, with wind subordinate, except in special solo passages, to the kind in which the original conception in respect of subjects, episodes and development, embraced all the forces, including the wind instruments. The first eight bars of Mozart's symphony are sufficient to illustrate the nature of the artistic tendency. In the firm and dignified beginning of the principal subject, the strings, with flutes and bassoons, are all in unison for three bars, and a good body of wind instruments gives the full chord. Then the upper strings are left alone for a couple of bars in octaves, and are accompanied in their short closing phrase by an independent full chord of wind instruments, *piano*. This chord is repeated in the same form of rhythm as that which marks the first bars of the principal subject, and has therefore at once musical sense and relevance, besides supplying the necessary full harmony. In the subsidiary subject by which the first section is carried on, the quick lively passages of the strings are accompanied by short figures for flute and horns, with their own independent musical significance. In the second subject proper, which is derived from this subsidiary, an excellent balance of colour is obtained by pairs of wind instruments in octaves, answering with an independent and very characteristic phrase of their own the group of strings which give

out the first part of the subject. The same well-balanced method is observed throughout. In the working out of this movement almost all the instruments have something special and relevant of their own to do, so that it is made to seem as if the conception were exactly apportioned to the forces which were meant to utter it. The same criticisms apply to all the rest of the symphony. The slow movement has beautiful independent figures and phrases for the wind instruments, so interwoven with the body of the movement that they supply necessary elements of colour and fullness of harmony, without appearing either as definite solos or as meaningless holding notes. The fresh and merry last movement has much the same characteristics as the first in the matter of instrumental utterance, and in its working-out section all the forces have, if anything, even more independent work of their own to do, while still supplying their appropriate ingredients to the sum total of sound.

The succeeding ten years saw all the rest of the work Mozart was destined to do in the department of symphony; much of it showing in turn an advance on the Paris symphony, inasmuch as the principles there shown were worked out to greater fulness and perfection, while the musical spirit attained a more definite richness, and escaped farther from the formalism which characterises the previous generation. Among these symphonies the most important are the following: the 'Haffner' (K. 385), which was a modification of a serenade, and had originally more than the usual group of movements; the 'Linz' symphony in C (K. 425); and the last four, the crown of the whole series. The first of these (in D major) was written for Prague in 1786 (K. 504), and was received there with immense favour in Jan. 1787. It appears to be far in advance of all its predecessors in freedom and clearness of instrumentation, in the breadth and musical significance of the subjects, and in richness and balance of form. It is one of the few of Mozart's which open with an adagio, and that, too, of unusual proportions; but it has no minuet and trio. This symphony was in its turn eclipsed by the three great ones in E_b, G minor and C (K. 543, 550, 551), which were composed at Vienna in June, July and Aug. 1788.

These symphonies are almost the first in which certain qualities of musical expression and a certain method in their treatment stand prominent in the manner which was destined to become characteristic of the great works of the early part of the 19th century. Mozart, having mastered the principle upon which the mature art-form of symphony was to be attacked, had greater freedom for the expression of his intrinsically musical ideas, and could emphasise more freely and consistently the typical characteristics which his inspiration led

him to adopt in developing his ideas. It must not, however, be supposed that this principle is to be found for the first time in these works. They find their counterparts in works of Haydn's of a much earlier date; only, inasmuch as the art-form was then less mature, the element of formalism is too strong to admit of the musical or poetical intention being so clearly realised. It is of course impossible to put into words with certainty the inherent characteristics of these or any other later works on the same lines; but that they are felt to have such characteristics is indisputable, and their perfection as works of art, which is so commonly insisted on, could not exist if it were not so. Among the many writers who have tried in some way to describe them, probably the best and most responsible is Otto Jahn. Of the first of the group (K. 543), he says, 'We find the expression of perfect happiness in the charm of euphony' which is one of the marked external characteristics of the whole work.

'The feeling of pride in the consciousness of power shines through the magnificent introduction, while the Allegro expresses the purest pleasure, now in frolicsome joy, now in active excitement, and now in noble and dignified composure. Some shadows appear, it is true, in the Andante, but they only serve to throw into stronger relief the mild serenity of a mind communing with itself and rejoicing in the peace which fills it. This is the true source of the cheerful transport which rules the last movement, rejoicing in its own strength and in the joy of being.'

Whether this is all perfectly true or not is of less consequence than the fact that a consistent and uniform style and object can be discerned through the whole work, and that it admits of an approximate description in words, without either straining or violating familiar impressions.

The second of the great symphonic trilogy—that in G minor (K. 550)—has a still clearer meaning. The contrast with the E_b is strong, for in no symphony of Mozart's is there so much sadness and regretfulness. This element also accounts for the fact that it is the most modern of his symphonies, and shows most human nature. E. T. A. Hoffmann (writing in a spirit very different from that of Jahn) says of it,

'Love and melancholy breathe forth in purest spirit tones; we feel ourselves drawn with inexpressible longing towards the forms which beckon us to join them in their flight through the clouds to another sphere.'

Jahn agrees in attributing to it a character of sorrow and complaining; and there can hardly be a doubt that the tonality as well as the style, and such characteristic features as occur incidentally, would all favour the idea that Mozart's inspiration took a sad cast, and maintained it so far throughout; so that, notwithstanding the formal passages which occasionally make their appearance at the closes, the whole work may without violation of probability receive a consistent psychological explanation. Even the orchestration seems appropriate from this point of view, since the prevailing effect is far less soft and smooth than that of the previous

symphony. A detail of historical interest in connexion with this work is the fact that Mozart originally wrote it without clarinets, and added them afterwards for a performance at which it may be presumed they happened to be specially available. He did this by taking a separate piece of paper and rearranging the oboe parts, sometimes combining the instruments and sometimes distributing the parts between the two, with due regard to their characteristic styles of utterance.

The last of Mozart's symphonies (K. 551) has so obvious and distinctive a character throughout that popular estimation has accepted the definite name 'Jupiter' as conveying the prevalent feeling about it. In this there is far less human sentiment than in the G minor. In fact, Mozart appears to have aimed at something lofty and self-contained, and therefore precluding the shade of sadness which is an element almost indispensable to strong human sympathy. When he descends from this distant height he assumes a cheerful and sometimes playful vein, as in the second principal subject of the first movement, and in the subsidiary or cadence subject that follows it. This may not be altogether in accordance with what is popularly meant by the name 'Jupiter,' though that deity appears to have been capable of a good deal of levity in his time; but it has the virtue of supplying admirable contrast to the main subjects of the section; and it is so far in consonance with them that there is no actual reversal of feeling in passing from one to the other. The slow movement has an appropriate dignity which keeps it in character, and reaches, in parts, a considerable degree of passion, which brings it nearer to human sympathy than the other movements. The minuet and the trio again show cheerful serenity, and the last movement, with its elaborate fugal treatment, has a vigorous austerity, which is an excellent balance to the character of the first movement. The scoring, especially in the first and last movements, is fuller than is usual with Mozart, and produces effects of strong and clear sound; and it is also admirably in character with the spirit of dignity and loftiness which seems to be aimed at in the greater portion of the musical subjects and figures.

In these later symphonies Mozart certainly reached a far higher pitch of art in the department of instrumental music than any hitherto arrived at. The characteristics of his attainments may be described as a freedom of style in the ideas, freedom in the treatment of the various parts of the score, and independence and appropriateness of expression in the management of the various groups of instruments employed. In comparison with the works of his predecessors, and with his own and Haydn's earlier compositions, there is through-

out a most remarkable advance in vitality. The distribution of certain cadences and passages of *tutti* still appear to modern ears formal; but compared with the immature formalism of expression, even in principal ideas, which was prevalent twenty or even ten years earlier, the improvement is immense. In such structural elements as the development of the ideas, the concise and energetic flow of the music, the distribution and contrast of instrumental tone, and the balance and proportion of sound, these works are generally held to reach a pitch almost unsurpassable from the point of view of technical criticism. Mozart's intelligence and taste, dealing with thoughts as yet undisturbed by strong or passionate emotion, attained a perfection in the sense of pure and directly intelligible art which later times can scarcely hope to see approached.

Haydn's symphonies up to this time cannot be said to equal Mozart's in any respect; though they show a considerable improvement on the style of treatment and expression in the 'Trauer' or the 'Farewell' Symphonies (Nos. 44, 45). Of those which are better known of about this date are 'La Poule' and 'Letter V' (Nos. 83, 88), which were written (both for Paris) in or about 1786. 'Letter Q,' or the 'Oxford' Symphony (No. 92), which was performed when Haydn received the degree of Doctor of Music from that university, dates from 1788, the same year as Mozart's great triad. 'Letter V' and 'Letter Q' are in his mature style, and thoroughly characteristic in every respect. The orchestration is clear and fresh, though not so sympathetic nor so elastic in its variety as Mozart's; and the ideas, with all their geniality and directness, are not up to his own highest standard. It is the last twelve, which were written for Salomon after 1790, which have really fixed Haydn's high position as a composer of symphonies; these became so popular as practically to supersede the numerous works of all his predecessors and contemporaries except Mozart, to the extent of causing them to be almost completely forgotten. This is owing partly to the high pitch of technical skill which he attained, partly to the freshness and geniality of his ideas, and partly to the vigour and daring of harmonic progression which he manifested. He and Mozart together enriched this branch of art to an extraordinary degree, and towards the end of their lives began to introduce far deeper feeling and earnestness into the style than had been customary in early works of the class. The average orchestra had increased in size, and at the same time had gained a better balance of its component elements. Instead of the customary little group of strings and four wind instruments, it had come to comprise, besides the strings, two flutes, two oboes, two bassoons, two horns, two trumpets and drums. To

these were occasionally added two clarinets, as in Haydn's last three (the two in D minor and one in E \flat (Nos. 101, 104, 103)), and in one movement of the 'Military' symphony (No. 100). Neither Mozart nor Haydn ever used trombones in symphonies; but uncommon instruments were sometimes employed, as in the 'Military,' in which Haydn used a big drum, a triangle and cymbals.

In his latest symphonies Haydn's treatment of his orchestra agrees in general with the description already given of Mozart's. The bass has attained a free motion of its own; the violas rarely cling in a dependent manner to it, but have their own individual work to do, and the same applies to the second violins, which no longer so often appear merely 'col lmo.' The wind instruments fill up and sustain the harmonies as completely as in former days; but they cease merely to hold long notes without characteristic features, or slavishly to follow the string parts whenever something livelier is required. They may still play a great deal that is mere doubling, but there is generally method in it; and the musical ideas they express are in a great measure proportioned to their char-

acters and style of utterance. Haydn was rather fond of long passages for wind alone, as in the slow movement of the 'Oxford' symphony, the opening passage of the first allegro of the 'Military' symphony, and the 'working out' of the symphony in C, No. 1 of the Salomon set (No. 97). Solos in a tune-form for wind instruments are also rather more common than in Mozart's works, and in many respects the various elements which go to make up the whole are less assimilated than they are by Mozart. The tunes are generally more definite in their outlines, and stand in less close relation with their context. It appears as if Haydn always retained to the last a strong sympathy with simple people's-tunes; the character of his minuets and trios, and especially of his finales, is sometimes strongly defined in this respect; but his way of expressing them within the limits he chose is extraordinarily finished and acute. It is possible that, as before suggested, he got his taste for surprises in harmonic progression from C. P. E. Bach. His instinct for such things, considering the age he lived in, was very remarkable. The passage below, from his symphony in C, just referred

The image displays two systems of musical notation for a symphony in C. The first system includes staves for Flutes, Oboe, Bassoon, Violins 1 & 2, Viola, and Cello & Bass. The second system includes staves for Flute, Oboe, Violins 1 & 2, Cello & Bass, and Viola. The notation includes various musical symbols such as clefs, key signatures, time signatures, and dynamic markings like *p*, *f*, and *sf*. The first system shows a passage where the strings play a rhythmic pattern while the winds enter with a melodic line. The second system shows a more complex passage with the strings playing a rhythmic pattern and the winds playing a melodic line. The notation is in a historical style, with some notes beamed together and some rests.

to, illustrates several of the above points at once.

The period of Haydn and Mozart is in every respect the principal crisis in the history of the symphony. When they came upon the scene, it was not regarded as a very important form of art. In the good musical centres of those times—and there were many—there was a great demand for symphonies; but the bands for which they were written were small, and appear from the most natural inferences not to have been very efficient or well organised. The standard of performance was evidently rough, and composers could neither expect much attention to *pianos* and *fortes*, nor any ability to grapple with technical difficulties among the players of bass instruments or violas. The audiences were critical in the one sense of requiring good healthy workmanship in the writing of the pieces—in fact much better than they would demand in the present day; but with regard to deep meaning, refinement, poetical intention, or originality, they appear to have cared very little. They wanted to be healthily pleased and entertained, not stirred with deep emotion; and the purposes of composers in those days were consequently not exalted to any high pitch, but were limited to a simple and unpretentious supply, in accordance with demand and opportunity. Haydn was influenced by these considerations till the last. There is always more fun and gaiety in his music than pensiveness or serious reflection. But in developing the technical part of expression, in proportioning the means to the end, and in organising the forces of the orchestra, what he did was of the utmost importance. It is, however, impossible to apportion the value of the work of the two masters. Haydn did a great deal of important and substantial work before Mozart came into prominence in the same field. But after the first great mark had been made by the 'Paris' symphony, Mozart seemed to rush to his culmination; and in the last four of his works reached a style which appears richer, more sympathetic and more complete than anything Haydn could attain to. Then, again, when he had passed away, Haydn produced his greatest works. Each composer had his distinctive characteristics, and each is delightful in his own way; but Haydn would probably not have reached his highest development without the influence of his more richly gifted contemporary; and Mozart for his part was undoubtedly very much under the influence of Haydn at an important part of his career. The best that can be said by way of distinguishing their respective shares in the result is that Mozart's last symphonies introduced an intrinsically musical element which had before been wanting, and showed a supreme perfection of actual art in their structure; while Haydn in the long series of

his works cultivated and refined his own powers to such an extent that when his last symphonies had made their appearance, the status of the symphony was raised beyond the possibility of a return to the old level. In fact he gave this branch of art a stability and breadth which served as the basis upon which the art of succeeding generations appears to rest; and the simplicity and clearness of his style and structural principles supplied an intelligible model for his successors to follow.

GOSSEC AND OTHERS.—One of the most important of the contemporaries of Haydn and Mozart in this department of art was F. J. Gossec. He was born in 1733, one year after Haydn, and lived like him to a good old age. His chief claim to remembrance is the good work which he did in improving the standard of taste for instrumental music in France. According to Fétis such things as instrumental symphonies were absolutely unknown in Paris before 1754, in which year Gossec published his first, five years before Haydn's first attempt. Gossec's work was carried on most effectually by his founding, in 1770, the Concert des Amateurs, for whom he wrote his most important works. He also took the management of the famous Concert Spirituel, with Gaviniés and Leduc, in 1773, and furthered the cause of good instrumental music there as well. The few symphonies of his to be found in this country are of the same calibre, and for the same groups of instruments, as those of J. C. Bach, Abel, etc., already described; but Fétis attributes importance to him chiefly because of the way in which he extended the dimensions and resources of the orchestra. His symphony in D, No. 21, written soon after the founding of the Concert des Amateurs, was for a full set of strings, flutes, oboes, clarinets, bassoons, horns, trumpets and drums; and this was doubtless an astonishing force to the Parisians, accustomed as they had been to regard the compositions of Lully and Rameau as the best specimens of instrumental music. But it is clear from other indications that Gossec had considerable ideas about the ways in which instrumental music might be improved, analogous on a much smaller scale to the aspirations and attempts of Berlioz at a later date. Not only are his works carefully marked with *pianos* and *fortes*, but in some (as the symphonies of op. 12) there are elaborate directions as to how the movements are to be played. Some of these are curious. For instance, over the first violin part of the slow movement of the second symphony is printed the following:

'La différence du Fort au Doux dans ce morceau doit être excessive, et le mouvement modéré, à l'aise, qu'il semble se jouer avec la plus grande facilité.'

Nearly all the separate movements of this set have some such directions, either longer or shorter; the inference from which is that Gossec had a strong idea of expression and style

in performance, and did not find his bands very easily led in these respects. The movements themselves are on the same small scale as those of J. C. Bach, Abel and Stamitz; and very rarely have the double bar and repeat in the first movements, though these often make their appearance in the finales. The style is to a certain extent individual; not so robust or so full as that of Bach or Stamitz, but not without attractiveness. The following quotation from the last movement of a symphony in B \flat will serve to give some idea of his style and manner of scoring:

Allegro ballabile.

Oboi.

Corni in E \flat .

Violini 1 & 2.

Viola.

Cello e Basso.

etc.

etc.

Another composer of symphonies, who is often heard of in juxtaposition with Haydn and Mozart, and sometimes as being preferred to them by the audiences of the time, is Gyrowetz. His symphonies appear to be on a larger scale than those of the prior generation of composers of second rank like himself. A few of them are occasionally to be met with in collections of 'Periodical overtures,' 'symphonies,' etc., published in separate orchestral parts. One in C, scored for small orchestra, has an introductory adagio, an allegro of about the dimensions of Haydn's earlier first movements, with double

bar in the middle; then an andante *con sordini* (the latter a favourite device in central slow movements); then a minuet and trio, and, to end with, a rondo in 2-4 time, allegro non troppo. Others, in E \flat and B \flat , have much the same distribution of movements, but without the introductory adagio. The style of them is rather mild and complacent, and not approaching in any way the interest or breadth of the works of his great contemporaries; but the subjects are clear and vivacious, and the movements seem fairly developed. Other symphony writers, who had vogue and even celebrity about this time and a little later, such as Krommer (beloved by Schubert), the Rombergs and Eberl (at one time preferred to Beethoven), require no more than passing mention. They certainly furthered the branch of art very little, and were so completely extinguished by the exceptionally great writers who came close upon one another at that time that it is even difficult to find traces of them.

BETHOVEN.—The greatest of all masters of the symphony followed so close upon Haydn that there is less of a gap between the last of Haydn's symphonies and his first than there was later between some of his own. Haydn's last was probably written in 1795. When Beethoven wrote his first cannot be ascertained; sketches for the finale are found as early as the year last mentioned; but it was not actually produced in public till Apr. 2, 1800. Like Schumann and Brahms in later days, he did not turn his attention to this branch of composition till comparatively late. The opus-number of his first symphony is 21. It is preceded by eleven pianoforte sonatas, several works for pianoforte combined with other instruments, the well-known septet in E \flat and several chamber compositions for strings. So that by the time he came to attacking symphony he had had considerable practice in dealing with structural matters. The only works in which he had tried his strength with the orchestra were the two piano concertos—the B \flat , op. 19, which was written in or about 1795, and the C major, op. 15, which was written about 1796. He showed himself at once a master of the orchestra; but it is evident that at first he stepped cautiously in expressing himself with such resources.

The first symphony is less free and rich in expression, and has more elements of formality, than several works on a smaller scale which preceded it. This is explicable on the general ground that the orchestra, especially in those days, was not a fit exponent of the same kind of things which could be expressed by solo violins or the pianoforte. The scale must necessarily be larger and broader; the intricate development and delicate or subtle sentiment which is quite appropriate and intelligible in the intimacy of a domestic circle is out of place in the more public conditions of orchestral performance.

This Beethoven must have instinctively felt, and he appears not to have found the style for full expression of his personality in either of the first symphonies. The second is even more curious in that respect than the first, as it comes after one of the richest and most interesting, and another of the most perfectly charming and original of the works of his early period, namely, the sonatas in D minor and E \flat of op. 31. However, even in these two symphonies there is a massiveness and breadth and seriousness of purpose which mark them as products of a different and more powerfully constituted nature than anything of the kind produced before. At the time when the first symphony appeared, the opening with the chord of the minor 7th of C, when the key of the piece was C major, was looked upon as extremely daring; and the narrow-minded pedants of the day felt their sensitive delicacy so outraged that some of them are said never to have forgiven it. The case is very similar to the famous introduction to Mozart's C major string quartet, about which the pedants were little less than insulting. Beethoven had to fight for his right to express what he felt to be true; and he did it without flinching; sometimes with an apparent relish. But at the same time, in these early orchestral works he seems to have experimented with caution, and was content to follow his predecessors in a great deal that he put down. There are characteristic things in both symphonies; for instance, in the first the transitional passage which begins at the 65th bar of the allegro, passing from G to G minor and then to B \flat and back again, and the corresponding passage in the second half of the movement. The working out of the andante cantabile and the persistent drum rhythm are also striking points. In the second symphony the dimensions of the introduction are unusual, and the character of all the latter part and the freedom of the transitions in it are decisive marks of his tendencies. The slow movement has also a warmth and sense of genuine sympathy which is new; the scherzo, though as yet short, has a totally new character about it, and the abrupt sforzandos and short striking figures, and still more the coda, of the finale are quite his own. In the orchestra it is worth noting that he adopted clarinets from the first, apparently as a matter of course; in the first two symphonies he continued to use only the one pair of horns, as his predecessors had done; in the third he expanded the group to three. In the fourth he went back to two, and did not use four till the ninth. The disposition of his forces even in the first two is more independent and varied than his predecessors.' The treatment of the several groups of instruments tends to be more distinct and appropriate, and at the same time more perfectly assimilated in the total effect of the music.

'EROICA' AND THE NEW ERA.—The step to the third symphony is, however, immense, and at last shows this branch of composition on a level with his other works of the same period. It is surrounded on both sides by some of his noblest achievements. Op. 47 was the sonata in A for violin and pianoforte, known as the 'Kreutzer.' Op. 53 is the sonata in C major, dedicated to Count Waldstein. Op. 54 is the admirable little sonata in F major. Op. 55 is the symphony, and op. 57 the sonata known as the 'Appassionata.' It appears that Beethoven had the idea of writing this symphony as early as 1798, but the actual work was probably done in the summer and autumn of 1803. There seems to be no doubt that it was written under the influence of his admiration for Napoleon. His own title-page had on it 'Sinfonia grande. Napoleon Bonaparte,' and, as is well known, the name 'Eroica' was not added till Napoleon became Emperor; after which event Beethoven's feelings about him naturally underwent a change. To call a great work by the name of a great man was quite a different thing from calling it by the name of a crowned ruler. However, the point remains the same, that the work was written with a definite purpose and under the inspiration of a special subject, and one upon which Beethoven himself assuredly had a very decided opinion. The result was the richest and noblest and by far the biggest symphony that had ever yet appeared in the world. It is very possible that Beethoven meant it to be so; but the fact does not make the step from the previous symphonies any the less remarkable. The scoring throughout is most freely distributed. In the first movement especially there is hardly any one of the numerous subjects and characteristic figures which has not properties demanding different departments of the orchestra to express them. They are obviously conceived with reference to the whole forces at command, not to a predominant central force and appendages. The strings must necessarily have the greater part of the work to do, but the symphony is not written for them with wind as a species of afterthought. But it is still to be noticed that the balance is obtained chiefly by definite propositions and answers between one group and another, and though the effect is delightful, the principle is rendered a little obvious from the regularity of its occurrence. The second movement is specially noticeable as reaching the strongest pitch of sentiment as yet shown in an orchestral slow movement. In the earliest symphonies these movements were nearly always remarkably short, and scored for fewer instruments than the first and last. Frequently they were little better than 'intermezzi,' attached on both sides to the more important allegros. Even Mozart's and Haydn's latest examples had

more grace and sweetness than deep feeling, and frequently showed a tendency to formalism in the expression of the ideas and in the ways in which the ornamental *fioriture* were introduced. In the *Eroica* the name '*Marcia funebre*' at once defines the object; and though the form of a march is to a certain extent maintained, it is obvious that it is of secondary importance, since the attention is more drawn to the rich and noble expression of the finest feelings of humanity over the poetically imagined death of one of the world's heroes than to the traditional march form. The music seems in fact to take almost the definiteness of speech of the highest order; or rather, to express the emotions which belong to the imagined situation with more fullness and comprehensiveness, but with scarcely less definiteness, than speech could achieve. In the third movement appears the first of Beethoven's large orchestral scherzos. Any connexion between it and the typical minuet and trio it is hard to see. The time is quicker and more bustling; and the character utterly distinct from the suave grace and somewhat measured paces of most of the previous third movements. The main points of connexion with them are firstly the general outlines of form (that is, the principal portion of the scherzo corresponding to the minuet comes first and last, and the trio in the middle) and secondly the humorous element. In this latter particular there is very great difference between the *naïf* and spontaneous fun of Haydn and the grim humour of Beethoven, sometimes verging upon irony, and sometimes, with evident purpose, upon the grotesque. The scherzo of the *Eroica* is not alloyed with so much grimness as some later ones, but it has traits of melancholy and seriousness here and there. The effect in its place is chiefly that of portraying the fickle crowd who soon forget their hero, and chatter and bustle cheerfully about their business or pleasure as before; which has its humorous or at least laughter-making ironical side to any one large-minded enough to avoid thinking of all such traits of humanity with reprobation and disgust. The last movement is on a scale more than equal to that of all the others, and, like them, strikes an almost entirely new note in symphonic finales. The light and simple character of Haydn's final rondos is familiar to every one; and he was consistent in aiming at gaiety for conclusion. Mozart in most cases did the same; but in the G minor symphony there is a touch of rather vehement regretfulness, and in the C major of strength and seriousness. But the finale of the *Eroica* first introduces qualities of massiveness and broad earnest dignity to that position in the symphony. The object is evidently to crown the work in a totally different sense from the light cheerful endings of most previous symphonies, and to appeal to fine feelings in the audience instead of aiming at

putting them in a cheerful humour. It is all the difference between an audience before the revolutionary epoch and after. The starting-point of the movement is the same theme from the Prometheus music as that of the pianoforte variations in E \flat (op. 35). The basis of the whole movement is mainly the variation-form, interspersed with fugale episodes; and a remarkable feature is the long andante variation immediately before the finale presto—a somewhat unusual feature in such a position, though Haydn introduced a long passage of adagio in the middle of the last movement of a symphony in F written about 1777, but of course in a very different spirit. The finale of the *Eroica* as a whole is so unusual in form that it is not wonderful that opinions have varied much concerning it. As a piece of art it is neither so perfect nor so convincing as the other movements; but it has very noble and wonderful traits, and, as a grand experiment in an almost totally new direction, has a decided historical importance.

THE MIDDLE PERIOD.—It is not necessary to go through the whole series of Beethoven's symphonies in detail, for one reason because they are so generally familiar to musicians, and for another because they have been so fully discussed from different points of view in this Dictionary. Some short simple particulars about each may, however, be useful and interesting. The order of composition of the works which succeeded the *Eroica* symphony is almost impossible to unravel. By opus-number the fourth symphony in B \flat comes very soon, being op. 60; but the sketches for the last movement are in the same sketch-book as parts of '*Fidelio*,' which is op. 72, and the concerto in G, which is op. 58, was begun after '*Fidelio*' was finished. It can only be seen clearly that his works were crowded close together in this part of his life, and interest attaches to the fact that they represent the warmest and most popular group of all. Close to the B \flat symphony come the overture to '*Coriolan*,' the three string quartets, op. 59, the violin concerto, the PF. concerto in G major, the symphony in C minor and the '*Sinfonia Pastorale*.' The B \flat is on a smaller scale than its predecessor, and of lighter and gayer cast. The opening bars of the introduction are almost the only part which has a trace of sadness in it; and this is probably meant to throw the brightness of the rest of the work into stronger relief. Even the slow movement contains more serenity than deep emotion. The scherzo is peculiar for having the trio repeated—altogether a new point in symphony-writing, and one which was not left unpeated or unimitated. What the symphony was meant to express cannot be known, but it certainly is as complete and consistent as any.

The C minor which followed has been said to

be the first in which Beethoven expressed himself freely and absolutely, and threw away all traces of formalism in expression or development to give vent to the perfect utterance of his musical feeling. It certainly is so far the most forcible, and most remote from conventionalism of every kind. It was probably written very nearly about the same time as the B \flat . Nottebohm says the first two movements were written in 1805; and, if this is the fact, his work on the B \flat and on the C minor must have overlapped. Nothing, however, could be much stronger than the contrast between the two. The C minor is, in the first and most striking movement, rugged, terrible in force; a sort of struggle with fate, one of the most thoroughly characteristic of Beethoven's productions. The second is a contrast: peaceful, though strong and earnest. The scherzo again is one of his most original movements; in its musical spirit as utterly unlike anything that had been produced before as possible. Full of fancy, fun and humour, and, notwithstanding the pauses and changes of time, wonderful in swing; and containing some devices of orchestration quite magical in their clearness and their fitness to the ideas. The last movement, which follows without break after the scherzo, is triumphant; seeming to express the mastery in the wrestling and striving of the first movement. It is historically interesting as the first appearance of trombones and contrafagotto in modern symphony; and the most powerful in sound up to that time. The next symphony, which is also the next opus-number, is the 'Pastoral,' probably written in 1808, the second of Beethoven's which has a definitely stated idea as the basis of its inspiration, and the first in which a programme is suggested for each individual movement; though Beethoven is careful to explain that it is 'mehr Empfindung als Malerei.' Any account of this happy inspiration is clearly superfluous (see PASTORAL SYMPHONY). The situations and scenes which it brings to the mind are familiar, and not likely to be less beloved as the world grows older. The style is again in great contrast to that of the C minor, being characterised rather by serenity and contentment; which, as Beethoven had not heard of all the troubles of the land question, might naturally be his feelings about country life. He used two trombones in the last two movements, but otherwise contented himself with the same group of instruments as in his earliest symphonies.

After this there was a pause for some years, during which time appeared many noble and delightful works on other lines, including the pianoforte trios in D and E \flat , the Mass in C minor, op. 86, the music to 'Egmont,' op. 84, and several sonatas. Then in one year, 1812, two symphonies appeared. The first of the two, in A major, numbered op. 92, is looked

upon by many as the most romantic of all of them; and certainly has qualities which increase in attractiveness the better it is known and understood. Among specially noticeable points are the unusual proportions and great interest of the introduction (*poco sostenuto*); the singular and fascinating wilfulness of the first movement, which is enhanced by some very characteristic orchestration; the noble calm of the slow movement; the merry humour of the scherzo, which has again the same peculiarity as the fourth symphony, that the trio is repeated (for which the world has every reason to be thankful, as it is one of the most completely enjoyable things in all symphonic literature); and finally the wild headlong abandonment of the last movement, which might be an idealised national or rather barbaric dance-movement, and which sets the crown fitly upon one of the most characteristic of Beethoven's works. The symphony in F, which follows immediately as op. 93, is again of a totally different character. It is of specially small proportions, and has rather the character of a return to the old conditions of the symphony, with all the advantages of Beethoven's mature powers both in the development and choice of ideas, and in the treatment of the orchestra. Beethoven himself, in a letter to Salomon, described it as 'eine kleine Symphonie in F,' as distinguished from the previous one, which he called 'Grosse Symphonie in A, eine meiner vorzüglichsten.' It has more fun and light-heartedness in it than any of the others, but no other specially distinctive external characteristics, except the substitution of the graceful and humorous 'Allegretto scherzando' in the place of the slow movement, and a return to the 'Tempo di menuetto' for the scherzo.

THE NINTH SYMPHONY.—After this came again a long pause, as the greatest of all symphonies did not make its appearance till 1824. During that time, however, it is probable that symphonic work was not out of his mind, for it is certain that the preparations for putting this symphony down on paper spread over several years. Of the introduction of voices into this form of composition, which is its strongest external characteristic, Beethoven had made a previous experiment in the 'Choral Fantasia'; and he himself spoke of the symphony as 'in the style of the Choral Fantasia, but on a far larger scale.' The scale is indeed immensely larger, not only in length but in style, and the increase in this respect applies to it equally in comparison with all the symphonies that went before.

The first movement is throughout the most concentrated example of the qualities which distinguish Beethoven, and the new phase upon which music entered with him, from all the composers of the previous half-century. The other movements are not less characteristic of

him in their particular ways. The second is the largest example of the typical scherzo which first made its appearance for the orchestra in the *Eroica*; and the supreme slow movement (the theme with variations) is the finest orchestral example of that special type of slow movement; though in other departments of art he had previously illustrated it in a manner little less noble and deeply expressive in the slow movements of the *B \flat* trio and the *B \flat* sonata (op. 106). These movements all have reference, more or less intelligible according to the organisation and sympathies of the hearer, to the finale of the symphony, which consists of a setting of Schiller's ode 'An die Freude.' Its development into such enormous proportions is of a piece with the tendency shown in Beethoven's previous symphonies, and in some of his sonatas also, to supplant the conventional type of gay last movement by something which shall be a logical or poetical outcome of the preceding movements, and shall in some way clench them, or crown them with its weight and power. The introduction of words, moreover, gives a new force to the definite interpretation of the whole as a single organism, developed as a poem might be in relation to definite and coherent ideas.

The dramatic and human elements, which Beethoven introduced into his instrumental music to a degree before undreamed of, find here their fullest expression; and most of the forms of music are called in to convey his ideas. The first movement of the symphony is in binary form; the second in scherzo, or idealised minuet and trio form; the third in the form of theme and variations. Then follows the curious passage of instrumental recitative, of which so many people guessed the meaning even before it was defined by the publication of the extracts from the MS. sketch-books in the Berlin Library; then the entry of the noble tune, the theme of the entire finale, introduced contrapuntally in a manner which has a clear analogy to fugal treatment; and followed by the choral part, which treats the theme in the form of variations apporportioned to the several verses of the poem, and carries the sentiment to the extremest pitch of exultation expressible by the human voice. The instrumental forces employed are the fullest; including, with the usual complement, four horns, three trombones in the scherzo and finale, and contrafagotto, triangle, cymbals, and big drum in the finale. The choral forces include four solo voices and full chorus, and the sentiment expressed is proportionate to the forces employed.

In Beethoven's hands the symphony has again undergone a change of status. Haydn and Mozart, as above pointed out, ennobled and enriched the form in the structural sense. They took up the work when there was little more expected of the orchestra than would have been

expected of a harpsichord, and when the object of the piece was slight and almost momentary entertainment. They left it one of the most important branches of instrumental music, though still to a great extent dependent on formal perfection and somewhat obvious artistic management for its interest. Their office was in fact to perfect the form, and Beethoven's to use it. But the very use of it brought about a new ratio between its various elements. In his work first clearly appears a proportion between the forces employed and the nobility and depth and general importance of the musical ideas. In his hands the greatest and most pliable means available for the composer could be no longer fit for lightness and triviality, but only for ideal emotions of an adequate standard. It is true that earlier composers saw the advantage of adopting a breadth of style and largeness of sentiment when writing for the orchestra; but this mostly resulted in positive dullness. It seems as if it could only be when the circumstances of history had undergone a violent change that human sentiment could reach that pitch of comprehensiveness which in Beethoven's work raised the symphony to the highest pitch of earnest poetic feeling: and the history of his development is chiefly the co-ordination of all the component elements; the proportioning of the expression and style to the means; the expansion of the form to the requirements of the expression; the making of the orchestration perfectly free, but perfectly just in every detail of expression, and perfectly balanced in itself; and the eradication of all traces of conventionalism both in the details and in the principal outlines, and also to a great extent in the treatment of the instruments. It is chiefly through Beethoven's work that the symphony now stands at the head of all musical forms whatever; and though other composers may hereafter misuse and degrade it as they have degraded the opera, the cantata, the oratorio, the mass, and such other forms as have equal possibilities with the symphony, his works of this kind stand at such an elevation of human sympathy and emotion, and at such a pitch of individuality and power in expression and technical mastery, that it is scarcely likely that any branch of musical art will ever show anything to surpass them.

THE POST-BEETHOVEN SCHOOL.—It might seem almost superfluous to trace the history of symphony further after Beethoven.¹ Nothing since his time has shown, nor in the changing conditions of the history of the race is it likely anything should show, any approach to

¹ This was written some fifty years ago, when only the first two of Brahms's symphonies had made an appearance, and others of the later 19th-century symphonists were unknown. The fulness of Parry's appreciation of Brahms's first two symphonies is sufficiently shown in the latter part of this article. It is doubtful whether he would have modified this sentence in 1928. Readers may decide for themselves in the light of what is added under LATER DEVELOPMENTS.

the vitality and depth of his work. But it is just these changing conditions that leave a little opening for composers to tread the same path with him. In the millions of the human species there are endless varieties of mental and emotional qualities grouped in different individuals and different bands or sets of men; and the many-sided qualities of artistic work, even far below the highest standard, find their excuse and explanation in the various groups and types of mind whose artistic desires they satisfy. Those who are most highly organised in such respects find their most perfect and most sustained gratification in Beethoven's works; but others who feel less deeply, or are less wide in their sympathies, or have fewer or different opportunities of cultivating their tastes in such a musical direction, need musical food more in accordance with their mental and emotional organisation. Moreover, there is always room to treat an accepted form in the mode characteristic of the period. Beethoven's period was much more like ours than that of Haydn and Mozart, but yet it is not so like that a work expressed entirely in his manner would not be an anachronism. Each successive generation takes some colour from the combination of work and changes in all previous generations; in unequal quantities proportioned to its amount of sympathy with particular periods.

By the side of Beethoven there were other composers, working either on parallel lines or in a different manner on the same lines. The succeeding generations were influenced by them as well as by him; and they have introduced some elements into symphony which are at least not prominent in his. One of the contemporary composers who had most influence on the later generation was Weber; but his influence is derived from other departments, and in that of symphony his contribution is next to nothing—two only, so slight and unimportant as probably to have had no influence at all.

Another composer's symphonies did not have much immediate influence, chiefly because they were not performed. In delightfulness, Schubert's two best works in this department stand almost alone; and their qualities are unique. In his earlier works of the kind there is an analogy to Beethoven's early works. Writing for the orchestra seemed to paralyse his particular individuality; and for some time after he had written some of his finest and most original songs, he continued to write symphonies which were chiefly a mild reflex of Haydn and Mozart, or at most of the early style of Beethoven. His first attempt was made in 1813, the last page being dated Oct. 28 of that year, when he was yet only 16 years old—one year after Beethoven's symphonies in A and F, and more than ten years before the great

D minor. In the five following years he wrote five more, the best of which is No. 4, the 'Tragic,' in C minor; the andante especially being very fine and interesting, and containing many characteristic traits of the master. But none of the early works approach in interest or original beauty to the unfinished one in B minor, and the very long and vigorous one in C major; the first composed in 1822, before Beethoven's No. 9, and the second in 1828, after it. In these two he seems to have struck out a real independent symphony-style for himself, thoroughly individual in every respect, both of idea, form and orchestration. They show singularly little of the influence of Beethoven, or Mozart, or Haydn, or any of the composers he must have been familiar with in his early days at the Konvikt; but the same spirit as is met with in his songs and pianoforte pieces, and the best specimens of his chamber music. The first movement of the B minor is entirely unlike any other symphonic first movement that ever was composed before. It seems to come direct from the heart, and to have the personality of the composer in it to a most unusual degree. The orchestral forces used are the usual ones,¹ but in the management of them there are numbers of effects which are perfectly new in this department of art, indicating the tendency of the time towards direct consideration of what is called 'colour' in orchestral combinations, and its employment with the view of enhancing the degree of actual sensuous enjoyment of a refined kind, to some extent independent of the subjects and figures. Schubert's mature orchestral works are, however, too few to give any strong indication of this in his own person; and what is commonly felt is the supreme attractiveness of the ideas and general style. As classical models of form none of Schubert's instrumental works take the highest rank; and it follows that no compositions by any writer which have taken such hold upon the musicians of the present time² depend so much upon their intrinsic musical qualities as his do. They are therefore in a sense the extremest examples that can be given of the degree in which the status of such music altered in about thirty years. In the epoch of Mozart and Haydn, the formal elements absolutely predominated in importance. This was the case in 1795. The balance was so completely altered in the course of Beethoven's lifetime, that by 1824 the phenomenon is presented of works in the highest line of musical composition depending on the predominating element of the actual musical sentiment. It must be confessed that Schubert's position in art is unique; but at the same time no man of mark can be quite unrepresentative of his time, and Schubert in this way represents the

¹ Excepting only that he uses three trombones, an unusual thing in first movements at the date.

² I.e. about 1880.

extraordinary degree in which the attention of musical people and the intention of composers in the early years of the 19th century were directed to the actual material of music in its expressive sense as distinguished from the external or structural aspect.

The relation of the dates at which more or less well-known symphonies made their appearance about this time is curious and not un-instructive. Mendelssohn's 'Reformation' symphony was produced only two years after Schubert's great symphony in C, namely in 1830. His Italian symphony followed in the next year; and Sterndale Bennett's, in G minor, in 1834.

SPOHR'S PROGRAMME SYMPHONIES.—The dates and history of Spohr's productions are even more striking, as he was actually a contemporary of Beethoven's and senior to Schubert, while in all respects in which his style is characteristic it represents quite a later generation. His first symphony (in E \flat) was composed in 1811, before Beethoven's 7th, 8th and 9th, and when he himself was 27 years old. This was followed by several others, which are not without merit, though not of sufficient historical importance to require special consideration. The symphony of his which is best remembered at the present day is that called the 'Weihe der Töne,' which at one time enjoyed great celebrity. The history of this work is as follows. He intended first to set a poem of the same name by his friend Pfeiffer. He began the setting in 1832, but finding it unsatisfactory he abandoned the idea of using the words except as a programme; in which form they are appended to the score. The full description and purpose of the work as expressed on the title is 'Characteristisches Tongemälde in Form einer Sinfonie, nach einem Gedicht von Carl Pfeiffer'; and a printed notice from the composer is appended to the score directing that the poem is to be either printed or recited aloud whenever the symphony is to be performed. Each movement also has its title, like the Pastoral of Beethoven; but it differs from that work not only in its less substantial interest, but also in a much more marked departure from the ordinary principles of form, and the style of the successive movements.

The earlier part of the work corresponds fairly well with the usual principles of structure. It opens with a short largo of vague character, passing into the allegro, which is a continuous movement of the usual description, in a sweet but rather tame style. The next movement might be taken to stand for the usual slow movement, as it begins andantino; but the development is original, as it is broken up by several changes of tempo and time-signatures, and is evidently based upon a programme, for which its title supplies an explanation. The next movement again might be taken as an

alternative to the minuet and trio, being marked 'Tempo di Marcia,' which would suggest the same general outline of form. But the development is again independent, and must be supposed to follow its title. From this point all connexion with the usual outlines ceases. There is an andante maestoso, based upon the plain-song of the Te Deum, a larghetto containing a second hymn-tune, and a short allegretto in simple primary form to conclude with. From this description it will be obvious that the work is an example of thoroughgoing 'programme music.' It is clearly based rather on the musical portrayal of a succession of ideas in themselves independent of music, than upon the treatment of principles of abstract form and ideas intrinsically musical. It derives from this fact a historical importance which its musical qualities taken alone would not warrant, as it is one of the very first German examples of its kind possessing any high artistic excellences of treatment, expression and orchestration. It contains a plentiful supply of Spohr's characteristic faults, and is for the most part superficial, and deficient in warmth of feeling and nobility of thought; but it has also a fair share of his good traits—delicacy and clearness of orchestration, and a certain amount of poetical sentiment. Its success was considerable, and this, rather than any abstract theorising upon the tendencies of modern music, led him to several further experiments in the same line. The symphony (in C minor) which followed the 'Weihe der Töne' was on the old lines, and does not require much notice. It contains experiments in unifying the work by unusual references to subjects, as in the first movement, where conspicuous reference is made in the middle part of the allegro to the characteristic feature of the slow introduction; and in the last, where the same subject is somewhat transformed, and reappears in a different time as a prominent feature of the second section. In the next symphony, and in the seventh and ninth, Spohr again tried experiments in programme.

Two of these are such curiosities as to deserve description. The sixth, op. 116, in G is called 'Historische Symphonie,' and the four movements are supposed to be illustrations of four distinct musical periods. The first is called the Period of Handel and Bach, and dated 1720; the second, the Period of Haydn and Mozart, and dated 1780 (i.e. before any of the greatest instrumental works of either Haydn or Mozart were produced); the third is the Period of Beethoven, and dated 1810; and the fourth, 'Allerneueste Periode,' and dated 1840. This last title seems to imply that Spohr regarded himself as belonging to a different generation from Beethoven. The first period is represented by an introductory largo in contrapuntal style, and an allegro movement, part after the manner of the old canzonas, and part a pastorale, intro-

duced for contrast. The style has scarcely the least affinity to Bach, but the Handelian character is extremely easy to imitate, and hence in some respects it justifies its title fairly well. The slow movement which follows has good qualities and graceful points. It has more the flavour of Mozart than Haydn, and this is enhanced by the Mozartian turns and figures which are introduced. One which is very conspicuous is the short figure—

which is found in several places in Mozart's works. The second subject, moreover, is only an ingenious alteration of the second subject in the slow movement of Mozart's Prague symphony in D:

Nevertheless, the whole effect of the movement is not what its title implies. The scoring is fuller, and the inner parts richer and freer in their motion than in the prototypes, and the harmonisation is more chromatic, after Spohr's manner. The Scherzo professes to be in Beethoven's style, and some of his characteristic devices of harmony and rhythm and treatment of instruments are fairly well imitated (e.g. the drums in G, D, and E \flat), though in a manner which shows they were but half understood.

The last movement, representing the then 'latest period,' has of course no names appended. Spohr probably did not intend to imitate any one, but was satisfied to write in his own manner, of which the movement is not a highly satisfactory example. It is perhaps rather to the composer's credit that his own characteristics should peep out at all corners in all the movements, but the result can hardly be called an artistic success. However, the experiment deserves to be recorded and described, as unique among works by composers of such standing and ability as Spohr; and the more so as it is not likely to be often heard in future.

His next symphony (No. 7, in C major, op. 121) is in many respects as great a curiosity of a totally different description. It is called 'Irdisches und Göttliches im Menschenleben,' and is a double symphony in three movements for two orchestras. The first movement is called 'Kinderwelt,' the second 'Zeit der Leiden-schaften,' and the last (Presto) 'Endlicher Sieg des Göttlichen.' In the first two the second orchestra, which is the fuller of the two, is

little more than an accompaniment to the first. In the last it has a good deal of work to do, uttering chiefly vehement and bustling passages in contrast with quiet and sober passages by the first orchestra; until near the end, when it appears to be subduced into consonance with the first orchestra. The idea seems to be to depict the divine and the worldly qualities more or less by the two orchestras: the divine being given to the smaller orchestra of solo instruments, and the worldly to the fuller orchestra. The treatment of the instrumental forces is on the whole very simple; and no very extraordinary effects seem to be aimed at.

Spohr wrote yet another programme symphony after this (No. 9, in B, op. 143) called 'Die Jahreszeiten,' in which Winter and Spring are joined to make Part I., and Summer and Autumn to make Part II. The work approaches more nearly to the ordinary outlines of the symphony than his previous experiments in programme, and does not seem to demand so much detailed description. In fact, but for his having been so early in the field as a writer of thoroughgoing programme-music, Spohr's position in the history of the symphony would not be an important one; and it is worthy of remark that his being so at all appears to have been an accident. The 'Weihe der Töne' would not have been a programme symphony but for the fact that Pfeiffer's poem did not turn out to be very suitable for a musical setting. It is not likely that the work would have attained such popularity as it did but for its programme; but after so good a result in relation to the public, it was natural that Spohr should try further experiments on the same lines; and hence he became one of the earliest representatives of artistic speculation in a direction which has become one of the most conspicuous subjects of discussion among modern musical philosophers. As far as intrinsic qualities are concerned it is remarkable how very little influence he has had upon the subsequent history of the symphony, considering the reputation he enjoyed in his lifetime. His greatest excellence was his treatment of his orchestra, which was delicate, refined and extremely clear; but it must be confessed that he erred on the side natural to the virtuoso violinist, and was too fond of bringing his first violins into prominence. His ideas and style generally were not robust or noble enough to stand the test of time. His melodies are not broad or strong; his harmonisation, though very chromatic to look at, is not radically free and vigorous; and his rhythm, though sometimes complicated and ingenious, is neither forcible nor rich in variety. None of his works, however, can be said to be without their good points, and the singularity of his attempts at programme-music gives them an interest which the unlikelihood of many

performances in the future does not by any means diminish.

An interesting fact in connexion with Spohr and the history of the symphony is that he was the first to conduct an orchestra in England with a baton; the practice having previously been to conduct 'at the pianoforte.' The occasion was one of the Philharmonic Concerts in 1820 (see *BATON; CONDUCTING; SPOHR*). The habit of conducting at the pianoforte was evidently a tradition continued from the days when the symphony was an appendage of the opera, when the principal authority, often the composer in person, sat at the principal clavier in the middle of the orchestra giving the time at his instrument, and filling in the harmonies under the guidance of a figured bass. Almost all the earlier independent symphonies, including those of Philip Emanuel Bach of 1776, and some of Haydn's earlier ones, have such a figured bass for the clavier-player, and an extra bass part is commonly found in the sets of parts which may be reasonably surmised to be for his use.¹ The practice was at last abrogated in England by Spohr, possibly because he was not a clavier but a violin player. In Germany it was evidently discontinued some time earlier.

MENDELSSOHN'S POSITION.—The most distinguished composers of symphonies who wrote at the same time as Spohr, were entirely independent of him. The first of these is Mendelssohn, whose earliest symphonies even overlap Beethoven, and whose better-known works of the kind, as before mentioned, begin about the same time as Spohr's best examples, and extend over nearly the same period as his later ones. The earliest which survives in print is that in C minor dedicated to the London Philharmonic Society. This work was really his thirteenth symphony, and was finished on Mar. 31, 1824, when he was only 15 years old, in the very year that Beethoven's ninth symphony was first performed. The work is more historically than musically interesting. It shows, as might be expected, how much stronger the mechanical side of Mendelssohn's artistic nature was, even as a boy, than his poetical side. Technically the work is extraordinarily mature. It evinces not only a perfect and complete facility in laying the outline and carrying out the details of form, but also the acutest sense of the balance and proportion of tone of the orchestra. The limits of the attempt are not extensive, and the absence of strong feeling or aspiration in the boy facilitated the execution. The predominant influence is clearly that of Mozart. Not only the treatment of the lower and subordinate parts of the harmony, but the distribution and management of the different

sections and even the ideas, are like. There is scarcely a trace of the influence of Beethoven, and not much of the features afterwards characteristic of the composer himself. The most individual movements are the slow movement and the trio. The former is tolerably free from the influence of the artificial and mannered slow movements of the Haydn and Mozart style, and at the same time does not derive its inspiration from Beethoven; it contains some very free experiments in modulation, enharmonic and otherwise, a few characteristic figures similar to some which he made use of later in his career, and passages of melody clearly predicting the composer of the 'Lieder ohne Worte' and the short slow movements of the organ sonatas. The trio is long and very original in intention, the chief feature being ingenious treatment of arpeggios for the strings in many parts. The other movements are for the most part formal. The minuet is extraordinarily like that of Mozart's G minor symphony, not only in accent and style, but in the manner in which the strings and the wind are grouped and balanced, especially in the short passage for wind alone which occurs towards the end of each half of the movement. It was possibly owing to this circumstance that Mendelssohn substituted for it the orchestral arrangement of the scherzo of his octet when the work was performed later in his life. In the last movement the most characteristic passage is the second subject, with the short chords of pizzicato strings, and the tune for the clarinet which comes after the completion of the first period by strings alone. He used the same device more than once later, and managed it more satisfactorily. But it is just such suggestions of the working of the musical spirit in the man which make an early work interesting.

His next symphony happened to illustrate the supposed tendency of the age towards programme. It was intended for the tercentenary festival of the Augsburg Protestant Confession in 1830, though owing to political circumstances its performance was deferred till later. He evidently had not made up his mind what to call it till some time after it was finished, as he wrote to his sister and suggested 'Confession Symphony,' or 'Symphony for a Church Festival,' as alternative names. But it is quite evident, nevertheless, that he must have had some sort of programme in his mind, and a purpose to illustrate the conflict between the old and new forms of the faith, and the circumstances and attributes which belonged to them. The actual form of the work is as nearly as possible what is called perfectly orthodox. The slow introduction, the regular legitimate allegro, the simple pretty scherzo and trio, the short but completely balanced slow movement, and the regular last movement preceded by a second slow introduction,

¹ Mendelssohn's early Symphonies are marked 'Klavier mit dem Basse.' (See Vol. III. p. 378, note 1.)

present very little that is out of the way in point of structure; and hence the work is less dependent upon its programme than some of the examples by Spohr above described. But nevertheless the programme can be clearly seen to have suggested much of the detail of treatment and development in a perfectly consistent and natural manner. The external traits which obviously strike attention are two: first, the now well-known passage which is used in the Catholic church at Dresden for the Amen, and which Wagner has since adopted as one of the most conspicuous religious motives of 'Parsifal'; and secondly, the use of Luther's famous hymn, 'Ein feste Burg,' in the latter part of the work. The Amen makes its appearance in the latter part of the opening andante, and is clearly meant to typify the old church; and its recurrence at the end of the working out in the first movement, before the recapitulation, is possibly meant to imply that the old church still holds its own; while in the latter portion of the work the typical hymn-tune, introduced softly by the flute and by degrees taking possession of the whole orchestra, may be taken to represent the successful spread of the Protestant ideas, just as its final utterance fortissimo at the end of all does the establishment of men's right to work out their own salvation in their own way. There are various other details which clearly have purpose in relation to the programme, and show clearly that the composer was keeping the possible succession of events and circumstances in his mind throughout. The actual treatment is a very considerable advance upon the symphony in C minor. The whole work is thoroughly Mendelssohnian. There is no obvious trace, either in the ideas themselves or in the manner of expression, of the Mozartian influence which is so noticeable in the symphony of six years earlier. And considering that the composer was still but 21, the maturity of style and judgment is relatively quite as remarkable as the facility and mastery shown in the work of his 15th year. The orchestration is quite characteristic and free; and in some cases, as in part of the second movement, singularly happy.

The principle of programme here assumed seems to have been maintained by him thenceforward; for his other symphonies, though it is not so stated in the published scores, are known to have been recognised by him as the results of his impressions of Italy and Scotland. The first of them followed very soon after the 'Reformation' symphony. In the next year after the completion of that work he mentioned the new symphony in a letter to his sister as far advanced; and said it was 'the gayest thing he had ever done.' He was in Rome at the time, and it appears most probable that the first and last movements were written

there. Of the slow movement he wrote that he had not found anything exactly right, 'and would put it off till he went to Naples, hoping to find something to inspire him there.' But in the result it is difficult to imagine that Naples can have had much share. Of the third movement there is a tradition that it was imported from an earlier work; and it certainly has a considerable flavour of Mozart, though coupled with traits characteristic of Mendelssohn in perfect maturity, and is at least well worthy of its position; and even if parts of it, as is possible, appeared in an earlier work, the excellences of the trio, and the admirable effect of the final coda which is based on it, point to considerable rewriting and reconstruction at a mature period. The actual structure of the movements is based upon familiar principles, though not without certain idiosyncrasies; as, for instance, the appearance of a new prominent feature in the working-out portion, and the freedom of the recapitulation in the first movement. In the last movement, called 'Saltarello,' he seems to have given a more free rein to his fancy in portraying some scene of unconstrained Italian gaiety of which he was a witness; and though there is an underlying consistency in the usual distribution of keys, the external balance of subjects is not so obvious. The last movement is hence the only one which seems to depend to any extent upon the programme idea; in all other respects the symphony belongs to the 'classical' order.

Indeed such a programme as the purpose to reproduce impressions of particular countries is far too vague to lend itself to exact and definite musical portrayal of external ideas, such as might take the place of the usual outlines of structure. In fact it could lead to little more than consistency of style, which would be equally helpful to the composer and the audience; and it may well have served as an excuse for a certain laxity and profusion in the succession of the ideas, instead of that difficult process of concentrating and making relevant the whole of each movement upon the basis of a few definite and typical subjects. The characteristics of the work are for the most part fresh and genial spontaneity. The scoring is of course admirable and clear, without presenting any very marked features; and it is at the same time independent and well proportioned in distribution of the various qualities of sound, and in fitness to the subject-matter.

In orchestral effects the later symphony—the 'Scotch,' in A minor—is more remarkable. The impressions which Mendelssohn received in Scotland may naturally have suggested more striking points of local colour; and the manner in which it is distributed from first page to last serves to very good purpose in unifying the impression of the whole. The effects are

almost invariably obtained either by using close harmonies low in the scale of the respective instruments, or by extensively doubling tunes and figures in a similar manner, and in a sombre part of the scale of the instruments; giving an effect of heaviness and darkness which were possibly Mendelssohn's principal feelings about the grandeur and uncertain climate of Scotland. Thus in the opening phrase for wind instruments they are crowded in the harmonies almost as thick as they will endure. In the statement of the first principal subject again the clarinet in its darkest region doubles the tune of the violins an octave lower. The use of the whole mass of the strings in three octaves, with the wind filling the harmonies in rhythmic chords, which has so fine and striking an effect at the beginning of the 'working out' and in the coda, has the same basis; and the same effect is obtained by similar means here and there in the scherzo; as, for instance, where the slightly transformed version of the principal subject is introduced by the wind in the coda. The same qualities are frequently noticeable in the slow movement and again in the coda of the last movement. As in the previous symphony, the structure is quite in accordance with familiar principles. If anything, the work errs rather on the side of squareness and obviousness in the outlines both of ideas and structure; as may be readily perceived by comparing the construction of the opening tune of the introduction with any of Beethoven's introductions (either that of the D or B \flat or A symphonies, or his overtures); or even the introduction to Mozart's Prague symphony. And the impression is not lessened by the obviousness of the manner in which the succeeding recitative passages for violins are introduced; nor by the squareness and tune-like qualities of the first subject of the first movement, nor by the way in which the square tune pattern of the scherzo is reiterated. In the manipulation of the familiar distribution of periods and phrases, however, he used a certain amount of consideration. For example, the persistence of the rhythmic figure of the first subject of the first allegro, in the inner parts of the second section of that movement, serves very good purpose; and the concluding of the movement with the melancholy tune of the introduction helps both the sentiment and the structural effect. The scherzo is far the best and most characteristic movement of the whole. In no department of his work was Mendelssohn so thoroughly at home; and the obviousness of the formal outlines is less objectionable in a movement where levity and abandonment to gaiety are quite the order of the day. The present scherzo has also certain very definite individualities of its own. It is a departure from the 'Minuet and Trio' form, as it has no

break or strong contrasting portion in the middle, and is continuous bustle and gaiety from beginning to end. In technical details it is also exceptionally admirable. The orchestral means are perfectly suited to the end, and the utterances are as neat and effective as they could well be; while the perfect way in which the movement finishes off is delightful to almost every one who has any sense for art. The slow movement takes up the sentimental side of the matter, and is in its way a good example of his orchestral style in that respect. The last movement, allegro vivacissimo, is restless and impetuous, and the tempo-mark given for it in the preface to the work, 'Allegro guerriero,' affords a clue to its meaning. But it evidently does not vitally depend upon any ideal programme in the least; neither does it directly suggest much, except in the curious independent passage with which it concludes, which has more of the savour of programme about it than any other portion of the work, and is scarcely explicable on any other ground. It is to be noticed that directions are given at the beginning of the work to have the movements played as quickly as possible after one another, so that it may have more or less the effect of being one piece.

Mendelssohn's only other symphonic work was the 'Lobgesang,' a sort of ecclesiastical counterpart of Beethoven's ninth symphony. In this the programme element is important, and is illustrated by the calls of the brass instruments and their reiteration with much effect in the choral part of the work. The external form, as in Beethoven's ninth symphony, is that of the three usual earlier movements—(1) introduction and allegro, (2) scherzo, or minuet and trio, and (3) slow movement (which in the present case have purposely a pietistic flavour), with the finale or last movement supplanted by the long vocal part.

The consideration of these works shows that though Mendelssohn often adopted the appearance of programme, and gained some advantages by it, he never, in order to express his external ideas with more poetical consistency, relaxed any of the familiar principles of structure which are regarded as orthodox. He was in fact a thoroughgoing classicist. He accepted formulas with perfect equanimity, and aimed at resting the value of his works upon the vivacity of his ideas and the great mastery which he had attained in technical expression, and clearness and certainty of orchestration. It was not in his disposition to strike out a new path for himself. The perfection of his art in many respects necessarily appeals to all who have an appreciation for first-rate craftsmanship; but the standard of his ideas is rather fitted for average musical intelligences, and it seems natural enough that these two circumstances should have combined successfully to obtain for

him an extraordinary popularity. He may fairly be said to present that which appeals to high and pure sentiments in men, and calls upon the average of them to feel at their best. But he leads them neither into the depths nor the heights which are beyond them; and is hence more fitted in the end to please than to elevate. His work in the department of symphony is historically slight. In comparison with his great predecessors he established positively nothing new; and if he had been the only successor to Beethoven and Schubert it would certainly have to be confessed that the department of art represented by the symphony was at a standstill. The excellence of his orchestration, the clearness of his form, and the accuracy and cleverness with which he balanced and disposed his subjects and his modulations, are all certain and unmistakable; but all these things had been attained by great masters before him, and he himself attained them only by the sacrifice of the genuine vital force and power of harmonic motion and freedom of form in the ideas themselves, of which his predecessors had made a richer manifestation. It is of course obvious that different orders of minds require different kinds of artistic food, and the world would not be well served without many grades and standards of work. Mendelssohn did good service in supplying a form of symphony of such a degree of freshness and lightness as to appeal at once to a class of people for whom the sternness and power of Beethoven in the same branch of art would often be too severe a test. He spoke also in the spirit of his time, and in harmony with it; and as illustrations of the work of the period in one aspect his symphonies will be among the safest to refer to.

Among his contemporaries the one most natural to bracket with him is Sterndale Bennett, whose views of art were extraordinarily similar, and who was actuated in many respects by similar impulses. His published contribution to the department we are considering is extremely slight. The symphony which he produced in 1834 was practically withdrawn by him, and the only other work of the kind which he allowed to be published was the one which was written for the Philharmonic Society, and first played in 1864. The work is slight, and it is recorded that he did not at first put it forward as a symphony. It had originally but three movements, one of which, the charming minuet and trio, was imported from the Cambridge Installation Ode of 1862. A slow movement called 'Romanze' was added afterwards. Sterndale Bennett was a severe classicist in his views about form in music, and the present symphony does not show anything sufficiently marked to call for record in that respect. It is singularly quiet and unpretentious, and characteristic of the composer, showing his taste and delicacy of sentiment together with his admirable sense of

symmetry and his feeling for tone and refined orchestral effect.

SCHUMANN'S EVOLUTION.—The contemporary of Mendelssohn and Sterndale Bennett who shows in most marked contrast with them is Robert Schumann. He seems to represent the opposite pole of music; for as they depended upon art and made clear technical workmanship their highest aim, Schumann was in many respects positively dependent upon his emotion. Not only was his natural disposition utterly different from theirs, but so was his education. Mendelssohn and Sterndale Bennett went through severe technical drilling in their early days. Schumann seems to have developed his technique by the force of his feelings, and was always more dependent upon them in the making of his works than upon general principles and external stock rules, such as his two contemporaries were satisfied with. The case affords an excellent musical parallel to the common circumstances of life: Mendelssohn and Sterndale Bennett were satisfied to accept certain rules because they knew that they were generally accepted; whereas Schumann was of the nature that had to prove all things, and find for himself that which was good. The result was, as often happens, that Schumann affords examples of technical deficiencies, and not a few things which his contemporaries had reason to compare unfavourably with the works of Mendelssohn and Sterndale Bennett; but in the end his best work is far more interesting, far more deeply felt, and far more really earnest through and through than theirs. It is worth observing also that his feelings towards them were disinterested admiration and enthusiasm, while they thought very slightly of him. They were also the successful composers of their time, and at the head of their profession, while he was looked upon as a sort of half amateur, part mystic and part incompetent. Such circumstances as these have no little effect upon a man's artistic development, and drive him in upon his own resources. Up to a certain point the result for the world in this instance was advantageous. Schumann developed altogether his own method of education. He began with songs and more or less small pianoforte pieces. By working hard in these departments he developed his own emotional language, and in course of time, but relatively late in life as compared with most other composers, he seemed to arrive at the point when experiment on the scale of the symphony was possible.

In a letter to a friend he expressed his feeling that the pianoforte was becoming too narrow for his thoughts, and that he must try orchestral composition. The fruit of this resolve was the symphony in B \flat (op. 38), which was produced at Leipzig in 1841, and was probably his first important orchestral work. It is quite extraordinary how successfully he grappled

with the difficulties of the greatest style of composition at the first attempt. The manner is thoroughly symphonic, impressive and broad, and the ideas are more genuinely instrumental both in form and expression than Mendelssohn's, and far more incisive in detail, which in instrumental music is a most vital matter. Mendelssohn had great readiness for making a tune, and it is as clear as possible that when he went about to make a large instrumental work his first thought was to find a good tune to begin upon. Schumann seems to have aimed rather at a definite and strongly marked idea, and to have allowed it to govern the form of period or phrase in which it was presented. In this he was radically in accord with both Mozart and Beethoven. The former in his instrumental works very commonly made what is called the principal subject out of two distinct items, which seem contrasted externally in certain characteristics and yet are inevitable to one another. Beethoven frequently satisfied himself with one principal one, as in the first movements of the *Eroica* and the *C minor*; and even where there are two more or less distinct figures, they are joined very closely into one phrase, as in the *Pastoral*, the eighth and the first movement of the ninth. The first movement of Schumann's *B \flat* symphony shows the same characteristic. The movement seems almost to depend upon the simple but very definite first figure quoted in Vol. IV. p. 677, which is given out in slow time in the introduction, and worked up as by a mind pondering over its possibilities, finally breaking away with vigorous freshness and confidence in the '*Allegro molto Vivace*.' The whole first section depends upon the development of this figure; and even the horns, which have the last utterances before the second subject appears, continue to repeat its rhythm with diminishing force. The second subject necessarily presents a different aspect altogether, and is in marked contrast to the first, but it similarly depends upon the clear character of the short figures of which it is composed, and its gradual work up from the quiet beginning to the loud climax, ends in the reappearance of the rhythmic form belonging to the principal figure of the movement. The whole of the working-out portion depends upon the same figure, which is presented in various aspects and with the addition of new features and ends in a climax which introduces the same figure in a slow form, very emphatically, corresponding to the statement in the introduction. To this climax the recapitulation is duly welded on. The coda again makes the most of the same figure, in yet fresh aspects. The latter part is to all intents independent, apparently a sort of reflection on what has gone before, and is so far in definite contrast as to explain itself. The whole movement is direct and simple in style, and, for Schumann, singularly bright and cheerful.

The principles upon which he constructed and used his principal subjects in this movement are followed in the first movements of the other symphonies; most of all in the *D minor*; clearly in the *C major*; and least in the *E \flat* , which belongs to the later period of his life. But even in this last he aims at gaining the same result, though by different means; and the subject is as free as any from the tune-qualities which destroy the complete individuality of an instrumental subject in its most perfect and positive sense. In the first movement of the *D minor* he even went so far as to make some important departures from the usual outlines of form, which are rendered possible chiefly by the manner in which he used the characteristic figure of his principal subject. It is first introduced softly in the latter part of the introduction, and gains force quickly, so that in a few bars it breaks away in the vigorous and passionate *allegro* in the following form—

which varies in the course of the movement to

In one or other of these forms it continues almost ceaselessly throughout the whole movement, either as actual subject or accompaniment; in the second section it serves in the latter capacity. In the latter part of the working-out section a fresh subject of gentler character is introduced, seeming to stem and mitigate the vehemence expressed by the principal figures of the first subject; from the time this new subject makes its appearance there continues a sort of conflict between the two; the vehement subject constantly breaking in with apparently undiminished fire, and seeming at times to have the upper hand, till just at the end the major of the original key (*D minor*) is taken, and the more genial subject appears in a firm and more determined form, as if asserting its rights over the wild first subject; and thereupon, when the latter reappears, it is in a much more genial character, and its reiteration at the end of the movement gives the impression of the triumph of hope and trust in good, over the seeds of passion and despair. The result of the method upon which the movement is developed is to give the impression of both external and spiritual form. The requirements of key, modulation, and subject are fulfilled, though, from the point of view of classical orthodoxy, with unusual freedom. The spiritual form—the expression in musical terms of a type of mental conflict, so depicted that thinking beings can perceive the sequence to be true of themselves

—is also very prominent, and is the most important element in the work, as is the case in all Schumann's best works; moreover in this movement everything is strongly individual, and warm with real musical life in his own style; which was not altogether the case with the first movement of the B \flat .

In the C major symphony (op. 61) the first allegro is ushered in by a slow introduction of important and striking character, containing, like those of the two just mentioned, anticipations of its principal figures. In the allegro the two principal subjects are extremely strong in character, and the consistent way in which the whole movement is developed upon the basis of their constituent figures, with allusions to those of the introduction, is most remarkable. Here again there is a sort of conflict between the principal ideas. The first subject is just stated twice (the second time with certain appropriate changes), and then a start is instantly made in the dominant key, with new figures characteristic of the second section; transition is made to flat keys and back, and an allusion to the first subject ends the first half; but all is closely consistent, vigorous and concise. The development portion is also most closely worked upon the principal subjects, which are treated, as it seems, exhaustively, presenting especially the figures of the second subject in all sorts of lights, and with freshness and warmth of imagination, and variety of tone and character. The recapitulation is preceded by allusions to the characteristic features of the introduction, considerably transformed, but still sufficiently recognisable to tell their tale. The coda is made by fresh treatment of the figures of the principal subjects in vigorous and brilliant development.

The symphony in E \flat has no introduction, and Schumann seems to have aimed at getting his strong effects of subject in this case by means other than the vigorous and clear rhythmic forms which characterise the first movements of the earlier symphonies. The effect is obtained by syncopations and cross rhythms, which alternately obscure and strengthen the principal beats of the bar, and produce an effect of wild and passionate effort, which is certainly striking, though not so immediately intelligible as the rhythmic forms of the previous symphonies. The second subject is in strong contrast, having a more gentle and appealing character; but it is almost overwhelmed by the recurrence of the syncopations of the principal subject, which make their appearance with persistency in the second as in the first section, having in that respect a very clear poetical or spiritual meaning. The whole development of the movement is again consistent and impressive, though not so fresh as in the other symphonies. As a point characteristic of Schumann, the extreme

conciseness of the first section of the first movement in the B \flat , D minor and C major symphonies is to be noticed, as it bears strongly upon the cultivated judgment and intelligence which mark his treatment of this great instrumental form. The first half is treated almost as pure exposition; the working-out having logically the greater part of interesting development of the ideas. The recapitulation is generally free, and in the D minor symphony is practically supplanted by novel methods of balancing the structure of the movement. The coda either presents new features, or takes fresh aspects of the principal ones, enhanced by new turns of modulation, and ending with the insistence on the primary harmonies of the principal key, which is necessary to the stability of the movement.

In all these respects Schumann is a most worthy successor to Beethoven. He represents his intellectual side in the consistency with which he develops the whole movement from a few principal features, and the freshness and individuality with which he treats the form; and he shows plenty of the emotional and spiritual side in the passionate or tender qualities of his subjects, and the way in which they are distributed relatively to one another. Schumann's symphonic slow movements have also a distinctive character of their own. Though extremely concise, they are all at the same time rich and full of feeling. They are somewhat in the fashion of a 'Romanze,' that in the D minor symphony being definitely so called; and their development depends rather upon an emotional than an intellectual basis; as it seems most just that a slow movement should. His object appears to have been to find some noble and aspiring strain of melody, and to contrast it with episodes of similar character, which carry on and bear upon the principal idea without diverting the chain of thought into a different channel. Hence the basis of the movements is radically lyrical; and this affords an important element of contrast to the first movement, in which there is always an antithetical element in the contrast of the two principal subjects. The 'Romanze' of the D minor is constructed on a different principle; the sections and musical material being strongly contrasted; this may be partly owing to the closeness of its connexion with other parts of the symphony, as will be noticed farther on.

MODIFICATIONS OF SCHERZO FORM.—The scherzos, including that in the 'Overture, Scherzo and Finale' (op. 52), have a family likeness to one another, though their outlines are different; they all illustrate a phase of musical and poetical development in their earnest character and the vein of sadness which pervades them. The light and graceful gaiety of most of the minuets of Haydn and

Mozart is scarcely to be traced in them; but its place is taken by a certain wild rush of animal spirits, mixed up in a strange and picturesque way with expressions of tenderness and regret. These scherzos are in a sense unique; for though following in the same direction as Beethoven's in some respects, they have but little of his sense of fun and grotesque, while the vein of genuine melancholy which pervades them certainly finds no counterpart either in Spohr or Mendelssohn; and, if it may be traced in Schubert, it is still in comparison far less prominent. In fact Schumann's scherzos are specially curious and interesting, even apart from the ordinary standpoint of a musician, as illustrating a phase of the intellectual progress of the race. Schumann belonged to the order of men with large and at the same time delicate sympathies, whose disposition becomes so deeply impressed with the misfortunes and unsolvable difficulties which beset his own lot and that of his fellow-men, that pure unmixed lightheartedness becomes almost impossible. The poetical and thoughtful side of his disposition, which supplied most vital ingredients to his music, was deeply tinged with sadness; and from this he was hardly ever entirely free. He could wear an aspect of cheerfulness, but the sadness was sure to peep out, and in this, among thoughtful and poetically disposed beings, he cannot be looked upon as singular. Hence the position of the scherzo in modern instrumental music presents certain inevitable difficulties. The lively, almost childish, merriment of early examples cannot be attained without jarring upon the feelings of earnest men; at least in works on such a scale as the symphony, where the dignity and importance of the form inevitably produce a certain sense of responsibility to loftiness of purpose in the carrying out of the ideas. A movement corresponding to the old scherzo in its relation to the other movements had to be formed upon far more complicated conditions. The essential point in which Schumann followed his predecessors was the definition of the balancing and contrasting sections. The outlines of certain groups of bars are nearly always very strongly marked, and the movement as a whole is based rather upon effects attainable by the juxtaposition of such contrasting sections than upon the continuous logical or emotional development which is found in the other movements. The structural outline of the old dance-forms is still recognisable in this respect, but the style and rhythm bear little trace of the dance origin; or at least the dance quality has been so far idealised as to apply rather to thought and feeling than to expressive rhythmic play of limbs. In Schumann's first symphony the scherzo has some qualities of style which connect it with the minuets of earlier times,

even of Mozart; but with these there are genuine characteristic traits of expression. In the later scherzos the poetical meaning seems more apparent. In fact the scherzo and the slow movement are linked together as the two sections of the work most closely representative of human emotion and circumstance; the first and last movements having more evident dependence upon what are called abstract qualities of form.

In its structural outlines Schumann's scherzo presents certain features. In the symphonies in B \flat and C he adopts the device of two trios. Beethoven had repeated the trio in two symphonies (4th and 7th), and Schumann advanced in the same direction by writing a second trio instead of repeating the first, and by making the two trios contrast not only with the scherzo, but also with each other; and as a further result the trios stand centrally in relation to the first and last statement of the scherzo, while it in its turn stands centrally between them, and thus the whole structure of the movement gains in interest. It is worthy of note that the codas to all Schumann's scherzos are specially interesting and full; and some of them are singular in the fact that they form an independent little section conveying its own ideas apart from those of the principal subjects. His finales are less remarkable on general grounds, and on the whole less interesting than his other movements. The difficulty of conforming to the old type of light movements was even more severe for him than it was for Beethoven, and hence he was the more constrained to follow the example set by Beethoven of concluding with something weighty and forcible, which should make a fitting crown to the work in those respects, rather than on the principle of sending the audience away in a good humour. In the B \flat symphony only does the last movement aim at gaiety and lightness; in the other three symphonies and the 'Overture, Scherzo and Finale' the finales are all of the same type, with broad and simple subjects and strongly emphasised rhythms. The rondo form is only obscurely hinted at in one; in the others the development is very free, but based on binary form; and the style of expression and development is purposely devoid of elaboration.

INTERLACING OF MOVEMENTS.—Besides the points which have been already mentioned in the development of the individual movements, Schumann's work is conspicuous for his attempts to bind the whole together in various ways. Not only did he make the movements run into each other, but in several places he connects them by reproducing the ideas of one movement in others, and even by using the same important features in different guises as the essential basis of different movements. In the symphony in C there are some interesting examples of this; but the symphony in D

minor is a still more remarkable experiment, and may be taken as a fit type of the highest order.

In the first place all the movements run into each other except the first and second; and even there the first movement is purposely so ended as to give a sense of incompleteness unless the next movement is proceeded with at once. The first subject of the first movement and the first of the last are connected by a strong characteristic figure, which is common to both of them. The persistent way in which this figure is used in the first movement has already been described. It is not maintained to the same extent in the last movement; but it makes a strong impression in its place there, partly by its appearing conspicuously in the accompaniment, and partly by the way it is led up to in the sort of intermezzo which connects the scherzo and the last movement, where it seems to be introduced at first as a sort of reminder of the beginning of the work, and as if suggesting the clue to its meaning and purpose; and is made to increase in force with each repetition till the start is made with the finale. In the same manner the introduction is connected with the slow movement or *romanze*, by the use of its musical material for the second division of that movement; and the figure which is most conspicuous in the middle of the *romanze* runs all through the trio of the succeeding movement. So that the series of movements are as it were interlaced by their subject-matter; and the result is that the whole gives the impression of a single and consistent musical poem. The way in which the subjects recur may suggest different explanations to different people, and hence it is dangerous to try and fix one in definite terms describing particular circumstances. But the important fact is that the work can be felt to represent in its entirety the history of a series of mental or emotional conditions such as may be grouped round one centre; in other words, the group of impressions which go to make the innermost core of a given story seems to be faithfully expressed in musical terms and in accordance with the laws which are indispensable to a work of art. The conflict of impulses and desires, the different phases of thought and emotion, and the triumph or failure of the different forces which seem to be represented, all give the impression of belonging to one personality, and of being perfectly consistent in their relation to one another; and by this means a very high example of all that most rightly belongs to programme music is presented. Schumann, however, wisely gave no definite clue to fix the story in terms. The original autograph has the title '*Symphonische Fantaisie für grosses Orchester, skizzirt im Jahre 1841; neu instrumentirt 1851.*' In the published score it is called '*Symphony*,' and

numbered as the fourth, though it really came second.

Schumann left several similar examples in other departments of instrumental music, but none so fully and carefully carried out. In the department of symphony he never again made so elaborate an experiment. In his last, however, that in E \flat , he avowedly worked on impressions which supplied him with something of a poetical basis, though he does not make use of characteristic figures and subjects to connect the movements with one another. The impressive fourth movement is one of the most singular in the range of symphonic music, and is meant to express the feelings produced in him by the ceremonial at the enthronement of a Cardinal in Cologne Cathedral. The last movement has been said to embody 'the bustle and flow of Rhenish holiday life, on coming out into the town after the conclusion of the ceremony in the Cathedral.'¹ Of the intention of the scherzo nothing special is recorded, but the principal subject has much of the 'local colour' of the German national dances.

As a whole, Schumann's contributions to the department of symphony are by far the most important² since Beethoven. As a master of orchestration he is less certain than his fellows of equal standing. There are passages which rise to the highest points of beauty and effectiveness, as in the slow movement of the C major symphony; and his aim to balance his end and his means was of the highest, and the way in which he works it out is original; but both the bent of his mind and his education inclined him to be occasionally less pellucid than his predecessors, and to give his instruments things to do which are not perfectly adapted to their idiosyncrasies. On the other hand, in vigour, richness, poetry and earnestness, as well as in the balance which he was able to maintain between originality and justness of art, his works stand at the highest point among the moderns whose work is done; and have had great and lasting effect upon his successors.

DIVERGENT VIEWS OF THE 19TH CENTURY.—The advanced point to which the history of the symphony has arrived is shown by the way in which composers have become divided into two camps, whose characteristics are most easily understood in their extremest representatives. The growing tendency to attach positive meaning to music, as music, has in course of time brought about a new position of affairs in the instrumental branch of art. We have already pointed out how the strict outlines of form in instrumental works came to be modified by the growing individuality of the subject. As long as subjects were produced upon very simple lines, which in most cases resembled one another in all but very trifling external particu-

¹ For Schumann's intention see Wąsielewski, 3rd ed., pp. 269, 272.

² This is from the point of view of 1880. c.

lars, there was no reason why the structure of the whole movement should grow either complex or individual. But as the subject (which stands in many cases as a sort of text) came to expand its harmonic outlines and to gain force and meaning, it reacted more and more upon the form of the whole movement; and at the same time the musical spirit of the whole, as distinguished from the technical aspects of structure, was concentrated and unified, and became more prominent as an important constituent of the artistic ensemble. In many cases, such as small movements of a lyrical character for single instruments, the so-called classical principals of form were almost lost sight of, and the movement was left to depend altogether upon the consistency of the musical expression throughout. Sometimes these movements had names suggesting more or less of a programme; but this was not by any means invariable or necessary. For in such cases as Chopin's Preludes, and some of Schumann's little movements, there is no programme given, and none required by the listener. The movement depends successfully upon the meaning which the music has sufficient character of its own to convey. In such cases the art form is still thoroughly pure, and depends upon the development of music as music. But in process of time a new position beyond this has been assumed. Supposing the subjects and figures of music to be capable of expressing something which is definite enough to be put into words, it is argued that the classical principles of structure may be altogether abandoned, even in their broadest outlines, and a new starting-point for instrumental music attained, on the principle of following the circumstances of a story, or the succession of emotions connected with a given idea, or the flow of thought suggested by the memory of a place or person or event of history, or some such means; and that this would serve as a basis of consistency and a means of unifying the whole, without the common resources of tonal or harmonic distribution. The story or event must be supposed to have impressed the composer deeply, and the reaction to be an outflow of music expressing the poetical imaginings of the author better than words would do. In some senses this may still be pure art; where the musical idea has really sufficient vigour and vitality in itself to be appreciated without the help of the external excitement of the imagination which is attained by giving it a local habitation and a name. For then the musical idea may still have its full share in the development of the work, and may pervade it intrinsically as music, and not solely as representing a story or series of emotions which are, primarily, external to the music. But when the element of realism creeps in, or the ideas depend for their interest upon their connection with a given programme,

the case is different. The test seems to lie in the attitude of mind of the composer. If the story or programme of any sort is merely a secondary matter which exerts a general influence upon the music, while the attention is concentrated upon the musical material itself and its legitimate artistic development, the advantages gained can hardly be questioned. The principle not only conforms to what is known of the practice of the greatest masters, but is on abstract grounds perfectly unassailable; on the other hand, if the programme is the primary element, upon which the mind of the composer is principally fixed, and by means of which the work attains a specious excuse for abnormal development, independent of the actual musical sequence of ideas, then the principle is open to question, and may lead to most unsatisfactory results. The greatest of modern programme composers came to a certain extent into this position.

BERLIOZ AND THE 'PROGRAMME.'—The development of pure abstract instrumental music seems to have been almost the monopoly of the German race; French and Italians have had a readier disposition for theatrical and at best dramatic music. Berlioz had an extraordinary perception of the possibilities of instrumental music, and appreciated the greatest works of the kind by other composers as fully as the best of his contemporaries; but it was not his own natural way of expressing himself. His natural bent was always towards the dramatic elements of effect and dramatic principles of treatment. It seems to have been necessary to him to find some moving circumstance to guide and intensify his inspiration. When his mind was excited in such a manner he produced the most extraordinary and original effects; and the fluency and clearness with which he expressed himself was of the highest order. His genius for orchestration, his vigorous rhythms, and the enormous volumes of sound of which he was as much master as of the most delicate subtleties of small combinations of instruments, have the most powerful effect upon the hearer; while his vivid dramatic perception goes very far to supply the place of the intrinsically musical development which characterises the works of the greatest masters of abstract music. But on the other hand, as is inevitable from the position he adopted, he was forced at times to assume a theatrical manner, and a style which savours rather of the stage than of the true dramatic essence of the situations he deals with. In the '*Symphonic fantastique*,' for instance, which he also called '*Episode de la vie d'un artiste*,' his management of the programme principle is thorough and well-devised. The notion of the ideal object of the artist's affections being represented by a definite musical figure, called the '*idée fixe*,' unifying the work throughout by its constant reappearance in various

aspects and surroundings, is very happy; and the way in which he treats it in several parts of the first movement has some of the characteristic qualities of the best kind of development of ideas and figures, in the purely musical sense; while at the same time he has obtained most successfully the expression of the implied sequence of emotions, and the absorption consequent upon the contemplation of the beloved object. In the general laying out of the work he maintains certain vague resemblances to the usual symphonic type. The slow introduction, and the succeeding *allegro agitato*—representing his passion, and therefore based to a very great extent on the 'idée fixe'—are equivalent to the familiar opening movements of the classical symphonies; and moreover there is even a vague resemblance in the inner structure of the *allegro* to the binary form. The second movement, called 'Un bal,' corresponds in position to the time-honoured minuet and trio; and though the broad outlines are very free there is a certain suggestion of the old inner form in the relative disposition of the waltz section and that devoted to the 'idée fixe.' In the same way the 'Scène aux champs' corresponds to the usual slow movement. In the remaining movements the programme element is more conspicuous. A 'Marche au supplice' and a 'Songe d'une nuit de Sabbat' are both of them as fit as possible to excite the composer's love of picturesque and terrible effects, and to lead him to attempt realistic presentation, or even a sort of musical scene-painting, in which some of the characteristics of instrumental music are present, though they are submerged in the general impression by characteristics of the opera. The effect produced is of much the same nature as of that of passages selected from operas played without action in the concert-room. In fact, in his little preface, Berlioz seems to imply that this would be a just way to consider the work, and the condensed statement of his view of programme music there given is worth quoting:

'Le compositeur a eu pour but de développer, dans ce qu'elles ont de musical, différentes situations de la vie d'un artiste. Le plan du drame instrumental, privé du secours de la parole, a besoin d'être exposé d'avance. Le programme (qui est indispensable à l'intelligence complète du plan dramatique de l'ouvrage) doit donc être considéré comme le texte parlé d'un Opéra, servant à amener des morceaux de musique, dont il motive le caractère et l'expression.'¹

This is a very important and clear statement of the position, and marks sufficiently the essential difference between the principles of the most advanced writers of programme music and those adopted by Beethoven. The results are in fact different forms of art. An instrumental

drama is a fascinating idea, and might be carried out perfectly within the limits used even by Mozart and Haydn; but if the programme is indispensable to its comprehension those limits have been passed. This does not necessarily make the form of art an illegitimate one; but it is most important to realise that it is on quite a different basis from the type of the instrumental symphony; and this will be better understood by comparing Berlioz's statement with those symphonies of Beethoven and Mendelssohn, or even of Raff and Rubinstein, where the adoption of a general and vague title gives the semblance of a similar use of programme. Beethoven liked to have a picture or scene or circumstance in his mind²; but it makes all the difference to the form of art whether the picture or story is the guiding principle in the development of the piece, or whether the development follows the natural implication of the positively musical idea. The mere occurrence, in one of these forms, of a feature which is characteristic of the other, is not sufficient to bridge over the distance between them; and hence the 'instrumental drama' or poem, of which Berlioz has given the world its finest example, must be regarded as distinct from the regular type of the pure instrumental symphony. It might perhaps be fairly regarded as the Celtic counterpart of the essentially Teutonic form of art, and as an expression of the Italo-Gallic ideas of instrumental music on lines parallel to the German symphony; but in reality it is scarcely even an offshoot of the old symphonic stem; and it will be far better for the understanding of the subject if the two forms of art are kept as distinct in name as they are in principle.

The earliest and most eminent follower of Berlioz, working on similar lines to his in modern times, is Liszt; and his adoption of the name SYMPHONIC POEM (*q.v.*) for such compositions sufficiently defines their nature without bringing them exactly under the head of symphonies. Of these there are many, constructed on absolutely independent lines, so as to appear as musical poems or counterparts of actual existing poems. A work³ which, in name at least, trenches upon the old lines is the 'Faust Symphony,' in which the connection with the programme-principle of Berlioz is emphasised by the dedication of the piece to him. In this work the connection with the old form of symphony is perhaps even less than in the examples of Berlioz. Subjects and figures are used not for the purposes of defining the artistic form, but to describe individuals, ideas, or circumstances. The main divisions of the work are ostensibly three, which are called 'character-

¹ 'The composer has aimed at developing various situations in the life of an artist, so far as seemed musically possible. The plan of an instrumental drama, being without words, requires to be explained beforehand. The programme (which is indispensable to the perfect comprehension of the dramatic plan of the work) ought therefore to be considered in the light of the spoken text of an Opera, serving to lead up to the pieces of music, and indicate the character and expression.'

² This important admission was made by Beethoven to Neate: 'I have always a picture in my thoughts when I am composing, and work to it.' (Thayer, iii. 343.)

³ Liszt's 'Dante' symphony, which does not seem to have come under the notice of Sir Hubert Parry at the time this article was written, is a further illustration of the same method.

pictures' of Faust, Margaret and Mephistopheles severally; and the whole concludes with a setting of the 'Chorus mysticus.' Figures are used after the manner of Wagner's 'Leit-motive' to portray graphically such things as bewildered inquiry, anxious agitation, love, and mockery, besides the special figure or melody given for each individual as a whole. These are so interwoven and developed by modifications and transformations suited to express the circumstances, as to present the speculations of the composer on the character and the philosophy of the poem in various interesting lights; and his great mastery of orchestral expression and fluency of style contribute to its artistic importance on its own basis; while in general the treatment of the subject is more psychological and less pictorially realistic than the prominent portions of Berlioz's work, and therefore slightly nearer in spirit to the classical models. But with all its striking characteristics and successful points the music does not approach Berlioz in vitality or breadth of musical idea.

MINOR COMPOSERS.—Mention must be made of a few composers of symphonies in the mid-19th century who belonged essentially to the German school, even when adopting the general advantage of a vague title. Prominent among these are Raff and Rubinstein, whose methods of dealing with instrumental music were at bottom closely related. Raff almost invariably adopted a title for his instrumental works; but those which he selected admit of the same kind of general interpretation as those of Mendelssohn, and serve rather as a means of unifying the general tone and style of the work than of pointing out the lines of actual development. The several Seasons, for instance, serve as the general idea for a symphony each. Another is called 'Im Walde.' In another several conditions in the progress of the life of a man serve as a vague basis for giving a certain consistency of character to the style of expression; in a way quite consonant with the pure type. In one case Raff comes nearer to the Berlioz ideal, namely in the 'Lenore' symphony, in some parts of which he clearly attempts to depict a succession of events. But even when this is most pronounced, as in the latter part of the work, there is very little that is not perfectly intelligible and appreciable as music without reference to the poem. As a matter of fact Raff is always rather free and relaxed in his form; but that is not owing to his adoption of programme, since the same characteristic is observable in works that have no name as in those that have. The ease and speed with which he wrote, and the readiness with which he could call up a certain kind of genial, and often very attractive idea, both interfered with the concentration necessary for developing a closely-knit and compact work of art. His ideas are clearly defined and very

intelligible, and have much poetical sentiment; and these facts, together with a very notable mastery of orchestral resource and feeling for colour, ensured his works great success on their production; but there is too little self-restraint and concentration both in the general outline and in the statement of details, and too little self-criticism in the choice of subject-matter, to give permanence. In the broadest outlines he generally conformed to the principles of the earlier masters, distributing his allegros, slow movements, scherzos and finales according to precedent.

Rubinstein's works are conspicuous examples of the same class; but the absence of concentration, self-criticism in the choice of subjects, and care in statement of details, is even more conspicuous in him than in Raff. His most important symphonic work is called 'The Ocean'—the general title serving, as in Raff's symphonies, to give unity to the sentiment and tone of the whole, rather than as a definite programme to work to. In this, as in Raff, there is much spontaneity in the invention of subjects, and in some cases a higher point of real beauty and force is reached than in that composer's works; and there is also a good deal of striking interest in the details. The most noticeable external feature is the fact that the symphony is in seven movements. There was originally the familiar group of four, and to these were added, some years later, an additional slow movement, which stands second, and a further genuine scherzo, which stands fifth, both movements being devised in contrast to the previously written adagio and scherzo. The third added movement is a 'storm.' Another symphony of Rubinstein's, showing much vigour and originality, and some careful and intelligent treatment of subject, is the 'Dramatic.' This is in the usual four movements, with well-devised introductions to the first and last. The work as a whole is hampered by excessive and unnecessary length, which is not the result of the possibilities of the subjects or the necessities of their development; and might be reduced with nothing but absolute advantage.

CONTEMPORARY ESTIMATE OF BRAHMS.—The greatest representative of the highest art in the department of symphony is Johannes Brahms.¹ His first two² examples have that mark of intensity, loftiness of purpose, and artistic mastery which sets them above all other contemporary work of the kind. Like Beethoven and Schumann he did not produce a symphony till a late period of his career, when his judgment was matured by much practice in other kindred forms of instrumental composition, such as pianoforte quartets, string sextets and quartets, sonatas, and such forms of orchestral

¹ This estimate would seem inconsistent with what was said above of Schumann were it not that the writer is evidently thinking of Brahms as a contemporary and not comparing him with predecessors.

² Only the symphonies in C minor and D major had appeared when this article was written.

composition as variations and two serenades. He seems to have set himself to prove that the old principles of form are still capable of serving as the basis of works which should be thoroughly original both in general character and in detail and development, without either falling back on the device of programme, or abrogating or making any positive change in the principles, or abandoning the loftiness of style which befits the highest form of art; but by legitimate expansion, and application of careful thought and musical contrivance to the development. In all these respects he is a thorough descendant of Beethoven, and illustrates the highest and best way in which the tendencies of the age in instrumental music may yet be expressed. He differs most markedly from the class of composers represented by Raff, in the fact that his treatment of form is an essential and important element in the artistic effect. The care with which he develops it is not more remarkable than the insight shown in all the possible ways of enriching it without weakening its consistency. In appearance it is extremely free, and at available points all possible use is made of novel effects of transition and ingenious harmonic subtleties; but these are used in such a way as not to disturb the balance of the whole, or to lead either to discursiveness or tautology.

In the laying out of the principal sections as much freedom is used as is consistent with the possibility of being readily followed and understood. Thus in the recapitulatory portion of a movement the subjects which characterise the sections are not only subjected to considerable and interesting variation, but are often much condensed and transformed. In the first movement of the second symphony, for instance, the recapitulation of the first part of the movement is so welded on to the working-out portion that the hearer is only happily conscious that this point has been arrived at without the usual insistence to call his attention to it. Again, the subjects are so ingeniously varied and transformed in restatement that they seem almost new, though the broad melodic outlines give sufficient assurance of their representing the recapitulation.

The same effect is obtained in parts of the allegrettos which occupy the place of scherzos in both symphonies. The old type of minuet and trio form is felt to underlie the well-woven texture of the whole, but the way in which the joints and seams are made often escapes observation. Thus in the final return to the principal section in the allegretto of the second symphony, which is in G major, the subject seems to make its appearance in F# major, which serves as dominant to B minor, and going that way round the subject glides into the principal key almost insensibly.¹ In

the allegretto of the symphony in C minor the outline of a characteristic feature is all that is retained in the final return of the principal subject near the end, and new effect is gained by giving a fresh turn to the harmony. Similar closeness of texture is found in the slow movement of the same symphony, at the point where the principal subject returns, and the richness of the variation to which it is subjected enhances the musical impression. The effect of these devices is to give additional unity and consistency to the movements. Enough is given to enable the intelligent hearer to understand the form without its appearing in aspects with which he is already too familiar.

Similar thoroughness is to be found on the other sides of the matter. In the development of the sections, for instance, all signs of 'padding' are done away with as much as possible, and the interest is sustained by developing at once such figures of the principal subjects as will serve most suitably. Even such points as necessary equivalents to cadences, or pauses on the dominant, are by this means infused with positive musical interest in just proportion to their subordinate relations to the actual subjects. Similarly, in the treatment of the orchestra, such a thing as filling up is avoided to the utmost possible; and in order to escape the over-complexity of detail so unsuitable to the symphonic form of art, the forces of the orchestra are grouped in masses in the principal characteristic figures, in such a way that the whole texture is endowed with vitality. The impression so conveyed to some is that the orchestration is not at such a high level as the other elements of art; and certainly the composer does not aim at subtle combinations of tone and captivating effects of a sensual kind so much as many other great composers of modern times; and if too much attention is concentrated upon the special element of his orchestration it may doubtless seem at times rough and coarse. But this element must only be considered in its relation to all the others, since the composer may reasonably dispense with some orchestral fascinations in order to get broad masses of harmony and strong outlines; and if he seeks to express his musical ideas by means of sound, rather than to disguise the absence of them by seductive misuse of it, the world is a gainer. In the putting forward and management of actual subjects, he is guided by what appears to be inherent fitness to the occasion. In the first movement of the symphony in C minor, attention is mainly concentrated upon one strong subject figure, which appears in both the principal sections and acts as a centre upon which the rest of the musical materials are grouped; and the result is to unify the impression of the whole movement, and to give it a special sentiment in an unusual degree. In the first movement of the symphony in D there are even several subjects in each section,

¹ For a counterpart to this see the first movement of Beethoven's pianoforte Sonata in F, op. 10, No. 2.

but they are so interwoven with one another, and seem so to fit and illustrate one another, that for the most part there appears to be but little loss of direct continuity. In several cases we meet with the devices of transforming and transfiguring an idea. The most obvious instance is in the allegretto of the symphony in D, in which the first trio in 2-4 time (*a*) is radically the same subject as that of the principal section in 3-4 time (*b*), but very differently stated. Then a very important item in the second trio is a version in 3-8 time (*c*) of a figure of the first trio in 2-4 time (*d*).

Of similar nature, in the symphony in C minor, are the suggestions of important features of subjects and figures of the first allegro in the opening introduction, and the connexion of the last movement with its own introduction by the same means.

In all these respects Brahms illustrates the highest manifestations of actual art as art; attaining his end by extraordinary mastery of both development and expression. And it is most notable that the great impression which his larger works produce is gained more by the effect of the entire movements than by the attractiveness of the subjects. He does not seem to aim at making his subjects the test of success. They are hardly seen to have their full meaning till they are developed and expatiated upon in the course of the movement, and the musical impression does not depend upon them to anything like the proportionate degree that it did in the works of the earlier masters. This is in conformity with the principles of progress which have been indicated above. The various elements of which the art-form consists seem to have been brought more and more to a fair balance of functions, and this has necessitated a certain amount of 'give and take' between them. If too much stress is laid upon one element at the expense of others, the perfection of the art-form as a whole is diminished thereby. If the effects of orchestration are emphasised at the expense of the ideas and vitality of the figures, the work may gain in immediate attractiveness, but must

lose in substantial worth. The same may be said of over-predominance of subject-matter. The subjects need to be noble and well marked, but if the movement is to be complete, and to express something in its entirety and not as a string of tunes, it will be a drawback if the mere faculty for inventing a striking figure or passage of melody preponderates excessively over the power of development; and the proportion in which they are both carried upwards together to the highest limit of musical effect is a great test of the artistic perfection of the work. In these respects Brahms's symphonies are extraordinarily successful. They represent the austere and noblest form of art in the strongest and healthiest way.

C. H. H. P.

LATER DEVELOPMENTS

Brahms's third symphony, which appeared in 1884, has been called the finest and certainly the clearest of all his orchestral compositions. To Hans Richter it was Brahms's 'Eroica' symphony; yet only the first and last movements are of heroic character; and that character is without warlike implication. Its fundamental note is of proud strength that rejoices in deeds; so Hanslick wrote. Brahms made interesting and highly effective use in it of a 'motto' phrase, suggestive of the 'community of theme' that he and others had found valuable in the sonata form. The phrase is the three introductory chords of the first movement, whose upper voice, F, A flat, F, present a short theme, which recurs significantly throughout the movement. It is heard immediately as the bass of the first real theme of the movement, and is repeated in the inner voices, mounting in a peculiarly exultant manner to the higher octave. The 'cross relation' thereby produced has an incisive and penetrating effect that gives the movement a savour of its own. In this movement Brahms has so far modified the usage of earlier masters as to condense the working-out section within unusually narrow limits, making up for it with a very full elaboration of the recapitulation. In the second movement there are hints of the 'motto' theme of the opening measures, and such hints reappear more clearly and indeed unmistakably in the coda of the last movement, bringing the work to an end with a grave, sweet reminiscence of the fiery outburst of the beginning.

The fourth symphony, coming two years later, in 1886, the last work of Brahms in this form, is in strong contrast with its predecessor. It seems at first, and in its opening, barer, lacking in the rich warmth of that. The first theme of the first movement, taken by itself, gives a thin and cold effect, as do certain themes of Beethoven so taken. It is raised to

a higher power and significance by the treatment; and is, indeed, one of the most notable examples of the power of a great master in the development, from apparently insignificant germs, of broad, noble and stirring utterance. There is a curious effect in the tonality of the andante, as of hesitation between the key of E, in which it really stands, and of C, into which it seems to slip. It is of an unusually developed form for a slow movement, with a well-marked second subject appearing first in the dominant and then in the tonic, as in the sonata-form. The last movement presents an unexpected novelty from the hands of one who so consistently stood for the preservation of the classical tradition in the symphony. It is a *PASSACAGLIA* (*g.v.*) (a form that had never before been used as a constituent part of a symphony) based on a theme of eight measures, eight notes in all, over a grim and austere 'ground.' From this simple germ Brahms develops innumerable variations, also of eight measures each, with an amazing fertility of resource, lavishness of invention and variety of expression. 'Sometimes it appears as a melody, sometimes as a bass, while more often it is suggested by a melody of wider range. It is often rather implied than expressed, but never really absent, and its influence is always felt beneath the wealth of melody and contrapuntal device applied to it.'¹

At one time Brahms's orchestration was spoken of by some as dark, muddy, rough, coarse. It no longer seems so, as presented by the finest orchestras under the hands of discriminating and sympathetic conductors—in other words, as Brahms intended it to sound. It has not the glowing brilliancy of Wagner nor the scintillation of Strauss; but for the expression of Brahms's ideas it seems most perfectly fitted. It has warmth, depth, drastic power—as those qualities are required. The scoring is economical, even restrained, refraining from excess. Brahms, as has been remarked, avoids in general mixture of colours; and is apt to treat the instruments by themselves. He uses doublings, as a rule, only when he sets entire groups in strong opposition to each other. Then they have a powerful effect, rounded rich and glowingly shadowed, gaining a fullness of tone not really to be gained by the accumulation of mass. It is the business of conductors, as Weingartner truly says, to dispense with 'impressionism' in conducting Brahms's orchestral works and to study the proper balancing and contrasting of his instrumentation in such a way as to show it in its true light.

In his four symphonies Brahms made the greatest contribution to the literature of the form since Beethoven, and showed conclusively the unsoundness of the contention that with Beethoven the possibilities of the symphonic

form were exhausted. He attempted, and apparently thought of, no radical change or development or innovation in the form. He used it in the main as it was handed down to him by his great predecessors, and found within its outlines ample opportunity for the expression of a great range of ideas of a symphonic sort. His ideas were, in fact, of the symphonic sort, sufficient unto themselves and for symphonic purposes, dependent upon no sister art for their existence and needing no sister art for their explanation or justification. Some of his commentators have tried to read into these symphonies implications of a programmatic kind. But Brahms, perhaps more than any other composer, turned his face in the other direction and undertook to find in music, and in music alone, a great world of ideas that are in themselves music and music alone. He justified supremely the independence of symphonic art in a period when so many composers were turning to the programme and the anecdote as crutches to support the interest and validate the very existence of their musical production.

It cannot be said that Brahms in his symphonic works has formed a school or has deeply influenced the course of music since his day. The great influence that has so long prevailed has been that of Wagner and then of Strauss; and in France, of Franck; others are now taking their place. The great symphonic works of Brahms and Franck stand alone, and the course of modern music has strayed past them into ways that cannot be traced back to any of the great creative forces of the 19th century. Brahms may seem at this time a figure of lonely eminence, the last of his race, the summation of a great series of symphonists. It is given to no man to foretell the future of the art. To many it will seem that the tendencies that now have so much prevalence therein are self-destructive and lead nowhere. Whether there will be a return, in some way, or in some approximation, to the principles and ideals that governed the great symphonists and found their final exemplification in Brahms, it seems certain that his works will remain among the great and inspiring landmarks, looming larger the farther we recede from the composer's lifetime, which coming generations of music lovers will not willingly lose from view.

THE GERMAN SCHOOL.—A contemporary of Brahms, who for a time, owing to the zealous activities of their respective partisans, was considered his rival, was Anton Bruckner.² He wrote nine symphonies. He was an ardent admirer of Wagner and paid him, sometimes to a considerable extent, the tribute of imitation. Bruckner was unfortunate in that he was regarded, justly or unjustly, as a musician pitted

¹ H. C. Colles: *Brahms* ('Music of the Masters'), p. 84.

² For a modern German estimate of Bruckner, see the article under his name by A. Einstein.

against Brahms the symphonist by the extreme Wagnerites, who were said to have no symphonist among them and were thought to be disturbed by the prominence of Brahms in the realm of 'absolute' music. It was even declared by some, however absurdly, that Bruckner was following in the symphony the same ideals as Wagner followed in the music drama. This is, of course, based not on the underlying significance of those ideals but only on such minor considerations as the physiognomy of his themes, sometimes resembling almost to the point of plagiarism certain themes of Wagner; the quality of his harmony; his use of dissonance; his manner of combining certain figurations in the several orchestral choirs; in a kind of free modern polyphony characteristic of Wagner; and finally in the abundance and richness of his orchestration, especially in the resonance of his brasses and the use, probably for the first time in the symphony, of the 'Bayreuth tubas.' Though Bruckner's first symphonies were written in the late 'sixties and early 'seventies, it was not till Nikisch and Levi played them in 1884 and 1885 that their composer attracted much attention. These symphonies are marked by a singular unevenness of texture and value. Grandiose and imposing, even noble and elevated, pages are alternated with trivial ones, with laborious prolixity, dry pedantry and fruitless over-elaboration. Bruckner was a professor of counterpoint, and was inordinately fond of certain contrapuntal technicalities, such as the inversion of themes; but in a larger view the technical structure of many of his movements discloses a singular ineptitude and clumsiness of writing, and his treatment of the symphonic form is often illogical, fragmentary and episodic. His peasant naïveté, his lack of well-considered artistic principles, are evident in his music. Of his symphonies, the fourth is entitled the 'Romantic'; the third is dedicated to Wagner. There is in none of them any hint or suggestion of a 'programme' nor of any extra-musical allusion; and Bruckner is said to have been roused to fury by writers who professed to discover such. Though Bruckner's symphonies are much played in Germany and Austria, and are much admired there, they have never found much favour in England, the United States or France.

Gustav Mahler's career as a conductor had the effect that such a career may be supposed to have upon a composer. The results of a constant flow of other men's ideas through his brain is shown in the 'eclectic' character of his symphonic writing. He produced nine symphonies, several of them being of colossal dimensions, and all representing, in greater or less degree, the programmatic tendency. Nevertheless he was violently opposed to the disclosure of his intentions in that direction

through the medium of explanatory notes. The composer, he contended, should force on his hearers the sensations which streamed through his own mind; then he reaches his goal. There are, however, frequently explanatory or allusive titles upon his symphonies and upon individual movements of them. Mahler also declared that in conceiving a great musical picture he always arrived at the point where he must employ the 'word'; and in several of his symphonies he introduced vocal parts into one or more movements. This is the case with the second (C minor), in which there is a text to be sung in the third and fourth movements; in the third (D minor) where the 'second part,' in five movements, demands an alto voice, a choir of children and a women's chorus; in the fourth, which has a soprano solo in the fourth movement; in the eighth, in which an enormous apparatus is used—two mixed choruses, a chorus of boys and seven solo singers. In these respects and in other, perhaps more important, details of form Mahler's symphonies depart widely from accepted canons, often in the pursuit of the programmatic purpose which he kept to himself or indicated only by general suggestions or through the words of the texts of the vocal numbers. The value of his musical inspiration in these symphonies varies widely. He had a predilection for very long themes; also for a certain sort of tunes of the naïve character of folk-song, with which, however, he could not get far without submitting them to all sorts of incongruous sophistications. His predilection for the naïve is also suggested by his frequent resort to the texts of 'Des Knaben Wunderhorn,' a collection of old German songs.

On the whole, Mahler lacked in his symphonies a truly individual inspiration, a potent inventive power. He attempted to make up for this lack by great elaboration and involution of his material, by the use of very large orchestral resources and of rich and lavish colouring. He not infrequently produced pages of beauty and real splendour, but they are buried in long stretches of dullness. He is another case of one whose invention panted in vain after his hurrying ambition. Much played in Germany and Austria, and by Mengelberg at Amsterdam, his symphonies have never taken deep root in other lands.

In his youthful days Richard Strauss wrote a symphony in F that quite soberly complies with all the symphonic rules, creditably for one of his age—it was in 1884 and he was 20 years old—but it is a wholly derived work and shows strongly the influences to which he was then subjected. His 'Symphonia domestica' came in 1904, after his long series of symphonic poems, and is scarcely a symphony in more than name. It is really a symphonic poem in four movements, and the highly realistic programmatic intention is as clearly marked as in any

of the symphonic poems. The 'Alpine Symphony' (1915), even more elaborately realistic and descriptive in its purpose, is perhaps still less of a symphony in the older acceptance of the term.

INFLUENCE OF NATIONALISM.—A tendency that made great headway in the 19th century was the making of the symphony an expression of nationalism in music, through the use of national colour, usually as suggested in folk-song elements; not always of folk-songs themselves, but through an assimilation of their spirit, of their characteristic melodic turns, of the harmony expressed or implicit in them. It was not new in the 19th century. Sir W. H. Hadow has shown in his examination of Haydn's works¹ the strong inclination of that composer to use Croatian tunes in his music. Mendelssohn made an attempt on foreign soil to suggest national colour in his 'Scotch' and 'Italian' symphonies. Niels W. Gade pursued the suggestion by putting a Scandinavian colour and an allusion to the quality of Scandinavian folk-tunes into his eight symphonies: though, as Schumann says, he would have been the last to deny his debt to German masters.

In modern times the tendency has been exhibited in symphonic music by the Russians. Tchaikovsky, though he was not recognised as one of them by the most thorough-going Russian nationalist composers, the ones who claimed that title exclusively, discloses a fondness for the use of Russian folk-tunes or themes conceived in the most obvious imitation of them. It was objected by those composers, or their spokesmen, that Tchaikovsky's frequent use of folk-tunes is in a manner associated with Western traditions; that he is rarely successful in imparting to their treatment the special complexion requisite to preserve their character as an indigenous product. This is all a little difficult; and perhaps it needs a Slavic inheritance properly to be appreciated. Of Tchaikovsky's six symphonies, only the last three have gained much foothold outside of Russia, the fifth and sixth having been extravagantly popular in England and the United States. The fourth and fifth show most decisively the composer's inclination toward the use of a distinctively Russian idiom. In the fourth a true folk-tune is introduced into the finale as the second theme. The first theme of the first allegro of the fifth symphony is said to be derived from a Polish folk-song. There is an obvious Russian spirit in the last movement of this symphony, with its characteristic *ostinato* effects. In his first symphony Tchaikovsky gives some indication of a programmatic intention of the more general sort which he did not carry out in his succeeding ones. He entitled it 'Winter Day Dreams'; the first two movements are inscribed 'Dreams on the

High Road in Winter' and 'Dreary Land: Land of Mists' respectively. The last two have no titles. In the second symphony there is no attempt at a programme, but the composer was, it is said, persuaded to use a Little Russian folk-tune as the subject for his last movement, and there is the Russian imprint on several themes occurring earlier. The slow prelude to the third is marked 'Tempo di marcia funebre'; the third 'Andante Elegiaco,' which in themselves contain some hint of programme not pursued in the other three movements—there are five.

Tchaikovsky also made use of the device of 'community of theme,' foreshadowed in the works of some of his predecessors and destined to take a still more important place a little later. A sort of seal is set upon the fourth symphony by the fanfare that introduces it and that reappears at the close of the last movement. The device is carried much further in the fifth symphony. There is a unifying force in the strongly rhythmised phrase of fateful import that appears in the introduction, reappears imposingly near the end of the second movement, is suggested as in a whisper at the end of the slow movement, is proclaimed imposingly in the introduction to the last movement, and recurs emphatically in the working out of the second theme of that movement.

Tchaikovsky's preoccupation was not with the exploitation of the national spirit, nor did he, as some have suggested, seek programmatic effects by the use of an affiliated theme. He had a very decided personality of his own that gave his music a larger flight and a greater power than the somewhat parochial efforts of the avowedly national party, the members of which affected to treat him condescendingly, though they themselves had, after all, hardly emerged from the state of amateurs. Tchaikovsky, especially in his last three symphonies, shows a rich and individual expression. He is addicted to a haunting melancholy or a wild and unrestrained passion, to startling contrasts of moods. His luxuriant melodic invention has sometimes a luscious and overripe quality, sometimes a feverishness and lack of poise, that are characteristic of the man; but it is always free and liberally spontaneous. These things are most forcibly set forth in the sixth symphony, where there are the most drastic contrasts, the greatest intensity of mood, that to many will be morbid. His workmanship is skilful, though he does not always follow the accepted canons of symphonic form—departing most widely from them in his last symphony. In structural power, in harmonic originality and richness, in command of all the resources of the orchestra, he takes a high place among modern symphonists. Yet there are not seldom lapses into triviality in his style; the use of *ad captandum* effects, especially of those *ostinato*

¹ A Croatian Composer: Notes on Josef Haydn.

passages that seem particularly dear to the Russian heart, and frequent mannerisms of expression, such as persistently repeated scale passages and unimportant figurations with no special freight of meaning.

The 'Invincible Five,' as they liked to call themselves—Rimsky-Korsakov, Balakirev, Borodin, Moussorgsky and Cui—embarked deliberately upon a nationalistic campaign, in writing music that should be unmistakably Russian, rooted in the soil and racy with the native musical idiom. Most of the works that decisively embody this intention are in the form of symphonic poems and so do not come within the scope of this article. But there are several symphonies in which the composers have tried to give a deep and prevailing tinge of nationalism. Of the 'Five,' Balakirev and Borodin produced symphonies (leaving out of account a couple of unimportant early attempts by Rimsky-Korsakov)—the former two, the latter three. In Balakirev's C major symphony the last movement begins with a Russian tune, so called in the score; the third theme of this rondo-like movement is also distinctively Russian in character. Borodin's first symphony contains no definitely labelled Russian theme, but there are one or two that betray their nationality. Borodin is said to have told a friend that in the adagio of his second symphony he intended to recall the songs of the old Slavonic 'boyars' (troubadours); in the first movement the assemblage of the Russian princes, in the finale the banquet of heroes to the tones of the 'guzla' and the bamboo flute. Above and beyond the use of these specifically nationalistic elements there is a strenuous attempt to attain a distinctive Russian spirit in the music of these composers; an attempt that must in many cases be considered successful. The value of it all, apart from this special quality, has been diverse. Borodin's symphonies still survive in the concert-rooms; and it may be said that the 'Five' made on the whole a considerable contribution to the sum of modern symphonic music.

Although the nationalistic movement in Russia is declared to have reached its height in Rimsky-Korsakov (whose mark was not made as a symphonic composer), and to have begun to decline with his death in 1908, there are some traces of the aggressive Russian influence in the symphonies of some of his younger contemporaries. Glazounov has written no fewer than eight symphonies and is still apparently writing them—with far too much facility and lack of concentration to produce results of lasting value. The use he makes of characteristically Russian themes has steadily diminished in his later works. At the same time—not necessarily because of this—there has been a steady diminution in the pregnancy and individuality of his musical ideas.

The nationalistic movement has pretty well come to an end in Russia, and had done so before the great revolution. Of the more recent representatives of the school, Rachmaninov has been the most prominent. He has been most strongly influenced by Tchaikovsky. His three symphonies show little trace of a distinctively national physiognomy. As for Scriabin, who wrote but two symphonies, of a character and structure doubtfully entitling them to the name, the influences to which he has chiefly submitted have been those of Wagner and Liszt and, as is said by his expounders, the ideas of theosophy, whatever they may mean in music.

The nationalist movement had a strong repercussion in that other Slavic nation, the Czechs. Their earliest distinguished composer, Smetana, devoted his orchestral talents to the symphonic poem; but Antonin Dvořák, who came later, wrote five symphonies, besides some discarded earlier ones. He resorted largely to the national colour and rhythms. In none of his symphonies has he avowedly made use of folk-tunes or dances, such as appear often in his instrumental music in the smaller forms. Yet the 'dumka' and 'furiat' can be traced in spirit, at least, in several. A notable attempt in assimilating a foreign idiom after the same fashion is his fifth symphony, 'From the New World,' op. 95, written during his sojourn in the United States (1892-95), wherein, as also in his string quartet and string quintet (opp. 96 and 97), he avowedly submitted himself to the influence of the negro folk-songs of North America, as he heard them around him and found them noted by American collectors. His success in so doing was for a time the subject of debate among American critics, some of whom found marked traces, in rhythm and melodic quality, of the negro tunes. He used no existing tunes (though he came near to one or two), but tried to mould his ideas on their salient characteristics, and publicly declared that he did so. Others found in this symphony (as in the chamber works) only the utterance of a 'homesick Bohemian' vainly trying to escape from his musical heritage. However this may be, the 'New World' symphony immediately found and has hitherto maintained a remarkable popularity in America, where the negro idiom is most familiar, and in England. The other symphonies of Dvořák have in recent years steadily sunk below the musical horizon and are less and less frequently heard. In all of them the composer shows himself a fertile melodist, a master of brilliant orchestration and what has been called 'the lesser gift of writing brilliant dialogue for his instruments, of making each stand out salient and expressive against a background of lower tone.' He is 'even more successful in those combinations of timbre which harmonize the separate voices

and give the full chord its peculiar richness and euphony.¹ In the matter of form Dvořák was a conservative and held in general to the classical models, though he often enough departed from them in details, nor did he hesitate in certain places to experiment with modifications of them, as in the finales of the G major and F major symphonies.

THE FRENCH SCHOOL.—For a long time it was supposed that the French genius was incapable of symphonic music; that its nature impelled it exclusively to opera. The fate that first befel the attempts of Berlioz was taken as a confirmation of this belief. These attempts remained the only ones in French symphonic composition for a generation or more. It is remarkable, as d'Indy points out in his life of Franck, that in the years between 1884 and 1889 there was a serious return in France to pure symphonic music; a renewed effort to escape from the circumscription of opera and dramatic music. Camille Saint-Saëns had written his first symphony in 1853 as a boy of 16, and had followed it six years later with another; but very little was heard of the first and not much of the second, which was not published till 1878. In 1886 he published his third, in C minor, one of his most important compositions. In this symphony Saint-Saëns attempted a modification of the traditional symphonic form, by dividing it into two parts, which include, however, at least in outline, the four canonical movements, with two brief slow introductions. The composer's purpose is said to have been to eliminate some of the repetitions that belong to the accepted form. He also embodied in his work an elaborate system of thematic transformation and community of theme: a device by no means new. The work is based largely on the first theme and on its transformations in various guises in the several movements. The orchestral forces include the organ and the pianoforte, the latter played by two and then by four hands. The work is remarkable for skill, ingenuity and technical adeptness. It was the flight of creative faculty that Saint-Saëns lacked. Mastery of technique, a certain hard-surfaced finish and a paucity of deeply felt inspiration characterise this symphony; which, nevertheless, because of the skill and resourcefulness shown in the transformation of its themes and its outward effectiveness, is a landmark in modern French art and has retained a certain place in the modern orchestral repertory.

Another French symphony appeared in the same year as Saint-Saëns's—that in G minor by Edouard Lalo, already a distinguished musician, a work to be remembered more by what it foreshadowed in French art than by its intrinsic musical value, for it has hardly kept its place in

the orchestral repertory. Its most important foreshadowing was of the symphony in D minor by César Franck, produced in 1889.

Much has been said about this symphony as one of the starting-points of the younger French school of instrumental music, and, in common with other works of Franck in the sonata form, as marking the 'creation and consecration' of the cyclical method, called by d'Indy 'the basis of modern symphonic art.' It is music greatly superior to its predecessors in the field of French symphony, in poetical warmth, eloquence and a certain high mysticism that characterises so much of the master's limited output. It was, as were all the other chief works of Franck, a new utterance, in a new and wholly original and individual style. The symphony is constructed out of two primary themes, developed now singly, with or without a counter-subject, now combined in a clear and melodious counterpoint. Here is to be found something more than transformation of themes, such as takes so prominent a part in the works of some of Franck's predecessors and is in them effected with an ingenuity that sometimes borders on the mechanical. There is transformation, but there is also development in a more largely structural way. With Franck such transformation was not merely a technical procedure; it was a means of heightening the beauty and value of a number of melodies enhanced by combining them contrapuntally with each other and making of them something richer and finer than their sum. There is a strongly original quality in Franck's themes, an unmistakable personal note in them; but there is a still greater originality in the poignant beauty of his harmony. This is of a richness and unexpectedness entirely individual with him. This harmony is largely based on an elaborate and, in the final analysis, deeply learned and skilful chromatic movement of the parts; but its learning and skill are concealed in the intensity of beauty and the emotional significance of the result. It is hard to believe that Franck was not in this respect to a certain extent influenced by Wagner, whose 'Tristan' can now and again be heard in his harmonies. But it is undoubtedly true that he took no part in the Wagnerian movement that for a time so strongly influenced the French composers of the period, and it would be an entire misjudgment to consider Franck's music 'Wagnerian' in its substance or in its tendencies. He was one of the greater original forces of modern symphonic art; and his single symphony seems destined long to keep its place as one of its finest exemplifications.

César Franck was the centre and inspiration of a group of young French composers, his pupils, who have made contributions of diverse value to modern French symphonic music.

¹ W. H. Hadow, *Studies in Modern Music*.

Ernest Chausson produced a symphony in 1891, largely influenced by Wagner in its style and orchestration, that has many attractive qualities in thematic invention and expression of mood. More individual and independent, especially in his later work, is Vincent d'Indy, who himself was submitted for a time to the spell of Wagner that fascinated the younger French composers at the close of the last century; but who later emerged into a path of his own, with a strong individuality and with a method that may be characterised as austere and has frequently been called 'cerebral.' He produced three symphonies, in which he has shown in varying degrees the influence of his master, Franck, in the matter of structure and thematic development. He passes beyond him, indeed, in the logic and resource with which he has applied Franck's principles; though he is far from showing a similar warmth and emotional quality in his music. His first symphony (1886) is based on a folk-tune of the Cévennes, a 'mountaineer's air.' In it the pianoforte plays an important part which, though elaborate and requiring the skill of a virtuoso, is treated generally as a constituent of the orchestra and not as a solo instrument. The folk-tune, of a pastoral character, is stated at the very beginning. It is consorted with other themes and occupies a prominent, though by no means a preponderating, place throughout the work: assuming new forms in the second movement and variants in the third, portions of it being used in combinations with other themes; all in a manner that testifies to the composer's ingenuity in devising new sources of beauty by his skill of treatment. Even more elaborate is the method pursued in the second symphony in B flat (1904). By this time the composer had outgrown the most obvious influences that Franck and Wagner had had upon him. His style had become more severe and carries out with a sterner and more unflinching logic the principles of thematic development that he had learned from Franck. The themes appear first in the state of simple 'cells,' as the composer himself was pleased to call these brief phrases afterwards united to larger issues. Two themes dominate the whole symphony, though others are used frequently. These undergo numberless changes, rhythmic and melodic transformations, the particular physiognomy of the themes being sometimes radically changed, sometimes more strictly retained. These persist through the four movements of the work. The last movement is an 'Introduction, fugue and finale,' in which all the chief thematic elements of the preceding movements are employed with a remarkable and unflinching readiness of resource and constructive skill. As may be imagined from the account of this method, the symphony gives a certain excuse for the use of the term 'cerebral' in describing it. It is severe, and it is obvious

that the composer took little thought of affording facile pleasure to his listeners.

In 1918 d'Indy produced a symphony, entitled 'De Bello Gallico,' inspired or suggested by the Great War, in which the contending French and German armies are typified, with a final apotheosis of victory. It is of less value than his other symphonies, however, and is open to the charge of being a 'pièce d'occasion,' with all that implies, in which patriotism has taken the place of purely musical promptings.

ENGLISH COMPOSERS.—The writing of symphonies in England hardly reached a point entitling it to serious consideration till the last quarter of the 19th century. The 'renaissance' that had gained a good headway by that time brought several men of high attainment to the front, men who have established an English symphonic school that now, in its latest manifestations, occupies as high a place as any in the modern musical world.

Frederic Cowen is the composer of six symphonies. His 'Scandinavian' symphony, No. 3, in C minor (1880) had great popularity for a time within and without the borders of England, on account of its melodiousness and its pleasing use of Scandinavian colour. Parry produced five; that in C, entitled the 'English' (1889), lays emphasis on certain English characteristics. His symphonies have occupied a less important place in the sum of his work than his choral compositions and other instrumental pieces. In the long tale of Stanford's compositions there are seven symphonies, of which the 'Irish' (1887) has been the most popular, embodying as it does some of the composer's heritage as an Irish musician. Elgar has produced two symphonies, in A flat (1908) and in E flat (1911), which have been recognised as among the most serious and important of his compositions. They are thoroughly characteristic of his musical inspiration as it had been made known in his preceding great choral works, showing the same closely woven texture and logical treatment of thematic material, in itself often of apparent slight significance, till it is transfigured by the highly intellectual power with which it is developed, and by the composer's brilliant mastery of the orchestra.

The most significant of recent symphonies by a modern Englishman have been Ralph Vaughan Williams's three—'A Sea Symphony' with chorus, the 'London Symphony' (1914) and the 'Pastoral Symphony' (1922). They are all of a very general programmatic tendency, the last being 'Malerei'—tone painting—even less than Beethoven's symphony of the same title and purpose. A profoundly serious tone prevails in them. The 'London' symphony, undertaking to suggest various aspects of the great capital, sombre in spirit, is a remarkable achievement in the embodiment of the moods with which it deals; and no less so

is the 'Pastoral,' deeply poetical in its contents and less definite in its outward suggestion. Vaughan Williams is an ardent devotee of the English folk-song. While he has not used actual folk-songs in his symphonies, his musical thought has been much cast in their mould and coloured by them, especially by the modal character that inheres in many of those tunes.

Looking elsewhere, we must notice the seven symphonies of Jean Sibelius. Some of them display singular originality and power. Though he studied in Berlin and Vienna, he brought back to his native Finland much less of their influence than many other northern composers have done. He stands alone, as do few symphonists of less than the highest rank, in the independence and individuality of his work. He has not drawn on the rich stores of Finnish folk-song, so far as appears, for his symphonic material, nor has he undertaken to illustrate programmes; yet there is a strong national colour in much of his music. He avows that he loves the mysterious sounds of fields, forests, water and mountains and wishes to be considered a poet of Nature. His style has a certain innate gloom and severity; qualities that are intensified in his later symphonies. In these he has cast loose from many of the prescriptions of form and shows a radical departure from his previous manner, in his use of dissonances, of the whole-tone scale and sundry other modern effects, as well as in a certain boisterousness, abruptness and fantasticality. It is difficult to trace Sibelius's artistic lineage, as it is to class him among contemporary symphonists, with none of whom he has any marked affinity. His work is not completed; and whither the most recent divagations of his style may lead him is not to be foretold.

Though in Italy in recent years there has been a great growth of interest in purely instrumental music, it has not resulted in important contributions to symphonic literature. Almost the only notable contributions in this direction have been Sgambati's two symphonies in D and E flat, the former of which gained for a time considerable notice outside of Italy, and Martucci's two in D minor and F, strongly influenced by Wagner and Liszt.

AMERICAN COMPOSERS have not produced lasting works, apparently, in the form of the symphony. John Knowles Paine's 'Spring' symphony was for a time popular, leaning heavily on Schumann and filled with a 'romantic' spirit. George Whitfield Chadwick, one of the most independent and muscular of American musicians, has written three symphonies and a 'sinfonietta' that disclose vigour of invention and skill in technique; also a certain quality that might be held to come from the American soil, though not through the use or imitation of any of the various 'folk-songs' that exist on that soil. Edgar Stillman Kelley

has written two symphonies both more or less suggestive of a programme; one entitled 'Gulliver,' the other 'New England.' Henry Hadley, somewhat handicapped in high endeavour by an excess of fluency and facility, has written four symphonies, three of them also bearing suggestive titles. Of these the second, 'The Four Seasons,' won the Paderewski prize in 1902; the fourth, 'North, South, East, West,' was produced at the Norfolk (Connecticut) Festival in 1911.

SYNCOPE. (1) An alteration of the normal time accents of the bar (see ACCENT, METRE, TIME) by the setting up of contrary accents. This may be done either by indications of emphasis or of phrasing in passages of notes of equal value; e.g.

where bar 1 is thus syncopated, or by making the longer notes of the passage begin on the weak parts of the bar; e.g.

The latter is the commoner. In either case the practical effect of syncopation depends on the conflict created between the syncopated accents and the normal time accents either already set up in the hearer's mind and maintained by him imaginatively or simultaneously heard in another part.

In Example 3 there is a double effect of syncopation, (a) the imaginative one as a result of displacing the accents of the original tune (which in the jargon of American music has been called 'ragging the time'), and (b) the actual syncopation of the accent on the second beat of the bar in the flute tune conflicting with the regular time-beat of the bassoon.

Such a passage as Schumann's opening to the Manfred overture

is only a syncopation on paper, because neither ear nor imagination has any experience which can suggest a contrary accent.

(2) Syncopation has become a general term for all that class of 20th-century dance music which has sprung from the American adoption of rag-time. Dance bands are frequently spoken of as 'Syncopated Orchestras' less because their music employs syncopation than because their constitution with saxophones, percussive instruments, etc., is designed to emphasise the effects essential to dance music of the American type. SYSTEM. The collection of staves necessary for the complete score of a piece—in a string quartet, or an ordinary vocal score, four; a PF. trio, four; a PF. quartet, five; and so on. Two or more of these will go on a page, and then we speak of the upper or lower system, etc. G.

SZARVADY, MME., see CLAUS - SZARVADY.

SZOPSKI, FELICJAN (*b.* Galicia, June 5, 1865) studied music with Zelenski and also in Berlin with Urban. He became a teacher at the Cracow Conservatoire (1894) and in 1908 removed to Warsaw, where he attained a prominent position as a teacher of theory and a newspaper critic. In 1918 he became musical adviser to the Ministry of Education. He has done important work as an editor of folk-songs and is himself a song-writer. His opera ('The Lilies') was produced at Warsaw in 1916. C.

SZYMANOWSKA, MARIE (*b.* circa 1790; *d.* St. Petersburg, Aug. 1831), a distinguished pianist of her day, who would, however, hardly have been remembered but for Goethe's infatuation for her. She was born of Polish parents named Wolowski, and was a pupil of John Field at Moscow. She travelled much in Germany, France and England. She died of cholera. One of her daughters married the famous Polish poet Mickiewicz, whom she had introduced to Goethe in July 1829. Goethe knew her as early as 1821, and even then overpraised her, setting her above Hummel; 'but those who do so,' says Mendelssohn, who was then at Weimar,¹ 'think more of her pretty face than her not pretty playing.' Goethe, who renewed the acquaintance in Aug. 1823, at Eger, where she and Anna Milder were both staying, calls her 'an incredible player,' and expresses his excitement at hearing music after an interval of over two years in a remarkable letter to Zelter of Aug. 24, 1823, again comparing her with Hummel, to the latter's disadvantage. Mme. Szymanowska appears to have helped to inspire the 'Trilogie der Leidenschaft,' and the third of its three poems, called 'Aussöhnung,' is a direct allusion to her. In 1824 she was in Berlin. 'She is furiously in

love (*rasend verliebt*) with you,' says Zelter to the poet, 'and has given me a hundred kisses on my mouth for you.'

Her compositions were chiefly for the PF., with a few songs. G.

SZYMANOWSKI, KAROL (*b.* Timoshovka, govt. of Kieff, Ukraine, 1883), studied under Sigismund Noskowski at Warsaw. The latter being a pupil of Moniuszko, he is in the direct line of the Polish tradition, and is now regarded as the leader of a Polish musical renaissance.

The national element is, however, not obtrusive in his music, and it rarely, if ever, assumes a form attributable to folklore. As one of his countrymen has pointed out, it is necessary to bear in mind that, if the Poles are Slavs, their ancient culture is Latin and not Byzantine, which constitutes an important difference. Yet Szymanowski's first works show side by side with piety toward Chopin and occasional tributes to Scriabin, a marked and almost inevitable effect of the Teutonic preponderance. There is an occasional touch of Brahms in the earlier songs and some of the piano pieces, and until recent years there was also a tendency to over-elaboration and a confusing plethora of notes which recall, in romantic moments, the exuberance of Richard Strauss, and at other times, the polyphony of Reger. In short, Pole that he was, Szymanowski had to achieve his own emancipation from the influences which prevailed in his studentship. In spite of these, however, his personality was quick to detach itself from the inherited background, and even in the 'Nine Preludes' (op. 1) one is conscious of a pronounced individuality. The Four Studies (op. 4) were soon made familiar to recital audiences, among others, by Myra Hess. In those early days he was fortunate in his friends, notably Arthur Rubinstein and Paul Kochanski, who not only championed his works, but whose enthusiasm for all that is good in modern music was a valuable stimulant. The piano accounts for a large proportion of his works. Besides those mentioned there are variations (opp. 3 and 10), sonatas (I. C minor, op. 8; II. A major, op. 21; III. D minor, op. 36), a fantasy (op. 14). Three poems ('The Isle of the Sirens,' 'Calypso,' 'Nausicaa,' op. 29), a later set of twelve études (op. 33), three masks (Scheherazade, 'Tantris the Fool,' and a 'Don Juan Serenade,' op. 34), and a recent set of mazurkas introduced by Rubinstein at his recitals. Songs are also numerous, the most important being opp. 2, 7, 11, 13, 17 (twelve), 22, 24 ('Hafiz'), and of more recent date, the "Songs of the Infatuated Muezzin" and some settings of Tagore. One of his best-known works consists of three pieces for violin and piano entitled 'Myths' ('The Fountain of Arethusa,' 'Narcissus,' 'Dryads and Pan,' op. 30) bearing some relationship to the Poems for piano. Other violin works are the sonata

¹ Goethe and Mendelssohn, p. 25.

in D minor (op. 9), Romance (op. 23), Notturmo and Tarantella (op. 28) and the concerto (op. 35) played in 1924 at the Prague Festival of the International Society for Contemporary Music. His orchestral works comprise a symphonic poem, 'Penthesilea,' Overture Concertante (op. 12), three symphonies, of which the third (op. 27) requires a solo tenor and chorus, a 'Song of the Night' completed in 1916, and 'Mandragore,' being incidental music to a comedy of Molière. The two last-named have been performed by the London Symphony Orchestra. He has also composed an opera, 'Hagith' (op. 25), and two large choral works: 'Demeter' for contralto, female chorus and orchestra, and 'Agave' for soprano, chorus and orchestra. His opus-list is rich in works which, whatever their appeal to individual taste, possess the valuable attribute of character and are the utterances of a composer who has something personal to say.

The string quartet in C (op. 37) which was performed in 1925 at the Venice Festival of the International Society for Contemporary Music seems to indicate a new orientation, the thematic material being simpler, and its treatment more

direct. In this respect it approaches more nearly than most of his works to the prevalent conception of Slavonic tendencies as indicated by the Russian composers. In some of his larger works, sonatas and symphonies, Szymanowski has adopted a form consisting of a sonata-allegro, theme with variations, and final fugue on previous subjects, which is peculiarly suited to a certain stage of his development, notably in the second piano sonata and second symphony. The third sonata denotes a further development in form and is of remarkable interest. As regards texture, Szymanowski is no avowed disciple either of atonality or of polytonality, which, however, does not debar him from having recourse to either method as occasion dictates. Despite the generally elaborate character of his style his instinct for design preserves him from excesses which would impair the tonal plan. In conclusion, it has been remarked that apart from all stages of development his work exhibits a kind of duality, certain groups of compositions exhalng charm and poetic grace, whilst others have a profounder, more intellectual purport and are more robustly conceived.

T

TABARRO, IL, opera in one act; text by Giuseppe Adami (from Didier Gold's *La Houppelande*); music by Puccini. Produced Metropolitan Opera House; New York, Dec. 14, 1918; Costanzi Theatre, Rome, Jan. 11, 1919; Covent Garden, June 18, 1920.

TABLETURE (Lat. *tabulatura*, from *tabula*, a table or flat surface, prepared for writing; Ital. *intavolatura* or *intabolatura*; Fr. *tablature*; Ger. *Tabulatur*). (a) The word applied to their list of rules by the Meister-singer from the 'tables' upon which they were recorded. (b) A system of indicating musical sounds (in general use between the 15th and 18th centuries for the music of certain instruments) which, not following normal notation, made use of letters, numbers or other signs. The chief difference of principle between notation and tablature is that in the former pitch and time values are combined in one sign; in the latter two are necessary. (It will be seen that some guitar tablature is an exception to this.) Of this system there are two different classes: (1) That in which the signs employed directly indicated the musical note. To this class belong most organ and clavier tablature; rarely that for string and wind instruments; and, in the rare cases in which notation is not used, that for vocal works. (2) That in which the signs employed indicated the musical notes only through the medium of frets, stops or keys—that is, where the sign indicated the fret

few exceptions, employing notation for keyboard music, and tablature of the second class for that of other instruments. The word was, however, often and wrongly used for organ and clavier music which was printed in ordinary notation: *tablature des orgues, espinettes*, etc. *intabolutura d' organo*. German organ tablature is probably the oldest of any of the systems which were in use during the 16th and 17th centuries, and the most ancient examples are of a mixed notation and tablature, the former for right hand, the latter for left hand. This particular variety was in use in south-west Germany only between 1440 and 1530, and is not to be confused with the mixed notation and tablature used for songs with accompaniments. The ordinary or normal kind was a simple and fairly elastic method of indicating the notes by means of letters without the assistance of the stave. The various octaves were differentiated by different styles of letters, and were called great, little, one-line, two-line, etc., octaves, according to those letters. Sharps were indicated by means of a little tail attached to the letter, and the confusion of such a system is exhibited in the fact that, for the greater part of the time when keyboard tablature was in use, the scale possessed but one flat—*b*. There were considerable variations in the manner of writing the different octaves, and the following three different explanations of the keyboard will be of use in transcribing the signs:

1.—VIRDUNG: *Musica getutscht*, 1511.

$$f g \bar{a} \underline{\bar{b}} \underline{\bar{c}} \underline{\bar{d}} \underline{\bar{e}} f \bar{g} \bar{a} b h c d e \bar{f} \bar{h} \bar{g} \bar{a} \bar{b} h c c c d d e e f f f g g$$

2.—**AGRICOLA**: *Musica instrumentalis deudsch*, 1528.

[illegible]

3.—AMERBACH: *Orgel oder Instrument Tabulatur*, 1571.

EF^CG^DA^BHc^ad^def^gg^ah^ei^ed^def^gg^ah^ei^ed^def^gg^a

on the string, the hole of the pipe or the number of the key on the keyboard where the finger should rest in order to produce the required note (see LYRA VIOL). To this class belongs tablature for all the different varieties of lute (theorbo, arch-lute, chitarrone, etc.), for mandora, cittern, angelica, calichon, orpharion, vihuela da mano, guitar, viols, violin, etc., also for wind instruments and (rarely) keyboard.

(1) It was chiefly in Germany that tablature of the first class was used, other countries, with

The compass in the first two examples is from

to , in the third from  to ; and in the latter the short compass in the bass may be seen by the two lowest tones occupying the black keys otherwise sounding *f*♯ and *g*♯.

Although Praetorius (*Syntagma musicum*, 1615) recommended a better differentiation of intervals (the tail pointing up for a flat, down

for a sharp), the signs given above continued in general use as long as tablature was employed for keyed instruments.

Time-values had separate signs attached to them, and the following were usual :

A dotted note was indicated the same way as in notation, i.e. |. for $\text{♩} \cdot$ etc. Rests were indicated as follows: — or — for — the others

having the same signs as the notes themselves, only being attached to no letters there was no confusion. When notes of identical value followed each other their tails were generally connected: — — — etc. These signs were placed above every part in the music, i.e. in a polyphonic composition of four parts each one had its sign attached, so that there should be no misunderstanding in playing them together. This method, as will be seen, was a much more thorough-going one than that employed by lutenists in setting their polyphonic arrangements. An illustration follows, taken from Amerbach's book referred to above, together with a transcription of the same, and it will be noticed that $d\sharp$ is written for e_b repeatedly.

AMERBACH, *Orgel oder Instrument
Tabulatur*, 1571.

(2) With regard to tablature of the second class, it is acknowledged by Viridung that its first appeal was to those who 'had not learned singing,' i.e. who could not read notation and therefore knew the required musical note only when it was found by means of the fret or stop.

'Den andern dye das nitt singen künden, den ist eyn modus erdacht, der tabulaturen, sye zu underweisen, uff den instrumenten zu lernen.'

The practice, however, of employing tablature for the music of many instruments on which notes had to be 'made' by the performer, was a very general one among trained musicians as well as amateurs, and whether the system was musical or not it remained more or less

unquestioned so long as the instruments were patronised. Under this class of tablature there are two special divisions, i.e. (a) that without lines; and (b) that with lines.

(a) This is the least important division, as it includes only German lute tablature of the 15th and 16th centuries. The inventor of this uncouth system was Conrad PAUMANN (q.v.; d. 1473). He was celebrated as an organist as well as lutenist, and was blind besides. There were critics of the system from the beginning, and Agricola makes merry over it, saying that only a blind man could have been capable of inventing it. Its unusual ways were probably the reason that the fame of early German composers for the lute never went very far away from home, for not until they discarded it for the French method do we find them taking their proper place. That there was some national pride and jealousy concerned in keeping it up as long as possible seems probable, for Melchior Newsidler tried to introduce Italian tablature into his country in the middle of the 16th century, only to meet with great opposition and some reproaches. It finally died a natural death at the end of the 16th century, 1592 being the date of the last published collection. French tablature was thereafter employed in Germany exclusively.

The system being invented in the days of lutes of five strings, its alphabet (which indicated the frets) fitted the five strings and no more. When a sixth became common, as it did early in the 16th century, other signs had to be invented. The ordinary alphabet therefore began on the tenor or *Mittelbrummer*, the string next to the lowest in the usual six-string lute. The letters read *across* the finger-board, not down the strings as in Italian and French systems; open strings were indicated by large numerals. We give a diagram of the finger-board, with the indications of all frets in the five strings, as well as the various ways that different lutenists had of indicating the lowest bass string, or *Grossbrummer*. The Gothic letters of the German alphabet have been replaced by the ordinary ones.

A seventh string, which was used by many Germans in the 16th century (although it was common to lower the *Grossbrummer* a whole tone when demanded by the compass of a piece, a practice known as playing *im Abzug*), further added to the confusion by being sometimes indicated in capital letters, the same as *Judenkünig* employs for the *Grossbrummer*; but as this seventh string was not stopped very often it did not so much matter.

Time-values were indicated by signs above the letters, one sign doing work for all parts played together, and holding good until replaced by another sign. Most German tablature, however, especially up to the middle of the 16th century, repeats its signs over every

letter. They are the same as those in organ tablature, given on p. 246.

The music thus written was barred not altogether according to modern ideas, but on the whole fairly systematically. Time-signatures were common, but not

means definite, for the top string was only tuned as high as it could bear and the other strings accordingly. All instruction-books in all countries make a particular point of this (to quote only one, Thomas Robinson's *Schoole of Musick*, 1603, 'First set up the treble so high as you dare venter for breaking,' etc.), so that the actual key in which transcriptions of lute music are made reproduces the original with no exactitude of pitch. The intervals are the only important consideration. An example of German lute tablature is given below, together with a literal transcription.

(b) The tablature which made use of lines includes all that except the German kind which we have been considering. The lines, when tabulating music for plucked-string or bowed instru-

<p><i>Virdung</i></p> <p><i>Lutenclanig</i></p> <p><i>Gerle & Henselder</i></p>	<p>A B C a b c d e</p> <p>F C G f g h i k</p> <p>L D A l m n o p</p> <p>Q E S q r s t v</p> <p>X F G x y z</p> <p>AA G 7 aa bb cc dd ee</p> <p>FF H 8 ff gg hh ii kk</p> <p>L I 9 ll mm nn oo pp</p>	<p>1st fret</p> <p>2nd "</p> <p>3rd "</p> <p>4th "</p> <p>5th "</p> <p>6th "</p> <p>7th "</p> <p>8th "</p> <p>open</p>

by any means invariable, some printers always ignoring them. The tablature was further complicated by signs for left-hand fingering (sometimes right hand), generally one, two, three or four points (· :: ·) or (· · · · ·), and another sign, sometimes an asterisk (*), sometimes a single or double cross (+ ×) which indicated that the fret which it referred to must be held down as long as possible by the left-hand finger stopping it. This was the only means lutenists had of arriving at contrapuntal effects.

The tuning in use in Germany throughout the 16th century was what was universally called the 'normal' tuning:

that is, from lowest to highest, but this often varied according to the size of the lute. Praetorius mentions seven different sizes (see LUTE); and in any case the pitch was by no

HANS GERLE, *Tablatur*, 1533.

two keys of the keyboard, from to were numbered and the numbers were placed upon the four lines representing the different voice parts. An example of this may be seen at p. 30 of Tappert's *Sang und Klang*; also (p. 44) of another kind of keyboard tablature in which the four lines represent the note f, while the octaves are differentiated by dots or lines attached to the letters.

These, being often coupled with octaves, like some of the 'fingered' strings, we sometimes find (in the 18th century) a direction for the pair to be played as two separate tones; in which case it was indicated by a capital and a small letter, *i.e.* ///A ///a which, translated,

Time-values were written in the same way as in Italian or German lute tablature, except that the tails were scarcely ever run together, and in the 17th century notes, together with a very free version of them, became general,

of bar lines in German lute tablature holds good for Italian and French; also the use of time signatures. Fingering signs (much the same as Italian, except for the use of a *p* or the number 1 for the right hand thumb—^a*p* or ^a1); *tenués* or signs for holding the finger on the fret (expressed by a stroke or bow under the letters

denly deadening the sound of a string (*i.e.* *ex* or *ett*; called the *Tut* by Mace, and indicated so—*+*); *arpeggi*, ^f*—*; and numerous signs for ornaments of which the following are most commonly found in French and German collections of the 17th and 18th centuries; shakes and mordents (the signs generally at the right or left of the letter, sometimes below) (*x*, *7*, *^*, *z*, *•*, *n*, ***, *7*, *h*, *//*); *appoggiature* (*.,*, *7*, */*, *^*, *•*); the vibrato (*x*, *7*, *•*, *n*); these explanation is lengthy and best found by referring to his *Musick's Monument*, 1676—the Elevation (*∴*), single relish (*∴*), and double relish (*∴∴*). It will be seen that the same sign employed by different lutenists meant sometimes two quite different ornaments, and this confusion makes any study of lute ornamentation extremely complicated (cf. ORNAMENTS).

The normal tuning mentioned above gave place generally, in the middle of the 17th century to what was known as the normal

French tuning, *i.e.*  (although others besides were frequently em-

ployed, notably by Mace), and with this key we may transcribe the following illustration:

LE SAGE DE RICHIÉE, *Cabinet der Lauten*, 1695.

Tablature of all other stringed instruments, with one exception (the shorthand kind employed for guitar music), is founded on one of those systems for the lute already explained, and it is only necessary to know the tuning of the instrument in order to be able to transcribe. The French method was by far the most general, and the only variations consisted in the number of lines employed. These followed the number of strings upon the instrument up to six (very exceptionally eight) beyond which the strings were indicated in some such way as lute diapasons were. 16th-century Germans used their own tablature for the viols and violin, while the French and Italian methods were employed in other countries for instruments of those families. Much gamba music in England was written in tablature (called *lyra* or *leero* way), and a great many collections of this have been mistaken for lute music. The test is to observe whether there are any gaps in the letters of the chords; where there are none throughout a collection it may be safely considered viol music, as of course chords played by a bow could not leave out any string, and lutenists rarely made their chords so close as not to do that fairly often. J. D.

ENGLISH LUTE TABLATURE.—It remains to say something briefly as to the form of tablature used for the lute in England at the close of the 16th century. The Italian method is occasionally found in the MSS. of this period, more especially in transcriptions of polyphonic vocal music. By this method, as already stated, the highest string was represented by the lowest of the six lines in the tablature, and numerals were more commonly employed than letters to indicate the fingering of the frets. But with the rarest exceptions the English lutenists, whether in the printed books of Ayres, or in the MSS. of their compositions for the lute as a solo instrument, adopted in the main the French system of tablature. Six lines were used to represent the six strings, the extra diapasons, when more than one came to be employed early in the 17th century, being denoted, as already described, by the signs *//* *///* before the letter

beneath the sixth line. The normal tuning of the mean lute was

and when two lutes were employed for accompanying duets the second lute was ordinarily tuned to a fourth lower as in Dowland's 'Come when I call.' Occasionally, as in Jones's *Second Book of Ayres*,¹ the second or bass lute was tuned

Letters were employed to show which frets were to be stopped, and the signs for the note-values have already been described. Rests were left blank on the lines, but the same signs were placed above to show their value.

The following is the opening phrase of the accompaniment of Dowland's song 'Flow, my tears,' with a translation into ordinary notation:

E. H. F.

THE GUITAR.—As there were a number of

Transcription—

Transcription—

ways of writing guitar music, the confusion of these is sometimes considerable. During the 16th century it was written in ordinary French or Italian lute tablature (numbers or letters on four or five lines according to the number of strings); but in 1606 Montesardo brought out a method—

¹ See *The English School of Lutenist Song-writers*. Robert Jones in the Preface of his *Second Book of Ayres* (1601) claims to have been the first to use ordinary notes in the place of the usual signs for the note-values.

'Nova inventione d' intavolatura per sonare il balletti sopra la chitarra spagnuola senza numeri e note,'

which was adopted with modifications and additions by all countries, although not to the exclusion of the earlier method. It was a kind of shorthand, a series of letters and signs to indicate whole chords; and it differed from all other tablature by the fact that in each sign employed both pitch and time values were combined. The following is the table of signs with their translation and a transcription. Montesardo's tuning of the guitar was the normal one, and resembled that of the lute without the chanterelle, i.e.

although the pitch varied as it did in lute tuning, depending upon the amount of stretching the highest string could bear. The three highest tones were coupled with unisons, the two lowest generally with octaves, although this was not invariable. (In the transcription the octaves are given, but not the unisons.)

Time-values were indicated by capital and small letters, the former having twice the value of the latter; dotted notes were represented by letters with dots, i.e. (A \cdot), (a \cdot), (a \cdot). There were no bar divisions, and as the above were the

only signs employed, there was some confusion in differentiation, for example, a. a. a standing for ♩ ♩ ♩ . The manner of striking these chords (either from the lowest upwards, *da giù in sù*, or from the highest downwards, *da sù in giù*) was further indicated by a line which divided the letters from each other, letters below the line being struck upwards, above the line downwards, i.e.

α β translated thus:

Other methods, in either capital or small letters only, made use of bar lines, with strokes above or below the horizontal line to indicate upward or downward striking of the chords. The time-values were sometimes indicated by notes, sometimes left vaguely to the imagination, i.e.

translated thus:

translated thus:

Mersenne's *Harmonie universelle*, 1636, gives the Italian and Spanish methods translated as follows into French tablature, using the alphabet only as far as P. (The open strings are implied.)

Italian—															
α	A	B	C	D	E	F	G	H	I	K	L	M	N	O	P
2	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2
3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3

Spanish—															
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
α	β	γ	δ	ϵ	ζ	η	θ	ι	κ	λ	μ	ν	ξ	\omicron	π
α	β	γ	δ	ϵ	ζ	η	θ	ι	κ	λ	μ	ν	ξ	\omicron	π
α	β	γ	δ	ϵ	ζ	η	θ	ι	κ	λ	μ	ν	ξ	\omicron	π
α	β	γ	δ	ϵ	ζ	η	θ	ι	κ	λ	μ	ν	ξ	\omicron	π

In the Spanish signs it will be seen that the dot beside the number indicates the minor of the chord represented by a number without the dot. This kind of shorthand was of great convenience in indicating the accompaniments to songs, for the economy of space resulting from the lack of stave was considerable, i.e.

Different masters of the instrument somewhat varied the chords of the alphabet according to their own fancy, and later ones added many new, which were generally explained in a table prefixed to the music. Another tuning was also in use later in the 17th century,

i.e.  Some guitarists who em-

ployed ordinary lute tablature with its time-values, indicated by the tails of the latter the striking upwards or downwards of their chords, thus:  Others of a later date, of whom Francesco Corbetta is the best known, employed a combination of ordinary lute tablature with the shorthand alphabet, and this of course was much better suited to solo music. It will be seen from the illustration that Corbetta makes use of the ordinary time-values, while for playing the chords he uses strokes above or below the line.

CORBETTA: *Varii Capricci*, 1643.

He also advises that the fourth string should be coupled with an octave instead of unison, which looks as if unisons were general in the lower strings. His reason is that the 'harmony' is thereby improved ('les deux unisones ne composent point d'harmonie'), and indeed the chief defect of this kind of tablature is the anomalous 'harmony' it sometimes produces, chords frequently lacking their fundamental

notes, even at the beginning or end of pieces, a defect which not even Corbetta could remedy. Signs for fingering, *tenues*, ornaments, legato, etc., were also freely used in guitar tablature, being in some cases identical with those used by lutenists. After the fashion of lute playing began to make way for that of the guitar, tablature for the latter instrument took on many of the characteristics of the other, especially in regard to solo music, and we find the same tables of signs which are met with in 17th- and 18th-

century lute collections. (See GUITAR and VIHUELA.)

TABLETURE FOR WIND INSTRUMENTS (German flute, hautboy, flageolet, etc.) also employed lines (six, seven or eight) which represented the holes, and dots placed upon them indicated the particular hole to be stopped. This method, founded on the same principle as lute tablature, lasted into the 18th century, but did not survive the better-known system. A clear exposition of pipe tablature is to be found in Thomas Greeting's *Pleasant Companion* . . . for the Flageolet, 1682. The music is indicated by dots or small strokes on six lines, and when all the holes are open by O; a cross through the stroke refers to the 'pinching notes' or octave higher than the ordinary dots. Time signatures are indicated the same way as in lute tablature. Ornaments (beats and shakes), slurs, etc., are also freely used. The method may be studied in the following illustration:

GREETING: *The Pleasant Companion*, 1682.

Printed tablature books are legion, and range from the earliest Italian publication (Petrucchi, 1507) to as late as 1760 (in MS. to the early 19th century), lute tablature beginning as well as ending the list. The name Tablature was, probably even later than this, used for figured bass (in the 17th and 18th centuries this was often called theorbo tablature, because of the strictly accompanying qualities of that instrument), and we might even apply it to our own Tonic Sol-fa system. The student who has not the opportunity to consult the original collections may find examples and facsimiles of many different kinds of tablature not illustrated here, in Tappert's *Sang und Klang aus alter Zeit* referred to above, and in Chilesotti's various publications on the subject; explanations of different methods may also be found scattered through the volumes of the *M.f.M.* and the International Musical Society. TABLE ENTERTAINMENT, a species of performance consisting generally of a mixture of narration and singing delivered by a single individual seated behind a table facing the audience. When or by whom it was originated seems doubtful. George Alexander Stevens gave entertainments in which he was the sole

performer at Marlborough Gardens, Dublin, in Aug. 1752. In May 1775, R. Baddeley the comedian (the original Moses in *The School for Scandal*) gave an entertainment at Marylebone Gardens, described as 'an attempt at a sketch of the times in a variety of caricatures, accompanied with a whimsical and satirical dissertation on each character'; and in the June following George Saville Carey gave at the same place 'A Lecture on Mimicry,' in which he introduced imitations of the principal theatrical performers and vocalists of the period. John Collins, an actor, in 1775 gave in London a table entertainment, written by himself, called 'The Elements of Modern Oratory,' in which he introduced imitations of Garrick and Foote. After giving it for forty-two times in London he repeated it in Oxford, Cambridge, Belfast, Dublin and Birmingham. He subsequently gave, with great success, an entertainment, also written by himself, called 'The Evening Brush,' containing several songs which became very popular.

Charles DIBDIN (*q.v.*) began in 1789 a series of table entertainments in which song was the prominent feature, and which he continued with great success until 1801. Dibdin's position as a table entertainer was unique. He united in himself the functions of author, composer, narrator, singer and accompanist. On Apr. 3, 1816, the elder Charles Mathews gave, at the Lyceum Theatre, his 'Mail Coach Adventures,' the first of a series of table entertainments which he continued to give for many years, and with which he achieved an unprecedented success. Into these his wonderful power of personation enabled him to introduce a new feature. After stooping behind his table he quickly reappeared with his head and shoulders in costume, representing to the life some singular character. His success led to similar performances by others. Foremost among these were the comedians John Reeve and Frederick Yates, whose *forte* was imitation of the principal actors of the day. W. S. Woodin gave for several seasons, with very great success, table entertainments at the Lowther Rooms, King William Street, Strand. Henry Phillips, the bass singer, and John Wilson, the Scotch tenor, gave similar entertainments, of a more closely musical kind; and Edney, the Frasers and others have followed in their wake. (See PHILLIPS, Henry; WILSON, John.) W. H. H.

TABOR. See DRUM (5). (PLATE XXV. No. 2.)

TABOUROT, see ARBEAU.

TACCHINARDI, NICCOLÒ (*b.* Leghorn, Sept. 3, 1772; *d.* Florence, Mar. 14, 1859), a distinguished tenor singer. He was intended for an ecclesiastical career, but his artistic bias was so strong that he abandoned the study of literature for that of painting and modelling.

From the age of 11 he also received instruction in vocal and instrumental music. When 17 he joined the orchestra at the Florence theatre as violin-player, but after five years of this work, his voice having meanwhile developed into a beautiful tenor, he began to sing in public. In 1804 he appeared on the operatic stages of Leghorn and Pisa; afterwards on those of Venice, Florence and Milan, where he took a distinguished part in the gala performances at Napoleon's coronation as king of Italy.

At Rome, where his success was as permanent as it was brilliant, his old passion for sculpture was revived by the acquaintance which he made with Canova, in whose studio he worked for a time. Canova executed his bust in marble, thus paying homage to him in his worst aspect, for he was one of the ugliest of men, and almost a hunchback. When he appeared at Paris in 1811, his looks created a mingled sensation of horror and amusement; but such was the beauty of his voice and the consummate mastery of his style, that he had only to begin to sing for these personal drawbacks to be all forgotten. He is said to have taken Babini for his model, but it is doubtful if he had any rival in execution and artistic resource. The fact of so ugly a man sustaining the part of Don Giovanni (transposed for tenor) with success shows what a spell he could cast over his audience.

After three successful years in Paris, Tacchinardi returned in 1814 to Italy, where he was appointed chief singer to the Grand Duke of Tuscany, with liberty to travel. He accordingly sang at Vienna, and afterwards in Spain, distinguishing himself especially at Barcelona, although then 50 years old. After 1831 he left the stage, and lived at his country house near Florence. He retained his appointment from the Grand Duke, but devoted himself chiefly to teaching, for which he became celebrated. He built a little private theatre in which to exercise his pupils, of whom the most notable were Mme. Frezzolini, and his daughter Fanny, Mme. Persiani, perhaps the most striking instance on record of what extreme training and hard work may effect, in the absence of any superlative natural gifts. His other daughter, Elisa, was an eminent pianist. Tacchinardi was the author of a number of solfeggi and vocal exercises, and of a little work called *Dell' opera in musica sul teatro italiano, e de' suoi difetti*. F. A. M.

TACET, i.e. 'is silent.' An indication often found in old part-books, meaning that the instrument to which it refers is to leave off playing. An equivalent direction 'cantano' means that the players 'count' their bars till they come in again. G.

TADOLINI, GIOVANNI (b. Bologna, c. 1785; d. there, Nov. 29, 1872), learned composition from Mattei, and singing from Babini, and in

1811 was appointed by Spontini accompanist and chorus-master at the Théâtre des Italiens, Paris. He kept this post till the fall of Paris in 1814, when he returned to Italy. There he remained, writing operas and occupied in music till 1830, when he went back to the Théâtre des Italiens, with his wife, Eugenia Savorini (b. Forlì, 1809), whom he had married shortly before, and resumed his old functions till 1839, when he once more returned to Italy. His operas are

'La Fata Alcina' (Venice, 1814), 'La Principessa di Navarra' (Bologna, 1816), 'Il credulo deluso' (Rome, 1817), 'Tamerlano' (Bologna, 1818), 'Il Fato Molinaro' (Rome, 1820), 'Mocartard' (Bologna, 1824), 'Mitridate' (Venice, 1826), 'Almanzor' (Trieste, 1827).

One of his canzonets, 'Eco di Scozia,' with horn obbligato, was much sung by Rubini. Tadolini was at one time credited with having written the concluding fugue in Rossini's *Stabat* (see Berlioz, *Soirées de l'orchestre*, 2ème Épilogue). (Fétis.) G.

TÄGLICHSBECK, THOMAS (b. Ansbach, Bavaria, Dec. 31, 1799; d. Baden-Baden, Oct. 5, 1867), of a musical family, studied at Munich under Rovelli and Gratz, and by degrees became known. Lindpaintner in 1820 gave him his first opportunity by appointing him his deputy in the direction of the Munich theatre, and about this time he produced his first opera, 'Weber's Bild.' After this he forsook Munich and wandered over Germany, Holland and Denmark, as a violinist, in which he acquired great reputation. He then settled in Paris, and on Jan. 24, 1836, a symphony of his (op. 10) was admitted to the unwonted honour of performance at the Conservatoire. A second symphony was given there on Apr. 2, 1837.

In 1827 he was appointed Kapellmeister of the Prince of Hohenzollern-Hechingen, a post which he retained till its abolition in 1848. The rest of his life was passed between Löwenberg in Silesia, Dresden and Baden-Baden. His works extend to op. 33, and include 4 symphonies, a Mass, op. 25; a psalm, op. 30; a trio for PF. and strings; a great quantity of concertos, variations and other pieces for the violin; partsongs, etc. G.

TAFFANEL, CLAUDE PAUL (b. Bordeaux, Sept. 16, 1844; d. Paris, Nov. 22, 1908), famous flautist and conductor in Paris. He was educated at the Paris Conservatoire, where he gained the first flute prize in 1865. The year before he had become solo flautist at the Opéra (1864-90). He held the same position with the Société des Concerts du Conservatoire from 1867 onwards. He was conductor of these orchestras from 1890-1903, and became professor of the flute at the Conservatoire in 1893. Among his pupils there were Fleury, Blancard and Gaubert. His name is associated with the last in the *Méthode complète de flûte en 8 parties* (Paris, 1823). He was the founder of the Société des Instruments à Vent (1879). G. F.

TAG, CHRISTIAN GOTTHILF (*b.* Bayerfeld, Saxony, 1735; *d.* Niederzwönitz, near Zwickau, July 19, 1811), studied at the Kreuzschule, Dresden, under Homilius, and became cantor at Hohenstein, Saxony, in 1755. He was a prolific composer who, living in modest circumstances, wrote only for art's sake, without troubling about publicity, as Rochlitz tells us, who knew him well. He composed 72 cantatas, 11 masses, motets, secular vocal compositions, symphonies for organ and orchestra, and other organ pieces (*Q.-L.*; *Riemann*).

TAGLIA, PIETRO (mid-16th century), composed madrigals: lib. i. *a* 4 v. (Milan, 1555); lib. i. *a* 5 v. (Milan, 1557), lib. ii. (Venice, 1564); also canzonos and other songs in collective volumes (1569-1600) (*Q.-L.*).

TAGLIAFICO, JOSEPH DIEUDONNÉ (*b.* Toulon, Jan. 1, 1821; *d.* Nice, 1900), of Italian parents, was educated at the Collège Henri IV, Paris. He received instruction in singing from Piermarini, in acting from Lablache, and made his début in 1844 at the Italiens, Paris. He first appeared in England, Apr. 6, 1847, at Covent Garden Theatre, as Oroon in 'Semiramide,' on the occasion of the opening of the Royal Italian Opera. From that year until 1876 he appeared at Covent Garden season by season, almost opera by opera. His parts were small, but they were thoroughly studied and given, and invariably showed the intelligent and conscientious artist. In the intervals of the London seasons he had engagements in St. Petersburg, Moscow, Dublin, Paris and America; was stage manager at the Théâtre des Italiens, Monte Carlo, etc., and for many years was correspondent of the *Ménestrel* under the signature of 'De Retz.' In 1877, on the death of Desplaces, he was appointed stage manager of the Italian Opera in London, which post he resigned in 1882 on account of ill-health. Mme. Tagliafico, formerly Cotti, was for many years a valuable 'comprimaria' both at Covent Garden and Her Majesty's. A. O.

TAGLIATO (*Ital.* 'cut'), an obsolete term for the signs *C* and *D*. (See *ALLA BREVE*; *BREVE*; *NOTATION*; *TIME*.)

TAGLIETTI, GIULIO (*b.* Brescia, c. 1660), maestro at the Jesuit college of St. Antonio, Brescia. He composed 13 or more volumes of instrumental compositions, chiefly for 2 vlns. and bass, with and without organ or harpsichord, and violin sonatas with basso continuo, mostly published between 1695-1715 (*Q.-L.*; *Fétis*).

TAGLIONI, (1) MARIE SOPHIE (*b.* Stockholm, Apr. 23, 1804¹ or 1809²; *d.* Marseilles, c. Apr. 24, 1884)³ the daughter of Filippo Taglioni (1777-1871), an Italian dancer and ballet-master (début, Paris Opéra, 1806), by his

marriage with Marie, the daughter of a Swedish actor named Karsten. She was taught dancing by her father, himself the son of a dancer, SALVATORE TAGLIONI,⁴ and on June 10, 1822, made her début at Vienna in a ballet of the former, 'La Réception d'une jeune nymphe à la cour de Terpsichore.' In 1824-25, according to her own account to A. D. Vandam,⁵ she danced at St. Petersburg, and on her journey thence to Germany she had to dance before a highwayman (*à la* Claude Duval), with the ultimate loss to her of nothing more than the rugs on which she had danced. In 1825 she was engaged at Stuttgart, then at Munich, and on July 23, 1827, she made her début at the Opéra, Paris, in 'Le Sicilien,' with extraordinary success, confirmed on Aug. 1 when she danced in the 'Vestale' and with her brother in Schneitzhoffer's ballet 'Mars et Vénus.' From 1828-37 she was engaged there (dancing in London and Berlin, etc., on leave of absence), and reigned supreme as the greatest dancer of the day, albeit inferior to Fanny Elssler as a pantomimist and in versatility. She danced there on the production of Rossini's 'Guillaume Tell,' as Zoloe in Auber's 'Dieu et la bayadère,' as Hélène in 'Robert,' and in new ballets, Hérold's 'La Fille mal gardée' and 'La Belle au bois dormant,' Halévy's 'Manon Lescaut,' Carafa's 'Nathalie,' Schneitzhoffer's 'La Sylphide' (scenario by Nourrit), founded on Nodier's 'Trilby'; as Zulma in Labarre's 'Révolte au sérail,' and in 1836 as Fleur des Champs in Adam's 'La Fille du Danube.' The dances in most of these ballets were arranged by her father, then choreographer at the Opéra. She danced in London, both in 1830 and 1831, at the King's Theatre in Venua's ballet 'Flore et Zéphyre,' wherein she made her début June 3, 1830, also in mutilated versions of 'Guillaume Tell' with her 'Tyrolienne,' and the 'Bayadère' with her noted 'Shawl Dance,' etc. (nearly all the vocal music of the opera being left out). In 1832 she was at Covent Garden, and on July 26 for her benefit appeared for the first time here as the Sylphide, described by Thackeray (*Pendennis*) as 'That prettiest of all ballets now faded into the past with that most beautiful and gracious of all dancers. Will the young folks ever see anything so charming, anything so classic, anything like Taglioni?'

In 1833 and for several seasons she danced again at the Opéra, in the Haymarket. In 1839 she danced in the 'Gitana' on the night of Mario's début in 'Lucrezia.' In 1840 she danced in 'L'Ombre,' both that and the 'Gitana' being originally produced at St. Petersburg where she was engaged after Paris. In 1840 she danced in Paris for a few nights, and again made a farewell visit, four years

³ This is the date given in *D.N.B.* and the *Era*, the *Annual Register* gives the day of death as Apr. 22, and Brockhaus, Larousse, etc., as the 23rd.

⁴ Salvatore (*b.* Palermo, 1790; *d.* Naples, Oct. 5, 1868), made his début at the Paris Opéra in 1799 with his sister Luigia. He married the dancer, Mlle. Perrot, and in 1812 founded at Naples the Royal School of Dancing, and was ballet-master of the San Carlo Theatre.

⁵ *An Englishman in Paris.*

later, between which she danced at Milan. In 1845 she danced at Her Majesty's in the celebrated *pas de quatre* with Carlotta Grisi, Cerrito, and Lucile Grahn (*d.* 1907), in 1846 with Cerito and Grahn in 'Le Jugement de Paris,' and for the last time in 1847, soon after which she retired, and the supremacy of the ballet ceased to exist. With no pretensions to beauty, even hump-backed according to de Boigne, wherever she danced she was acclaimed as the greatest dancer of her time, being remarkable for the aerial grace of her movements, the embodiment of poetry in motion. She was noted for the decency of her poses and gestures, points whereon her father always laid particular stress. Besides Thackeray and Chorley other writers such as Balzac, Feydeau, Arsène Houssaye, FitzGerald in his *Letters to Fanny Kemble*, etc., have all in some shape or other recorded the charm of her movements. Alfred Chalon executed sketches of her in five of her parts, bound up with verses by F. W. R. Bayley (London, 1831, fol.). In the print-room at the British Museum are also engravings of her after Bouvier and others (*D.N.B.*).

In 1832 she married Count Gilbert de Voisins, Vice-Consul of France (*d.* Figueira, Spain, June 1863), by whom she had a son Gilbert, and a daughter Marie, who married Prince Troubetzkoi. The marriage was unfortunate and they soon separated. On her retirement, she lived for some time in Italy. In 1860 she was the choreographer of Offenbach's ballet 'Le Papillon' on its production at the Paris Opéra, being interested in the début of her protégée Emma Livry, a dancer of great promise, soon after burned to death during a performance of 'La Muette.' In 1871, after the death of her father, owing to the loss of her fortune, she settled in London as a teacher of dancing and deportment. In 1874, to her great delight, she was a guest at the Mansion House at a Banquet given to Representatives of Literature and Art. Later she lived with her son at Marseilles. Her brother PAUL (*b.* Vienna, 1808; *d.* Berlin, 1884) was also a noted dancer. The date of his début at the Paris Opéra was 1827. He and his wife danced with Taglioni on the production in England of the 'Sylphide.' He was dancing-master at the San Carlo Theatre, Naples, and was for many years ballet-master at Berlin. By his wife Amalie, née Galster, he had a daughter Marie (1833-1891), who danced at Her Majesty's in 1847, and was a favourite dancer on the Continent until her retirement on her marriage in 1866 with Prince Joseph Windisch-Grätz.

TAILER (TALER, TAYLOR), DANIEL (*d.* Apr. 1643¹), English composer of church music. He was a singing man at Westminster Abbey, and his name appears in lists in this capacity in 1625 (see H. C. de Lafontaine, *The King's Music*). An anthem, 'Singe we merrily,' by him is in some partbooks at Durham Cathedral (tenor cantoris book of this set in B.M. Add. MSS. 30478-9; bass part in Ch. Ch. 1219). A motet by Tailer, 'Christus resurgens,' is in Ch. Ch. 984-8. The alto part of a 'song' or madrigal by him, 'Appollo [*sic*] did in Musick's art,' is also in Ch. Ch. 1219.

J. M^K.

TAILLE. Originally the French name for the tenor voice, basse-taille being applied to the baritone; but most frequently employed to designate the tenor viol and violin (viola). It properly denominates the large tenor, as distinguished from the smaller contralto or haute-contre: but is often applied to both instruments. The tenor violoncello clef was originally appropriated to the Taille. (See VIOL.)

E. J. P.

TAILLEFERE, GERMAINE (*b.* Pau St. Maur, near Paris, Apr. 19, 1892), has made a name for herself as a composer, and first became prominent as one of the Parisian group who called themselves 'les six.' Her 'Pastorale' for small orchestra, and 'Songs' heard in Paris in 1920, made at once a distinctive impression. A quartet, a violin sonata, produced 1922 by Thibaud and Cortot, and other chamber works followed. Her piano concerto in D was first played in London by Cortot at a concert of the Women's Symphony Orchestra in 1924, and has since been repeated at Queen's Hall under Wood.

C.

TAILOUR, ROBERT, 'one of Prince his Highnes Musicians' in 1618. Author of

'Sacred Hymns, consisting of Fifty select Psalms of David and others, Paraphrastically turned into English Verse [by Sir Edwin Sandys] and by Robert Tailour set to be sung in 5 parts, as also to the Viol and Lute or Orpharion. Published for the use of such as delight in the exercise of music in hir original honour, London, 1615.'

W. H. C.

TALES OF HOFFMANN, see CONTES D'HOFFMANN.

TALEXY, ADRIEN (*b.* circa 1820; *d.* Paris, Feb. 1881), a pianist and voluminous composer; produced between 1872 and 1878 six one-act operettas at the Bouffes-Parisiens and other Paris theatres, none of which met with any special favour. He was the author of a *Méthode de piano*; twenty 'Études expressives,' op. 80 (with Colombari); and of a large number of salon and dance pieces for piano solo, some of which enjoyed great popularity in their day. In 1860 Talexty conducted a series of French operas at the St. James's Theatre, London, for F. B. Chatterton, beginning with 'La Tentation,' May 28, which did not prove successful.

G

¹ Westminster Abbey Registers.

TALICH, VÁCLAV (b. Kroměříž, Moravia, May 28, 1883), chief conductor of the Prague Philharmonic Orchestra since 1918. His father, a music teacher, settled at Klatov, where the son received his early education at the gymnasium. He distinguished himself as a pupil of Ševčík at the Prague Conservatoire (1897-1903). In 1905 he was leader in the orchestra of the Opera at Odessa, where he made his first essay in conducting, the branch of his art which most attracted him. From 1906-07 he was professor of violin in Tiflis. On his return to Prague he found opportunities of deepening his experience as choirmaster and conductor of the Orchestral Association. The newly founded Philharmonic Society of Lubanja (Laibach), Jugoslavia, engaged him as conductor (1908-12), after which he fulfilled his wish to study for a time in Leipzig. There he worked under Reger (piano, composition and counterpoint), and Nikisch (conducting). In 1911 he went to Milan, where he worked with the conductor Arturo Vigno. He returned to Bohemia in 1912, as conductor at Plzen (Pilsen), where he remained three years. At Plzen he showed his mastery of the art of conducting, combining the grace and tenderness of Kovačovic with the rhythmic sensibility and fire which are, in part, his Slavonic heritage, and, in part, acquisitions from his studies with Nikisch. Under his permanent direction the Prague Philharmonic Orchestra has become a highly disciplined and responsive organisation, equal to the great variety of music it is called upon to interpret in the course of the season, for Talich's programmes have the widest possible basis. He toured with this orchestra in Italy (1921), and has visited Vienna, Liverpool, Glasgow and Edinburgh as a guest conductor. In 1926 he undertook the direction of the Scottish Orchestra's season.

R. N.

TALISMANO, IL, opera in 3 acts; text, after Scott's *Talisman*, by A. Mattheson (Italian translation by Zaffira), music by Balfe. Produced Her Majesty's Theatre, June 11, 1874; in English, Carl Rosa Co., Liverpool, Jan. 15, 1891. The work, left unfinished by Balfe, was completed by G. A. Macfarren.

G.

TALLIS, THOMAS (b. circa 1505; d. Greenwich, Nov. 23, 1585). Composer and organist. The date of Tallis's birth is not known, but it is a matter of some consequence to attempt to discover it approximately because it also determines relatively the date at which he began to compose. And at a period of rapid musical development this becomes a considerable factor in comparing his style with that of his contemporaries throughout a long life. In this connexion it is well to remember that Tallis was very probably writing some of his most important music while holding the responsible position of organist of the Abbey of the Holy Cross at Waltham; and if we are

right in putting his birth as early as about 1505, for reasons which will be stated presently, the earliest work of Tallis would have been contemporary with that of Taverner, whose death took place five years after the dissolution of Waltham Abbey, and Tallis may have been at Waltham before Taverner left Christ Church.

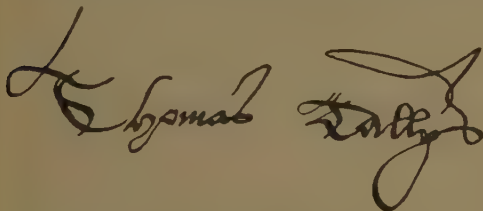

Davey in the *D.N.B.* conjectures that Tallis was born about 1510. It is likely that his birth was four or five years earlier. For in 1577, when Tallis and Byrd petitioned Queen Elizabeth for the grant of a lease, Tallis described himself as 'verie aged,' an expression implying that he was at least 70 at that time; and it is not unreasonable to assume from this that he would have been about 80 at the time of his death in 1585. Born in the opening years of the sixteenth century he thus bridges the gap between Fayrfax and the late Elizabethans, a period of tremendous musical change. The name of Tallis, Tallys or Talles is uncommon. Robert Talles, or Tallys, died in 1571, and was buried at Islington parish church.¹ He had relatives living at Leicester, and Clement Tallis, who matriculated at Christ Church, Oxford, in 1581² as 'of co. Leic.' seems to have been the son of his brother Clement. The name is found at Burton Overy in 1669, when Henry Tallis left a legacy to the poor of that parish.³ No connexion between these families and that of the composer can be proved on the known facts, yet they suggest that Thomas Tallis may have been a native of Leicestershire.

There is no evidence to support the conjectures that Tallis was one of the 'children' of the Chapel Royal or that he was under Thomas Mulliner at St. Paul's Cathedral. The earliest known fact about him is that he held an official position, presumably musical, at the Abbey of the Holy Cross at Waltham in Essex. His name is not included in the list of those who received pensions on the dissolution of Waltham Abbey in 1540, but it appears in a long list of some 70 persons who received small sums in reward for services when they were deprived of their offices. This list is appended to an inventory of the goods belonging to the abbey dated March 24, 31 Hen. VIII.⁴ Tallis received a larger sum than any one else in the list, namely 20s. for wages and 20s. 'in reward,' or as a gratuity. Another item of interest in the same list shows that five 'children' in the church, evidently choristers, jointly received 20s. for wages and 20s. in reward. The names in this long list also, no doubt, include the singing men. From these details it may fairly be assumed that Tallis was master of the choristers or organist. The inventory shows that there was 'a lytell payre of organes' valued at xxs in the Lady Chapel, and that

¹ P.C.C. 11 Daper.² Foster's *Alumni Oxon.*³ Nichols's *History of Leicestershire*, vol. 1, p. 20.⁴ P.R.O. Exchequer K.B. Church goods 24.

in the choir was 'a great larg payre of organs' and also 'a lesser payr.' No organ is mentioned in the inventory as being 'in the church.'

A very interesting manuscript belonging to Waltham Abbey seems to have passed into the possession of Tallis at the time of the dissolution. It is now in the British Museum.¹ It was written in the hand of John Wylde, formerly precentor of Waltham Abbey and contains a number of treatises on musical subjects. Its chief interest to-day lies in the fact that Tallis wrote his name upon the last page and this autograph is here reproduced.²

The name was written again on the same page in large block letters, and this may also be in the composer's hand, but it is more than doubtful whether the succeeding notes, referring to certain books—possibly choir books—were written by Tallis.

Tallis may have become known to Henry VIII. before the dissolution of the abbey, for the King was a frequent visitor there. His appointment as one of the gentlemen of the Chapel Royal must have been made about the year 1540 or even earlier, for in a petition, made jointly with Byrd in 1577, he stated that he had served 'these fortie yeres',³ referring, without doubt, to his position in the Chapel Royal. His name appears in several lists of the 'gentlemen of the chapel.' In one list,⁴ for example, given in connexion with the accounts of the King's household, his name stands sixteenth out of thirty-two; this list is undated, but was about the year 1545; the rate of stipend was £1 per diem between the thirty-two men. Tallis does not appear to have been organist of the chapel at this time; Richard Bowyer was master of the children. At the funeral of Henry VIII. and the coronation of Edward VI. Tallis's name stands sixteenth out of twenty of those who received liveries on those occasions.⁵ In 1557 Tallis and Bowyer jointly were granted by Queen Mary a lease for 21 years of the Manor of Minster in the isle of Thanet.⁶ In the first year of Queen Elizabeth's reign the Royal Household Accounts show that Tallis received a sum of £40, presumably as a gratuity.⁷

On Jan. 22, 1574-75 Tallis and Byrd were granted a licence⁸ by letters patent which gave them the sole right for printing music and music paper in England.⁹ This was intended as a royal boon which should have been lucrative, and such it proved to be at a later date; but in the first two years it resulted in loss, and the two composers presented a petition to the Queen asking her to compensate them by granting them a lease for twenty-one years of the annual value of £30. They pleaded that Tallis 'is now verie aged and hath served y^e matie and y^e Royall ancestors these fortie yeres and hadd as yet never anie manner of preferment except onely one lease . . . which being now the best p^{te} of his lyvinge is wth in one yere of expiration.' They further stated that the printing licence had brought a loss of 200 marks. Byrd pleaded that his daily attendance in the royal service had interfered with his teaching and that his income had diminished since he left Lincoln Cathedral. The lease was granted.

Tallis and Byrd were acting as joint organists of the Chapel Royal at this time, and were so described on the title page of the set of their motets which they published in 1575. This was entitled:

** Cantiones quae ab argumento sacrae vocantur, quinque et sex partibus auctoribus Thoma Talliso & Guiljelmo Byrdo Angliae Serenissimae Reginae Maiestati a privato Sacello generosis & Ornatissimis.*

It was dedicated to the Queen, and contained 16 numbers by Tallis and 18 by Byrd. In a rather unusually large amount of prefatory matter two poems were included in praise of the two composers written in Latin elegiacs, one by Richard Mulcaster and the other by Ferdinand Richardson. In this latter poem is the much quoted line 'Tallisius magno dignus honore senex.'

The only other works of Tallis published in his lifetime were five anthems set to English words included by John Day in his 'Certaine notes' (1560-65).

The closing years of Tallis's life seem to have been spent at Greenwich where he owned a house. He was married in 1552, the date being calculated from his epitaph; he had no children. The surname of his wife is not known, but her Christian name was Joan. She survived him. Tallis died at Greenwich on Nov. 23, 1585 and was buried in the parish church of St. Alphege, just inside the chancel rails, and near the grave of his colleague Richard Bowyer. A brass plate was placed on his tombstone; the inscription on this plate was fortunately recorded by Strype in his *Continuation of Stowe's Survey of London*, for shortly after this the church was pulled down and rebuilt and the tombstone of Tallis

disappeared. The inscription may be seen in vol. vi. of the Carnegie Edition of 'Tudor Church Music'; it was also printed by Hawkins, Burney and Boyce, but Strype's spelling has not been accurately reproduced by them. Hawkins¹ says that Dean Aldrich repaired Tallis's gravestone.

The will of Tallis (P.C.C. 52 Brudenell) was dated Aug. 20, 1583, and proved on Nov. 29 of the same year. Joan, his wife, was sole executrix; William Byrd and Richard Cramwell, also of the Chapel Royal and the intimate friends of Tallis, were his 'overseers.' Byrd was one of the witnesses. The will provides no clue to his family history except that he had a cousin in Thanet named John Sayer. He left his share of the printing licence to his godson Thomas Byrd, the composer's son.

Mrs. Tallis died in 1589 and was buried in her husband's grave. Her will (P.C.C. 54 Leicester) is chiefly interesting as containing a very full list of the furniture and other personal property belonging to Tallis and his wife.²

It may be assumed that in the early part of his career while at Waltham Abbey Tallis confined himself exclusively to the composition of music for the Latin rites of the Church. There is no means of dating any of his music with any degree of certainty, but it seems likely that the motet 'Gaude gloriosa' belongs to the Waltham period; it includes prolonged phrases, sometimes split up by rests, set to single syllables of the words; a good illustration of this style of writing is to be found at the word 'glorificat' at the end of the 'Gaude Virgo' section of this motet. 'Ave Rosa' and 'Ave Dei Patris' contain similar passages, and for other reasons also these may be assigned to the earlier period of Tallis's work. The five-part Mass and the Lamentations are far more concise in treatment, but the four-part Magnificat is another work that may be early. The four-part Mass looks like a very early work; only one source of text is known and this seems to be faulty, but judged by this text the counterpoint in some places seems feeble and unsatisfactory if it really represents the composer's work. The motets of Tallis published in the 'Cantiones sacrae' of 1575 show a marked advance in style compared with the work of the pre-Elizabethan composers. In this collection Tallis exhibited those qualities which have made his name so famous; and some of these same motets, for instance, the 'Miserere nostri,' are constructed with that marvellous contrapuntal skill in which both he and Byrd were supreme.

In contrast to these elaborate pieces are such beautiful and simple works as 'O nata lux' and 'Procul recedant' which were printed in the same set. These are little more than hymn tunes, quite regular in melodic outline

and for the most part homophonic in treatment. There are several further examples of this character by Tallis surviving in MS., notably in the Mulliner MS.³

The motet 'Spem in alium' is written for 8 choirs, each of 5 voices. Tudway⁴ mentions 'the original MS.' as being extant in his time. The earliest text known is now (1927) owned by M. Brook of Southport, and formerly was at Gresham College. This MS. dates before 1612; the text is English, and the 40 voice parts are complete. Hawkins⁵ wrongly states that the English version was made in the time of Charles I. or II.

Tallis has been called 'the Father of English Cathedral music,' but this title has been assigned to him in comparatively recent times when the work of most Tudor musicians, including most of that of Tallis himself, had passed into neglect. It was Byrd who in his own day was styled 'a Father in Musicke,' and Byrd did more than Tallis to establish what may be called the tradition of English Cathedral music. Again, if it were a matter of who was first in the field, it is commonly thought that Tye's setting of the evening canticles is even earlier than Tallis's 'short' service, and some others in the Bodeian MS. Mus. Sch. c. 420-2 are also probably earlier. (See SERVICE.) Nevertheless Tallis undoubtedly was among the first composers who wrote music to English words for use with the English rites of the Church. It must have been very soon after the publication of *The Booke of Common Praier noted*, in which Merbecke had provided a fixed version of the plain-song for the English Preces, Responses and Litany, that Tallis, as Hawkins describes it, 'added three parts,' to the plain-song, making a version in four-part harmony, and Hawkins was probably referring here to Tallis's four-part setting of the Preces and Responses which differs entirely from his five-part setting. Other composers of this period also left more than one independent setting of the Preces and Responses. The two versions of the Litany ascribed to Tallis, one in four parts and one in five, have given rise to much discussion. The five-part setting was printed by Barnard, and is also found in Barnard's MSS. (R.C.M. 1045-51). On internal evidence, in spite of some 'forbidden' progressions as printed by Barnard which may be due to faulty transcription, this five-part setting is unquestionably the work of Tallis. The four-part setting of the Litany, found in the Peterhouse MSS. and also in one of the Durham organ books, and ascribed there to Tallis, is almost certainly an adaptation of the five-part setting. In the Durham book it is called 'the New Litany' which lends support to this theory. It was also printed by Lowe

¹ Vol. iii. p. 266.

² These two wills are printed in full in vol. vi. of the Carnegie edition of 'Tudor Church Music.'

³ B.M. Add. MSS. 30613.

⁵ Hawkins's *Hist.* vol. iii. p. 262.

⁴ B.M. Harl. MS. 3782 fo. 95.

in his *Short Directions*, 1661. When Boyce in 1760 reprinted Tallis's five-part Litany he emended Barnard's text in a manner consistent with the orthodoxy of his own time, and quite probably in accordance with the original version of Tallis; it is unlikely that he had access to any independent text at that date.

The 'short' service of Tallis, known as 'Tallis in D minor' or 'in the Dorian mode' includes, besides the ordinary morning and evening canticles, a full setting of the Venite (for which Boyce in his 'Cathedral Music' substituted a chant), Kyrie, Creed, Sanctus and Gloria in excelsis. It was probably composed at least as early as 1550, for scarcely any settings of the English 'Gloria in excelsis' are of later date although there are several in the Bodl. MS. Mus./Sch. e. 420-2. And another detail points to this early date; early texts of the Tallis *Te Deum* give the phrase 'the Holy Ghost also being the Comforter' which is found only in the King's Primer and the First Prayer Book. A. H. D. Prendergast pointed out in the *Zeitschrift* of the Int. Mus. Ges. ix. p. 65 how Tallis in the Creed of this service deliberately departed from the universal tradition of the musical setting of the Mass by making no break before the words 'And was incarnate.' This entire service was written in conformity with the principle of securing verbal clearness by means of homophony as opposed to polyphony, yet it is marked by a good deal of rhythmic freedom and flexibility as well as some melodic interest; it has been better understood in Cathedral circles since the freely-barred edition of Dr. Kitson has been published. Tallis's five-part service has unfortunately perished with the exception of the bass part alone, and the known text of another English *Te Deum* is far from complete. A four-part English Benedictus is in the Lumley MSS. in the B.M.; these MSS. were almost certainly in Cranmer's library and date from about 1547.

The Anglican chants commonly attributed to Tallis are of more than doubtful origin; but the ninth of his 'tunes' written for Archbishop Parker's Psalter (1567) is in general use as a modern hymn tune under the name of 'Tallis,' and the so-called 'canon' is an adaptation from the eighth tune.

Tallis's work as an English anthem-writer has been much misunderstood. Hawkins and Burney wrote as if all his English anthems were adaptations of Latin motets; and they attributed much of the work of adaptation to Aldrich. Hawkins said it was Aldrich who adapted Tallis's 'O sacrum convivium' to the English words 'I call and cry.' In more recent times it has been freely but incorrectly stated that John Barnard was responsible for the earliest of these adaptations, and there were some who went so far as to aver that all

the English anthems of the Tudor composers were originally written as Latin motets.

In the case of Tallis four out of the five of his English anthems printed by Barnard in 1641 were adaptations of motets, but the adaptations were made many years earlier; indeed many of these and other adaptations are found in the 16th century MSS. and it is more than probable that they are the work of the composer himself or at least had his sanction.

But apart from adaptations there are a fair number of original English anthems by Tallis, and some of these date from the time when the English language was first being used in the church services. For example, 'Hear the voice and prayer' and 'If ye love me' are both to be found in the Bodl. MS. Mus. Sch. e. 420-2, the date of which is *circa* 1546-49; and 'Remember not' is in the Lumley MS., already quoted, dating *circa* 1547.

Such secular and instrumental work by Tallis as has survived is of small importance.

The church music of Tallis has been collected and scored with as much completeness as was possible by the editors of the Carnegie edition of 'Tudor Church Music.' The Latin music is the subject of vol. vi. of the series, and the English church music is intended to be printed in a later volume. The following is a list of known compositions by Tallis:

A. CHURCH MUSIC

 Venti Redemptor. B.M. Add. MSS. 30513.
 Virtu honor et potestas, a 5. Can. Sac. (1675), No. 15.

Note.—In the above list fragmentary sections of the motets are not given separately, as in some instances in former editions of the Dictionary, but the text referred to under the principal titles in many cases only covers small sections.

II. ENGLISH

SERVICES, ETC.

Preces, a 5. Barnard (1641); R.C.M. MSS. 1045-51.
 Preces, a 4. Pet. MSS. 35, 36, 42, 44; St. John's Oxf. MSS. 180.
 Responses, a 6. Barnard (1641); R.C.M. 1045-61; Durh. MSS. C. 1.
 Responses, a 4. Pet. MSS. 33, 34, 35, 39.
 Litany, a 5. Barnard (1641).
 Litany, a 4. Pet. MSS. 35, 37, 42, 44; Durh. MSS. A. 5.
 Psalms (First Set).
 Blessed are those. St. John's Oxf. MSS. 180.
 Wherewithal. Barnard (1641); St. John's Oxf. MSS. 180.
 O do well. Barnard (1641); St. John's Oxf. MSS. 180.
 My soul exulteth. Barnard (1641); St. John's Oxf. MSS. 180.
 Psalms (Second Set).
 The Lord said unto my Lord. St. John's Oxf. MSS. 180; Ch. Ch. in MS. at end of Barnard (formerly at Hereford).
 Lord remember David. St. John's Oxf. MSS. 180.
 Psalms (Third Set).
 I call with my whole heart. St. John's Oxf. MSS. 180.
 O consider mine adversity. St. John's Oxf. MSS. 180.
 Princes have persecuted me. St. John's Oxf. MSS. 180.
 Let my complaint. St. John's Oxf. MSS. 180.
 'Short' Service, a 4 (V., T.D., B., K., Cr., S., Glo., M., N.D.). Barnard (1641); B.M. Add. MSS. 17784, 29289; Roy. Lib. Cosyn's MS.; Pet. MSS. 35-37, 42-45; Ch. Ch. MSS. 1001; R.C.M. MSS. 1045-61; Durh. MSS. A. 6, C. 1, 8, 13; York MSS., Windsor MSS., Wimborne MSS.
 Service, a 4 (V., T.D., B., K., Cr., Gl., M., N.D.). St. John's Oxf. MSS. 180-1.
 Te Deum, a 5. R.C.M. MSS. 1046-7, 1049-51; Ch. Ch. MSS. 1001.
 Benedictus, a 4. B.M. Roy. App. MSS. 74-76.
 Psalm Tunes printed in Archbp. Parker's Psalter (1567):
 1. Man blest no doubt. 6. Expend, O Lord.
 2. Let God arise. 7. Why brag'st in malice high.
 3. Why fumeth in flight. 8. God grant with grace.
 4. O come in one. 9. Come Holy Ghost eternal God.
 5. Even like the hunted hind.

ANTHEMS

(a) Original Settings

A new commandment. B.M. Add. MSS. 15166, 29289.
 Blessed are those that be undefiled. B.M. Add. MSS. 22597, 29401-6; Bodl. MS. Mus. Sch. a. 423; Tenb. MSS. 354-8, 389.
 Hear the voice and prayer. Day (1560-65); B.M. Add. MSS. 15166, 29289; Bodl. MS. Mus. Sch. a. 420-2; Pet. MSS. 33, 38; Durh. MSS. A. 3, C. 11, 17.
 I give you a new commandment. Day (1560-65); B.M. Add. MSS. 30513.
 If that a sinner's sighs. Tenb. MSS.
 If ye love me. Day (1560-65); B.M. Add. MSS. 15166, 29289, Bodl. MS. Mus. Sch. a. 420-2; Durh. MSS. A. 3, C. 11, 17.
 O give thanks. Tenb. MSS. 791.
 O God be merciful. Pet. MSS. 35, 37, 42, 44.
 O Lord give Thy Holy Spirit. Barnard (1641); B.M. Add. MSS. 15166, 29289, 30478, 31443; York MSS.
 O Lord God of hosts. B.M. Add. MSS. 29289.
 O Lord in Thee is all my trust. Day (1560-65).
 O sing unto the Lord. Bodl. MS. Mus. Sch. a. 423.
 O sing, O Lord. B.M. Add. MSS. 30480-4.
 Remember not, O Lord. Day (1560-65); B.M. Roy. App. MSS. 74-76, Add. MSS. 29289.
 Teach me Thy way, O Lord, and I will walk. B.M. Add. MSS. 15166; Ch. Ch. MSS. 1001.
 This is My commandment. B.M. Add. MSS. 30478; Pet. MSS. 35-37, 42-43; Durh. MSS. A. 1, 3, C. 11, 17.
 Verily, verily, I say unto you. B.M. Add. MSS. 15166; Pet. MSS. 34, 38, 39; Ely MSS.
 When shall my sorrowful sighing. B.M. Roy. App. MSS. 74-76, Add. MSS. 33933.

Note.—Anthems quoted in former editions of the Dictionary from 'St. Paul's List' are not included here. They are not found in any early MSS., and are probably late adaptations.

(b) Early Adaptations of Latin Motets to English Words
 Arise, O Lord (Salvator mundi, No. 1). B.M. Add. MSS. 30478-9 Durh. MSS. C. 1, 2, 3, 7, 11, 14, 16.
 Blessed be Thy name (Misi autem nimis). Barnard (1641); B.M. Add. MSS. 17792-6, 29289, 30478-9; Ch. Ch. MSS. 1001; R.C.M. MSS. 1045-61; Durh. MSS. A. 8, C. 4-6, 10-12, 15, 16; York MSS.
 Discomit them (Absterge Domine). Pet. MSS. 42, 44, 45; Ch. Ch. MSS. 1001.
 I call and cry (O sacrum convivium). Barnard (1641); B.M. Add. MSS. 16177, 17784, 29237, 29247, 30478-9; R.C.M. MSS. 1045-61; Ch. Ch. MSS. 1001; Durh. MSS. A. 1, C. 4, 11, 12, 16; York MSS., Windsor MSS., Wimborne MSS.
 O holy and sacred banquet (O sacrum convivium). B.M. Add. MSS. 29372-7.
 O praise the Lord (O salutaris hostia). R.C.M. MSS. 1051; Wimborne MSS.
 When Jesus went into Simon the Pharisee's house (Salvator mundi, No. 2); B.M. Add. MSS. 30480-4, 31226.
 Wipe away my sins (Absterge Domine). Barnard (1641). B.M. Add. MSS. 17792-6, 30478, 30480-4; R.C.M. MSS. 1045-7-9; Tenb. MSS. 1176-82.
 With all our hearts (Salvator mundi, No. 1). Barnard (1641); B.M. Add. MSS. 17784, 17792-6, 29289, 29372-7, 30478, 30480-4; R.C.M. MSS. 1045-7-9; York MSS., Tenb. MSS. 1180.

(c) Uncertain and Erroneous Ascriptions

All people that on earth. Not found earlier than Ch. Ch. MSS. 1220-4. Adapted by Aldrich as 'from Tallis.' Printed by Arnold (1842) as by Tallis.
 Come Holy Ghost. Printed anonymously by Lowe (1661). Not found in MS. earlier than Ch. Ch. MSS. 1220-4, where it is ascribed to Tallis.
 How long shall mine enemies? Ascribed to Tallis in B.M. Add. MSS. 29247 (in tablature), is certainly by Byrd.
 I give you a new commandment. Ascribed to Tallis in B.M. Add. MSS. 30513, but by Day (1560-65) to Shepherd. The Tallis ascription is probably correct.
 O thou God Almighty. Ascribed to Tallis in Ch. Ch. MSS. 1001, is certainly by Hooper.
 Out from the deep. Ascribed to Tallis in Ch. Ch. MSS. 6, may be an adaptation.
 Praise the Lord, ye servants. Stated in a former edition of the Dictionary to have been in a MS. in possession of Joseph Warren, cannot be traced.
 Teach me, O Lord. Adapted from Salvator mundi, No. 1, mentioned in the list in a former edition of the Dictionary, cannot be traced at Ch. Ch. or elsewhere.
 This is my commandment. Is ascribed to Tallis in the Durham MSS. One of the Pet. MSS. (37) ascribes it to John Mundy, and the other MS. quoted above gives no ascription. There is little doubt that it is by Tallis. In B.M. Add. MSS. 30478 it comes between 'If ye love me' and 'Hear the voice and prayer.'

B. SECULAR MUSIC

VOCAL

As Caesar wept. Ascribed to Tallis in B.M. Add. MSS. 18936-9, is ascribed to Byrd in other MSS., and is possibly by Byrd.
 Fond youth is a bubble. B.M. Add. MSS. 30513.
 Like as the doleful dove. B.M. Add. MSS. 30513.
 O ye tender babes. B.M. Add. MSS. 30513.
Note.—These last two have all the appearance of being hymn tunes.

INSTRUMENTAL

Two in nomines in Bodl. MSS.
 In nomine. Tenb. MSS.
 In nomine. B.M. Add. MSS. (in lute tablature).
Note.—These have not been collated and possibly the last two are the same as these in Bodl.
 Felix namque. Fitz Virg. Book, No. 109, dated 1562.
 Felix namque. Another setting. Fitz Virg. Book, No. 110, dated 1564.
 Felix namque. Another setting. The Lady Nevill Book. B.M. Add. MSS. 30485 (extracts from the Lady Nevill Book), and Add. MSS. 31403.
 Poyntets for the Virginals. B.M. Add. MSS. 30513.
 Two Pieces for the organ: (i) Gloria tibi Trinitas; (ii) 'parts on a round time'; set an unnamed piece. Ch. Ch. MSS. 371.
 An unnamed piece. Ch. Ch. MSS. 1034. E. H. F.

TAMAGNO, FRANCESCO (b. Turin, 1851; d. Varese,¹ Aug. 31, 1905), tenor singer, was educated at the Conservatorio of Turin, and entered the chorus of the opera, but only remained there a short time, being compelled to join the army. At the close of his military service he made his debut at the Teatro Bellini, Palermo, in 'Un Ballo in maschera,' in 1873. A more important event was his appearance in 'Ernani' at La Scala, in 1880. Verdi saw in him the ideal impersonator of Otello, and on his creation of this part at La Scala, in 1887, he leapt at once into the front rank of operatic tenors. His first actual² visit to London was

¹ Buried at Turin.

² His name had appeared in the prospectuses of Covent Garden and Her Majesty's about 1877.

in the production of this work in 1889 at the Lyceum Theatre, after which he made a rare success in America, receiving terms that were then unparalleled for any male performer. M.

TAMBERLIK, ENRICO (b. Rome, Mar. 16, 1820; d. Paris, Mar. 13, 1889), tenor singer, received instruction in singing from Borgna and Guglielmi, and made his début in 1841 at the Teatro Fondo, Naples, in Bellini's 'I Capuletti.' He sang with success for several years at the San Carlo, also at Lisbon, Madrid and Barcelona. He first appeared in England Apr. 4, 1850, at the Royal Italian Opera, as Masaniello, and obtained immediate popularity in that and other parts. He remained a member of the company until 1864 inclusive, excepting the season of 1857, singing in the winters at Paris, St. Petersburg, Madrid, North and South America, etc. His other parts included Aug. 9, 1851, Phaon ('Saffo'); Aug. 17, 1852, 'Pietro il Grande'; June 25, 1853, 'Benvenuto Cellini'; May 10, 1855, Manrico ('Trovatore')—on production of those operas in England; also, May 27, 1851, Florestan ('Fidelio'); July 15, 1852, Ugo (Spohr's 'Faust'); Aug. 5, 1858, 'Zampa'; July 2, 1863, Gounod's 'Faust'—on the revival or production of the operas at Covent Garden. He reappeared at the same theatre in 1870 as Don Ottavio, the Duke ('Rigoletto'), and John of Leyden; and in 1877, at Her Majesty's, as Ottavio, Otello and Manrico, and was well received, though his powers were on the wane. In the autumn of that year he sang at the Salle Ventadour, Paris, and retired soon after. He lived at Madrid, and carried on a manufactory of arms, occasionally singing in public. A. C.

TAMBOURA, see **PANDORA**.

TAMBOURIN, an old Provencal dance, in its original form accompanied by a flute and Tambour de Basque, whence the name was derived. The drum accompaniment remained a characteristic feature when the dance was

adopted on the stage, the bass of the tune generally consisting of single notes in the tonic or dominant. The Tambourin was in 2-4 time, of a lively character, and generally followed by a second Tambourin in the minor, after which the first was repeated. A well-known example occurs in Rameau's 'Pièces de clavecin,' and has often been reprinted. It was introduced

in Scene 7, Entrée III, of the same composer's 'Fêtes d'Hébé,' where it is entitled 'Tambourin en rondeau,' in allusion to its form, which is that of an 8-barred Rondeau followed by several 'reprises.' The same opera contains (in Entrée I, Scenes 5 and 9) two other Tambourins, each consisting of two parts (major and minor). Above we give the first part of one of them as an example. Mlle. Camargo is said to have excelled in this dance. W. B. S.

TAMBOURIN. A long narrow drum used in Provence. See **DRUM** (5).

TAMBOURINE (O.E. *timbrel*). A shallow ring of wood covered on one side with skin and struck with the fingers or the hand. The old English name *timbrel* is a diminutive derived from *tymbyr*, a little tabor or drum. In the late 18th century, upon the revival of the timbrel as an adjunct to the Janissary music of military bands, it became known as the tambourine (tamburino), of which an illustration is given on **PLATE XXIV**. No. 5.

The ancestry of this simple instrument is most remote, as the timbrel is found in use amongst the most ancient nations of the world, such as those of Assyria and Egypt: its distribution, too, seems to be world-wide, the hoop-drums of China, the rectangular *Daff* of India, the *Chilchiles* of the Peruvian Incas and the *Aelyau* of Greenland being but varied forms of the timbrel. Its introduction into Britain is certainly prehistoric, for not only did the Gauls use it, but the advent of the Romans to our shores must have increased its popularity, as, with little bells or metal discs, called 'jingles,' attached, it marked the rhythm of the dance or roused to frenzy the devotees of Bacchic rites. Under the Hebrew name *Tof* (see **HEBREW MUSIC**) it was presumably the instrument used by Miriam and her maidens to celebrate Israel's triumph over the Egyptian foe; hence it is frequently depicted in ecclesiastical carving and placed by artists in the hands of angels. In mediæval times a cord of catgut was stretched across the parchment head in order to produce a sharp rattling sound when struck (see **SNARES**). Its introduction into orchestral works was occasioned by the need for special effects of the Spanish or Gipsy character, as for instance in Weber's overture to 'Preciosa.' It is now a recognised member of the percussion group. F. W. G.

TAMBURA (**TANBUR**), an instrument of the lute family, having wire strings played with a plectrum, found in Arabia, Persia and elsewhere under slightly differing names. The Indian tambura, (tamburi), a four-stringed instrument, is described in Day's *Music and Musical Instruments of Southern India* (see **INDIAN MUSIC**). The tampur, another variety of this instrument found in the Caucasus, has three strings, and is played with a bow.

TAMBURINI, ANTONIO (b. Faenza, Mar. 28,

1800; *d.* Nice, Nov. 9, 1876), baritone singer, eminent among the great lyric artists of the 19th century. His father was director of military music at Fossombrone, Ancona. A player himself on horn, trumpet and clarinet, he instructed his son, at a very early age, in horn-playing. At 9 the boy played in the orchestra, but seems soon to have been passed on to Aldobrando Rossi for vocal instruction. At 12 he returned to Faenza, singing in the opera chorus, which was employed not only at the theatre but for Mass. At 18, and in possession of a fine voice, he was engaged for the opera of Bologna. The piece in which, at the little town of Cento, he first appeared was 'La contessa di colle erboso,' of Generali. His favourable reception there at Mirandola, Correggio and Bologna, attracted the notice of several managers, one of whom secured him for the Carnival at Piacenza, where his success in Rossini's 'Italiana in Algeri' procured for him an engagement that same year at the Teatro Nuovo at Naples. The political troubles of 1820, however, closed the theatres, and Tamburini sang next at Florence, where, owing to indisposition, he did himself no justice. The memory of this was speedily wiped out by a series of triumphs at Leghorn, Turin and Milan. At Milan he married the singer Marietta Gioja, for whom, together with him, Mercadante wrote 'Il posto abbandonato.'

Proceeding to Trieste, he passed through Venice, where an unexpected toll was demanded of him. Special performances were being given in honour of the Emperors of Austria and Russia, then at Venice, and Tamburini was not allowed to escape scot-free. He was arrested 'by authority,' and only after a few days, during which he achieved an immense success, was he allowed to proceed. From Trieste he went to Rome, where he remained for two years; thence, after singing in 'Mosè' at Venice, with Davide and Mme. Meric-Lalande, he removed to Palermo, where he spent another two years. He now received an engagement from Barbaja for four years, during which he sang in Naples, Milan and Vienna. At Vienna he and Rubini were decorated with the Order of the Saviour, an honour previously accorded to no foreigner but Wellington.

Tamburini first sang in London in 1832, and soon became an established favourite. His success was equally great at Paris, where he appeared in October of the same year as Dandini in 'Cenerentola.' For ten years he belonged to London and Paris, a conspicuous star in the brilliant constellation formed by Grisi, Persiani, Viardot, Rubini, Lablache and himself, and was long remembered as the baritone in the famous 'Puritani quartet.' His non-engagement by Laporte in the season of 1840 was the cause of the series of riots which began in Apr. 29, and resulted in victory for Tamburini's

admirers. His voice, a baritone, of over two octaves extent, was full, round, sonorous and perfectly equal throughout. His execution was unsurpassed and unsurpassable; of a kind which at the present day is well-nigh obsolete, and is associated in the public mind with soprano and tenor voices only. The Parisians, referring to this florid facility, called him 'Le Rubini des basse-tailles.' Although chiefly celebrated as a singer of Rossini's music, one of his principal parts was Don Giovanni. His readiness, versatility and cleverness are well illustrated by the anecdote¹ of his exploit at Palermo, during his engagement there, when he not only sang his own part in Mercadante's 'Elisa e Claudio' but adopted the costume and the voice—a *soprano sfogato*—of Mme. Lipparini, the prima donna, who was frightened off the stage, went through the whole opera, *duets and all*, and finished by dancing a *pas de quatre* with the Taglionis and Mlle. Rinaldini.

In 1841 Tamburini returned to Italy and sang at several theatres there. Although his powers were declining, he proceeded to Russia, where he found it worth his while to remain for ten years. When, in 1852, he returned to London, his voice had all but disappeared, in spite of which he sang again after that in Holland and in Paris. His last attempt was in London, in 1859. From that time he lived in retirement at Nice.

F. A. M.

TAMBURIO (Ital.) 'drum,' generally used in the phrase 'gran tamburo,' for the big drum, the word 'timpani' being reserved for the orchestral drums. (See DRUM.)

TAMERLANO, opera in 3 acts; libretto by Piovene; music by Handel. Composed between July 3 and 23, 1724, and produced at the King's Theatre, London, Oct. 31, 1724. G.

TAMING OF THE SHREW, see WIDERSPÄNTIGEN ZÄHMUNG.

TAMPON, a two-headed drumstick (*tampon* or *mailloche double*), used for the bass drum when a roll is required on that instrument, as in the overture to 'Zampa' and elsewhere, when the direction is 'Grosse caisse en tonnerre.' It is held in the middle, where it is $1\frac{3}{8}$ inch in diameter, so that the roll is easily made by an alternate motion of the wrist. The stick, ending in a round knob at each end, is turned out of a piece of ash; the knobs are thickly covered with tow and a cap of chamois leather, and are both of the same size. When finished the heads are about $2\frac{3}{4}$ inches in diameter, and the same in length. The length of the whole stick is $12\frac{1}{2}$ inches. V. DE P.

TAM-TAM. See GONG.

TANBUR, see TAMBURA.

TANCREDI, opera in 2 acts; libretto by Rossi, after Voltaire, music by Rossini. Produced Teatro Fenice, Venice, Feb. 6, 1813; in

¹ See Sutherland Edwards, *History of the Opera*, II. 272.

Italian, Théâtre des Italiens, Paris; in French (Castil Blaze) Odéon; in Italian, King's Theatre, London, May 4, 1820. G.

TANEIEV, ALEXANDER SERGEIEVICH (b. St. Petersburg, Jan. 5/17, 1850; d. there, June 20, 1915). On leaving the university he entered the service of the State and rose to the post of chief chancellor. He studied music with Reichel at Dresden, and, after a lapse of some years, with Rimsky-Korsakov and Petrov in St. Petersburg. He was also influenced by Balakirev. The list of his works includes: An opera in one act, 'Cupid's Revenge'; 3 symphonies No. 2 in B minor (op. 21) published; 2 orchestral suites (op. 14); 2 quartets; pianoforte pieces; 'Rêverie' for violin (op. 23); choruses and part-songs, and a symphonic poem 'Alesha Popovich.' R. N.

TANEIEV, SERGIUS IVANOVICH (b. Government of Vladimir, Nov. 13/25, 1856; d. Moscow, June 1915), pianist and composer, was the son of a government official.

He attended the Moscow Conservatoire at the early age of 10, taking pianoforte lessons from Langer. In 1869 Taneiev's parents purposed removing him from the Conservatoire in order to send him to a public school, but were persuaded by the director, Nicholas Rubinstein, not to break off his musical education. During the years which followed he studied the pianoforte with Nicholas Rubinstein, form and fugue with Hubert, and composition with Tchaikovsky. He left the Conservatoire in 1875, having gained the first gold medal ever awarded in that institution, and soon afterwards started on a concert tour through Russia in company with the famous violinist Auer. During 1877-78 he visited Paris, and gave concerts in various towns of the Baltic Provinces, after which he returned to Moscow to succeed Tchaikovsky as professor of instrumentation at the Conservatoire. He also became the chief professor of pianoforte after the retirement of Klindworth and the death of N. Rubinstein. In 1885 he succeeded Hubert as director of the Conservatoire, being replaced by Safonov in 1889. During his directorate, Taneiev completed the organisation of the students' orchestra.

He made his début as a pianist in 1875, at one of the concerts of the Imperial Russian Musical Society at Moscow. On this occasion he played Brahms's pianoforte concerto, and Tchaikovsky wrote of him that he had more than fulfilled the hopes of his teachers, and added:

'Besides purity and strength of touch, grace and ease of execution, Taneiev astonished every one by his maturity of intellect, his self-control and the calm objective style of his interpretation. He has his own artistic individuality which has won him a place among virtuosos from the very outset of his career.'

In December of the same year Taneiev played Tchaikovsky's pianoforte concerto in B \flat minor

for the first time in Moscow. Henceforth he became one of the chief exponents of this master's pianoforte works. Master and pupil were united by bonds of close friendship, and corresponded frequently. Taneiev sometimes criticised Tchaikovsky's music with an unsparing freedom of expression characteristic of youth. But this in no way interfered with the cordiality of their relations, for Tchaikovsky had every confidence in his pupil's opinion. 'I beg you not to be afraid of over-severity,' he wrote to him in 1878. 'I want just those stinging criticisms from you. So long as you give me the truth, what does it matter whether it is favourable or not?'

In later years Taneiev rarely appeared in public as pianist. As a teacher he always laid stress on the necessity for a thorough theoretical education and the study of the older classical masters. His own compositions are more remarkable for sound workmanship and a cultured taste than for charm or warmth of inspiration. The list of his principal works is as follows:

ORCHESTRAL

Symphony No. 1, in C minor, op. 12 (1902) (published). Three other symphonies, Suite de Concert (op. 28) for vin. and orch. Overture in C on Russian themes.

CHAMBER MUSIC

Six string quartets: B minor (op. 4), C major (op. 5), D minor (op. 7), A minor (op. 11), A major (op. 13), B flat (op. 19); PF. quartet in E (op. 20); two string trios (op. 21 in D, op. 31 in E flat); PF. trio in D (op. 22); Prelude and Fugue G sharp minor for 2 PF.'s (op. 29).

OPERATIC AND CHORAL

'Orestes,' a trilogy in eight scenes, libretto from Æschylus by A. Benks tern; performed at the Maryinsky Theatre, St. Petersburg, 1895. Cantata 'John of Damascus' for soli, chorus and orchestra (1884). Three choruses for male voices to words by Fet; two choruses for male voices in Albrecht's collection; 'Sunrise' for mixed voices. Other choral pieces and about 40 songs.

Taneiev has also written an important work on counterpoint, and done useful service in arranging for pianoforte orchestral works by Tchaikovsky, Glazunov, Arensky and others.

R. N.

TANGENT, in a clavichord, is a thick pin of brass wire an inch or more high, flattened out towards the top into a head one-eighth of an inch or so in diameter. It is inserted in the back end of the key, and being pushed up so as to strike the pair of strings above it, forms at once a hammer for them and a temporary bridge, from which they vibrate up to the sound-board bridge. (See CLAVICHORD.)

A. J. H.

TANGO, a dance of Mexican origin, in which the movements of the negroes were imitated. The music is rhythmically similar in style to the HABANERA, but played half as fast again, and worked up faster and faster till it ends abruptly like the conventional dances of the modern ballet. The frequent habit of writing five notes, sometimes of equal value, sometimes a dotted semiquaver, a demi-semiquaver and a triplet of semiquavers, in the melody against four notes in the accompaniment, and *vice versa*, and many other varieties of rhythm of a similar nature, added to the peculiar colour of Spanish harmonic progressions which are the stamp of so-called *Musica flamenca*, give it a weird

fascination. The movements of the dance are less presentable to a polite audience than those of the Habanera, and as now performed in the cafés chantants of Madrid and other cities of Spain the Tango has become nothing but an incitation to desire. As such it never fails to draw forth vociferous applause. A modified form of the dance is often introduced into a ZARZUELA at better-class theatres. Tangos have been written by modern composers for solo instruments, and one, by Arbós, for violin with orchestral accompaniment (also with pianoforte) is extremely graceful, refined and characteristic.

H. V. H.

TANNHÄUSER UND DER SÄNGER-KRIEG AUF WARTBURG, opera in 3 acts; words and music by Wagner. Produced Dresden, Oct. 19, 1845; New York, Staats Theatre, Apr. 4, 1859; Opéra, Paris¹ (French translation by Ch. Nuitter), Mar. 13, 1861; Covent Garden, in Italian, May 6, 1876; in English, Her Majesty's Theatre, Feb. 14, 1882, Carl Rosa Co.; in German, Drury Lane, under Richter, May 23, 1882; in French, Covent Garden, May 27, 1896. The overture was first performed in England by the New Philharmonic Society (Wylde conducting), May 14, 1854.

TANS'UR, WILLIAM (b. Dunchurch, Warwickshire, 1706; d. St. Neot's, Oct. 7, 1783), a composer chiefly of psalm tunes, though some secular pieces are also by him. In the preface to one of the many works he issued, *The Elements of Musick display'd*, 1772, he informs us that he was born at Dunchurch, Warwickshire, in 1700. He further confirms this by appending to his engraved portrait the words 'Ætatis suae 70 Christi 1770.' It is likely that he has made a mistake regarding the date of his birth, for the parish register² of Dunchurch states that William Tanzer, the son of Edward Tanzer and Joan Tanzer, was baptized Nov. 6, 1706. This year may be taken as the year of his birth, for John, a previous son of Edward and Joan Tanzer, was baptized on May 14, 1704, and it is unlikely that William would remain unbaptized six years after his birth.

The original name 'Tanzer' implies a German origin, and we learn from the register that Edward Tanzer, the father, was a labourer, and that he died, aged about 60, on Jan. 21, 1712, while Joan, his wife, followed on Feb. 16 of the same year, aged 51. Why Tans'ur changed his name does not appear. The chief details of Tans'ur's biography occur in the prefaces and imprints of his books. It appears that he was a teacher of psalmody from early youth, and

¹ For the extraordinary uproar which it created see Prosper Mérimée's *Lettres à une inconnue*, II. 151-3. One of the jokes was 'qu'on s'ennuie aux répétitions, et qu'on se fâche aux airs.' Even a man of sense like Mérimée says that he 'could write something as good after hearing his cat walk up and down over the keys of the piano.' Berlioz writes about it in a style which is equally discreditable to his taste and his penetration (*Correspondance inédite*, Nos. ciii. to cvii.). See also the *Bayreuther Taschen-Kalender*, for 1891.

² The entries in the Parish Register were kindly contributed by the Rev. C. T. B. McNulty, Vicar of Dunchurch.

he seems to have settled at many different places in this pursuit, notably at Ewell near Epsom and Barnes in Surrey, and Stamford in Lincolnshire, at which places he was organist. He had a son who was chorister at Trinity College, Cambridge. Tans'ur's books and editions are numerous. They consist chiefly of collections of psalm tunes prefaced by the usual instructions for singing. A great number of the tunes are either composed or arranged in parts by himself, and he is also author of much of the verse. His earliest publication appears to have been 'The Royal Melody Compleat or the new Harmony of Sion' in three books, oblong 4to, 1735. Of this work there appeared many editions. Others were, 'Heaven on Earth or the Beauty of Holiness,' 1738; 'Sacred Mirth or the Pious Soul's daily Delight,' 1739; 'The Psalm Singer's Jewel,' 1760, etc., etc. He was also the author of an excellent work, *A New Musical Grammar*, 1746-56, etc., which developed into *The Elements of Musick Display'd*, 1772. It is, for its time, an excellent treatise, and at the present day contains much of antiquarian interest. An edition of it was published so late as 1829, and one about ten years before this was issued at Stokesley. F. K.

TANTO (Ital.), 'as much,' or 'so much'; it is used correctly in many musical directions, and by Beethoven with the same force as 'troppo,' as if it was the equivalent of 'too much.'

TANTUM ERGO. The first words of the last two stanzas of the hymn 'Pange lingua' written by S. Thomas Aquinas for the office of Corpus Christi. This excerpt has acquired a separate status through being sung at Benediction and other services of the Roman Catholic Church in connexion with the Eucharist. It has therefore received some special attention from musicians. W. S. R.

TAPHOUSE, THOMAS WILLIAM (b. Oxford, Feb. 11, 1838; d. there, Jan. 8, 1905), worked as a cabinet-maker after leaving school at the age of 14. In 1857 he started with his father in business as a music-seller in Broad Street, Oxford, and the business is still a flourishing one, though it has been moved to a short distance from the original house. Taphouse was a skilful pianoforte-tuner, and held various organ appointments in the city; but his chief claim to permanent notice is based on his zeal and knowledge as a collector of old music and musical instruments. His library (dispersed at his death) was of very great value, including, among many other treasures, the autograph of Purcell's sonata for violin; he had collected materials for a history of music in Oxford; and his scholarship was rewarded by the University in an honorary M.A. degree, conferred on him in 1904. He was elected a member of the Oxford City Council in 1888, was sheriff in 1892-93, and curator of the municipal

buildings from 1897 when they were opened. In Nov. 1904 he was elected Mayor of Oxford.

M.

TAPISSIER, JOHANNES, one of the three early 15th-century composers named by Martin le Franc (see CARMEN, Johannes). There is a Credo of his in three parts in Cod. Mus. 37 of the Liceo Musicale at Bologna, an early 15th-century MS. written in the old black-and-red notation. Immediately preceding it in the same MS. is a three-part Gloria by Tomas Fabri, who is described as 'scolaris Tapisier,' in evident allusion to the master's reputation; this is probably the Tomas Fabri who was succentor at the church of St. Donatus at Bruges in 1412. A four-part motet by Tapisier, printed in Stainer's *Dufay and his Contemporaries* from the Bodleian MS. Canonici. Misc. 213, seems to have been written at Rome. It shows many signs of immaturity, and enables us to realise how great was the advance in musical art made by Dufay and Binchois.

J. F. R. S.

A Sanctus by him has been published in the 'Collection choisie des maîtres polyphonistes des XII^e, XIII^e, XIV^e and XV^e siècles' (Gastoué) (Paris, Bureau d'édition de la Schola Cantorum).

M. L. P.

TAPPERT, WILHELM (b. Ober-Thomaswaldau, Silesia, Feb. 19, 1830; d. Berlin, Oct. 27, 1907), German critic and writer on music. He began life as a schoolmaster, but in 1856 adopted music, under Dehn for theory and Kullak for practice. From that time he resided in Berlin, where he was well known as a teacher and musical writer, and an able and enthusiastic partisan of Wagner. He was a teacher in Tausig's school for higher PF. playing. His *Wagner Lexikon* (1877) contains a collection of the abuse lavished on that composer and his friends. Much more important are his researches into ancient Tablatures, on which much may be learnt from his *Katalog der Spezialausstellung, Die Entwicklung der Musiknotenschrift*, etc. From 1876–80 he edited the *Allgemeine deutsche Musikzeitung*. He was a contributor to the *Musikalisches Wochenblatt* and published several pamphlets. His valuable library was purchased by the Berlin State Library (Riemann).

G.

TARANTELLA, a South Italian dance, which derives its name from Taranto, in the old province of Apulia. The music is in 6–8 time, played at continually increasing speed, with irregular alternations of minor and major. It is generally danced by a man and a woman, but sometimes by two women alone, who often play castanets and a tambourine. It was formerly sung, but this is seldom the case now.

The Tarantella has obtained a fictitious interest from the idea that by means of dancing

it a strange kind of insanity, attributed to the effects of the bite of the *Lycosa Tarantula*, the largest of European spiders, could alone be cured. 'It is certain that a disease known as Tarantism prevailed in South Italy to an extraordinary extent, during the 15th, 16th and 17th centuries, if not later, and that this disease—which seems to have been a kind of hysteria, like the St. Vitus dance epidemic in Germany at an earlier date—was apparently only curable by means of the continued exercise of dancing the Tarantella; but that the real cause of the affection was the bite of the spider is very improbable, later experiments having shown that it is no more poisonous than the sting of a wasp. The first extant notice of Tarantism is in Niccolò Perotto's *Cornucopia lingue Latine* (p. 20 a, ed. 1489). During the 16th century the epidemic was at its height, and bands of musicians traversed the country to play the music which was the only healing medicine. The forms which the madness took were very various; some were seized with a violent craving for water, so that they were with difficulty prevented from throwing themselves into the sea, others were strangely affected by different colours, and all exhibited the most extravagant and outrageous contortions. The different forms which the disease assumed were cured by means of different airs, to which the Tarantists—the name by which the patients were known—were made to dance until they often dropped down with exhaustion. The epidemic seems only to have raged in the summer months, and it is said that those who had been once attacked by it were always liable to a return of the disease.

Most of the songs, both words and music, which were used to cure Tarantism no longer exist, but the Jesuit Kircher, in his *Magnes* (Rome, 1641), Book III., cap. viii., has preserved a few specimens. He says that the Tarantellas of his day were mostly rustic extemporisations, but the airs he gives (which are printed in Mendel's *Lexicon, sub voce* Tarantella) are written in the Ecclesiastical Modes, and with one exception in common time. They bear no resemblance to the tripping melodies of the modern dance.¹ Kircher's work contains an engraving of the Tarantula in two positions, with a map of the region where it is found, and the following air, entitled 'Antidotum tarantulae,' which is also to be found in Jones's 'Maltese Melodies' (London, 1805) and in vol. ii. of Stafford Smith's 'Musica antiqua' (1812), where it is said to be derived from Zimmermann's 'Florilegium':²

¹ It has been suggested that these fragments of melodies—for they are little more—are ancient Greek tunes handed down traditionally in Taranto.

² In Mazella's 'Balli, Correnti,' etc. (Rome, 1689), is a Tarantella in common time in the form of a short air with 'partite,' or variations. Matheson (*Vollkommener Kapellmeister*, 1739) says there is one in the *Quintessence des Nouvelles* for 1727.

For further information on this curious subject we must refer the reader to the following works :

N. Perotto, *Cornucopia* (Venice, 1480) ; A. Kircher, *Magnes* (Rome, 1641) ; *Musurgia* (Rome, 1650) ; Hermann Grube, *De ictu tarantulae* (Frankfort, 1679) ; J. Müller, *De tarantula et vi musicae in ejus curatione* (Hafniae, 1679) ; G. Baglivi, *De praxi medica* (Rome, 1696) ; Dr. Peter Shaw, *New Practice of Physic*, vol. 1. (London, 1726) ; Fr. Serao, *Della tarantola* (Rome, 1742) ; Dr. R. Mead, *Mechanical Account of Poisons* (3rd ed., London, 1745) ; J. D. Tietz, *Von den Wirkungen der Töne auf den menschlichen Körper* (in Just's *Neuen Wahrheiten*, (Leipzig, 1745) ; P. J. Buc'hoz, *L'Art de connaître et de designer le poulx par les notes de la musique* (Paris, 1806) ; J. F. E. Hecker, *Die Tanzwuth* (Berlin, 1832) ; A. Vergari, *Tarantismo* (Naples, 1839) ; De Renzi, in *Raccogliatore medico* for 1842 ; C. Engel, *Musical Myths*, vol. ii. (London, 1876).

The Tarantella has been used by many modern composers. Auber has introduced it in 'La Muette de Portici,' Weber in his E minor sonata, Thalberg wrote one for piano, Heller two. More famous in piano music are those of Chopin and Liszt, and Rossini wrote a vocal Tarantella, 'La Danza' (said to have been composed for Lablache). The ballet 'La Tarantule' in which Fanny Elssler danced in Paris and London is notable.

One of the finest examples is in the finale to Mendelssohn's Italian symphony, where it is mixed up with a Saltarello in the most effective and clever manner. Good descriptions of the dance will be found in Mme. de Staël's *Corinne* (Book VI. ch. i.), Mercier Dupaty's *Lettres sur l'Italie* (1797), and Goethe's *Fragmente über Italien*, see J. Case's *Praise of Musick*, 1586, p. 85. It was danced on the stage with great success by Cotellini (1783-85) at the Teatro dei Fiorentini at Naples, and later by Charles Mathews.

W. B. S.

To the above it may be added that a curious account of the cure of a person bitten by the tarantula spider is given, in a letter signed Stephen Storace (the father of the better-known musician), in *The Gentleman's Magazine*, for Sept. 1753. Storace says that he was called upon to play the particular tune associated with the cure ; but this he did not know, and tried sundry jigs without effect, until, learning the proper tune from the lips of an old woman, he played it with a satisfactory result. He

gives the following as the traditionary melody, and states that the scene of the occurrence was a village ten miles from Naples. F. K.

The Tarantula Tune.

TARARE, opera, in prologue and 5 acts (afterwards 3) ; words by Beaumarchais ; music by Salieri. Produced Opéra, Paris, June 8, 1787 ; in Italian (with many changes of text and music) as 'Axur, Rè d'Ormus,' Vienna, Jan. 8, 1788 ; in English as 'Tarrare, the Tartar Chief,' London, Aug. 15, 1825.

G.

TARCHI, ANGELO (b. Naples, 1760 ; d. Paris, Aug. 19, 1814), a pupil of Tarantino and Sala at the Turchini conservatoire, Naples. In his time he was a very popular composer, whose operas, numbering about 46, were performed all over Europe. In 1786 he was in London where, according to Burney, he contributed to a pasticcio some songs for Rubini (Q.-L. ; *Fétis*).

TARDITI, ORAZIO (b. Rome, towards end of 16th cent. ; d. Faenza, c. 1670 ?), organist at various Italian towns from 1622 ; Calmaldulan monk and abbot at Ravenna, 1647 ; maestro di cappella of Faenza Cathedral, 1648. He was an important church composer (masses, motets, etc.), and wrote also several books of secular madrigals, canzonets and other songs (Q.-L. ; *Fétis*).

TARISIO, LUIGI (d. Milan, 1854), an able and perhaps the first judge of old violins, who created and supplied a demand for old Italian instruments both in England and in France at a time when the work of Stainer and his school practically monopolised the market. Originally an obscure Italian carpenter who plied a house-to-house trade, he gradually became cognisant of the valuable violins which were scattered among the Italian peasantry at the beginning of the 19th century, and the carpenter became merged in the collector, dealer and connoisseur. Tarisio's talent for detecting the characteristics of the great Italian luthiers amounted to genius, but, in addition to this, he possessed a shrewd knowledge of human nature, and he drove excellent bargains. His *modus operandi* was principally based on the system of a so-called exchange, whereby he himself invariably benefited. His humble profession admitted him not only into the homes of the cottagers, but into many sacristies and

convents also, whence he more than frequently emerged with a fine Italian instrument, obtained in exchange for a shining new fiddle from his own pack. In 1827 Tarisio made his way to Paris, introduced himself and his sack of fine instruments first to M. Aldric, a dealer of dilettante tastes, who, after some doubts occasioned by the pedlar's shabby appearance, was eventually compelled to recognise him as one of the greatest violin connoisseurs of the day. For over twenty years after his first visit to Paris, Tarisio's advent there was welcomed by all the foremost dealers, and through his importation numbers of the finest Italian violins came into France, and, after his appearance in London in 1851, into England also. Despite his nomadic life, Tarisio considered Italy his home always. He owned a small farm in the province of Novara, and shortly before his death he settled in Milan, where he established himself in an attic over a restaurant in the Via Legnano, Porta Tenaglia. Here, amid comfortless surroundings, he was found dead one morning in 1854, with over 200 violins, violoncellos and altos in his small domicile. To his family he left a fortune of 300,000 francs, a sum which represented his profits in violin-dealing during twenty years; and in addition to this his relatives received the purchase-money paid by J. B. Vuillaume after Tarisio's death for the instruments found in the Milanese attic, and for the five magnificent violins which had been hidden away at his farm. Among the latter number was the 'Messie' Stradivarius, which had been preserved for over sixty years in the collection of Count Cozio di Salabue. Tarisio purchased it on the death of the latter in 1824, and concealed its whereabouts until his death, with a view, no doubt, to enhancing its value from a sensational point of view. During his visits to the various dealers he frequently referred to the treasure he would reveal to them one day, *i.e.* a Stradivarius violin in superb condition that had never known the touch of a bow, and it was its promised advent that gained for it the title of the 'Messiah' in professional circles.

E. H.-A.

TARTAGLIONE, IPPOLITO (*b.* Modena, c. 1539; *d.* Naples, c. 1580), maestro di cappella at S. Maria Maggiore, Rome, 1575, and at Naples Cathedral, 1577. He is spoken of as one of the foremost composers of his time and one of the first who wrote masses and motets for 3 and 4 choruses (*Fétis: Q.-L.*).

TARTINI, GIUSEPPE (*b.* Pirano, Istria, Apr. 8, 1692; *d.* Padua, Feb. 26, 1770), famous violinist and composer, founder of an important school of violin-playing at Padua, and originator of certain improvements in the construction and technique of the bow.

Fanzago,¹ his contemporary, records that Tartini's father was a member of a good Florentine family; a man whose philanthropic nature led him to give largely to the Church, which charitable practices gained him a title. From documents belonging to another contemporary, the Bishop of Capo d' Istria, Paolo Naldini, now preserved in the Episcopal Archives at Trieste, it would appear that Tartini's father became a member of the staff of the Public Salt Works in Pirano on Sept. 16, 1692; but he doubtless settled there some years before this, for the marriage-registers for the year 1685—preserved among the Archives of the Collegiata di Pirano—announce that Giovanni Antonio Tartini espoused Catarina, daughter of Pietro Zangando (not *Giando* as stated by Fanzago, and others), on Mar. 5, in that year at Pirano. Here also is recorded the baptism of 'Iseppo,' son of the above, 'by me Pre Giov Maria Vanturini, Canon: Godfather, Signor Simon Testa; Godmother, Signora Bartolemea, wife of Signor Girolamo Apollonio.' Tartini's father, besides being ennobled, would appear to have been wealthy, being the owner of the beautiful villa Struegnano, and much property in its neighbourhood. It was here that Giuseppe, his brothers Domenico, Antonio, Pietro, and a sister—who died in infancy—were born. One of the priests belonging to the order of St. Filippo Neri of Pirano superintended Giuseppe's earliest education, and as soon as his capacities permitted he was admitted into the Collegio dei Padri delle Scuole Pie, at Capo d' Istria. According to Fanzago, he learnt the rudiments of music and the violin here. He remained at Capo d' Istria until 1709, in which year his father obtained permission from the Bishop (Paolo Naldini) for him to pursue his studies at the University of Padua. The Bishop's consent was dated Feb. 22, 1709, and it caused a good deal of variance between the father and son as to his destined avocation. The father's wish was to see his son one of the brotherhood of the Minori Conventuali, and to this end he even went as far as to promise a handsome contribution to the 'Convento' of Pirano should his desire be attained. But the prospect of studying theology held no attractions for the youthful Tartini, who was of an ardent and vivacious nature, and, in spite of the fact that his father's counsels were endorsed by the Bishop, he gained his point, and entered the Padua University as a law student.

He was just 17, passionately fond of art, and above all devoted to fencing, in which he became so excellent that few could stand against him. In addition to this he was devoted to music, and at one time seriously contemplated opening a fencing-school at Naples which should form his means of subsistence whilst he followed his inclination as a violinist.

¹ *Lodi di G. Tartini*, Padua, 1770.

Instead, however, he remained at the University until his 20th year (1713) when his love for one of his pupils—by name Elisabetta Premazone—changed the tenor of his life. This lady has frequently been alluded to as the niece of Cardinal Giorgio Cornaro. More recently it has been thought that she was no connexion of the Cardinal, but a daughter of one of his dependants. In any case, the Cardinal occupied himself with her welfare, and in the matter of her runaway marriage with Tartini his interest took the form of wrathful disapproval, which he demonstrated by ordering Tartini's arrest. To this were added the strong objections of his family, who deprived him of all support, and in this predicament the young man found himself compelled to fly from the city disguised as a monk, leaving his wife at Padua. The story goes that he wended his way towards Rome in the first instance, then wandered wearily over the country, living from hand to mouth, until he fortunately met a relative who occupied a position as custodian in the Monastery of Assisi, where he found a haven of refuge. Little is known of Tartini's residence at Assisi, except that it was a time of serious study and contemplation for him. Here, according to his great friend Gian Rinaldo Carli, professor of Navigation and Astronomy at the University of Padua, he discovered what is generally known as the 'third sound,' a problem in acoustics beyond his scientific knowledge to explain, but since lucidly expounded by HELMHOLTZ (see also RESULTANT TONES). He also inaugurated the use of violin-strings thicker than those that had hitherto served violinists, and in addition he had his bow made of lighter wood, corrected the outward bulge of the stick, diminished the size of the head, and fluted the wood at the heel of the bow so as to obtain a surer grip. It was here also that he wrote his famous 'Trillo del Diavolo' which, according to the account of its composition which he gave to Lalande the great astronomer, came to him in a dream. The story is recounted by Lalande in his *Voyage d'un François en Italie* (1765-66, vol. viii. p. 292) in the following manner :

'One night I dreamt that I had made a bargain with the devil for my soul. Everything went at my command ; my novel servant anticipated every one of my wishes. Then the idea suggested itself to hand him my violin to see what he would do with it. Great was my astonishment when I heard him play, with consummate skill, a sonata of such exquisite beauty as surpassed the boldest flights of my imagination. I felt enraptured, transported, enchanted ; my breath failed me, and—I awoke. Seizing my violin I tried to reproduce the sounds I had heard. But in vain. The piece I then composed, The Devil's Sonata, although the best I ever wrote, how far was it below the one I had heard in my dream !'

Tartini remained at Assisi nearly two years studying composition with the 'padre Boemo' (see ČERNOHORSKY), and attracting people to the Monastery Chapel by the fame of his violin-

playing. No member of the congregation knew who the wonderful artist was, as he always remained shrouded from view behind a heavy curtain. But the moment of his discovery and release came at last.

It was on Aug. 1, 1715, when the greatest number of Italians made a customary pilgrimage to the tomb of St. Francis to implore his grace, that the deacon in presenting incense to the Fathers inadvertently pulled aside the curtains concealing the entry to the choir, and revealed the figure of Tartini, who was instantly recognised by some Paduans present. The news quickly spread to Padua, where his wife languished for him ; the Cardinal's heart became softened, and he removed all obstacles to the reunion of the couple. Thus Tartini was now free to return to his home in Padua. Here he mixed with the most cultured and aristocratic people of his day, devoting himself entirely to music. His fame as a violinist began to spread, so that when Veracini visited Venice in 1716, Tartini was invited to compete with the eminent Florentine at the Palace of His Excellency Pisano-Mocenigo to honour the visit of the Elector of Saxony. But to his chagrin, Tartini discovered, on hearing Veracini at Cremona before the contest, that that artist excelled him in many ways, especially in his management of the bow. Humiliated and mortified by the disclosure, he again left his wife—this time in the care of his brother Domenico at Pirano—and returned to Ancona, where he applied himself assiduously until he had obtained the perfection he desired. Whether he had any master at Ancona the authorities fail to state, but it may have been that he profited by the teaching of a certain obscure musician named Giulio Terni, whom Tartini stated to have been his first master, adding that he had studied very little until after he was 30 years of age. However this may be, it was before that age that he received an invitation to accept the post of first violin at the famous Cappella del Santo at Padua. The document which called him to the appointment is dated Apr. 3, 1721, and states that the bearer is asked to conduct 'Signor Giuseppe Tartini, an extraordinary violinist, thither,' and that he shall have an annual stipend of 150 florins, also that any proof of his excellence in his profession shall be dispensed with. The latter was an exceptional favour, as the choir and players of the Chapel, numbering sixteen singers and twenty-four instrumentalists, was considered one of the finest in Italy, and the musicians were subjected to strict annual examinations. A further benefit was extended to Tartini by the granting to him of permission to play at other places besides the Chapel, but he availed himself of this privilege very rarely until 1723, when he accepted the invitation of a passionate musical devotee, the Chancellor of Bohemia

—Count Kinsky—to come to Prague. With him went Antonio Vandini, the principal violoncellist of the Cappella del Santo, and they both assisted at the Festival held in honour of the Coronation of the Emperor, Charles VI., at Vienna. In Prague Tartini created a veritable furore, remaining there from 1723–25 as conductor of Count Kinsky's band. But success could not lighten the life of a man who was harassed by family worries, and uncongenial surroundings. His letters addressed to his brothers from Prague¹ reveal that his troubles were many. His family—and more especially his brother Domenico—seemed to be threatened with some terrible financial crisis, and Tartini was constantly called upon for aid, and, writing to Domenico on Aug. 10, 1725, the devout maestro feels he can do but little to alleviate his brother's miseries, and turns to God Almighty for help, praying

'that he may assist you and me . . . and teach me, and help me to remain in a place where the air, the food, and the people are equally distasteful to me. I see clearly I cannot live here without being reduced very shortly by so many ills, that I shall have to go constantly about with a physick bottle in my hands.'

He tells his brother that he is firmly resolved to return to his own country, 'for the skin is nearer than the purse.' At last in 1726 he left Prague for his beloved Padua, delaying his return only by a visit to one of his great admirers at Venice, his Excellency Michele Morosini di San Stefano. This dignitary interested himself in the misfortunes of Tartini's family, and advised him to apply to the Fisc of the Public Salt Works on behalf of his brother, all of which Tartini immediately posted on to Domenico, advising that in sending the application to the Fisc, 'it would be wise to present him with a barrel of that good black Moscato.'

FOUNDATION OF THE 'SCHOOL'.—The year 1728 saw the installation of Tartini's school of violin-playing at Padua, an establishment whose excellence gained for it the title of 'School of the Nations,' while its prime instigator himself was known as the 'Master of Nations.' In a letter written by Tartini from Padua on Sept. 18, 1739, to the Padre Martini of Bologna, who was interesting himself on behalf of a youth, a protégé of Count Cornelio Pepoli, we can form an idea of students' fee for tuition at this school. 'The expenses,' he writes,

'for his board (not in my house, as I do not care to take scholars in my home, but) in the house of my assistant, would be fifty paoli a month, because living is dearer in Padua than in Venice. As for my own honorarium it will be two zecchini a month for solo violin alone; if he wishes counterpoint also, my fee will be three zecchini. Some of my pupils pay me more, but I am accustomed to two zecchini for the violin alone. If the youth is gifted, in one year, if God wills, his studies will be completed, as scholars with small talents have completed their studies in two years. . . .'

From the time that Tartini returned to Padua after his residence at Prague not even the most

tempting offers could induce him to leave his native country again. For this, his wife—for whom the biographies have no praise—was mainly responsible. She was apparently a nervous, suffering, exacting creature, who yet commanded her husband's patient devotion to the end of his life. On her account he was content to forgo conquests farther afield, and thus refused the proposal of Sir Edward Walpole—who heard him while passing through Padua in 1730—to come to London. His wife 'agreed with him' that it was best for them to be satisfied with their state. 'Although not rich, I have sufficient and do not need for more,' is the manner in which he is reported to have declined the offer. The invitation of Louis Henri, Prince of Condé, to come to Paris met with a similar reply in the same year. Then came the renewal of the offer by the Duc de Noailles; in 1734 this again was declined, as was also the tempting offer of Lord Middlesex, who thought that 3000 lire would surely lure the great violinist from his native land to London. However, although gifted with an apparently modest ambition, Tartini occasionally toured in his own country.

A little before 1740 he journeyed to Rome at the request of Cardinal Olivieri, at whose Palace he met all the noblesse of the city, and even Pope Clement XII. himself. It was at the request of this Pontiff that Tartini wrote his *Miserere*, which was performed on Ash Wednesday in the Sistine Chapel. This was said to be Tartini's only vocal composition until Tebaldini pointed out that among the Archives of the Santo at Padua is preserved a MS. entitled '*Salve Regina: a quattro voci ripieni*,' which is the '*Ultima compositione del celeb. maes. Giuseppe Tartini*.' In the same place there are also some *canzone* of Tartini for two and three voices. On his way to Cardinal Olivieri's Tartini visited Venice, Milan, Florence, Livorno, Bologna, Naples and Palermo, receiving enthusiastic ovations wherever he went. The admiration of the Neapolitans reached such a climax that it is said they tried to carry the astonished violinist round the town. At the conclusion of his visit to Rome Tartini returned to Padua, never to leave it until his death, although he was pressed by the Prince of Clermont to visit Paris and London in 1755.

Stancovitch² says that the rumour of Tartini's coming to Paris spread all over that city in 1755, and was ventilated at a public meeting, but Tartini, firm in his principles, soon put an end to their hopes, and finally disappointed the Parisians. During all this time Tartini employed his days in indefatigable musical studies, in playing, composing and teaching, and his hours of repose were passed in the society of most of the great men of the day. Even when

² *Biografia degli uomini distinti dell' Istria* (Capodistria, n.d. p. 278).

¹ See Hortis, *Lettere di Giuseppe Tartini*.

declining years prevented him from playing, he continued composing. (Some of these works are preserved in the Cappella del Santo at Padua.) In 1768 his health began to fail him. He wrote to his friend Riccati in that year, telling him that he had suffered from an attack of convulsive paralysis, and it had confined him to the house for nearly six months. This was the beginning of the end. A month later he was moved from his bed to a sofa, and became more hopeful of recovery, but instead of this he grew worse. A cancerous growth formed in his foot, and caused him terrible suffering until his death. Tartini's last moments were soothed by the presence of his affectionate pupil Nardini, who came expressly from Leghorn to be with his master, and followed his remains to the grave. The great violinist was buried in the church of St. Catherine of Padua. A Requiem composed by his friend Vallotti was sung in the church of the Santo, and the Abbé Fanzago delivered a laudatory oration which was published at Padua in the same year.

CHARACTER OF TARTINI. — Tartini practically divided his personal property, which consisted of certain investments, amongst his family during his lifetime, so that, as he states in a letter to his people dated 1769,

'there is nothing to leave you at my death except my furniture and my money. That may pass to my legitimate heirs at Pirano. In the absence of such (I mean males) the inheritance may pass to the Tartinis of Florence.'

Some of his manuscripts and other articles he left to his pupil Giulio Meneghini of Padua, and some to the Postmaster-General, Count Thurn and Taxis. To his friend Professor Colombo he entrusted his literary work *Delle ragioni e delle proporzioni* (six books), that he might superintend its publication. Colombo unfortunately died shortly after, and the manuscripts were apparently all lost except those portions of the materials which served for the work now preserved in the Archives of Pirano.

As a man Tartini was universally beloved and respected by his fellows. He was of a pious nature, and frequently told his friends that his happiness consisted in his submission to the will of the Almighty, and not to his own. He devoted his life to the highest forms of art and science, although his practical knowledge was not always sufficiently sound to place the result of his researches upon a solid basis. An instance of this is found in his *Trattato di musica secondo la vera scienza dell' armonia*, and in his *De' principii dell' armonia musicale*, wherein he attempted to fathom some difficult acoustical problems, and raised some literary controversy on the subject, but entirely failed to come to a clear conclusion. Briefly, his observations led to the discovery of the generating sound which proceeds from two notes vibrated together, and this he employed

as an excellent guide to perfect intonation in double-stopping. 'If you do not hear the bass,' he told his pupils, 'your thirds and sixths are not in tune'; but neither he nor his pupils could explain the phenomenon of this 'third sound,' since explained by Helmholtz under the title of 'differential tones.' His humble nature imbued him with a serene content, which was perhaps detrimental to his fame as a solo-player, for there is no doubt that he was the greatest scientific as well as practical violinist of his day. In spite of Quantz's oft-quoted but improbable statement that Tartini resorted to tricks, we have ample proof in his music, and in his *Arie del arco*, that he was a magnificent cantabile player. Indeed, so sensible were the Italians of this exquisite quality in the great violinist that Mainwaring¹ tells us that his contemporaries often said of him: 'Non suona, ma canta sul violino.' Yet it was his success as a teacher, rather than as a player, that made him world-famous. Such pupils as Nardini, Pasqualino, Bini, Alberghi, Manfredi, Ferrari, Graun, Carminato, Maddalena Lombardini (Madame Sirmen), to whom he addressed the oft-quoted Letter of Instruction, Pagin, Lahoussaye and others were living proofs of his ability as a teacher, which attracted all the talent of the day to the 'School of Nations' in Padua. As a composer he combined the serenity and dignity of Corelli with an added grace and passion all his own, and his writing for the violin was technically more advanced and complicated than that of his predecessors. He contrived to infuse a variety of expression into his music lacking in the works of Corelli, and this is stated to have been due to his custom of selecting some phrase from Petrarch before he began to compose, and keeping the sense mirrored on his mind while at work. He not only thought of the chosen lines, but inscribed them in a cipher known only to himself and a chosen few, at the top of his MSS. A certain Melchior Babbi of Padua possessed the key to this cipher, and according to his account Tartini inscribed on one sonata the words 'Ombra sacra' ('Sacred shade'). On another 'Volge il riso in pianto o miei pupille' ('Turn laughter into tears, oh my eyes'). Tebaldini confirms this statement and says that many of the MSS. preserved in the Cappella del Santo at Padua bear such inscriptions. There is a story that when Lipinski visited Trieste in 1818 he met one of Tartini's oldest pupils in the person of the lawyer Constantino Massarana, who placed one of his master's MSS. before the violinist. Lipinski failed to play it to the satisfaction of his listener, who said, 'Read the inscription, and that will inspire you to play it with the right spirit,' which it is said he did.

SUMMARY OF WORKS.—A complete and com-

¹ *Memoirs of the Life of Handel*, 1760.

prehensive list of Tartini MSS. is given in *Q.-L.*, and according to this authority they are to be found in the public and State Libraries of Dresden, Königsberg, Mecklenburg-Schwerin, at Padua, and in the British Museum. The *Journal encyclopédique de Venise* for 1775 contains a paragraph stating that Captain P. Tartini, a nephew of Giuseppe Tartini, had deposited the following MS. compositions of his uncle with Antonio Zazzini (an excellent violinist): 42 sonatas, 6 sonatas and trios, 114 concertos, 13 concertos, etc., which were offered for sale by Carminer at Venice.

The number of his published compositions is very extensive. His first book of sonatas, 'a 5 e 6 instrumenti,' op. 1, was published in Amsterdam, 1734. The second book appeared in Rome in 1745, and a large number of concertos for violin solo with orchestral accompaniment, as well as a trio for two violins and a bass, were published at various times at Amsterdam, Paris and London. A considerable number has been arranged and edited in recent years by Emilio Pente.

His contributions to the literature of music were almost as numerous. The Municipio di Pirano possesses twenty-five of his MS. writings on matters dealing with various theoretical problems. His published works comprise: *Trattato di musica*, etc., Padua, 1754 (Giov. Manfre), 2nd edition, Paris, 1767 (Leduc). French translation, *Traité des agréments*, etc., ... traduit par Sig. Denis, Paris, 1782. *Riposta di G. T. alla critica del di lui trattato di musica di Monsieur Serre di Ginevra*, Venice, 1767. *De' principi dell' armonia musicale*, Padua, 1767. English translation by Stillingfleet, London, 1771 (S. Baker and G. Leigh). *Lettera del defonto Sig. G. T. alla signora Maddalena Lombardini*, Venice, 1770. Italian with English translations by Doctor Burney, London, 1771, 2nd edition, 1779. German translation of the same by H. H. Rohrmann, Hanover, 1786.

PORTRAITS, ETC.—A committee of Paduan admirers erected a life-size statue of Tartini in 1807 in the Prato della Valle, Padua. On the second centenary of Tartini's birth in 1892, the President of the Arca del Santo had a stone slab with a memorial inscription upon it placed in the first cloister of the Basilica. There is a portrait of him in the Gallery of the Filarmonico, Bologna. The engraver, Antoine Bonaventura Sberti, engraved a portrait of Tartini and placed the following distich upon it, written by Antonio Piombolo, professor of medicine at the University of Padua:

'Hic fidibus scriptus claris, hic magnus alumnus
Cui par nemo fuit, forte nec ullus erit.'

The Abbate Vincenzo Rota of Padua prefaced his poem, 'L' incendio di tempio di S. Antonio,' published in Padua (by Conzatti in 1753), in which every stanza celebrates

Tartini's genius, with a portrait of Tartini taken from life, and placed the following lines beneath it:

'Tartini haud potuit veracius exprimi imago.
Sive lyram tangat seu meditetur, is est.'

This engraving also serves as a frontispiece to Fanzago's *Orazione* published in 1754. The Bibliotheca of Pirano possesses a portrait in oils of Tartini, and there is a memorial bust of him executed by Rosa in the Concert-hall of the Casino of Pirano. George Hart of Wardour Street possessed the original painting of Tartini's dream by Charles Joseph Hullmandel, who seems to have brought it out as an engraving. A drawing formerly in the possession of the late Julian Marshall was reproduced in earlier editions of this Dictionary. An engraving by C. Calcinoto is shown on *PLATE LVI*.

E. H.-A.

TASKIN, (1) PASCAL (b. Theux, province of Liège, 1723; d. Paris, Feb. 9, 1793), celebrated instrument-maker, and head of a family of musicians, migrated early to Paris, and was apprenticed to Etienne Blanchet, the best French clavecin-maker of the period. Succeeding eventually to the business, he improved the tone of his spinets and harpsichords by substituting slips of leather for the crowquills then in use in the jacks (1768). This 'peau de buffle' appliance was claimed as Taskin's invention, but was in use in the 16th and 17th centuries. (See JACK.) In 1772 Louis XV. offered him the post of Keeper of the Musical Instruments and the Chapel Royal, vacant by the death of Chiquelier, but the life at Versailles would not have suited the inventor, who wished to be at liberty to continue his experiments, and he contrived to get his nephew and pupil, Pascal Joseph (2), appointed in his stead. Having thus succeeded in preserving his independence without forfeiting the royal favour, he was shortly after elected an acting member of the corporation of musical instrument-makers (1775).

He was brought more before the public by a piano in the shape of our present 'grands,' made for the Princess Victoire, the first of the

¹ See Ernest Closson's article *Taskin*, *S.I.M.* xii. 237-38.

kind made in France. Other inventions were his use of a single string doubled round the pin in his two-stringed pianos, working the pedal by the foot instead of by the knee, and the 'Armandine'¹ (1789). This fine instrument, now in the museum of the Paris Conservatoire, is like a grand piano without a keyboard, and with gut strings, and is therefore a cross between the harp and the psaltery. Other specimens of his manufacture are the harpsichord with two keyboards made for Marie Antoinette and still to be seen in the Petit Trianon, the pretty instrument in the possession of the distinguished pianist Mlle. Joséphine Martin, and those in the Conservatoire and the Musée des Arts Décoratifs in Paris. He repaired and enlarged the Ruckers harpsichord now in the possession of Sir Edgar Speyer. (See RUCKERS.) His nephew,

(2) PASCAL JOSEPH² (b. Theux, Nov. 20, 1750; d. Paris, Feb. 5, 1829), Keeper of the King's Instruments and the Chapel Royal from 1772 to the Revolution, was his uncle's best pupil and assistant. He married a daughter of Blanchet, and was thus brought into close connexion with the Couperin family. (See COUPERIN, Armand Louis, 6.) Of his two sons and two daughters, all musicians, the only one calling for separate mention here is the second son,

(3) HENRI JOSEPH (b. Versailles, Aug. 24, 1779; d. Paris, May 4, 1852). He learned music as a child from his mother, and so charmed the court by his singing and playing that Louis XVI. made him a page of the Chapel Royal. Later he studied music and composition with his aunt, Mme. Couperin, a talented organist, and early made his mark as a teacher, virtuoso and composer. Three operas were neither performed nor engraved, but other of his compositions were published, viz., trios for PF., violin and violoncello; a caprice for PF. and violin; a concerto for PF. and orchestra; solo pieces for PF.; and songs. A quantity of Masonic songs remained in MS. Like his father he had four sons; none of them became musicians.

G. C.

(4) ÉMILE ALEXANDRE (b. Paris, Mar. 18, 1853; d. there, Oct. 5, 1897), descendant of the same family, studied at the Conservatoire, gaining, in 1874, *accessits* in harmony and opéra-comique. On Jan. 10, 1875, he sang the music of Joseph and Herod in the revival of Berlioz's 'L'Enfance du Christ' at the Colonne concerts, and made his stage début the same year at Amiens as Roland in Halévy's 'Mousquetaires de la Reine.' In 1878 he made successful débuts at the Théâtre Ventadour, Paris, in Pessard's 'Capitaine Fracasse,' and in D'Ivry's 'Amants de Vérone.' In 1879 he was

¹ Called after Mlle. Armand, a pupil of his niece, who became an excellent singer at the Opéra and the Opéra-Comique.

² Fétis confuses the uncle and nephew. The writer of this article, having had access to family papers, has been able to correct the errors of previous biographers.

still more successful at the Opéra-Comique as Malipieri in 'Haydée,' Michel in 'Le Caïd' and Peter the Great in 'L'Etoile du nord,' and remained there during his stage career as one of the best artists of the company, being excellent alike in singing and acting and an accomplished musician. He sang the baritone parts in several new operas. On May 25, 1887, he was singing the part of Lotario in 'Mignon' on the night of the burning of the theatre, on which occasion he showed great coolness and presence of mind. On May 13, 1894, he sang Lotario on the 1000th night of 'Mignon,' soon after which he retired and devoted himself to teaching at the Conservatoire.

BIBL.—H. DE CURZON, *Croquis d'artistes* (Paris, 1898); CONSTANT PIERRE, *Les Facteurs d'instruments de musique, les luthiers et la facture instrumentale* (Paris, 1893); CHARLES BOUVET, *Une Dynastie de musiciens français: les Couperin, organistes de l'Église Saint Gervais* (Paris, 1919); E. CLOSON, *Pascal Taskin* (Lège, 1913).

TASSO, GIOVANNI MARIA, a 16th-century composer who, together with Lupacchino, wrote 'Il i. libro a note negra a 2 voci,' published by Scotto, 1559, and appearing in many editions until 1701. Fifteen of the 2-part solfeggi without words, which it contains, are by Tasso (Q.-L.).

TASTO SOLO. *Tasto* (Fr. *touche*) means the part in an instrument which is touched to produce the note; in a keyed instrument, therefore, the key. 'Tasto solo,' 'the key alone,' is in old music written over those portions of the bass or continuo part in which the mere notes were to be played by the accompanist, without the chords or harmonies founded on them. (See THOROUGH-BASS.)

G.

TATTOO³ (*rappel; Zapfenstreich*), the signal in the British army by which soldiers are brought to their quarters at night. The infantry signal begins at twenty minutes before the hour appointed for the men to be in barracks, by the bugles in the barrack-yard sounding the 'First Post' or 'Setting of the Watch.' This is a long passage of twenty-nine bars, beginning as follows:

and ending with this impressive phrase:

³ The word is derived by Johnson from the French *tapotes tous*; and its original form seems to have been 'tap-to' (see Count Mansfield's *Directions of Warre*, 1624), as if it were the signal for the tap-rooms or bars of the canteen to put-to or close. Curiously enough, however, 'tap' seems to be an acknowledged term for the drum—'tap of drum.' *Tapoter* is probably allied to the German *zapfen*, the tap of a cask, and *zapfenstreich*, the German term for tattoo; this also may mean the striking or driving home of the taps of the beer barrels. The proverbial expression 'the devil's tattoo'—meaning the noise made by a person absorbed in thought drumming with foot or fingers—seems to show that the drum and not the trumpet was the original instrument for sounding the tattoo.

This is succeeded by the 'Rolls,'¹ consisting of three strokes by the big drum, each stroke followed by a roll on the side-drums:

The drums and fifes then march up and down the barrack-yard playing a succession of quick marches at choice, till the hour is reached. Then 'God save the King' is played, and the tattoo concludes with the 'Second Post,' or 'Last Post,' which begins as follows:

and ends like the 'First Post.'²

Since the time of Wallenstein the Zapfenstreich in Germany has had a wider meaning, and is a sort of short, spirited march played not only by drums and fifes or trumpets but by the whole band of the regiment. It is in this sense that Beethoven uses the word in a letter to Peters (1823 ?):

'There left here last Saturday three airs, six bagatelles, and a tattoo, instead of a march. . . and to-day I send the two tattoos that were still wanting . . . the latter will do for marches.'

TAUBERT, KARL GOTTFRIED WILHELM (b. Berlin, Mar. 23, 1811; d. there, Jan. 7, 1891), composer, was the son of an official in the Berlin Ministry of War. Though not actually brought up with Mendelssohn, he trod to a certain extent in the same steps, learned the piano from Ludwig Berger, and composition from Klein, and went through his course at the Berlin University 1827-30. He first appeared as a PF.-player; in 1831 was made accompanist to the court concerts, and from that time his rise was steady. In 1834 he was elected member of the Academy of Arts, in 1841 became music-director of the Royal Opera, and in 1845 court Kapellmeister—a position which he held till his retirement from the Opera in 1869 with the title of Oberkapellmeister. From that time he conducted the royal orchestra at the court concerts and soirées. In 1875 he was chosen member of council of the musical section of the Academy. Among his first compositions were various small instrumental pieces, and especially sets of songs. The songs attracted the notice of Mendelssohn, and not only drew from him very warm praise and anticipation of

future success (see the letter to Devrient, July 15, 1831), but led to a correspondence, including Mendelssohn's long letter of Aug. 27, 1831. In these letters Mendelssohn seems to have put his finger on the want of strength and spirit which, with all his real musician-like qualities, his refined taste and immense industry, prevented Taubert from writing anything that will be remembered.

The list of his published works is an enormous one:

3 Psalms and a Vater unser; 6 operas, 'Die Kirmess' (1832), 'Der Zigeuner' (1834), 'Marquis und Dieb' (1842), 'Joggeli' (1853), 'Machbeth' (1867) and 'Cesario' (1874). Incidental music to 8 dramas, including 'Medea' and 'The Tempest' (Nov. 23, 1855); 4 cantatas; 294 solo-songs, in 52 Nos., besides duets and part-songs; 3 symphonies and a festival-overture for full orchestra; 2 trios for PF. and strings; 3 string quartets; 6 sonatas for PF. and violin; 6 sonatas for PF. solo; and a host of smaller pieces. The most successful of all are the charming 'Kinderlieder.' For complete catalogue see Ledebur's *Tonkünstler-Lexikon Berlins*.

G.

TAUDOU, ANTOINE ANTONIN BARTHÉLEMY (b. Perpignan, Aug. 24, 1846; d. Paris, July 6, 1925), composer and violinist. He early evinced such aptitude for music that he was sent to Paris and entered at the Conservatoire, where he carried off successively the first prizes for solfège, violin (1866), harmony (1867), fugue (1868) and, finally, after two years' study of composition with Reber, the Grand Prix de Rome (1869). The subject of the cantata was 'Francesca da Rimini,' and the prize score was distinguished for purity and elegance.

His works include a trio for flute, viola and violoncello, another for PF., violin and violoncello; a violin-concerto played at the Société des Concerts du Conservatoire; string quartet in B minor, often heard in Paris; and for orchestra a 'Marche - Ballet,' a 'Chant d'automne' and a 'Marche - Nocturne.' He published songs and pieces for PF., and a cantata written for the inauguration of a statue to Arago (1879), at Perpignan, is still in MS. In Jan. 1883 he was chosen professor of harmony and accompaniment at the Conservatoire.

G. C.

TAUSCH, JULIUS (b. Dessau, Apr. 15, 1827; d. Bonn, Nov. 11, 1895), composer and conductor, a pupil of F. Schneider at Dessau. In 1844 he entered the Conservatorium of Leipzig, then in the second year of its existence, and on leaving that in 1846 settled at Düsseldorf. Here he gradually advanced; on Julius Reitz's departure in 1847 taking the direction of the artists' Liedertafel, and succeeding Schumann as conductor of the Musical Society, temporarily in 1853, and permanently in 1855. He was associated in the direction of the Lower Rhine Festivals of 1863, 1866 (with O. Goldschmidt), 1869, 1872 and 1875. In the winter of 1878 he conducted the orchestral concerts at the Glasgow Festival. He retired in 1888, and lived at Bonn.

Tausch published a Fest-overture, music to 'Twelfth Night,' various pieces for voices and orchestra, songs and pianoforte pieces, solo and accompanied.

G.

¹ For details see Potter's *Instructions for the Side Drum*.
² The full drill of Tattoo as here described is still (1927) used by some regiments.

H. Z. A.

TAUSIG, CARL (b. Warsaw, Nov. 4, 1841; d. Leipzig, July 17, 1871), 'the infallible, with his fingers of steel,' as Liszt described him, was, after Liszt, the most remarkable pianist of his time.

He was first taught by his father, Aloys Tausig, a professional pianist of good repute, who outlived his more famous son, dying Mar. 24, 1885. When Carl was 14, his father took him to Liszt, who was then at Weimar, surrounded by a very remarkable set of young musicians. It will suffice to mention the names of Bülow, Bronsart, Klindworth, Pruckner, Cornelius, Joseph Joachim (Konzertmeister), Joachim Raff (Liszt's amanuensis) to give an idea of the state of musical things in the little Thuringian town. During the interval from 1850-58 Weimar was the centre of the 'music of the future.' Liszt, as Kapellmeister in chief, with a small staff of singers and a tolerable orchestra, had brought out 'Tannhäuser' and 'Lohengrin,' Berlioz's 'Benvenuto Cellini,' Schubert's 'Alfonso und Estrella,' etc. He was composing his 'Poèmes symphoniques,' revising his pianoforte works, writing essays and articles for musical papers. Once a week or oftener the pianists met at the Alte Burg, Liszt's residence, and there was an afternoon's 'lesson' (gratis of course). Whoever had anything ready to play, played it, and Liszt found fault or encouraged as the case might be, and finally played himself. Peter Cornelius used to relate how Liszt and his friends were taken aback when young Tausig first sat down to play. 'A very devil of a fellow,' said Cornelius, 'he dashed into Chopin's *Al* Polonaise, and knocked us clean over with the octaves.' From that day Tausig was Liszt's favourite. He worked hard, not only at pianoforte-playing, but at counterpoint, composition and instrumentation. In 1858 he made his début in public at an orchestral concert conducted by Bülow at Berlin. Opinions were divided. It was admitted on all hands that his technical feats were extraordinary, but sober-minded people talked of noise and rant, and even those of more impulsive temperament, who might have been ready to sympathise with his 'Lisztian eccentricities,' thought he would play better when his period of 'storm and stress' was over. In 1859 and 1860 he gave concerts in various German towns, making Dresden his headquarters. In 1862 he went to reside at Vienna, when, in imitation of Bülow's exertions in Berlin, he gave orchestral concerts with very 'advanced' programmes. These concerts were but partially successful in an artistic sense, whilst pecuniarily they were failures. After this, for some years, little was heard of Tausig. He changed his abode frequently, but on the whole led the quiet life of a student. The 'storm and stress' was fairly at an end when he married and settled in Berlin, 1865. Opinions

were now unanimous. Tausig was hailed as a master of the first order. He had attained self-possession, breadth and dignity of style, whilst his technique was as 'infallible' as ever. At Berlin he opened a 'Schule des höheren Clavierspiels,' and at intervals gave pianoforte recitals, of which his 'Chopin recitals' were the most successful. He played at the principal German concert-institutions, and made the round of the Russian towns. He died of typhoid fever.

His manner of playing at its best was grand, impulsive and impassioned, yet without a trace of eccentricity. His tone was superb, his touch exquisite and his manipulative dexterity and powers of endurance such as to astonish even experts. He made a point of executing his *tours de force* with perfect composure, and took pains to hide every trace of physical effort. His repertory was varied and extensive, and he was ready to play by heart any representative piece by any composer of importance from Scarlatti to Liszt. A virtuoso *par excellence*, he was also an accomplished musician, familiar with scores old and new, a master of instrumentation, a clever composer and arranger.

Shortly before his death Tausig published an op. 1—'Deux Études de Concert.' With this he meant to cancel various compositions of previous date, some of which he was sorry to see in the market. Amongst these latter are a pianoforte arrangement of 'Das Geisterschiff, symphonische Ballade nach einem Gedicht von Strachwitz, op. 1,' originally written for orchestra; and 'Réminiscences de Halka, Fantaisie de concert.' A pianoforte concerto, which contains a Polonaise, and which, according to Felix Draeseke, was originally called a Phantasie, several 'Poèmes symphoniques,' etc., remain in manuscript. Tausig's arrangements, transcriptions and fingered editions of standard works are as follows:

Wagner: Die Meistersinger von Nürnberg, FF. score; 'Walkürenritt,' transcription.

Bach: Organ Toccata and Fugue in D minor, Choral-Vorspiele; Praeludium, Fugue and Allegro; 'Das wohltemperirte Clavier,' a selection of the Preludes and Fugues, carefully phrased and fingered.

Berlioz: 'Danse des gnomes' and 'Danse des sylphes' from the 'Damnation de Faust.'

Schumann: El contrabandista.

Schubert: Andantino and Variations, Rondo, Marche militaire, Polonaise mélancolique.

Weber: Invitation à la valse.

Scarlatti: three Sonatas, Pastorale, and Capriccio.

Chopin: Concerto in E minor; score and FF. part.

Beethoven: six Transcriptions from the string quartets, opp. 59,

130, 131 and 135.

'Nouvelles Soirées de Vienne—Valse caprices d'après Strauss.'

1-5. (These are pendents to Liszt's 'Soirées de Vienne' after Schubert.)

'Ungarische Zigeunerweisen' (fit to rank with the best of Liszt's 'Rhapsodies hongroises').

Clementi: Gradus ad Parnassum, a selection of the most useful Studies, with additional fingering and variants.

Tausig's 'Tägliche Studien' is a posthumous publication, consisting of ingeniously contrived finger exercises, edited by H. Ehrlich; among the many 'Indispensables du pianiste,' it is one of the few really indispensable. E. D.

TAVERNER JOHN (b. circa 1495; d. Oct. 25, 1545), organist and composer. Taverner was commonly described by Foxe and other

early writers as 'of Boston' in Lincolnshire, and without doubt he died and was buried there; but that he was a native of Boston is not certainly known. The name was not uncommon in this district. In 1335 Walter le Taverner 'of St. Botolph' (Boston) was one of the first members of the Guild of Corpus Christi in Boston. It is quite likely that the composer was a native of Tattershall, where there were Taverners living at the close of the 15th century, for the first facts that can be cited in his personal history associate him with Tattershall. These facts are contained in a letter from the Bishop of Lincoln to Cardinal Wolsey in 1526, recommending Taverner, a singing man, for the post of 'Informator' of the children of Wolsey's newly founded College at Oxford. At the time he was evidently a lay clerk in the establishment at Tattershall, and he took up his appointment at Cardinals' College, Oxford, in Nov. 1526. His duties as Master of the Choristers at St. Frideswide's, as the College Chapel was called until it became the Cathedral Church of Christ in 1546, included the playing of the organ. Anthony Delabar describes how he 'heard Master Taverner play and others of the chappell there sing.' For his duties he received a salary of £10, with further liberal allowances for livery and commons. Some confusion has arisen, as in Fuller's *Church History*, because a Richard Taverner, of the family of Elmham in Norfolk, was at this time one of the junior canons in Wolsey's College. There is no reason to suppose that the two were even nearly related.

Taverner was at Oxford no more than three years and a half; for, on May 20, 1530, John Benbow of Manchester was appointed Master of Choristers in his place. It must have been during this period, and while he was at Tattershall, that he wrote all his fine church music, because after this date his religious views, and indeed his whole career, underwent a complete change. The College was at that time a hot-bed of Lutheranism, and Taverner became deeply involved in the religious controversies of the day. In 1528 he, with others, was accused of heresy and imprisoned, the charge being that he had hidden some heretical books 'under the bordes in his schoole,' yet 'the Cardinal for his musick excused him, saying that he was but a musitian, and so he escaped.' It seems to be true, as Foxe says, that 'this Taverner repented him very muche that he had made Songes to Popish Ditties in the time of his blindnes.' His subsequent career was spent in fanatical persecution, as the paid agent of Thomas Cromwell, in the destruction of the monastic establishments; musicians of all shades of religious opinion may be grateful for the fact that this great composer was not, at an earlier age, exposed to those influences which terminated his musical career.

It was at Boston that the remaining years of

his life were spent. Three autograph letters of his, surviving in the Public Record Office, refer to the scenes with which he was connected, including the burning of the Rood at Boston, and even greater horrors in the market-place. The musician's sensitive temperament in a man of such strong character, as the portrait sketches in Bodl. MS. Mus. Sch. e 376-81 indicate, reacted in fierce fanaticism when he felt compelled to abandon music under pressure of religious conviction.

In 1537 he was elected a member of the Guild of Corpus Christi in Boston; in 1541 he was one of the stewards of this Guild and still held office in 1543 when the Register ends abruptly. He left no will that has yet been discovered, but the Inquisition post-mortem dealing with his property gives the date of his death on Oct. 25, 1545. John Baldwin, the famous Windsor musical scribe, in a footnote in Ch. Ch. MS. 983, fo. 46, stated that 'Master John Tavernar of Cardinall Wolsayes chappell died at bostone and there lieth.' We gather from his widow's will that he was buried under the bell-tower, familiarly known as 'Boston stump,' but no trace of his grave can now be found. He married Rose Parrowe and left two daughters: Isobel, married to Richard Hodge, and Emma, married to Stephen Salmon. He owned landed property in and around Boston at the time of his death.

Taverner's position in the history of English church music is one of the highest importance. The merits of his music were recognised, before the close of the 16th century, by such writers as Thomas Morley, John Case and Meres, and without question he was pre-eminent among the English composers of his own day, working as he did just a generation before Tye and Tallis. His work, in fact, represents the climax of the development of the early Tudor School, following, as it did, upon that of Fayrfax, Hugh Aston and Nicholas Ludford. In this connexion we may quote from the preface of 'Tudor Church Music,' vol. i. p. xxiv:

'The greatest exponent of the style developed in the post-Fayrfax period was John Taverner. . . . No account of English polyphony could be complete that did not insist upon his eminence, not only relatively but absolutely. Relatively, he sums up all the qualities of his precursors and contemporaries, and expresses all their ideals. . . . Absolutely, his mastery of a most intricate idiom and his amazing vitality and virility "secure for him a high place among the composers of church music of all periods."'

It is a noteworthy fact that two of Taverner's Masses, 'Sine Nomine' and 'Small Devotion,' were at a very early date, possibly in Taverner's lifetime, adapted for use in English. These adaptations are found in the Bodl. MSS. Mus. Sch. e 420-22 (see SERVICE.) Some similarity in the script of this MS. to that of Taverner's autograph letters has given rise to the conjecture that the Bodleian MS. is in his hand. On internal evidence this is improbable, because

the adaptations are a poor piece of workmanship, very unlikely to have been approved by a composer of Taverner's rank, while it is scarcely credible that the adaptations as they stand should have been his work. Moreover, the MS. would seem to be at least as late as 1545, which was the year of Taverner's death.

Taverner's church music has been collected and edited in the Carnegie edition of 'Tudor Church Music,' vols. i. and iii., with full biographical details and a critical notice of his work. Besides his church music, he wrote three small secular pieces for Wynkyn de Worde's Song-book in 1530: 'My harte, my minde,' 'Love wyll I' and 'The bella'; and a two-part song 'For women no season is rest or patience' (Roy. Lib. B.M.).

Appended is a list of Taverner's church music, which comprises eight Masses, three settings of *Christe Eleison* and the *Kyrie* called 'Kyrie Leroy'; a *Sanctus*, *Benedictus* and *Agnus Dei*; three *Magnificats* and a *Te Deum*, besides 28 *Motets*. Day's 'Certaine Notes,' etc. (1560), includes an adaptation of words beginning 'In trouble and adversity' to one of his 'In nomine,' and a later adaptation of the same composition is found in B.M. Add. MSS. 30480-3 to words beginning 'O give thanks unto the Lord.'

In the opinion of the editors of 'Tudor Church Music' the 'Osanno in excelsis,' ascribed to Taverner in B.M. Add. MSS. 18936-9, is not authentic.

I. MASSES

- (B.M. = British Museum; Bodl. = Bodleian Library; R.C.M. = Royal College of Music; Ch. Ch. = Christ Church, Oxford; Tenb. = St. Michael's College, Tenbury; Pet. = Peterhouse, Cambridge; C.U. Lib. = Warburg Institute University Library; St. John's = St. John's College, Cambridge.)

E. H. F.

TAYBER (TRYBER), (1) ANTON (b. Vienna, Sept. 8, 1756; d. there, Nov. 18, 1822), court composer to the Imperial Chapel from Mar. 1, 1793; later also teacher of the archdukes. He composed an oratorio, a Passion, masses and other sacred music, symphonies, and chamber music for various instruments. Several theoretical works in MS. are in the library of the Musikfreunde, Vienna. (2) FRANZ (b. Vienna, Nov. 15, 1756; d. there, Oct. 22, 1810), brother of the above, conductor of Schikaneder's opera company. Shortly before his death he became court organist at Vienna. He composed an oratorio, various church music, operas, sing-spiele and songs (*Riemann; Q.-L.*).

TAYLOR, bell-founders. For generations this bell-foundry has been carried on at Loughborough, and so successfully that at the present time it is the largest and most important one in the world. The buildings cover an area of 7000 square yards, and every department is equipped with the most modern machinery electrically driven. Messrs. Taylor have succeeded in reducing the designing and tuning of bells to an exact science, and have proved themselves pre-eminent founders and tuners of bells. Most of the great bell projects in England and elsewhere during the past fifteen years have been carried out by this firm. Their business connexions date back directly to Johannes de Stafford of York in the reign of Edward III. He removed to Leicester about the middle of the 14th century, where, by his good repute and successful business capabilities, he became mayor in 1366 and 1370. Under various ownerships (including the eight Newcombes, 1516-1612) the foundry passed to Edward Arnold, who had also a foundry at St. Neot's at which Robert Taylor was apprenticed and eventually succeeded Arnold in 1780. In 1820 Robert Taylor removed to Oxford and died there in 1832. His son John removed to Loughborough in 1840 and died there in 1858. His son, John William Taylor, succeeded, and, under his energetic command, the foundry was very greatly extended. He died in 1906, after which the business continued with even greater success under the management of his sons John and Denison. John died in 1919, since which

time the foundry has increased its work under the most capable direction of E. Denison Taylor, and its importance now is greater than it has ever been before.

The following is a list of the most famous peals made by Taylor :

	No. of Bells.	Weight of Tenor. cwt.s.
Beverley Minster	10	41
" St. Mary's	10	35
Bristol : St. Mary Redcliffe . .	12	51
Dublin : St. Patrick's Cathedral .	13	45
Edinburgh : St. Mary's Cathedral .	10	42
Exeter Cathedral	12	72½
London : St. Paul's Cathedral . .	12	62
Manchester Town Hall	10	52
Newcastle Cathedral	10	37
Shrewsbury : St. Chad's	12	40
Truro Cathedral	10	34
Worcester Cathedral	12	50

The great bells and carillons made by this firm are to be found enumerated under BELL.

W. W. S.

TAYLOR, EDWARD (b. Norwich, Jan. 22, 1784; d. Brentwood, Mar. 12, 1863), as a boy attracted the attention at Norwich of Dr. Beckwith, who gave him instruction. Arrived at manhood he embarked in business as an iron-monger in his native city, but continued the practice of music as an amateur. He possessed a fine, rich, full-toned bass voice, and became not only solo vocalist, but an active manager of the principal amateur society in Norwich. He was sheriff of Norwich in 1819. He took a leading part in the establishment in 1824 of the existing triennial Norwich Musical Festival, training the chorus, engaging the band and singers, and making out the entire programmes. In 1825 he removed to London, and, in connexion with some relatives, entered upon the profession of civil engineer, but not meeting with success he, in 1826, adopted music as a profession, and immediately attained a good position as a bass singer. He sang at the Norwich Festival of 1827. In 1830 he translated and adapted Spohr's 'Last Judgment.' This led to an intimacy with Spohr, at whose request he subsequently translated and adapted the oratorios, 'Crucifixion' (or 'Calvary'), 1836, and 'Fall of Babylon,' 1842. On Oct. 24, 1837, he was appointed professor of music in Gresham College in succession to R. J. S. Stevens. He entered upon his duties in Jan. 1838, by the delivery of three lectures, which he subsequently published. His lectures were admirably adapted to the understanding of a general audience; they were historical and critical, excellently written, eloquently read, and illustrated by well-chosen extracts from the works described, efficiently performed. His lecture on madrigals, delivered at Bristol in 1837, resulted in the formation of the BRISTOL MADRIGAL SOCIETY (*q.v.*). In 1839 he published, under the title of 'The Vocal School of Italy in the 16th century,' a selection of twenty-eight

madrigals by the best Italian masters adapted to English words. He conducted the Norwich Festivals of 1839 and 1842. He wrote and composed an ode for the opening of the present Gresham College, Nov. 2, 1843. In 1844 he joined James Turle in editing 'The People's Music Book.' In the same year he contributed to *The British and Foreign Review* two anonymous articles entitled *The English Cathedral Service, its Glory, its Decline, and its designed Extinction*, a production evoked by some then pending legislation connected with the cathedral institutions, which attracted great attention and in 1845 was reprinted in a separate form. He was one of the originators of the VOCAL SOCIETY (of which he was the secretary), of the MUSICAL ANTIQUARIAN SOCIETY (for which he edited Purcell's 'King Arthur'), and of the PURCELL CLUB (*q.v.*). Besides the before-named works he wrote and adapted English words to Mozart's Requiem, Graun's 'Tod Jesu,' Schneider's 'Sündfluth,' Spohr's 'Vater unser,' Haydn's 'Jahreszeiten,' and a very large number of compositions introduced in his lectures. He was in 1829-43 musical critic to *The Spectator*. He was buried in the old dissenting burial-ground in King's Road, Brentwood. His valuable library was dispersed by auction in the following December.

W. H. H.; addns. D.N.B.

TAYLOR, FRANKLIN (b. Birmingham, Feb. 5, 1843; d. Mar. 19, 1919), a well-known pianoforte-player and teacher in London, began music at a very early age; learned the pianoforte under Chas. Flavelle, and the organ under T. Bedmore, organist of Lichfield Cathedral, where at the age of 13 he was able to take the service. Returning to Birmingham soon afterwards, he appeared as a pianist and composer, and was appointed organist of the Old Meeting-house. In 1859 he went to Leipzig and studied in the Conservatorium together with Sullivan, J. F. Barnett, etc., under Plaidy and Moscheles for pianoforte, and Hauptmann, Richter and Papperitz for theory. He left in 1861, and made some stay in Paris, where he had lessons from Mme. Schumann, and was in close intercourse with Heller, Schulhoff, Mme. Viardot, etc. In 1862 he returned to England, settled permanently in London, and began teaching, and playing at the Crystal Palace (Feb. 18, 1865, etc.), the Monday Popular Concerts (Jan. 15, 1866, etc.), as well as at the Liverpool Philharmonic, Birmingham Chamber Concerts and elsewhere. At the same time he was organist successively of St. Peter's, Charlotte Street, Buckingham Gate, Twickenham Parish Church and St. Michael's, Chester Square. In 1876 he joined the National Training School as teacher, and in 1882 the R.C.M. as professor of the pianoforte, a position which he retained till his death. He was president of the Academy for the higher development of piano-

forte-playing from its foundation by Oscar Beringer in 1873 until its dissolution in 1897.

His *Primer of the Pianoforte* (1879)—emphatically a 'little book on a great subject,' and a most useful and practical book too—was translated into German. He also compiled a P.F. Tutor, and a valuable series of Progressive Studies in 56 books. He contributed extensively to the first edition of this Dictionary. He translated Richter's treatises on Harmony, Counterpoint and Canon and Fugue; and arranged Sullivan's 'Tempest' music for four hands on its production. His attention to his pupils was unremitting, and his power of imparting tone, touch and execution to them remarkable. Gifted with a fine musical organisation himself, he invoked the intelligence of his pupils, and succeeded in making them musicians as well as fine technical performers.

g.; addns. from *Mus. T.*, 1899, p. 798, *et seq.*

TAYLOR, SAMUEL COLERIDGE, see COLERIDGE-TAYLOR.

TAYLOR, CAPTAIN SILAS (SILAS DOMVILL, *alias* TAYLOR) (b. Harley, Shropshire, c. 1624; d. Harwich, c. 1678). He studied at Oxford, became a puritan, and joined Cromwell's army, where he rose to the rank of captain. He devoted himself to antiquarian studies, and, together with his brother, took an active part in the music performances at Oxford. After the Restoration he became a customs officer at Dunkerque, and later at Harwich. He contributed to Hilton's 'Catch that Catch can' and Playford's 'Court Ayres,' and composed also anthems and other sacred music. Autograph MSS. of theoretical essays are in the British Museum. The autograph of two canons by Mathew Locke were inscribed by the composer in 1669 to Silas Domvill, *alias* Taylor. He wrote also some historical works, on the title-pages of which he calls himself Silas Taylor, *alias* Domvill (Q.-L.).

E. v. d. s.

TCHAIKOVSKY, PETER ILICH (b. Kamsko-Votinsk, Government of Viatka, May 7, 1840 (N.S.); d. St. Petersburg, Nov. 6/Oct. 25 1893), one of the most famous composers of the Russian school.

His father was inspector of the Government mines. The boy's musical gift does not appear to have been hereditary. On the contrary, his family was unusually deficient in musical feeling, and could not discern that his capacity in this respect was greatly above the average. At 5 years old he was a winning and precociously intelligent child, devoted to his French governess, who exercised a wholesome influence upon his excitable and morbidly sensitive disposition. Mlle. Fanny Dürbach, not being in the least musical, was inclined to curtail the boy's time at the piano, and on the other hand to encourage his early attempts at literature. When he

was about 7 years old, a music-mistress gave him his first regular instruction on the piano-forte. The Tchaikovsky family took up their abode in St. Petersburg in 1850, and Peter Ilich was then placed under a good teacher, Philipov, with whom he made rapid, but not phenomenal progress. No thought of devoting their child to music ever crossed the minds of his parents, and at 10 years of age he was sent to the preparatory classes for the School of Jurisprudence, from which, nine years later (1859), he passed into the Ministry of Justice as a first-class clerk.

At the School of Jurisprudence Tchaikovsky joined the choral class directed by the famous chorus-master Lomakin, and continued his pianoforte lessons under Kündinger; but neither of these musicians seems to have suspected a budding genius. The whole of this period of his life was distinctly inimical to his artistic development; for he appears to have simply acquiesced in the commonplace ideas of the majority; and on leaving the School he entered upon a somewhat frivolous and worldly life. Music was the highest of his pleasures, but his dealings with it were not very lofty; at 20 he improvised pleasantly, and composed walses and polkas which he did not venture to put on paper. After a time, however, he saw with disgust the emptiness of his daily existence. With this moral awakening came also the first suspicion that he had chosen the wrong career. In the autumn of 1861 he began to study theory under Zarembo at the newly-opened classes of the Russian Musical Society. They increased his misgivings, but he cautiously resolved to hold on to his place in the Ministry of Justice until he felt confident that he was 'no longer a clerk but a musician.' Two years later these classes had developed into the Conservatoire, and Tchaikovsky's musical studies had become so much more serious and absorbing that he felt the need for some decisive action. Consequently, early in 1863, he relinquished his official work and began to face a life of poverty for the sake of his art. His mother, to whom he had been devotedly attached, had died of cholera in 1855; while his father had experienced such sharp reverses of fortune that he could now offer Peter Ilich nothing but bare board and lodging, until he should be able to maintain himself in the profession of his choice. To supply his further needs Tchaikovsky took some private teaching offered to him by Anton Rubinstein, but his earnings at this time did not exceed £5 a month. The composer's most intimate friend, the critic Hermann Laroche, gives an interesting account of their student days. The leading spirits of the Conservatoire in its infancy were Zarembo and Anton Rubinstein. With the former Tchaikovsky studied harmony, strict counterpoint and the Church

Modes; with the latter composition and instrumentation. For Rubinstein his attitude was almost that of adoration; a sentiment which survived much harsh criticism and apparent unkindness. Tchaikovsky himself always attributed Rubinstein's coolness to him as a composer to the radical difference in their musical temperaments; but in reading the life of Tchaikovsky it is difficult to accept this as the sole reason for Rubinstein's persistent rejection in St. Petersburg of works which were received with considerable enthusiasm in Moscow. Both Zarembo and Rubinstein seem to have had power to stimulate their pupil's innate indolence, so that he soon threw off the last traces of his old dilettantism, and kept a single aim perpetually before him—'to be a good musician and earn my daily bread.' Tchaikovsky completed his course at the Conservatoire in 1865. For his diploma-work (a setting of Schiller's 'Ode to Joy') he received a silver medal and a good deal of unflattering criticism.

Early in 1866 Nicholas Rubinstein organised the Conservatoire in Moscow, and offered Tchaikovsky the post of professor of harmony. The pay was poor, but it was an honourable position, and the change to the artistic life of Moscow proved in many ways beneficial to him. Here he enjoyed the companionship of such talented musicians as Kashkin, Albrecht and Klindworth, men who were older, or at least more experienced, than himself. Here, too, he met the enterprising young publisher Jurgenson, who afterwards played such an important part in his life. During the first years of his career in Moscow Tchaikovsky lived with Nicholas Rubinstein, a man of somewhat irritable and overbearing temper, but a loyal and devoted friend. Whether Rubinstein's masterful guidance did not check the free development of Tchaikovsky's character and talent is an open question.

On the other hand, it was an inestimable advantage to have such an influential friend; for, year by year, Nicholas Rubinstein brought out Tchaikovsky's compositions—even the earliest ones—at the concerts of the Russian Musical Society, of which he was the conductor. In spite, however, of the favourable auspices under which his works were produced, a note of dissatisfaction is apparent in Tchaikovsky's letters at this time. The appreciation of Moscow meant far less to him than that of St. Petersburg, and he was always more keenly sensitive to any slight, real or imaginary, which emanated from the northern capital. During the first two years of his life in Moscow Tchaikovsky completed three works of importance in their different styles. A Festival Overture on the Danish national hymn, his first symphony in G minor ('Winter Day-dreams'), and an opera on a libretto by

Ostrovsky, 'The Voyevode.' To accomplish so much besides his teaching he had to work very hard, and suffered greatly from disordered nerves and insomnia. From this time dates that 'hankering after a quiet country life' which pursued him through life. Until he was able to gratify this desire he found his chief consolation in the long visits he paid every summer to his married sister, Alexandra Davidov, whose husband was manager of a large family estate at Kamenka, near Kiev. This sister was the chief confidante of Tchaikovsky's early troubles and difficulties; he was bound to her and to her children by lifelong ties of sympathy and affection.

About Easter 1868, while on a visit to St. Petersburg, Tchaikovsky first came in contact with that group of young musicians who were working for the cause of nationality in art. There is no doubt that he was stirred by the enthusiasm of Balakirev, Stassov and Rimsky-Korsakov, and that they exercised a temporary influence upon his choice of musical subjects. His second symphony, based upon Little Russian folk-songs, and the two 'programme' works 'Romeo and Juliet' (dedicated to Balakirev) and 'The Tempest' (dedicated to Stassov) bear witness to the effect of his intercourse with the men who were then regarded as the musical radicals of Russia. He was never unreservedly in sympathy with the 'Invincible Band.' On the contrary, as time went on, he grew more and more alienated from these contemporaries, until ten years later, we find him—in his letters to Nadejda von Meck—betrayed into criticisms as superficial as they are ungenerous. The year 1868 was marked by another event of a more intimate nature. In the course of the winter season an opera company visited St. Petersburg under the direction of Merelli, who brought as a star the singer Désirée Artôt (*q.v.*), then at the zenith of her fame and power. Artôt, who was several years older than Tchaikovsky, took a friendly interest in his work, and invited him to visit her. At first the young composer responded shyly to her friendly advances, but soon fell under the spell of her rare charm, with the result, as he subsequently informed his father, 'that we began to feel a mutual glow of tenderness, and an understanding followed immediately.' Tchaikovsky's feelings for Artôt were not so ardent as to blind him to the possible disadvantages of a marriage with her. We find him, even in the first flush of happiness, speculating as to what might become of his own career if he were expected to run about the world at the beck and call of a successful *prima donna* in the pitiable rôle of 'the husband of my wife.' Artôt herself put a term to his uncertainties. A few weeks after their first parting, in Jan. 1869, Tchaikovsky received

the totally unexpected news of her marriage to the baritone Padilla, in Warsaw. Owing to the fact that he was completely absorbed in superintending the preparations for his first opera, 'The Voyevode,' the blow affected him far less than his friends expected. In years to come he resumed his friendly relations with the artist, whom he still admired, perhaps far more than he had ever loved the woman.

The five years which followed this episode was a period of great activity. His first symphonic poem, 'Fatum'; an opera, 'Undine,' the score of which he destroyed in 1873; the quartet, op. 11; an historical opera 'The Oprichnik'; a setting of 'The Snow Maiden'; the pianoforte concerto in B flat minor; the third symphony, and the humorous opera 'Vakoula the Smith'—are some of the more important works which followed each other in quick succession between 1869 and 1875. In 1872 he was appointed musical critic of the *Russky Vedomosti*, and continued to write for this paper at intervals until 1876. Add to all this work the strain of daily teaching—always most uncongenial to him—and it is not surprising that during the winter of 1875 he suffered from depression and was threatened with a nervous collapse. The longing to be relieved of all hindrances to his creative work now possessed him increasingly. In the summer of 1876 he went to Vichy for a cure and afterwards to the Bayreuth festival, as special correspondent to the *Russky Vedomosti*. Mentally and physically exhausted, pondering incessantly on the future, and firmly persuaded that 'things could not go on much longer,' Tchaikovsky returned to Russia early in the autumn. A long visit to his sister somewhat restored his health and spirits, and at the end of October he travelled to St. Petersburg to be present at the first performance of his humorous opera 'Vakoula the Smith' (afterwards known as 'Oxana's Caprice'). He had counted greatly upon the success of this work, which had been most carefully mounted and rehearsed. Nevertheless it proved, in Tchaikovsky's own words, 'a brilliant failure.' Other disappointments were in store for him. His 'Romeo and Juliet,' hissed in Vienna, met with a chilling reception at the Padeloup Concerts in Paris. Yet, contrary to expectation, he rose to meet these troubles with energy and self-reliance. Writing of him at this time, his brother Modeste says:

'Just before committing the rash act which was to cut him off for ever from Moscow, and change all his habits and social relations, he gave us the impression of a man whose mind was at rest, who had no ungratified desires, and displayed more purpose and cheerfulness than formerly.'

The 'rash act' referred to was Tchaikovsky's marriage, which took place in the summer of 1877. The engagement was ill-considered, and the marriage turned out miserably. From a

letter to his friend Nadejda von Meck, dated July 3 (15), 1877, those who are curious in the matter may gather a fairly clear idea of how Tchaikovsky drifted into matrimony with 'a woman with whom I am not the least in love.' In his correspondence with his family the composer completely exonerates his wife from all responsibility for the separation which followed about nine weeks after the wedding. In that short period he seems to have suffered acutely for the weakness, or illusion, which led him to marry in haste at the age of 37. Broken in health and spirits, he fled from Moscow to St. Petersburg, where he arrived in a state of collapse. For several days he lay on the verge of brain fever, and as soon as the dangerous crisis was over the doctors ordered him abroad, in the care of his brother Anatole.

Almost at the same time that Tchaikovsky met his wife he made the acquaintance of another woman who, for the next thirteen years, was destined to play the part of an invisible fairy godmother in his life. The circumstances of this friendship were unusual, for during the whole period of their intimacy the friends never came into personal contact. Their correspondence, however, was frequent and intimate. Nadejda Filaretovna von Meck was Tchaikovsky's senior by nearly ten years. She had married, early in life, a railway engineer who had amassed a large fortune and left her a widow, with eleven children, in 1876. A great lover of nature, a woman of strong and sane intellect, with an excellent head for business, Nadejda von Meck cared nothing for society and lived an extremely secluded existence. She was, however, passionately fond of music, and engaged the services of a young violinist named Kotek as a kind of domestic musician. From him she learnt many particulars about the private life of Tchaikovsky, whom she greatly admired as a composer. She heard of his poverty, of his yearning to be delivered from the drudgery of teaching, and of his phases of nervousness and depression. At first she restricted her philanthropy to the offer of one or two small commissions, for which, however, she paid the composer on such a liberal scale that he could not fail to suspect a charity in disguise. Finally, with tact and delicacy, she persuaded him to accept a yearly allowance which permitted him to devote his time entirely to composition. One of the first-fruits of this friendship was the fourth symphony, dedicated to 'My Best Friend.'

On leaving Russia after his disastrous marriage, Tchaikovsky settled for a time at Clarens, on the Lake of Geneva, and afterwards moved on to Italy, where he remained until Mar. 1878. A year's rest was considered necessary for his complete restoration to health, and thanks to the kindness of Nicholas Rubinstein and Nadejda von Meck he was now

master of his own time. It is a curious psychological fact that during these dark days of his life, when he wrote of himself as 'un homme fini,' he produced some of the most delightful and least stressful of his music. The completion of the fourth symphony and the 'Lyrical Scenes' from Poushkin's 'Eugen Oniegin' occupied him chiefly during his travels abroad. In the summer he enjoyed some weeks of solitude on Madame von Meck's estate of Brailov, near Kiev. Here he composed the *Kinderalbum* and the twelve pieces for pianoforte, op. 40, and completed the pianoforte sonata in G major, dedicated to Klindworth. In September he returned to Moscow to take up his work again, in accordance with his promise to Nicholas Rubinstein. But the atmosphere of the Conservatoire was now more distasteful than ever, and he very soon resigned his professorship. After a short visit to St. Petersburg, where he witnessed the second failure of his opera 'Vakoula the Smith,' Tchaikovsky left for Florence, a town which had a strong fascination for him.

At this time he was full of a project for a new opera on the subject of Joan of Arc. He therefore returned to the quiet of Clarens and threw himself into the task, with his usual ardour for a new work. This time he determined to write his own libretto, which gave him far more trouble than the music. However, as early as Mar. 1879, he wrote to his brother from Paris that he had 'unexpectedly finished the opera.' Shortly afterwards he was recalled to Moscow to be present at the first performance of 'Eugen Oniegin,' given by the students of the Moscow Conservatoire in the theatre of that institution. Modeste Tchaikovsky attributes the cool reception of this work—afterwards the most popular of all the composer's operas—to the poor interpretation it then received at the hands of such inexperienced singers. The composer himself seems to have been elated by the moderate success which awaited him on this occasion. He left for the country in the best of spirits and spent the four summer months between Kammenka, Brailov and Simaki, a smaller country house belonging to Nadejda von Meck to which he retired when she herself came to occupy Brailov. At Simaki he finished the orchestration of his latest opera, 'The Maid of Orleans,' and corrected the proofs of his first suite for orchestra, op. 43. In November he left Russia, travelling by Berlin and Paris to Rome, where he remained until Mar. 1880.

The year 1880 marks a distinct increase in Tchaikovsky's popularity as a composer. He had now reached his fortieth year, and, thanks to Nicholas Rubinstein, all his principal orchestral works had received the best possible interpretations at the concerts of the Musical Society in Moscow; while his operas had all

been given in both capitals. His reputation was therefore well established in Russia; but, so far, his successes abroad had been very dubious. In Vienna he was still the object of Hanslick's almost venomous hostility; in Berlin the Press had unanimously condemned 'Francesca da Rimini'; in Paris 'Romeo and Juliet' and 'The Tempest' had proved failures, and, as recently as Jan. 1880, his fourth symphony had been received with 'icy coldness' at the Colonne concerts. This was a discouraging record, even if we bear in mind that in England and America his music had met with a far more cordial reception. Now, however, came news of the success of his quartet No. 3, op. 30, and the serenade for violin and piano at the Société de Sainte-Cécile in Paris; of the excellent reception of the first suite in America and the triumph of the pianoforte concerto in B \flat minor, which had been played by Bülow and Friedenthal in Berlin, by Breithner in Buda-Pest and Rummel in New York. Tchaikovsky now stood on the brink of universal fame and recognition.

From Nov. 1880 until Sept. 1881 he composed nothing. There are several reasons which may account for this gap in his creative activity. In the spring of 1881 he was deeply affected by the death of Nicholas Rubinstein. He was now confronted with the question: Could he consent to fill his friend's place as director of the Moscow Conservatoire? He decided in favour of freedom and his creative work; yet wise as the decision was, it cost him some twinges of conscience, and so disturbed his peace of mind that he felt no inclination to embark upon an important composition. Another reason for his being unable to work with his usual zest was the illness of his sister Alexandra Davidov. Kamenka, thus overshadowed, was never again to be the ideal place of refuge in the summer months. In December, while staying in Rome, he took up his pen once more, and began to compose the beautiful pianoforte trio, op. 50, 'dedicated to the memory of a great artist' (Nicholas Rubinstein). The work was completed by the end of Jan. 1882.

The chief work of 1882–83 was the opera 'Mazeppa,' based upon Poushkin's poem 'Poltava.' In the course of its completion his enthusiasm flagged considerably. Writing to Nadejda von Meck in Sept. 1882 he says:

'Never has any important work given me such trouble as this opera. Perhaps it is the decadence of my powers—or have I become more severe in self-judgment?'

The Opera Direction showed extraordinary zeal in the staging of the work. It was decided to give it simultaneously in Moscow and St. Petersburg, a course so unusual that the composer was justified in thinking the Emperor must have interested himself personally in the matter. In spite of these favourable auspices

the work was not very cordially received, the public applause being obviously intended for the man rather than the music. Exhausted by nervous anxiety as to the fate of his opera, Tchaikovsky went to Paris to avoid the first performance in St. Petersburg (Feb. 15, 1883). He had hardly arrived in the French capital before he was summoned to appear before their Imperial Majesties in order to be invested with the order of St. Vladimir. From St. Petersburg he went to Kamenka, where he set to work upon his third suite. During the autumn 'Eugen Onegin' was given in St. Petersburg under the direction of Napravnik. This proved the turning-point in its favour. The critics still remained cold, but the crowded houses signified the first popular success of a native opera since Glinka's 'A Life for the Tsar,' and henceforward it remained almost an unrivalled favourite with the Russian public.

The year 1884 closes the second, or 'Kamenka' period in Tchaikovsky's life, so called to distinguish it from the 'Moscow' period, which is inseparably connected with his teaching at the Conservatoire. From the time of his serious illness in 1877, Kamenka, with its peaceful family atmosphere, entirely satisfied his requirements. But with a gradual change to a happier and more independent state of mind, its circle became too narrow for him. His desire for complete liberty, coupled with social intercourse, may be regarded as a sign of his complete recovery.

'The Tchaikovsky of 1885,' says his brother, 'seemed a new man compared with the nervous and misanthropical Tchaikovsky of 1878.' Recognition seemed to endow him with strength and energy for a public career. He was no longer satisfied to stand aloof and leave to others the propaganda of his works. Conquering his former dislike to publicity, he now accepted invitations to conduct his own compositions in person. These new conditions of life are reflected in the ever-widening circle of his acquaintances, which included such interesting personalities as Liadov, Altani, Grieg, Sophie Menter, Emil Sauer, Louis Diémer, Colonne and Carl Halir. Besides these, he knew and corresponded more or less intimately with the famous singer Emilie Pavlovskaya, the Grand Duke Constantine Constantinovich, the pianists Sapellnikov and Siloti, Glazounov, Désirée Artôt, Brodsky and many others. In these new friendships he found the affection and appreciation so indispensable to his temperament, but few of them were so deep and lasting as the ties of earlier days. The dearest of all his later affections was for his nephew Vladimir Davidov, for whom Tchaikovsky felt the same protecting affection he had lavished upon his brothers the twins Anatole and Modeste, in their youth. The difference of age was no hindrance to their companionship. Tchai-

kovsky confided his inmost thoughts to his nephew, dedicated to him his last great work, the 'Pathetic Symphony,' and made him his heir and executor, confiding to his care all those whom he still wished to help, even after his death.

For many years Tchaikovsky had desired to possess a small country house of his own. When, in the early spring of 1885, the moment came to decide upon his usual trip abroad, he was suddenly seized by a nervous terror of the journey and sent his faithful servant Alexis to take a furnished house in the country. The manor-house of Maidanovo, near Klin, once the abode of an aristocratic family, had gradually fallen into decay. Nevertheless it was not an unpleasant temporary residence, and had the advantage of being on the direct line between Moscow and St. Petersburg. The view from the windows, the quiet and sense of being at home, delighted Tchaikovsky. 'I am contented, cheerful, and quiet,' he wrote to his brother, soon after his arrival at Maidanovo.

'I read a great deal, and am getting on with English, which I enjoy. I walk, eat, and sleep when—and as much as—I please—in fact, I live.'

He was occupied at this time in the revision of 'Vakoula the Smith,' which was to be brought out again under the title of 'Oxana's Caprice,' and also upon a new opera, founded upon Shpajinsky's play 'The Enchantress.' He was also greatly absorbed in the affairs of the Moscow Conservatoire, being set upon securing the directorship for his favourite pupil Taneiev. In June he began to fulfil a promise, made to Balakirev three years earlier, to compose a symphonic work on the subject of 'Manfred.' The programme was alluring, moreover it was not out of harmony with contemporary feeling; for, as Balakirev puts it,

'all the troubles of modern man arise from the fact that he does not know how to preserve his ideals. Hence all the suffering of our times.'

The work cost Tchaikovsky an immense effort. Writing of it to Nadejda von Meck he says: 'It is so highly tragic—so complicated and difficult—that at times I myself become a Manfred.' It was finished in Dec. 1885.

After spending nearly six months in the manor-house at Maidanovo Tchaikovsky moved into a smaller house in the same neighbourhood. From this time dates that quiet country existence which earned for him the sobriquet of 'the Hermit of Klin.' The routine of his life at this time was as follows:—He rose between 7 and 8 A.M. Part of his morning was devoted to reading, the remainder to proof-correcting, or composition. At one o'clock he dined, and, wet or fine, always went for a walk after dinner. He had read somewhere that in order to keep in health, a man ought to walk for two hours a day, and observed this rule so conscientiously that it distressed him to return five minutes too

soon. Most of the time during these solitary rambles was spent in composition. He thought out the leading ideas, pondered over the construction of the work, and jotted down the chief themes. The next morning he looked over these notes and worked them out at the piano, so that he should not trust entirely to his indifferent memory. He wrote out everything very exactly, and indicated the instrumentation here and there. In these sketches the greater part of a work was generally quite finished. When it came to the orchestration, he only copied it out clearly, without essentially altering the first drafts. While speaking of his methods of composing, it may be added that his close reserve as to his compositions also dates from this time. In earlier days Tchaikovsky had been very communicative about his work; even before his compositions were finished, he was ready to discuss them, and ask the advice of his friends. Gradually the circle to whom he communicated the fruits of his inspiration became smaller, until after 1885 he ceased to show his works to any one. The first person to see them was the engraver in Jurgenson's publishing house. Tchaikovsky never worked at night after his alarming breakdown in 1866. His lonely evenings were spent at the piano, or in reading—mostly historical books—and playing 'patience.' When his intimate friends, Kashkin or Laroche, visited him, they would read aloud, or play cards till 11 P.M., when Tchaikovsky retired to bed.

In Apr. 1886 Tchaikovsky left the seclusion of Maidanovo to visit his youngest brother Hippolyte in the Caucasus. At Tiflis, where he had an excellent friend and interpreter in Ippolitov-Ivanov, he met with a triumphant reception. A concert was organised consisting entirely of his works, followed by a supper, and the presentation of a silver wreath. It was the first great public honour accorded to the composer, and revealed to him what he had hitherto hardly begun to realise—the extent of his popularity and his real relation to the Russian public. From the Caucasus he travelled to Paris, where by this time his reputation had considerably increased; but it cannot be said that his popularity has been maintained there in the same degree as in England. Late in June he returned to the little home which he had left deep in snow, and now found embowered in foliage and flowers. He was still busy with his 'Enchantress,' and believed, as he always did of his latest operatic work, that it was the finest thing he had ever conceived. At the beginning of the autumn he paid a visit to St. Petersburg to be present at the first performance of Napravnik's 'Harold,' and was very much gratified at his reception there. The composers, headed by Rimsky-Korsakov, welcomed him in a most friendly spirit, while at the same time he received,

through the medium of Stassov, an anonymous gift of 500 roubles, usually bestowed on the composer of the best musical novelty of the season, judged, in this instance, to be 'Manfred.'

The first performance of 'Oxana's Caprice' took place in Moscow on Jan. 31, 1887, and had a far-reaching influence on Tchaikovsky's future, because he then made his first successful attempt as a conductor. The work had a brilliant success, perhaps due to the composer's presence on the occasion; for it only remained in the repertory for two seasons. He was not long in following up his first success in the conductor's rôle. On Mar. 17 he appeared in this capacity at one of the Philharmonic Society's concerts in St. Petersburg, and this was the beginning of a whole series of similar concerts which made his name known throughout Russia, western Europe and America. Tchaikovsky's diary contains the following laconic reference to this occasion: 'My concert. Complete success. Great enjoyment—but still, why always this drop of gall in my honey-pot?' 'In this question,' says his brother Modeste, 'lie the germs of all the weariness and suffering which sprang up in Tchaikovsky's soul simultaneously with his pursuit of fame, and reached their greatest intensity at the moment of his greatest triumphs.'

Tchaikovsky spent most of the spring at Maidanovo, devoting himself to the orchestration of 'The Enchantress.' This work was a step in the direction of purely dramatic and national opera. The composer declared that he was attracted to the subject by a long-cherished desire to illustrate in music Goethe's famous words, 'Das Ewig-Weibliche zieht uns hinan,' and to demonstrate the irresistible witchery of woman's beauty. The opera was produced at the Maryinsky Theatre, St. Petersburg, on Nov. 1/Oct. 20, 1887, and was conducted by the composer. Tchaikovsky did not at first realise that in spite of a personal ovation the opera was actually a failure. He was bitterly disappointed when, on the fifth night, the work was sung to a half-empty house, and almost immediately withdrawn. Nor did it meet with a better fate when given in Moscow in the following February.

With the year 1888 Tchaikovsky began his new mode of life with a lengthy concert tour which included Leipzig, Berlin, Prague, Hamburg, Paris and London. It was not without inward misgivings that he set out on the chase for fame, and in a few weeks the sense of disillusionment had already crept over him. 'My reputation will probably increase,' he wrote to Nadejda von Meck,

'but would it not be better to stay at home and work? God knows! . . . I regret the time when I was left in peace in the solitude of the country.'

In Berlin his success was not sufficiently marked to console him for the exertion and loss of time

involved by his visit; Leipzig received him with far greater cordiality; in Prague and Paris he met with brilliant receptions, but the results in both instances have proved transient. It was in London that the seeds of his popularity struck the deepest and most abiding roots. Generally speaking, the London papers were favourable to Tchaikovsky, although some regret was expressed that he had not made his début at the Philharmonic Society with some more solid works than the *Serenade for strings* and the *Variations from the third suite*.

By the end of April 1888 he was back in Russia, and settled in a new country house at Frolovskoe near Klin, less pretentious than Maidanovo, but more picturesque and secluded. Here he was free from the inroads of summer excursionists—and could enjoy the little garden on the edge of the forest and the wide outlook beyond, which opened upon the homely landscape of Central Russia, dearer to Tchaikovsky than all the beauties of Italy or the grandeurs of the Caucasus. He became greatly attached to the place and only left it on account of the wholesale destruction of the surrounding forests. The summer went by peacefully. 'I cannot tell you,' he writes to Nadejda von Meck, early in August,

'what a pleasure it has been to watch my flowers grow, and see daily—even hourly—new blossoms coming out. When I am quite old and past composing I shall devote myself to growing flowers. Meanwhile, I have been working with good results, for half the symphony (the Fifth) is now orchestrated.'

He was also engaged in completing the *Fantasia-Overture 'Hamlet'*. But these happy summer months were followed by an unusually arduous and depressing winter season. Early in autumn he lost his niece Vera Rimsky-Korsakov, née Davidov, and his old comrade Hubert. The fifth symphony and 'Hamlet' were well received in St. Petersburg, but the criticisms of the former were very discouraging. In December he conducted a successful performance of 'Eugen Onegin' at Prague, and during the course of the winter season retired to the country for six weeks to compose a ballet ('The Sleeping Beauty') commissioned by the directors of the Opera.

Towards the close of Jan. 1889 Tchaikovsky started on his second tour abroad. Hardly had he crossed the German frontier than he experienced 'the usual feelings of home-sickness' and looked forward to his return. On Feb. 13 he made his first appearance as composer and conductor at a Gürzenich concert in Cologne, and afterwards wrote to Glazounov in high praise of the orchestra: 'They read the scherzo of the third suite, which is particularly difficult, as though they were playing it for the tenth time.' From Cologne he went to Frankfurt, Dresden, Berlin, Leipzig and Geneva, after which he travelled north to Hamburg. Here he found himself in the same hotel as Brahms,

and was gratified to hear that the German composer was prolonging his visit on purpose to attend the rehearsal of the fifth symphony. Afterwards, at luncheon, Brahms confided his opinion of the work to its composer 'very frankly and simply': it pleased him on the whole, with the exception of the finale. This meeting increased Tchaikovsky's respect and personal liking for Brahms, but their musical temperaments differed too radically to find any common meeting-ground. Tchaikovsky took no part in the conflict between the partisans of Brahms and Wagner which divided all musical Germany. The personality of the former, his purity and loftiness of aim, and earnestness of purpose won Tchaikovsky's sympathy. Wagner's personality and views were, on the contrary, antipathetic to him; but his music awoke his enthusiasm, while the works of Brahms left him unmoved to the end of his life. Between the Hamburg concert and his arrival in London Tchaikovsky spent a few weeks in Paris, but made no public appearance.

On Apr. 11, 1889 Tchaikovsky appeared for the second time at the London Philharmonic Concerts, conducting his first suite and the pianoforte concerto in B flat minor (Sapellnikov). From London he returned to Russia by the Mediterranean and the Caucasus. He spent a few days in Moscow, where a *coup d'état* had taken place in the Conservatoire, Taneiev having resigned the directorship, in which he was succeeded by Safonov. The summer was spent as usual in the country, and the time was occupied by the completion and orchestration of 'The Sleeping Beauty' ballet. He was delighted with the results, and pronounced it to be 'one of my best works.' Consequently he experienced a severe disappointment when on the occasion of the gala rehearsal in St. Petersburg, Jan. 13, 1890, at which the Imperial court was present, 'very nice' constituted the sole expression of approval which passed the Emperor's lips. The public showed itself equally cool; but, as in the case of 'Eugen Onegin,' the ballet grew in favour until it became in time one of the most popular of the composer's works.

During the greater part of the winter 1889-90 Tchaikovsky was obliged to remain in Moscow, to superintend the rehearsals for 'Eugen Onegin.' At this time he looked forward with apprehension to the Jubilee Festival of Anton Rubinstein, which was to take place in St. Petersburg in November, for which he had undertaken to compose a chorus and a pianoforte piece. This part of his task was easily fulfilled, but the conductorship of the concerts was another matter; for although he had been conducting his own compositions for two seasons, he had but little experience with the works of others. 'There were moments,' he wrote, 'when I experienced such a complete

loss of strength that I feared for my life . . . from the 1st to the 19th of November I endured martyrdom, and I am still marvelling how I lived through it.'

Tired out with four months' arduous work, Tchaikovsky went to Florence about the middle of February. Italy did not interest him at the moment; his one thought was to get away from the turmoil of life in the capitals and to work at his new opera 'Pique-Dame' (The Queen of Spades), the libretto for which had been prepared from Poushkin's novel of the same name, by the composer's brother Modeste. Tchaikovsky attacked the work with intense enthusiasm, went copiously over the hero's sad end, and was persuaded—as with each new opera—that he had at last found the ideal subject. 'Either I am mistaken, or "Pique-Dame" is a masterpiece,' he wrote to his brother on the completion of the work. In this instance he was not disappointed. On the first representation of the opera in St. Petersburg, Dec. 19, 1890, its success, though clearly evident, was not extraordinary. The Press almost unanimously condemned the libretto, and spoke slightly of the music, and there was little to predict that the work would hold its own and continue to bring the composer a substantial revenue. Of all Tchaikovsky's operas it is the one most accessible to foreigners, and best calculated to win success abroad.

The summer was spent happily enough in the seclusion of Frolovskoe, but an exceedingly bitter experience was awaiting Tchaikovsky in the near future. In Dec. 1890 he received a letter from Nadejda von Meck, informing him that she was on the brink of ruin, and therefore unable to continue his allowance. In the course of their correspondence, which had lasted thirteen years, Nadejda von Meck had more than once hinted at pecuniary embarrassments, but had always hastened to assure her friend that his allowance of 6000 roubles a year could not affect her position one way or the other. Her letter on this occasion has not been made public, but it is evident from the tone of Tchaikovsky's reply that it was so worded as to wound his feelings. After sympathising with her troubles, and begging her not to be anxious on his account, he says:

'The last words of your letter¹ have hurt me, but I do not think you meant them seriously. Do you really think me incapable of remembering you when I no longer receive your money? . . . I am glad . . . that I may show my unbounded and passionate gratitude which passes all words. Perhaps you hardly suspect how immeasurable has been your generosity. If you did, you would never have said that now you are poor I am "to think of you sometimes." I can truly say that I have never forgotten you and never shall, for when I think of myself my thoughts turn immediately to you.'

Shortly afterwards he heard that her financial difficulties were satisfactorily arranged, and with the sense of relief which followed on this

news a very human feeling of resentment crept into his heart. He could not banish the idea that his friend's letter had been merely 'an excuse to get rid of him on the first opportunity.' After a short time, however, his sincere affection overcame his mortification and wounded pride. But all advances on his part were met with absolute silence and indifference on hers. The old, ideal friendship now appeared to him as the mere caprice of a wealthy woman—the commonplace ending to a fairy-tale; while her last letter rankled in his heart to the end of his days. According to his brother:

'Neither the triumph of "The Queen of Spades," nor the profound sorrow caused by the death of his beloved sister, in Apr. 1891, nor even his American triumphs, served to soften the blow she had inflicted.'

Let it be said in extenuation of her apparent heartlessness that Nadejda von Meck was already the victim of a terrible nervous disorder 'which changed her relations not only to him, but to others.' The news of the composer's end reached her on her own death-bed, and two months later she followed him to the grave, Jan. 25, 1894.

With the opening of the new year 1891, a note of weariness and vacillation becomes evident in Tchaikovsky's correspondence. Writing to his brother shortly after the splendid success of 'The Queen of Spades' in Kiev, he says:

'It was indescribable, but I am very tired, and in reality I suffer a great deal. My uncertainty as to the immediate future weighs upon me. Shall I give up the idea of wandering abroad or not? Is it wise to accept the offer of the Opera Direction (to compose an opera in one act and a ballet, for the season 1891-92)? My brain is empty; I have not the least pleasure in work. "Hamlet" ² oppresses me terribly.'

About the middle of January he retired to Frolovskoe, and cancelled his engagements in Mainz, Buda-Pest and Frankfort. It was not only the composition of 'Hamlet' which caused him to give up these concerts; at this time he was suffering from an affection of the right hand, and conducting was a matter of difficulty. But when a pressing invitation to visit America reached him in his solitude, Tchaikovsky replied accepting the offer. He had already promised the Direction of the Imperial Opera an opera on the subject of Herz's play, 'King René's Daughter,' and a ballet, 'Casse-Noisette' ('The Nut-cracker'). Neither of these subjects stirred him to enthusiasm like 'Pique-Dame' and 'The Sleeping Beauty,' and he was filled with misgivings as to the possibility of composing so much in the time at his disposal.

Early in March he left Frolovskoe for Paris, where he was to conduct one of the Colonne Concerts on Apr. 5. He was wretchedly homesick, and his brother Modeste, who joined him in Paris on Mar. 22, was unfavourably impressed by his mental and physical condition:

¹ 'Do not forget, and think of me sometimes.'

² Incidental music to the tragedy for Guitry's benefit.

'A chilling and gloomy look, his cheeks flushed with excitement, a bitter smile on his lips—this is how I shall always remember Peter Ilich during that visit to Paris.'

The success of the concert, which consisted entirely of his own works, did not soothe his acute nostalgia, or console him for his over-fatigue. Worse troubles were in store for him. On Apr. 9 Modeste Tchaikovsky received a telegram announcing the death of their sister Alexandra Davidov. Through all the early troubled years of the composer's life she had been his chief moral support and comfort; her affection, and that of Nadejda von Meck, had sustained him in times of dejection and physical suffering. Modeste Tchaikovsky hastened to Rouen, where his brother was taking a few days' rest before embarking at Havre for New York. Knowing that the news of his sister's death would be a crushing blow to Peter Ilich, and that it was too late to put off his journey to America, Modeste resolved to let him go in ignorance of the sad event. Unfortunately Tchaikovsky was no sooner left alone in Rouen than he resolved to return to Paris for a day or two, to distract his anxiety as to the approaching journey. There, in a reading-room, he picked up the *Novoe Vremya* and learnt the melancholy truth. 'For God's sake, send all details to New York,' he wrote in his last letter of farewell. 'To-day, even more than yesterday, I feel the absolute impossibility of depicting in music the "Sugar-plum Fairy."'

Tchaikovsky sailed from Havre on Apr. 18, 1891, and landed in New York on the 27th. On the voyage, and during the whole of his American visit, he kept a bright and entertaining journal of his experiences. He conducted six concerts in America: four in New York, one in Baltimore and one in Philadelphia. The works performed were: (1) The Coronation March, (2) the third suite, (3) two sacred choruses—The Lord's Prayer and The Legend, (4) the pianoforte concerto No. 1 and (5) the serenade for strings. Everywhere he met with 'unprecedented success,' and the Press notices were mostly written 'in a tone of unqualified praise.' By the end of May he was back in St. Petersburg.

As Frolovskoe was becoming rapidly denuded of its forests, Tchaikovsky returned for the summer to Maidanovo. Here he completed the 'Casse-Noisette' ballet and the opera 'King René's Daughter' (afterwards called 'Iolanthe'); the remodelling of his sextet and the instrumentation of a symphonic poem, 'The Voyevode,' also engaged him during these months. At this time his health was good, and he enjoyed the society of his old friend Hermann Laroche, who paid him a long visit during the autumn. His correspondence with concert agents, publishers and all kinds of applicants had become a burden to him; and although his earnings were considerable, his generosity more than

kept pace with his income, so that he was often short of funds. Undoubtedly he had aged prematurely, and looked at this time far more than his years. All these things probably conduced to the mood of melancholy and discontent reflected in his correspondence. Late in October he went to Moscow to be present at the first performance of 'The Queen of Spades,' and to conduct 'The Voyevode' at Siloti's concert. The work made little impression on the audience, and this fact, added to some rather hasty critical remarks by Taneiev, so annoyed Tchaikovsky that he is said to have torn up the score. The fragments, however, were carefully preserved by Siloti, and after the composer's death the symphonic poem was reconstructed, and had considerable success under Nikisch and other conductors.

On Dec. 29 Tchaikovsky left Moscow on a concert tour, visiting Kiev and Warsaw before going to Germany. At Warsaw, where he arrived about the middle of January, he was overcome by that despairing home-sickness which towards the close of life attacked him whenever he left Russia. From Warsaw he went *via* Berlin to Hamburg to be present at the first performance of 'Eugen Oniegin,' conducted by Gustav Mahler. In consequence, however, of his increasing depression, he abandoned the concerts for which he was engaged in Holland, and returned to Maidanovo after a short visit to Paris. On Mar. 19 he travelled to St. Petersburg to conduct his 'Romeo and Juliet' overture and the first performance of the 'Casse-Noisette' suite. The latter was received with immense enthusiasm, five out of the six movements having to be repeated.

At this time Tchaikovsky moved into another new home, destined, however, to be his last. The house stood on the outskirts of the little town of Klin, and was surrounded by fields and woods. It was simple and far from picturesque, but it suited the composer's modest tastes. After Tchaikovsky's death it was bought by his servant Alexis Safronov and repurchased in 1897 by Modeste Tchaikovsky and his nephew Vladimir Davidov. All relics and documents connected with the composer were preserved there.

In the summer of 1892, after a short cure at Vichy, he returned directly to Klin to work upon a new symphony—the sixth—which he was anxious to complete by the end of August. At the same time he began also to busy himself with the correction of his compositions and the revision of the pianoforte arrangements of them. The vast accumulation of proof-correcting weighed heavily upon him. 'Even in dreams,' he wrote to his nephew, Vladimir Davidov, 'I see corrections, and flats and sharps that refuse to do what they are ordered.' His psychological condition was at this time rather peculiar. Since he first took up the baton in 1887 the

number and importance of his touring engagements steadily increased. Every journey cost him agonies of home-sickness, and he vowed it should be the last. Yet no sooner was he home again than he began to plan for the next tour. 'It seemed as though he had become the victim of some blind force which drove him hither and thither at will,' says Modeste Tchaikovsky. . . .

'This mysterious force had its origin in an inexplicable, restless, despondent condition of mind, which sought appeasement in any kind of distraction. I cannot explain it as a premonition of his approaching death; there are no grounds whatever for such a supposition. . . . I will only call attention to the fact that he passed through a similar phase before every decisive change in his life. As at the beginning of the sixties, when he chose a musical career, and in 1885 when he resolved "to show himself in the eyes of the world," so also at this juncture we are conscious of a feeling *that things could not have gone on much longer*; we feel ourselves on the brink of a change, as though something had come to an end and was about to give place to a new and unknown presence. His death, which came to solve the problem, seemed fortuitous—yet I cannot shake off the impression that the years 1892 and 1893 were the dark harbingers of a new and serener epoch.'

In the summer of this year (1892) he was invited to conduct a concert at the Vienna Exhibition, and gladly availed himself of the chance of overcoming the unfriendly attitude of the Viennese, due chiefly to Hanslick's influence. On his arrival he found that the concert was to be given in what was practically a restaurant, amid the rattling of knives and plates, and the fumes of beer and tobacco. Thereupon the composer refused to fulfil his contract until the tables had been moved and the room converted into something more resembling a concert-hall. From Vienna he went to be the guest of Madame Sophie Menter at the Castle of Itter, in Tyrol, and afterwards to Salzburg and Prague to be present at the first performance of 'The Queen of Spades' in the Bohemian capital. Early in November he had to be in St. Petersburg to superintend the rehearsals for the new opera 'Iolanthe.' Two honours were now conferred upon him: he was elected a Corresponding Member of the French Academy, and the University of Cambridge invited him to accept the degree of Doctor of Music, *honoris causa*.

On Dec. 17 'Iolanthe' and the 'Casse-Noisette' ballet were performed at the Opera-house in the presence of the Emperor and the court. The opera was conducted by Napravnik, but in spite of an admirable interpretation it met with a mere complimentary success. Nor has it, like some of Tchaikovsky's works, grown in popularity. The ballet, too, was a momentary disappointment; its unconventional treatment and the delicate charm of the musical ideas did not appeal to the public on a first hearing.

Early in January 1893 Tchaikovsky visited Brussels and Paris, and travelled homewards by way of Odessa, where for a whole fortnight he was the object of such ovations as eclipsed

all previous receptions at home and abroad. The year opened with a period of cheerfulness and serenity for which the sixth, so-called 'Pathetic,' symphony seems partly accountable. Modeste Tchaikovsky speaks of this work as 'an act of exorcism,' whereby his brother cast out all the dark spirits which had possessed him in the preceding years. The first mention of the symphony occurs in a letter to the composer's brother Anatole, dated Feb. 22, 1893. The following day he wrote a more detailed account to his nephew Vladimir Davidov, to whom eventually the work was dedicated:

'I must tell you how happy I am about my work. As you know, I destroyed a symphony which I had partly composed and orchestrated in the autumn. I did wisely, for it contained little that was really fine—an empty pattern of sounds without any inspiration. Just as I was starting on my journey (the visit to Paris in Dec. 1892), the idea came to me for a new symphony. This time with a programme; but a programme of a kind which remains an enigma to all—let them guess it who can. The work will be entitled "A Programme Symphony" (No. 6). This programme is penetrated by subjective sentiment. During my journey, while composing it in my mind, I frequently shed tears. Now I am home again I have settled down to sketch out the work, and it goes with such ardour that in less than four days I have completed the first movement, while the rest of the Symphony is clearly outlined in my head. There will be much that is novel as regards form in this work. For instance, the finale will not be a great Allegro, but an Adagio of considerable dimensions. You cannot imagine what joy I feel at the conviction that my day is not yet over, and that I may still accomplish much. Perhaps I may be mistaken, but it does not seem likely. Do not speak of this to any one but Modeste.'

The happier mood of this year was not proof against the old malady of nostalgia and restlessness. On May 29 Tchaikovsky arrived in London in a phase of the darkest depression and misanthropy, which does not seem to have been suspected by those who saw him at the time. In a letter to Vladimir Davidov he says:

'I suffer, not only from torments that cannot be put into words (there is one place in the sixth symphony where they seem to me to be adequately expressed), but of a hatred to strangers, and an indefinable terror—though of what, the devil only knows.'

This season the London Philharmonic Society gave two concerts at which the foreign composers, recipients of the honorary degree at Cambridge, were invited to conduct compositions of their own. At the first of these, on June 1, Tchaikovsky was represented by his fourth symphony, which appears to have been a brilliant success. The festivities at Cambridge—in honour of the Jubilee of the University Musical Society—began on June 12, with a concert, the programme of which contained a work by each of the five doctors of music *honoris causa*: Boito, Saint-Saëns, Max Bruch, Tchaikovsky and Grieg (the last of whom was unable to be present on account of illness). For this concert Tchaikovsky chose his symphonic poem 'Francesca da Rimini.' The day after the ceremony he left for Paris, whence

he wrote in a characteristic mood to his old friend Konradi :

'Now that all is over it is pleasant to look back on my visit to England, and to remember the extraordinary cordiality shown to me everywhere, although, in consequence of my peculiar temperament, while there, I tormented and worried myself to fiddle-strings.'

'No sooner was he back in Klin than he returned to work upon the sixth symphony, completing it by the end of August, after which he started, in excellent spirits, for a flying visit to Hamburg. That he had the highest opinion of his new symphony is evident from his correspondence at this time, especially from a letter to the Grand Duke Constantine Constantinovich, in which he says: 'Without exaggeration I have put my whole soul into this work.' Tchaikovsky left Klin on Oct. 19 for the last time. As the train passed the village of Frolovskoe he pointed to the churchyard, remarking to his fellow-travellers: 'I shall be buried there, and people will point out my grave as they go by.' The following day he attended the memorial service for his friend Zvierev in Moscow, and spoke to Taneiev of his wish to be buried at Frolovskoe. These two references to death were probably prompted by the melancholy occasion, for otherwise he showed no signs of depression or foreboding.

Tchaikovsky arrived in St. Petersburg on Oct. 22, and was met by his brother Modeste and his favourite nephew Vladimir Davidov. The rehearsals of the sixth symphony discouraged him, because it made so little impression on the band, and he was afraid lest their coldness would mar the interpretation of the work. But his opinion that 'it was the best thing he ever had composed, or ever should compose,' was not shaken by the indifferent attitude of the musicians. He did not, however, succeed in impressing this view on the public or the performers. At the concert on Oct. 28 the work fell rather flat. A few weeks later, under Napravnik's conductorship, it made a profound sensation, since repeated in many other cities. The following day, before sending the score to his publisher, P. Jurgenson, he decided to give the symphony some distinctive title. Various names were suggested by his brother, from which he selected the qualification 'pathetic.' Afterwards he changed his mind, and desired Jurgenson, if it were not too late, merely to put this inscription on the title-page :

TO VLADIMIR LVOVICH
DAVIDOV
(No. 6.)
COMPOSED BY P. TCHAIKOVSKY.

During the last days of his life his mood was fairly equable. There was nothing which gave the least hint of his approaching end. On the evening of Oct. 31 he went to bed well and serene. The following day he complained of his digestion being upset and of a sleepless

night, but refused to see a doctor. He joined his nephew and Modeste Tchaikovsky at lunch and, although he declined to eat anything, he drank a copious draught of water which had not been boiled. The others were dismayed by his imprudence, but he assured them he had no dread of cholera. All day his indisposition increased, until at night his brother, in alarm, sent for the eminent physician Bertenson. Tchaikovsky was rapidly growing weaker, and remarked more than once: 'I believe this is death.' Bertenson sent for his equally famous brother, and after a consultation they pronounced it to be a case of cholera. The next day his condition seemed more hopeful, but on Saturday, Nov. 4, his mental depression returned, and he begged those around him to waste no more time on useless remedies. Gradually he passed into a state of collapse. Sometimes he wandered in his mind, and repeated the name of Nadejda von Meek in accents of indignation or reproach. By the time his old servant had arrived from Klin Tchaikovsky was unable to recognise him. At 3 A.M. on the morning of Nov. 6 (Oct. 25), 1893, he passed away in the presence of his brothers Nicholas and Modeste, his nephews Litke, Buxhövdén and Davidov, the two Bertensons, the district doctor and Alexis Safronov. Several sensational accounts of the composer's end have been widely circulated, and received credence, but in view of the medical opinions, clearly expressed, and the numerous trustworthy witnesses of his last days, the foregoing account may be accepted as authentic.

QUALITIES OF THE COMPOSER

In reviewing Tchaikovsky's career as a whole we are struck by the absence of salient landmarks and clearly defined points of fresh departure. The customary and convenient division of a master's work into distinct 'periods' is impossible in his case. His progress was seldom on a straight line. In his brother's words, 'he moved in spiral convolutions.' His constant fluctuations between old and new forms of expression seems to argue a lack of strong intellectual conviction. In his orchestral music he alternated from first to last between traditional symphony and the freer forms of programme music; while in opera he sometimes left the purely lyrical forms which suited him best to experiment with declamatory drama, as in 'The Enchantress.' As regards symphonic music, his predilection seems to have been for classic form, for while engaged on 'Manfred'—which dates, however, as late as 1885—he wrote to Taneiev that he much preferred to compose without any definite literary basis. 'When I write a programme symphony,' he says, 'I always feel I am not paying in sterling coin, but in worthless paper money.' Yet 'Manfred' had two successors in the sphere

of programme music,—the overture-fantasia 'Hamlet' and the symphonic ballad 'The Voyevode.' The fact that Tchaikovsky's progress was based upon impulse rather than upon intellectual conviction is, I think, the clue to the understanding of all his charm and his weakness. It lends the fascination of the *imprévu* to the study of his works. He never forced his thoughts and feelings into a mould merely from compliance with the demands of traditional form; and although—having tarried too long in dilettante circles—he ended by preaching that a 'professional' musician should not shrink from the conscientious fulfilment of any commission imposed upon him, as a matter of fact, thanks to his enthusiastic and not too critical temperament, he wrote very little which had not actually the sanction of his inner feelings. He had, to a great extent, the powers of adaptation and assimilation peculiar to Russians; and if he lost in concentration thereby, he certainly gained in range and variety of accomplishment. It is this sincere response to emotional impulse, and the freedom with which he ranges almost every field of musical creation, which make Tchaikovsky as great as he is. At the same time, when we come to estimate his place in the history of music, we cannot forget that a more logical continuity of development, closer concentration, more searching self-criticism, more ruthless elimination of all that is merely facile and sentimental, have always been the characteristics of supreme genius. If this judgment appears somewhat paradoxical, it results from the fact that Tchaikovsky himself is one of the most striking of musical paradoxes.

An artist's earliest musical impressions are rarely obliterated in his after-career. Much has been written as to Tchaikovsky's right to be termed a national composer. In the more exclusive sense of the word he was not one of the Levites of national music. This is obvious from the beginning. While Glinka, Rimsky-Korsakov, Balakirev and Moussorgsky started life saturated with the folk-music, Tchaikovsky tells us that his unchanging affection for Mozart and the Italian school dated from his 6th year. There is no mention of his having imbibed the music of the people in his cradle, but undoubtedly he came to know it and employ it in later years—as an acquirement, not as an integral part of his nature. He was 23, and his musical tastes in many ways quite formed, before he came into contact with the music of Bach and Beethoven. On the other hand, he had frequented the Italian opera at a much earlier age. Therefore it is not surprising that he never ceased to blend with the melody of his own race an echo of the sensuous beauty of the south. Perhaps, indeed, it would be truer to say that in much of his music it is the racial element which is the echo, and the cosmo-

politan element which forms the actual basis of his inspiration. This may be said without reproach to Tchaikovsky's patriotism. To read his letters is to understand that he had no home but Russia. The ideals of the world save themselves from extermination by assuming strange disguises, and we have every reason to be grateful that at a moment when Wagner and Brahms were the paramount influences in music, a belated Russian youth, knowing nothing of either, caught up all that was most gracious and ideally beautiful not only in the Italian school, but, above all, in the music of Mozart. The tenderness and radiance of the latter shine through the darkness of Tchaikovsky's innate pessimism; while as regards the Italian influence it is one of the secrets of the quick and popular appeal of his music. Lest it should be thought that I exaggerate the importance of the Italian element, I refer those who only know his later works to his early operas, 'The Voyevode' and 'The Oprichnik.' The latter, based upon a historical and national subject, suffered greatly from this incongruous and crude combination of Russian and Italian elements. They had not as yet had time to fuse into that wonderfully penetrating, glowing and moving language of the emotions which speaks from the later symphonies and symphonic poems. We often hear it said: 'None but a Russian could have written the Pathetic Symphony.' This may be easily conceded. But only a Russian, penetrated like Tchaikovsky by a strong strain of Italian sensationalism and sensuousness, could have arrayed its funereal gloom in such ample folds of purple, and perfumed its odour of mortality with such subtle blends of incense. What underlies a great part of the symphony is the almost intolerable realisation of death and the futility of human achievements; what draws the crowd to hear it time after time is its attractive luxury of woe.

THE OPERAS.—In his opera 'Oxana's Caprice,' founded upon Gogol's tale 'Christmas Eve Revels,' Tchaikovsky found a subject which might have led him entirely away from the form and spirit of conventional Italian opera. This work dates from the early 'seventies, a time at which he came under the influence of Balakirev and Stassov, and passed through a mild phase of ultra-nationalism and what was then ultra-modernism. The second symphony and the symphonic poems 'Romeo and Juliet,' 'The Tempest' and 'Francesca da Rimini' were more or less the direct outcome of these new influences. The opera 'Oxana's Caprice' belongs also to this period. But this work must be reckoned one of the least successful of his operas. The more modern and realistic style which he here strove to assume hangs upon him too obviously like a borrowed garment, and his limited fund of subdued and

whimsical humour, so charmingly displayed in the 'Casse-Noisette' suite, could hardly keep pace with Gogol's robust and racy wit. The comparative failure of this work was only a momentary check to his operatic ambition. It is evident that his friend Nadejda von Meck, who had no faith in the future of the opera in general, more than once hinted that his gifts might be more profitably applied to purely instrumental music. To this he replied that opera increased the circle of a composer's hearers in a degree impossible to symphonic art. He writes :

'To refrain from writing operas is the act of a hero, and we have only one such hero in our time—Brahms. Such heroism is not for me. The stage, with all its glitter, attracts me irresistibly.'

So, within two years of the failure of 'Oxana's Caprice,' we find him absorbed in the composition of 'Eugen Oniegin.' As with so many of his operatic subjects, he was so completely enamoured of Poushkin's poem as to be blind to all its practical difficulties. But this time his instinct served him well. The delicate, poetic realism, the elegiac sentiment, and, above all, the intensely subjective character of this novel in verse, were so completely in harmony with his temperament that he was able to triumph over all minor drawbacks. The result was his first really popular work for the stage. Tchaikovsky himself was careful not to call this unique creation an opera. 'Lyric scenes' describes more accurately a work of art which in many ways defies criticism as completely as it eludes classification. It answers to no particular standard of dramatic truth; its weaknesses are many, and its absurdities not a few. Yet to all emotional natures it makes an irresistible appeal, for the music is as much a part of the touching, old-world story as the perfume is a part of the flower which exhales it. It was not surprising that in Russia, where Poushkin's poem holds a permanent place in the hearts of the cultivated classes, Tchaikovsky's opera soon rivalled Glinka's 'A Life for the Tsar' in the popular favour. We must not judge this work as the composer's greatest and most strenuous effort, but as the outcome of a passionate, single-hearted impulse. Consequently the sense of joy in creation, of perfect reconciliation with his subject, is conveyed in every bar of the music. 'Eugen Oniegin' is the child of Tchaikovsky's fancy; born of his passing love for the image of Tatiana and tinged throughout with those moods of romantic melancholy and tender sentiment which the composer and his heroine share in common.

Twelve months after the completion of 'Eugen Oniegin' we find Tchaikovsky writing :

'The idea of "The Maid of Orleans" has taken furious possession of me. I want to finish the whole work in an hour, as sometimes happens in a dream.'

Looking through the score with eyes more

coolly critical than the composer's, we now see that, in spite of effective moments, the music of this opera displays in abundance all those weaknesses which were the result of Tchaikovsky's unsettled convictions as regards style. The transition from a subject so Russian in colour and so lyrical in sentiment as 'Eugen Oniegin' to one so universal and so epic in character as 'The Maid of Orleans' presented difficulties which only time and reflexion could have successfully overcome. But Tchaikovsky threw off two-thirds of this opera in a little over a fortnight, and the natural result of this blind haste is that much of the music has the patchiness and lack of coherence of an improvisation. Just as the national significance of 'The Oprichnik' suffers from moments of purely Italian influence, so 'Joan of Arc' moves at times in an incongruously Russian atmosphere. Tchaikovsky started upon his sixth opera, 'Mazeppa,' without any of the fervent enthusiasm which carried him through his two preceding works. Although 'Mazeppa' failed to win immediate success, it has shown greater staying power than many of Tchaikovsky's earlier operas, and still holds a place in the repertory of the capitals and provincial cities of Russia. It contains some of the composer's most inspired and forcible pages. 'The Enchantress,' which followed in 1887, only serves to show that the further Tchaikovsky strayed from lyric forms in opera, the less satisfactory were the results. We may presume he realised this at last, for in 'Pique-Dame' and his last opera, 'Iolanthe,' he returns in a great measure to purely lyrical methods. 'Pique-Dame,' which now vies in popularity with 'Eugen Oniegin,' is perhaps the most successful of all his works for the stage, and the one most interesting to a foreign audience. We may sum up Tchaikovsky's operatic development as follows: Beginning with conventional Italian forms, he passed on in 'Oxana's Caprice' to more modern methods, to the use of melodic recitative and arioso; while 'Eugen Oniegin' shows a combination of both these styles. This first period is purely *lyrical*. Afterwards, in 'The Maid of Orleans,' 'Mazeppa' and 'The Enchantress,' he passed through a second period of *dramatic* and *declamatory* tendency. With 'Pique-Dame' he reaches the climax of his operatic progress; but this work is the solitary example of a period which may be characterised as *lyrico-dramatic*. In 'Iolanthe' he returns to simple lyric forms.

Of Tchaikovsky's eight operas, two only have so far achieved popular success—'Eugen Oniegin' and 'The Queen of Spades.' The others have enjoyed in varying degrees the negative triumphs of a *succès d'estime*. The choice of libretti may have had something to do with this; for the books of 'The Oprichnik'

and 'Mazeppa,' though dramatic, are exceedingly lugubrious. But Polonsky's charming text to 'Cherevichek' ('Oxana's Caprice') should at least have pleased a Russian audience.

We must find another reason for the comparative failure of so many of Tchaikovsky's operas. It was not so much that the subjects he chose were poor in themselves, as that they did not always suit the particular temperament of the composer; and he rarely took this important fact sufficiently into consideration. Tchaikovsky's outlook was essentially subjective, individual, particular. He himself knew very well what was requisite for the creation of a great and effective opera: 'breadth, simplicity and an eye to decorative effect,' as he says in a letter to a friend. But it was exactly in these qualities, which would have enabled him to treat such subjects as 'The Oprichnik,' 'The Maid of Orleans' and 'Mazeppa' with greater power and freedom, that the composer was lacking. Tchaikovsky had great difficulty in escaping from his intensely emotional personality, and in viewing life through any eyes but his own. Now opera, above all, cannot be 'a one-man piece.' For its successful realisation it demands breadth of conception, variety of sentiment and sympathy, powers of subtle adaptability to all kinds of situations and emotions other than our own. In short, opera is the one form of musical art in which the objective outlook is indispensable. Of Tchaikovsky's operas, the two which seem destined to live longest are those into which he was able, by the nature of their literary contents, to infuse most of his own temperament and lyrical inspiration; but they are not masterpieces of lyric opera.

SYMPHONIC WORKS.—Although it is remarkable that Tchaikovsky constantly alternated between the symphonic poem and the symphony, his progress in the latter form was fairly logical and continuous. Omitting the first ('Winter Day-dreams') as standing essentially apart from the rest, each of his symphonies shows a steady advance on its predecessor. A few critics have ranked the fifth above the sixth, but this opinion is probably the reaction which follows upon satiety, and is hardly likely to be the verdict of posterity. Individually each symphony has its own definite character and colour-scheme, and reflects the prevailing influence under which it was written. The second ('Little-Russian') shows the composer strongly dominated by national tendencies. The third is clearly a reaction from exclusive nationalism, and is tinged throughout by his increasing eclecticism, and particularly by his newly awakened enthusiasm for Schumann. The fourth, which was almost contemporary with 'Eugen Onegin,' is remarkable for its brighter qualities and gleams of unwonted humour. Written during a time of profound

mental depression, it is something of a psychological paradox, and, like Beethoven's second symphony, might be described as 'a heroic falsehood.' The fifth has touches of religious sentiment—in the Choral-like introduction to the second movement and the *Andante maestoso* which precedes the finale—that are lacking in all the others. In the sixth, Tchaikovsky has concentrated the brooding melancholy which is the most characteristic and recurrent of all his emotional phases. Tchaikovsky never carried out his intention of writing down the programme of this symphony, but he tells us that 'it is penetrated by subjective sentiment.' The overwhelming energy of the third movement and the abysmal sorrow of the finale seem, however, to express something more than personal apprehension and despair. The last movement is calamitous rather than 'pathetic,' and truly Elizabethan in the intensity of its tragic significance. It voices 'une lamentation large et souffrance inconnue.' This latest inspiration of Tchaikovsky's will always remain the most profoundly moving of all his works, because it ponders one of the great preoccupations of all ages,—the impenetrable mystery of death and futility of all human speculation.

Of the works avowedly composed upon a literary basis, three stand out as worthy to rank with the fifth and sixth symphonies: the vigorous and picturesque orchestral fantasia 'The Tempest'; the overture 'Romeo and Juliet,' suggested by Balakirev and carried out with such ardent conviction that the work seems to glow and throb with youthful passion and tenderness; and the orchestral fantasia 'Francesca da Rimini,' one of those fateful and poignant subjects so perfectly adapted to Tchaikovsky's temperament that he has made of it the most poetical and beautiful of all his examples of programme music.

Tchaikovsky's orchestral suites count among his most popular works. They show off his masterly orchestration more completely perhaps than any of his compositions. The third, in G major, which ends with the well-known air and variations, although not more richly scored than the second (op. 53), is far the better of the two as regards thematic material. The fourth is constructed upon certain themes borrowed from his favourite composer, Mozart, and is appropriately scored for a small orchestra, without trombones. The 'Casse-Noisette' suite (op. 71a) is, however, his *chef-d'œuvre* as regards charm and novelty of instrumentation. It has conveyed a lesson which is both useful and dangerous; that musical ideas which have no pretensions to sublimity may be made exceedingly fascinating by means of brilliant orchestration and piquant accessories. In this work Tchaikovsky employed the celesta for the first time, and we must give him credit for an innovation which now threatens to become as

great a commonplace of orchestration as the xylophone. While speaking of Tchaikovsky's instrumentation, mention must be made of the Italian Capriccio, a work of unshadowed gaiety and abounding in striking effects.

The greater part of Tchaikovsky's compositions for piano were written to order, and show very little inspiration or even ingenuity. Unlike most Russian composers he had no special mastery of pianoforte technique, such as makes the works of Balakirev, Liadov and Stcherbatchev acceptable to virtuosi. His single pianoforte sonata is heavy in material and in treatment, and cannot be reckoned a fine example of its kind. A few of his fugitive pieces are agreeable, and the variations in F show that at the time of their composition he must have been interested in thematic development, but the world would not be much the poorer for the loss of all that he has written for piano solo. In combination with other instruments, however, he rises to a much higher level in his handling of the pianoforte. His first pianoforte concerto, composed in 1874, was very severely handled by Nicholas Rubinstein. Von Bülow, on the other hand, pronounced it 'perfect and mature in form, and full of style—in the sense that the intentions and craftsmanship are everywhere concealed.' In after years Tchaikovsky must have concurred with Rubinstein's opinion that the solo part was capable of considerable improvement, and the brilliant 'duel between piano and orchestra,' now so popular with pianists, is the completely revised version of 1889. The second concerto, in G major, is a sound piece of workmanship, more conventional in form than its predecessor, but not to be compared with it as regards the interest of its thematic material, or those qualities of warmth and pulsing vitality which carry us away in the B flat minor concerto.

CHAMBER MUSIC.—Kashkin, in his reminiscences of Tchaikovsky, tells us that the latter knew very little chamber music in his early years, and that the timbre of the string quartet was absolutely distasteful to him. He soon modified this opinion, however, and wrote his first string quartet, in D major, in 1871. It is a clear, perfectly accessible work, which shows the composer in one of his sanest and tenderest moods. The lovely folk-song on which the slow movement is built has largely contributed to the popularity of this quartet. Tchaikovsky followed it up by two others, belonging respectively to the years 1873 and 1876. The second quartet, in F, betrays the orchestral composer in its solidity of structure and straining after too weighty effects. The finale, in rondo form, is an interesting and vigorous movement. The third quartet, in E flat minor, dedicated to the memory of the violinist Laub, is undoubtedly the finest work of the three, both as regards mastery of form and the quality of the musical

ideas. In its emotional mood it is distinctly akin to the sixth symphony and the pianoforte trio. It leaves us with the conviction that had he cared to persevere with the string quartet as persistently as with the symphony, he might have achieved increasingly fine results. For a long time Tchaikovsky resisted the entreaties of Nadejda von Meck to compose a pianoforte trio, assuring her that it was torture to him to have to listen to the combination of the piano with violin and violoncello. But the day came when—as with the string quartet—he relinquished this prejudice and wrote his pianoforte trio (op. 50) 'in memory of a great artist'—Nicholas Rubinstein. In the second movement of this work appear the twelve variations which embody Tchaikovsky's memories of Rubinstein and his musical characteristics at various periods of his life. In spite of its great length, the trio never wearies us in the hands of artists who know how to bring out its depth of feeling and endless variety of effects. Tchaikovsky is always profoundly touching in his elegiac vein, and this trio is worthy to rank among the loveliest of musical laments. Another work belonging to the category of chamber music, but totally different in character, is the sextet for strings, op. 70. It was completely revised before its publication in 1892, and it is a pity that it is so seldom heard, for, like the Italian Capriccio, it is written in one of the composer's rare veins of happiness and serenity.

SONGS.—Tchaikovsky was a prolific songwriter, and left in all about 107 songs. Of these, a comparatively small portion are really of fine quality. The chief defect of his instrumental writing—the repetition and development *ad nauseam* of an idea which is too thin to bear such over-elaboration—is even more obvious in his songs. Another, and even more radical defect, springs from an indiscriminate choice of words. This want of respect for the relationship between music and fine verse leads to an irritating trick of interrupting his phrases by frequent and unnecessary pauses. Tchaikovsky was a gifted melodist, and some of his cantilenas are remarkable for their beauty and touching qualities. His songs, moreover, are eminently vocal, and usually end in a showy climax that endears them to the singer's heart. As regards harmony, they are generally interesting, but not so strikingly original in this respect as those of Borodin and Rimsky-Korsakov. Another fault—though some consider it an added fascination—is the monotonous vein of sentimental melancholy which runs through about two-thirds of Tchaikovsky's songs. But notwithstanding these deprecatory remarks, which apply more particularly to his earlier songs, it is not difficult to pick out a good number which show the master hand. There are also many potentially fine songs in spite of their imperfections of form, and a whole group of songs that

we love in spite of their faults, because when we hear them they take our emotions by storm. In the first category I should place the 'Modern Greek Song,' founded on a mediæval *Dies Irae* and treated with consummate skill. As specimens of intensity of emotion few of his songs equal 'The Dread Moment' (op. 28) and 'Day reigns' ('Only for thee'); in the first we have the utterance of despairing passion, in the second the exultation and fervour of love crying aloud for recognition and fulfilment. In complete emotional contrast to these are the 'Slumber Song' (op. 16)—the words of which are a Russian version by Maikov of a Greek folk-poem—which is remarkable for tender and restrained sentiment, and 'Don Juan's Serenade' (op. 38), a dashing song, with a characteristic *ritornelle*. Tchaikovsky has been very happily inspired by the verses of Count Alexis Tolstoi, who wrote the text of his popular song 'A Ballroom Meeting,' in which the music, with its languid valse rhythm, reflects so subtly the paradoxical musings of the lover, vaguely captivated by a vision of radiant beauty that may signify 'woe or delight.' In op. 54, *Sixteen Songs for Children*, the 'tearful minor' is less conspicuous and the majority of the songs has an echo of national melody. It is impossible to deny the charm, the penetrating sweetness and sadness and the vocal excellence of many of Tchaikovsky's songs. At the same time, if we compare him with Schubert or Schumann, with Brahms or Hugo Wolf—or even with his own countrymen Dargomijsky and Balakirev—it is equally impossible to place him in the front rank of song-writers.

The time of prejudice against Tchaikovsky's music on the ground of its national peculiarities has long since gone by; at least in this country, where his reception has always been more enthusiastic than critical. As regards its powers of endurance, the prophetic spirit is hardly needed in order to foresee the waning popularity of a few of his works which have run a course of sensational success. The world is growing weary of the overture '1812,' and perhaps also of the evanescent charms of 'The Chinese Dance' and the 'Sugar-plum Fairy.' But it would be a rash critic who would venture to set a term for the total extinction of such of Tchaikovsky's symphonic and operatic music as bears the full impress of his individuality. There is enough fire, human and divine, in such works as the four later symphonies, the overture 'Romeo and Juliet,' 'Francesca da Rimini,' the piano-forte concerto in B flat minor, the third string quartet, and the operas 'Eugen Oniegin' and 'Pique-Dame' to ensure them a long lease of life. If Tchaikovsky does not bear a supreme message to the world, he has many things to say which are of the greatest interest to humanity, and he says them with such warmth and intimate feeling that they seem less a revela-

tion than an unexpected effluence from our own innermost being. His music, with its strange combination of the sublime and the platitudinous, will always touch the average hearer, to whom music is—and ever will be—more a matter of feeling than of thought. Therefore, if we must pose the inevitable question—How long will Tchaikovsky's music survive?—we can but make the obvious reply: As long as the world holds temperaments akin to his own: as long as pessimism and torturing doubt overshadow mortal hearts who find their cry re-echoed in the intensely subjective, deeply human music of this poet who weeps as he sings, and embodies so much of the spirit of his age; its weariness, its disenchantment, its vibrant sympathy and morbid regretfulness.

LIST OF TCHAIKOVSKY'S WORKS

- Op.
1. Two Pianoforte Pieces (Russian Scherzo, and Impromptu).
2. Three Pianoforte Pieces (Souvenir de Hapsal).
3. Fragments of Opera, 'The Voyevode.'
4. Valse Caprice in D for pianoforte.
5. Romance in F minor for pianoforte.
6. Six Songs.
7. Valse Scherzo (A major) for pianoforte.
8. Capriccio (G flat) for pianoforte.
9. Three Pianoforte Pieces (Réverie, Polka, Mazurka).
10. Two Pianoforte Pieces (Nocturne and Humoresque).
11. Quartet No. 1 (D major) for strings.
12. Music to Ostrovsky's 'Sniegourochka' ('The Snow-Maiden).
13. Symphony No. 1 in G minor ('Winter Day-Dreams').
14. 'Vakhtang the Smith' (also known as 'Cherevichik and 'Le Caprice d'Oxane'), opera in three acts.
15. Overture on the Danish National Hymn.
16. Six Songs.
17. Symphony No. 2 in C minor ('Little Russian').
18. Symphonie Fantasia ('The Tempest', for full orchestra).
19. Six Pianoforte Pieces.
20. 'The Swan Lake' (Ballet).
21. Six Pianoforte Pieces.
22. Quartet No. 2 (in F major) for strings.
23. Pianoforte Concerto No. 1 in B♭ minor.
24. 'Eugen Oniegin', opera in three acts.
25. Six Songs.
26. Sérénade mélancolique in B flat minor for violin.
27. Six Songs.
28. Six Songs.
29. Symphony No. 3 (in D major), 'The Polish.'
30. Quartet No. 3 (in E flat minor) for strings.
31. Slavonic March for full orchestra.
32. Symphonie fantastique, 'Francesca da Rimini', for full orchestra.
33. Variations on a Roccoco Theme for violoncello and orchestra.
34. Valse scherzo for violin and orchestra.
35. Concerto for violin and orchestra.
36. Symphony No. 4 (in F minor).
37. Pianoforte Sonata in G major.
- 37a. 'The Months,' Twelve pieces for the pianoforte.
38. Six Songs.
39. Twenty-four easy Pianoforte Pieces (Kinderalbum).
40. Twelve pieces for pianoforte.
41. Liturgy of St. John Chrysostom for four-part mixed choir.
42. 'Souvenir d'un lieu cher,' three pieces for violin with pianoforte accompaniment.
43. First Suite in D major for full orchestra.
44. Pianoforte Concerto No. 2 in G major.
45. Six vocal duets.
46. Seven Songs.
47. Serenade in C major for stringed orchestra.
48. 'The Year 1812,' festival overture for full orchestra.
49. Pianoforte trio in A minor.
50. Six Pianoforte Pieces.
51. Russian service, 'First Vespers,' for four-part choir.
52. Second Suite in C major for full orchestra.
53. Sixteen children's songs with pianoforte accompaniment.
54. Third Suite in G major for full orchestra.
55. Fantasia for Pianoforte and orchestra.
56. Six Songs.
57. 'Manfred,' Symphonie Poem for full orchestra.
58. 'Dumka,' Russian village scene, for pianoforte.
59. Twelve Songs.
60. Fourth Suite, 'Mozartiana,' for full orchestra.
61. 'Pezzo capriccioso' for violoncello with orchestral accompaniment.
62. Six Songs.
63. Symphony No. 5 in E minor.
64. Six Songs to French words.
65. 'Sleeping Beauty' (Ballet in three acts and prologue).
66. 'Hamlet,' Overture fantasia for full orchestra.
- 67a. Incidental music to 'Hamlet.'
68. 'Queen of Spades' ('Pique-Dame'), opera in three acts, and seven scenes.
69. 'Iolanthe,' lyrical opera in one act.
70. 'Souvenir de Florence,' sextet in D minor for strings.
71. 'Casse-Noisette,' Fairy Ballet in two acts and three scenes.
- 72a. 'Casse-Noisette' suite, arranged for orchestra from the above.
72. Eighteen Pianoforte Pieces.

- Op.
73. Six Songs.
74. Symphony No. 6 in B minor, 'The Pathetic,' for full orchestra.
75. Pianoforte Concerto No. 3, in E flat.
76. Overture to Ostrovsky's 'The Storm.'
77. 'Batum,' Symphonic Poem.
78. 'The Voyevode,' Symphonic ballad for full orchestra.
79. Andante and Finale, for pianoforte and orchestra.

WORKS WITHOUT OPUS NUMBERS

- Operas:* 'Undine,' 'Mazeppa,' 'The Oprichnik,' 'Joan of Arc,' 'The Enchantress.'
Orchestral Works: 'Romeo and Juliet,' Symphonic Poem; 'Coronation March'; 'Marche solennelle'; 'Elegy' for stringed orchestra.
Vocal Music: Choruses, 'Moscow,' Cantata, 'Nature and Love,' Hymn in honour of St. Cyril and Methodius, 'Nine Church choruses,' 'The Nightingale,' 'Hommage à A. Rubinstein,' Male Voice Chorus.
Solo: Five Songs.
Duet: 'Romeo and Juliet.'
Quartet: 'Night.'
Pianoforte Music: Three Impromptus.
Pianoforte Music: Valse scherzo, Perpetuum mobile (Weber) for left hand.
Theoretical: Guide to the Study of Harmony. Various literary and critical Essays.

BIBLIOGRAPHY

The Life and Letters of Peter Ilitch Tchaikovsky, by his brother MODESTE TCHAIKOVSKY. Russian edition, 3 vols., P. Jurgenson, Moscow, 1900-02. German edition, 2 vols., P. Jurgenson, Leipzig and Moscow, 1900-02. English edition, translated and edited with a preface by Rosa Newmarch, 1 vol., demy 8vo, John Lane, London and New York, 1906. *Tchaikovsky, His Life and Works*, by ROSA NEWMARCH (embodying most of Kashkin's *Reminiscences*, extracts from the composer's critical writings and the Diary of his Tour Abroad in 1888), Grant Richards, London, 1900. The same book reissued, without the author's co-operation, with additional matter by EDWIN EVANS, William Reeves, 1907. *Tchaikovsky* by E. MARKHAM LEE, M.A., Mus.D., Vol. II. of the *Music of the Masters* series, John Lane, London. These are the chief sources of information in the English language.

R. N.

TCHEREPNIN, (1) NICOLAI NICOLAEVITCH (b. St. Petersburg, May 15, 1873), pianist, conductor and composer, abandoned a legal career to devote himself to music. He entered the Conservatoire of his native city in 1895, his principal studies being pianoforte and composition, the latter under Rimsky-Korsakov, whose influence is obvious in his earlier works. Before leaving the Conservatoire in 1898, he already appeared as pianist and conductor in the Russian capital and provinces. In 1901 he became conductor of the Belaiev Symphony Concerts, and an appointment in a similar capacity at the Marinsky Theatre followed soon afterwards. Tcherepnin was also for a time in charge of the orchestral class at the Conservatoire. In 1908 he went to Paris to conduct Russian opera for the company directed by Sergei Diaghilev, to which he remained attached until 1914, visiting various European capitals. He was in Petrograd 1914-18, at the end of which term he was appointed principal of the Conservatoire at Tiflis. In 1921 he left Russia and settled permanently in Paris.

Tcherepnin's music seems curiously influenced by the outward circumstances of his career. In his early works, where the influence of his master, Rimsky-Korsakov, is uppermost, he scarcely distinguishes himself by any strongly personal characteristics from the numerous eclectic composers of his generation who emerged in considerable numbers from the Conservatoires of St. Petersburg and Moscow. Up to and including the ballet, 'Le Pavillon d'Armide,' his music, though not wanting in technical finish and a certain smooth attractiveness, lacks individuality and a definite æsthetic direction. Such personal features as began to

emerge about this time—the piano concerto in C sharp minor is typical of this period—show a tendency to harden into mannerisms, due to a certain uniformity of inventive resource, especially as regards formal construction. The visit to Paris brought Tcherepnin under French influence, which is particularly apparent in the ballet of 'Narcissus,' a refined and delightful work performed with much success by the Diaghilev company. The composer's return to his native country seems to have awakened, perhaps by way of reaction, his national consciousness, which, it is true, manifests itself to some extent even in the earlier works, such as the charming piano pieces on the Russian alphabet, based on a children's picture-book, which also show his happy gift of pictorial suggestion. But the Russian national note is sounded more strongly in works of the last period, of which the ballet, 'A Russian Fairy Tale,' produced by Anna Pavlova, may serve as a typical example. This work also shows indebtedness to Stravinsky. The latest Ballet (1925), entitled 'The Romance of a Mummy,' is comparatively poor.

Among the works not mentioned above are:

Ballets, 'The Masque of the Red Death' (after Poe), 'The Tale of the Princess Oulgha,' and 'Dionysius'; an early Symphony; a Sinfonietta; symphonic poems, 'Narcissus and Echo' and 'The Enchanted Kingdom'; the 'Witches' Scene from 'Macbeth' for orchestra; an orchestral suite, 'The Enchanted Garden'; Overture to Rostand's 'La Princesse Joïtaine'; Lyric Poem for violin and orchestra; String Quartet in A minor; 2 Masses; and a long series of songs and piano pieces.

His son (2) ALEXANDER NICOLAEVITCH (b. St. Petersburg, Jan. 8 (O.S.), 1899), pianist and composer, studied theory and composition under his father, Liadov, Sokolov and Thomas Alexandrovitch Hartmann, and the piano under Anna Essipov. Precociously gifted, he showed great facility at the piano and composed tentatively from early childhood. His first three works for piano were published by Belaiev when he was still in Russia, but in 1921 he accompanied his father to Paris. There he continued his studies at the Conservatoire, Gédalge being his professor of composition and Philipp giving the final polish to his already brilliant piano-playing. He appears frequently as pianist in Paris and in the French provinces, and has also given recitals in London, Berlin, Vienna and other European centres.

As a composer Alexander Tcherepnin has already proved extraordinarily prolific. At the age of 25 he had between thirty and forty published works to his credit. His music is not free from influences, those of his father and of Prokofiev predominating. His work, however, never falls into the somewhat sentimental lyricism that occasionally mars the former's music, or into the dry angularity that is so characteristic of the latter. It shows an exuberant gift of fantastic invention, tempered by a certain sense of humour and proportion which generally keeps the composer from

inflating small ideas to fill large forms. His most successful works are therefore those on a small scale, especially many of the sets of fanciful and attractive pieces for his own instrument. The larger works, such as the sonatas and the piano concertos, although well made, show less individuality.

Apart from the numerous shorter pieces for piano, Tcherepnin has written:

Two concertos, a sonata and a number of studies for PF.: a sonata for violin and PF.: two for violoncello and PF.: a 'Rapsodie géorgienne' for violoncello and orchestra; a trio for violin, violoncello and PF. in D minor; a 'concerto da camera' for flute, violin and small orchestra; a string quartet; 3 pieces for chamber orchestra; 'O!-O!', an opera in 3 acts; and the ballet, 'The Frescoes of Ajanta,' produced by Anna Pavlova in 1923; unpublished incidental music to Oscar Wilde's *Salome*, Hugo von Hofmannsthal's *Elektra*, Romain Rolland's *L'Esprit triomphant* and Gerhard Hauptmann's *Hannele*.

E. B.

TECHNICON. In the last quarter of the 19th century an American invention obtained some considerable success under this name (Brotherhood's Patent). Besides the keys, made on the pattern of the DIGITORIUM (*q.v.*) there are various appliances for strengthening the *lifting* power of the fingers, and thus helping in the acquirement of muscular control; all the springs can be regulated so as to offer different degrees of resistance. See the *Proceedings of the Mus. Association*, 1888-89, p. 1.

M.

TECHNIPHONE. See VIRGIL PRACTICE CLAVIER.

TEDESCA, ALLA (Italian), 'in the German style.' 'Tedesca' and 'Deutsch' are both derived from an ancient term which appears in mediæval Latin as *Theotisca*. Beethoven employs it twice in his published works—in the first movement of op. 79, the sonatina in G and in the fifth movement of the B \flat quartet (op. 130).

In one of the sketches for this movement (in B \flat) it is inscribed 'Allemande Allegro.'

In a Bagatelle, No. 3 of op. 119, he uses the term in French—'A l'allemande,' but in this case the piece has more affinity to the presto of the sonatina than to the slower movement of the dance. All three are in G. The term 'tedesca,' says Bülow, has reference to waltz rhythm, and invites changes of time. (See TEUTSCHE.)

G.

TE DEUM LAUDAMUS. It is now generally agreed that this great canticle owes its origin to Nicetas, Bishop of Remesiana in Dacia (*fl.* A.D. 400). It soon found an abiding-place in Latin services as the climax of the service of Nocturns or Matins on festivals, and it has been continually utilised separately as an act of thanksgiving on special occasions.

The traditional melody described below is coeval with the words, and indeed in some respects it is older than they in their present form, and reveals the history of the development of the canticle. It consists of three sections (*a*) recounting the praise of the Trinity from 'We praise Thee' to 'the Comforter';

(*b*) the praise of Christ, from 'Thou art the King,' onward, ending with two verses of prayer, 'We therefore pray Thee, etc.,' and 'Make them to be numbered, etc.'; (*c*) a series of versicles and responses like the sets in use elsewhere in services both Latin and English, 'O Lord, save Thy people, etc.,' to the end. These sections are treated separately so far as music goes. The first section (*a*) is freely set partly to a plastic chant-form but partly to independent music, thus:

Te deum lau-da-mus: te do-mi-num-con-fi-te-mur.

Te . .	ae - ter - num	Pa - - - trem :
Ti - bi	om - - - nes	an - ge - li :
Ti - bi	cher - u - bin et	ser - a - phim :

om - nis	ter - ra	ve - na - ra - tur.
ti - bi	coe - li et	univer-sae po - tes - ta - tes :
in - cess - a - bi - li	vo - ce	pro - cla - mant.

Sanc-tus, Sanc-tus, Sanc-tus: Dominus De-us Sa-ba-oth.

The second strain is then resumed, being modified as the words require, *e.g.*:

Pa - trem: im-men-sae ma - jes - ta - tis.

With section (*b*) the melody changes to one which may be thus represented in its full and its compressed forms:

Tu ad li-ber-an-dum sus-cep-tu-rus ho-mi-nem:
Tu dñs - vic-to - mor-tis a - cu - le - o:
Tu ad dex-ter-am de - i se-des:

non horru - is - ti	vir - gin - is uter - um.
ap - er - ui - sti cre-den - ti - bus	reg - na coe - lo - rum.
	in glo - ri - a Pa - tris.

Tu Rex	glo - ri - ae Chris - te.
Tu Pa - tris	sem-pi - ter - nus es Fi - lius.

This tune is of the nature of a psalm tone of the 4th mode; it is natural, therefore, to find the last verse of the section set independently as an antiphon, thus:

E-ter-na fac cum sanc-tis tu-is in glo-ri-a mun-er-a - ri.

This is probably the original close of the canticle. But when it was inserted into the Nocturn service (taking the place of the old morning hymn, the *Gloria in Excelsis*, which was promoted to form part of the Eucharist), it found itself closely associated with a set of versicles and responses which had hitherto followed the *Gloria in Excelsis*. It incorporated them, therefore, and extended its music to them. Apparently the incorporation took place in two stages (1) the first two couplets were taken over, and for music the antiphon melody was repeated, thus :

Then the remaining six were taken, five of them set to the melody of (b), thus :

For the sixth and last the antiphon melody is again used, as follows :

The simplicity and magnificence of this treatment, even apart from the fact that it is the original and proper music of the canticle, ought to have won for it greater attention and a more lasting place in church services than is at present its lot. So far as English services go it has probably been obscured by the adaptation made and published by Merbecke in the *Booke of Common Praier Noted*. The restriction which seems to have been imposed upon Merbecke of setting only one note to a syllable made a satisfactory adaptation impossible. He was reduced, e.g. to

for his opening. And later on he had to descend to—

instead of the rolling phrase of the original. Happily now a proper adaptation to the English text is to be found among the publications of the Plain-song Society or in Novello's *Manual of Plain-song*.

The canticle has sometimes profited by, and sometimes suffered from, many later settings.¹ (See SERVICE.) W. H. F.

The beauty of the old melody has led to its frequent adoption as a canto fermo for polyphonic masses; as in the case of the fifth and sixth masses—'In Te, Domine, speravi,' for five voices, and 'Te Deum laudamus,' for six—in Palestrina's ninth book. But the number of polyphonic settings is less than that of many other hymns of far inferior interest. The reason of this must be sought for in the immense popularity of the plain-song melody in Italy, and especially in the Roman States. Every peasant knows it by heart; and from time immemorial it has been sung in the crowded Roman churches at every solemn thanksgiving service by the people of the city and the wild inhabitants of the Campagna, with a fervour which would have set polyphony at defiance. There are, however, some very beautiful examples; especially one by Felice Anerio, printed by Proske in vol. iv. of 'Musica divina,' from a MS. in the Codex Altaemps. Othobon., based on the ancient melody, and treating the alternate verses only of the text. The 'Tertius tonus musici operis' of Jakob Händl contains another very fine example, in which all the verses are set for two choirs, which, however, only sing alternately. Another important setting of the 16th century is that for 8 voices by Jacobus VAET (q.v.). For the treatment of the English text as part of the office of Matins see SERVICE.

It remains to notice another method of treatment by which the text of the Te Deum has been illustrated with extraordinary success. The custom of singing the hymn on occasions of national thanksgiving naturally led to the composition of great works, with orchestral accompaniment and extended movements, both for solo voices and chorus. Among these must be classed the compositions for many choirs, with organ and orchestral accompaniment, by Benevoli and other Italian masters of the 17th century, which were composed for special festivals, and never afterwards permitted to see the light. Sarti wrote a Te Deum to Russian text, by command of the Empress Catherine II., in celebration of Prince Potemkin's victory at Otchakous, in which he introduced fireworks and cannon. Notwithstanding

¹ The attention of composers may well be drawn to the Bishop of Salisbury's exposition of the principles which should govern settings in his little brochure, *The Te Deum* (S.P.C.K., 1902).

this extreme measure the work is a fine one; but far inferior to that composed by Graun in 1756 by command of Frederick the Great, in commemoration of the Battle of Prague, and first performed at Charlottenburg in 1762 at the close of the Seven Years' War.

The earliest English setting of this type was that written by Purcell for St. Cecilia's Day, 1694; a work which must at least rank as one of the greatest triumphs of the school of the restoration. For many years it was known only in the curiously garbled version of Boyce, but the true text was restored by Sir J. F. BRIDGE (*q.v.*). In 1695 Blow wrote a *Te Deum*, with accompaniments for two violins, two trumpets and bass—the exact orchestra employed by Purcell; and not long afterwards Croft produced another work of the same kind, and for the same instruments.

The first sacred music which Handel composed to English words was the 'Utrecht *Te Deum*,' the MS. of which is dated Jan. 14, 1712.¹ Up to this time Purcell's *Te Deum* had been annually performed at St. Paul's, for the festival of the SONS OF THE CLERGY (*q.v.*). In 1713 Handel's 'Utrecht *Te Deum*' found a place in that festival, where also subsequently the 'Dettingen *Te Deum*' received frequent performance. In contrapuntal resources the 'Utrecht *Te Deum*' is even richer than that with which Handel celebrated the Battle of Dettingen, fought June 27, 1743.

W S. B., rev. with addns.

Among 19th-century settings of the *Te Deum* on the festival scale that of Berlioz for three choirs, orchestra and organ (written for the Paris Exhibition of 1855) is pre-eminent. Other notable examples are by Bruckner (Vienna, 1885), Dvořák (op. 103) (1896) and Verdi for double choir and orchestra (Paris, 1898). Outstanding English works of the type are those of Sullivan (written for the Diamond Jubilee of Queen Victoria, 1897), Stanford (Leeds Festival, 1898) and Parry. Sullivan's was written to the English text, Stanford's to the Latin. Parry's Latin *Te Deum* (Hereford Festival, 1900) was revised, amplified and adapted to the English words for the Gloucester Festival of 1913. Another *Te Deum* was written by Parry to English words for the Coronation of King George V. (1911). Stanford also wrote a *Te Deum* intended for the peace celebrations of 1918 but not then performed. c.

TELEMANN, (1) GEORG PHILIPP (*b.* Magdeburg, Mar. 14, 1681; *d.* Hamburg, June 25, 1767), German composer, son of a clergyman, was educated at Magdeburg and at Hildesheim. He received no regular musical training, but by diligently studying the scores of the great masters—he mentions in particular Lully and Campra—made himself master of the science

of music. In 1700 he went to the university of Leipzig, and while carrying on his studies in languages and science, became in 1704 organist of the Neukirche, and founded a society among the students, called 'Collegium musicum.' He wrote various operas for the Leipzig Theatre before his church appointment. In 1704 he became Kapellmeister to a Prince Promnitz at Sorau, in 1708 Konzertmeister, and then Kapellmeister, at Eisenach, and, still retaining this post, became Musikdirector of the church of St. Catherine, had an official post in connexion with a society called 'Frauenstein' at Frankfurt in 1712, and was also Kapellmeister to the Prince of Bayreuth, as well as at the Barfüsserkirche. In 1721 he was appointed cantor of the Johanneum, and Musikdirector of the principal church at Hamburg, posts which he retained till his death. A few details concerning his duties at the Johanneum were found, and published by Max Schneider in the *Sammelbände* of the *Int. Mus. Ges.* vii. 414 (1906). He made good musical use of repeated tours to Berlin, and other places of musical repute, and his style was permanently affected by a visit of some length to Paris in 1737, when he became strongly imbued with French ideas and taste.

Telemann, like his contemporaries Mattheson and Keiser, is a prominent representative of the Hamburg school in its prime during the first half of the 18th century. In his own day he was placed with Hasse and Graun as a composer of the first rank, but the verdict of posterity has been less favourable. With all his undoubted ability he originated nothing, but was content to follow the tracks laid down by the old contrapuntal school of organists, whose ideas and forms he adopted without change. His fertility was so marvellous that he could not even reckon up his own compositions; indeed it is doubtful whether he was ever equalled in this respect. He was a highly skilled contrapuntist, and had, as might be expected from his great productivity, a technical mastery of all the received forms of composition. Handel, who knew him well, said that he could write a motet in eight parts as easily as any one else could write a letter, and Schumann quotes an expression of his to the effect that 'a proper composer should be able to set a placard to music'²; but these advantages were neutralised by his lack of any earnest ideal, and by a fatal facility naturally inclined to superficiality. He was over-addicted, even for his own day, to realism; this, though occasionally effective, especially in recitatives, concentrates the attention on mere externals, and is opposed to all depth of expression, and consequently to true art. His shortcomings are most patent in his church works, which are of greater historical importance than his operas

² *Gesammelte Schriften*, II. 235. Compare Rameau's 'Qu'on me donne la Gazette de Hollande.'

¹ *J.s.* 1712-13.

and other music. The shallowness of the church music of the latter half of the 18th century is distinctly traceable to Telemann's influence, although that was the very branch of composition in which he seemed to have everything in his favour—position, authority and industry. But the mixture of conventional counterpoint with Italian opera air, which constituted his style, was not calculated to conceal the absence of any true and dignified ideal of church music. And yet he composed twelve complete sets of services for the year, forty-four Passions, many oratorios, innumerable cantatas and psalms, thirty-two services for the installation of Hamburg clergy, thirty-three pieces called 'Capitänsmusik,' twenty ordination and anniversary services, twelve funeral and fourteen wedding services—all consisting of many numbers each. Of his oratorios several were widely known and performed, even after his death, especially a 'Passion' to the well-known words of Brockes of Hamburg (1716) (see PASSION MUSIC); another, in three parts and nine scenes, to words selected by himself from the Gospels (his best-known work); 'Der Tag des Gerichts'; 'Die Tageszeiten' (from Zephariah); and the 'Tod Jesu' and the 'Auferstehung Christi,' both by Ramler (1730 and 1757). To these must be added forty operas for Hamburg, Eisenach and Bayreuth, and an enormous mass of vocal and instrumental music of all kinds, including no less than 600 overtures in the French style. Many of his compositions were published, and he even found time to engrave several himself; Gerber (*Lexicon*, ii. 631) gives a catalogue. He also wrote an autobiography, printed in Mattheson's *Ehrenpforte* and *Generalbassschule* (1731, p. 168). 'Der Tag des Gerichts' and 'Ino' are published together in *D.D.T.* xxviii. A fine chorus for two choirs is given in Rochlitz's 'Sammlung' and Hullah's Vocal Scores. Others will be found in Winterfeld, and in a collection—'Beitrag zur Kirchenmusik'—published by Breitkopf. Organ fugues have been printed in Körner's 'Orgel Virtuos.' Very valuable examinations of his church cantatas, and comparisons between them and those of Bach, will be found in Spitta's *Bach* (Transl. i. 490, etc.). Besides the autobiography referred to above, the following contain information about the composer:

SITTARD, *Geschichte des Musik- und Konzertwesens in Hamburg*, 1890; CURT OTTZEHN, *Telemann als Opernkompontist* (1902); ROMAIN ROLLAND, *Voyage musical aux pays du passé* (Paris, 1919). Eng. trans. by BERNARD MIALL, 1922; *Sings, Spiel- und Generalbass-Übungen* (Hamburg, 1733–34), ed. by MAX SRIFFERT (Berlin, 1921); MAX W. FREY, *G. Ph. Telemanns Sings, Spiel- und Generalbass-Übungen, ein Beitrag zur Geschichte des begleiteten Kunstliedes* (Zürich Dissertation, 1922); Riemann.

A. M., addns.

(2) GEORG MICHAEL (b. Plön, Holstein, Apr. 20, 1748; d. Riga, Mar. 4, 1831), grandson of Georg Philipp, was accompanist at the Hamburg church choir. He studied theology (1773) and music (1775), becoming cantor and director

of music at Riga, c. 1775. He wrote theoretical and didactic works, 2 hymn-books, and composed choral works, a book of trio-sonatas, 6 violin sonatas, and 6 organ preludes. (Q.-L.)

TELFORD & TELFORD. WILLIAM TELFORD (d. 1885) established an organ factory at 45 Bride Street, Dublin, in 1830. In 1838 he built an organ with pedals for the chapel of Trinity College, replacing that erected by Green. At this date he had just removed into larger premises in Stephen's Green. He added German pedals to the organ of Christ Church Cathedral, and did the same for St. Patrick's. His largest organ was that built for St. Peter's, Radley, which instrument was exhibited at the Great Exhibition in Dublin, in 1853. On his death the business was continued by his two sons, and the firm have built fine organs for the cathedrals of Limerick, Lismore, Thurles, Monaghan, Letterkenny, Enniscorthy and Queenstown, as also for numerous parish churches. The elder brother, W. H. Telford, Mus.B., died Oct. 2, 1905, but the business was carried on by the younger brother, Edward, in Stephen's Green. In 1913 it was turned into a Limited Company and the factory removed to Charlemont Street.

W. H. G. F.

TELLEFSEN, THOMAS DYKE ACLAND (b. Dronthjem, Nov. 26, 1823; d. Paris, Oct. 7, 1874), a Norwegian musician, probably named after an Englishman, well known in his day as M.P. for North Devon, who was much in the habit of travelling in Norway.

Tellefsen was a pupil of Chopin, and first came to England with his master in 1848. He was in the habit of returning to this country, had many pupils, and used to give concerts, at one of which he was assisted by Madame Lind-Goldschmidt. Besides publishing several compositions of small value he edited a collection of Chopin's PF. works (Paris, Richault), valuable as embodying the master's personal traditions, and was interesting chiefly from his intimate connexion with that remarkable composer and player.

G.

TELL-TALE. A simple mechanical contrivance for giving information to an organ-blower (and sometimes also to an organist) as to the amount of wind contained in the bellows. A piece of string is fixed by one end to the top board of the bellows and carried over a pulley; a small metal weight is attached to the other end of the string. As the bellows rise the weight descends, as they sink the weight ascends; and the words 'Full' and 'Empty' mark the limits of the journey down and up.

J. S.

TEMPERAMENT (Fr. *tempérament*; Ger. *Temperatur*; cf. Ital. *temperare*, to tune) is the name given to various methods of TUNING, in which certain of the consonant intervals, chiefly the fifth and major third, are intentionally made more or less false or imperfect;

that is to say, either sharper or flatter than exact consonance would require. If, on the contrary, all the consonant intervals are made perfectly smooth and pure, so as to give no BEATS, the tuning is then called JUST INTONATION (*q.v.*).

We shall omit from the present article all reference to the arithmetical treatment of temperament (see INTERVAL), and simply deal with its physical and audible effects. We shall describe the means by which any student may obtain for himself a practical knowledge of the subject, and point out some of the conclusions to which such knowledge will probably lead him.¹ The first and most important thing is to learn by experience the effect of temperament on the quality of musical chords. To carry out this study properly it is necessary to have an instrument which is capable of producing all the combinations of notes used in harmony, of sustaining the sound as long as may be desired, and of distinguishing clearly between just and tempered intonation. These conditions are not fulfilled by the pianoforte; for, owing to the soft quality of its tones, and the quickness with which they die away, it does not make the effects of temperament acutely felt. The organ is more useful for the purpose, since its full and sustained tones, especially in the reed stops, enable the ear to perceive differences of tuning with greater facility. The harmonium is superior even to the organ for illustrating errors of intonation, being less troublesome to tune and less liable to alter in pitch from variation of temperature or lapse of time.

By playing a few chords on an ordinary harmonium and listening carefully to the effect, the student will perceive that in the usual mode of tuning, called equal temperament, only one consonant interval has a smooth and continuous sound, namely, the octave. All the others are interrupted by *beats*, that is to say, by regularly recurring throbs or pulsations, which mark the deviation from exact consonance. For example, the fifth and fourth, as at (x), are each made to give about one beat per second. This error is so slight as to be hardly worth notice, but in the thirds and sixths the case is very different. The major third, as at (y), gives nearly *twelve* beats per

second: these are rather strong and distinct, and become still harsher if the interval is extended to a tenth or a seventeenth. The major sixth, as at (z), gives about *ten* beats

per second, which are so violent that this interval in its tempered form barely escapes being reckoned as a dissonance.

The Difference - Tones resulting from these tempered chords are also thrown very much out of tune, and, even when too far apart to beat, still produce a disagreeable effect, especially on the organ and the harmonium (RESULTANT TONES). The degree of harshness arising from this source varies with the distribution of the notes; the worst results being produced by chords of the following types:

By playing these examples, the student will obtain some idea of the alteration which chords undergo in equal temperament. To understand it thoroughly, he should try the following simple experiment:

Take an ordinary harmonium and tune two chords perfect on it. One is scarcely enough for comparison. To tune the triad of C major, first raise the G a very little, by scraping the end of the reed, till the fifth, C-G, is dead in tune. Then flatten the third E, by scraping the shank, till the triad C-E-G is dead in tune. Then flatten F till F-C is perfect, and A till F-A-C- is perfect. The notes used are easily restored by tuning to their octaves. The pure chords obtained by the above process offer a remarkable contrast to any other chords on the instrument.²

It is only by making one's self practically familiar with these facts, that the nature of temperament can be clearly understood, and its effects in the orchestra, or in accompanied singing, properly appreciated.

EQUAL TEMPERAMENT TUNING.—Against its defects, equal temperament has one great advantage which specially adapts it to instruments with fixed tones, namely, its extreme simplicity from a mechanical point of view. It is the only system of tuning which is complete with *twelve* notes to the octave. This result is obtained in the following manner. If we start from any note on the keyboard (say G \flat), and proceed along a series of twelve (tempered) fifths upwards and seven octaves downwards thus—

we come to a note (F \sharp) identical with our original one (G \flat). But this identity is only arrived at by each fifth being tuned somewhat too flat for exact consonance. If, on the contrary, the fifths were tuned perfect, the last note of the series (F \sharp) would be sharper than

¹ Those who wish to study the subject more in detail may consult—(1) Bosanquet, *Elementary Treatise on Musical Intervals and Temperament* (Macmillan); (2) Helmholtz, *Sensations of Tone*, chapters xiv. to xvii., and Ellis's Appendix xix. sections A to G, tables i. to vi.; (3) Pernet Thompson, *On the Principles and Practice of Just Intonation*; (4) Woolhouse, *Essay on Musical Intervals*.

² Bosanquet, *Temperament*, p. 6.

the first note (G_b) by a small interval called the 'Comma of Pythagoras' (see *COMMA*), which is about one-quarter of a semitone. Hence in equal temperament, each fifth ought to be made flat by one-twelfth of this Comma; but it is extremely difficult to accomplish this practically, and the error is always found to be greater in some fifths than in others. If the theoretic conditions, which the name 'equal temperament' implies, could be realised in the tuning of instruments, the octave would be *equally* divided into twelve semitones, six tones, or three major thirds. Perfect accuracy, indeed, is impossible even with the best-trained ears, but the following rule, given by Ellis, is much less variable in its results than the ordinary process of guesswork. It is this:

Make all the fifths which lie entirely within the octave middle c' to treble c'' beat *once* per second; and make those which have their upper notes above treble c'' beat *three* times in *two* seconds. Keeping the fifth treble f' and treble c'' to the last, it should beat *once* in between *one* and *two* seconds.¹

In ordinary practice, however, much rougher approximations are found sufficient.

The present system of tuning by equal temperament was introduced into England at a comparatively recent date (see *TUNING*). In 1854 organs built and tuned by this method were sent out for the first time by Gray & Davison, Walker and Willis. That year is therefore the date of its definite adoption as the trade usage in England. There was no equally tempered organ of English make in the Great Exhibition of 1851; and before that time the present system appears to have been only used in a few isolated cases, as in the organ of St. Nicholas, Newcastle-upon-Tyne, which was returned in 1842. For the pianoforte equal temperament came into use somewhat earlier than for the organ. It was introduced into the works of Broadwood about 1846. In France the change had already taken place, for Aristide Cavaillé-Coll stated that from 1835 he consistently laboured to carry out the equal principle in the tuning of his organs.² What little is known of the history of temperament in Germany seems to show that the new tuning was employed there at a still earlier date, but there are reasons for believing that equally tuned organs had not become general even as late as the time of Mozart. Emanuel Bach seems to have been the first musician who advocated in a prominent manner the adoption of equal temperament, whence we may infer that it was unusual in his day.³ His father is also said to have employed this system on his own clavicord and harpsichord; but even his authority was not sufficient to recommend it to his contemporary Silbermann, the famous organ-builder (1683-1753). Still he must have

obtained some practical system of temperament, since the 'Wohltemperirtes Clavier' would not have been tolerable to the ear without some modification of just intonation, however rough. An earlier builder, Schnitger, is said to have used something approaching it in the organ built by him about 1688-93, in the S. Jacobi church at Hamburg. Before that time the system appears to have had hardly more than a theoretic existence in Europe.

THE MEANTONE SYSTEM.—The mode of tuning which prevailed before the introduction of equal temperament is called the Meantone System.⁴ Till late in the 18th century this tuning, or a closely allied variety, was almost universally employed, both in England and on the Continent. It was invented by the Spanish musician Salinas, who was born at Burgos in 1513, lived for many years in Italy, and died at Salamanca in 1590.⁵ On account of its historical interest, as well as its intrinsic merits, the meantone system requires a short explanation. It will be convenient to take equal temperament as the standard of comparison, and to measure the meantone intervals by the number of equal semitones they contain. The relations of the two systems may therefore be described as follows.

If we start from say D on the keyboard, and proceed along a series of four equal temperament fifths upwards and two octaves downwards, thus—

we arrive at a note ($F\#$) which we employ as the major third of our original note (D). This tempered interval ($D-F\#$) is too sharp for exact consonance by nearly one-seventh of a semitone; but if we make these fifths flatter than they would be in equal temperament, then the interval $D-F\#$ will approach the perfect major third. We may thus obtain a number of systems of tuning according to the precise amount of flattening we choose to assign to the fifth. Of this class the most important is the Meantone System, which is tuned according to the following rule. First, make the major third (say $D-F\#$) perfect; then make all the intermediate fifths ($D-A-E-B-F\#$) equally flat by trial. After a little practice this can be done by mere estimation of the ear; but if very accurate results are desired, the following method may be used. A set of tuning-forks should be made (say at French pitch) giving $c' = 260.2$, $g' = 389.1$, $d' = 290.9$, $a' = 435$ vibra-

¹ Bosanquet, *Temperament*, p. 5.

² Ellis, in *Nature* for Aug. 8, 1878, p. 383. For Serresne's advocacy of equal temperament as early as 1636 see *TUNING*.

³ C. F. E. Bach, *Versuch über die wahre Art das Clavier zu spielen*, Einleitung, sect. 14; published 1753.

⁴ Otherwise Mesotonic; so called because in this tuning the tone is a mean between the major and the minor tones of Just Intonation; or half a major third. It lingered in England in the tuning of a few organs in cathedral churches, and according to Yañez, organist of Seville Cathedral, was generally maintained on Spanish organs until late in the 19th century. See Ellis, *Hist. of Musical Pitch*, in *Journal of Soc. of Arts*, Mar. 5, and Apr. 2, 1880, and Jan. 7, 1881.

⁵ The invention of this temperament has also been attributed to Zarlinio and to Guido d'Arezzo.

tions per second. The notes *c', g', d', a'* of the instrument should be tuned in unison with the forks, and all other notes can be obtained by perfect major thirds and perfect octaves above or below these (see TUNING).

There is one difficulty connected with the use of the Meantone System, namely, that it requires more than twelve notes to the octave, in order to enable the player to modulate into any given key. This arises from the nature of the system; for as twelve meantone fifths fall short of seven octaves, the same sound cannot serve both for *G♭* and for *F♯*. Hence if we tune the following series of meantone fifths

E♭-B♭-F-C-G-D-A-E-B-F♯-C♯-G♯

on the piano, or on any other instrument with twelve notes to the octave, we shall have only six major scales (*B♭, F, C, G, D, A*), and three minor scales (*G, D, A*). When the remoter keys are required, the player has to strike *G♯* instead of *A♭*, or *E♭* instead of *D♯*, producing an intolerable effect. For in the Meantone System the interval *G♯-E♭* is sharper than the perfect fifth by nearly one-third of a semitone, and the four intervals *B-E♭, F♯-B♭, C♯-F, G♯-C*, are each sharper than the perfect major third by more than three-fifths of a semitone. The extreme roughness of these chords caused them to be compared to the howling of wolves. (See WOLF.)

To get rid of the 'wolves' many plans were tried. For instance, the *G♯* was sometimes raised till it stood half-way between *G* and *A*; but the result was unsatisfactory, for the error thus avoided in one place had to be distributed elsewhere. This was called the method of Unequal Temperament, in which the notes played by the white keys were left in the meantone system, while the error was accumulated on those played by the black keys. The more usual scales were thus kept tolerably in tune while the remote ones were all more or less false. Such a make-shift as this could not be expected to succeed, and the only purpose it served was to prepare the way for the adoption of Equal Temperament.

The Meantone System is sometimes described as an Unequal Temperament, but wrongly, since in it the so-called 'good keys' are all equally good; the 'bad keys' are simply those for which the necessary notes do not exist when the system is limited to twelve notes per octave. The defect therefore lies not in the system itself, but in its application, and the only legitimate remedy is to increase the number of notes, and so provide a more extended series of fifths. This was well understood from the first, for we find that as early as the 16th century many organs were constructed with extra notes.¹ Salinas

¹ The extra notes were sometimes called 'quartertones,' not a very suitable name, since a quartertone is not a sound, but an interval, and the semitone is not divided equally in the Meantone system.

tells us that he had himself played on one in the Dominican Monastery of Santa Maria Novella at Florence. Similar improvements were attempted in England. (See ORGAN, Vol. III. p. 751.)

J. L.

In former editions of this Dictionary the writer of the above here developed at length an argument for the partial restoration of meantone temperament. This argument was based largely on the researches of Bosanquet,² and included a description of the modified keyboard invented by Bosanquet, and now preserved in the Victoria and Albert Museum, South Kensington. The writer further discussed with musicians the experiments made by Helmholtz³ and by two French savants, Cornu and Mercadier,⁴ and pointed to possible modifications in the practice of musicians to which these considerations might lead. Fifty years of experience since the article was written, however, show that music has not taken the directions indicated. On the contrary, composers and players of instruments capable of Just Intonation have increasingly tended to think in terms of Equal Temperament, witness the whole-tone scale and other developments of HARMONY (*q.v.*) as well as the proposals of individuals (BUSONI, HABA, etc.) to further subdivide the intervals of the scale on arithmetical principles. o.

TEMPEST, THE. There have been many musical settings of the whole or part of Shakespeare's play, although we have no definite information as to the music used at its earliest representation.

(1) Robert Johnson's settings of 'Full fathom five' and 'Where the bee sucks' were first published in Wilson's 'Cheerful Ayres' in 1600, and are held to be the original settings.

(2) In 1667 Pepys saw the version by Davenant and Dryden which was published in 1670. The version provided considerable scope for music, a 'dialogue sung in parts' by two devils leading to a dance, one song 'Dry those Eyes' additional to those of Shakespeare, and further dances. The music used in this production has not been certainly identified.

(3) In 1673, according to Downes,⁵ but more probably early in 1674, Shadwell's version, 'made into an Opera,' was produced at the Dorset Gardens Theatre. It is probable that the music by Matthew Locke, the instrumental numbers from which were published, together with his 'Pysche,' in 1675, was composed for Shadwell's version, and that there were 'Entries and Dances' by another hand (conjectured to be Draghi) omitted from the same publication. It seems equally probable that to this production may be assigned 'the Vocal Musick in the

² See *Mus. Ass. Proc.*, May 1, 1875.

³ *Sensations of Tone* (Ellis).

⁴ Ellis's Appendix to *Sensations of Tone*, p. 640.

⁵ *Roscius Anglicanus*, W. J. Lawrence, examining the MS. prologue and epilogue written by Shadwell for this production, has shown that the date must have been early in 1674 (*The Elizabethan Playhouse*, 1912).

Tempest by Mr. Pelh. Humfrey,' since its contents, 'The song of the 3 Divells,' the Masque, the song 'Arise ye subterranean winds' supply the lacunae in Locke's publication.¹ About the same time appeared a collection called 'The Ariel's Songs in the Tempest,' containing four vocal compositions by Banister, including 'Come unto these yellow sands' and 'Full fathom five,' and Pelham Humfrey's 'Where the bee sucks.' In 1676 and 1690 Davenant and Dryden's version was reprinted, and both reprints contain the song, 'Arise, ye subterranean winds,' a setting of which by Pietro Reggio was published in his collection of songs in 1680. There are in the same reprints opportunities for music, such as the masque in Act V. for which no contemporary composition seems to be forthcoming.

(4) The song 'Dear pretty youth' (published in 'Deliciae musicae' in 1695-96) is the only part of Henry Purcell's music to the play that was printed in his lifetime, and there is a remarkable absence of early MSS. of the music he wrote, which was published in 1790 by Goodison. A MS., probably an old theatre copy, of about 1700-10, was bought at Julian Marshall's sale in 1905 by the British Museum; it presents the same compositions as are in Goodison's edition, and in a MS. formerly in Dr. Cummings's possession, which probably dates from the third decade of the 18th century.² Purcell's music is held by Barclay Squire to represent a third alteration of Dryden and Davenant's version of the play, and these garbled versions held the stage down to 1745-46, when a return was made to the original form of the play, with Arne's famous music. In 1747 Dryden's version was again revived, but without composer's name for the music performed.³

(5) A new transformation of the play into an 'Opera' was brought out by Garrick at Drury Lane in 1756, with music composed or arranged by John Christopher Smith. In 1777 Sheridan brought out the play with music by Thomas Linley.

(6) In 1861 Arthur Sullivan, when a student at the Leipzig Conservatorium, composed incidental music to the play, apparently for no special revival, as its first performance took place at the Crystal Palace, Apr. 5, 1862. It is among the composer's most charming works, although it bears the opus number 1.⁴

M.; with addns. c.

(7) Arthur Bliss composed an overture (chiefly drums, with trumpet, trombone, voices, etc.) and some incidental music for Viola

Tree's production of *The Tempest*, Aldwych Theatre, London, 1921.

The following are operas on this subject: (1) text by Scribe, music by Halévy, produced Covent Garden, June 8, 1850; Paris, Théâtre Italien, Feb. 25, 1851; (2) by Fibich, Prague, 1895; (3) in 3 acts, text arranged by Reginald Gatty, music by Nicholas Gatty, Surrey Theatre, Apr. 17, 1920. c.

TEMPLER UND DIE JÜDIN, DER, opera in 3 acts, text by W. A. Wohlbrück (founded on *Ivanhoe*); music by Marschner. Produced Leipzig, Dec. 1829. See also IVANHOE.

TEMPLETON, JOHN (b. Riccarton, Kilmarnock, July 30, 1802; d. New Hampton, July 2, 1886), tenor singer. At the age of 14 he made his first appearance in Edinburgh, and continued to sing in public until his 16th year, when his voice broke. Appointed precentor in Dr. Brown's church, Edinburgh, at the age of 20, he began to attract attention, until Scotland became too limited for his ambition, and he started for London, where he received instruction from Blewitt in thorough-bass, and from Welsh, De Pinna and Tom Cooke in singing. His first theatrical appearance was made at Worthing, as Dermot in 'The Poor Soldier,' in July 1828. This brought about engagements at the Theatre Royal, Brighton, Southampton and Portsmouth, and Drury Lane. He made his first appearance in London, Oct. 13, 1831, as Belville in 'Rosina.' Two days later he appeared as Young Meadows in 'Love in a Village,' Wood taking the part of Hawthorn, with Mrs. Wood (Miss Paton) as Rosetta. After performing for a few months in stock pieces, he created the part of Raimbaut in Meyerbeer's 'Robert le Diable' on its first performance in England, Feb. 20, 1832. He appeared as Lopez in Spohr's 'Der Alchymist' when first produced (Mar. 20, 1832), Bishop's 'Tyrolese Peasant' (May 8, 1832) and John Barnett's 'Win her and wear her' (Dec. 18, 1832); but the first production of 'Don Juan' at Drury Lane, Feb. 5, 1833, afforded Templeton a great opportunity. Begrez, after studying the part of Don Ottavio for eight weeks, threw it up a week before the date announced for production. Templeton undertook the character, and a brilliant success followed.

Madame Malibran, in 1833, chose him as her tenor, and 'Malibran's tenor' he remained throughout her brief but brilliant career. On the production of 'La sonnambula,' at Drury Lane, May 1, 1833, Templeton's Elvino was no less successful than Malibran's Amina. After the performance Bellini embraced him, and, with many compliments, promised to write a part that would immortalise him. 'The Devil's Bridge,' 'The Students of Jena' (first time June 4, 1833), 'The Marriage of Figaro,' 'John of Paris,' etc., gave fresh opportunities for Templeton to appear with Malibran, and with

¹ See W. Barclay Squire in *Musical Quarterly*, vol. 7, p. 571. The discovery of this MS. was made by Mlle. Pereyra in the library of the Paris Conservatoire, and it was first described by her in the *Bulletin de la Société Française de Musicologie*, Oct. 1920, No. 7. See also *Revue Musicale*, 1921, No. 3.

² See Preface to the Purcell Society's edition, vol. xix., by Edward J. Dent.

³ See, on the whole question of these early versions, and in particular of Purcell's music, Barclay Squire's article in the *Sammlung* of the Int. Mus. Ges. vol. v. pp. 551-58.

⁴ *Sammlung* of the Int. Mus. Ges. vol. v. pp. 551, etc.; information from F. K.

marked success. In Auber's 'Gustavus the Third,' produced at Covent Garden, Nov. 13, 1833, he made another great success as Colonel Lillienhorn. During the season the opera was repeated one hundred times. Alfred Bunn, then manager of both theatres, so arranged that Templeton, after playing in 'La Sonnambula' or 'Gustavus the Third' at Covent Garden, had to make his way to Drury Lane to fill the rôle of Masaniello—meeting with equal success at both houses.

On the return of Malibran to England in 1835, the production of 'Fidelio' and of Balfe's 'Maid of Artois' (May 27, 1836) brought her and Templeton again together. Templeton took the leading tenor parts in Auber's 'Bronze Horse' (1836), in Hérold's 'Corsair' (1836), Rossini's 'Siege of Corinth' (1836), in Balfe's 'Joan of Arc' (1837) and 'Diadeste' (1838), in Mozart's 'Magic Flute' (1838), Benedict's 'Gipsy's Warning' (1838), H. Phillips's 'Harvest Queen' (1838), in Donizetti's 'Love Spell' (1839) and in 'La favorita' (1843) on their first performance or introduction as English operas; altogether playing not less than eighty different leading tenor characters.

In 1836-37 Templeton made his first professional tour in Scotland and Ireland with great success. Returning to London, he retained his position for several years. In 1842 he visited Paris with Balfe, and received marked attention from Auber and other musical celebrities. The last twelve years of his professional career were chiefly devoted to the concert-room. In 1846 he starred the principal cities of America with his 'Templeton Entertainments,' in which were given songs illustrative of England, Scotland and Ireland, and as a Scottish vocalist he sang himself into the hearts of his countrymen. He gave his entertainment in Dublin in 1849, with Blewitt as accompanist. Templeton retired in 1852.

With splendid voice, graceful execution and exquisite taste, he excelled alike in the pathetic, the humorous and the heroic; his rendering of 'My Nannie O,' 'Had I a cave,' 'Gloomy winter,' 'Jessie, the Flower o' Dunblane,' 'Corn Rigs,' 'The Jolly Beggar' and 'A man's a man for a' that,' etc., left an impression not easily effaced. W. H.

TEMPO (PACE). Theoretically, it is an easy matter to fix the pace of a piece of music. The first movement of a symphony consisting of 250 bars of common time takes, let us say, ten minutes to play through, and we mark it accordingly ♩=100; or we play a piece, naturally and flexibly, for fifteen seconds by the watch and find we have played twenty-five crotchets, multiply these by 4 and write down ♩=100. Pace is also easy to check. The normal watch ticks 300 to the minute; we put it to our ear and three ticks give us the time of the crotchet as the conductor is taking it,

viz. ♩=100. All of these may be accurate, but for a single performance only, that is, in one set of conditions.

PACE IS RELATIVE.—But the conditions may vary much. What is right under one conductor, with one orchestra, in one building, is wrong with another. Mozart said that nothing seemed to him so important as the right choice of *tempo*, and he could hardly have said that if it were merely a question of adjusting a tape or a *Taktmesser* (see CONDUCTING, METRONOME). Beethoven's metronome marks, which puzzle us occasionally, dismayed him so much that he thought there must be something wrong with his metronome. The truth is that time is relative to the things that take place in it: an hour is long or short according as we spend it upon half a dozen little jobs or on an exciting book; and to a musician pace is not the number of minutes it takes to play the pages which contain the notation, but the amount of experience he can cram into the music.

PACE AND CHARACTER.—To describe that experience we use words, and these start life meaning degrees of speed—*Lento*, *Adagio*, *Andante*, *Allegro*, *Presto*, and so forth. But as they go on we find them describing not so much speed as character. Nobody is quite sure, for instance, whether *Andantino* is faster or slower than *Andante*, because composers have used it both ways; but every one agrees that it is livelier than *Poco Andante* and less playful than *Allegretto*. The slow movement of a symphony was (rather than is) frequently called 'the' *ADAGIO* (*q.v.*), although it is quite commonly marked *Largo* or *Andante*.

ITALIAN TERMS.—If these expressions of *tempo* indicated pace only, there would be a strong argument apart from sentiment for continuing to use the Italian forms of them, which have become technical terms. But since what we chiefly want to know is the composer's own conception of his work, there is much to be said for his expressing it in a language he knows intimately (provided it is one that we may hope to understand) rather than in one which he probably has to learn, perhaps for the occasion and out of a dictionary. There is very little to be said for the Englishman who gives his indications in German or French, as has been done; since these are neither technical nor in a *lingua franca*, which, for music at least, Italian is.

TEXTURE OF MUSIC.—Armed with a knowledge of the composer's style and mood it is not difficult to arrive at the true pace from the texture of the music itself. Full and, especially, spaced harmonies, elaborate counterpoint, variety in the time-units of the melody, the limitations of brass as against wood, or wind against strings, even the comparative somnolence of an afternoon as against an evening performance or the unresponsive acoustics of a

large hall, are all factors which, as far as they count, make for slower pace. A capable musician will be alive to these, and his decision should be worth more than the pronouncement of an unthinking machine. A. H. F. S.

TEMPO ORDINARIO (Ital.), common time, four crotchets in a bar. The time-signature is an unbarred semicircle C, or in modern form C, in contradistinction to the barred semicircle C or C, which denotes a diminished value of the notes, i.e., a double rate of movement. In consequence of the notes in *tempo ordinario* being of full value (absolutely as well as relatively), the term is understood to indicate a moderate degree of speed. It is in this sense that Handel employs it as an indication for the choruses 'Lift up your heads,' 'Their sound is gone out,' etc. F. T.

TEMPO RUBATO, see RUBATO.

TEMPUS PERFECTUM; **TEMPUS IMPERFECTUM**, see NOTATION, subsection TIME SIGNATURES; TIME.

TENAGLIA, ANTONIO FRANCESCO, was a Florentine by birth, but it was in Rome that he came under the strong influence of the musicians of the 17th century, who had developed the operatic song or aria into a thing of beauty in which music and words responded to each other. Tenaglia was an apt pupil. In an able appreciation of his musical gifts, Torchi ('Canzoni ed arie italiane ad una voce nel secolo XVII,' 1894) writes that his power of dramatic colouring places him on the level of Carissimi; the aria 'Non è mai senza duol' (from a MS. in the Bologna Library), that he picks out for especial praise, contains musical phrases of much pathos, representing closely the feeling of the words.

Little of Tenaglia's music is known, two of his madrigals, 'Madonna udite' and 'E così pur languendo,' are in the 'Florido concento di madrigali in musica a tre voci. Parte seconda,' published in Rome in 1653.

The Cecilia Society's publications of old Italian music ('Musica scelta': published by P. W. Olsen at Copenhagen, about 1855) included a duet, 'Ma se non moto,' for two sopranos and the aria 'Begl' occhi mercè!' with a pianoforte accompaniment arranged by Enrico Rung.

This aria was again printed with an English translation, 'Take pity, sweet eyes,' by Mary A. Robinson, in Vol. I. of 'Cecilia,' edited by Prof. Schimon and others (published by J. André, Offenbach o.M., 1881-82), and an arrangement for violin or violoncello was made by Franz Ries ('Album-Blätter,' Leipzig, 1884).

There is record of an opera composed by Tenaglia; it is described in Allacci's *Drammaturgia* as

*Cleano. Favola musicale. In Roma per Giacomo Dragonelli. 1691. Poesia di Lodovico Cortesi. Musica di Antonio Francesco Tenaglia.

Nothing more seems to be known of it.

MSS. containing various compositions are in:

British Museum. The Harleian MS. 1285, p. 237, and 1863, p. 201. Copies of 'Bon diapero, abbandonato' for three voices, by Sig. Gio. Franco. Tenaglia.

Bologna Liceo Musicale. In vol. iv. of secular music by composers in Rome, 'Se fosse così conforme vol dte' and 'Misero chi si fida' for soprano with basso continuo, by Gio. Fr. Tenaglia. (Gaspari's Catalogue, iii. 258.)

Vienna Hofbibliothek. In MS. 17,763, 'Il nocchier, che torna,' and 'O che bizzarro humor,' arie by Antonio Francesco Tenaglia. (Manuscri's Catalogue.)

Florence F. Istituto Musicale. MS. includes three arie for solo voice with figured bass by Tenaglia. Either mentions compositions in the Bibliothek Wagener and in the Modena Library. C. S.

TENDUCCI, GIUSTO FERDINANDO (b. Siena, c. 1736; d. Italy, early 19th century), a celebrated soprano, very popular in England. Like a still greater singer, he was sometimes called Senesino from his birthplace. His earliest stage appearances in Italy were made at about 20 years of age, and in 1758 he came to London, where he first sang in a pasticcio called 'Attalo.' But it was in the 'Ciro riconosciuto' of Cocchi that he first attracted special notice. Although he had only a subordinate part, he quite eclipsed, by his voice and style, the principal singer, Portenza, and from that time was established as the successor of Guadagni. He appeared in Dublin, at the Smock Alley Theatre, in Arne's 'Artaxerxes,' on Feb. 18, 1765. O'Keeffe says that his singing of 'Water parted from the sea' created a furore; in July he appeared in 'Amintas' (his own alteration of Rolt's 'Royal Shepherd'), and on Dec. 12, in his own adaptation of 'Phar-naces,' called 'The Revenge of Athridates.' He remained in Ireland till 1768, when he went to Edinburgh. He married¹ a pupil, Miss Dora Maunsell of Limerick, in Aug. 1766. A romantic account of their elopement was published by the lady in 1768, as *A True and Genuine Narrative of Mr. and Mrs. Tenducci*. He published six sonatas for harpsichord in Dublin in 1768, and 'A Collection of Lessons' in Edinburgh, where he stayed during 1768-69. His vanity and extravagance were so unbounded that in 1776 he was forced to leave England for debt. In a year, however, he found means to return, and remained in London many years longer, singing with success as long as his voice lasted, and even when it had almost disappeared. In 1783 he sang again in Dublin with Mrs. Billington in 'Orpheus and Eurydice,' an adaptation from Gluck, and in 1785 he appeared in the same work in London; he appeared at Drury Lane Theatre as late as 1790. He also sang at the Handel Commemoration Festivals at Westminster Abbey, in 1784 and 1791. Ultimately he returned to Italy.

¹ On July 18, 1766, Tenducci eloped with Miss Dorothy Maunsell (daughter of Councillor Thomas Maunsell), a pretty girl not quite 16 years old, of a good Limerick family, and in August he got married by a Roman Catholic priest in Cork. The Limerick correspondent of the *Dublin Journal* (Aug. 28, 1766) reports the fact of the elopement as 'a most extraordinary matter of amazement.' On July 4, 1767, this marriage was legalised in the parish church of Shaughan, Co. Tipperary. Councillor Maunsell ultimately procured its annulment in a decree signed Jan. 1776.

Tenducci on friendly terms with the Mozart family during their visit to London in 1764. In 1778, at Paris, he again met Mozart, who, remembering their former intercourse, wrote a song for him, which has been lost. He was the author of a treatise on singing and the composer of an overture for full band (Preston, London), and of 'Ranelagh Songs,' which he sang at concerts. He also composed music for Captain Jephson's comic opera, 'The Campaign,' about 1784. A sketch of him by Cosway is in Lord Tweedmouth's possession, and an exquisite medallion portrait, etched, is on the title-page of the *Instructions of Mr. Tenducci to his Scholars*, published by Longman & Broderip about 1785.

F. A. M.; addns. W. H. G. F., F. K.; information from R. Hitchcock's *Irish Stage, Faulkner's Journals*, etc.

TENEBRAE, a somewhat fanciful name given to the MATINS (*q.v.*) and LAUDS (*q.v.*) service of the last three days of Holy Week, owing to the ceremonial extinction of the lights, which goes on increasingly through the service till it ends in the dark. (See LAMENTATIONS; MISERERE.)

TENERAMENTE (CON TENEREZZA), 'tenderly'; a term slightly stronger and used more emphatically than *dolce*, but having very much the same meaning and use in music. A good instance of the distinction between the terms is found in the second movement of Beethoven's sonata in E minor, op. 90, where the subject, at its first entry labelled *dolce*, is subsequently directed to be played *teneramente*, it being evidently intended that the music should become slightly more impassioned as it goes on.

TENOR, the term used to denote the highest natural voice of men. It is derived from the Latin *teneo*, 'I hold,' the voice being that which in early times held, took or kept the plain-song (see DESCANT; MOTET). The compass is usually of about two octaves from *cc*, the first two or three notes being more or less ineffective. A notable exception was the compass of Caruso, who could sing with ease and effect down to G. Tenor voices may be roughly classified as being 'robust' or 'lyrical.'

N. C. G.

TENOR, the largest bell of a 'ring' or 'peal,' sounding the lowest note—the keynote of the ring.

W. W. S.

TENOR COR, a brass valve instrument of tenor pitch and circular or French horn form, designed and introduced by Henry Distin about 1860. The difficulty of training French horn-players for military bands, and the inadequacy of the tenor saxhorn as a substitute for the French horn, suggested the new instrument as a compromise. In tone quality the tenor cor is intermediate between the tenor saxhorn and the French horn, and is much used in

cases where the latter instrument is not available. It is usually made in F, with an extra slide for E \flat . D. J. B.

TENOR DRUM, see DRUM (4).

TENOR HORN, a name used indiscriminately for two brass valve instruments of the saxhorn type.¹

1. In E flat, with a compass of two octaves from the second harmonic  sounding a major sixth lower (the valves give a complete chromatic compass from ); it is also

known as the althorn in E flat.

2. In B flat; sounding a ninth lower it is the German equivalent of the BARITONE (*q.v.*). (See also SAXHORN.)

In the U.S.A. the E \flat tenor is known as the E \flat alto, and the B \flat baritone of small bore as the B \flat tenor. The name B \flat tenor is not used in this country. The tenor instrument is frequently made in F, and the baritone in C. D. J. B.

TENOROON, see BASSOON (3).

TENOR TUBA, the equivalent to the euphonium. (See TUBA, where also are discussed the so-called tubas designed by Wagner for the 'Ring'.)

TENOR VIOL, see VIOL (2).

TENOR VIOLIN, see VIOLIN FAMILY, subsection (2) VIOLA.

TENUTO, 'held'; a direction (or its contraction *ten.*) used to draw attention to the fact that particular notes or chords are intended to be sustained for their full value, in passages where staccato phrases are of such frequency that the players might omit to observe that some notes are to be played smoothly in contrast. Its effect is almost exactly the same as that of *legato*, save that this last refers rather to the junction of one note with another, and *tenuto* to the note regarded by itself. M.

TERCE (Lat. *officium (vel oratio) ad horam tertiam. Ad tertiam*); the second division of the lesser Hours in the Roman Breviary.

W. S. R.

TERNINA, MILKA (b. Begizse, Croatia, Dec. 19, 1863), singer, one of the most eminent exponents of the soprano parts of Wagner.

Having lost her father when a child, she was adopted by her uncle, the Imperial State Councillor, J. Jurkovic of Agram, who gave her there an excellent education in music and foreign languages. When 12 years old she studied singing there with Frau Ida Winterberg. From about 1880–82 she studied singing with Gänsbacher at Vienna, both privately and at the Conservatorium. While still a student she made her débuts on the stage at Agram, as a guest, as Amelia ('Ballo in Maschera'),

¹ This is correct if applied to Europe generally and to the U.S.A. particularly, but not to this country.

Gretchen, Aida and Selika. In 1883-84 she sang light operatic parts at Leipzig. From 1884-86 she sang at Graz in the whole repertory. From 1886-90 she sang at Bremen, as successor to Klafsky, and from 1890-99 at Munich, where she was a great favourite, both in Wagner's operas and the general repertory. She also sang as Chimène in the revival of Cornelius's 'Cid,' and as the heroine in Schilling's 'Ingwelde,' and Chabrier's 'Gwendoline,' in the presence of their respective composers, and on May 7, 1899, as the heroine in Heinrich Vogl's 'Der Fremdling.' Soon after her engagement she was appointed court chamber singer to the Regent of Bavaria. On leave of absence, she sang in the principal cities of Germany, the Rhenish Festival (Aix-la-Chapelle, 1894), etc. On Apr. 25, 1895, she made her début in England at an orchestral concert at Queen's Hall under Hermann Levi, and by her singing of Elizabeth's Greeting and the scena from 'Fidelio' made a highly favourable impression, 'by reason of her noble voice and powerful dramatic style.' In 1896 she sang at the German ambassador's concert at Moscow on the occasion of the Czar's coronation, and visited America for the first time. On June 3, 1898, she made her début at Covent Garden as Isolde with very great success, both as a singer and actress, confirmed later as Brünnhilde and Leonora ('Fidelio').

In 1899 she sang for the first time at Bayreuth as Kundry, and later in the year went to America, where she sang several winter seasons with her usual success, not disdaining to sing the small part of the 1st Lady in 'Die Zauberflöte' in a cast including Eames, Sembrich, De Lussan and Schumann-Heink. In Dec. 1904 she sang Kundry at the Metropolitan Opera-House. From 1900-06 she sang frequently at Covent Garden, principally in the Wagner operas, her only other part being, July 12, 1900, the heroine in Puccini's 'Tosca,' which she sang both to the satisfaction of the composer and the public. In Germany she was a favourite singer of the Lieder of Brahms and others. Her last appearance in London took place on May 28, 1906, in the part of Elizabeth. Soon after she retired from the profession. The combination of a perfect vocal method with dramatic force and sympathetic personality gave to each of her impersonations a rare and individual beauty.

A. C.

TERPODION, a musical friction-instrument, invented by Buschmann of Berlin in 1816, and improved by his sons in 1832. The principle appears to have been the same as that of Chladni's clavicyle, except that instead of glass, wood was employed for the cylinder (see CHLADNI). In form it resembled a square piano, and its compass was six octaves. Warm tributes to its merits by Spohr, Weber, Rink and Hummel are quoted (*A.M.Z.* xxxiv. 857, 858, see also 634, 645; and l. 451 note), but

notwithstanding these, the instrument is no longer known.

TERRADELLAS (TERRADEGLIAS), DOMENICO (Domingo Miguel Bernabé) (b. probably Barcelona, Feb. 1711; d. Rome, 1751), a Spanish musician, baptized in the cathedral at Barcelona, Feb. 13, 1711.¹ He began his musical studies at a monastery in Catalonia, but desiring greatly to go to Italy, he secured the aid of a merchant, a friend of his father's, who shipped the boy to Naples on one of his own vessels, and there, through the influence of the Spanish ambassador, Terradellas was entered as a pupil at the Conservatorio di San Onofrio under Durante.

His earlier efforts at dramatic composition quickly gained popular favour, and throughout his life it was to that branch of music that he principally devoted his talents, as the following long list of operas shows:

'Artaserse,' 'dramma per musica,' in three acts, the text by Pietro Metastasio, was performed at the San Carlo Theatre, Naples, in 1739, and in 1744 was played in Venice at the Teatro S. Gio. Grisostomo.

'Astarte,' text by Apostolo Zeno, was first performed at the Teatro alle Dame, in Rome, in 1738, and at Naples in 1739.

'Gli Intrighi delle cantarine,' a comic opera, was given at the Teatro del Fiorentini at Naples in 1740.

'Artemisia,' opera in three acts, was performed in Rome about 1740; in the same year part of Latilla's 'Romolo' was composed by Terradellas.

'Isidoro,' text by Metastasio, performed in Florence, 1742, is said to have been a failure.

'Merope,' 'dramma per musica,' in three acts, first performed in the Teatro alle Dame, Rome, in 1743, was, however, a great success. A MS. score is in the Fitzwilliam Museum, and MS. scores of this work and of Terradellas's opera 'Eptilde,' text by Apostolo Zeno, are in the library of the Bologna Liceo Musicale. (Gaspari's *Catalogue*, III, 342.)

'Giuseppe riconosciuto,' text by Metastasio, performed at Naples about 1745.

'Mitridate,' London, 1746.

'Bellerophon,' London, 1747.

'Imeneo in Atene,' in three acts, text by Silvio Stampiglia, was performed at Venice at the Teatro S. Samuele in 1750.

'Scosuri,' text by Zeno, was given at Rome in 1751.

It is said that he composed a Mass for four voices, and also some motets, but only one sacred composition of his seems to be known; it is included in the catalogue² of church music acquired by J. F. Libau, a priest of S. Gudule, Brussels, 1765, a *Nocturna procella* for solo voice.

In 1746 Terradellas was in London; his opera 'Mitridate,' the text by Zeno, was first performed at the 'great theatre in the Haymarket,' on Dec. 2, 1746, and ran for ten nights; on Mar. 24 following, his opera 'Bellerophon,' in three acts, was produced, and was performed ten times also. The interest aroused in Terradellas's music resulted in a good deal of it being printed by J. Walsh, of Catherine Street in the Strand. In the British Museum are copies of two collections of the 'Favourite songs in the opera call'd Mitridate by Sigr. Terradellas,' with instrumental accompaniment—Burney³ writes that those sung by Reginelli, an old but great singer, are admirable, the others very agreeable; also copies of 'The favourite Songs in the opera call'd Bellerofonte by Sigr. Terradellas,' with instrumental accompaniment; and of 'The favourite

¹ Saldoni's *Emérides de musiciens espagnols*, Madrid, 1860.

² Printed by Van der Straeten, Pays-Bas, l. 89.

³ *Hist. of Music*, iv. 455.

Songs in the opera call'd Annibale in Capua, by Sigr. Hasse and others.' This last work includes an aria for soprano, 'L' augellin che in lacci stretto,' by Signore Terradeglias, with accompaniment of flutes, viols and violins; a MS. copy of 'L' augellin' is in the Fitzwilliam Museum Library, headed 'alle Dame 1743,' and it is probably part of either 'Epitide' or 'Merope,' operas of that date.

Finally a work published by Walsh, which contained music from Terradellas's earlier operas:

'Dodici arie e due duetti. All' eccellenza di Melusina Baronessa di Schuemburg, Contessa di Walsingham, Contessa di Chesterfield, Queste composizioni di musica delle alme grand nobile sollievo con tributo di rispetto e d' ammirazione dedica e consagra l' umilissimo e devotissimo servo, Domenico Terradellas.'

Terradellas returned to Rome in 1747, passing through Paris, where he is said to have visited the grand opera and was much astonished at the amount of noise made on the stage, the singers shouting their loudest.

He was appointed maestro di cappella at S. Giacomo, on his return to Rome.

Two reports found currency as to the manner of his death; one has it that he died from grief at the failure of his opera 'Sesostri,' the other that owing to the great success of 'Sesostri,' Jommelli, his musical rival in Rome, caused him to be assassinated; the latter account seems to be discredited by the fact that Jommelli continued to reside in Rome quite peacefully until 1754.

LIST OF COMPOSITIONS IN MS.

Berlin State Library.—An aria, duetto, and terzetto for voices with instrumental accompaniments in MS. L. 268. An aria for soprano, 'Se perde l' usignolo,' in MS. 139. (Published in *Bellerophon*, 1747.)

British Museum.—In Add. MSS. 31,598: 'Terradellas. In Roma.' 'Era l' ombra del timore; for soprano with figured bass. In Add. MSS. 31,624: 'In Venezia 1744, del Sigr. Domco. Terradellas,' four arie for soprano with instrumental accompaniment and figured bass: 'L' onda dal mar divisa'; 'Deh respirar lasciatemi' (a MS. copy also in Fitzwilliam Museum); 'Concerti fedele'; and 'Se d' un amor tiranno'; the last two were published in Terradellas's 'Dodici arie,' 1747. All four arie are probably part of the opera 'Artaserse,' performed at the theatre S. Gio. Grisostomo, Venice, in 1744. In Add. MS. 14,219, p. 117: 'Alle Dame, 1751, Scena del Signor Domenico Terradellas,' for soprano with instrumental accompaniment; 'Soltudini anene, ombre gradite.' (Possibly from the opera 'Sesostri' performed at the Teatro alle Dame, Rome, in 1751.)

Brussels Conservatoire Library.—(See Wotquenne's *Catalogue*, vol. 2.) No. 4903, aria 'Dove si vide mal' (a MS. copy also in Naples), and 'Figlio ascolta' from 'Merope,' Rome, Teatro alle Dame, 1745. No. 5154, the separate MS. parts of an overture by Terradellas.

Darmstadt Library.—Aria 'Oh Dei quel mi sorprende,' for soprano, with instrumental accompaniment (a MS. copy also in Fitzwilliam Museum, dated 1743). It was published in 'Dodici arie,' 1747, the phrase 'l' amato aglio Epitide,' which comes in it, points to it being from the opera 'Epitide' (1743).

Dresden Library.—(Eitner's *Catalogue*.) Twenty-seven Arien with instrumental accompaniment.

Fitzwilliam Museum, Cambridge.—(Fuller Maitland and Mann's *Catalogue*, 1893.) In MS. 142, score of overture and songs in 'Merope' ('alle Dame, 1743'). In MS. 145 three Arie, 'alle Dame, 1743,' 'O Dei' (see Darmstadt Library); 'L' augellin' (published in 'Annibale in Capua'); 'Un bel gentil' (see Naples Library); and a song, 'Deh respirar' (another MS. copy in British Museum, dated 1744).

Milan Conservatorio Library.—(Eitner.) Seven arie with instrumental accompaniment.

Naples Real Collegio Library.—(Florino's *La scuola musicale in Napoli*, 1891.) Solleggio with pianoforte accompaniment; six arie with instrumental accompaniments, including 'Non sperar che cangi affetto' published in 'Dodici arie,' 1747; and a cantata with violins, viola and bass, 'Un bel gentile sembiante' (a MS. copy also in the Fitzwilliam Museum dated 1743. The music is probably from 'Merope' or 'Epitide' of that date).

Schoenlin Library.—(Kade's *Catalogue*, 1893.) Aria for soprano with accompaniment of two violins, viola and cembalo.

Vienna Hofbibliothek.—(Mantuan's *Catalogue*.) In MS. 17,033 an aria, 'Io son quel peleggrino,' by D. M. B. Terradellas. *Wolffenbüttel Herzogliche Bibliothek.*—(Vogel's *Catalogue*, p. 66.) MS. 302, an aria, 'Dono d' amica sorte,' in score.

Biels.—J. M. CARRERAS, *D. Terradellas* (1908); H. VOLCKMANN, *Journal of Int. Mus. Ges.*, xiii. 306.

C. S.

TERRY, CHARLES SANFORD (b. Newport Pagnell, Bucks, 1864), professor of history in the University of Aberdeen since 1903, has, in addition 'to many researches embodied in publications which lie outside the field of this Dictionary, specially devoted himself to the study of J. S. Bach and his epoch. The product of his study in this direction is contained in articles in the present edition of this Dictionary (see BACH, CHORAL, PASSION MUSIC, etc.). His publications in this field include *Bach Chorals* (3 vols.), 1915-21; *J. S. Bach's Original Hymn-tunes for Congregational Use*, 1922; a *Bach Hymn-book of 16th-Century Melodies*, 1923; *J. S. Bach, Cantata Texts, Sacred and Secular*, 1925. The last-named includes English translations of all Bach's cantatas, together with a reconstruction of the Leipzig Liturgy of Bach's day, founded on hitherto unexamined documents. *Bach's Four-Part Chorals*, 1926, is a complete Bach hymn-book. In 1920 Terry published an English translation of Forkel's *Johann Sebastian*; he has also arranged and published a stage version of Bach's 'Coffee Cantata,' which has been performed by the B.N.O.C. under the title 'Coffee and Cupid.' An exhaustive biography of Bach is in preparation. Terry is the holder of many academic distinctions, including honorary D.Mus. of Edinburgh, and hon. D.Litt. Durham.

C.

TERRY, SIR RICHARD RUNCIMAN, Mus.D. (b. Ellington, Northumberland, 1865), became organist and music-master at Elstow School in 1890, organist and choirmaster of St. John's Cathedral, Antigua, West Indies, in 1892. In 1896 he was appointed to a similar position at Downside Abbey, Somerset, where he began the admirable work of reviving the music written for the Latin ritual by early English composers; he was the first to perform liturgically the three- and five-part Masses of Byrd, Tye's 'Euge bone,' Tallis's four-part Mass and his 'Lamentations,' Mundy's Mass 'Upon the square,' and motets by Morley, Parsons, White, and others.

A larger sphere of work was opened to him when Westminster Cathedral was built and he was appointed organist and director of music in 1901, a post which he held with great distinction until 1924, when he resigned. Here, from the first, he set a high standard of performance as well as influencing the choice of music and demonstrating the great wealth of English liturgical music of the finest period. He revived the whole of Peter Philips's 'Cantiones sacrae,' Byrd's 'Gradualia' and 'Cantiones sacrae,' the 'Cantiones' of Tallis and Byrd, White's 'Lamentations,' and motets by Deering, Fayrfax, Shepherd, Tye and others. Among continental compositions of special interest, it may be mentioned that the contents of the fourth volume of Jacob Händl's 'Opus

musicum' were brought to a hearing at the cathedral. It is worth noticing that this great work was set on foot two years before the issue of the papal decree which directed Roman Catholic church musicians to give due regard to the polyphonic music of the past. M.

Terry was able to establish at Westminster Cathedral a complete tradition of musical treatment for the whole of the Roman liturgy in England based on principles laid down in the *Motu Proprio*, so that the Use of Westminster has offered an example to Roman Catholic church musicians unequalled anywhere else outside of Rome itself. Moreover, the great wealth of his repertory of English polyphonic music did much to arouse general interest in this music as a national, apart from an ecclesiastical, possession. This latter aspect of Terry's work was emphasised in the speech¹ with which Sir Henry Hadow presented him for the degree of Mus.D. conferred *honoris causa* by Durham University in 1911. Soon after this date when the Carnegie Trust entertained proposals for the publication of 'Tudor church music,' Terry was appointed chairman of the Trust's editorial committee. Unfortunately the pressure of other affairs made it impossible for him to carry through this scheme to its conclusion. Terry's publications include editions of various works of old English church music, five Masses, a Requiem Mass and motets of his own composition and the *Westminster Hymnal* (1912), which is the official hymnal for Roman Catholic use in England. They all bear the stamp of his musicianship, though the official acceptance of the hymnal necessitated the inclusion of a number of tunes which his own fine taste would naturally have rejected. A book, *Catholic Church Music* (1907), was designed as a handbook for the guidance of choirmasters both in the choice of music and the manner of its performance. A controversial chapter put forward some propositions as to the effect of the Reformation on English church music which the author has since admitted were historically untenable. Apart from this, however, the book is valuable. Terry's minor activities have included much lecturing, musical journalism (after his retirement from the cathedral he edited *Musical News* for a time) and folk-song collection. His *Shanty Book* (2 parts, see SHANTY) is the fruit of a long experience. He is among the most able of judges at the musical competition festivals. He was knighted in 1922. C.

TERTIS, LIONEL (b. West Hartlepool, Dec. 29, 1876), studied the violin at Leipzig and afterwards at the R.A.M., where he was encouraged by Sir Alexander Mackenzie to take up the viola for the sake of quartet-playing. He became an exceptionally fine player of that instrument, arranged a number of violin

concertos for it, and has toured widely in Europe and America as a virtuoso. The lack of solo music written for the viola was at first an obstacle to his success, but this, like all other prejudices against the viola as a solo instrument, has been largely overcome by his talent. Many of his contemporaries among English composers have written important works for him. These include concertos with orchestra by J. B. McEwen, A. Carse, Arnold Bax, B. J. Dale and York Bowen; sonatas, etc., with PF. by the last-named three with others, Ernest Walker, W. H. Bell, Cyril Scott, Frank Bridge and H. Farjeon (see *Mus. T.*, Mar. 1922). Tertis's performance has shown that while all the resources of violin technique are at command of the viola-player, its characteristic tone gives it a personality which is quite distinct from that of the violin. C.

TERZETTO (Ital.), generally a composition for three voices. Beyond one instance in Bach, and a few modern examples consisting of pieces not in sonata-form, the term has never been applied to instrumental music. It is now becoming obsolete, being superseded by trio, which is the name given to music written for three instruments, and now includes vocal music as well.

A terzetto may be for any combination of three voices, whether for three trebles—as the unaccompanied Angels' Trio in 'Elijah' those of the three women and three boys in 'Die Zauberflöte,' the famous trio in 'Il matrimonio segreto,' and that for three florid sopranos in Spohr's 'Zemire und Azor'—or for three male voices, like the canonic trio in the last-named opera. More frequent, naturally, are terzetti for mixed voices, the combinations being formed according to the exigencies of the situation. F. C.

TERZI, GIOVANNI ANTONIO, a 16th-17th century lutenist, wrote lib. 1 and lib. 2 of 'Intavolatura di liuto' containing motets, canzones, etc., by various Italian and French authors, published at Venice respectively in 1593 and 1599. Chilesotti republished 15 of Terzi's own lute pieces (Q.-L.).

TESCHNER, GUSTAV WILHELM (b. Magdeburg, Dec. 26, 1800; d. Dresden, May 7, 1883), studied singing and composition under Zelter and Klein at Berlin, and afterwards went to Italy, where his acquaintance with the Abbé Santini was the means of inducing him to take a greater interest in the older church music, both Latin and German. Returning to Germany, he settled in Berlin as a teacher of singing on Italian principles, and published various collections of Italian solfeggi, as well as some of his own. But his name is even better known by his republication, in score, of such works as H. L. Hassler's 'Psalmengesänge' of 1608, Eccard's 'Geistliche Lieder' of 1597, Eccard and Stobæus's 'Preussische Festlieder' of

¹ See *Mus. T.*, Aug. 1911, p. 625.

1642-44, and by his editorship of other collections of sacred and secular music of the 16th and 17th centuries.

J. R. M.

TESCHNER, MELCHIOR, Lutheran cantor at Fraustadt, in Silesia, at the beginning of the 17th century. His name chiefly appears in connexion with the Choral-tune to an acrostic hymn, 'Valet will ich dir geben,' written by Valerius Herberger, Lutheran pastor at Fraustadt, and a famous preacher of the time. The hymn, written in 1613, during a time of pestilence in Silesia, appeared in a publication of Herberger's in 1614, accompanied by two simple musical settings, *a 5*, by Teschner. Both melodies are given in Zahn's Collection, but only one has survived in modern use. Hymn and tune were received into the Gotha Cationale Sacrum of 1648, and have thence passed into most modern Choral-books. Teschner's original setting, *a 5*, appears in Schöberlein's 'Schatz' to Paul Gerhardt's hymn, 'Wie soll ich dich empfangen,' with which the tune is also now associated. With some alteration the tune has been adopted into English hymn-books to the Palm Sunday hymn, 'All glory, laud, and honour.' Two other works of Teschner are mentioned in *Q.-L.*

J. R. M.

TESI-TRAMONTINI, VITTORIA (*b.* Florence, Feb. 13, 1700¹; *d.* Vienna, May 9, 1775²), a celebrated singer. Her first instructor was Francesco Redi, and at a later date she studied under Campeggi, at Bologna, but it is evident that she sang on the public stage long before her years of study were over. She was singing in Italy in 1716, when she appeared with Cuzoni, in a pastoral called 'Dafni'; in 1718 she was at Venice, and went in 1719 to Dresden, just at the time when Handel arrived there in quest of singers for the newly established Royal Academy of Music in London. The story of her singing in Handel's 'Rodrigo,' in 1707, and of her falling in love with the master, is due to a mistake of Chrysander.³ Her voice was of brilliant quality and unusual compass. Quantz, who heard her at Dresden, defines it as 'a contralto of masculine strength,' but adds that she could sing high or low with equally little effort. Fire, force and dramatic expression were her strong points, and she succeeded best in men's parts; in florid execution she did not greatly excel. Her fame and success were at their zenith in 1719, but it does not appear that Handel made any effort to secure her for England. At some time or other, possibly at this period, she visited Poland with her father, where she attracted the admiration of the king. From 1721-47 there are traces of her singing each year in Italy. She married a barber

named Tramontini and appeared as 'Tesi-Tramontini, virtuosa di Camera della Granduchessa di Toscana,' from 1743. In the autumn of 1739 she was at Madrid. In 1747 or 1748 she went to Vienna, and opened a school for vocal instruction. In 1749 she played in Jommelli's 'Didone.' The book was by Metastasio, who wrote of this occasion, 'The Tesi has grown younger by twenty years.' She was then 49. Burney met her at Vienna in 1772, and speaks of her as more than 80. This mistake, and various statements by other historians, are settled by the discovery of the baptismal register.

Her nature was vivacious and *emporté* to a degree, and many tales were told of her freaks and escapades. Perhaps most wonderful of all is the story of her marriage, as told by Burney in his *Present State* (Germany), i. 318; in which, to avoid marrying a certain nobleman, she went into the street, and addressing herself to a poor labouring man, said she would give him fifty ducats if he would marry her, not with a view to their living together, but to serve a purpose. The poor man readily consented to become her nominal husband, and they were formally married; and when the Count renewed his solicitations, she told him that she was already the wife of another. This may be a version of her marriage with Tramontini, for as he was living in 1753, there would be no reason for her to make a marriage of convenience before that date, and after it, it is unlikely that such a marriage would be required. Among the pupils of La Tesi were the 'Teuberinn,' and Signora de Amicis, who took a friendly interest in the boy Mozart, and sang in his earliest operatic efforts in Italy.

F. A. M., with addns.

TESS, opera in 4 acts, founded on Hardy's novel by Luigi Illica; music by F. D'Erlanger. Produced San Carlo Theatre, Naples, Apr. 10, 1906; Covent Garden, July 14, 1909.

TESSARINI, CARLO (*b.* Rimini, 1690), an eminent violinist, probably a pupil of Corelli. He was violinist at St. Mark's, Venice, 1729; afterwards at SS. Giovanni e Paolo, and finally in the service of the Cardinal Wolfgang Hannibal at Brunn. GERBER (1) relates that in 1762 he appeared, still a vigorous old man, as a soloist at Amsterdam. Tessarini, who left a considerable number of violin sonatas and concerti grossi, played an important part in the evolution of the sonata and the instrumental concerto. (See A. Schering, *Geschichte des Instrumentalkonzerts*, p. 107; *Q.-L.*; *Riemann*.)

TESSIER, CHARLES (or CARLES), composer and lutenist, was born, according to Fétis, at Pézénas (Dep. Hérault) about 1550. He visited England some time before 1597, for in that year his *Le Premier Livre de chansons et airs de court, tant en françois qu'en italien et en gascon à 4 et 5 parties* was printed in London by

¹ The baptismal register, of Feb. 15, is copied in A. Ademollo's articles on the singer, in the *Nuova antologia*, xlii. 308, and the *Gazzetta musicale*, 1889, p. 285, etc.

² *Riemann*.
³ The documents referred to in note 1 correct Chrysander's error. See also Streatfield, *Handel*, p. 30 et seq.

Thomas Este, and from a dedicatory preface, written in Italian and addressed to Lady Penelope Riche (the 'Stella' of Sir Philip Sidney's Sonnets), we learn that these songs were composed in England and published at the request of friends. On the title-page Tessier is described as 'Musicien de la Chambre du Roy' (sc. Henri IV. of France). His only other published song-book was entitled *Airs et vilanelles françois, italiens, espagnols, suisses et turcs, mis en musique à 3, 4 et 5 parties*, and was printed in Paris in 1604. A setting by 'Tesseir' [sic] of the eighth song from Sidney's *Astrophel and Stella* was published in Robert Dowland's *A Muscicall Banquet* (1610). Either suggests that the presence of certain manuscript compositions of Tessier, dedicated to Maurice, Landgrave of Hessen, in Kassel, indicates that he spent some time in that town. P. H.

TESSITURA (Ital.), literally texture, from *tessere*, to weave. A term used to indicate how the music of a piece 'lies'; that is to say, what is the prevailing or average position of its notes in relation to the compass of the voice or instrument for which it is written, whether high, low or medium. 'Range' does not at all give the idea, as the range may be extended, and the general *tessitura* limited; while the range may be high and the *tessitura* low or medium. In place of a corresponding word we say that a part 'lies high or low.' For diagrammatic examples of *tessitura* see SINGING, Vol. IV. p. 764. H. C. D.

TESTORE, a family of violin-makers at Milan in the first half of the 18th century, consisting of a father, CARLO GIUSEPPE (1690-1715), and two sons, CARLO ANTONIO and PAOLO ANTONIO (1715-45). Carlo Giuseppe was the best of the three. His instruments have often passed for the work of his master, Giovanni GRANCINO (q.v.). In 1884 the violoncello called the 'Lindley Grancino' being under repair, the removal of its spurious label revealed the fact that it is the work of the old Testore, the original label, which was found well preserved, running thus:

'Carlo Giuseppe Testore allevo di Gio. Granzino in Contrada Larga di Milano, 1690.'¹

Bottesini's famous double-bass is another specimen of the old Testore's work. His instruments are strongly made, and often irregular in design. The model is generally of medium height, and the finish varies considerably, many being left very rough, and extremely plain in appearance. The tone, however, is usually good, and in exceptional cases very powerful and telling.

The instruments of the sons are less esteemed; they are lighter in colour, and a tendency to imitate Joseph GUARNERIUS (q.v.) is observable. The Testores worked at the sign of the Eagle

in the same narrow street where the Grancinos worked at the sign of the Crown. Alberti, Landolfi, Tanegia, Mantegazza, Giuseppe Guadagnini, Mezzadri, Lavazza and others complete the group of Milanese makers who followed the Testores in general plainness of style, aiming at producing instruments rather useful and lasting than ornamental. E. J. P.

TETRACHORD (Gr. τετραχορδον), a system of four sounds, comprised within the limits of a perfect fourth (see GREEK MUSIC; MONOCHORD; Guido D'AREZZO; HEXACHORD).

TETRAZZINI, LUISA (Signora Bazelli) (b. Florence, June 29, 1871), received her musical instruction there from Ceccherini at the Liceo Musicale, and from her sister Eva, the wife of Cleofonte CAMPANINI (q.v.), the conductor. In 1895 she made her début at the Teatro Pagliano (now Teatro Verdi) as Inez in 'L'Africaine.' She next sang at Rome, and later toured with great success in the other cities of Italy, having in the meantime acquired a great reputation in Spain, Portugal, Russia, Mexico, South America, etc. On Nov. 2, 1907, she made her début at Covent Garden as Violetta ('La traviata') and made a success both as singer and actress, confirmed the same season in her next parts of Lucia and Gilda. She next sang in the United States (Manhattan, Jan. 15, 1908), where she again made a great reputation. Since 1908 her principal operatic engagements have been either in North America or at Covent Garden, where she has sung for the first time there as Rosina, Marguerite de Valois ('Huguenots'), Leila in 'Les Pêcheurs de perles,' and Amina in 'La sonnambula.' She sang with the Chicago Opera Company 1913-14, and has since toured in concerts as an International Celebrity. In 1921 she published reminiscences called *My Life of Song*. A. C., adms.

TEUFELS LUSTSCHLOSS, DES (The Devil's Country-house), comic opera in 3 acts, by Kotzebue; music by Schubert; composed between Jan. 11 and May 15, 1814, and rewritten in the autumn, but not performed. The overture was played by the London Musical Society, June 17, 1880. It contains a singular anticipation of the muted violin passage in the overture to 'Euryanthe.' G.

TEUTSCHE. Mozart's way of spelling Deutsche, i.e. Deutsche Tänze—little German waltzes in 3-8 or 3-4, of which he, Beethoven, and Schubert, wrote many. For Schubert's 'Atzenbrucker Deutsche, July 1821,' see Vol. IV. p. 598. The famous 'Trauer-Waltzer,' sometimes called 'Le Désir' (op. 9, No. 2), for long attributed to Beethoven, is a Teutsch. (See ALLEMANDE, 2.) G.

THACKRAY, THOMAS, an 18th-century composer of minuets, country-dance tunes, etc. He resided in York, and was probably a native of that city. About 1770 he issued 'A Collection of Forty-four Airs, properly adapted for

¹ Communicated by W. E. Hill and Sons.

one, or two Guitars,' London, John Johnston, folio; also 'Six Lessons for the Guitar,' printed at York by Thomas Haxby for the author. Other 'Lessons' by him are extant.

F. K.

THAÏS, opera in 3 acts; text by Louis Gallet (after Anatole France); music by Massenet. Produced Opéra, Paris, Mar. 16, 1894; Covent Garden, July 18, 1911.

THALBERG, SIGISMOND (b. Geneva, 1812¹; d. Posilipo, Apr. 27, 1871), was one of the outstanding pianists of the 19th century.

He was the natural son of Prince Moritz Dietrichstein and Baroness von Wetzlar. At the age of 10 his father sent for him to Vienna, intending him for the diplomatic career; he attended the Polytechnic School, and had for a fellow-student the Duc de Reichstadt, who fired him with so much military ardour that he nearly became a soldier. He received his early musical education from Mittag, the first bassoonist at the opera. Later he learnt theory from Sechter, and developed his pianoforte technique under Hummel. He played at private parties in Vienna from the age of 13, and made a public appearance in 1826 at the house of Prince Metternich.² In 1830 he went on his first concert tour in different parts of Germany, three of his early compositions having already been published. In 1834 he was appointed Kammervirtuoso to the Emperor of Austria. In 1835 he had a great success in Paris, where he studied again under Pixis and Kalkbrenner; and in the following year appeared in London at the Philharmonic Concert of May 9, 1836, in his fantasia, opus 1, in which the special peculiarity of his technique was commented on in the *Musical World*. This consisted of so dividing a melody between the two hands that a bass could be played with the left and an accompaniment with the right, giving the effect of three independent hands. This seems to have been adopted by Mendelssohn in his E minor prelude after hearing Thalberg play; at all events the priority of publication is with Thalberg, in whose fantasia on 'Moïse' it appears. From this time forth he was an idolised figure all the world over, and endless were the comparisons made by musicians and others between him and Liszt. For some years the controversy raged, Fétis taking the side of Thalberg and Berlioz that of Liszt.³ In the following year he again visited London, in 1839 he went to Belgium, Holland and Russia, in 1845 to Spain, and in 1846 he played at the Wednesday Concerts in Exeter Hall. In 1855

he visited Brazil, and in 1857 he went to the United States with Viouxtemps (during which time he essayed operatic management with Ullman and Strakosch). In 1843 he married, in Paris, Mme. Boucher, widow of the painter and daughter of Lablache. In 1851 his opera 'Florinda' was brought out in London without success, and his second attempt at dramatic writing, 'Cristina di Svezia,' brought out at Vienna in 1855, was no more successful. In 1858 he bought a villa at Posilipo near Naples; but he reappeared in England in 1862 and 1863, and after that year, in which he went again to Brazil, he settled down as a wine-grower at Posilipo, where he died.

Thalberg's demeanour at the piano was always quiet, and his prodigies in manual achievement depended, not on force, but gradation of tone, and on the incomparable art of singing on the keyboard. Schumann refers to Thalberg very often, and gives a very trustworthy account of his qualities.⁴

Apart from his gift of melodic invention, he was a piano composer pure and simple. He was only really at home on the keyboard; but there he was, in his style, a king. His remarkable and well-developed power of singing on the piano (*legato sostenuto*), which he possibly gained from Clementi through Kalkbrenner and Moscheles, enabled him to produce melodic effects which had not hitherto been heard; and his clever use of the sustaining pedal made it possible to render the melody smoothly, while both hands were free to give the rushing scales, brilliant arpeggi and other sparkling passages with which he loved to surround his melodies.

With an intense feeling for melody, a wide span, and a peculiar shape of finger-tip, Thalberg was able to produce many and fine melodic and harmonic effects in legato playing, as well as in extended chords and arpeggi. His strongest points seem to have been 'pearly passage playing' (a light, rapid, silvery percussion), his knack of uniting the tones in long skips by means of the pedal, together with a singularly deft wrist-action. It is stated that he played Bach's fugues in incomparably beautiful style. In his directions to students he writes that he recommends, above all things, 'the slow, conscientious practice of fugues'; again, 'The performance of one fugue in three parts, in moderate time, without errors, and in good style, demands and proves more talent than the most rapid and complicated *morceaux*'; and once more, 'Generally pupils work too much with their hands and too little with their minds.'

The following is a list of his published compositions, in the order of their opus numbers

¹ The date Jan. 7 is given by Fétis, followed by Riemann: Mendel gives May 5, and a half-brother of Thalberg informed the writer of the article in the first edition of this Dictionary that the true date was Feb. 7. A search of the archives at Geneva reveals the fact that the birth was never registered.

² A pamphlet in the British Museum, entitled *Thalberg and Viouxtemps Grand Concert Book*, supports Fétis's statement that Thalberg made his first appearance in London in 1830, and states that his tour in Germany was in consequence of his success in England.

³ See correspondence in *Gazette musicale*, 1837.

⁴ See *Gesammelte Schriften*, third edition, I. 290, II. 67, 160, 212, 221, 310. For other appreciations see Rubinstein, *Kunst und ihre Meister* and Ernst Pauer, *A Contemporary Appreciation of Thalberg*, 'Performances,' 1863.

from the *Biographical Lexicon of the Austrian Empire*, of Dr. von Wurzbach (1882):

- Op.
1. Fantaisie et variations ('Euryanthe').
2. Do. do. ('Thème écosais').
3. Impromptu ('Sieg de Corinthe').
4. Souvenir de Vienne.
5. Graa Concerto (F minor).
5 bis. Hommage à Rossini ('Gull. Tell').
6. Fantaisie ('Robert le Diable').
7. Grand Divertissement (F minor).
8. Sechs deutsche Lieder (1-6).
9. Fantaisie ('La straniera').
10. Gr. Fantaisie et variations ('I Montecchi').
11. Sechs deutsche Lieder (7-12).
12. Gr. Fantaisie et variations ('Norma').
13. Sechs deutsche Lieder (13-18).
14. Gr. Fantaisie et variations ('Don Juan').
15. Caprice (E minor).
16. 2 Nocturnes (F# B).
17. 2 Airs russes variées (G).
18. Divertissement ('Soirées musicales') on motifs of Rossini.
19. Second Caprice (E#).
20. Fantaisie ('Huguenots').
21. 3 Nocturnes.
22. Grand Fantaisie.
23. Sechs deutsche Lieder (19-24).
24. Do. do. (25-30).
25. Do. do. (31-36).
26. 12 Etudes.
27. Gr. Fantaisie ('God save the Queen' and 'Rule Britannia').
28. Nocturne (E).
29. Sechs deutsche Lieder (37-42).
30. Do. do. (43-48).
31. Scherzo (A).
32. Andante in D#.
33. Fantaisie ('Moïse').
34. Divertissement ('Gipsy's Warning').
35. Grand Nocturne (F#).
35 bis. Etrennes aux jeunes pianistes. Nocturne.
36. (1) La Cadence. Impromptu (A minor). (2) Nour Étude de perfection. (3) Mi manca la voce (A#). (4) La Romanca. (5) Canzonette italienne. (6) Romance sans paroles.
37. Fantaisie ('Opéron').
38. Romance et Étude (A).
39. Souvenir de Beethoven. Fantaisie (A minor).
40. Fantaisie ('Donna del Lago').
41. 2 Romances sans paroles.
42. Gr. Fantaisie (Sérénade et Menuet, 'Don Juan').
43. Gr. Fantaisie No. 2 ('Huguenots').
44. Andante final de 'Lucia,' variée.

Unnumbered Pieces.—Auf Flügel (Mendelssohn) transcr.—2 Morceaux sur Lucia.—Arietta, 'Non so fremar.'—Zwei Gedichte.—Thalberg and Pankofka, Grand Duo.—Duo on 'Trovatore' with Gottschalk.—Graciosa, Rom. sans paroles.—Nocturno in D#.—Romance variée in E#.—Viola Mélodie.—Thalberg Galoppe.—La Berceuse.—Le Fils du Corse.—Pauline, Valse.—Larmes d'une jeune fille.—Tre giorni.—Pianoforte School.

D. H.

THALBERG, ZARÉ (b. Derbyshire, Apr. 16, 1858; d. Finchley, Middlesex, 1915), operatic soprano. Not, as was generally supposed, the daughter of Sigismond Thalberg, but a pupil who took his name, and, after vocal study in Paris and Milan, made her début on the stage at Covent Garden, under Gye's management in 1875, as Zerlina in 'Don Giovanni.' In that part she was thought to rival even Pauline Lucca, thanks to the unusual charm of her personality, the sweetness and purity of her voice (a very flexible *soprano leggiero*) and the grace and intelligence of her singing and acting. She also pleased in the Mozart operas, as well as those of Donizetti and Rossini, and quickly became a favourite. Then, after six successful seasons in London and on the Con-

tinental, she lost her voice, owing to an affection of the vocal cords, and had to retire from the operatic stage. The fact of her English parentage appears to have remained unknown during this important part of her career; nor was her identity with the 'Zaré Thalberg' of opera disclosed when she subsequently resumed her maiden name of Ethel Western and took to the drama as an exponent of Shakespearian parts.¹ She was engaged by Edwin Booth and toured with him for some time in America, winning a notable success as Lady Anne in 'Richard III.' Her career as an actress ended in the early 'nineties, when, on her return to England, she married John Oliver, a well-known Queen's Messenger ('Master of the Silver Greyhounds'), whom she accompanied on many of his journeys. Through him she became acquainted with some of the leading statesmen of her time, including Lord Beaconsfield. On her husband's death in 1908 she went to live at Finchley, and was married again, this time to one Belcher, whom she also survived.

H. K.

THAYER, ALEXANDER WHEELOCK (b. South Natick, Mass., U.S.A., Oct. 22, 1817; d. Trieste, July 15, 1897), the biographer of Beethoven.

In 1843 he graduated at Harvard University, took the degree of Bachelor of Laws there, and was for a few years employed in the College library. In 1849 he left America for Europe, and remained for more than two years in Bonn, Berlin, Prague and Vienna, studying German, corresponding with newspapers at home, and collecting materials for a life of Beethoven, the idea of which had presented itself to him while at Harvard, and which was his one serious pursuit for the rest of his life. In 1852 he tried journalism on the staff of the *New York Tribune*, but only to the detriment of his health. *Dwight's Journal of Music* was started at Boston in Apr. 1852, and Thayer soon became a prominent and favourite writer therein. In 1854 he returned to Germany, and worked hard at the rich Beethoven materials in the Royal (now State) Library at Berlin for nearly a year. Ill-health and want of means drove him back to Boston in 1856, and amongst other work he there catalogued the musical library of Lowell Mason. In the summer of 1858, by Mason's help, he was enabled to cross once more to Europe, remained for some months in Berlin and Frankfort-on-the-Oder, and in 1859 arrived at Vienna more inspired than ever for his mission. A severe and able review of Marx's Beethoven in the *Atlantic Monthly*, republished in German by Otto Jahn, had made him known in Germany, and henceforth the Biography became his vocation. The next year was passed in Berlin, Vienna, Graz, Linz, Salzburg, Frankfort, Bonn,

¹ The personal details newly set forth in this article have been communicated by the artist's intimate friend, Mr. David Smart, her neighbour at Finchley during the later years of her life.

RUBINSTEIN

etc., in intercourse with Hüttenbrenner, Wegeler, Schindler and other friends of Beethoven, in minute investigation of documents, and in a fruitless visit to Paris, for the sake of papers elucidating the history of Bonn. His next visit was to London, where he secured the reminiscences of Neate, Potter and Hogarth, and received much substantial kindness¹ from Chorley. From England he returned to Vienna, and in 1862 accepted a small post in the U.S. Legation there, afterwards exchanged for that of U.S. Consul at Trieste, where he died.

His book is entitled *Ludwig van Beethovens Leben*. It was written in English, translated into German by Dr. H. Deiters of Bonn and published by Weber of Berlin—vol. 1 (1770–96) in 1866; vol. 2 (1792–1806) in 1872; vol. 3 (1807–16) in 1879. Vol. 4 was unfinished at Thayer's death, and Deiters undertook to revise and complete the work, but died before accomplishing more than the revision of the first volume, which came out in 1901. Riemann completed the fourth volume in 1907, the fifth and last in 1908, and brought out the revisions of volumes 2 and 3 in 1910–11. Krehbiel's edition in English (3 volumes, New York, 1921) is the product of the whole of the above material. (See KREHBIEL.)

The quantity of new letters and facts, and of rectifications of dates, contained in the book is very great. For the first time Beethoven's life is placed on a solid basis of fact. At the same time Thayer was no slavish biographer. He viewed his hero from a perfectly independent point of view, and often criticised his caprice or harshness (as in the cases of Mälzel and Johann Beethoven) very sharply.

Thayer wrote countless articles in American newspapers; he was the author of *Signor Masoni* (Berlin, Schneider, 1862); of *Ein kritischer Beitrag zur Beethoven-Literatur* (Berlin, Weber, 1877); and of *The Hebrews and the Red Sea* (Andover, Mass., Draper).

a., with addns.

THEILE, JOHANN (*b.* Naumburg, Saxony, July 29, 1646; *d.* June 1724²), received his earlier instruction, musical and otherwise, at Magdeburg and Halle. He afterwards attended the University at Leipzig, where he also took part in various musical performances, partly as singer, partly as player on the viola da gamba. For further instruction in composition he betook himself to Heinrich Schütz, who was then for a time at Weissenfels. He found employment as teacher of music first at Stettin, then at Lübeck; at which latter place he is said to have had Dietrich Buxtehude as one of his pupils. Some doubt, however, attaches to this statement, as according to all accounts Buxtehude (*b.* 1637) was nine years Theile's senior,

and was already in 1668 organist at the Marienkirche of Lübeck. It is just possible that Theile, being a gambist, may have given instruction on the viola da gamba to Buxtehude, who afterwards wrote sonatas for that instrument. In 1673 Theile accepted the invitation of Duke Christian Albert of Holstein to be his Hof-Kapellmeister at Gottorp, but in 1675, when the duchy was invaded and occupied by the troops of the King of Denmark, Theile and the Duke himself were obliged to take refuge in Hamburg. It was while Theile was in Hamburg that in 1678 an opera-house was built, and operatic performances became an established institution there. The first opera at Hamburg was one upon a Scriptural subject, the music of which was composed by Theile. It was entitled 'Adam und Eva, oder Der erschaffene, gefallene, und wieder aufgerichtete Mensch.' The text of this has been preserved, but not the music. It is remarkable that most of these early Hamburg operas are on sacred subjects, among them another by Theile performed in 1681 entitled 'Die Geburt Christi.' Mention is also made of a secular opera by him entitled 'Orontes.' In 1676 Theile had been an unsuccessful candidate for the St. Thomas cantorship at Leipzig, but in 1685 succeeded Rosenmüller as Kapellmeister at Wolfenbüttel, and in 1689 held a similar post at Merseburg. The latter years of his life he spent at his birthplace, Naumburg, where his son was organist.

Theile had a great reputation as a master of counterpoint, and several MS. treatises remain, partly written by himself, partly compiled by some of his pupils, in which all the artificialities of canon and fugue are elaborately set forth with examples. The most important is one which bears the title

Musicalisches Kunstbuch worinnen 15 ganz sonderbare Kunststücke und Geheimnisse welche aus den doppelten Contrapuncten entspringen, anzutreffen sind.

In 1708 Theile had printed a catalogue of his church compositions, in which are specified twenty-three whole masses, eight Magnificats, twelve psalms a 4-11 with and without instruments. The only works which were ever published are 'Missarum juxta veterem contrapuncti stylum Pars I.' and 'Passio Domini nostri Jesu Christi sec. Matthæum.' This latter work was published at Lübeck, 1673, and dedicated to Duke Christian Albert of Schleswig-Holstein. It is provided with an instrumental accompaniment a 5, consisting of two viole da braccia and two viole da gamba with basso continuo. The words of the Evangelist are accompanied by the gambas in a somewhat florid fashion, while the words of our Lord are accompanied by the other violas in a simpler and more subdued style; the other single parts have only basso continuo. The dramatic choruses a 5 are accompanied in unison by all

¹ Grove's own correspondence with Thayer began in 1864, and was long and intimate. See *Life of Sir George Grove*, by C. L. Graves, p. 390.

² Buried June 24. Riemann.

the instruments. There are four solo arias of a pathetic devotional cast with basso continuo, but followed by full instrumental *ritornelli*. Theile permits the work to be performed also without instruments; in this case the place of the solo arias is to be taken by familiar Chorals, and the recitatives must be simplified into a form of plain-song. But the instrumental form of the work with its devotional arias is the more interesting as preparing the way for the fuller combination of voices and instruments, and the grander devotional style in the Passion Music of Sebastian Bach. (See PASSION MUSIC.) The work has now been republished in the *D.D.T.*, vol. xvii. Other works of Theile in MS. are church cantatas with German texts for various combinations of voices and instruments. (See *Q.-L.*; also a monograph on Theile by Dr. Friedrich Zelle.)

J. R. M.

THEINRED, a 14th-century Benedictine and singer at the monastery of Dover, wrote a treatise, *De legitimis ordinibus pentachordum et tetrachordum*, dedicated to Alueredo Cantuariensi, 1371. The examples are in letter notation (MS. Bodl., No. 842).

THEME (Fr. *thème*, *air*; Ger. (from Lat.) *thema*, (from Ital.) *motiv*; Ital. *tema*, *sogetto*, *motivo*) is used as an alternative to **SUBJECT** (*q.v.*), but more particularly in the phrase 'Theme with Variations' (*Tema con variazioni*) of the kind of subject developed into a self-contained form which is susceptible of further treatment in the form of **VARIATIONS** (*q.v.*).

THEORBO (Fr. *théorbe*, *tuorbe*; Ital. *tiorba* or *tuorba*, also *arciliuto*), the large double-necked lute with two sets of tuning-pegs, the lower set holding the strings which lie over the fretted finger-board, while the upper set are attached to the bass strings, or so-called diapasons, which are used as open notes.

According to Baron's *Untersuchung des Instruments d. Lauten* (Nuremberg, 1727, p. 131) the Paduan theorbo was the true one. The English archlute of that time, so frequently named as an alternative to the harpsichord or organ for the basso continuo or 'Through Base' accompaniment, was such a theorbo. Baron gives

—eight notes on the finger-board and nine off. This is the old lute-tuning of Thomas Mace,¹ who says that the theorbo is no other than the old English lute. But early in the 17th century many large lutes had been altered to theorbos by substituting double necks for the original single ones. These altered lutes, called, according to Mersenne, 'luth téorbé' or 'liuto attior-

bato,' retained the double strings in the bass. The theorbo engraved in Mersenne's *Harmonie universelle* (Paris, 1636) is really a theorboed lute. He gives it the following accordance:

The Chanterelle is single. For the 'Tuorbe' as practised at Rome the same authority gives (p. 88)—

In the musical correspondence of Huygens, (*Musique et Musiciens*) edited by Jonckbloet and Land, and published (1882) at Leyden, is to be found a letter of Huygens, wherein he wishes to acquire a large lute, to elevate it to the quality of a theorbo, for which he considered it from its size more fit. (See **LUTE**.)

Praetorius (*Organographia*, Wolfenbüttel, 1619, p. 50), with whom Mersenne agrees, states that the difference between lute and theorbo is that the lute has double and the theorbo single basses. The Paduan theorbo is about 4 ft. 7 ins. high. Praetorius, in the work referred to (p. 52), seems to prefer the Roman theorbo or **CHITARRONE**, which, although according to his measurement about 6 ft. 1 in. in height, is not so broad in the body or so awkward to hold and grasp as the Paduan. Baron praises especially the Roman theorbos of Buchenberg or Buckenberg, a German lute-maker, who was living at Rome about A.D. 1606. His instruments had 'oval-round' bodies of symmetrical form and a delicate and penetrating metallic timbre—a criterion of good tone in a stringed instrument.

Mace regards the lute as a solo instrument, and the theorbo as a concert or accompanying instrument: the name theorbo, however it originated, certainly became fixed to the double-necked lute, which first appeared with the introduction of opera and oratorio, when real part-playing was exchanged for the chords of the figured bass. Mersenne² calls it 'Cithara bijuga.' One account credits the invention of the double neck to a Signor Tiorba about 1600. Athanasius Kircher³ attributes the introduction of the theorbo to a Neapolitan market follower, who gave it the name in a joke. His idea, says the same authority, was brought to perfection by a noble German, Hieronymus Capsberger. Victor Mahillon, in his catalogue of the Brussels Museum (1880, p. 249), names as the inventor a Roman called BARDELLA (properly Antonio Naldi) who was in the service of the Medicis, and was much praised by Caccini in the preface to 'Nuove musiche' (A.D. 1601). Dr. Plume (MS. Pocket Book, 1657) writes: 'Inigo Jones

¹ *Musick's Monument*, London, 1676, p. 207.

² *Harmonicorum lib. xii.*, Paris, 1636.

³ *Musurgia*, Rome, 1650, cap. ii. p. 476.

first brought the theorbo into England presently after the Popish conspiracy, 1605. At Dover it was thought some engine brought from Popish countries to destroy the king, and he and it were sent up to the Council Table' (of the Star Chamber). These attributions all centre in the same epoch, that of the rise of accompaniment. The theorbo was last written for by Handel, as late as 1732, in the oratorio of 'Esther,' in combination with a harp, to accompany the song 'Breathe soft, ye winds,' a fact which would seem to support Mace's view of its being an orchestral instrument. The arciuto also appears in 'Athaliah,' 1733, in 'Gentle Airs.' It remained in occasional use until the end of the 18th century. (See *PLATE XLV.* No. 4.)

A. J. H.

THERÈSE, opera in 2 acts by Massenet. Produced Monte Carlo, 1907; Covent Garden, May 22, 1919.

THESIS, see ARSIS AND THESIS; METRE.

THESPIA, OR THE GODS GROWN OLD, comic opera in 2 acts; words by W. S. Gilbert, music by A. Sullivan. Produced Gaiety Theatre, Dec. 26, 1871.

THIBAUD, JACQUES (b. Bordeaux, Sept. 27, 1880), violinist. His father was his first teacher till the age of 13, when he was sent to Paris to the Conservatoire, studying under Marsick, and gaining in 1896 a *premier prix*. To supplement his modest means he played for some years in the Café Rouge, and was heard there by Edouard Colonne, who was struck with his talent, and engaged him for his orchestra.

On one occasion, the leader being unable to play the incidental solo in an orchestral work, Thibaud was asked to take his place, and did so with such conspicuous success that he became a regular soloist at the Colonne Concerts, appearing no less than fifty-four times during the winter of 1898, and completely establishing his fame in Paris. Since then he has travelled as a soloist in America (1903) and in every European musical centre. He has visited England frequently, playing chamber music at the Popular Concerts and soli on most of our concert platforms. In his own country he has played a good deal in concerted music with his two brothers, one a pianist and the other a violoncellist of ability. He is in the foremost rank of living violinists, a representative player of the French classic school, producing not a large, but an exceptionally pure and lovely tone, bowing with elegance, and in rapid passages he is as accurate as Sarasate. In the playing of cantabile passages he has a caressing style peculiar to himself, and is yet by no means wanting in virility. After the French composers he is heard at his best in the concertos and sonatas of Mozart, of which he gives an exquisite account. He played for some time on a violin by Carlo Bergonzi, but is now the possessor of the fine

Stradivari which was once the property of Baillot.

W. W. C.

THIBAUT, ANTON FRIEDRICH JUSTUS (b. Hameln on the Weser, Jan. 4, 1772; d. Heidelberg, Mar. 25, 1840), studied law at Göttingen, became tutor at Königsberg, and law-professor at the University of Kiel, then at Jena, and in 1805 at Heidelberg, where he remained till his death. The Archduke of Baden made him Geheimrath. He was an ardent admirer of the old Italian church-composers, especially of Palestrina, and founded a society for the practice of such music at his own house.

MENDELSSOHN (*q.v.* Vol. III. p. 383) writes with the greatest enthusiasm about Thibaut, 'There is but one Thibaut,' he says, 'but he is as good as half a dozen. He is a man.'¹

One of Thibaut's greatest services to the cause of art was his collection of music, which included a very valuable series of Volkslieder of all nations. The catalogue was published in 1847 (Heidelberg) and Thibaut's widow endeavoured to sell it to one of the public libraries of Germany, but was unable to do so till 1850, when it was acquired for the court library of Munich. Of still greater value is his book *Ueber Reinheit der Tonkunst* (Heidelberg, 1825, with portrait of Palestrina; 2nd edition, 1826). The title does not indicate (as his friend Bähr observes in the preface to the 3rd edition, 1853) purity either of construction or execution, but purity of the art itself. The treatise may justly claim to have exercised a moral influence. Thibaut maintains that as there is music which acts as a powerful agent in purifying and cultivating the mind, so there is music which has as depraving an influence as that exercised by immoral literature. From this point of view he urges the necessity of purity in music, and sets himself firmly against all that is shallow, common, unhealthy or frivolous. His idea of impurity may be gathered from the fact that in the essay on instrumentation he unhesitatingly condemns the flutes, clarinets and bassoons added by Mozart to 'The people that walked in darkness,' urging that they entirely change the character of the piece. He also strongly censures the frequent changes of tempo and expression by which Mozart gives colour to his splendid motet 'Misericordias Domine.' It is not too much to say that this book, dealing as it does in a spirit of great earnestness with questions which must ever attract the musical world, will always be of interest. The last German edition came out in 1861. The English version (*Purity in Musical Art*, John Murray, 1877) is by W. H. Gladstone. F. G.

THIBAUT IV. (b. Troyes, 1201; d. Pampeune, July 8, 1253), King of Navarre and Count of Champagne, famous TROUVÈRE (*q.v.*). Bishop La Ravallière republished 63 of his songs

¹ See also *The Mendelssohn Family*, vol. i. p. 138, for an extract, from Mendelssohn's letter to his mother, dated, from Heidelberg, Sept. 20, 1827, and printed here in previous editions.

in 1742, unfortunately with imperfect rendering of the melodies, of which some have since been often republished and become very popular.

E. v. d. s.

THIEME, CLEMENS (*b.* Gross-Dietmansdorf, near Dresden, Sept. 7, 1631; *d.* Zeitz, Mar. 27, 1668). He went to Copenhagen in 1642 as choir-boy in the court chapel, and returned in 1646 to Dresden, where he was appointed instrumental player in the court chapel. In 1663 he went to the court at Zeitz on the recommendation of Schütz, and became successively Konzertmeister and director of the chapel. In addition to masses and other church music, he composed sonatas for 2 violins, as well as for 5-8 instruments (*Q.-L.*).

THIERRY, the name of a celebrated family of Paris organ-builders. (1) PIERRE (*b.* 1605; *d.* Sept. 16, 1665), built the organ at the Hôtel-Dieu, Pontoise, now in the church of Notre Dame in that town, and carried out important work on the organs in the church of St. Gervais, Paris, during 1636. (2) CHARLES (*b.* Paris, 1641), son of the preceding, directed and enlarged the workshops started by his father. (3) ALEXANDRE, carried on the reputation of the firm. His masterpiece is the organ in the church of St. Louis des Invalides (1679). He restored the organs of St. Gervais, 1684-85, built that of the chapel of the Château at St. Germain-en-Laye, 1684, and of Saint-Cyr, 1688. (4) FRANÇOIS, the most celebrated of the family, built the great organ of the church of the Innocents, 1723-25, now in St. Nicholas du Chardonnet, and the great organ of Notre Dame, Paris, 1730-33, an instrument of 45 stops, which was received by Calvière, Du Mage, Daquin and Clérambault, in the second fortnight of June 1733.

F. R.².

THILLON, SOPHIE ANNE (ANNA), (*b.* London, c. 1816; *d.* Torquay, May 5, 1903), singer. Her father's name was Hunt. At the age of 14 she left England for France with her mother and sister, and received instruction from Bordogni, Tadolini and Claude Thomas Thillon, conductor of the Havre Philharmonic Society, whom she afterwards married. She appeared at Havre, Clermont and Nantes, with such success as to obtain an engagement at the Théâtre de la Renaissance, Paris (Salle Ventadour), where she made her début, Nov. 15, 1838, as the heroine, on the production of Grisar's 'Lady Melvil.' She also sang as Argentine in his 'L'Eau merveilleuse,' and in Monpou's 'La Chaste Suzanne,' etc. Her voice was a 'soprano sfogato' of marvellous timbre, from B₃ below the stave to E₅ in alt., and, combined with her personal charms, it obtained for her the favour of the public in a remarkable degree. On Aug. 11, 1840, she first appeared at the Opéra-Comique as Mathilde in 'La Neige.' She next played Elizabeth in 'Lestocq,' and became a great favourite with Auber, who gave her

instruction, and at whose request she sang the part of Catarina in 'Les Diamants de la couronne' (produced Mar. 6, 1841).

On May 2, 1844, she first appeared in public in England at the Princess's in the 'Crown Diamonds,' and met with extraordinary success, and the opera, then first produced in England, ran to the end of the season. She was also well received at the Philharmonic and other concerts. She afterwards appeared in England in 1845 and 1846 at Drury Lane, playing Stella in the 'Enchantress,' on its production May 14, 1845, a part composed expressly for her by Balfe; in 1846 at the Haymarket in 'Le Domino noir' and 'L'Eau merveilleuse'; and in 1848 at the Princess's in 'La Fille du régiment.' She also played at Brussels and in the French and English provinces, and from 1851-1854 in America, first introducing opera at San Francisco. She reappeared in 1854 at Jullien's concerts, after which she was only heard at intervals, on account of a severe throat attack. Her last appearances in opera were in 1855 at the Lyceum as Catarina. She was last heard in public at the Brighton Festival of 1867.

A. G.

THIRD. One of the most important intervals in harmonic music, since by one or other of its principal forms it supplies the means of definition in all the most characteristic chords. Three forms are generally met with—major, minor and diminished. The first of these occurs most characteristically in the major scale between the tonic and the mediant—as between C and E in the key of C (*a*). It is also an important factor in the Dominant chord, whether in the major or minor mode—as between G and B in the Dominant of the key

of C (*b*). The minor third occurs most characteristically in the minor scale as the converse to the principal major third in the major scale; that is, between tonic and mediant; as C and E_b in C minor (*c*). It also makes its appearance characteristically in the chord of the subdominant—as F-A_b in C minor (*d*); but both this minor third and the major third of the dominant chord are sometimes supplanted by major and minor thirds respectively for the convenience of melodic progression in the minor mode.

The ratio of the sounds of the major third is 4:5, and that of the minor third 5:6. Thirds were not accepted by the ancients as consonances, and when they began to come into use in the early Middle Ages as so-called imperfect consonances the major third used was that commonly known as the Pythagorean third, which is arrived at by taking four fifths from the lower note. The ratio of this interval is 64:81, and it is therefore considerably sharper

than the just or natural third; while the major third of equal temperament generally used in modern music lies between the two, but a little nearer to the Pythagorean third. (See TEMPERAMENT.)

The resultant tones of thirds are strong. That of the major third is two octaves lower than the lower of the two notes, and that of the minor third two octaves and a major third.

Diminished thirds are rough dissonances; they occur in modern music as the inversions of augmented sixths, as $F\sharp-A\flat$ (e); and their ratio is 225 : 256. (See INTERVAL; HARMONY.)

C. H. H. P.

THIRLWALL, (1) JOHN WADE (b. Shilbottle, Northumbria, Jan. 11, 1809; d. June 15, 1875), was the son of an engineer who had been the playmate of George Stephenson. He appeared in public before he was 8 years old, at the Newcastle Theatre, afterwards became music-director at the Durham Theatre, and was engaged by the Duke of Northumberland to collect Northumbrian airs. He subsequently came to London, was employed in the Opera band, and was music-director at Drury Lane, the Haymarket, Olympic and Adelphi Theatres successively. After the death of Nadaud in 1864 he was appointed conductor of the ballet music at the Royal Italian Opera. In 1843 he composed the music for 'A Book of Ballads,' one of which, 'The Sunny Days of Childhood,' was very popular; also many songs, violin solos, and instrumental trios. He was for some time music critic to the *Pictorial Times*, *Literary Gazette* and *Court Circular*. Besides music he cultivated poetry and painting, and in 1872 published a volume of poems.

His daughter and pupil (2) **ANNIE**, a soprano singer, first appeared at the National Concerts, Exeter Hall, in 1855. On Feb. 4, 1856, she first performed on the stage at the Strand Theatre, whence she removed to the Olympic, Oct. 12, 1856. In Oct. 1859 she joined the Pyne and Harrison company at Covent Garden. A few years afterwards she became the leading member of an English Opera company which performed in the provinces. She retired in 1876.

W. H. H.

THIRTEENTH, CHORD OF THE, see HARMONY (2), CLASSIFICATION OF CHORDS.

THOINAN, ERNEST, the *nom de plume* of ANTOINE ERNEST ROQUET (b. Nantes, Jan. 23, 1827; d. Paris, between May 27 and June 3, 1894), a distinguished amateur and collector of works on music. From collecting he advanced to writing, first as a contributor to *La France musicale*, *L'Art musical* and others. His essays in these periodicals he afterwards published: *La Musique à Paris en 1862* (Paris, 1863); *L'Opéra des Troyens au Père Lachaise* (1864); *Les Origines de la Chapelle musicale des souverains de France* (1864); *Les Déplorations de Guillaume Crestin*

(1864); *Maugars* (1865); *Antoine de Cousu* (1866); *Curiosités musicales* (1866); *Un Bisaieul de Molière : recherches sur les Mazuel* (1878); *Louis Constantin, roi des violons* (1878); *Notes bibliographiques sur la guerre des Gluckistes et des Piccinnistes* (1878). These pamphlets contain much curious information, and many corrections of Fétis's mistakes. He also republished the very scarce *Entretien des musiciens*, by Annibal Gantez (1878), with notes and explanations. *Les Hotteterre et les Chêdeville* (1894) is the last of his works. G. C.

THOMAS, ARTHUR GORING (b. Ratton Park, Sussex, Nov. 20, 1850; d. Mar. 20, 1892), opera composer, was educated for the Civil Service, and did not begin to study music seriously until after he came of age. In 1873 he went to Paris, and studied for two years under Émile Durand. In 1877 he entered the R.A.M., studied there for three years under Sullivan and Prout, and twice gained the Lucas medal for composition. He studied orchestration later with Max Bruch. An opera in three acts (MS.), libretto by Clifford Harrison, on Moore's 'The Light of the Harem,' performed in part at the R.A.M. on Nov. 7, 1879, procured him a commission from Carl Rosa which he fulfilled in 'Esmeralda.' Of his four concert-scenas, two were performed in London and one at the Crystal Palace; an anthem for soprano solo, chorus and orchestra, 'Out of the deep,' was performed at St. James's Hall in 1878; and a cantata, 'The Sun-worshippers,' was given with success at the Norwich Festival of 1881.

Ever since the composition of an early unfinished opera, 'Don Braggadocio,' to a libretto by his brother, Thomas had shown strong leanings towards dramatic writing, and it was no wonder that the work commissioned by Carl Rosa was at once recognised as a very remarkable production. The book of 'Esmeralda' was written by T. Marzials and A. Randegger, and the opera was produced at Drury Lane with great success, Mar. 26, 1883. It was afterwards given in a German version at Cologne and Hamburg, and was revived in a French version at Covent Garden in 1890. The original English version was again revived by the Royal Carl Rosa Company at Covent Garden in Jan. 1908; and the opera must be regarded as a classic of English art in its own way. Its characteristic and appropriate music, its originality of idea and skill of treatment as well as the mere beauty of the musical themes and the grace of many of the songs, entitle it to a very high place.

Two years afterwards, on Apr. 16, 1885, the Carl Rosa Company followed up this success with 'Nadeshda,' a romantic opera in four acts, to a libretto by Julian Sturgis. This, too, was given in a German version, at Breslau in 1890. The subject is more serious and less brilliant than that of 'Esmeralda,' and the popularity

of the work has not been as great, although the contralto song, 'O my heart is weary' (written for the German version), is one of the composer's best-known compositions. In June 1887, the Cambridge University Musical Society produced his orchestral 'Suite de Ballet.' A delightful comic opera, 'The Golden Web,' to a libretto by F. Corder and B. C. Stephenson, was not produced until after the composer's death; it was given at Liverpool, Feb. 15, 1893, and at the Lyric Theatre, London, Mar. 11 of the same year. Another important posthumous work was the cantata, 'The Swan and the Skylark,' to words by Mrs. Hemans, found in pianoforte score after his death; it was orchestrated by Stanford, and produced at the Birmingham Festival of 1894. In 1891 symptoms of mental disease began to appear, and on Mar. 20, 1892, his career ended tragically. He was buried in Finchley Cemetery. A great number of songs, duets, etc. were published in his lifetime, and some after his death; a practically complete list of his works was in the programme of the memorial concert given in St. James's Hall, July 13, 1892, with the object of founding a scholarship in his memory; this was duly established at the R.A.M. Some of his MSS. are now in the British Museum, and others in the R.C.M.

W. B. S.

THOMAS, CHARLES LOUIS AMEROISE (b. Metz, Aug. 5, 1811; d. Paris, Feb. 12, 1896), eminent French composer. The son of a musician, he learnt his notes with his alphabet, and while still a child played the piano and violin. Having entered the Paris Conservatoire in 1828, he carried off the first prize for piano in 1829, for harmony in 1830, and the Grand Prix de Rome in 1832. He also studied the piano with Kalkbrenner, harmony with Barbereau, and composition with the venerable Lesueur, who used to call him his 'note sensible' (leading-note), because he was extremely sensitive, and the seventh of his pupils who had gained the Prix de Rome. His cantata 'Hermann et Ketty' was engraved, as were also the works composed during his stay in Italy, immediately after his return. The latter comprise a string-quartet and quintet; a trio for PF., violin and violoncello; a fantasia for PF. and orchestra; PF. pieces for two and four hands; six Italian songs; three motets with organ; and a 'Messe de Requiem' with orchestra.

Early works of this calibre gave promise of a musician who would work hard, produce much, and by no means rest content with academical honours. He soon gained access to the Opéra-Comique, and produced there with success 'La Double Échelle,' one act (Aug. 23, 1837); 'Le Perruquier de la Régence,' three acts (Mar. 30, 1838); and 'Le Panier fleuri,' one act (May 6, 1839). Ambition, however, prompted him to attempt the Opéra, and there he produced 'La Gipsy' (Jan. 28, 1839), a ballet in three

acts, of which the second only was his, the rest being by Benoist; 'Le Comte de Carnagnola' (Apr. 19, 1841); 'Le Guerilléro' (June 2, 1842), both in two acts; and 'Betty' (July 10, 1846), ballet in two acts; but it was hard for so young a composer to hold his own with Auber, Halévy, Meyerbeer and Donizetti, so Thomas returned to the Opéra-Comique. There he composed successively

- 'Caroline,' 3 acts (Feb. 24, 1840).
- 'Angélique et Médor,' 1 act (May 10, 1843).
- 'Mina,' 3 acts (Oct. 10, 1843).
- 'Le Caïd,' 2 acts (Jan. 9, 1849).
- 'Le Songe d'une nuit d'été,' 3 acts (Apr. 20, 1850).
- 'Raymond,' 3 acts (June 5, 1851).
- 'La Tonelli,' 2 acts (Mar. 30, 1853).
- 'La Cour de Célimène,' 2 acts (Apr. 11, 1855).
- 'Peyche,' 3 acts (Jan. 26, 1867, revived with additions May 21, 1878).
- 'Le Carnaval de Venise,' 3 acts (Dec. 9, 1857).
- 'Le Roman d'Elvire,' 3 acts (Feb. 3, 1860).
- 'Mignon,' 3 acts (Nov. 17, 1866).
- 'Gille et Guillotin,' 1 act, composed in 1861, but not produced till Apr. 22, 1874.

To these must be added two cantatas composed for the inauguration of a statue to Lesueur at Abbeville (Aug. 10, 1852), and for the Boieldieu centenary at Rouen (June 13, 1875): a 'Messe solennelle' (Nov. 22, 1857), a 'Marche religieuse' (Nov. 22, 1865) composed for the Association des Artistes Musiciens; and a quantity of partsongs and choral scenes, such as 'France,' 'Le Tyrol,' 'L'Atlantique,' 'Le Carnaval de Rome,' 'Les Traîneaux,' 'La Nuit du Sabbat,' etc. The life and dramatic movement of his unaccompanied partsongs for men's voices showed the essentially dramatic nature of Thomas's genius, which, after enlarging the limits of opéra-comique, found a congenial though formidable subject in 'Hamlet,' five acts (Mar. 9, 1868). The Prince of Denmark was originally cast for a tenor, but there being at that time no tenor at the Opéra capable of creating such a part, Thomas altered the music to suit a baritone, and entrusted it to Faure. The success of this great work following immediately on that secured by 'Mignon,' pointed out its composer as the right man to succeed Auber as director of the Conservatoire¹ (July 6, 1871). (See CONSERVATOIRE.) A post of this nature leaves scant leisure for other employment, and from the date of his appointment Thomas composed nothing beyond the solfèges and exercises for the examinations, except one opera 'Françoise de Rimini' (Apr. 14, 1882), the prologue and fourth act of which are entitled to rank with his 'Hamlet.'

He was made a knight of the Legion of Honour in 1845, an officer in 1858, and received the Grand Cross in 1894, on the occasion of the thousandth performance of 'Mignon.'

There is a fine oil-painting of him by Hippolyte Flandrin, a terra-cotta bust by Doublemard, and a marble bust and medallion, the last a striking likeness, by Oudiné. Berlioz wrote an interesting article on the witty satire, 'Le Caïd,' collected in *Les Musiciens*, p. 241.

G. C.

¹ He had been professor of composition since 1862, and a member of the Institut from 1861.

THOMAS, (1) JOHN (*b.* Bridgend, Glamorganshire, Mar. 1, 1826; *d.* Mar. 19, 1913), known in Wales as 'Pencerdd Gwalia,' i.e. chief of the Welsh minstrels, a title conferred on him at the Aberdare Eisteddfod of 1861, was a very distinguished harpist, born on St. David's Day. He played the piccolo when only 4, and when 11 won a harp at an Eisteddfod. In 1840 he was placed by Ada, Countess of Lovelace (Byron's daughter), at the R.A.M., where he studied under J. B. Chatterton (harp), C. J. Read (piano) and Lucas and Cipriani Potter (composition). He remained there for about eight years, during which time he composed a harp concerto, a symphony, several overtures, quartets, two operas, etc. On leaving the R.A.M. he was made in succession Associate, Honorary Member and professor of the harp. In 1851 he played in the orchestra of Her Majesty's Opera, and in the same year went a concert tour on the continent, a practice he continued during the winter months of the next ten years, playing successively in France, Germany, Russia, Austria and Italy. He played a harp concerto of his own at a Philharmonic Concert in 1852. In 1862 Thomas published a valuable collection of Welsh melodies, and in the same year gave with great success the first concert of Welsh music in London. In 1871 he was appointed conductor of a Welsh Choral Union, which for six years gave six concerts annually. In 1872, on the death of J. B. Chatterton, he was appointed harpist to Queen Victoria; he also taught the harp at the R.C.M.

Thomas always took a deep interest in the music of his native country. There was scarcely an Eisteddfod of importance at which he did not appear as judge or performer, and he collected a large sum with which in 1883 he endowed a permanent scholarship for Wales at the R.A.M. In 1866, at the Chester Eisteddfod, he was presented with a purse of 500 guineas in recognition of his services to Welsh music. Thomas was a member of the Academies of St. Cecilia and the Philharmonic of Rome, the Florentine Philharmonic, and the R.A.M., Royal Philharmonic, and Royal Society of Musicians, of London. His compositions include a large amount of harp music, amongst which are two concertos; 'Llewelyn,' a cantata for the Swansea Eisteddfod (1863); and 'The Bride of Neath Valley,' for the Chester Eisteddfod (1866). 'Llewelyn' was revived at the Chicago Exhibition of 1893, where he acted as judge at an Eisteddfod. w. b. s.

(2) THOMAS (AP THOMAS) (*b.* Bridgend, 1829; *d.* Ottawa, Canada, May 1913), younger brother of the above, was also a distinguished harpist. He gave many successful concerts in Europe (1851-67), appeared at the Gewandhaus, Leipzig (Jan. 18, 1872) and went to America in 1895. His compositions include a cantata,

'The Pilgrim's Progress,' and he wrote a history of the harp. (See *Mus. T.*, June 1913, p. 388.)

THOMAS, KURT (*b.* Tönning, Schleswig-Holstein, May 25, 1904), composer. After passing his school years at Lennep in Rhineland and receiving some musical instruction from Hermann Ideran at Barmen, he entered the Leipzig Conservatorium in 1922, where he studied the piano with Robert Teichmüller, theory with Max Ludwig and composition with Hermann Grabner. He also had lessons in composition from Arnold Mendelssohn and, though he was never a direct pupil, owes much to Karl Straube for constant help and advice. In 1925 he was appointed a teacher of theory at the Leipzig Conservatorium. He is a composer of quite exceptional promise and has already written several notable works. His *a cappella* Mass in A minor for solo voices and two choirs, composed when he was 19, is a work of singular beauty and of remarkable maturity and sureness of touch. While intensely modern and individual in technique and idiom, it is by no means extravagant or revolutionary. It has been performed twice at the Leipzig Thomaskirche and in other towns, and has always produced a profound impression, notably at the 55th Festival of the Allgemeiner Deutscher Musikverein held in 1925 at Kiel, when the critics from all over Germany showed a rare unanimity in declaring it to be the outstanding feature of the Festival. His pianoforte trio, performed in 1925 at a concert of the International Society for Contemporary Music, is also a fine and admirably written work, sometimes a little ruthless in its dissonances but full of real substance and vigorous life. Published works (Breitkopf & Härtel):

Mass in A min. for soli and 2 choirs, op. 1; sonata in E min. for PF. and vln., op. 2; PF. trio in D min. op. 3; Psalm 137, 'An den Wassern zu Babel,' for 2 *a cappella* choirs, op. 4.

H. B.

THOMAS, LEWIS WILLIAM (*b.* Bath, Apr. 1826; *d.* London, June 13, 1896), of Welsh parentage, learnt singing under Bianchi Taylor, and in 1850, when 24, was appointed lay-clerk in Worcester Cathedral. In 1852 he was made master of the choristers, and during the next few years sang frequently at Birmingham, Gloucester, Hereford and Worcester. In 1854 he made his first appearance in London, at St. Martin's Hall; in 1855 he sang at the Sacred Harmonic, and in 1856 settled in London, with an appointment at St. Paul's. In the following year Thomas left St. Paul's for the choir of the Temple Church, and in the same year was appointed a gentleman of Her Majesty's Chapel Royal. In 1857 he had lessons of Randegger, and appeared under his direction on the operatic stage, which however he soon abandoned for the concert-room, where he was chiefly known as a bass singer of oratorio music. For a time

he contributed musical criticisms to the *Daily Telegraph*. W. B. S.

THOMAS, ROBERT HAROLD (*b.* Cheltenham, July 8, 1834; *d.* London, July 29, 1885), a favourite pupil of Sterndale Bennett, under whom he was placed at the R.A.M. at a very early age. His other masters were Cipriani Potter (theory), and Henry Blagrove (violin). He made his first appearance as a pianist at a R.A.M. Concert, May 25, 1850, and after this appeared frequently at the same concerts, both as pianist and composer. In 1858 Thomas played before the Queen and Prince Consort at Windsor, and in 1864 played Bennett's first concerto at the Philharmonic. A few years later, he retired from public life and devoted himself to teaching, becoming professor of the piano at the R.A.M., and the G.S.M. His compositions include many original piano pieces, some songs, many arrangements, etc., and three overtures for orchestra: Overture to 'As You Like It,' produced by the Musical Society of London in 1864; and 'Mountain, Lake and Moorland,' produced at the Philharmonic in 1880. W. B. S.

THOMAS, THEODORE (*b.* Esens, Hanover, Oct. 11, 1835; *d.* Chicago, Jan. 4, 1905), conductor, was eminent as one of the pioneers of music, especially orchestral music, in the United States. (See NEW YORK; CHICAGO.)

He received his first musical instruction from his father, a violinist, and at the age of 6 made a successful public appearance. The family emigrated to the United States in 1845, and for two years Theodore made frequent appearances as a solo violinist in concerts at New York. In 1851 he made a trip through the Southern States. Returning to New York he was engaged as one of the first violins in concerts and operatic performances during the engagements of Jenny Lind, Sontag, Grisi, Mario, etc. He occupied the position of leading violin under Arditì, and subsequently, the same position in German and Italian troupes, a part of the time officiating as conductor, until 1861, when he withdrew from the theatre. In 1855 he began a series of chamber-concerts at New York, with W. Mason, J. Mosenthal, Carl Bergmann, G. Matzka and F. Bergner, which were continued every season until 1869.

In 1864 Thomas began his first series of symphony concerts at Irving Hall, New York, which were continued for five seasons, with varying success. In 1872 the symphony concerts were resumed and carried on until he left New York in 1878. Steinway Hall was used for these concerts, and the orchestra numbered eighty performers. In the summer of 1866, in order to secure that efficiency which can only come from constant practice together, he began the experiment of giving nightly concerts at the Terrace Garden, New York, removing, in 1868, to larger quarters at the Central Park Garden.

In 1869 he made his first concert tour through the Eastern and Western States. The orchestra, at first numbering forty players, was, in subsequent seasons, increased to sixty. The programmes presented during these trips, as well as at New York, were noticeable for their catholic nature, and for the great number of novelties brought out. But it was also noticeable that the evenings devoted to the severer class of music, old or new, in the Garden concerts at New York were often the most fully attended. Thomas's tendencies, it was plainly seen, were toward the new school of music; but he was none the less attentive to the old, and he introduced to American amateurs a large number of compositions by the older masters. The repertory of the orchestra was very large, and included compositions in every school. F. H. J.

Thomas, who had been a member of the Philharmonic Society of New York since 1853, was elected conductor of the organisation in 1877, but after a single season's activities was called to Cincinnati, Ohio, to become director of the College of Music, an institution which had grown up as one of the fruits of the enthusiasm created by the Music Festivals instituted by him in 1873. In Cincinnati he organised an orchestra to give concerts in connexion with the College, but after a year accepted re-election to the New York post, journeying to the metropolis once a month in order to prepare and direct the concerts. In Feb. 1880 differences of opinion between him and the other officials of the College led to his resignation and return to New York, where, besides conducting the concerts of the Philharmonic Society, he called his own orchestra back into existence. With it he gave high-class symphony concerts, popular concerts, and concerts for young people until the end of the season 1887-88, when, discouraged for want of popular support, he abandoned all activities except those which devolved on him as conductor of the Philharmonic Societies of New York and Brooklyn.

In 1891 the Chicago Orchestra (later known as the Theodore Thomas Orchestra, and now since 1912 as the Chicago Symphony Orchestra) was organised for him by wealthy music-lovers in the metropolis of the North-West, and he transferred his labours to that city. The twelve years of his connexion with the Philharmonic Society as its conductor were for the society a period of uninterrupted prosperity, towards which he contributed greatly, not only by his artistic zeal and skill, but also by voluntarily relinquishing, year after year, a portion of the sum which under his contract he was entitled to collect. The story of his labours in Chicago belongs to the history of the orchestra which bore his name. In 1886 and 1887 he was concerned in a disastrous effort to put opera in the

vernacular on a high plane in America. He died having been privileged to conduct only three concerts in the new home of the orchestra over whose artistic fortunes he had presided for fourteen years.

H. E. K.

THOMAS AND SALLY, a short opera which kept the stage, as a secondary piece, for a great number of years. The music was by Dr. Arne, and it was first produced at Covent Garden on Nov. 28, 1760.¹ It was published by the composer himself, in folio, with the engraved date 1761; afterwards the plates were acquired by Walsh, who erased date, name of engraver and author's imprint. Walsh also issued a copy in oblong folio. The libretto was written by Isaac Bickerstaff, and the piece has the subtitle, 'The Sailor's Return.' The opera formed a model for a great number of plays up to the middle of the 19th century. Beard and Mattocks, with Miss Brent and Mrs. Vernon, were the original performers.

F. K.

THOMAS DE WALSYNGHAM, prior of Wymondham in 1396, and monk and singer at the abbey of St. Albans, c. 1440. He wrote a treatise, *Regulae Magistri Thomae Walsingham de figuris compositis . . .*, which is contained in the Waltham Holy Cross MS. in the British Museum (Q.-L.).

THOMASSCHULE, see LEIPZIG.

THOMÉ, FRANCIS LUCIEN JOSEPH (FRANÇOIS LUC JOSEPH) (b. Port Louis, Mauritius, Oct. 18, 1850; d. Nov. 16, 1909), composer, was brought as a child to Paris, where he entered the Conservatoire. He studied with Marmontel and Duprato, obtaining the second prize for piano and harmony (1869), and first prize for counterpoint and fugue (1870). On the completion of his studies he soon made a name for himself as a composer of works of small calibre, such as songs, piano pieces, etc., and was in great request as a teacher. His opera, 'Martin et Frontin,' was produced at Eaux-Bonnes in 1877, and his ballet, 'Djemmah,' at the Eden-Theatre, Paris, in 1886. Another ballet, 'La Folie parisienne,' was given at the same theatre; an operetta, 'Barbe-Bleuette,' was brought out in 1889, and 'Endymion et Phœbé' was given at the Opéra-Comique. One of his most important works was the music to the beautiful 'Mystère,' 'L'Enfant Jésus,' first heard in 1891. In 1892 his opera, 'Le Caprice de la reine,' was brought out at Cannes, and in 1898 another ballet, 'La Bulle d'amour,' was produced. Other works for the Paris stage were 'Le Papillon,' 'Le Trottin,' 'Mademoiselle Pygmalion'; and Thomé wrote also incidental music for many plays. A choral 'Hymne à la nuit' had a great success; but Thomé's name is best known to the English public by his popular 'Simple Aveu,' originally for piano. M.

¹ An earlier date for the production of the opera is undoubtedly wrong.

THOMPSON, a family of London music-publishers, of great note, in the second half of the 18th century. The firm started with PETER THOMPSON, who was established at the sign 'The Violin and Hautboy' (or, as sometimes given, 'The Violin, Hautboy and German Flute') at the west end of St. Paul's Churchyard. This address was afterwards named 75 St. Paul's Churchyard. Peter Thompson was publishing small musical works, as Country Dances, Instructions for the Flute, etc., in 1751. The sets of yearly Country Dances began with those for this year, and were continued throughout the whole period of the Thompson firm's existence and that of their successors. About 1758-59 Peter took his son Charles into partnership, and in 1762 his other son, Samuel, also. In 1764 Peter had either died or retired from the business.

The various changes in the firm and the dates for them are best shown in tabular form. They will serve to give accurate date to the published music and the instruments made or sold by the Thompson family:

Peter Thompson, 1751-58.
Charles and Ann, c. 1758.
Thompson & Son, 1758-59 to 1760-61.
Thompson & Sons, 1761-62 to 1763-64.
Charles and Samuel, 1764 to 1776-78.
Samuel and Ann, 1778.
Samuel, Ann and Peter, 1779-80 to c. 1794.
Samuel, Ann, Peter and Henry, 1792.
Samuel, Ann and Henry, 1795-96.
Ann and Henry, 1796-97 (or later).
Henry, 1798-99 to 1802-03.

In addition to this it may be mentioned that after 1790 the imprints frequently merely give 'Messrs. Thompson' or 'Thompsons' warehouse.'

About 1804 Henry Thompson gave up the business, and it was taken over by Purday & Button, which, in 1807, is transposed into 'Button & Purday.' S. J. Button, the senior partner, on the retirement of Purday in 1808, took into partnership John Whitaker the musician. As BUTTON & WHITAKER (q.v.) the firm built up a large business, which in 1820 became 'Whitaker & Co.'

In the early years of its existence the Thompson firm published many minor musical works, now of considerable interest. At a later date their trade was of a very extensive character, and they became among the most important of London music firms. Many violins bear their labels, but it must be remembered that these have been made by fiddle-makers in their employ. Dictionaries of violin-makers promulgate a great many errors of dates and facts relating to the Thompson firm.

ROBERT THOMPSON, probably a brother of Peter Thompson, had a shop also in or near St. Paul's Churchyard. His sign and address was at the Bass Violin at number 1 Paul's Alley. A violin label of his (not very trustworthy evidence) would certify him at this

address in 1749. He was certainly there in 1755, and publishing a small quantity of half-sheet music. He remained in Paul's Alley until 1771, when he removed to 8 Lombard Street, remaining there for about ten years. He was perhaps more of an instrument-maker than a music-publisher.

F. K.

THOMPSON, HERBERT (*b.* Hunslet, Leeds, Aug. 11, 1856), has been critic both of music and of pictures to the *Yorkshire Post* since 1886.

Thompson was educated privately in Germany (Wiesbaden) and at St. John's College, Cambridge. He entered the Inner Temple and was called to the Bar in 1879. At Cambridge he was strongly influenced by Stanford, who was then stirring up new musical life in the University; and it was largely through Stanford that music became the primary interest of Thompson's career. During the forty years of his association with the *Yorkshire Post* Thompson has steadily devoted himself to the improvement of musical cultivation in the North of England, and he holds there a position of exceptional authority. In 1925 the University of Leeds conferred on him the honorary degree of D.Litt. Outside journalism his influence has been exercised through the many musical institutions whose activities he has assisted as a member of committee; and also through his ably written analytical notes to concerts, and especially the Leeds Festival. He has been a valued contributor to this Dictionary, in both its second and third editions.

C.

THOMSON, CÉSAR (*b.* Liège, Belgium, Mar. 18, 1857), violinist, began to study the violin in childhood under his father, who sent him, at the age of 7, to the Liège Conservatoire of Music. There he joined the class of Jacques Dupuis, a very exacting task-master, with whom he studied to such purpose that before reaching the age of 14 he had acquired executive powers far exceeding those of any other of the many talented pupils, some of them since famous, of the Conservatoire; and two years later was recognised as possessing a technique unrivalled by any violinist then living. Later he went for some finishing lessons to Léonard, with whom he studied interpretation, but his career has been mainly noteworthy for achievements in the domain of pure technique. In 1875 he travelled in Italy, and became a member of the private orchestra of Baron de Derwies. In 1879 he joined Bilse's orchestra in Berlin as Konzertmeister, and in 1882, after a very successful appearance at the annual musical festival at Brussels, he was appointed violin professor at the Liège Conservatoire. This post he held until 1897, when he left Liège, and the following year succeeded Ysaÿe as principal professor of the violin at the Brussels Conservatoire. He has travelled much as a soloist in the principal cities of the Old and New Worlds, and

has scored many successes, notably at the Gewandhaus concert in Leipzig in 1891, and at Brussels in 1898, but in England and America he never succeeded in completely capturing the sympathies of his audiences. Practising emotional reticence to the verge of austerity he was considered greatest as an exponent of Paganini, whose works he revived at a time when they were fast becoming a dead letter. He also devoted himself to the editing, arranging and performing of works of the early Italian school.

W. W. C.

THOMSON, GEORGE (*b.* Limekilns, Dunfermline, Mar. 4, 1757; *d.* Leith, Feb. 18, 1851¹), was for fifty years Secretary to the Board of Trustees for the Encouragement of Arts and Manufactures in Scotland. His place in musical history is that of the most enthusiastic, persevering and successful collector of the melodies of Scotland, Wales and Ireland, a work begun in his youth and continued for forty years or more.

I. (1) *Scotland*. He proposed to rescue from oblivion, so far as it could possibly be accomplished, every existing Scots melody, in all its forms and varieties. Being in correspondence with and knowing personally gentlemen in every part of Scotland, no man had greater facilities for the work. He proposed, further, to publish 'all the fine airs both of the plaintive and lively kind, unmixed with trifling and inferior ones.' The first 'set' of 25 was published in Edinburgh in June 1793.

(2) *Ireland*. At first he included twenty favourite Irish airs in his 'sets,' denoting them in the index by an asterisk. Burns persuaded him to undertake a separate publication of Irish melodies, and offered to write the new texts. This was the origin of the two volumes under that title, 1814 and 1816 respectively, for the collection of which Thomson was indebted especially to Dr. J. Latham of Cork, and other friends in various parts of Ireland, who are responsible for whatever faults of omission and commission they exhibit. (See IRISH MUSIC.)

(3) *Wales*. Meantime he undertook to collect the melodies played by Welsh harpers and adapt them to the voice. The project found favour in Wales, and friends in all parts of it sent them to him as played by the harpers; 'but the anxiety he felt to have a complete and authentic collection induced him to traverse Wales himself, in order to hear the airs played by the best harpers, to collate and correct the manuscripts he had received, and to glean such airs as his correspondents had omitted to gather.' There was of course no deciding as to the original form of an air on which no two harpers agreed, and Thomson could only adopt that which seemed to him the most simple and

¹ Dates verified by registers and gravestone in Kensal Green Cemetery.

perfect. Very few if any had Welsh texts, or were at all vocal. To make them so, he in some cases omitted monotonous repetitions; in some repeated a strain; in most discarded the ornaments and divisions of the harpers; but no changes were made in the tunes except such as were absolutely necessary to 'make songs of them.'¹

II. In regard to their texts, these three collections of melodies consisted of four classes: (1) without words; (2) with none in English; (3) with English texts, silly, vapid, or indecent; (4) a few with unimpeachable words, even in which cases he mostly thought it well to add a new song. In fact, in the first twenty-four Scottish airs, sixteen have two songs each, most if not all written expressly for the work. A large number of eminent authors, including Peter Pindar, Mrs. Grant, Sir Alexander Boswell, Joanna Baillie and Sir Walter Scott, were employed by Thomson for this purpose.

When the melody was known to the poet, there was no difficulty in writing an appropriate song; when not, Thomson sent a copy of it with its character indicated by the common Italian terms, *Allegro*, etc., which were a sufficient guide. Burns was the principal writer. Allan Cunningham, in his *Life and Works* of the poet, leaves the impression that Thomson was niggardly and parsimonious towards him. Thomson disclaimed to take any public notice of Cunningham's charges; but in a copy of the work in possession of his son-in-law, George Hogarth (1860), there are a few autograph notes to the point. Thus in July 1793, Burns writes:

'I assure you, my dear sir, that you truly hurt me with your pecuniary parcel. It degrades me in my own eyes. However, to return it would savour of affectation; but as to any more traffic of this debtor and creditor kind, I swear by that honour which crowns the upright statue of ROBERT BURNS'S INTEGRITY—on the least motion of it I will indignantly spurn the by-past transaction, and from that moment commence entire stranger to you!'²

Thomson writes, Sept. 1, to Burns:

'While the muse seems so propitious, I think it right to inclose a list of all the favours I have to ask of her—no fewer than twenty and three! . . . most of the remaining airs . . . are of that peculiar measure and rhythm that they must be familiar to him who writes for them.'

III. As to the instrumental accompaniments, Thomson's plan was as new and original as it was bold. Besides the pianoforte accompaniment each song was to have a prelude and coda, and parts *ad libitum* throughout for violin, or flute, and violoncello, the composition to be entrusted to none but the first composers.

In the years 1791-93, Pleyel stood next to Haydn and Mozart; they in Vienna, he at that time much in London. Thomson engaged Pleyel for the work, but he soon ceased to write, and Thomson was compelled to seek another composer. Mozart was dead; Haydn seemed

to occupy too lofty a position; and Kozeluh of Vienna was engaged. But the appearance of Napier's Collection of Scots Songs with pianoforte accompaniments, written by Haydn during his first visit to London, showed Thomson that the greatest living composer did not disdain this kind of work. Thomson applied to him; and Haydn worked for him until about 1806. In 1806-07 Haydn arranged the Scots songs published in Wm. Whyte's collection. The star of Beethoven had now risen, and he did not disdain to continue the work. But he, too, died before Thomson's work was completed, and Bishop and George Hogarth made up the sixth volume of Scots songs (1841).

The following, based on a list supplied by Thomson to G. F. Graham, exhibits each composer's share in the work:

SCOTS SONGS

Vol. I. originally all by Pleyel. 1st set, June 1798; 2nd Aug. 1798.

Vol. II. originally all by Kozeluh (?). July 1799.

In the second edition of these (1803) Thomson substituted arrangements by Haydn for several which were 'less happily executed than the rest,' and in various re-issues other changes were made.

Vols. III., IV. all by Haydn. July 1802 and June 1805 respectively.

Vol. V. (Pref. dated June 1, 1818)

Haydn	4
Beethoven	26
	30

Vol. VI. (dated Sept. 1841)

Haydn	12
Beethoven	13
Kozeluh	1
Hogarth	21
Bishop	5
	52

Hummel also supplied some arrangements for a new edition issued in folio sheets. Besides these there was issued an edition in royal 8vo, which, in 1822, reached five volumes, with a sixth added in 1825.

WELSH MELODIES

The Preface is dated May 1809.

Kozeluh	10
Haydn	20
	30

Vol. II.

1811 Kozeluh	15
Haydn	17
Kozeluh and Haydn	1
	33

Vol. III.

1814 Haydn	4
Beethoven	26
	30

As a means of extending the knowledge of the Scottish melodies, Thomson, at the beginning of his intercourse with Pleyel and Kozeluh, ordered sonatas based upon such airs. Both composed works of this kind; but how many does not appear. It is evident from a letter of Beethoven to Thomson (Nov. 1, 1806) that, besides arrangements of melodies,³ the latter had requested trios, quintets and sonatas on Scottish themes from him also. Beethoven's price for compositions, which could only sell in Great Britain and Ireland, was such as could not be acceded to, and none were written. About 1818-20 he wrote variations on a dozen Scots melodies, which Thomson published, but which never paid the cost of printing either in Great Britain or Germany. At the lowest estimate Beethoven received for his share in Thomson's publications not less than £550. It is stated that Haydn was paid £291:18s. for arranging 230 airs. In 1825 Thomson paid £19 to Weber for arranging ten Scots songs. George Hogarth,

¹ This of course detracts largely from the value of his labour. G.

² This protest evidently refers to all songs written or to be written, and thus disposes of Cunningham's arguments.

³ All Beethoven's Scots and Irish songs are contained in Breitkopf's complete edition of his works, Series 24, Nos. 267-280.

who married Thomson's daughter, told the writer that the Scots songs only paid their cost.

In the winter of 1860-61 there appeared in Germany a selection of these songs from Beethoven's MSS., edited by Franz Espagne, in the preface to which he writes: 'The songs printed in Thomson's collection are, both as to text and music, not only incorrectly printed, but wilfully altered and abridged.' These groundless charges were made honestly, but with a most plentiful lack of knowledge. They need not be discussed here, as they were amply met and completely refuted in the *Vienna Deutsche Musikzeitung* of Nov. 23 and Dec. 28, 1861.

There are at least two portraits of Thomson in existence, one, a small water-colour in the National Collection, Edinburgh, and the other, almost a caricature, in Crombie's *Men of Modern Athens*. Both have been frequently reproduced. *George Thomson, the Friend of Burns; his Life and Correspondence*, by J. Cuthbert Haddon, was published in 1898.

A. W. T.; addns. F. K.

THOMSON, JOHN (b. Ednam, Kello, Oct. 28, 1805; d. May 6, 1841), first professor of music at Edinburgh University, was the son of an eminent clergyman. His father afterwards became minister of St. George's Church, Edinburgh. He made the acquaintance of Mendelssohn during the visit of the latter to Edinburgh in the summer of 1829, and showed him much attention, which Mendelssohn requited by a warm letter of introduction to his family in Berlin, in which he says of Thomson 'he is very fond of music; I know a pretty trio of his composition and some local pieces which please me very well' (*ganz gut gefallen*). During his visit to Germany he studied at Leipzig, kept up his friendship with Mendelssohn, and made the intimate acquaintance of Schumann, Moscheles and other musicians, and of Schnyder von Wartensee, whose pupil he became. In Oct. 1839 he was elected the first Reid Professor at EDINBURGH (*q.v.*). He gave the first Reid Concert on Feb. 12, 1841, and the book of words contains analytical remarks by him on the principal pieces—probably the first instance of such a thing. Thomson died deeply lamented. He wrote three operas or dramatic pieces, 'Hermann, or the Broken Spear,' 'The House of Aspen' and 'The Shadow on the Wall.' The last two were brought out at the Royal English Opera (Lyceum) on Oct. 27, 1834, and Apr. 21, 1835, respectively, and had each a long run. Two of his songs, 'Harold Harfager' and 'The Pirates' Serenade,' are mentioned as spirited and original. G.

THOMSON, WILLIAM, the editor of the first printed collection of Scottish songs united to their melodies. This is a folio named 'Orpheus Caledonius [*q.v.*], a collection of the best Scotch

songs set to Musick,' entered at Stationers' Hall, Jan. 5, 1725. He is said to have been the son of Daniel Thomson, one of the king's trumpeters for Scotland. As a boy-singer he sang at a concert—'The Feast of St. Cecilia'—in 1695. Before 1722 he had settled in London, and according to Burney had a benefit concert in that year. He appears to have become a fashionable singer and teacher, for his volume, dedicated to the Princess of Wales, contains a lengthy list of notable personages as subscribers. The book consists of fifty songs with their airs, having a slight accompaniment fitted to them. A second edition, in two volumes octavo, has another fifty added. The two editions have value and interest, although Hawkins speaks of him as 'a tradesman,' and says that the collection is injudicious and incorrect. The words of the songs were mainly taken from Allan Ramsay's *Tea-Table Miscellany*, published in 1724. Thomson was living in 1753. F. K.

THOMYRIS, QUEEN OF SCYTHIA, an opera acted at Drury Lane, Apr. 1, 1707. The libretto was by Peter Motteux, and adapted to airs by Scarlatti and Bononcini. These were arranged, and recitatives composed by Pepusch. After a few performances at its original place of production it was revived in the following year, 1708, at the Haymarket, the singers being Valentini, Hughes, Laurence, Leveridge with Margarita de l'Épine, Mrs. Tofts and Mrs. Lindsey. The songs from the opera were published in folio by Walsh. F. K.

THORN, THE. An English song by William Shield which has attained a considerable popularity. It seems to have been first sung in public about 1802 or 1803 by Charles Incedon in a monologue entertainment called 'Variety,' with which he travelled the country. It was issued on music-sheets about this date with the statement that the words were by Robert Burns. They do not appear in the usual editions, but research has shown that they formed one of several epigrams which Burns sent to William Creech the Edinburgh bookseller, May 30, 1789. After the death of Burns they were published in the *Edinburgh Advertiser* for Aug. 8, 1800. The second verse of 'The Thorn' has been added by an inferior writer, and the name 'Chloris,' which Burns used, changed into 'Chloe.' F. K.

THORNE, EDWARD H., Mus.D.² (b. Cranbourne, Dorsetshire, May 9, 1834; d. Dec. 26, 1916), received his musical education at St. George's Chapel, Windsor, where he was articled to Sir George Elvey. In 1853 he was appointed to the Parish Church, Henley, and in 1863 to Chichester Cathedral, which appointment he resigned in 1870 in order to devote himself more closely to the more congenial work of teaching the pianoforte. Thorne re-

¹ He spells the name Thompson, but it must surely be the same man. See *Die Familie Mendelssohn*, I. 243.

² Degree conferred by the Archbishop of Canterbury in 1913.

moved to London, and was successively organist at St. Patrick's, Brighton; St. Peter's, Cranley Gardens; St. Michael's, Cornhill; and St. Anne's, Soho, where from 1891 to the end of his career he maintained the fine traditions of the church in regard to Bach's music, directing the regular performances of the Christmas Oratorio and St. John Passion, as well as other cantatas, and giving organ recitals entirely composed of the master's works. His published works comprise several services, including a Magnificat and Nunc Dimittis for chorus, soli and orchestra, written for the Festival of the Sons of the Clergy; the 125th Psalm; a festival march, toccata and fugue, funeral march, overture and six books of voluntaries for the organ; some pianoforte pieces; several songs and partsongs; the 47th Psalm (for female voices), etc. An overture to 'Peveril of the Peak' won a prize at the Promenade Concerts in 1885. His unpublished works include trios for piano, violin and violoncello; sonatas for the violoncello and the clarinet; the 57th Psalm for tenor solo, chorus and orchestra; and many other compositions. W. B. S.

THORNE, JOHN (d. Dec. 7, 1573), English composer of church music. He is mentioned among the 'practitioners' of music in Morley's 'Plaine and Easie Introduction' (1597). He is referred to as 'of York' in the Commonplace Book of John BALDWIN (*q.v.*), which contains the following motets by Thorne:

'Stella coeli'; 'Ipsa stella' (printed by Hawkins); 'Gloriosa Stella maris'; 'Pro quibus virgo.'

West (*Cath. Org.*) conjectures that he was organist of York Minster from 1550-73. B.M. Add. MSS. 29,996/37b contains the organ score of another motet by 'Thorne of York'—'Exultabunt sancti.' Drake, in his *Eboracum* (1736), says that Thorne lies 'buried in the middle aisle from the west door' of the Minster, and gives his epitaph as below:

'Here lyeth Thorne, musician most perfect in his art, In Logick's Lore who did excell: all vice who set apart:

Whose Lief and conversation did all men's Love allure,

And now doth reign above the Skies in joys most firm and pure

Who dyed Decemb. 7, 1573.' J. M.

THOROUGH-BASS, or, as it used to be called, 'Through-Bass,' is obviously a translation of the Latin *bassus continuus* (Italian *basso continuo*), so called because, as originally employed, it continued without a break from the beginning of a piece to the end. Thorough-bass is often regarded as synonymous with figured bass (Ital. *basso numerato*; Fr. *basse chiffrée*; Ger. *bezielter Bass*), but though the terms are, for most practical purposes, interchangeable, they are not, actually, identical in meaning. If one were to figure the bass of a composition for several voices or instruments, in which bass rests occurred, we

should have, it is true, a *figured bass*, but not, in the strict sense of the term, a *thorough-bass*. If, on the other hand, wherever rests occurred in the bass, we incorporated in it whichever happened at the moment to be the lowest sounding part, tenor, alto, or even (as might easily happen in a fugal entry) treble, we should have, whether figured or unfigured, a true *continuo* or *thorough-bass*.

Because, for some two hundred years, a practical acquaintance with harmony was first gained through the medium of the *thorough-bass*, the latter word has come to be used to denote the science of harmony, just as has been the case with the word *General-Bass*, the German equivalent of the Latin *bassus generalis*.

The origin of the latter term is not quite so obvious as that of *bassus continuus*, but the *bassus generalis* was probably so called because, instead of being individual, it is concerned in a general way with all the other parts, both because any one of them is liable to be incorporated in it (as explained above), and also because they combine to constitute the harmony which the accompanist deduces *ex tempore* from the *general bass* before him. Such, at least, seems to be the opinion of Niede, who, in the first chapter ('On the Etymology of the *bassus generalis* and why it is so called') of his celebrated little work,¹ tells us that it is because 'all, or nearly all the other parts are comprised *generaliter*, that is to say in common (*insgemein*), in this single part.' He adds:

'It is also called *bassus continuus*, or, with the Italian termination, *basso continuo*, because it plays on continuously, whereas the other parts occasionally pause the while. But nowadays this Bass, too, frequently pauses, especially in Operas and cleverly (*künstlich*) composed secular pieces; moreover, any *Violine-Bass*² might be styled *bassus continuus*, therefore the name *General-Bass* seems more convenient here.'

THE BEGINNINGS OF THE BASSUS CONTINUUS. —It may very well be (though in the absence of fresh and unexpected evidence any such theory is incapable of proof) that the thorough-bass has a dual origin. It will be shown presently that the *bassus continuus*, which in 1602 became widely known through its employment by Lodovico Grossi (better known to us by the name of his birthplace, VIADANA, *q.v.*), had been in existence some years previously, though not under that name, in the form of 'Organ Bassettes' (presently to be described), which were used for the accompaniment of polyphonic compositions. The figured basses of Cavalieri, Peri and Caccini, which appeared in 1600, and which formed the basis of the accompaniment of their recitative, may possibly have had a similar origin, but it seems not improbable that they

¹ *Musicalische Handleitung*, etc. (Musical Guide, etc.), by Friderich Erhard Niede, Part I. Hamburg, Spiering, 1700.

² Any such part, played by a bass instrument to support the organ or harpsichord would, if manuscript, be unfigured, but, if printed, would usually be a duplicate of the part figured for the use of the accompanist. As Niede says, the term *continuo* is as applicable to the one as to the other, and, indeed, was regularly used by J. S. Bach in this double sense.

were intended to replace the written-out harpsichord accompaniments of vocal solos which are known to have existed some years previously.¹

The substitution of figures for a written-out accompaniment would, in the instance of the composers named above, have possessed a distinct advantage over and above the obvious one of saving trouble, for, besides the harpsichord,

¹ Otto Kinkeldey describes a set of Madrigals for one, two and three soprano voices, with accompaniment for the harpsichord, by Luzzasco Luzzaschi (*Orgel und Klavier in der Musik des 16. Jahrhunderts*, Leipzig, B. & H. 1910, p. 157 sq.). The title is as follows: 'Madrigali di Luzzasco Luzzaschi per cantare e sonare a uno, a doi, e tre soprant, fatti per la musica del già Serma Duca Alfonso d'Este. Stampata in Roma appresso Simons Verovio, 1601.' The Harpsichord is not actually specified as the instrument to be used, but the nature of the accompaniment plainly shows (as Kinkeldey points out) that no actual can have been intended. Although the date of publication is 1601, a passage in the dedication proves definitely that the music was written before the death of Duke Alfonso in 1597. In an appendix Kinkeldey prints in *extenso* two of the madrigals, one for a single voice, and another for two, in modern notation (i.e. pp. 286 sq.). The opening bars of the first of the two are given below, and will suffice to show the character of the accompaniment. The latter is in four parts nearly throughout (and this, as Kinkeldey tells us, is also the case in the madrigals for more than one voice, when only a single voice is singing, as in fugue entries), and the upper part of the accompaniment is identical with the voice part, except where the latter indulges in 'diminutions,' as in bars 13, 14, of the following extract:

1.

Au - - - ra so - av -

e ò se - greti ac - cen - ti Che pe - netrando

per l'o - recchie al Co - re Sueglias - ti la . .

do - ve dor - mi - va A - mo - re, sue -

instruments of the lute tribe co-operated in the accompaniment.²

Unless, therefore, a separate accompaniment were written out for each instrument in accordance with the requirements of its particular technique, a plain bass, with figures as a guide to the harmony, would obviously be a more convenient basis for an accompaniment extemporised on different instruments than written-out harmony adapted to the requirements of the harpsichord (or any one instrument) alone.

Let us briefly examine the facts attending the first appearance of the *bassus continuus* or Thorough-bass:

(1) In the year 1600 there appeared works by the three composers already mentioned, all three with figured basses.³ Cavalieri was first

gliasti la do - ve dor - mi - va A -

mo - re Per tè . . re

spi - roe vi - vo.

² In the preface, *A Lettori*, to his 'Euridice' (1600) Peri enumerates the *gravicembelo* (harpsichord), the *chitarone* (theorbo), the *lira grande* (violin) and the *Rutto grosso* (tenor lute)—Caccini, in the preface to the *Nuove musiche* (1602, 2nd ed. 1607), speaks of the *chitarone* as best fitted to accompany the voice, 'particularly the tenor voice.' Guidotti, who edited Cavalieri's 'Rappresentatione di anima e di corpo' (1600), tells us that 'a *lira doppia*, a *clavicembalo*, a *chitarone*, or so-called theorbo, together produce an excellent effect, as also a soft-toned Organ with a *chitarone*.' And he adds: 'And Signor Emilio [Cavalleri] would approve of the instruments being changed in accordance with the effect of (i.e. to be produced by) the reciter.' A further most interesting detail was disclosed by the discovery, on the part of Signor Domenico Alaleoni, of an original copy of the 'Rappresentatione.' In addition to the two previously known. It was found (catalogued under the name of Guidotti) in the library of the Vallicella, where it had been used in the performances which took place there. The word *Tiorba* entered on the first page shows that it was appropriated to that instrument, and the word *tace*, prefixed to all the solo numbers shows that it was in operation only when more voices than one were singing. Cavalieri did not, therefore, agree with Caccini in regarding the *chitarone* as specially fitted to accompany the voice, 'particularly the tenor voice.'

³ The figuring of all three had one important point in common: they all used double figures (10, 11, etc.) as a means of distinguishing the compound intervals. This practice, which survived only a very short time, enabled the accompanist to know with certainty in

in the field with his allegorical oratorio, the 'Rappresentazione di anima e di corpo,' which

what octave the composer desired the interval in question to be taken, and, when the composition was in several parts, it was thus possible to make the accompaniment an almost exact reproduction of the vocal or instrumental score. Neither Peri nor Caccini, whose figured basses were used only to accompany a single voice, went beyond the figure 14 (Peri not beyond 11), but Cavalleri, who employed a figured bass to accompany three, four, and even five vocal or instrumental parts, went as far as 18—a double octave plus a fourth). The final *Ricordo* of the 'Rappresentazione,' will serve as an example, and it will be seen that if the figuring is carefully followed, as in the set out accompaniment supplied below in small notes, it is practically impossible to arrive at a version which differs in any important particular from the instrumental score. It must be mentioned that, in accordance with one of the few rules given by Guidotti in his preface, a ♯ over a bass note, when unaccompanied by the figure 3 (as on the last crotchet of bars 3 and 8), is to be taken as equivalent to ♯10, not ♯3.

It will be observed that Cavalleri's figuring necessitates the occasional use of extended harmony: compare, for instance, the different treatment of the same harmony on the last crotchet of the third and seventh bars.

In one important particular Cavalleri is far in advance of his Florentine colleagues: he occasionally uses two (and, in

was performed in February, and Peri and Caccini followed late in the year, each with a primitive opera, 'Euridice.' Peri had written an opera, 'Dafne,' as early as 1594, but it is unfortunately lost, and we have no means of knowing what form of accompaniment was provided and, in particular, whether figures were used. We must, therefore, accept 1600 as the date of their first known appearance.

(2) In the year 1602 Viadana published the first instalment of his famous work, entitled:

'Cento concerti ecclesiastici, a una, a due, a tre, & a quattro voci. Con il basso continuo per sonar nell' organo Nova inventione commoda per ogni sorte de cantori, & per gli Organisti di Lodovico Viadana. Opera duodecima In Venetia, appresso Giacomo Vincenti MDCII.'

The wording of this title, 'A New invention, suitable for all kinds of Singers, and for Organists,' alone makes it clear that the novelty of the invention resided, not in the continued bass only, but in the character of the vocal compositions as well. With regard to the former, indeed, it is noteworthy that two years earlier Guidotti, in his preface to Cavalieri's work, speaks of the *basso continuato*. On the other hand, Viadana mentions in his preface that he had composed the concertos (first published in 1602) five or six years ago in Rome, and he adds the significant statement that they 'found such favour with many singers and musicians that they were not only found worthy to be sung again and again in many leading places [of worship], but that some persons actually took occasion to imitate them very cleverly and to print some of these imitations.' This means that the year in which Viadana's work became known to the world was not 1602 but 1596 or 1597. It is improbable that either Cavalieri or the Florentines were the imitators to whom Viadana refers, as their works were of so widely different a character, but that they must have known of, and perhaps derived ideas from, Viadana's work is pretty certain.

Viadana's basses differ from theirs in one important particular: they are not figured, the nearest approach to figures being ♯ and ♭ placed a third above, and slightly to the left of, the bass note, to indicate an accidentally sharpened or flattened third. A ♯, intended to be placed a sixth above the bass (but always misplaced by the printer), was also used in a few instances to indicate an accidental major sixth. It is, however, very probable (indeed almost certain) that Viadana, though only very occasionally, used the figure 6, which the printers, not being familiar with figures over a

one instance, three) figures one above the other, chiefly to indicate a ♯ chord, which appears oftentimes as $\frac{1}{2}$ or $\frac{1}{3}$. In the basses of Peri and Caccini, on the other hand, if a ♯ chord seems appropriate, it must be supplied at the discretion of the accompanist. Cavalieri's single example of the use of triple figures is $\frac{1}{2}$, denoting the second inversion of a seventh on an accidentally sharpened leading note, which at a later period was figured $\frac{1}{2}$ or $\frac{4}{2}$, omitting the 6.

bass, mistook for a *b* (which in those days was often rounded at the bottom, *b*) and printed as such.¹

(3) We know, mainly through the researches of Kinkeldey published in the work already mentioned (cf. p. 326, note 1), that basses for the organ, similar in character to the *basso continuo* in Viadana's concertos for several voices, were in existence some years before the close of the 16th century. When the composition was for two, or even three choirs, the organist either had the two (or three) vocal basses, written one above the other, before him and selected from them whichever note was lowest, or else he had a single bass part, prepared on the same principle, and was thus saved a considerable amount of trouble. In some cases the highest of the voice parts was printed over the organ-bass, thus enabling the player the better to divine the harmony.

The earliest example recorded by Kinkeldey is printed by Vincenti of Venice and dated 1594.² It is an organ part to some 8-part motets for double choir by Giovanni Croce and is marked 'Spartidura.'³

The two vocal basses are printed one above the other, and \times and *b* above the bass are used, as by Viadana (and as throughout the figured bass age), to denote accidentally sharpened or flattened thirds.

A similar bass, to Adriano Banchieri's 'Concerti ecclesiastici a 8 voci,' was printed by Vincenti in 1595. Here, however, only the bass of the first choir is given and the cantus part is printed on the upper stave. The accidentals \times and *b* are used as in Croce's 'Spartidura,' but are sometimes placed over the cantus instead of the bass. Though only one bass is printed, the organist is told how to remedy the

omission, namely, by selecting the highest and lowest notes of the second choir and incorporating them in the printed *cantus* and bass parts respectively.

Kinkeldey mentions and describes other interesting examples. Apart from all these there can be little doubt that he is right in his assumption that organists had been in the habit of preparing manuscript organ parts, on the principles described above, long before any were printed. The thorough-bass, therefore, dates much farther back than was formerly supposed.

VIADANA

As it has been seen that Viadana did not invent the *basso continuo*, as he was for so long believed to have done, it may well be asked what he did to deserve the reputation for invention which he undoubtedly enjoyed in his own day, both in Italy and abroad. This question is best answered by Viadana himself. He tells us in the preface to his 'Cento concerti' that, when one, two or even three singers wished to sing with the organ, they 'were sometimes forced by the lack of compositions suitable to their purpose to take one, two or three parts from motets in five, six, seven or even eight parts'; after describing the effect of these mutilated performances he continues:

'Accordingly, having repeatedly given no little thought to these difficulties, I have tried very hard to find a way of remedying so notable a deficiency, and I believe, thank God, that I have at length found it, having to this end composed some of these concertos of mine for a single voice (for sopranos, altos, tenors, basses) and some others for the same parts in a variety of combinations. . . .'

Thus we see that it was a new application of the continued bass, and not the thing itself, that Viadana claimed, and was acknowledged, to have invented.⁴

His actual basses, however, in the 'Concerti a voci pari' (S.A.T.B.) mark an advance upon the old organ basses, for, whereas the latter were entirely derived from the vocal parts, Viadana's are occasionally independent of the vocal bass. Whether the application of the continued bass, on his part and that of the monodists, Peri, Caccini and Cavalieri, to compositions in which the complete harmony was not supplied by the voices (particularly to compositions for a single voice) was an idea derived entirely from the old organ basses, or whether it was partly suggested by written-out harpsichord accompaniments, such as those of Luzzaschi (cf. p. 326, note 1), as suggested above, it is at present impossible to determine.

¹ The evidence on which this statement is based is embodied in two articles by the present writer in the correspondence columns of the *Musical Times* of July and Sept. 1922. There it was also conclusively proved that Viadana used the *signum cancellatum* \times placed a sixth above the base note (as stated in the text), to indicate an accidentally sharpened major sixth. Adriano Banchieri, in his *L'organo suonarino*, 1605, and Galeazzo Sabbatini, in his *Regola facile*, etc., 1628, allude to the similar practice of placing the \times a third below the bass to denote a sharpened sixth (or inverted third); the latter speaks of it as 'virtually obsolete.' The following example from the Concerto 'Pecavi super numerum' shows both the meaningless flats which have replaced Viadana's sixes and also the \times (here restored to its right position, but misplaced in the German reprint of 1613 from which the example was taken) indicating the sharpened sixth:

N.B.—The strokes through the first *b* and the \times are leger lines. It will be noticed that the \times over the crochets *g* is the only one of the three which has any justification, as a flat, namely, as marking the modulation to D minor. But it is more likely that here, too, Viadana wrote a 6, leaving the accidental flattening of the third to the musical instinct of the accompanist.

² Kinkeldey thinks that the date may possibly be a misprint on the ground that no edition of the voice parts of 1594 is known to exist, though he points out that the extant edition of 1599 is known by the words *Novamente ristampati* in the title to be a reprint, which consideration seems to invalidate his doubt.

³ So called because the organ basses, unlike the voice parts, were generally barred. *Partire* or *spartire* originally denoted the division of the music by bar-lines.

⁴ In speaking of the 'Basso generalis seu continuo,' Praetorius tells us (*Syntagma*, 1619, vol. iii. ch. 6) that it 'has now in particular been brought to light and put into print by that excellent musician Lodov. Viadana, *nova inventio primario*, when he invented the fashion of singing with one, two, three, or four voices to the accompaniment of an organ, regal, or any other similar instrument of foundation. . . .'

THE BASSUS CONTINUUS IN THE 17TH CENTURY

(a) It seems strange that the advantages of using figures to indicate the harmonies should not have been at once and unanimously recognised; such, however, was the case, and there were musicians who were definitely opposed to the practice, which nevertheless soon gained ground, at all events in the case of compositions in which no vocal part (or parts) appeared above the bass to give a clue to the harmony.¹

(b) The whole system, too, of accompanying from a bass was opposed by some, partly on the ground that those who practised it were inclined to be satisfied with that accomplishment and were thus diverted from the practice of improvisation, playing from score, etc., and partly on the ground that it was impossible to play as perfect an accompaniment from a bass (even though figured) as from a detailed score.²

(c) This idea, that the accompaniment should exactly reproduce the harmonic texture of the principal parts, and in particular that the upper parts of each should coincide, was, however, gradually abandoned,³ and by the end of the 17th century such identity had come to be regarded as a positive blemish.⁴

(d) While some musicians were not enthusiastic about the *bassus continuus*, there were, on the other hand, others who were so enamoured of it that they must needs add it to the works of composers of an older generation. As early as 1610 there appeared (according to

¹ No vocal part is printed over any of the basses in *Viadana's* 'Cento concerti' but in one of the celebrated twelve *avvertimenti* in his preface he recommends the organist to prepare an *intavolatura* for himself. The latter would, therefore (if he followed this advice), make a manuscript 'short score' of the piece in several parts and would, no doubt, make a copy, with the voice part above the bass, of the pieces for a single voice, except, perhaps, of those for a bass voice, in which (except for the rests) the voice part was often identical with the continued bass.

² *Viadana's* recommendation to the organist to make an *intavolatura* (cf. note 1 above) shows that he, like *Cavalleri* (cf. p. 326, note 3) desired the accompaniment to be an exact reproduction of the vocal score. His harmony was more archaic than that of *Cavalleri*, and in the successions of triads, which are of frequent occurrence, consecutives are avoided by the crossing of parts, a device which on a keyed instrument has no reality; he therefore gives a rule to the effect that consecutive 5ths and 8ves may be disregarded in the accompaniment, though not in the voices, for, without this liberty, the reproduction of his vocal score on the organ would have been impossible.

³ As early as 1607 *Agostino Agazzari*, maestro di cappella at the Collegium Germanicum at S. Apollinare in Rome, and a great admirer of *Viadana*, as is proved by the number of the latter's works which he acquired for the church in question, tells us that, when only a few voices are singing, the accompanist should avoid the territory of the upper voices, and should avoid, as far as he can, playing the same note as the soprano is singing. *Agazzari's* little treatise *Del suonare sopra il basso*, etc., Siena, 1607, is reprinted by *Kinkeldey* in an appendix. Among the *avvertimenti*, or rules, which form the concluding (21st) chapter of *I li abori musicali* by *Lorenzo Penna* (1st ed. 1672), the 10th, 11th and 12th are as follows:

'In playing with a soprano or contralto one must not play above the voice part, or make divisions (*diminuire*).'

'With a tenor one can go above, and also remain above, but not play in the octave the notes which he is singing, or make divisions.'

⁴ With a bass one can introduce a certain amount of movement (*et suo far qualche poco di movimento*), but, if the bass is singing passages (*passaggi*), it is not good to move at the same time. In the case of a soprano or contralto, *Penna* tells us in a previous chapter (ch. 14), the accompanist is to play the same notes, or, when the voices move rapidly, to adhere to the general outline, selecting the Consonances, and playing 'at least the first and the last of the down-beat (*battere di mano*) and of the up-beat (*levar di mano*), each being (ordinarily) equivalent to a minim.

⁵ *Werckmeister* tells us that the accompanist must 'be careful to avoid continually moving in octaves (the term is here loosely used to include the unison) with the vocalists and instrumentalists' (*Die nothwendigsten Anmerkungen*, etc., 1699; cf. § 69 of the somewhat enlarged reprint of 1716).

Eitner) an edition of *Masses* for 4 and 5 voices by *Palestrina* (first published 1582) with a figured bass part for the organ with the soprano printed above it. Perhaps the most notable example of this barbarous procedure on a large scale was the *Promptuarium musicum* of *Abraham Schadaeus*—a collection of 5-8-part motets by various composers, the first instalment of which appeared at Strassburg in 1611, to which a *Basis* [sic] *vulgo generalis dicta* and *ad organa musicaque instrumenta accommodata* was added by *Caspar Vincentius* (*Gaspard Vincent*, a Frenchman by birth), organist in the same city.

(e) It is difficult to say exactly when the *bassus continuus* first became known in England. In all probability it was imported direct from Italy. The earliest instance, known to the writer, of a figured *continuo* by an Englishman is in the 'Cantiones sacrae' of *Richard Dering*, published by *Phalèse* at Antwerp, where *Dering* was organist at the time, in 1617. There is, however, direct internal evidence⁵ that the *Cantiones* were composed, some years before publication, at Rome, where *Dering* must have become familiar with the continued bass, both figured and unfigured.

That the thorough-bass was on its way to being well established in Germany before the end of the second decade of the 17th century⁶ is abundantly clear from the chapter (chap. vi.) of the third volume of the *Syntagma musicum* which *Praetorius* devotes to the subject; on the other hand, we know that its acceptance in that country, as far as the music of the Church was concerned, was considerably retarded by the obstinate adherence of many organists to the old German organ-tableture.⁷

Praetorius gives an example of a bass from one of his own works,⁸ and also the *Resolutio*, or

⁵ The Latin dedication contains the following passage (as translated by *Slr F. Bridge*): 'For long my Music has desired to come forward. She is not unpollished (for she was born in the first City of the World), but she is modest' (cf. *Bridge*, *Twelve good Musicians*, 1920, pp. 68-69).

⁶ A complete edition of *Viadana's* 'Cento concerti' was issued in Germany by *Nikolaus Stein* of Frankfurt, in 1613, under the title *Opera omnia sacrarum concentuum 1, 2, 3, 4 vocum*, etc., with the addition of a Latin and German translation of *Viadana's* preface.

⁷ *Nietz*, writing in 1700, tells us, through the mouth of an imaginary character in the delightfully quaint little romance which forms the preface of the work already alluded to, that '60 years ago, or a little more, one hardly ever saw a German organist who played from a thorough-bass or from notes' [i.e. as opposed to the letter-tableture].

⁸ 'Wir glauben', from the *Polyhymnia Caduceatrix seu Paels nuncia*. The writer has unfortunately been unable to give the vocal parts, which would have added greatly to the interest of the example, as the parts in question are missing from the copy of this extremely rare work in the British Museum (G. 131).

4. Bassus Generalis.

the same bass with the harmony set out as he would, no doubt, have played it himself. Such examples are so extremely rare that it is worth recording here.¹ It will be noticed that in the *Resolutio* (from the fifth bar onwards) Praetorius has altered the irregular barring of the *Bassus generalis*:

1. *Resolutio*.

[N.B.—The figures in the *Bassus generalis*, and the notes in the *Resolutio*, omitted in the original by obvious inadvertence, have here been added in square brackets.]

By comparing the *Bassus generalis* with the *Resolutio* it will be seen that the 6 on the last crotchet (C) of the fourth bar of the former is used (whether carelessly or intentionally) to indicate a $\frac{6}{4}$ chord on the passing bass note. One would have expected Praetorius to figure it \times^4 or \times^4_2 .

The only points of the *Resolutio* to which serious exception could have been taken by the best authorities of the 18th century are: (1) the wide interval between the upper part and the close chords in the lower region of the keyboard in the first half of the fifth bar, (2) the consecutive 8ves $\frac{6}{4}$ between treble and tenor in the third and fourth crotchets of the same bar (to which, in a four-part accompaniment, all but the laxest would certainly have objected), and (3) the consecutive 8ves $\frac{6}{4}$ between alto and bass in the penultimate bar. The augmented fourth *f-b* in the alto, at the

end of the second bar, is also contrary to strict rule.

THE GENERAL CHARACTER OF A FIGURED BASS ACCOMPANIMENT IN THE 18TH CENTURY

(a) The instruments most commonly used were the organ and the harpsichord. Philip Emanuel Bach ('Versuch' etc., part ii, 1762, Intro.), mentions the pianoforte and the clavi-chord as well. He writes (*l.c.* § 6):

'The pianoforte and clavi-chord give the best support to a performance in which the greatest refinements of taste occur. Only certain singers like to be accompanied on the clavi-chord or harpsichord rather than on the instrument first named.'

Both the pianoforte and clavi-chord possess the advantage of enabling the player easily to regulate the loudness of the sound by the strength of his touch, though the tone of the latter instrument is too delicate to provide an adequate accompaniment to any but the very softest voice. On the harpsichord, on the other hand, the strength of the touch makes very little difference, and gradation of tone can be secured only (1) by passing from the louder to the softer manual, and *vice versa*; and (2) by the use of registers, calling fresh sets of strings (of 4-foot and 16-foot tone) into play, and operated by knobs or pedals; or (3) by playing in more or fewer parts. On the smaller instruments of the harpsichord tribe, with only one manual and no 'stops,' this last method is the only one available.

The use of the organ was not necessarily restricted to sacred, nor that of the harpsichord to secular music: in Bach's 'St. Matthew Passion' an harpsichord is employed (allocated to the second choir) as well as the two organs; and in Corelli's op. 1 and 3, 'Suonate da Chiesa' for two violins and bass, the bass parts are headed *Basso per organo*, whereas in his op. 2 and 4 ('Suonate da camera' for the same instruments) they are headed *Violone o cembalo*.

Too much stress must not be laid on the use of the word *o* ('or') instead of *e* ('and'). Sometimes, no doubt, only a stringed instrument (violone or violoncello) was used to accompany a solo, but there can also be no doubt that such an accompaniment was regarded as more or less of a *pis aller*; moreover, it is not uncommon to find 'Organo o violoncello' on a title-page and 'Organo e violoncello' on the parts themselves. That the co-operation of both instruments was intended is often shown by the provision of a bass part in duplicate.

Ph. Em. Bach expresses himself exceedingly strongly on the necessity for using a keyed instrument for the accompaniment, quite irrespective of any considerations which might seem to militate against the need for its employment. After explaining the purposes to which the organ and harpsichord, etc.,

¹ It has already been recorded by A. Dolmetsch in his invaluable work, *The Interpretation of the Music of the XVIIth and XVIIIth Centuries*.

are respectively appropriate, he continues (l.c. § 7):

'No piece, therefore, can be performed satisfactorily without the accompaniment of a keyed instrument (*Clavierinstrument*). Even in the case of music on the largest scale (*bey den stärksten Musiken*), in operas, even in the open air, when one would feel confident of not hearing the harpsichord in the very least, one misses it if it is left out. If one listens from a height, one can distinctly hear every note. I am speaking from experience, and anybody can try it.'

'The most complete accompaniment to a solo, to which nobody can take any exception,' he tells us (l.c. § 9), 'is a keyed instrument in conjunction with the violoncello.'

Sometimes the violoncello (or gamba) was given a part, not really independent of the figured bass, but a more or less ornate variant of it. Examples of this may be found (in the 17th cent.) in the canzonas of Purcell's sonatas for two violins and bass (1683 and 1697),¹ and, in the 18th century, in the first book of Leclair's sonatas for violin solo and bass.² This treatment of the violoncello (or viol di gamba) is strongly reminiscent of the 'instruments of ornamentation' which we know to have been employed early in the 17th century.³

(b) The most usual form of accompaniment, when four- (or three-) part harmony was adhered to, consisted of the bass, played by the left hand, and doubled in the lower, or sometimes (especially if the hands had got somewhat far apart) the upper octave, at the discretion of the player,⁴ and of chords played by the right hand in close harmony.

Sometimes, again, either as a matter of taste or to obtain a better progression, extended harmony, equally divided between the two hands, was used. Ph. Em. Bach is very fond of recommending this form of accompaniment. A third form of four-part harmony, namely, with the chords in the left hand and a single part in the right, was sometimes employed. It was, obviously, possible only when the bass moved slowly and without leaps, and not advisable except when it was desired to execute a more or less elaborate figure in the right hand.⁵

¹ E.g. 'Sonatas of four parts,' 1697, No. III., Canzona.
² E.g. Sonata VIII., *Tempo gavotta and Altro* (= Gavotte II.). In the latter the violoncello part is practically independent of the harpsichord bass. Instances of executing mere divisions, as in the example from Purcell (see note above), it has a rhythmic figure, based on the harmony played by the harpsichord.

³ Agostino Agazzari, in the short treatise already mentioned (cf. p. 329, note 3), divides the instruments on which the accompaniment is to be extended into 'instruments of foundation,' such as the organ, *orguelembo*, etc., and similarly, in the case of few or single voices, the lute, theorbo, harp, etc., and 'instruments of ornamentation.' 'As ornamentation,' he writes, 'there are those which disport themselves (*scherzando*) and play counterpoints (*contrapuntigliando*) and make the harmony more agreeable and sonorous; such are the lute, theorbo, harp, lirone, either, spinet, chitarra, viola, pandora and the like.' It will be noticed that the theorbo is included in both categories. Later on Agazzari speaks of the treatment of the violone and viol di gamba as instruments of ornamentation. A bass instrument could therefore be employed in either capacity.

⁴ It is, naturally, chiefly in loud passages, and when the bass is fairly slow, that it is suitable to play it in octaves. This, however, may never be done when a C clef (tenor or alto) is employed in the bass part. These C clefs (or *Bassetti* as they were called) are really a relic of the old practice of incorporating one of the higher parts into the *Basso continuo* during a pause in the vocal bass.

⁵ This would occur only during a prolonged rest (or sustained notes) in the principal part or parts, for it was the cardinal principle of good accompaniment, throughout the whole of the figured bass age, that the accompanist must never seek to shine at the expense of the soloist.

Mattheson gives the following example⁶:

[Note the use of the 'French' violin clef on the lowest line of the upper staff. In the original the third quaver * in the upper part of the left hand is misprinted bb.]

(c) Besides the forms of accompaniment just described there was one, much used on the harpsichord (but not on the organ), in which the number of notes struck simultaneously was limited only by the capacity of the two hands. This was known in German treatises as a *vollstimmiges Accompaniment*, or filled-in accompaniment. It is described in great detail by Heinichen (*General-Bass*, etc., 1728). The main points to be observed, he tells us, are these: (1) The extreme parts (upper part and bass) must be absolutely correct in their relation to each other, as consecutives arising between them could not, on a keyed instrument, be excused by the assumption of a crossing of parts (i.e. between the upper and a middle part); (2) in the middle parts, on the other hand, or between an extreme and a middle part, consecutives may be entirely disregarded, as they can then be 'excused by the usual crossing of the parts.' There is, however, one important condition attached, namely, that the hands should be kept close together, in order that consecutive octaves may not be apparent to the ear, either between the upper parts of the respective hands, or between the thumbs of the two hands, or between the extreme parts of the right hand. The great importance of this condition becomes apparent when we learn that Heinichen permitted the duplication in the left hand, not only of the consonances played by the right hand, but of the dissonances as well. These were resolved in the right hand according to rule (generally, therefore, a degree downwards), and in the left hand in three ways: either (1) a degree downwards, in octaves with the right hand; or (2) a degree upwards; or (3) they might leap to another interval of the chord.

Heinichen went even further, in allowing the resolution of certain suspended discords to be anticipated in the left hand, as:

⁶ *Organisten-Probe* (Organists' Test), 1719; *Mittel-Classe* (Middle Grade); *Prob-Stück* (Test Piece) 11; *Erläuterung* (Explanation).

Example¹ 4 will give an idea of his treatment of this form of accompaniment:

It will be seen that the tied 3 on the second note of bar 1, the 7 on the last note of bar 2, the diminished 5 on the last note of bar 6, and the 7 on the last note of bar 10, all resolve in octaves between the right and left hands, while the 7 on the third crotchet of bar 8 leaps a fourth downwards in the left hand, and that the resolution of the 7 on the first note of bar 8 is anticipated in the left hand.

¹ O.e. part I. ch. III. § 88, p. 244 sq.

It may be mentioned that, in the fullest accompaniment, Heinichen never, so far as the present writer has observed, doubles an accidentally sharpened leading note.

The question now arises how far Heinichen's rules were in accordance with the practice of his time and of the later part of the century. No other writer goes into the matter in anything like the same detail, and those who make a brief mention of it (as Ph. Em. Bach) for the most part speak of the left hand doubling the consonances (but not the dissonances) played by the right; and of the anticipation of a resolution in the left hand no mention is made. It seems more than likely that Heinichen's precepts reflect the Italian practice, with which (as may be seen from references in the course of his work) he must have become intimately acquainted during his travels in Italy, the home of that harsh, but most effective ornament, the *acciaccatura*.

That J. S. Bach made abundant use of the filled-in accompaniment (whether he doubled the dissonances or not) is clear from a much-quoted passage in a work of his pupil Johann Christian Kittel.²

Kittel describes how Bach would become impatient with the inadequate accompaniment of a pupil (presumably at rehearsals), and how 'one had to be prepared to find Bach's hands and fingers mingling with the hands and fingers of the player, and, without further troubling the latter, adorning the accompaniment with masses of harmony, which were even more impressive than the unexpected proximity of the strict teacher.'

(d) Apart from the filling-in of the accompaniment described above it is often necessary, when playing in four-part harmony, to take in a fifth part temporarily, either (1) when the hands have got too close together, in order to gain a higher position for the right hand (in which case the extra part, which must always be a consonance, is added at the top of the chord and its lower octave subsequently dropped, so that the process is very closely akin to the crossing of parts)³; or (2) in order to get out of a position in which consecutive fifths

² *Der angehende praktische Organist*, Erfurt, 1808, part III. p. 33.

³ The two processes are illustrated by the following example:

The same object (that of preventing the hands from getting too close together) can also be attained, as both Heinichen and Ph. Em. Bach tell us, by the repercussion of an entire chord, which must be a consonant one, in a higher position. In the following example we see both this process and also the one above mentioned: at * a consonant chord is repeated, while at † a consonant fifth part is added at the top, and its lower 8ve subsequently dropped, as indicated by the crotchet rest after it. Finally, at ‡ a fifth part is added below the upper part of the last chord, which, owing to the

would result; or (3) in order to prepare a subsequent discord; or (4) to give fullness to a particular chord (*e.g.* one which, owing to the downward resolution of a previous discord, would otherwise lack a consonant interval); or for other reasons.

(e) A very important question arises as to how far the accompaniment was expected to possess independent interest and, in particular, whether contrapuntal devices, such as imitation, were regularly employed. It was quite accepted, as has already been mentioned, that any display on the part of the accompanist should be limited to occasions when the solo part or parts were either silent (as in *Ritornelli* and during long pauses) or were executing something of comparatively little interest. It is, then, of such cases that we are now speaking.

With regard to imitation, surprisingly little is said about it in any of the text-books. Mich. de Saint Lambert tells us (*Nouveau Traité*, etc., 1707, ch. ix. 12) that in accompanying a single voice, if the music lends itself to such treatment, imitation may be used; 'but,' he adds, 'this demands consummate science, and, to be a success, must be of the first order.' Heinichen expresses the very definite opinion (*o.c.* part i., ch. vi. § 40, p. 578) that, in pieces in which the composer has used all his opportunities in the written parts, there will very rarely indeed be occasion for *ex tempore* imitation on the part of the accompanist. He admits, however, that such cases may arise, especially in [solo] cantatas and arias without the accompaniment of instruments, and gives an example accordingly. Ph. Em. Bach gives some examples, of which the following is one, in which a rhythmical

8 7 progression over the preceding bass note, would otherwise lack the 5:

Apart from this repetition of an entire consonant chord, it may perhaps be mentioned here that, in the case of the chord of the seventh (which in four-part harmony may be taken either as 7 or 8)

circumstances may arise which make it necessary to change from one form of the chord to the other, over the same bass note, leaving the dissonant interval (the 7) unchanged. In the following example from Ph. Em. Bach (*o.c.* Ch. 36 § 14 d), given on a single staff and an 8ve lower than here, we see that the previous harmony makes

it necessary to take the 7 on E as 7 and that it must be changed

to 7 (or else taken in five parts) to prepare the following 7 on F:

figure in the solo is imitated in the accompaniment (*o.c.* ch. xxxiii. § 7):

[N.B.—The part here given in small notes is omitted by Bach, who gives the example (according to his custom) on a single staff, an octave lower than here.]

The following example of imitation is given by Bach (*o.c.* ch. xxxii. § 9) to illustrate cases in which 'certain skips with the harmony in the right hand' are admissible:

The account which Johann Friedrich Daube¹ gives of the performance of J. S. Bach leaves no room for doubt but that the latter would, upon occasion, draw upon his marvellous contrapuntal resources for the embellishment of the accompaniment; but it is rather suggested that he did so chiefly when accompanying music by other composers with very little inherent interest of its own.

Daube writes:

'Through him [Bach] the principal part was bound to shine. He gave it life by his perfect accompaniment when it had none. He knew how to imitate it so skillfully with the right or left hand, or unexpectedly to bring in a countersubject, that his audience could swear it had been so composed with all care. At the same time the regular accompaniment [*i.e.* the harmonies prescribed by the figures] was very little curtailed. . . .'

A similar enthusiastic account in Lorenz Mizler's *Musikalische Bibliothek* (Part 4, 1738, p. 48) makes no mention of contrapuntal feats, but speaks of Bach playing

'any Thorough-Bass to a Solo in such a way that one imagines that it is a Concerto and that the melody which he plays with his right hand has been composed like that beforehand.'

(f) Apart from contrapuntal device there were many ways in which the accompaniment was embellished. These are well described by Heinichen in a long chapter devoted to the subject (*o.c.* Part I. ch. vi. pp. 521-83). Apart from the practice of following the bass in

¹ General-Bass in *drey Accorde.*, 1756, ch. xl., footnote.

thirds,¹ to which he makes frequent allusion in his pages, he divides these embellishments into two classes.

In the first class he includes those embellishments 'which always remain immutable, as one learns them from one's teacher,' and, in the second, those which depend on the invention of the player. The former comprise (1) the shake, (2) the *Transitus in tertiam*,² (3) the *appoggiatura*, (4) the slide, (5) the mordent and (6) 'the so-called *acciaccatura*';³ the latter include (1) melody,⁴ (2) passage-work, (3) arpeggios, etc., and (4) imitation.

¹ As in the following:

² This consists in filling up the interval of a third between two consecutive notes with a passing note (with or without a shake), and may, Heinichen tells us, be employed in the bass itself. Heinichen's example begins as follows: (a) shows the plain accompaniment, and (b) the same embellished as described—

³ Heinichen, as he himself tells us, learnt this ornament from *L'armonico pratico al cembalo* (Venice, 1708) of Francesco Gasparini. The latter made a curious distinction: when the ornament in question was a semitone below the harmony note, he called it a *mordente*, and when it was a whole tone below (or above), an *acciaccatura*. Either ornament is to be struck together with the harmony notes and immediately released, the whole chord being played with a slight *arpeggio*: Heinichen gives numerous examples, of which the following (i.e. § 18, p. 536) is one:

The *acciaccatura* may also be double, as in the next example (ib. § 19, p. 537):

Heinichen adds directions for the introduction of the *acciaccatura* or *mordente* (according to Gasparini's definition of the latter) by the accompanist (ib. § 24, p. 540 sq.):

The latter is to note where there is an interval of a third between the harmony notes in either hand and, at the same time, a finger unemployed. The intervening note is to be struck with the others, and immediately released, as described above. Three cautions are added: (1) The ornament must not be used too often, but only by way of variety; (2) it is not good for more than 3 or 4 contiguous notes to be struck together; (3) the chord must be slightly spread (*mit einem gelinden Arpeggio*).

⁴ Heinichen gives two excellent examples showing how a melody may be founded on the simple bass:

In the first example the harmony is divided equally between the hands; in the second the right hand has the melody alone, and the left hand chords.

(g) There were definite rules for the compass of the accompaniment. Most text-books of the 18th century give *e'* or *f'* as the limit of the upward compass,⁵ and some mention *g* or *f* as the lowest notes permissible in the right hand. The only occasions when the upward compass might be extended was when a *C* clef was used in the bass, or when the latter was exceptionally high.

With regard to the pitch of the accompaniment in relation to the principal part or parts, the main rules were (1) that the upper part of the accompaniment should not be continuously in unison with the upper principal part, and (2) that it should be rather below than above it.⁶

(h) A considerable change took place during the first half of the 18th century (if we may judge by the examples given in text-books) in the attitude of musicians towards consecutives in a figured bass accompaniment. In the works of Mattheson⁷ and Heinichen⁸ we find con-

⁵ Heinichen makes the amusing comment on this rule (o.e. p. 548, footnote) that 'when trying to play a melody, passages, arpeggios and all kinds of variations in the right hand alone, a person may go up to *X* in alt (*das dreigestrichene X*), if he thinks that there is any good to be got there.'

⁶ Considerable difference of opinion existed as to the pitch at which bass instruments or voices should be accompanied. Quantz (*Versuch*, etc., 1752, *Hauptstück* (Section) xvii., *Abchnitt* (Sub-section) vi. § 21) states explicitly that the violoncello should not be accompanied at the same pitch as the violin, and Ph. Em. Bach (*Versuch*, etc., Part II., 1762, ch. xxix. § 23) shares this point of view. Türk (*Kurze Anweisung*, etc., 1791, § 198), on the other hand, expresses the opinion that 'one may, in various cases, accompany a bass or tenor voice, as also the bassoon, violoncello, etc., a whole octave higher, because, namely, middle *C* (*c'*), for instance, sung by a bass, is in so far accepted on keyed instruments, etc. as the *C* above (*c'*).'

⁷ In the *Organisten-Probe*, 1719 (*Mittel-Classe*, *Prob. Stück* 22, *Erläuterung*, § 4) we find the following:

Of this he says (i.e. § 8) that 'Should some critical creature perhaps think to detect octaves in the second bar, he must allow himself to be informed of what is meant by crossing of the parts.' He would probably have excused the following progressions from the *Kleine General-Bass-Schule*, 1735 (*Aufsteigender Classe*, *Ate Aufgabe* § 7, bars 7-8; *Höherer Classe*, *2te Aufgabe*, § 9, 8th bar from end; *Höherer Classe*, *4te Aufgabe*, § 4, bars 9 and 10), in the same way:

[N.B.—In the original the chords are not given, but every interval of them is figured above the bass, and in the order (as Mattheson explains) in which they are to be taken.]

⁸ It must be admitted that octaves like those in the following example (o.e. Part I. ch. vi. § 7, pp. 525, 526) are rare in Heinichen's work, in four-part harmony:

[N.B.—Heinichen here uses the *custos* *W'* to indicate a (long) *appoggiatura*.]

On the other hand, he uses octaves arising between passing notes

secutives in four-part harmony (quite apart from those arising in a filled-in accompaniment) which neither Marpurg, nor Ph. Em. Bach, nor Kirnberger, nor Türk would have tolerated for an instant.

It was generally admitted by even the stricter authorities, about the middle of the 18th century and later, that somewhat more latitude might be allowed (in the matter of correctness of progression) in accompanying from a figured bass than in composition, but Ph. Em. Bach apparently did not share this view. The following progression, in which consecutive 5ths cannot be avoided except in the position in which the 9 is in the tenor, is a case in point:

Of this Marpurg writes as follows in his *Handbuch bey dem Generalbasse* (1755, 2nd ed. 1762):

'There are certain sequences of harmonic progressions in which consecutive fifths between the inner parts are fairly tolerable. See Fig. 24 [= Ex. 7 and another example not given here]. The dissonance here stifles the annoyance to the ear which would otherwise arise from the succession of fifths.'

In the first edition of the *Handbuch* there follows a passage which concludes:

'At least they [the 5ths] can be used without fear in accompanying.'

In the second edition this passage is cancelled and the following substituted:

'However, it is better to arrange (*setzen*) the three upper parts differently and to transform the fifths into fourths.'

Ph. Em. Bach in commenting on the same progression (*Versuch*, etc., Part II., 1762, ch. xvii. I. § 8) prescribes the position in which the 9 is in the tenor, and adds:

in the bass and an upper part quite freely, as in the following example (o.c. Part I. ch. iv. § 16, p. 274, bar 2):

Ph. Em. Bach (as he explains in similar cases) would have corrected the progression as follows:

'The fifths which arise in the other two positions, however much they may be defended, are, and remain, disgusting to the ear.'

Of the same progression, again, Christoph Gottlieb Schröter (no mean authority) writes (*Deutliche Anweisung*, etc., 1772, § 234, p. 123): 'Mock fifths (*Scheinquinten*) are not real fifths.'

(i) The device of a nominal crossing of parts, as a means either of evading consecutives or of maintaining a higher position of the right hand than the necessary preparation and resolution of discords would otherwise admit, is not much discussed in the old text-books. Heinichen, as we saw above, absolutely refused to recognise it as an excuse for consecutives between extreme parts, but admitted it in the case of those arising between middle (or middle and extreme) parts in a filled-in accompaniment. Ph. Em. Bach's sole reference to the device is purely negative. He speaks (o.c. ch. xxv. § 5) of

'... a crossing of parts in the thorough-bass which is not allowed, as otherwise many mistakes might be justified without the ear after all being satisfied.'

Marpurg, however, as we have already been led to expect, allows more latitude. He forbids the evasion of consecutives by an assumed crossing of the parts only when (1) the harmony is not full enough (i.e. in less than four parts), (2) when both chords are consonant, (3) when the consecutives are between extreme parts, and (4) when most of the parts progress by similar motion.

He therefore sanctions the following progressions:

Handbuch, etc. 1755, Tab. VII (2nd Ed. 1762, Tab. V) Fig 6.

Ibid., Tab. VIII (2nd Ed. Tab. VI) Fig. 12.

Kirnberger gives the following example in which the crossing of parts is used in order to maintain the position of the right hand¹:

(j) A principle, fully recognised in the 18th century, but often disregarded to-day, was that a discord should be played more loudly than its resolution. Very few definite instructions, however, are given in the text-books. Ph. Em.

¹ Cf. *Gründriss des Generalbasses*, 1781, § 172; Volume of examples, Part III. Fig. xxvi.

Bach makes the following brief allusion to the matter¹:

'It may, however, be noted that dissonances are generally played more loudly and consonances more softly, because the former stimulate and accentuate the emotions (*die Leidenschaften mit Nachdruck erheben*) while the latter calm them.'

Quantz, however, in his famous essay on the flute,² goes into great detail. He divides the discords into three classes according to the amount of emphasis which they require: (1) *mezzoforte*, (2) *forte*, (3) *fortissimo*. These degrees of loudness, he explains, are not absolute but relative, and his classification is based on the assumption that the normal level of the accompaniment, in an adagio, is *mezzo piano*. He tells us, moreover, that when discords of various kinds follow one upon another, and discords resolve on discords, the intensity of expression must be kept on the increase by strengthening the tone and increasing the number of parts. Among the discords to be played *m.f.* is the 'second with [perfect] fourth'³, among those to be played *f.*, the 'second with augmented fourth'⁴, and among those to be played *ff.*, the diminished seventh with its three inversions. Quantz gives an example to illustrate his rules in the shape of an entire movement (*Affettuoso di molto*) for solo (presumably flute) and figured bass. There can be no doubt that he carries the didactic principle too far, but what he says is nevertheless well worth careful (if critical) study.

It remains, in conclusion, to say a few words concerning the disregard of the composers' intentions, often shown in present-day performances of the masterpieces of the past, by omitting the figured bass accompaniment whenever the harmony is supplied in a more or less (often less) complete form by the vocal and instrumental parts. For this omission there is absolutely no justification. If the organist is unable to play from the figures, the accompaniment should be set out from them, and on no account arranged, as sometimes happens, from the vocal or instrumental parts, which very often lack an interval prescribed by the figures, quite apart from the fact that, in quickly moving parts, the harmony note is often present in a very transient form. The opinion, which the writer has heard expressed, that the figured bass accompaniment was intended to be used (or not) at the discretion of the organist, in order to support a weak performance, is entirely without foundation in fact and is as pernicious a fallacy as can well be. Let Ph. Em. Bach's words be remembered: 'No piece . . . can be performed satisfactorily without the accompaniment of a keyed instrument.' If any impartial musician had the opportunity of listening to a

performance of one of J. S. Bach's violin concertos, or of the concerto in D minor for two violins, with the accompaniment of strings and of the harpsichord (or, failing that, of the pianoforte), and then to a performance of the same work *without* the figured bass accompaniment, he would inevitably be driven to the conclusion that the former was as much more satisfying to the ear as is a chalk drawing on toned paper to the eye, when compared with a similar drawing upon a dead white.

BIBLIOGRAPHY

Among the sources of information relating to accompaniment from a Thorough-Bass, as practised during the 17th and 18th centuries, the following are, in their different ways, of special interest:

- LUDOVICO VIADANA: Twelve rules (*avvertimenti*) contained in the Preface to the *Genio concerti ecclesiastici*. Venice (Vincenti), 1602.
- AGOSTINO AGAZZARI: *Del suonare sopra il basso con tutti stromenti ed uso loro nel concerto*. Siena, 1607. (Reprinted by O. Kinkeldey, *Orgel und Klavier in der Musik des 16. Jahrh.* Leipzig, 1910, Appendix.)
- MICHAEL PRÆTORIUS: *Synagoga muscua*, Tom. III. 1619 ch. vi. 'De Basso generali seu continuo.'
- LORENZO PERNA: *Li primi albori musicali*, etc. Bologna (Monti), 1672. The Third Book of the above contains 'Li fundamenti per suonare l'organo sopra le parti.'
- A work of extraordinary interest.
- MATTHEW LOCKE: *Melothesia, or Certain General Rules for playing a Continued-Bass*, etc. London (J. Carr), 1673.
- FRIEDRICH ERHARD NIETZ: *Musicalische Handleitung*, etc. 'Erster Theil handelt vom General-Bass', etc. Hamburg (Sperlingk), 1700.
- MICHAEL DE SAINT-LAMBERT: *Traité de l'accompagnement du clavier, de l'orgue et de quelques autres instruments*. Paris, (Ballard), 1680.
- The writer has been unable to trace this edition except in a manuscript Italian translation of chapters v.-ix. preserved in the library of the Liceo Musicale at Bologna. A second edition appeared under the title *Nouveau traité*, etc. Paris (Balthard), 1707, reprinted by Estienne Roger, Amsterdam. A most interesting and well written work.
- FRANCESCO GABRIANINI: *L'armonico pratico al cembalo*, etc. Venice (Bortoli), 1708, last reprint 1802.
- JOHANN MATTHESSON: *Exemplarische Organisten-Probe*, etc. Hamburg, 1719. 2nd ed. entitled *Grosse General-Bass-Schule*, 1731.
- JOHANN DAVID HEINICHEN: *Der General-Bass in der Composition*, etc. Dresden, 1728.
- JOHANN JOACHIM QUANTZ: *Versuch einer Anweisung die Flöte traversiere zu spielen*, etc. Berlin, 1752. Hauptstück (Section) xvii. 'Von den Pflichten derer, welche accompagniren,' etc. Abschnitt (Subsection) vi. 'Von dem Clavieristen insbesondere.'
- FRANCESCO GEMINIANI: *The Art of Accompaniment* [etc.], etc. Op. 11. London, undated (1755?).
- A most original and instructive work, far too little known.
- FRIEDRICH WILHELM MARFURIO: *Handbuch bey dem General-Basse*, etc. Berlin, 1755, 2nd ed. 1762.
- This is mainly theoretical, but contains instructive allusions to the practice of accompaniment.
- CARL PHILIPP EMANUEL BACH: *Versuch über die wahre Art das Clavier zu spielen. Zweyter Theil, in welchem die Lehre von dem Accompanement und der freyen Fantasie abgehandelt wird.* Berlin (Winter), 1762.
- Some later editions.
- CHRISTOPH GOTTLIEB SCHROTTER: *Deutsche Anweisung zum General-Bass*, etc. Halberstadt (Gross), 1772.
- DANIEL GOTTLÖB TÜRKE: *Kurze Anweisung zum Generalbassspielen*, etc., Leipzig (Schwickert), 1791.
- Later editions 1800-41.

Among the works enumerated above, Ph. Em. Bach's *Versuch* is quite indispensable to the student, and Heinichen's *General-Bass* almost equally so.

F. T. A.

THOROWGOOD, HENRY, a London music-publisher at the sign of the 'Violin and Guitar,' at Number 6, under the North Piazza of the Royal Exchange. He flourished about 1760 to 1770, and published many interesting works, some of which were reprints from earlier publications. These include such operas as 'Thomas and Sally,' 'Maid of the Mill,' 'Artaxerxes,' etc., while Galleotti's sonatas, Zannetti's soli, Spadino's minuets and other similar collections bear his imprint. It is difficult to determine exactly whether he preceded or succeeded Maurice Whitaker, who was at the same address; probably the latter,

¹ *Versuch*, etc., Part I. 2nd ed. 1757 (1st ed. 1753), Hauptstück (Section) 3, § 23.

² *Versuch*, etc., 1752, Hauptstück (Section) xvii., Abschnitt (Subsection) vi., §§ 12-17.

At one time (about 1760) there was a partnership, Thorowgood & Horn, music-sellers in Cheapside, and this, no doubt, was the prior firm.

F. K.

THREE CHOIRS FESTIVAL, the popular name for the MEETING OF THE THREE CHOIRS OF GLOUCESTER, WORCESTER AND HEREFORD held annually in the week beginning on the first Sunday in September in the cathedrals of these three cities by rotation. This is the oldest of the English provincial musical festivals, and in its modern form it provides each city with a triennial festival, consisting of an Opening Service with choir and orchestra on the Sunday and four days of musical performances (Tuesday to Friday), for the most part in the Cathedral, but with one or two secular concerts (Wednesday and Friday evenings) in the Shire Hall.

HISTORY.—Definite records of the 'Music Meeting' date from 1724, in which year Dr. Thomas Bisse, Chancellor of Hereford and brother of Dr. Philip Bisse, Bishop of that diocese, first proposed to associate the meeting with a charity for the education and maintenance of orphans of the poorer clergy of the three dioceses. The idea was suggested by the festival of the SONS OF THE CLERGY (*q.v.*), for which Dr. Bisse had preached in St. Paul's Cathedral, London. For some years previously the members of the three cathedral choirs had met in one or other of the cathedrals for the combined singing of service music, but the collection for the clerical charity at Gloucester in 1724 and the appointment of six stewards (a clergyman and a layman from each diocese) to administer the fund gave the meeting a definite status, and the sermon in aid of the charity and in praise of the art preached by Dr. Bisse at Hereford in 1726¹ sealed the association of the two objects. The sermon (now preached at the Sunday service) has remained a constant feature ever since.

The advertisements and reports in the *Gloucester Journal* (1724) show that the meetings already included secular evening concerts then held in the 'Boothall' (at Worcester and Hereford in the College halls), and organised by the musical clubs of the cities. The music in the cathedrals included the singing in alternate years of Purcell's *Te Deum* and Handel's *Te Deum* for the Peace of Utrecht, the latter being presently superseded by Handel's *Dettingen Te Deum*. The performance of these works with instruments was the starting-point from which the oratorio performances were later to proceed. The following list of events are landmarks in the development of the festival scheme.

1737. Dr. Boyce was appointed conductor of the

music meeting and held that position for several years.

1739. Handel's 'Alexander's Feast' performed.

1743. Boyce composed an anthem for the festival, apparently given as part of a 'Grand Concert of Musick' in which members of London choirs brought by Dr. Greene co-operated.

1745. A dramatic pastoral, 'Love's Revenge' (music by Greene), and Handel's 'Acis' performed in the Boothall, Gloucester.

1748. Handel's *Dettingen Te Deum* and *Jubilate* on the first day, Purcell's *Te Deum* and Handel's 'Coronation Anthem' on the second day, in the Cathedral.

1752. Worcester. Handel's 'Samson' at the evening concert.

1753. Hereford. The programme extended to three evening concerts. At the third 'The Shepherd's Lottery' (music by Boyce) was given.

1754. Gloucester. Handel's 'Judas Maccabæus' given at a concert.

1755. Worcester. For the first time we get full accounts of the performers engaged. The solo singers include a Miss Turner, Beard the famous tenor, Wass of the Chapel Royal; Abraham Brown led the orchestra.

1757. Gloucester. Handel's 'Messiah' first given in the Boothall.

1759. Hereford. Handel's 'Messiah' first given in the Cathedral. This was the beginning of oratorio performances in the Cathedral. It was conducted by Cloak, organist of Hereford.

For some time 'Messiah' was the only oratorio admitted in the cathedrals (and it was often given at the secular concerts), and the programmes retained generally the form of *Te Deum*, *Jubilate* and anthem performances in the Cathedral with an increasing number of Handel's oratorios elsewhere for many years.

1784. Gloucester. The first day's music of the HANDEL COMMEMORATION (*q.v.*) held in Westminster Abbey was given in a morning performance in the Cathedral, substituted for the usual church service. A charge was made for admission to the Cathedral for the first time.

1786. Hereford. Owing to the dangerous condition of the Cathedral, the Handel Commemoration selection and 'Messiah' were sung in St. Peter's Church.

1787. Gloucester. Handel's 'Israel in Egypt' first given in the Cathedral.

1788. Worcester. The meeting was held in the first week in August for the convenience of King George III. and members of the Royal family who attended.

The meetings had become by this time virtually Handel Festivals, and a touch of unconscious humour is provided in the information that at Gloucester, 1790, Mme. Mara introduced the air 'Pious orgies' in the course of the morning service on the first day. The famous singers of the day all appeared in turn, and the original performers (the choirs of the three cathedrals) became merely the *ripieno*. The original purpose of improving the service music by combined singing is more or less lost sight of, though the services are still maintained. We find portions of Haydn's 'Creation' taking their place in the early years of the 19th century, and at Gloucester (1832), a year of disaster owing to the outbreak of cholera in the town, the following enterprising selection was given in the Cathedral: portions of Spohr's 'Last Judgment', Neukomm's 'Mount Sinai', Mozart's 'Requiem' and Handel's 'Israel.' These works, with a considerable portion of Crotch's

¹ Rimbault declared that the meetings date probably from 1718 or 1717. He possessed a printed sermon entitled 'A Rationale on Cathedral Worship or Choir Service' preached by Bisse at Hereford, Sept. 7, 1720. See *Annals*, p. 3, note.

'Palestine,' at Worcester (1833) show the festival to be gradually outgrowing the Handel fever.

The appointment of S. S. Wesley to Hereford is a landmark of importance. His first programme shows the music, given for the first time in the nave of the Cathedral, assuming a more varied form.

1834. Hereford. First day, Spohr's overture to 'The Last Judgment,' Handel's Dettingen Te Deum, Attwood's coronation anthem 'I was glad,' Boyce's anthem 'Lord Thou hast been our refuge,' Second day, Spohr's 'Last Judgment,' Haydn's 'Creation,' Pt. I., 'Antiphona' by S. Wesley, 'Sanctus' by S. S. Wesley. Third day, Mozart's 'Requiem' and selections from Handel's 'Messiah.'

The whole thing is now on the larger scale befitting performances in the nave. At Gloucester (1835) the following is the schedule of performers:

10 principal singers (including Mmes. Caradori Allan and Clara Novello, Mr. and Mrs. Knivett, Signori Rubini, Labiche).
71 instrumentalists.
119 chorists.

At Worcester (1836) a fourth day was added to the festival. With these enlargements began an era of financial difficulty resulting from the system maintained to the present time (1926) by which the charity takes all the profits¹ and the stewards bear all the loss. No money is carried over from a successful year to meet possible reverses or defray increased costs, consequently the conveners of the meetings have to make a bid for popularity in framing their programmes.

Throughout the 19th century the principal additions to the programmes were naturally the works of the composers who had for the time being the ear of the large public. The appearance of Mendelssohn's 'Hymn of Praise' (*Lobgesang*) at Gloucester (1841) marks the beginning of the Mendelssohn period crowned with the introduction of 'Elijah' at Gloucester (1847), and his works, with the oratorios of Spohr, Rossini's 'Stabat Mater' and, more occasionally, Beethoven's 'Mount of Olivet,' were, with Handel's oratorios, the chief ingredients of the festival programmes throughout the middle years of the century.

At Gloucester (1868) a short instrumental work 'Intermezzo Religioso' by Hubert Parry, then known only as the son of the squire of Highnam, was played in the cathedral. The critics who treated it slightly were unaware that its appearance was the beginning of a new era in the life of the festival. They could not be expected to foresee the future eminence of the composer; what they might have welcomed was the fact that the festival was now opening its doors to the works of young and native talent. In the following year (Worcester, 1869) Sullivan conducted his oratorio 'The Prodigal Son,' and from about this time ora-

torios by native composers, mostly ephemeral, become frequent. The progress of English music and the discovery of the great choral work of J. S. Bach are the things which stand out in the history of the Three Choirs of the next twenty years. The principal events of the period may be summarised thus:

1871. Gloucester. J. S. Bach's 'St. Matthew Passion,' first given under S. S. Wesley's direction.

1872. Worcester. Bach's 'St. Matthew Passion' repeated.

1875. Worcester. The most virulent of the periodical attacks on the plan and methods of the festival resulted in an experimental return to something like the original design. A series of choral services with anthems by such favourite composers as Handel, Mendelssohn, Spohr, S. S. Wesley, took the place of the oratorio performances.

1880. Gloucester. The first of Parry's mature works, 'Scenes from Prometheus Unbound,' was produced at the Shire Hall. Of this event Sir Henry Hadow says: 'No one seems to have had any idea that on that evening in the Shire Hall English music had, after many years, come again to its own, and that it had come with a masterpiece in its hand.'

1883. Gloucester. Stanford's 'Elegiac' symphony was performed in the Cathedral.

1884. Worcester. Bach's 'God so loved the world,' and Dvorak's 'Stabat Mater' given.

1885. Hereford. Bach's 'A stronghold sure.'

1889. Gloucester. Parry's 'Judith' (produced at Birmingham) first given here.

1890. Worcester. Elgar's 'Froissart' overture produced in the Shire Hall.

1891. Hereford. Parry's 'De profundis' for three choirs, written expressly for this festival.

1892. Gloucester. Parry's 'Job' produced and repeated in the two following years at Worcester and Hereford, the first time that such an event had occurred with the work of a native living composer.

As Gloucester brought Parry, so Worcester brought Elgar to renew the vitality of the Three Choirs Festival. The 'Froissart' overture named above is the latter's first appearance in a festival programme, and the several productions of his lesser choral works are discussed elsewhere (see ELGAR). The Worcester festival of 1902 brought forward 'The Dream of Gerontius' after its comparative failure at Birmingham and its conspicuous continental success at Düsseldorf. It with Elgar's later works, both choral and orchestral, became the mainstays of the festival as far as native composition was concerned, though many other composers, notably Bantock, Walford Davies, Vaughan Williams, produced important works which have lived in the years between 1902 and 1913.

For six years of war, 1914-19, the Three Choirs festival was suspended. It was revived at Worcester in 1920, and has been carried on with renewed vigour and success since. To Ivor Atkins fell the privilege of negotiating the revival. The organists of Gloucester and Hereford, Brewer and Hull, the one a veteran, the other a newcomer to the work, threw themselves with equal enthusiasm into the cause. Arrangements were made to increase greatly the number of stewards and so ease the burden of individual financial responsi-

¹ That is, the collections taken at the doors intact, and any profit which may be made by the sale of tickets.

² Address on 'Sir Hubert Parry,' read before the Musical Association, June 17, 1919. See *Mus. Assoc. Proc.*, 1918-19, p. 137.

bility, but the old financial defect which creates no reserve fund for the future was unfortunately allowed to remain. New works have been shorter and generally less important than they were in the pre-war festivals, but the programmes up to and including 1926 have contained some interesting revivals and notable performances of Bach with other favourite classics. The festival of 1925 (Gloucester) was designed to be as far as possible representative of English music from Orlando Gibbons, whose tercentenary it celebrated, to modern times. The programme included, besides works by composers already mentioned, part of Ethel Smyth's Mass, and a new motet by G. Holst.

BIBL.—*Origin and Progress of the Meeting of the Three Choirs of Gloucester, Worcester and Hereford, and the Chantry connected with it.* REV. DANIEL LYSONS (to 1812), JOHN AMOTT (to 1864), C. THREE MUSKETEERS, THE, opera in 4 acts; libretto, founded on Dumas, by H. Cain and L. Payen (English translation by A. Kalisch); music by Isidore de Lara. Produced (in French), Cannes, 1921; in English (Carl Rosa Co.), Newcastle, May 2, 1924.

THREE-QUARTER FIDDLE, see **VIOLINO PICCOLO**.

THUILLE, **LUDWIG** (*b.* Bozen, Nov. 30, 1861; *d.* Munich, Feb. 5, 1907). His father, Johann Thuille, was a timber merchant, and an enthusiastic amateur musician. From him the boy had his first lessons, and soon he developed a quite remarkable talent for music; in fact, he was a prodigy. On the death of his father the boy was sent as a chorister to the Benedictine Abbey at Kremsmünster in Upper Austria; where, in addition to receiving a thorough instruction in church music, he attended the High School and gained an excellent elementary education. In 1876, when he was 15 years old, Thuille returned to his home and became a pupil of Joseph Pembaur, principal of the Innsbruck School of Music, and a good sound musician. Here the boy was well grounded in piano-playing as well as in theory, and also entered the gymnasium. Having completed his course there in three years, he in 1879 removed to Munich and joined the School of Music. This, on account of his extreme poverty, would have been impossible except for the kindness of the widow of Matthäus Naziller, the late principal of the Innsbruck School of Music, who generously paid the boy's expenses. Thuille remained at the Munich School of Music until July 1881, in all three years; during this period his chief teachers were Karl Bärmen (a pupil of Liszt) for piano, and Rheinberger for organ, counterpoint and composition. On leaving Munich Thuille obtained a scholarship on the Frankfort Mozart foundation, and in the following year, 1882, he

made the friendship with Alexander RITTER which was destined to affect his career very materially.

In 1883 Thuille was appointed to a professorship at the Munich School of Music, and to Munich came also Alexander Ritter when in 1885 Richard Strauss was appointed successor to von Bülow at Meiningen. Strauss was an old friend and fellow-student of Thuille, and he produced at Meiningen a piano trio and a symphony by the latter which enhanced the reputation of the now rising composer. Under Ritter's good influence Thuille turned his attention to opera. For his first essay in this direction Ritter himself prepared the libretto, which was founded on Herman Schmid's comedy, 'Theuerdank.' The music was completed in 1894, but the opera was not heard until Mar. 12, 1897, when it was very favourably received, but did not keep the stage, owing to defects in the libretto. The only published number was the Prelude to Act I., which appeared under the title of 'Romantic Overture.' The second opera, 'Lobetanz,' poem by O. J. Bierbaum, was written in 1896, and was even spoken of as superior to Humperdinck's 'Hänsel und Gretel,' and in the same style. The third opera, 'Gugeline,' poem also by O. J. Bierbaum, was finished in 1900, and was considered (especially in the third act) superior to the two already mentioned.

Thuille, whilst giving his attention to opera, did not neglect other branches of music. Following on his original brilliant success in chamber music—a sextet for piano and wind instruments, composed in 1887 and performed at the National German Music Union at Wiesbaden in 1889—he produced, just after 'Lobetanz,' the quintet for piano and strings, and, after 'Gugeline,' the violoncello sonata which has been considered as one of the most important works for the violoncello since the time of Beethoven. As conductor of the 'Liederhort,' an important male-voice choir in Munich, Thuille was naturally led to compose music for men's voices, in which field his 'Weihnacht im Walde' stands out as a very high-class composition. Also by way of contrast he wrote the beautiful choruses for female voices, 'Dreamy Summer night,' with harp and violin soli, and 'Rosenlied,' with only piano accompaniments, besides a number of songs.

His best-known works are as follows:

- Op.**
 3. Drei Klavierstücke.
 4. Fünf Lieder.
 5. Drei Frauenchöre. Poems by Karl Stiehler.
 6. Sextet for Piano and Wind.
 7. Von Lieb und Leid. Poem by Karl Stiehler.
 14. Männerchor, 'Weihnacht im Walde.'
 20. Quintet, Piano and Strings.
 22. Sonata, Violoncello and Piano.
 25. Frauenchor, 'Traum Sommernacht.'
 29. Frauenchor, 'Rosenlied.'

OPERAS

Theuerdank. Lib. by Ritter, 1894, produced Munich, Mar. 12, 1897.
Lobetanz. Poem by Bierbaum, produced Mannheim, 1898.
Gugeline. Poem by Bierbaum, produced Bremen, 1901.
 Prelude to Theuerdank ('Romantic Overture').

BIBL.—FRIEDRICH MÜNTER, *Ludwig Thuille* (Munich, 1923).

THUMOTH,¹ BURK, was editor of an early printed collection of Irish melodies.

This was issued in two octavo books, the first containing twelve Scotch and twelve Irish airs, and the second twelve English and twelve Irish airs. Both are 'with Variations, set for the German Flute, Violin or Harpsichord,' and are printed for John Simpson at the Bass Viol and Flute in Sweeting's Alley, opposite the east door of the Royal Exchange. Bunting asserted that they were published in 1720; but Simpson did not begin printing till long after that date, and the two collections of Curious Scots Tunes by James Oswald which are advertised on the title-page of the first book were certainly not issued before 1742. The two books were reprinted from Simpson's plates about 1765 'for Henry Thorowgood at the Violin and Guitar under the North Piazza of the Royal Exchange,' and about twenty years later they were re-engraved and published in one volume by A. S. and P. Thompson of 75 St. Paul's Churchyard, under the title of 'Forty-eight English, Irish, and Scotch Airs.' The only other known publication of Thumoth is

¹ Six Solos for a German Flute, Violin or Harpsichord, the First Three compos'd by Mr. Burk Thumoth, the Three Last by Sigr. Canaby.

This is a thin folio volume, undated, which seems to have been issued about the same time as the Irish Airs, between 1740 and 1745.

J. F. R. S.

THURSBY, EMMA (*b.* Brooklyn, New York, Feb. 21, 1857), singer, came of English ancestors on her father's side and a Dutch family on her mother's. Her great-grandparents were American. She received instruction in singing first from Julius Meyer and Achille Errani, then in 1873 at Milan from Lamperti and San Giovanni, and finally completed her studies in America under Madame Rudersdorff and Maurice Strakosch. In 1875 she undertook a tour through the United States and Canada. She made her début in England, May 22, 1878, at the Philharmonic, with such success that she was engaged at a subsequent concert of the Society in the same season. She remained in England until the end of 1879, singing with acceptance at the Crystal Palace, the Popular Concerts, Leslie's Choir, etc., and in the summer of the same year sang in Paris and the French provinces. In 1880-81 she made an extended concert-tour through Germany, Austria, Holland, Belgium, Spain, Norway, Denmark, etc., and returned to America at the end of 1882. In 1883 she was singing in the States and Canada. Later she abandoned her public career and became a teacher in New York, where among her pupils in 1897 and 1898 was Geraldine Farrar. She made a tour of China and Japan in 1903.

A. C.; addns. H. E. K.

THYL UYLENSPIEGEL, see TILL EULENSPIEGEL.

TICHATSCHKE, JOSEPH ALOYS (*b.* Ober Weckelsdorf, Bohemia, July 11, 1807; *d.* Blasewitz, near Dresden, Jan. 18, 1886), German operatic tenor, began by studying medicine, but abandoned it for music, and received instruction in singing from Ciccimara, a favourite Italian singing-master. In 1830 he became a chorus singer at the Kärnthnerthor theatre, was next appointed chorus inspector, played small parts, and afterwards those of more importance, viz. Idreno ('Semiramide'), Alphonse ('Stumme'), and Raimbaud ('Robert'). He sang for two years at Graz, and again at Vienna, as principal tenor. On Aug. 11, 1837, he made his début at Dresden as Gustavus III. (Auber), with such success as to obtain an engagement for the following year. At this period he attracted the attention of Schroeder-Devrient, who gave him the benefit of her advice and experience, with the result of a long and intimate friendship, which terminated only with her death. Until his retirement in 1870 he remained permanently in Dresden, where, on Jan. 16, as Idomeneo, he celebrated the 40th anniversary of his professional career, having previously, on Jan. 17, 1863, celebrated his 25th anniversary at Dresden, as Fernando Cortes (Spontini). On Oct. 20, 1842, and Oct. 19, 1845, respectively, he was the original Rienzi and Tannhäuser. In 1841 he sang for a few nights in German at Drury Lane Theatre as Adolar, Tamino, Robert, etc.; also at Liverpool and Manchester.

A. C.

TIE, a curved line uniting two notes of the same pitch, whereby they form a single note which is sustained for the value of both. The tie is also called the BIND (*q.v.*), and by some writers the Ligature, although this term properly refers to certain slurred groups of notes which occur in ancient music. (See NOTATION.)

In pianoforte music ties are occasionally met with where the note, though tied, is actually repeated. To effect this repetition properly some skill and care are required; the finger which strikes the first of the two tied notes is drawn inwards, and the following finger falls over it as closely and rapidly as possible, so as to take its place before the key has had time to rise to its full distance, and therefore before the damper has quite fallen.² Thus there is no actual silence between the two sounds; the repetition takes place before the first sound has ceased, and an effect is produced which resembles the old effect of BEBUNG (*q.v.*) as nearly as the modern pianoforte can imitate it. The particular occasions on which this effect is required are not indicated by any specific sign, since an experienced performer can always

² The effect, however, is generally most readily obtained by the aid of the sustaining pedal.

¹ Real name Burke of Thomond. W. H. G. F.

judge from the nature of the passage. As a rule, it may be said that whenever two tied notes are written for which a single longer note might have been substituted, repetition is indicated—for the use of the tie proper is to express a note-value which *cannot* be represented by a single note, e.g. five quavers. Thus Ex. 1, which is an instance in point, might, if no repetition had been required, have been written in quavers, as in Ex. 2.

BEETHOVEN, Sonata, Op. 106, Adagio.

Another instance of the employment of this close repetition sometimes occurs when an unaccented note is tied to an accented one, as in Ex. 3. Here the rhythm would be entirely lost if the tied notes were sustained instead of repeated.

CHOPIN, Valse, Op. 34, No. 1.

In the same sense it seems quite possible that the subject of the scherzo of Beethoven's Sonata for piano and violoncello, op. 69, and other similar phrases, may have been intended to be played with repetition; and in support of this view it may be mentioned that an edition exists of the Sonata Pastorale, op. 28, by Cipriani Potter, who had opportunities of hearing Beethoven and becoming acquainted with his intentions, in which the analogous passage in the first movement is printed with what is evidently meant for a sign of separation between the tied notes, thus :

F. T.

TIEFFENBRUCKER, see DUFFOPRUGCAR.

TIEFLAND, opera in a prelude and 2 acts; text after A. Guimera, by Rudolph Lothar; music by Eugen d'Albert. Produced Prague, 1903; Covent Garden (in English), Oct. 5, 1910.

TIERSCE, i.e. Tiers, third. (1) A name given to the interval of the third, whether major or minor.

(2) The fourth of the series of natural harmonics, being the major third in the third

octave above the ground-tone or prime; its vibrations are five times as numerous as those of its prime.

(3) An open metal organ stop of the same pitch as the similarly named harmonic, i.e. if the note CC is held down and the Tierce-stop drawn, the E above middle C will be heard. That such a stop can only be used in combination with certain other harmonics, and then but sparingly, will be evident when it is remembered that if C, E and G be held down there will be heard at the same time G sharp and B. Hence the Tierce when found in a modern organ is generally incorporated as a rank of the Sesquialtera or Mixture, in which case it is of course combined with other harmonics, its near relations. Most organ-builders, however, altogether exclude it. A serious difficulty is now met with, if a Tierce be introduced; it is this—modern organs are tuned to 'equal temperament,' whereas the Tierce (whether a separate stop or a rank) certainly ought to be tuned to its prime in 'just intonation,' in which case tempered and natural thirds would be heard simultaneously when the Tierce is used. (See TEMPERAMENT.)

J. S.

TIERSCE DE PICARDIE. The practice of ending polyphonic compositions with a major third in the final chord, even though the third degree of the mode formed a minor interval with the final, came to be known by this name. The reason for the name is not known. C.

The reason for the practice is the presence of the major 17th as the fourth harmonic of the bass-note (see TIERCE). This must jar, in sensitive ears, with the minor third (or 17th) if sounded at the same time. L. M'C. L. D.

TIERSCH, OTTO (b. Kalberleith, Thuringia, Sept. 1, 1838; d. Berlin, Nov. 1, 1892), received instruction from Toepper of Weimar, Beller-mann, Marx and Erk; was then teacher in Stern's Conservatorium, and subsequently teacher of singing to the city of Berlin. His writings are practical, and concern themselves much with an endeavour to make the modern discoveries of Helmholtz and others, in acoustics, available in teaching singing. The principal are as follows: *System und Methode der Harmonielehre* (1868); *Elementarbuch der musikalischen Harmonie und Modulationslehre* (1874); *Kurze praktische Generalbass-Harmonielehre* (1876); the same for counterpoint and imitation (1879); *Allgemeine Musiklehre*, with Erk (1885); *Die Unzulänglichkeit der heutigen Musikstudien an den Konservatorien* (1883); and *Rhythmik, Dynamik und Phrasierungslehre* (1886). The article on 'Harmonielehre' in Mendel's *Lexikon* is by him. G.

TIERSOT, JEAN BAPTISTE ELISÉE JULLIEN (b. Bourg-en-Bresse, July 5, 1857), studied at first under the direction of his father, an excellent amateur. From 1871 he lived in Paris, and, after studying medicine for a time,

entered the Conservatoire in 1877, where he worked under Savard, Massenet and César Franck. In 1883 he was appointed sub-librarian of the institution, then librarian, a post which he filled with distinction until 1920. His writings on music are highly valued, and his researches into folk-lore of different countries have borne good fruit. His *Histoire de la chanson populaire en France*, which obtained the Prix Bordin in 1885, was published in 1889; another prize was won by his *Rouget de Lisle, son œuvre, sa vie*, which appeared in 1892. His 'Chansons populaires recueillies dans le Vivarais et le Vercors' were compiled with Vincent d'Indy, and appeared in 1892; 'Chants populaires pour les écoles' (1893-96); *Les types mélodiques dans la chanson populaire française*, 1894; other collections are 'Mélodies populaires des provinces de France' (8 series), 'Noëls français,' 'Chants de la vieille France'; 'Chansons populaires recueillies dans les Alpes françaises' came out in 1903; his *Berlioz et la société de son temps* was awarded a prize by the Académie Française in 1905; *Notes d'ethnographie musicale* (1905, 1910, 2 series); *Étude sur les maîtres chanteurs*; *Musiques pittoresques* (1889); *Les Années romantiques*; the first volume of the *Correspondance générale d'Hector Berlioz*; *Les Fêtes et les chants de la Révolution française* (1908); *Gluck* (1910), *J.-J. Rousseau* (1912), *Un Demi-siècle de musique française* (1870-1917), all three in the series *Maîtres de la musique* (Alcan); *Histoire de la Marseillaise* (1915). His most recent works are *La Musique dans la comédie de Molière* (1922), *Lettres de musiciens écrites en français du XV^e au XX^e siècle* (1924), and works on Couperin and Smetana. Numerous articles in *Le Ménestrel*, the *Revue des traditions populaires*, the *Revue Internationale de musique*, the *Sammelbände* of the Int. Mus. Ges., the *Temps*, the *Revue bleue*, the *Revue encyclopédique*, etc., testify to his industry and skill. He has edited a series of French folk-songs for America (Ditson, Schirmer), and he collaborated with Saint-Saëns in the preparation of the Pelletan edition of Gluck's works. His own compositions include a rhapsody on popular songs of La Bresse, for orchestra; 'Hellas,' for chorus and orchestra, after Shelley; incidental music to Corneille's *Andromède*, performed 1897; 'Chansons populaires françaises,' for choir and orchestra; 'Sire Halewyn,' a symphonic legend, performed at Nancy in 1897; and an orchestral suite of 'Danses populaires françaises' (1900). Tiersot was for a time professor at the École des Hautes Études Sociales de Paris. He has been president of the 'Société française de musicologie' and a contributor to its publications, and has given series of lectures on folk-lore in the United States of America, Canada, Belgium, Holland and Sweden. G. F.; addns. M. L. P.

TIETJENS (TITIENS), THERESE CATHLINE JOHANNA (b. Hamburg, July 17, 1831; d. Oct. 3, 1877), opera singer, came of Hungarian parentage.

Her voice, even in childhood, gave so much promise of future excellence that she was educated for the lyric stage. She appeared for the first time at the Hamburg Opera, in 1849, as Lucrezia Borgia, and achieved an immediate success. She proceeded to Frankfort, and thence, in 1856, to Vienna, where her performance of Valentine raised her at once to the highest rank.

Madame Jullien heard her at this time, and it was largely due to her glowing accounts that Mlle. Tietjens was quickly engaged by Lumley for his last season at Her Majesty's Theatre in London; and when, on Apr. 13, 1858, she appeared in 'The Huguenots,' her impersonation of Valentine achieved a success which increased with every repetition of the opera. England from that time became her home, and with the exception of a visit to Paris in 1863 and to America in 1876, she never henceforth appeared elsewhere. She remained at Her Majesty's Theatre during the successive managements of E. T. Smith and Mapleson, and after the burning of the theatre in 1867 followed the fortunes of the company to Drury Lane. She sang at Covent Garden during the two years' coalition of the rival houses in 1869 and 1870, returning to Drury Lane in 1871, and finally, just before her death, to the new house in the Haymarket.

Her voice had none of a soprano's shrillness or of that peculiar clearness called 'silvery'; when it declined, as it eventually did, in power, it never became wiry. It had a mezzo-soprano quality extending to the highest register, perfectly even throughout, and softer than velvet. Her acting in no way detracted from her singing; she was earnest, animated, forcible, in all she did conscientious and hearty, but not electric. Her style of singing was noble and pure. When she first came to England her rapid execution left much to be desired; it was heavy and imperfect. Fluency and flexibility were not hers by nature, but by dint of hard work she overcame all difficulties, so as to sing with success in the florid music of Rossini and Bellini. Indeed she attempted almost everything, and is perhaps the only singer, not even excepting Malibran, who has sung in such completely opposite rôles as those of Semiramide and Fidès. But her performance of light or comic parts was a mere *tour de force*; her true field was grand opera. As Lucrezia, Semiramide, Countess Almaviva, she was great; as Donna Anna and Valentine she was greater; best of all as Fidelio, and as Medea in Cherubini's opera, revived for her and not likely to be forgotten by any who heard it.

In the 'Freischütz,' as in 'Fidelio,' her appearance was unsuited to her part, but she

sang the music as no one else could sing it. In her later years she set a good example by undertaking the rôle of Ortrud in 'Lohengrin.' The music, however, did not show her voice to advantage, and this was still more the case with the music of Fidès, although her acting in both parts was very fine. Her repertory also included Leonora ('Trovatore'), the Favorita, Alice, Lucia, Amalia ('Un ballo in maschera'), Norma, Pamina, Margherita, Marta, Elvira ('Ernani'), Reiza ('Oberon') and Iphigenia (in Tauris).

Her voice was as well suited to sacred as to dramatic music, and she applied herself assiduously to the study of oratorio, for which her services were in perpetual request.

The first symptoms of the internal disorder which proved fatal to her appeared in 1875, but yielded to treatment. They recurred during a visit to America in the next year, but were again warded off for the time, and throughout a subsequent provincial tour in England she sang 'as well as she had ever done in her life.' In 1876 she had her last benefit concert at the Albert Hall, but she sang at a benefit concert in Dublin on Jan. 8, 1877. In Apr. 1877 her illness increased to an alarming extent, and her last stage appearance was on May 19, as Lucrezia. She fainted twice during the performance, in her dressing-room; but she would appear, though she had to undergo a painful operation on the following Tuesday. 'If I am to die,' she said to a friend, 'I will play Lucrezia once more.' Those who then heard her will always recall her rendering of the despairing cry after Gennaro's death. She died Oct. 3, 1877, and was buried in Kensal Green Cemetery.

F. A. M.

TIGRINI, ORAZIO (b. Arezzo), was canon at Arezzo in 1588, and maestro di cappella of the cathedral in 1591. He composed 1 book of madrigals *a 4 v.* (1573), 2 books *a 6 v.* (1582, 1591), and wrote *Il compendio della musica*, a work on counterpoint in 4 books (1588, 2nd ed. 1602). (*Q.-L.*)

TILL EULENSPIEGEL. (1) Symphonic poem, 'Till Eulenspiegels lustige Streiche,' by Richard Strauss, op. 28 (1894).

(2) Opera, 'Thyl Uylenspiegel,' in 3 acts, text by Henri Cain and Lucien Solvarg, music by Jan Blockx. Produced Théâtre de la Monnaie, Brussels, early in 1900.

TILMANT, (1) THÉOPHILE ALEXANDRE (b. Valenciennes, July 9, 1799; d. Asnières, May 8, 1878), French conductor, was educated at the Paris Conservatoire, where he took the first violin prize in R. Kreutzer's class in 1819. He played with great fire and brilliance, and had a wonderful instinct for harmony, though without much scientific knowledge. On the formation of the Société des Concerts in 1828 he was appointed vice-conductor, and also played solo in a concerto by Mayseder. In 1834 he

became vice- and in 1838 chief-conductor at the Théâtre Italien, where he remained till 1849. In 1838, with his brother (2) **ALEXANDRE** (b. Valenciennes, Oct. 2, 1808; d. Paris, June 13, 1880), a distinguished violoncellist, he founded a quartet-society, which maintained its popularity for some ten years or so.

In 1849 Théophile succeeded Labarre as conductor of the Opéra-Comique, an enviable and responsible post, which he held for nearly twenty years (1849-68). The composers whose operas he mounted found him earnest and conscientious, and he conducted with a fire and a dash perfectly irresistible, both there and at the Concerts du Conservatoire, which he directed from 1860-63. In 1868 he left the Opéra-Comique, and retired to Asnières, where he died. He received the Legion of Honour in 1861.

G. C.

TIMBALES is the French word for Kettledrums. (See **DRUM**, 2.)

TIMBRE (Fr.); (Ger. *Klangfarbe*) has been adopted in English with more recently 'tone colour' as equivalent to the German¹ as an expression for quality. (See **ACOUSTICS**, subsection **QUALITY**.)

TIMBREL, see **TAMBOURINE**.

TIME. Under this general heading it will be well to define the sense in which certain technical terms which concern time rather than tune are used in this book. Those in capitals are the subjects of separate articles.²

ACCENT is an importance given to one note over another. This may be done by deliberate stress, *i.e.* greater volume of sound; but there are five other ways, which may, or may not, be accompanied by stress. When accent recurs regularly it becomes the strong **BEAT** or pulse, a moment of action as against one of reaction, which marks the beginning of a group, bar or period. Music is written within bars as a design may be drawn on squared paper; the squares are rubbed out and the bar-lines are not heard. The **BAR** is an arbitrary division providing orderly accents round which phrases may cluster. This orderliness is called **TIME**. There are many orders of time; time-signatures establish the rule, and various corrective or contradictory time-signs the exceptions which prove it. The **PERIOD** differs from the bar in being larger (as the group is smaller) and in not being marked off by bar-lines; whereas in poetry the (larger) verse is marked off and the (smaller) foot is not. Irrespective of its divisions large or small, music goes at a certain pace (**TEMPO**); in a sense, pace is absolute, capable of exact definition, but in a truer sense it is relative, like everything else in music.

Those are the formal elements of time; they

¹ Tyndall adopted 'Clang-tint' as a translation of the German term.

² They form a group, all by the same writer. C.

stand over against the substance of music which is expressed in *METRE*. Metre is concerned with durations as such, their combinations and contrasts, and their suitable notation, and it thus builds the musical sentence.

Behind form and substance, and combining them, is *RHYTHM*. Rhythm, *lit.* 'flow,' is a reading of, a judgment as to the meaning of, music. Into this judgment accent, time, period, pace and metre all enter in their degree; but in any concrete instance rhythm is personal to the musician in a sense in which the others are not. If these others are the vital forces of music, rhythm is the life itself.

TIME PROPER.—We need not try, as the ancients did, to measure absolutely the time-unit (see *BEAT*). We may be content to notice that *tempo giusto*, the pace which is neither fast nor slow to us, corresponds to the healthy pulse of the blood, and when we think of that pulse as fast to contrast it with a slower, and conversely. So long as the words of poetry rule the melody, music has no need to establish a numerical relation between the short and the long; it merely arranges them in patterns like the feet of verse,¹ and the solution of the problems offered by the treatises of the 12th and 13th centuries is to be found in the verse structure of the period. (See *RHYTHMIC MODES*.) The precedence there given to triple time, *tempus perfectum* (normal), is probably to be explained, not by any fancied ascription to the Trinity but by the fact that the trochee (—, ♩) and iamb (—, ♩),

both involving triple time, were the normal metrical feet of poetry, whereas the dactyl (—, ♩) and anapæst (—, ♩) involving duple time, were abnormal (*imperfectum*).

But with the concurrent growth of instrumental music and its emergence as an art independent of poetry, measurement of note-lengths became necessary.

Neither pitch nor duration can be accurately measured before instruments have made considerable progress, for though these are only what man chooses to make them, and he chooses only what his songs have taught him to want, yet arguments from what singers have said of scale and time are apt to lack the precision which an instrument with its ancillary notation supplies.

TIME-SIGNATURES.—(Cf. *NOTATION*.) About the time of a piece of music we want to know two things—where do the bar divisions and where do the group divisions come? The first is answered by the bar-lines, and the second is sometimes to be seen in the numerator of the time-signature and sometimes to be in-

ferred from it. The information given by the denominator is otiose, because a glance at the music supplies it. As one of our questions is better answered elsewhere and the other only half answered, it is not surprising that musicians usually ignore the time-signature. The fact is that we have superinduced the bar-line upon the Elizabethan time-signatures and have not noticed that it renders them largely nugatory. Erik Satie, quite logically, writes time-signatures and omits the bar-lines. D'Indy, equally logically, has sometimes written bar-lines and omitted the denominator of the time-signature.

THE EXISTING SYSTEM.—The time is given in the signature, which is a fraction of the semibreve. Of this fraction the denominator is always a power of 2 (2, 4, 8, 16, etc.), and states the component time-units (minim down to semiquaver, etc.). The numerator tells us how many of these compose a bar, and though this may be any number whatever, it is usually one of the following:

2, 4, 8; 3, 6, 9; 12, 24; 5, 7.

Time is duple or triple, and simple or compound. Duple used to be called common, a name now usually restricted to $\frac{4}{4}$.

	Duple.				Triple.				Quin- tuple.		Septu- tuple.	
Simple	2	2	2		3	3	3	3	5	5	7	7
	2	4	8		2	4	8	16	4	8	4	8
Common	4	4	4	4					10	10	14	14
	2	4	8	16					4	8	4	8
				8								
				8								
Compound	6	6	6	6	9	9	9	9	15	15		
	2	4	8	16	2	4	8	16	4	8		
		12	12	12		18	18					
		4	8	16		8	16					
				24								
				16						27		
				36						32		
				64								

SIMPLE TIME has a prime number for the numerator, viz. 2 (duple), 3 (triple), 5 (quintuple), 7 (septuple). The ear embraces immediately 2 and 3 as unities; it only gradually recognises 5 and perhaps 7 as a unity; a chorus in 'Sadko' (Rimsky-Korsakov) is written with 11 as a unity. Simple time has one strong beat in the bar, e.g. $\frac{2}{4}$ | ♩ or $\frac{3}{4}$ | ♩, which may break up into groups,

$\frac{2}{4}$ | ♩ ♩ | ♩ ♩ ♩ | ♩ ♩ ♩ ♩ |, etc.,

each with a beat of its own, but the signature is not changed in consequence.

¹ See *Oxf. Hist. Mus.* i. 102-56 and Riemann's *Geschichte der Notenschrift*, pp. 139-224.

COMPOUND TIME.—In Germany simple times are divided into 'equal' (duple) and 'unequal' (triple), and all combinations of both of these are called compound. In England the practice has been to reserve the name 'compound' to those times whose numerator is a multiple of 3 (viz. 6, 9, 12, 15, etc.), and to call those which are multiples of 2, but not of 3, 'common' (viz. 4, 8, 10, 14, etc.). The above diagram will make this clear. Observe that there is no common triple time, because its signature would have been indistinguishable from that of the corresponding compound duple; the simple triple is used subdivided.

GROUPS.—A bar is defined by the number of its groups, not of its time-units, as may be shown by taking 12 quavers and varying the groups. The following are from the 'Wohltemperiertes Clavier':

1.  Prel. II, 10, E mi.

6.  Fug. II, 18, G# mi.

12.  Prel. I, 11, F ma.

6.  Fug. II, 11, F ma.

12.  Prel. I, 13, F# ma.

24.  Prel. I, 15, G ma.

2.  Fug. II, 12, F mi.

3.  Prel. II, 11, F ma.

3.  Fug. I, 6, D mi.

6.  Prel. I, 4, C# mi.

In no two of these ten ways is both bar and group exactly the same, and we see it to be likely that there is no distinction of any practical value which notation cannot express. If it is desired to alter the size of the time-unit (see under METRE, subsection CHOICE OF TIME-UNIT) the denominator is multiplied or divided by 2, and the beat remains the same. The larger the number of time-units within the bar, the smoother the flow of the time. Prelude and Fugue II. 11, for instance, make an effective contrast.

ADDED TIMES.—Until lately $\frac{3}{4}$ and $\frac{7}{4}$ have been taken as 'added' times, and as such they

are outside the European system, which multiplies. $\frac{3}{4}$ has been taken more commonly as 2+3 than as 3+2, and $\frac{7}{4}$ as 3+4 rather than 4+3. The same applies to five-bar periods; seven-bar periods are too uncommon as yet to dogmatise about. We are beginning to reach the conception of $\frac{3}{4}$ and $\frac{7}{4}$ as simple times, i.e. as taken in one sweep: common times $\frac{1}{2}$ and $\frac{1}{4}$ are possible, but rare.

REMARKS.—It is worth while to examine closely the Arietta of Beethoven, op. 111. It begins by expressing $\frac{3}{4}$ as $\frac{9}{16}$, which obviates the necessity of writing the semiquavers as triplets. The first variation is marked *L'istesso tempo*, which must mean that the $\frac{3}{4}$ of

$\frac{9}{16}$ now reverts to the $\frac{3}{4}$ of $\frac{3}{4}$ (). That is incorrectly described as $\frac{9}{16}$ (which

would be ). In the second variation, with $\frac{3}{2}$, the $\frac{3}{4}$'s are tripleted; but, thinking these triplets away, we get the motion , which again is

$\frac{3}{4}$ (for $\frac{3}{2}$ would be ). $\frac{3}{4}$ is the only possible signature; for $\frac{3}{8}$, suggested in the *Ency. Brit.* (to avoid triplets),

would be  (four times over), which is $\frac{3}{2}$ again.

In Ravel's 'D'Anne qui me jecta' $\frac{3}{4}$ (meaning $\frac{3}{4}$) occurs after $\frac{5}{4}$ to save trouble. In a similar interchange of $\frac{3}{4}$ (correctly used) and $\frac{5}{4}$ D'Indy in op. 45 draws a dotted line to make the division clear. Five-time being either 2+3 (Tchaikovsky, 6th symphony, and many folksongs) or 3+2 (Holst, 'Mars'), it is possible either to follow D'Indy or to place, with Brahms (C minor trio, andante), $\frac{3}{4}$ $\frac{2}{4}$ and $\frac{2}{4}$ $\frac{3}{4}$ for the signatures; in this case Brahms obtains by his barring a mixture of 3+4, 6+8, and 3+2 (see under BEAT, subsection NUMBER OF BEATS).

INTERNAL TIME-SIGNS.—Notation must always lag behind the swift grace of performance, and motions which are intended to be perfectly flexible to the ear must often be set down rigidly for the fingers. When duplets are set against six-eighths or triplets against two-four, it is not intended that one note shall be two-thirds or three-halves of the other, but that each melody shall be felt as an independent whole. When duplets and triplets occur in the same melody, as in Schumann's 'Eusebius,' in much of Chopin, or at Brahms's climaxes, they are to be taken less at their face value than as written out rubatos. And the same when two different times are set against one another, as in Brahms's G major violin sonata.

Here the piano keeps on with its $\frac{6}{4}$ time but breaks a sextolet into two triplets, beginning this in the right hand a little before the left. The violin thinks in the larger sweep of $\frac{3}{4}$ tripleted. The piano also gives a hint of $\frac{3}{4}$ by the slight accents in the right hand, after slipping, by the figuration from $\frac{6}{4}$ into $\frac{3}{4}$. The general effect of this *ritardando*-without-retarding is greatly to broaden the passage.

ALTERNATIVE TIME-INDICATIONS.—Of alternations within the bar that of 3 and 2 is commonest. Either the group is equal to the group, as in $\frac{2}{4}$ | $\frac{3}{4}$ | and $\frac{6}{8}$ | $\frac{3}{4}$ |, or the bar to the bar, as when two dotted crotchets $\frac{6}{8}$ | $\frac{3}{4}$ | appear as three crotchets $\frac{3}{4}$ | $\frac{3}{4}$ | (the quaver being the common unit) but it is not worth while to alter the signature $\frac{6}{8}$, because such a simple equation is within every one's understanding. But the time-unit can be maintained only by changing the signature, as in $\frac{2}{4}$ | $\frac{6}{8}$ | $\frac{3}{4}$ |. There are also ways of temporarily contradicting the bar-accent which are exemplified under SYNCOPATION.

A. H. F. S.

TIMPAN (Lat. *tympānum*; Irish, *tiompan*; English, *timpe*). A form of psaltery with wire strings plucked by the fingers or a quill plectrum, and in later times struck with a rod or short stick. It was formerly in use in Ireland, Scotland and England. Dunstan, Archbishop of Canterbury, excelled not only on the harp but 'in timphano,' and Giralduſ (12th cent.) records that amongst the Irish and the Scots the *Tympanum*, as well as the *Cithara*, was popular. It was sometimes called *Benn Crot* or the 'pointed' Cruit (see CRAWTH), and in a 13th-century English version of the French *Romance de Brut* the word *Timpe* is given as a translation of ROTTE (q.v.), in the same way as in the 10th century the word *Rotte* is used as a translation of *Tympanum*. The French still call the dulcimer *Tympanon*. (See PSALTERY and DULCIMER.) F. W. G.

TIMPANI is the Italian word for kettle-drums. Printers and copyists often substitute *y* for *i* in this word, a mistake, since the letter *y* does not exist in the Italian language. (See DRUM, 2.) v. de P.

TINCTORIS, JOANNES DE (b. Poperinghe, Belgium, c. 1446; d. Nivelles, Brabant, before Oct. 12, 1511),¹ known in Italy as Giovanni del Tintore, and in England as John Tinctore. The peculiar form of his name has led to the supposition that he was the son of a dyer; but the custom of using the genitive case, when translating proper names into Latin, was so common in Flanders during the middle ages, that it cannot, in this instance, be accepted as a proof of the fact. All we really know of his social status is, that his profound learning and varied attainments were rewarded with honourable appointments, both in his own country and in Italy. In early youth he studied the law; took the degree of Doctor, first in Jurisprudence, and afterwards in Theology; was admitted to the priesthood, and eventually obtained a Canonry in his native town. In 1476 he was in the service of Ferdinand of Aragon, King of Naples, who appointed him his chaplain and cantor, and treated him with marked consideration and respect. Between 1484 and 1500 he was a member of the Papal Chapel.² At Naples he founded a public music-school, composed much music, and wrote the greater number of his theoretical works. Franchinus Gafurius makes honourable mention of him in several places. Few of his compositions have been printed, but several exist in MS. among the Archives of the Pontifical Chapel, at Dijon, etc. Petrucci's 'Odhecaton' (1501) and his 'Lamentationes' (1506) contain examples of Tinctore's work. A Mass, 'Virgo Dei trono,' a 4, is in an incomplete copy at St. Gall. One of these, a 'Missa l'homme armé,' a 5, is remarkable for the number of extraneous sentences interpolated

into the text. In the Sanctus the tenor is made to sing 'Cherubim ac Seraphim, caeterique spiritus angelici Deo in altissimis incessabili voce proclamant'; in the first Osanna, the altus sings 'Pueri Hebraeorum stementes vestimenta ramos palmarum Iesu filio David, clamabant'; and in the Benedictus, the tenor interpolates 'Benedictus semper sit filius Altissimi, qui de coelis huc venit'; while, in each case, the other voices sing the usual words of the Mass.

The theoretical works of J. de Tinctoris are more numerous and important, by far, than his compositions. Their titles are *Expositio manus*; *Liber de natura et proprietate tonorum* (1476); *De notis ac pausa*; *De regulari valore notarum*; *Liber imperfectionum notarum*; *Tractatus alterationum*; *Super punctis musicalibus*; *Liber de arte contrapuncti*; *Proportionale musices*; *Complexus effectuum musices*; *Terminorum musicae diffinitorium* (undoubtedly the first musical dictionary that ever was printed); and *De inventione et usu musicae*, recently recovered and described by Weinmann (see Bibliography below). The *Terminorum musicae diffinitorium* is of such extreme rarity that, until Forkel discovered a copy in the library of the Duke of Gotha, in the latter half of the 18th century, it was altogether unknown. About the same time Dr. Burney discovered another copy in the library of King George III., now in the British Museum.¹ A third copy is in the Library of the Ges. der Musikfreunde at Vienna. The work is undated, and the place of publication is not mentioned; but there is reason for believing that it was printed at Naples about the year 1474. It contains 291 definitions of musical terms, arranged in alphabetical order, exactly in the form of an ordinary dictionary. The language is terse and vigorous, and, in most cases, very much to the purpose. Indeed it would be difficult to overestimate the value of the light thrown, by some of the definitions, upon the musical terminology of the middle ages. Some of the explanations, however, involve rather curious anomalies, as for instance, 'MELODIA idem est quod armonia.'

Forkel reprinted the entire work in his *Literatur der Musik*, p. 204, etc.; and his reprint was republished, in the original Latin, under the editorship of John Bishop, of Cheltenham, by Cocks & Co.² It appears with the other treatises in Coussemaker's *Scriptores*; it was translated by H. Bellermann in Chrysander's *Jahrbuch*, i. 1863. MS. copies existing in various libraries are noted in Q.-L.

TINEL, EDGAR (b. Sinay, Belgium, Mar. 27, 1854; d. Brussels, Oct. 28, 1912), composer and teacher, for four years director of the Brussels Conservatoire, was educated at the Brussels Conservatoire under Brassin, Gevaert and Kufferath, obtaining the Prix de Rome with a cantata, 'Klokke Roeland,' in 1877; the work afterwards appeared as op. 17.

In 1882 he was appointed to succeed Lemmens as director of the institute for church music at Malines; in 1889 he became inspector of musical studies in the state schools, and in 1896 succeeded Kufferath as the professor of counterpoint in the Brussels Conservatoire. His op. 1 was a set of four 'nocturnes' for voice and piano, and various works obtained success before the production of his oratorio, 'Franciscus,' op. 36, one of his most important choral works. The sound workmanship, and the contrapuntal and orchestral skill shown throughout, won it success in various countries; its first important English performance was at the Cardiff Festival of 1895. Effective as it is, there are moments when reminiscences of other composers cannot be disguised, and a sense of incongruity, due perhaps to the libretto, is felt in the portions of the work which set the worldly and spiritual elements in contrast. A *Te Deum*, op. 26, and a later setting of the same hymn, op. 46 (1907), show the composer in a more serious light; as do also his beautiful 'Geistliche Gesänge' for mixed choir, op. 33, the 'Marienlieder,' an Alleluia for equal voices and organ, the Mass in honour of the Holy Virgin of Lourdes (op. 41), etc. For the stage he wrote music to Corneille's 'Polyeucte,' from which an orchestral suite was arranged and brought out in 1906; two religious music dramas, 'Godoleva' (produced 1897) and 'Katharina' (Brussels, 1909). Two works for tenor and baritone solo respectively, with chorus and orchestra, are 'Kolledjoemen' and 'De drie Ridders.' A valuable treatise on *Le Chant gregorien, théorie sommaire de son exécution*, appeared in 1895, and was translated into Italian in 1901.

TIORBA (Ital.), see THEORBO.

TIRABOSCHI, GIROLAMO (b. Bergamo, Dec. 28, 1731; d. Modena, June 3, 1784), writer on Italian literature, was educated by the Jesuits, to which order he at one time belonged. He was librarian of the Brera in Milan for some years, and in 1770 removed to a similar post at Modena. His *Storia della letteratura italiana* (13 vols. quarto, 1772 to 1782) includes the history of Italian music. He published besides *Biblioteca modenese* (6 vols., 1781 to 1786), the last volume of which, 'Notizie de' pittori, scultori, incisori, ed architetti, nati degli Stati del Sig. Duca di Modena,' has an appendix of musicians.

F. G.

TIRANA, an Andalusian dance of a very graceful description, danced to an extremely rhythmical air in 6-8 time. The words which accompany the music are written in 'coplas' or stanzas of four lines, without any 'estrevillo.' (See SEGUIDILLA.) There are several of them in Preciso's 'Collection de Coplas,' etc. (Madrid, 1799), and in Paz's 'Collection d'airs espagnols,' c. 1816.

Tiranas are generally danced and sung to a guitar accompaniment. The music of one ('Si la mar fuera de tinta') will be found in 'Arias y Canciones Nacionales Españoles' (London, Lonsdale, 1871). See SONG, subsection SPAIN (4).

TIRARSI, DA, see TROMBA DA TIRARSI.

TIRÉ, the French designation for a down-stroke of the bow in violin, viola and violoncello music.

TITELOUZE, JEAN, canon and organist of Rouen Cathedral, 1563-1633, was often summoned to Paris as an expert at the time of the reception of the great organs (the Abbey of Saint Denis, 1604; Notre-Dame, 1610). In 1623 he published his 'Hymnes de l'Église pour toucher sur l'orgue, avec les fugues et recherches sur leur plain-chant.' He also published some verses of the Magnificat. This founder of French organ music wrote in a serious and lofty style, with very skilful counterpoint. His works have been republished by Guilman and Pirro ('Archives des maîtres de l'orgue'), vol. 1.
